98th Foot—Sub-Lieut. F. G. Preston to be Lieut.; Feb. 28, 1874.

100th Foot—Lieut. C. V. S. Downes to be Instr. of Musketry, vice Lieut. W. Gatey, deceased; July 31, 1876.

102nd Foot—Major J. A. Woods retires on a pension.

104th Foot—Capt. H. J. R. Villiers-Stuart retires from the Service, receiving the value of his commission.

108th Foot—Lieut. S. Moores resigns his appointment as Adjt.

1st West India Regiment—Sub-Lieuts. A. Bosworth, E. P. Apthorp, E. Herapath, and T. H. Haughton to be Lieuts.; Feb. 11, 1877.

2nd West India Regiment—Sub-Lieut. C. E. Baumann to be Lieut.; Feb. 11, 1876.

Unattached List—Sub-Lieut. W. H. Wyndham-Quin resigns commission.

Medical Department—Depty. Surg.-Gen. H. L. Cowen retires upon half pay; Jan. 24, 1877. Surg.-Major J. Fraser, M.D., retires upon half pay; Dec. 6, 1876. Surg.-Major R. Gillespie, M.D., from half pay, to be Surg.-Major; Feb 1, 1877. Surg. J. J. O'Grady resigns commission; Feb. 17, 1877. The surname of the gentleman appointed a Staff Assist.-Surg., in the *Gazette* of Sept. 19, 1871 (and now Surg.), is A*n*thonisz and not Authonisz, as therein stated.

BREVET.

Major J. A. Woods, 102nd Foot, to have the hon. rank of Lieut.-Col. upon retiring on a pension.

Capt. A. R. Keogh, half pay, late 14th Foot, to have the hon. rank of Major on retiring from the Service; Feb. 10, 1877.

Capt. J. Bourke, 29th Foot, to have the hon. rank of Major on retiring from the Service.

Depty. Surg.-Gen. H. L. Cowen, who retires upon half pay, to have the hon. rank of Surg.-Gen.

Surg.-Major J. Fraser, M.D., who retires upon half pay, to have the hon. rank of Depty. Surg.-Gen.; Dec. 6, 1876.

The undermentioned officers to be Colonels:—Lieut.-Cols. F. C. J. Brownlow, Bengal S.C.; Oct. 11, 1876. A. K. Comber, Bengal S.C.; W. R. Gordon, Bengal S.C.; J. Burn, Bengal S.C.; J. D. Swayne, Bengal S.C.; and J. C. Wood, Bengal S.C.; Dec. 12, 1876. T. J. Forster, Bengal S.C.; F. C. Anderson, Bengal S.C.; and M. Hunter, Bengal S.C.; Dec. 13, 1876. C. J. Bruce, Madras S.C., T. B. Harrison, Bengal S.C.; and W. H. Smith, Bengal S.C.; Dec. 20, 1876. A. Francis, Madras S.C., Dec. 27, 1876; and Brevet Lieut.-Col. H. F. Brooke, half pay, late 109th Foot, a Depty. Adjt.-Gen. in Bengal; Feb. 3, 1877.

The undermentioned officers in H.M.'s Indian Military Forces to be granted a step of honorary rank on retirement:—

To be Surgs.-Gen.:—Depty. Surgs.-Gen. G. G. W. Maitland, Bombay Army; T. B. Johnstone, Bombay Army; and G. Banister, Bengal Army.

To be Depty. Surg.-Gen.:—Surg.-Major D. Young, Bengal Army.

MEMORANDA.

Capt. E. R. Keogh, half pay, late 14th Foot, retires from the Service, receiving the value of his commission; Feb. 10, 1877.

The undermentioned officers have been appointed Probationers for the Indian S.C.:—Lieuts. C. H. H. Beley, 1st Foot; G. A. Collins, 5th Foot: H. L. Ramsay, 6th Foot; E. H. H. Montresor, 8th Foot; A. W. T. Radcliffe, 12th Foot; L. J. Browne, 54th Foot; G. L. T. Denniss, 62nd Foot; W. G. Mansel, 68th Foot; A. Jones, 70th Foot; and W. G. Dunsford, 108th Foot.

The Militia Gazette.

Derbyshire—Sub.-Lieut. V. H. Crewe resigns commission.

Westmoreland and Cumberland—Lieut. J. P. Shepherd to be Capt., vice J. J. Spedding, resigned.

The Victoria (Philosophical) Institute held a meeting at 10, Adelphi-terrace, on Monday evening, Dr. C. Brooke, F.R.S., in the chair, when Mr. Morshead read a paper on "Comparative Psychology." It was announced that the society would hold the first of a series of large meetings on April 9, at the Society of Arts' House, and that the next paper in March would be read by Professor Birks, of Cambridge.

INDIA.

The *Journal Officiel* of the 17th inst. announces that by a decree dated Dec. 28 last the President of the Republic has awarded a gold medal to Col. G. Caulfield, Bengal Infantry, for having saved a child from drowning in the port of Boulogne on Sept. 11, 1876. On the day mentioned a boy about twelve years of age was fishing on a flight of steps of the Western pier, when the swell caused by the paddle of a steamer arriving from Folkestone swept the boy off his feet and carried him some distance from the steps. A line was thrown, which the boy failed to catch, and he had already sank twice, when Col. Caulfield, who was taking his daily walk, arrived, saw how matters stood, and, without a moment's hesitation, plunged in with all his clothes, seized the boy as he was sinking for the third time, and brought him to land. Having handed the boy to persons on the pier, the colonel, to quote the words of a Frenchman who witnessed the affair, "shook himself like a Newfoundland dog and walked home." In half an hour the gallant colonel, over whose head some sixty summers have passed without leaving much trace, had quietly resumed his constitutional walk on the pier.

Capt. R. H. MacVitie, late of the 49th Bengal N.I., died near Dumfries on the 7th inst.

The Indian gazettes notify that the Secretary of State for India has ordered that any military officer employed beyond Indian limits shall receive from the Indian revenues for a period of three years, whilst so employed, English furlough pay of his rank, in addition to the allowances that may be assigned to him from other sources. His service shall also count for pension by his contributing to the Indian Exchequer one-fifth of the emoluments he receives.

The *Standard* has been asked to contradict the statement that the English Cavalry regiments serving in India are to be increased to the same strength as before the Mutiny.

The will, dated June 22, 1868, of Gen. W. Prescott, Madras Infantry, late of Blackheath, who died on Dec. 2 last at Genoa, was proved on the 7th inst. by Mrs. Maria Prescott, the widow and sole executrix, to whom he gives and bequeaths all his property. The personal estate is sworn under £10,000.

It is stated that the true explanation of the allegation, that the commanding officer of every regiment taking part in the ceremony on the occasion of the Imperial Assemblage on the 1st inst. was directed to see that his men were supplied with the regulation quantity of ball cartridge, is that it is a part of the equipment of every soldier with a regiment directed to appear in "review order" that he should carry in his pouch the regulation number of rounds of ball ammunition. Upon the occasion in question the troops were ordered out in review order; there was, therefore, nothing strange in the carrying in their pouches the proper amount of ball cartridge.

Capt. C. A. Cuningham, Bombay S.C., who has been officiating as a brigade-major, has been placed on the establishment from the 11th ult., vice Major M. J. J. Mignon, Bombay S.C. Capt. Cuningham entered the Army June 20, 1858; became lieut., July 26, 1861; and capt., June 20, 1870.

Lieut.-Col. W. Howey, Bengal Infantry, has been appointed to Meerut for general duty.

Major C. R. Cock, Bengal S.C., station staff officer at Jhelum, has been appointed officiating brigade-major at Mooltan during the absence of Major J. S. Irvine.

The command of the Punjab Frontier Force is likely to be vacated by Brigdr.-Gen. C. P. Keyes, C.B., Madras S.C. Report says that Brigdr.-Gen. H. T. Macpherson, V.C., C.B., Bengal S.C., will fill the vacancy.

Major-Gen. F. F. Maude, C.B., V.C., will succeed Major-Gen. A. Macdonell, C.B., in the command of the Rawul Pindee Division. Major-Gen. A. Ewart, whose appointment was recently announced, will assume command at Allahabad on his arrival in India.

The Afredees have made several fresh raids. At their last visit they killed a police-constable and sergeant, and committed some depredations, robbing the police-station of such arms as were there.

The vacancy among the depty. assist. qrmr.-gens., caused by the transfer of Capt. E. F. Chapman to the list of assist. qrmr.-gens., has been filled by Capt. R. McG. Stewart, Royal Artillery, who has been for some time officiating as depty. assist. qrmr.-gen. of the Allahabad Division. Capt. Stewart entered the Army Dec. 18, 1860, and became capt. Feb, 4, 1873.

Col. J. C. Wood, Bengal S.C., has been permitted to retire from the Service on a pension of £365 per annum, with an additional annuity of £288 19s., with effect from the 7th inst.

The following is a list of the candidates for H.M.'s Indian Medical Service who were successful at the competitive examination held on the 12th inst. at Burlington House. Forty-six candidates competed for twenty-seven appointments. All were reported qualified:—1, T. K. Rogers, 2,519; 2, W. K. Hatch, 2,349; 3, W. Owen, 2,345; 4, W. Coury, 2,315; 5, H. D. Masani, 2,265; 6, D. M. Jack, 2,220; 7, H. A. F. Nailer, 2,210; 8, R. J. Taaffe, 2,194; 9, W. Gillies, 2,185; 10, G. J. Kellie, 2,180; 11, K. R. Kirtikar, 2,150; 12, I. Mullane, M.D., 2,100; 13, G. C. Bouton, 2,082; 14, D. Basu, 2,065; 15, I. A. Nelis, 2,045; 16, D. Mullen, M.D., 2,043; 17, E. L. Robinson, 2,016; 18, A. W. Mackenzie, 2,015; 19, J. G. Hancock, 2,010; 20, A. M. Crofts, 1,975; 21, W. Coates, M.D., 1,947; 22, D. Elcum, 1,945; 23, N. Chatterjie, 1,925; 24, M. J. MacCarthy, M.D. (Mr. MacCarthy having withdrawn, Mr. B. L. Dutt is appointed in his place), 1,919; 25, James Crofts, M.D., 1,880; 26, W. B. Smyth, 1,853; 27, J. Blood, 1,822.

"Justice" asks "why barrack-sergeants are only allowed 15s. a-year compensation in lieu of two pairs of boots, whereas others in the Service receive 22s. a-year, or 1s. 10d. per month?"

The funeral obsequies of the late Gen. Changarnier were celebrated at Paris on Saturday last with great pomp, a large number of troops of all arms being drawn up in the Place des Invalides. Gens. Duplessis and Bauer and MM. Baze and Audreu de Kerdrel acted as pall-bearers. Marshal MacMahon and many generals, senators, and deputies were also present. Cardinal Guibert, Archbishop of Paris, officiated.

Rossetter's Hair Restorer.—This unrivalled preparation has now been before the public for many years, and as its success has led to several spurious imitations, the public should be on their guard. Rossetter's preparation is the only one that will with certainty restore grey hair to its original colour, remove dandruff, prevent the hair from falling off, promote its growth, and give it the lustre of youth.

NOTICES TO CORRESPONDENTS.

No communications can be published which are not accompanied by the name of the writer, given in confidence to the EDITOR.

Letters cannot be received in answer to Advertisements.

Remittances should be made payable to Mr. RICHARD JAMES WOOD, to whom all business communications should be addressed.

The controversy respecting the prize agents' action in reference to the Banda and Kirwee Prize Money cannot be continued in our columns.

J. S. L.—Your points are not new. They resolve themselves in effect into a complaint that those who come after you will be better off than you are.

C. M. D.—Eleven.

ONE WHOM IT CONCERNS.—You do not take the right view of the case, for the colour or cut of one's clothes do not make him "a respectable member of society." Respect yourselves and the honourable profession to which you belong, and you will find you will be respected on all sides. As for *paying* for the articles, you may have them free if you will be content to draw less pay, as in the sister Service.

VICE-ADMIRAL.—Thank you. It was a confusion between the election of schemes.

HEAD-ACHE SHAKO.—No actual decision has yet been arrived at.

Army & Navy Gazette.

LONDON, SATURDAY, FEBRUARY 24, 1877.

The Committee which has drawn up its Report on Brigade Depôts was instructed "to enquire into and report upon the general working of the present Brigade Depôt system," and "into the position of Militia officers, and the effect of recent changes in the Militia." But its members were also prompted to investigate any other question which might arise in connection with these subjects during the progress of their enquiry. The Chairman of this Committee was the Hon. Frederic Stanley, the Financial

Secretary of the War Office, and a commanding officer of Militia, a branch of the Service that was further represented by the Duke of Buccleuch, the Marquis of Exeter, the Earl of Limerick, and Colonel Corbet, M.P. The members from the Regular Forces consisted of Sir Garnet Wolseley, Major-General Taylor—then Inspector-General of Recruiting—Major-General Arthur Herbert, Sir Henry Havelock, Colonel Bulwer, and Colonel Greaves. It was hardly to be expected that a Court so constituted would have made any very revolutionary suggestion. But expectations are not always realized, and in the present case those who read the recommendation of the Committee have to rub their eyes and ask themselves seriously whether it is not a lampoon against Mr. Holms? It hardly appears whence the ideas that prompted the recommendations can have sprung. As far as we can judge, the Report has not yet been issued or presented to Parliament, but has been published to the world in a daily newspaper. Thus the list of witnesses is possibly incomplete, and we may feel tolerably certain that neither his Royal Highness the Commander-in-Chief nor General Peel urged on the Committee the views that their recommendations put forward. These first advocate that the system of linked battalions should be carried out to its logical conclusion. The result will be that all regiments of higher numbers than those twenty-five of the Line which have already two battalions will be pitchforked together as shown in another column. The old traditions due to the old numbers, the illustrious deeds done by the 53rd, the 42nd, and their comrades, are to be blotted out and ruthlessly ignored. The facings of the bulk of the battalions will be altered and made one common blue, which has hitherto been a special distinction. If the Committee wish to destroy utterly the *esprit de corps* and brilliant memories of the Army they must certainly be congratulated on the efficiency of the measures that they desire to see adopted. Nor is this all. The promotion that still remains to the British officer is, indeed, small; but of much of that would the Committee still further deprive him. It is proposed that, as each regiment will consist of two linked battalions, the promotion of officers should be on one list common to the two battalions. As one battalion is to be always abroad and one at home, this arrangement will at once destroy the chances of promotion which come from officers leaving who do not wish to go abroad or desire to return home. It will also destroy the steps that arise from exchanges, as officers would be able to exchange from foreign to home stations without going to the bottom of their rank. How much better it would be if the War Office would devote itself to carrying out the recommendation of the Commission for increasing promotion, than in passing recommendations which threaten to deprive the officer of even the little promotion that he has still got. Fortunately, the Duke of Cambridge appears as the champion of the interests of the Army. The British officer can always look with confidence to the sterling, honest support of the Commander-in-Chief, and none can read without a thrill the stirring, manly words in which the Head of the Army records his protest against the recommendation of the Committee. His Royal Highness is certain in his remonstrance to carry not only the Army, but the whole country with him; and though his Royal Highness appears now to stand alone as the bulwark of the much-tried officer against revolutionary wrong, there will be soon a force following in his wake. It is not fair to the Army that when the Treasury quake at the idea of carrying out the recommendations of the Commission on Promotion on account of expense, measures should be advocated that will cause a still more painful stagnation of promotion. It is not fair to the country that when it ought to be called upon to pay heavily to insure a flow of military promotion it should be exposed to the probability of being again more seriously mulcted within a few years. Such must inevitably be the result if the views put forward by the Committee were carried into effect. We have, however, one cause for congratulation—the propositions are so monstrous that they must be found practically impracticable.

H.R.H. the Duke of Cambridge, Field-Marshal Commanding-in-Chief, has quite recovered from the effects of the illness which confined him for some days to Gloucester House, and has been transacting business as usual this week.

The improvement in the health of General the Earl of Lucan continues, and there was a very favourable report yesterday, but the illness of the gallant officer was very severe, and at one time caused great anxiety. His friends may be satisfied with the assurance that all grave symptoms have disappeared, and that Lord Lucan is now only suffering from the weakness consequent on such an attack of inflammation of the respiratory organs.

It is pretty generally understood that the forthcoming Army Estimates will foreshadow a complete reorganization of the Royal Artillery.

The Army Estimates, if they are not already out of the hands of the printers, will be by Monday next, by the time the House assembles.

The Portsmouth command is not to be given to Major-General Prince Edward, after all! So it is said, at all events, notwithstanding assurances and, we believe, promises. The fortunate successor of Lieutenant-General Sir C. H. Doyle is, we hear, Lieutenant-General the Hon. Sir A. H. Gordon, who will enjoy the £1,557 a-year and extras, and it will be only in accordance with precedents that an officer of his rank should hold the command; but still it is rather hard on Prince Edward, if it be true that he was told he was to get the appointment, although only a Major-General, and causes not only his Serene Highness, but others, we should think, great disappointment.

There is one man in Europe about whose views there generally can be no dispute. The Emperor of Germany does not affect to believe in any agency for the maintenance of the power and rights of a State but an Army strong enough to intimidate and, if needs be, to conquer his enemies. But his Imperial Majesty, who so formally and feelingly declared to the world the other day that Prussia owed its existence to the Army, and that his grandson would find in its ranks the true palladium of Prussian "liberty," might have very fairly been somewhat more open in his later speech when he adverted to the Eastern Question. It may be indirectly true that Germany is not immediately interested in the matters which are agitating Eastern Europe, but German interests are seriously involved in the solution of the Turkish problem. The Emperor could say the word which would prevent any invasion of Turkey by Russia, and as he does not say it we may presume that he considers the result of the war can not be unfavourable to Germany, and that it is "heads I win! tails you lose!"

It is rumoured as being not improbable that his Royal Highness the Prince of Wales will send his sons to the Britannia for a course of training, rather than to a public school. The elder one will ultimately enter the Army, but the younger is likely to remain in the Navy.

The recent audacious attack on Nowshera by the hill tribes shows how foolish the delay in punishing the Afredees has been. We trust that at length we shall teach these hereditary caterans a lasting lesson; such a lesson, too, as will impress not only them, but the Amir of Cabul, who seems greatly to doubt either the length of our arm or our readiness to stretch it out. If we do not take care we shall soon be having a jehad preached against us all along the frontier.

If the scheme of territorial regiments be adopted there will be some difficulty with Highland regiments in respect to the tartan. One or the other battalion of each brigade will have to give in, and much dissatisfaction will be caused. It would cost a Highland officer from £100 to £150 to get a new kit if transferred to a twin battalion. Consequently, uniformity of tartan and uniform in general—save in minor matters—must be enforced. We would suggest that all should be empowered to adopt the Hunting Stuart.

In a certain distinguished regiment one Captain is, we very much regret to say, about to leave on account of drunkenness on duty, and a subaltern of the same corps for having struck a brother officer with a billiard cue.

A correspondent suggests, with reference to an idea published by us last week of enlisting a special class as non-commissioned officers—that is, to grant to non-commissioned officers the privilege of wearing plain clothes when off duty, say after sunset, and on other special occasions, for which the written permission of the commanding officer would have to be obtained. Any abuse of this privilege could be easily stopped. In fact, the first punishment for a non-commissioned officer should be the withdrawal of the privilege of wearing plain clothes for any period not exceeding one year. There would then be on this point a scale of privilege, thus:—When off duty officers could wear plain clothes all day, non-commissioned officers, after sunset, and on special occasions sanctioned by the commanding officer; privates, not at all. The non-commissioned officers would thus, it is thought, be raised in the eyes of the officers, in the eyes of the soldiers, and a very great deal in the eyes of the general public. The fact of being able to join as a non-commissioned officer, and also having the privilege of wearing plain clothes, would, it is thought, tempt many of the middle classes to join her Majesty's Service. There are, it is believed, many of the above classes at present in the Volunteers as Corporals and privates who know something of their duty, and have by such service obtained a taste for the military profession. These might be induced to join. Again, after what has occurred once or twice when non-commissioned officers have been refused admission to places of public amusement because they were in uniform, this insult would not be feared if the privilege of wearing plain clothes after sunset were allowed. If good non-commissioned officers are wanted we must pay for them either in money or privileges. If this plan were carried out successfully and the classes named engaged, our correspondent thinks that the English Army would have the most splendid set of non-commissioned officers in the world.

A French paper tells an anecdote about General Changarnier which, if true, is not much to his credit. However, he is supposed to have been very young and thoughtless at the time. He was dining with a couple of brother officers, and in the heat of an argument, and when completely intoxicated, one of them struck him. Changarnier grew pale as death, but not wishing to avenge this blow on a comrade, to whom he was greatly attached, he rushed from the hotel, and going to a neighbouring *café* boxed the ears of an unoffending student. The next morning Changarnier went out to give his victim satisfaction, and satisfied him by running him through the arm. He then told the comrade who had assaulted him what had happened, and the pair embraced each other. This was very hard upon the student.

A correspondent of the *Cologne Gazette* gives the following account of the strength and positions of the Turkish Army of the Danube:—At Widdin we are told there are 57 battalions, 82 guns, 2 regiments of Cavalry of 6 squadrons each; there are also 12 guns *en route* for Widdin from Rustchuk. Osman Pasha commands at Widdin. At Rustchuk there are 9 battalions, 3 batteries, and 2 Engineer companies; Taghir Pasha commanding. At and about Shumla, 29 battalions, 6 batteries, 1 regiment of Cavalry; commander, Ayoob Pasha, who is also Commander-in-Chief of the Danube Army. At Silistria, 12 battalions, 2 batteries; commander, Selim Pasha. At Varna, 16 battalions, 2 batteries; commander, Rashid Pasha. At Tulcha, 6 battalions, 1 battery, 1 Cavalry regiment; commander, Ali Pasha. In the Dobrutschka, 8 battalions, 2 batteries, 1 regiment of Cavalry; preparations are being made to turn out the Circassians, who will muster some 25,000 men. At Nikopolis, 6 battalions, 1 battery; commander, Ali Feroz Pasha. At Nisch, 10 battalions, 2 batteries, 1 regiment of Cavalry; commander, Hussein Pasha. Between the Danube and the Morava, 34 battalions, 6 batteries. At Sofia, 8 battalions. At different smaller places in Bulgaria, 23 battalions, 2 batteries, 1 regiment of Cavalry. The strength of each battalion may be put at 600 or 700 men, giving a total strength to the Turkish forces about the Danube and the Morava of 150,000 Infantry, 6 regiments of Cavalry, and 300 field guns. A third of this force is composed of Redifs, whose training, clothing, and arming are reported to be far from satisfactory.

Colonel G. C. Henry, R.A., who has been employed for some time past in command of the Militia Artillery in the Dublin District, has been appointed Assistant Adjutant-General of Royal Artillery in Ireland, vice Major H. Le G. Geary, whose period of service in the appointment has expired. Colonel Henry served in the Eastern campaign of 1854-55, including the battle of Inkerman, siege and fall of Sebastopol (medal with two clasps, brevet of Major, Sardinian and Turkish medal, and 5th Class of the Medjidie). Served in the Indian campaign of 1858-59, and commanded a field battery attached to Colonel Kelly's force in the attack and defeat of the rebel forces posted on the first range of the Nepaul Hills, on March 28 and 29, 1859 (mentioned in dispatches, medal). He entered the Army December 16, 1846, and became Brevet Colonel July 20, 1876. Major Geary's departure is much regretted both in military and civilian circles at Dublin.

It is satisfactory to learn that Aldershot will continue to be used, as it has been this last year, as a station at which regiments heading the roster may be sent to receive that "brushing up" which is so necessary before they are ordered off to remote and unhealthy foreign stations. Those who saw the 2nd Battalion 11th embark at Portsmouth a few days ago speak in the most flattering terms of the regiment, and bear testimony to the wisdom, as shown by its appearance, of the decision which has constituted Aldershot a sort of "finishing establishment." But there exists another reason why regiments on the point of embarkation should be quartered at Aldershot, in preference to those lately returned from abroad. When foreigners come over they invariably go to the camp, and it is wise to let them see our strongest rather than our weakest battalions. A regiment which can muster little over 200 bayonets on parade is not a sight to strike terror into a German officer, especially one who has studied our organization and knows what a hollow sham our Army Reserve is acknowledged to be. Yet it is no uncommon thing to hear commanding officers complain that they are unable to bring together 200 men under arms.

REVIEWS.

The Elements of Field Artillery. By Captain Henry Knollys, R.A. (Blackwood and Sons, Edinburgh and London.)

The want of a compendious work on Field Artillery has long been recognised. The author, in the preface, tells us that the complaint made by officers of Cavalry and Infantry desirous of obtaining a sufficient insight into the practical working and manœuvring of field guns without studying Artillery as a science has been that no work such as they require has been hitherto published. Captain Knollys, alive to the existing want, puts before us in a short volume the exact amount of information that Staff officers must, and all officers should, make themselves thoroughly acquainted with. He is of opinion that both the mitrailleur and the Gatling are more theoretical toys than weapons of wholesale destruction. Our own opinion is that—although there are objections to their employment, on account of their liability to get out of order and their short range—they have never yet had a fair chance to prove their capabilities. In recommending this work of Captain Knollys to our readers, we wish them to understand that, although it does not pretend to rank with the more scientific treatises on modern artillery, it is the very book for officers in Cavalry and Infantry studying their profession with a view of becoming Staff officers, or of fitting themselves for advancement. It meets the requirements of officers who are not "gunners," so far as a practical knowledge of Field Artillery is concerned. Like de Brack's "Light Cavalry Outposts," probably the best practical treatise on the subject ever penned, Captain Knollys' book is replete throughout with valuable information and suggestions in the event of sudden emergencies arising in the field.

Geschicte der Belagerung von Strassburg. Reinhold Wagner, Major im Stabe des Ingenieur Corps. (Berlin: F. Schneider and Co. Paris: Sandoz and Fischbacher. London: Trübner and Co.)

It certainly will not be from any deficiency of most exact and copious description of every event in the short and tremendous struggle that military and general readers of this and of future ages will lack a clear knowledge of what occurred in the great war of 1870-71. Several accounts of the siege of Strassburg have already appeared, but Major Wagner's is by far the most "special," and the most useful to an Engineer. The first half of the 3rd Part has just been published, accompanied by an atlas on a very large scale, with profiles of the works and batteries, plans, sections, &c. It contains a lithograph of the appearance of Lunette 44, and an account of the assault and capitulation and the correspondence, &c. connected with the surrender of the place between General V. Werder and General Uhrich brings to a conclusion the history of one of the most remarkable operations of our time.

The Navy.

GAZETTE.

Admiralty, February 15, 1877.

Thomas Beswick Purchas, Esq., M.D., has been authorised to assume the rank of Depty. Inspr.-Gen. of Hospitals and Fleets in H.M.'s Fleet from Nov. 30, 1876, the date on which he was placed on the Retired List.

Royal Marines—Lieut. W. T. Miller, R.M.L.I., to be Capt., vice Thompson, deceased; Feb. 8, 1877.

February 16, 1877.

Capt. Edward Hardinge has been appointed a Naval Aide-de-Camp to her Majesty the Queen, vice Capt. Oldfield, deceased; Feb. 7, 1877.

February 17, 1877.

The undermentioned promotions have this day been made, to date Feb. 16, 1877:—Coms. Arthur Cecil Curtis and Richard Duckworth King to be Capts. in H.M.'s Fleet. Lieuts. Colin Mackenzie Dundas and Charles Edward Reade to be Coms. in H.M.'s Fleet.

In accordance with the provisions of H.M.'s Order in Council of Feb. 22, 1870, Nav.-Lieut. James Ernest Barber has been placed on the Retired List of his rank from the 7th inst.

February 19, 1877.

In accordance with the provisions of H.M.'s Order in Council of Feb. 22, 1870, Lieut. Charles William Sleeman has this day been placed on the Retired List of his rank.

February 20, 1877.

In accordance with the provisions of H.M.'s Order in Council of Feb. 22, 1870, Nav.-Lieut. Francis Toft Helby has been placed on the Retired List of his rank from the 17th inst.

APPOINTMENTS.

Commanders—Edmund C. Drummond, to the Rapid, vice Adolphus A. F. FitzGeorge, appointed to the Dasher, vice Drummond; Alfred A. Chase Parr, to the Audacious.

Lieutenants—Edward J. P. Wade, to the Modeste, recommissioned, the appointment of Lieut. Pipon to that ship having been cancelled; William H. Henderson, to the Eclipse; Evelyn W. Shirley, to the Coquette, vice William E. Darwall, whose period of service has expired; Edward J. Wingfield, to the Antelope, vice J. C. Burnell, whose period of service has expired; and George L. W. Adair, to the Duke of Wellington.

Navigating Lieutenants—William H. Haward, to the Asia, for the Urgent; Henry Baynham, to the Asia, for the Sultan; and Edwin H. Richards, to the Asia, for the Elk.

Midshipman—E. St. C. Silver, to the Charybdis.

Naval Cadet—E. C. Greenway, to the Charybdis.

Surgeon—F. A. Waring, to the St. Vincent.

Paymasters—H. P. Brenan, to the Valorous; B. R. Colley, to the Flora. for service at Ascension.

Assistant-Paymasters—William Allman, to the Sirius; Richard H. Clarke, to the Euphrates; and J. S. Ramsay, to the Impregnable; Henry J. Colling, to the Rocket, in charge, vice Roxworthy, superseded at his own request.

Chaplain and Naval Instructor—Rev. F. C. Stebbing, to the Audacious, for the Charybdis, when recommissioned.

Active, Com. Sir William N. W. Hewett, was in Simon's Bay on Jan. 22. The Cape *Standard and Mail* of Jan. 23 contains the following:—"It is expected that the Active will leave in a few days, and when she takes her departure she will carry with her the best wishes of the inhabitants of Simon's Town. Com. Hewett, the officers of the ship, and the crew have upon many occasions rendered valuable services to the townspeople and to foreign ships, the remembrance of which will long be cherished.

Agincourt will be commissioned at Devonport in the course of the present month by Capt. H. D. Grant. She will replace the Aurora as Coastguard ship at Greenock.

Alexandra, Capt. R. O'B. Fitzroy, flagship of Vice-Admiral G. P. Hornby, arrived at Spithead on Thursday afternoon from Chatham. It is expected that the Princess of Wales will visit the Alexandra at Spithead before she sails for the Mediterranean.

Antelope, Lieut.-Com. E. Wingfield, returned to Malta on Feb. 9 from Syracuse; she was inspected on the 10th, and her officers and crew were then transferred to the Hibernia.

Assistance, Capt. F. M. Prattent, arrived at Gibraltar on the 19th inst., and would leave again to-day for Portsmouth.

Audacious, Capt. P. H. Colomb, flagship of Vice-Admiral Ryder, was at Hong Kong on Jan. 4.

Barracouta, Capt. C. E. Stevens. A court of inquiry has been held at Portsmouth on Mr. A. Gain, paymaster of her Majesty's ship Barracouta, on some complaints made by the captain. The inquiry commenced on Monday. The Barracouta was first employed on the West Coast of Africa, being the ship that took out the first instalment of Marines, with which Capt. the Hon. E. R. Fremantle and Col. Sir F. Festing kept the Ashantees from attacking Cape Coast Castle. Her men were employed in landing parties at Elmina, and formed part of the Naval Brigade to Coomassie. After this she returned to England, and has since been employed on the Australian Station, where she got into difficulties with the natives of Samoa. She will not be paid off at Portsmouth, as has been reported, but at Sheerness.

Black Prince, Capt. T. B. Lethbridge, left the Tagus on the 19th for Gibraltar.

Boxer, Com. A. H. Alington. Two crank shafts sent from Chatham to be fitted to the Boxer have arrived at Keyham, but examination shows that they cannot be made suitable for that vessel. New shafts will, therefore, have to be made, and this will detain the vessel for quite a month.

Britannia, Capt. Graham, The following letter from "The Father of an Ill-used Cadet" has appeared in the *Standard*:—"In your paper of this day the public is informed that in the recent inquiry as to alleged cruelty and bullying on board her Majesty's training-ship Britannia the more serious charges have not been substantiated. As the father of the insulted and ill-used cadet, I crave permission to say a few words. The result of the inquiry so far can be no more than the private opinion of the president, as no report or copy of evidence has yet been published, and as the president of a naval court of inquiry is at once judge, counsel, and jury very much must depend upon his judicial capabilities. Having had considerable experience in courts of law, and with full notes of the evidence before me, I do not hesitate to say that any jury would have found a verdict for the plaintiff on all the general charges. It must be borne in mind that naval inquiries are peculiar courts. The proceedings are unique. The plaintiff is not allowed to examine or cross-examine, neither is he allowed to reply on the evidence; witnesses are questioned solely by the president, and generally are requested to make a statement of the facts. It will be obvious to any one that a boy of little more than thirteen in the presence of an admiral for the first time, and in the face of the captain of his ship, would be timid and unable to make a precise and clear statement of acts of cruelty extending over weeks and months, and that the facts would not be so clearly brought out as they would be in other courts by an examination in detail from a properly-prepared brief. Again, unwilling witnesses not being examined on oath, and anxious to avoid offending their captain and shipmates, have every facility afforded them of evading the truth. During the late inquiry, among a mass of contradictory and conflicting evidence, one fact was brought out clear and in strong relief, and that was, the fear of the consequences of speaking the truth was insuperable, and the melancholy spectacle was exhibited of little boys, many under thirteen years of age, one after the other telling an evidently prepared tale which was forthwith flatly contradicted by the captains of cadets and officers of the ship. The matter cannot rest where it is. My son has been designated 'worthless, and unfit for her Majesty's service.' Not a word has been said affecting his character, he has been proved 'physically fit,' and all that has been attempted to be proved against him is that during three months' residence on board he had been inattentive to his lessons. Three months' systematic and cruel bullying is surely sufficient to condone this trivial shortcoming." Orders have been given for all seamanship instructors and naval police to be borne in this ship for five years instead of three as hitherto, it being found that frequent changes of petty officers holding these ratings are undesirable. The rule will not be applied to other harbour ships.

Cockatrice, Com. A. J. Musgrave, was undocked at Malta on Feb. 8.

Conflict, Lieut.-Com. Carey. Some years ago a number of Sandwich Islanders were imported into New Zealand as "labour" for flax mills, subject to be returned to their homes at the expiration of three years. The flax industry having declined, the islanders scattered over the provinces to obtain employment where they could. The relatives of these lads at the Sandwich Islands meanwhile became greatly excited and incensed at their non-return, according to agreement, and the Conflict, engaged in watching the labour traffic, having touched at the group, became aware of the grievance and the probability that some ship's crew would be sacrificed at the first opportunity to appease their wrath. In consequence she went on to Auckland to investigate the matter. The detective branch of the police force was called into requisition; and after some trouble the whole of the lads were secured and shipped on board the Conflict, which sailed for the islands in order to restore the labourers to their friends.

Contest, Lieut.-Com. G. W. Allen, was at Whydah on Jan. 14, and will be ordered to Bermuda on the arrival of the Seagull.

Coquette, Lieut.-Com. E. Shirley, was in dock at Malta on Feb. 13.

Cracker, Lieut.-Com. C. H. Hawkins, was at Colonia on Jan. 15.

Crocodile, Capt. P. R. Sharpe, left Aden on the 22nd inst., at 10 a.m., for Suez. All well.

Curlew, Com. E. J. Church, has arrived at Tientsin, where she would winter, instead of the Lapwing.

Cygnet, Lieut.-Com. R. F. Hammick, was at Whydah on Jan. 14.

Danae, Capt. J. C. Purvis, has been fitted with new boilers in the place of those on the Cochrane principle, and is being forwarded with the greatest despatch at Sheerness.

Daring, Com. J. G. Hanmer, was in the Bay of Panama on the 20th ult., and was shortly to be relieved by the Albatross.

Devastation, Capt. F. W. Richards, rejoined the flag at the Piræus on Feb. 4, from Corfu.

Defence, Capt. R. P. Cator, left the Tagus on the 19th for Gibraltar.

Fire Queen, Staff-Com. T. Pounds. The report that a court of inquiry has been held at the admiral's office at Portsmouth relative to a collision said to have taken place a few days since between the Fire Queen and the paddle-wheel steamer Prince Consort, one of the packets running between Portsmouth and Ryde, is unfounded.

Foam, Lieut.-Com. Hope, was at Colonia on Jan. 15.

Helicon, Lieut.-Com. R. W. Stopford, proceeded to Corinth from the Piræus on Feb. 8, to bring the Duchess of Edinburgh to Malta, where she arrived on Feb. 12. She was docked and examined and found uninjured.

Hercules, Capt. Bowden-Smith, flagship of Admiral Hon. Sir J. Drummond, was at the Piræus on Feb. 14. She is ordered to Malta, and sailed on the 21st inst. for that place.

Kestrel, Com. C. B. Theobald, would not go from Hankow to Ichang, as previously intended.

Jackal, Lieut.-Com. H. A. Digby, arrived at Portree on the 19th inst., and will leave for Sound of Harris or Loch Maddy on the morning of the 20th and await an opportunity of communicating with St. Kilda. A telegram was received at the Admiralty yesterday announcing her arrival at St. Kilda, and succeeding in taking off a portion of the crew of the Austrian vessel wrecked there.

Lapwing, Com. Sir W. Wiseman, Bart., is likely to be repaired in Shanghai by Messrs. Boyd and Co. It is said that an examination of her hull shows her to have withstood the strain she has done without serious injury. She is of course very much damaged about the keel, showing what a severe hammering she has resisted, but the upper part of her hull is not strained or injured.

Minotaur, Capt. Lord W. Kerr, flagship of Vice-Admiral Seymour, left the Tagus on the 19th for Gibraltar. The Minotaur on heaving anchor broke her cable, and lost the anchor and sixteen fathoms of chain. She tried to recover it, but without success. The squadron will proceed to ports on the Andalusian coast to be present at the *fêtes* projected in honour of an approaching visit of King Alfonso, and there will be pyrotechnic displays from on board the ships on his Majesty's arrival.

Modeste, Capt. A. Buller, C.B., will be paid off and recommissioned at Hong Kong. The *Japan Gazette* announces that on Dec. 28 Capt. Buller was received by his Majesty the Mikado at the Imperial Palace of Akaska.

Nassau, Com. R. H. Napier, was inspected at Hong Kong on Dec. 27 by the Commander-in-Chief.

Newcastle, Capt. R. G. Douglas. The *China Mail* gives the following account of the accident, by which four lives were lost:—"The version of the affair we have received says that on Dec. 13 a petty officer, named Miles, while heaving the log, by some means fell overboard—the ship then (at three p.m.) going about 8½ knots. A midshipman, named Wingfield, at once jumped overboard to help Miles, and was followed by two seamen, while a life-buoy was let go. By the time the ship was hove to and a boat lowered, the vessel would be about a mile and a-quarter from the spot where the accident took place. To row back this distance against wind and sea would have probably taken an hour, as the boat was undermanned, two of her crew having been pulled out in lowering. At the same time the sea is described as having been 'not very bad," the temperature of the water was 81 degrees, and the three noble fellows who sprang to the rescue are spoken of as the best swimmers in the ship. This being so, considerable surprise is said to have been felt on board when Captain Douglas recalled the boat within half an hour of its dispatch; and upon its return (about 1¼ hour after the accident) gave orders to resume the voyage. Our correspondent even says that one of the officers suggested to the captain the advisability of beating back, and that the suggestion was unfavourably received. The three swimmers are said by good authorities to have been men well able to keep afloat for six hours; and poor Wingfield was last seen tying a life-collar round Miles' neck and blowing it out. This sad affair has cast a gloom over the ship, and general regret was felt in Singapore that so much that was unsatisfactory hung about the whole business. We sincerely trust that a very different account may yet be given of the accident, explaining some of the circumstances which at present seem to be so inexplicable. One of the poor fellows drowned, named Hesk, had already got a Humane Society's medal and clasp."

Orontes, Capt. E. H. Seymour, was at Penang on the 10th ult., about to leave for Malacca and Singapore.

Orwell, Lieut.-Com. R. H. Cornwall, returned to Queenstown on the 16th inst. from the River Lee.

Pallas, Capt. Beamish, sailed from Malta on Feb. 10 for the Piræus with mails, stores, &c., for the squadron.

Ready, Com. S. Grove, arrived at Ascension on Jan. 29 from Monte Video. She arrived at St. Vincent, Cape de Verde, on Feb. 16, and received orders from the Admiralty to proceed for Devonport to pay off.

Research, Capt. H. Earle, was inspected at the Piræus on the 7th inst. by the Commander-in-Chief.

Resistance, Capt. C. W. Hope, left the Tagus on the 19th for Gibraltar.

Rupert, Capt. W. J. Grubbe, C.B., was expected at Malta about Feb. 15, for repairs to her machinery.

Serapis, Capt. G. D. Davidson, arrived at Malta on the 19th inst., and sailed on the 20th for Bombay.

Sheldrake, Lieut.-Com. Hayes, had, by last accounts, arrived at Hong Kong from Labuan.

Sirius, Capt. G. L. Sulivan, was senior officer's ship off Whydah on Jan. 14.

Spiteful, Com. A. T. Powlett, was at Jackin on Jan. 14, and will be ordered home on the arrival of the Seagull. She may be looked for at Devonport in May. She was commissioned at Portsmouth in July, 1873, but did not leave England until the following April.

Sultan, Capt. H.R.H. the Duke of Edinburgh, would rejoin the flag on Feb. 12 from Kalamaki, &c.; she would convoy the Rupert to Malta, the Rupert's engines being unsatisfactory.

Supply, Staff Com. F. Inglis, was at Whydah on Jan. 14, and will shortly sail for England.

Tamar, Capt. W. H. Liddell, will shortly leave Devonport with new crews for the Modeste, Sylvia, and Charybdis, on the China Station, and Antelope and Helicon on the Mediterranean Station.

Triumph, Capt. G. H. Parkin, flagship of Rear-Admiral Rice, returned to Salamis Bay on Feb. 10 from Nauplia. She will remain at the Pirœus.

Valiant, Capt. N. Salmon, V.C., arrived at Berehaven on the 15th inst. The *Valiant* was to leave Berehaven on the evening of the 21st inst. for Queenstown.

Valorous, Capt. L. F. Jones, returned to Yarmouth on the 18th inst. from the North Sea. She left Great Yarmouth on the 19th inst. at 6 p.m., to renew her search for the missing smacks. Anchored off Grimsby on the 20th, at 3.45 p.m., on account of weather, but left again to renew the search for the missing fishing smacks, at the request of the owners, but it is scarcely expected that it will be attended with any better results than the first. On Wednesday she anchored off Grimsby to await the weather moderating. The matters in dispute between Capt. Jones and Mr. H. H. Gain, the paymaster, have been arranged without the intervention of a court-martial. Mr. Gain has resigned his appointment, and is succeeded by Mr. H. P. Brenan.

Victoria and Albert, Royal yacht. On Monday afternoon the remains of Capt. Campbell were laid in the grave at Hampton Church. The deceased was well known throughout the neighbourhood, and was so universally esteemed for his genial qualities that a large number of people attended. The house at which the deceased expired is situated at no great distance from the church, and the funeral procession proceeded on foot to the cemetery. First came the tradesmen of the village, numbering from twenty to thirty, then the coffin, which was covered with a Union Jack, on which were laid immortelles, a beautiful wreath sent by her Majesty, and the deceased officer's cocked hat, epaulettes, and sword, borne on the shoulders of seamen belonging to the Royal yacht Victoria and Albert, who were present to the number of eighteen, commanded by several of the principal officers of the yacht in full uniform. Amongst those who stood around the grave were Col. Du Plat (representing her Majesty), Prince Leiningen, Count Gleichen, Lord Charles Beresford (commander of her Majesty's ship Thunderer); Admiral Sir John Commerell, Capts. Fullerton, Montagu Balliston, Sullivan, and Nicholson; Fleet-Surg. M'Ewen, Lieuts. Maude and Lillingston, &c. Mr. Arthur Campbell was chief mourner, Mr. Campbell, sen., being prevented from attending in that capacity through illness. It is stated by *Vanity Fair* that her Majesty has sent Mrs. Campbell one of those feeling and tender letters of sympathy such as she alone has the power of writing. In Hugh Campbell, indeed, her Majesty has lost not only a most excellent officer, especially precious to her as the captain of her own yacht, but the guide and companion of her own sailor son. The London correspondent of the *Western Morning News* announces, positively, that the command of the Victoria and Albert has been offered by her Majesty to H.R.H. the Duke of Edinburgh. Com. Fullerton dined with her Majesty on Tuesday, and left Osborne the following day.

Volage, Capt. H. Fairfax. A correspondent, writing from Colonia, Jan. 15, says:—"A sad accident occurred on board on the night of the 13th. Mr. Lewis Edwardes, M.B., surgeon of this ship, on retiring to rest at 11 p.m. took cyanide of potassium in mistake for a sleeping draught, and died in about ten minutes. He was buried yesterday with military honours. You would seldom find an officer more generally liked in a ship, and in consequence his death is much regretted by the ship's company.'

Vulture, Com. H. H. Washington, arrived at Gibraltar on the 20th inst., and would leave on the 21st for Malta.

Wizard, Lieut.-Com. W. Neilson, was inspected on Feb. 6 by Rear-Admiral Rice.

Wye, Staff-Com. W. W. Vine, left the Pirœus on Feb. 8 for Salonica, with stores for the Swiftsure, and would return to the Pirœus.

The commander of the Royal yacht Osborne has sent a request to the Admiralty to be supplied, before leaving for Malta, with a "Martin's Patent Self-canting Bower Anchor," and it has just been forwarded to Portsmouth Yard.

The *Scotsman* reports that the German Government "have come, or are on the eve of coming," to an arrangement for the purchase of a shipbuilding yard on the Clyde. The price is said to be about £250,000.

Epps's Cocoa—Grateful and Comforting.—"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected cocoa, Mr. Epps has provided our breakfast tables with a delicately flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—*Civil Service Gazette*. Made Simply with Boiling Water or Milk.—Sold only in Packets labelled—"James Epps & Co. Homœopathic Chemists, London."

To Those Abroad or About Going.—Advertiser desires to receive especially from persons in isolated or hill districts, specimens of the different butterflies found in their neighbourhood, which can be collected and sent home (per parcels post) in cigar or cardboard boxes, not pinned, but merely folded up when caught in pieces of paper. Also beetles. Value remitted by return. Address, William Watkins Naturalist, 21, Caves Terrace, Shepherd's Bush, London, W.

THE NAVAL RESERVES.

Vice-Admiral Sir W. Tarleton, K.C.B., before resigning his command as Admiral-Superintendent of Naval Reserves, presented the Admiralty with a report on the forces under his command. As regards the officers of the R.N. Reserve, the whole number on the Active List is not to exceed 700, viz., 130 lieutenants, 270 sub-lieutenants, 100 engineers, and 200 assistant-engineers. There are at present 144 lieutenants, 96 sub-lieutenants, 1 engineer and 1 assistant-engineer, making a total of 212. In October, 1872, the grade of midshipman was added, the number not to exceed 200. There are now 99 borne, and from 20 to 25 added yearly from the training ships.

On a review of the Act for the establishment of the Reserve, and the state of the Reserves at the present time, Admiral Tarleton thinks it must be admitted that it has fulfilled the intention of its framers. It was given to them to solve a question which had always been a vexed one and a source of anxiety to the country, viz., how to man our ships in the event of any sudden increase to our Navy, and to provide a sufficiency of seamen to carry on naval operations when war was declared, while the men so employed should be absorbed on the conclusion of peace in the mercantile marine. The difficulties found in obtaining men on the breaking out of the war with Russia made a deep impression, and the resolution was taken not again to be placed in so defenceless a position; but there were many points which had to be considered before a scheme could be produced the machinery of which should work. The service of the seamen was to be voluntary, as conscription in this country could not be enforced, and the rude method of impressment would not be tolerated. One of the evils of that mode of raising men had been to create an almost insurmountable prejudice in the merchant seamen against the Royal Navy; they had also a dislike to drill, or soldiering, as they called it, of any kind. They were actively employed in voyages to all parts of the world. In the face of these difficulties, it was a bold measure to make it lawful for the Admiralty to raise and keep up a number of men, not to exceed 30,000, from the merchant service. Again, the interests of the shipowners at first sight would appear to be opposed to the scheme, as it would deprive them in time of peace of the services of their servants for twenty-eight days in each year, and altogether should the men be required for the Navy in time of war. The practical working of the Act has shown, however, that in peace time at least the shipowners have suffered no inconvenience. The men are permitted to take their drill when it best suits them, and at periods of seven, fourteen, twenty-one, and twenty-eight days, while on the other hand the qualifications insisted on enrolment and the medical examination are guarantees for the character and ability of the Royal Naval Reserve man. The retainers which he receives and the prospect of pension operate as inducements to steadiness and against desertion, and altogether have a beneficial effect on the whole mercantile marine, so that the shipowners now give a preference to Royal Naval Reserve men whenever they can get them. The result is, that there are now enrolled in both classes nearly 20,000 out of the 30,000 sanctioned by the Act. The vital question is whether, after all the expense the country has been put to, and will have to bear prospectively, for the organization and maintenance of the Royal Naval Reserve, will the men be forthcoming when they are wanted? This can be tested only in the day of trial, when the Queen's proclamation shall call the Reserve out for active service; but he holds that we have as reliable guarantees that the men will present themselves as under any system that could be devised on the basis of voluntary service. The men have entered on an engagement to serve, they have received drill pay and retainers under this engagement, and, without being branded by public opinion, could not shrink from the fulfilment of their duty. The Coastguard service is in a thoroughly efficient state. With respect to the Coastguard cruisers, Admiral Tarleton remarks that no new vessels have been laid down since 1868, and that a large reduction in the number of this class took place in 1869 and 1870. Of the Seaman Pensioner Reserve there are 511 enrolled. This addition to the Naval Reserve was originated in 1870, and the then Board of Admiralty anticipated that the majority of men discharged on pension, and who were under forty-five years of age, would join. The regulations first insisted on a month's training on board a man-of-war every alternate year, but finding that the men did not come forward, this rule was relaxed in May, 1873, and the pensioners of the Reserve are now permitted to take fourteen days' drill annually on boarding any man-of-war, drill ship, or R.N. Reserve battery. Notwithstanding this arrangement to suit their convenience a comparatively small number appears for drill, viz., 511 out of 2,800 pensioners under fifty years of age. It may be assumed, therefore, that their employment prevents their attendance. As the Admiralty possess the power of calling the pensioners out should their services be required, it is only to keep them efficient in their several exercises that is gained at the expense of their maintenance while under drill, and as it cannot be supposed that the men would readily forget the training of twenty years, Admiral Tarleton attaches little importance to the fact of their not responding to the terms of the circular.

THE ROYAL NAVAL COLLEGE.

Admiral Fanshawe's Report for the year ending September last has just been presented to Parliament. The students of naval architecture were fifteen in number, and of marine engineering thirty-two in number, including engineer officers joining for voluntary study, foreign and private students. The engineer officers appointed for a voluntary course of study have included two chief engineers, seven engineers, and one first-class assistant-engineer. The lieutenants qualifying for gunnery officers were eighteen in number, and with them were associated four probationary lieutenants Royal Marine Artillery. There were also seven probationary lieutenants of Royal Marines. During the past Session four captains, four commanders, ninety-three lieutenants R.N., and eight navigating lieutenants have voluntarily studied at the College, but of these only one captain, thirty-three lieutenants, and three navigating lieutenants have gone through the whole nine months' course, although one captain, two commanders, fifty lieutenants, and three navigating lieutenants underwent the final examination. Of these latter, one captain, twenty-two lieutenants, and one navigating lieutenant have gained honorary certificates. In addition to the above naval officers, one captain and one lieutenant R.M.A., and one captain and five lieutenants R.M.L.I., have voluntarily attended the College during the past session. All those examined succeeded in gaining honorary certificates. The number of acting sub-lieutenants and acting navigating sub-lieutenants has varied very considerably from month to month, having reached a maximum of 102 in February and a minimum of forty-seven in September last. The total numbers examined were of acting sub-lieutenants 103, and of acting navigating sub-lieutenants fifteen. Of these there were placed fourteen in the first class, of whom eight, having obtained first classes previously in seamanship and gunnery, received each a prize of books or instruments to the value of £10, and were promoted; thirty-two in the second class, and fifty-one in the third class, of whom seven had failed on their first trial. Twenty-one having failed on their second trial, were removed from the Navy. These failures do not appear to attach particularly to officers who have not been under naval instructors whilst midshipmen. They are, with rare exceptions, confined to those who are of limited capacity, and whose habits are not industrious. Being very backward on joining the College, and having passed the earlier months of their College course under a supposition that they might get through by making an effort towards the close, their failure has followed. The results of the year show that the standard of examination is so adjusted as to enable officers of good abilities who on entering the Navy diligently apply themselves to study their profession to obtain their lieutenant's commission, whilst, on the other hand, it affords to those who are backward and ignorant on joining the College an opportunity of retrieving lost time, and of maintaining their place in the Navy if they earnestly avail themselves throughout the whole period of study of the means afforded them at the College. As to discipline, Admiral Fanshawe says:—"The good order of the whole establishment is maintained under the immediate supervision of the captain of the College, and I have great satisfaction in reporting that in all classes and departments this object has been attained in a high degree. The students at the College not being immediately subject to the restraints of naval discipline, it becomes my duty to report specially to the Admiralty any deviations from officer-like conduct that may take place. The only reports of this nature which I have had to make have referred to nine acting sub-lieutenants and one acting navigating sub-lieutenant. The example of officers thus misconducting themselves is so pernicious to others who are preparing for examination, and who are exposed to their influence, that their temporary removal to a flagship, as ordered by their Lordships, has been very beneficial. The conduct of the probationary lieutenants of Royal Marine Artillery and Royal Marines has been, without exception, blameless in every respect. The engineer officers and shipwright students have also conducted themselves in a very exemplary manner; and their mess has been managed with great regularity and economy. The senior mess has been creditably managed without undue expense. The half-pay officers residing in the College have taken an active part in its management by serving on the committee, and their influence has been otherwise most beneficial."

COAST BRIGADE, ROYAL ARTILLERY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—The Coast Brigade of Artillery is little understood by the Army generally, and it cannot be expected that the public should know much about it. The brigade was formed in *April, 1860*, for the purpose of keeping in order in time of peace the various works of defence round our coast and assisting to defend them in time of war; and it forms, with the exception of ridingmasterships, the only opening in that extensive body of about 30,000 miscalled the Royal Regiment of Artillery, whereby deserving non-commissioned officers have a prospect of rising to combatant commissioned rank. There are now ten captains commanding divisions and eighteen lieutenants in the brigade, the highest attainable regimental rank being that of captain. The captains of course take their place amongst that rank in the Army for brevet promotion, and may, as in the case of the three now senior, become brevet majors, should health and strength be vouchsafed them to a good old age. Many of the captains are now bordering on, while some have fully attained, the venerable age of three score years. The four senior lieutenants have very nearly seventeen years' service in that rank; then comes one of thirteen years, another of twelve years, others above eleven years, and so on in the scale. The officers feel themselves isolated in more than one sense. The very introduction of the brigade was looked upon as an encroachment upon the conservative rights of the regiment, where such a thing as a combatant officer promoted from the ranks was unknown, and I fear the time has not yet arrived for the total disappearance of all the coldness which that introduction naturally engendered. The questions which occur to those more conversant with the working of regulations by which the brigade is governed are—1. Is there any reason why a deserving non-commissioned officer of Artillery should not have before him the same means of attaining the higher commissioned ranks open to his brethren of Cavalry and Infantry, but closed to him in the only brigade of his regiment which he can enter as a combatant officer? 2. Is it possible that no steps will be taken to ensure a more equitable proportion of commissions from the ranks of the Royal Artillery and a better flow of promotion in this brigade, when there is so much talk and correspondence about other branches of the Service? 3. Is it known that no class of officers in the Service have more onerous and responsible duties to fulfil than those I refer to, and that very many of them are performing extra duties for which they do not receive the usual pecuniary allowance in like cases? 4. Does it ever occur to any but themselves that the majority of the subalterns of this brigade are living in a state of respectable indigence in the struggle of keeping their families in such a manner as will cast no reflection on their position (*vérité sans peur*) on the poor pay of their rank, hoping almost against hope for that promotion which "drags its weary length along," that they may enjoy at least a year or two of that rank which brings additional means, and which some of their seniors have uninterruptedly held for seventeen years without the bitter experience of having served as subalterns at all in the brigade?—I am, &c.,

Poor Old Gunner.

His Royal Highness the Prince of Wales has sent a donation of £25 by Gen. Sir W. Knollys to the Hunt Servants' Benefit Society.

STATIONS OF HER MAJESTY'S SHIPS IN COMMISSION.

With the Dates and Ports of Commission.

(Corrected to the same date as the official "Navy List," which will be published March 1.)

ABOUKIR, 23, screw receiving-ship, Commodore Algernon McLennan Lyons, Jamaica. Recommissioned at Jamaica July 1, 1870.

Achilles, 16, screw armour-plated ship, Captain Sholto Douglas, Coast-guard ship, Rockferry. Commissioned at Devonport April 1, 1875.

Active, 10, iron screw-corvette, Commodore Sir W. N. Hewett, V.C., K.C.B., West Coast of Africa and Cape of Good Hope. Commissioned at Portsmouth Oct. 2, 1875. (Ordered home).

Alacrity, schooner, tender to Pearl, Lieut.-Com. W. U. Moore. Australia. To be recommissioned at Sydney.

Albatross, 4, composite screw-sloop, Com. Ernest Rice, Pacific. Commissioned at Chatham Feb. 14, 1874.

Alberta, paddle yacht, Staff-Capt. David N. Welch, tender to Royal Yacht, Portsmouth.

Alexandra, 12, double-screw armour-plated ship, Capt. R. O'B. FitzRoy. Commissioned at Chatham Jan. 2, 1877. (Under orders for the Mediterranean.)

Amethyst, 14, screw-corvette, Capt. A. J. Chatfield, Paçific. Commissioned at Devonport July 1, 1873.

Antelope, 2, iron paddle-vessel, Lieut.-Com. E. Wingfield, Mediterranean. Recommissioned at Malta Feb. 12, 1874.

Arab, 4, composite screw gunvessel, Com. F. S. Broughton, East Indies. Commissioned at Devonport July 2, 1875.

Argus, 5, paddle-sloop, Com. E. J. Jermain, North America and West Indies. Commissioned at Portsmouth March 27, 1873.

Arrow, double-screw gunboat, attached to R.N. College, Greenwich.

Asia, 4, guardship of Reserve, Capt. C. L. Waddilove, flagship of Rear-Admiral Sir F. L. M'Clintock, Portsmouth. Recommissioned at Portsmouth April 1, 1876.

Assistance, 2, iron screw troop-ship, Capt. Prattent, particular service. Commissioned at Portsmouth Dec. 1, 1875.

Audacious, 14, double screw, armour-plated ship, Capt. Colomb, flagship of Vice-Admiral A. P. Ryder, China. Commissioned at Chatham Sept. 1, 1874.

Aurora, 28, screw-frigate, Capt. H. D. Grant, C.B., Coast-guard ship, Greenock. Commissioned at Devonport May 8, 1874.

Avon, 4, double-screw composite gunvessel, Com. L. C. Keppel, West Coast of Africa. Commissioned at Portsmouth June 1, 1876.

Barracouta, 5, paddle-sloop, Capt. C. E. Stevens. Commissioned at Sheerness March 10, 1873. Portsmouth (paying off).

Beacon, 4, double-screw composite gun-vessel, Com. H. Dunlop, South-East Coast of America. Commissioned at Chatham July 8, 1873.

Beagle, schooner, Lieut.-Com. C. Caffin, Australia. Recommissioned at Sydney Jan. 11, 1876.

Bellerophon, 15, armour-plated screw-ship, Capt. Frank T. Thomson, flagship of Vice-Admiral Sir A. Cooper Key, K.C.B., North America and West Indies. Recommissioned at Halifax Sept. 27, 1876.

Bittern, 3, double-screw gun-vessel, Com. G. J. Anstruther, Mediterranean. Commissioned at Devonport July 4, 1871.

Black Prince, 28, armour-plated iron screw-ship, Capt. T. Lethbridge, Channel Squadron. Commissioned at Devonport July 29, 1875.

Boscawen, 16, training-ship, Com. R. G. Kinahan, Portland. Recommissioned at Portsmouth Jan. 1, 1873.

Boxer, 4, double-screw composite gun-vessel, Com. Arthur Alington, Cape and West Coast of Africa. Commissioned at Chatham *Dec.* 11, 1876.

Brilliant, 8, training-ship for Naval Reserve, Inverness, tender to the Clyde.

Britannia, training-ship for Naval Cadets, Capt. W. Graham, Dartmouth. Recommissioned April 1, 1876.

Britomart, 2, gunboat, Lieut.-Com. J. Sulivan, Devonport.

Bullfinch, 3, double-screw gunvessel, Com. R. M. Lloyd, North America and West Indies. Commissioned at Sheerness July 13, 1874.

Cambridge, 29, gunnery-ship, Capt. the Hon. W. J. Ward, Devonport Recommissioned April 1, 1876.

Castor, 13, Naval Reserve drill-ship, Com. A. C. Curtis, North Shields. Recommissioned Jan. 1, 1873.

Challenger, 8, screw-corvette, Capt. E. Hardinge, A.D.C., temporary flag-ship of Rear-Admiral Augustus Phillimore, Coast-guard ship, Harwich. (Will be relieved by Penelope.)

Charybdis, 17, screw-corvette, Capt. T. E. Smith, China. Commissioned at Sheerness Sept. 26, 1873.

Cherub, 2, screw gunboat, Lieut.-Com. F. R. Kemp, tender to Coast-guard ship, Harwich.

Clyde, 15, Naval Reserve drill-ship, Com. H. C. Best, Aberdeen. Recommissioned Jan. 1, 1873.

Cockatrice, 1, screw-gunboat, Com. A. J. W. Musgrave, Mediterranean. Recommissioned at Malta March 14, 1876.

Conflict, schooner, Lieut.-Com. W. M. Carey, Australia. To be recommissioned at Sydney.

Contest, 4, composite gunboat, Lieut.-Com. G. W. Allen, Cape of Good Hope and West Coast of Africa. Will shortly join N. American Squadron. Commissioned at Devonport April 22, 1875.

Coquette, 4, screw composite gunboat, Lieut.-Com. E. Shirley, Mediterranean. Recommissioned at Malta Feb. 1, 1875.

Cracker, 4, double-screw composite gun-vessel, Commander C. H. Hawkins, South-East Coast of America. Commissioned at Portsmouth June 10, 1873.

Crocodile, 3, Indian troopship, Capt. P. R. Sharpe, Portsmouth. Recommissioned at Portsmouth Aug. 5, 1876.

Cromer, 2, screw-gunboat, Lieut. V. E. Von Donop, tender to Achilles, Birkenhead.

Cruiser, 4, sailing-sloop, Com. John Hext, Mediterranean. Recommissioned at Malta March 14, 1876.

Curlew, 3, double-screw gun-vessel, Com. E. J. Church, China. Recommissioned at Hong Kong Dec. 1, 1874.

Cygnet, 4, screw composite gunboat, Lieut.-Com. R. F. Hammick, Cape of Good Hope and West Coast of Africa. Commissioned at Devonport July 8, 1875.

Dædalus, 13, Naval Reserve drill-ship, Com. W. H. St. Clair, Bristol. Recommissioned Jan. 1, 1873.

Danae, 12, screw-corvette, Capt. J. C. Purvis, under orders for East Indies. Commissioned at Portsmouth Sept. 20, 1876.

Daphne, 5, screw-sloop, Com. G. B. Evans. Recommissioned at Zanzibar April 1, 1875.

Dapper, 2, screw-gunboat, Lieut.-Com. T. E. Miller, tender to Britannia, Dartmouth.

Daring, 4, composite screw-sloop, Com. J. G. J. Hanmer, Pacific Commissioned at Chatham Sept. 29, 1874.

Dasher, 2, paddle-vessel, Com. A. F. FitzGeorge, Channel Islands. Recommissioned at Portsmouth April 1, 1876.

Decoy, 4, composite screw gun-boat, Lieut.-Com. J. Hayes. Commissioned at Devonport Oct. 20, 1872. Devonport (paying off).

Defence, 16, iron screw-ship, armour-plated, Capt. R. P. Cator, Channel Squadron. Commissioned at Devonport Feb. 25, 1876.

Devastation, 4, armour-plated turret-ship, Capt. F. W. Richards, Mediterranean. Commissioned at Portsmouth Jan. 9, 1873.

Diamond, 14, screw-corvette, Capt. G. S. Bosanquet, East Indies. Commissioned at Sheerness July 13, 1875.

Dryad, 9, screw-sloop, Com. R. D. King, North America and West Indies. Commissioned at Devonport Aug. 13, 1874.

Duke of Wellington, 25, screw-ship, Capt. Hon. W. C. Carpenter, flagship of Admiral George Elliot, Portsmouth. Recommissioned Jan. 1, 1874.

Duncan, 31, screw-ship, Captain St. G. D'Arcy-Irvine, flagship of Vice-Admiral Henry Chads, Sheerness. Commissioned at Sheerness April 1, 1873.

Durham, 17, Naval Reserve drill-ship, Commander W. Howorth, Sunderland. Recommissioned Jan. 1, 1873.

Eagle, 12, Naval Reserve drill-ship, Com. A. F. M. Meyer, Liverpool. Recommissioned Jan. 1, 1873.

Eclipse, 12, screw-corvette, Capt. J. E. Erskine, North America and West Indies. Commissioned at Sheerness Nov. 19, 1873.

Egeria, 4, composite screw-sloop, Com. A. L. Douglas, China. Commissioned at Devonport Nov. 2, 1874.

Elfin, paddle yacht, tender to Victoria and Albert, Staff-Com. A. Balliston, Portsmouth.

Enchantress, 1, paddle yacht, Staff-Com. E. H. Hills, tender to Asia, Portsmouth.

Encounter, 14, screw-corvette, Capt. R. Bradshaw, North America and West Indies. Commissioned at Sheerness Aug. 21, 1873.

Endymion, 22, screw-frigate, Captain J. Moresby, Coast-guard, Hull. Commissioned at Sheerness Oct. 1, 1875.

Euphrates, 3, Indian troopship, Capt. W. H. Cuming, Portsmouth Recommissioned at Portsmouth July 1, 1876.

Eurydice, training-ship for seamen, Capt. M. Hare. Commissioned at Portsmouth Feb. 7, 1877.

Excellent, 13, gunnery-ship, Capt. F. A. Herbert, Portsmouth. Recommissioned April 1, 1876.

Express, 4, screw composite gunboat, Lieut.-Com. Hon. A. C. Littleton, Gibraltar. Commissioned at Devonport Aug. 10, 1875.

Fantôme, 4, composite screw-sloop, Com. T. M. Maquay, Pacific. Commissioned at Devonport Dec. 5, 1873.

Fawn, 4, screw-sloop, Com. W. J. L. Wharton, surveying vessel, East Coast of Africa. Commissioned at Chatham June 1, 1876.

Fervent, 2, screw-gunboat, Lieut. F. G. Dundas, tender to Dædalus, Bristol.

Fire Queen, iron paddle-vessel, Staff-Com. T. Pounds, tender to Duke of Wellington, Portsmouth.

Fisgard, 22, stationary ship, Staff-Com. W. H. Sharp, Greenwich. Recommissioned Nov. 2, 1869.

Flirt, 4, double-screw composite gun-vessel, Lieut. A. O'Rorke, tender to Aurora, Greenock.

Flora, 12, store ship, Com. H. J. F. Campbell, Cape of Good Hope. Recommissioned at the Cape Oct. 22, 1872.

Fly, 4, double-screw composite gun-vessel, Com. John Bruce, China. Commissioned at Devonport June 25, 1874.

Flying Fish, 4, composite screw-sloop, Com. H. F. Crohan, East Indies. Commissioned at Chatham June 18, 1874.

Foam, 4 screw composite gunboat, Lieut.-Com. R. W. Hope, South-East Coast of America. Commissioned at Sheerness May 20, 1874.

Fox, 2 screw store-ship, Staff-Com. J. G. Dathan, particular service. Recommissioned at Devonport April 1, 1876.

Frolic, 4, double-screw composite gun-vessel, Com. A. E. Dupuis, China. Recommissioned at Hong Kong April 20, 1876.

Ganges, 19, training-ship, Com. R. L. Byng, Falmouth. Recommissioned April 1, 1876.

Goshawk, 4, composite gunboat, Lieut. A. T. Bagge, tender to Revenge, Queenstown.

Growler, 4, double-screw composite gun-vessel, Com. W. Stewart, China. To be recommissioned at Hong Kong.

Hart, 4, double-screw composite gun-vessel, Com. Hon. H. N. Hood, China. Recommissioned at Malta Feb. 12, 1874.

Hector, 18, screw armour-plated ship, Capt. C. M. Buckle, Coast-guard, Southampton Water. Commissioned at Portsmouth June 4, 1875.

Helicon, 2, paddle despatch-vessel, Lieut.-Com. R. W. Stopford, Mediterranean. Recommissioned at Malta Feb. 12, 1874.

Hercules, 14, armour-plated iron screw-ship, Capt. N. Bowden-Smith, flagship of Admiral the Hon. Sir J. Drummond, K.C.B., Mediterranean. Commissioned at Portsmouth April 1, 1875.

Hibernia, 12, receiving-ship, Com. H. E. Stephens, flagship of Rear-Admiral Luard, C.B., Malta. Recommissioned at Malta Jan. 1, 1872.

Himalaya, 3, iron-screw troop-ship, Capt. E. White, particular service. Commissioned at Devonport Oct. 22, 1874.

Hornet, 4, double screw gun-vessel, Com. H. N. Hippisley, China. To be recommissioned at Hong Kong.

Hotspur, 3, iron armour-plated ram, Capt. T. M. Jones, Mediterranean. Commissioned at Devonport June 3, 1876.

Immortalité, 28, screw-frigate, Captain F. A. Hume, Detached Squadron. (Ordered home.)

Implacable, 16, training-ship, Com. C. S. Cardale, Devonport. Recommissioned at Devonport Jan. 1, 1873.

Impregnable, 22, training-ship, Capt. W. H. Edye, Devonport. Recommissioned April 1, 1876.

Indus, guardship of Reserve, Capt. C. Curme, flagship of Rear-Admiral Willes, C.B., Devonport. Commissioned April 1, 1876.

Iron Duke, 14, armour-plated, double-screw ship, Capt. Rowley, Coast-guard ship, Kingstown. Commissioned at Devonport, Oct. 1, 1875.

Jackal, 2, iron paddle vessel, Lieut.-Com. H. A. Digby, West Coast of Scotland. Commissioned at Devonport May 23, 1876.

Juno, 8, screw-corvette, Capt. Poland, China. Commissioned at Sheerness Nov. 4, 1875.

Jumna, 3, iron-screw troop-ship, Capt. John D'Arcy, Portsmouth. Recommissioned at Portsmouth July 1, 1876.

Kestrel, 4, double-screw composite gun-vessel, Com. C. B. Theobald, China. Recommissioned at Hong Kong April 20, 1876.

Lapwing, 3, double-screw gun-vessel, Com. Sir W. Wiseman, China Commissioned at Devonport Sept. 15, 1874.

Liberty, 8, sailing-brig, Lieut. C. Johnstone, Lisbon. Commissioned at Devonport Oct. 13, 1875.

Lily, 3, composite screw gun-vessel, Com. B. E. Cochrane, China. Commissioned at Devonport Aug 3, 1875.

Lion, 12, screw-ship, Lieut. E. H. Clarke, tender to Implacable, Devonport.

London, 2, screw-ship, Capt. T. B. M. Sulivan, Zanzibar. Recommissioned April 25, 1876.

Lord Warden, 18, screw armour-plated ship, Capt. Norman Bedingfeld, Coast-guard ship, Queensferry. Commissioned at Portsmouth Dec. 21, 1876.

Lynx, 4, composite gun-vessel, Com. F. M. Ommanney, East Indies Commissioned at Devonport June 9, 1875.

Magpie, 3, double-screw gun-vessel, Com. C. V. Anson, China. Commissioned at Devonport July 3, 1876.

Malabar, 3, Indian troopship, Capt. E. Kelly, Portsmouth. Recommissioned at Portsmouth July 1, 1876.

Mallard, 4, screw composite gunboat, Lieut.-Com. A. W. Warry, Cape of Good Hope and West Coast of Africa. Commissioned at Devonport March 7, 1873.

Martin, 10, sloop, Lieut. E. Hicks, Lisbon. Commissioned at Portsmouth Oct. 13, 1875.

Midge, 4, double-screw composite gun-vessel, Com. H. Salmond, China. To be recommissioned at Hong Kong.

Minotaur, 17, armour-plated iron screw-ship, Capt. Lord Walter Kerr, flagship of Vice-Admiral F. B. Seymour, C.B., Channel Squadron. Commissioned at Portsmouth Aug. 6, 1875.

Modeste, 14, screw-corvette, Capt. A. Buller, C.B., China. Commissioned at Devonport Jan. 1, 1874.

Monarch, 7, armour-plated screw turret-ship, Capt. M. Culme-Seymour, Mediterranean. Commissioned at Portsmouth June 10, 1874.

Moorhen, 4, screw composite gunboat, Lieut.-Com. J. Hope, China. Commissioned at Devonport Feb. 10, 1876.

Mosquito, 4, composite screw gunboat, Lieut.-Com. R. H. Paul, China. Recommissioned at Hong Kong April 20, 1876.

Myrmidon, 4, screw gun-vessel, Com. the Hon. R. Hare, Pacific. Commissioned at Sheerness Oct. 24, 1872. (Ordered home.)

Nankin, 28, stationary ship, Capt. R. V. Hamilton, Pembroke. Recommissioned April 1, 1876.

Narcissus, 28, screw-frigate, Capt. Lord Charles Scott, flagship of Rear-Admiral Rowley Lambert, C.B., Detached Squadron. Commissioned at Devonport Oct. 9, 1872. (Ordered home.)

Nassau, 4, screw surveying-vessel, Com. R. H. Napier, China. Commissioned at Malta Oct. 25, 1873.

Nereus, 2, store ship, Staff-Com. J. R. Petch, Coquimbo. Recommissioned at Valparaiso April 1, 1868.

Netley, 2, screw-gunboat, Lieut. J. L. Heane, tender to Favourite, Queensferry, N.B.

Newcastle, 31, screw-frigate, Capt. R. G. Douglas, Detached Squadron. Commissioned at Sheerness Sept. 21, 1874. (Ordered home.)

Nymphe, 9, screw-sloop, Capt. S. P. Townsend, Australia. Commissioned at Sheerness Jan. 5, 1875.

Opal, 14, screw-corvette, Capt. F. C Robinson, Pacific. Commissioned at Sheerness Jan. 10, 1876.

Orontes, 2, iron screw troopship, Capt. E. H. Seymour, particular service. Commissioned at Portsmouth Feb. 7, 1876.

Orwell, 2, gunboat, Lieut.-Com. R. H. L. Cornwall, Coast of Ireland. Recommissioned at Devonport Feb. 23, 1876.

Osborne, Royal paddle-yacht, Com. H. L. Pearson, Portsmouth. Commissioned at Portsmouth June 12, 1874.

Pallas, 8, screw-corvette, Capt. H. H. Beamish, Mediterranean. Recommissioned at Malta Dec. 8, 1875.

Pearl, 17, screw-corvette, Commodore Hoskins, Australia. Commissioned at Portsmouth May 22, 1873. (Ordered home.)

Pembroke, 1, screw block-ship, Capt. J. C. Soady, flagship of Rear-Admiral Fellowes, C.B., Chatham. Commissioned at Sheerness April 1, 1873.

Pert, 4, double-screw composite gun-vessel, Com. H. C. Aitchison, North America and West Indies. Commissioned at Devonport July 1, 1875.

Pheasant, 2, screw gunboat, Lieut. T. Suckling, tender to Endymion, Hull.

Philomel, 3, double-screw gun-vessel, Com. H. H. Boys, East Indies. Commissioned at Sheerness Aug. 22, 1873.

Pigmy, 2, paddle-vessel, Staff-Com. Hewlett, tender to Duke of Wellington, Portsmouth.

Pioneer, 6, composite paddle-vessel, Lieut.-Com. E. Hotham, Cape of Good Hope and West Coast of Africa. Commissioned at Sheerness July 3, 1876.

Plover, 3, double-screw gun-vessel, Com. H. B. Stewart, North America and West Indies. Commissioned at Portsmouth June 1, 1876.

Porcupine, 1, paddle surveying-vessel, Staff-Capt. J. Parsons, tender to Fisgard.

President, 10, Naval Reserve drill-ship, Com. L. B. Solly, West India Docks. Recommissioned Jan. 1, 1873.

Raleigh, 22, iron screw-frigate, Capt. G. Tryon, C.B., Mediterranean. Commissioned at Chatham Jan. 13, 1874.

Rapid, 3, screw-sloop, Com. E C. Drummond, Mediterranean. Recommissioned at Malta Feb. 1, 1875.

Ready, 4, double-screw composite gun-vessel, Com. Stanhope Grove, Gibraltar. Commissioned at Chatham April 16, 1873. (Ordered home.)

Renard, schooner, Lieut.-Com. H. J. Pugh, Australia. Recommissioned at Sydney Sept. 11, 1875.

Repulse, 12, screw armour-plated ship, Capt. F. W. Wilson, Pacific, flagship of Rear-Admiral De Horsey. Commissioned at Portsmouth July 9, 1872.

Research, 4, armoured screw-sloop, Capt. Earle, Mediterranean. Recommissioned at Malta Aug. 17, 1875.

Resistance, 16, screw armour-plated ship, Capt. C. W. Hope, Channel Squadron. Commissioned at Devonport July 9, 1873.

Revenge, 28, screw-ship, Capt. H. R. Wratislaw, flagship of Rear-Admiral Hillyar, C.B., Queenstown. Recommissioned July 1, 1876.

Rifleman, 4, double-screw composite gun-vessel, Com. F. S. Clayton, East Indies. Recommissioned at Bombay April 14, 1876.

Ringdove, 3, double-screw gun-vessel, Com. U. C. Singleton, China. Recommissioned at Hong Kong Feb. 1, 1873. (Ordered home.)

Rocket, 4, composite screw gun-vessel, Lieut. Com. C. R. Harris Pacific. Commissioned at Sheerness Sept. 9, 1874.

Rover, 18, iron screw-corvette, Capt. T. Barnardiston, North America and West Indies. Commissioned at Chatham Dec. 14 1875.

Royal Adelaide, 13, Capt. J. O. Hopkins, flagship of Admiral Sir T Symonds, K.C.B., Devonport. Recommissioned Jan. 1, 1877.

Rupert, 4, double-screw iron-clad ram, Capt. W. J. Hunt Grubbe C.B., Mediterranean. Commissioned at Chatham May 25, 1876.

Salamis, 2, paddle despatch-vessel, Com. F. W. Egerton, Channel Squadron. Commissioned at Devonport Aug. 29, 1876.

Sandfly, schooner, Lieut.-Com. J. J. Bell, Australia. Recommissioned at Sydney Jan, 11, 1876.

Sapphire, 14, screw-corvette, Capt. E. H. Murray, Australia. Commissioned at Devonport Aug. 9, 1875.

Sappho, 4, composite screw-sloop, Com. N. S. F. Digby, Australia Commissioned at Chatham Aug. 26, 1874.

Seaflower, 8, brig, Lieut. R. H. Eyre, Lisbon. Commissioned at Portsmouth Oct. 13, 1875.

Seagull, 3, double-screw gun-vessel, Com. M. Heron, Cape and West Coast of Africa. Commissioned Jan. 9, 1877.

Sealark, 8, brig, Lieut. F. H. Haygarth, Lisbon. Commissioned at Devonport Oct. 13, 1875.

Serapis, 3, Indian troopship, Capt. G. D. Davidson, Portsmouth. Commissioned at Portsmouth Oct. 2, 1876.

Shah, 26, iron screw-frigate, Capt. F. G. D. Bedford, Pacific. Commissioned at Portsmouth Aug. 14, 1876.

Sheldrake, 4, screw composite gunboat, Lieut.-Com. J. B. Haye, China. Commissioned at Devonport Dec. 16, 1875.

Simoom, 2, iron-screw troopship, Capt. R. G. S. Pasley, particular service. Commissioned at Devonport May 5, 1873.

Sirius, 12, screw-corvette, Capt. G. L. Sulivan, Cape of Good Hope and West Coast of Africa. *Commissioned at Devonport Sept.* 6, 1875.

Spartan, 12, screw-corvette, Capt. R. E. Tracey, East Indies. Commissioned at Sheerness June 15, 1876.

Spiteful, 6, paddle-sloop, Com. A. T Fowlett, West Coast of Africa. Commissioned at Portsmouth July 31, 1873. (Ordered home.)

Sprightly, paddle-vessel, Nav.-Lieut. W. J. Tregidgo, tender to Duke of Wellington, Portsmouth.

Squirrel, 8, sloop, Lieut. R. N. Hamond, Lisbon. Commissioned at Devonport Oct. 13, 1875.

St. Vincent, 22, training-ship for boys, Commander A. T. Brooke, Portsmouth. Recommissioned April 1, 1876.

Sultan, 12, iron screw armour-plated ship, Captain H.R.H. the Duke of Edinburgh, K.G., Mediterranean. Recommissioned Feb. 25, 1876.

Supply, 2, iron screw-storeship, Staff-Com. Frank Inglis, Cape of Good Hope and West Coast of Africa. Commissioned at Chatham Dec. 16, 1873. (Ordered home.)

Swiftsure, 14, armour-plated screw-ship, Capt. J. K. E. Baird, Mediterranean. Recommissioned at Devonport April 18, 1875.

Swinger, 4, composite gunboat, Lieut. E. A. Bolitho, China. To be recommissioned at Hong Kong.

Sylvia, 3, screw surveying-vessel, Capt. B. W. Bax, China. Commissioned at Sheerness Nov. 13, 1873.

Tamar, 2, iron screw troopship, Capt. W. H. Liddell, particular service. Commissioned at Devonport Oct. 3, 1876.

Teazer, 4, double-screw composite gun-vessel, Com. C. Wodehouse, East Indies. Commissioned at Sheerness Oct. 7, 1875.

Terror, 8, screw armour-plated floating battery, Captain L. E. H. Somerset, Bermuda. Recommissioned Jan. 1, 1877.

Thetis, 14, screw-corvette, Capt. T. Le H. Ward, East Indies. Commissioned at Devonport Feb. 1, 1873, (Ordered home).

Thistle, 4, double-screw composite gun-vessel, Com. E. B. Pusey, China. Recommissioned at Hong Kong Dec. 1, 1874.

Topaze, 28, screw-frigate, Captain A. Thrupp, Detached Squadron. Commissioned at Devonport Oct. 9, 1872. (Ordered home.)

Torch, 5, screw gun-vessel, Com. R. H. Hamond, Mediterranean. Commissioned at Sheerness Jan. 5, 1871.

Tourmaline, 12, screw-corvette, Capt. F. W. Sullivan, C.B., Cape of Good Hope and West Coast of Africa. Commissioned at Sheerness Oct. 25, 1876.

Trincomalee, 15, Naval Reserve drill-ship, Com. A. J. V. Collins, Southampton. Recommissioned Jan. 1, 1873.

Triumph, 14, iron screw-ship, armour-plated, Capt. Parkin, flagship of Rear-Admiral Rice, Mediterranean. Commissioned at Devonport Nov. 12, 1873.

Tyrian, screw-gunboat, Lieut. A. H. Duthie, tender to Favorite, Queensferry.

Undaunted, 31, screw frigate, Capt. H. W. Brent, flagship of Vice-Admiral Macdonald, K.C.S.I., East Indies. Commissioned at Sheerness March 2, 1875.

Unicorn, 10, drill-ship for the Naval Reserve, Com. W. E. S. Brome, Dundee. Recommissioned Jan. 1, 1874.

Valiant, 18, screw armour-plated ship, Captain N. Salmon, V.C., Coast-guard, River Shannon. Recommissioned April 1, 1876.

Valorous, 6, paddle-frigate, Capt. L. F. Jones, particular service. Commissioned at Devonport Feb. 26, 1875.

Vernon, torpedo school-ship, Capt. W. Arthur, Portsmouth. Commissioned April 26, 1876.

Vestal, 9, screw-sloop, Com. H. Hand, East Indies. Commissioned at Portsmouth July 14, 1875.

Vesuvius, double-screw torpedo-vessel, Capt Singer, Portsmouth, tender to Vernon.

Victoria and Albert, 2, Royal paddle-yacht, Capt. Portsmouth. Recommissioned Jan. 1, 1870.

Victory, 26, tender to Duke of Wellington, Portsmouth.

Victor Emanuel, 2, screw receiving-ship, Commodore G. Watson, Hong Kong. Recommissioned Dec. 1, 1874.

Vigilant, 2, paddle despatch-vessel, Lieut.-Com. H. C. Ryder, China. Commissioned at Portsmouth Sept. 1, 1874.

Vivid, paddle-vessel, Staff-Com. Edwin Wise, tender to Royal Adelaide, Devonport.

Volage, 18, screw corvette, Capt. Henry Fairfax, South-East Coast of America. Commissioned at Portsmouth July 6, 1874.

Vulture, 3, double-screw gun-vessel, Com. H. Washington, East Indies. Commissioned at Sheerness Dec. 28, 1876.

Warrior, 32, armour-plated iron screw-ship, Captain W. H. Whyte, Coast-guard service, Portland. Commissioned at Portsmouth April 1, 1875.

Wildfire, paddle-vessel, Staff-Com. R. L. Cleveland, tender to Duncan, Sheerness.

Wizard, 2, screw-gunboat, Lieut.-Com. W. Neilson, Mediterranean. Recommissioned Malta Feb. 1, 1875.
Wolverene, 17, screw-corvette, Capt. L. Brine, Australia. Commissioned at Sheerness Aug. 1, 1876.
Wye, iron screw storeship, Staff-Com. W. W. Vine, particular service, Commissioned at Chatham April 15, 1875.
Zephyr, 4, composite gunboat, Lieut.-Com. W. G. Le Cocq, North America and West Indies. Recommissioned at Halifax Sept. 27, 1876.

THE ARMY MEDICAL DEPARTMENT.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—In any scheme advanced to improve the Medical Service of the Army, and to render it attractive to men who are looking out for a desirable profession, there are one or two points which cannot be overlooked without fatal mistake. Mr. Cardwell, in his revolutionary changes, omitted one precaution which prudence and experience should have suggested to him—viz., the necessity of keeping faith with the men already in the Service, and making their contentment and happiness the source whereby the needful supply of fresh men would be attracted to it. Promotion at twelve years' service may be very attractive, but it is a mistake to make promotion dependent upon a fixed period of service. Local rank of surgeon-major at twelve years is necessary in India, to put the Queen's and the Indian Services upon an equal footing; otherwise, on active service a surgeon-major in the Indian Service might hold a charge with surgeons in the Queen's Service, his seniors, under his orders; but, unless promotion to the rank of surgeon-major is to carry with it a definite charge, the rank and name alone bring no honour to their possessor. In days of old promotion from assistant-surgeon to the rank of surgeon carried its own honour and reward in recognised rank and corresponding privileges, and in its higher and more responsible duties, and assistant-surgeons felt an honourable ambition in looking forward to enjoy some measure of relief from the more unpleasant or less important duties of their youth, and to obtain a social position of some importance; and they were well content when they had gained their spurs, knowing they meant something. Now the position of surgeon-major has lost all its attractiveness. Young men (greatly to their credit, of course) have been given charges while yet their seniors are performing subordinate duties, or they are working together side by side. The man of years cannot forget his hardships in the Mutiny or his sufferings in Burmah, and albeit much dysentery has rather limited his capacity for hard work, he is yet a valueable man from his accumulated experience and his knowledge of the Service; he has lost some of his "*go*," but his ability to direct and control are utterly wasted, and he longs for the time when he may be able to quit a Service which, from the legislation of the last few years, has become distasteful to him. Now, why should these things be? The Service is well and sufficiently paid. But man does not live by bread alone; he requires a stimulus to give him life. An honourable man will do his duty. At the same time, it may lack half its reward if it does not bring him self-esteem and the esteem of his fellows. Time promotion ruined the old Indian Staff Corps. I can conceive no more miserable or ill-used man than the "doing-duty wallah" colonel drawing his £1,000 a-year with no charge or position of which to feel proud, living only for the hope of retirement. Had those men been promoted to fill vacant appointments they would have been able and contented public servants, respecting themselves and respected by others. Why was this prize in life denied them? In dealing with the Army Medical Service Mr. Cardwell committed the same mistake. His aim was to quicken promotion, and so render the Service more attractive; but in adopting an artificial instead of a *bonâ fide* vacancy promotion he lowered the status of all enjoying the higher rank, and even added insult to the wrong by robbing those he promoted to the rank of field officer of their horse allowance. The authorities were quite right in appreciating the necessity of working with less expensive materials than men of twenty years' service, but, in their keen anxiety to obtain the raw material in the shape of candidates, they began their reforms at the wrong end. Had they said, "The pay and allowances of a field officer shall be given on promotion, which shall be regulated by seniority as vacancies occur, the duties of the two ranks being, as before, entirely distinct, but the pay of each increasing every five years," only one thing more would have been needed to render the Service attractive, create a rapid promotion, and supply the Army with the *élite* of the profession, viz., a liberal scale of retirement —£1 a-day at twenty years, and 1s. a-day for each year after. The present scheme cannot work, and a title which carries with it neither honour nor special advantages cannot long be regarded as other than a makeshift.—I am, &c.,

A Surgeon-Major.

The following is given by *Vanity Fair* as the true story about Capt. the Hon. A. C. Hobart, better known as Hobart Pasha:—In 1868 the Turkish Government requested the British Government to send them a naval officer of rank to organize their Navy; and, the Foreign Office granting their permission, the Admiralty was asked to find an admiral willing to go. There was little difficulty in finding one, the promised salary being something like £7,000 per annum, and there was any amount of scrambling for the prize. Their Lordships took such a long time considering the claims of the numerous applicants that the Turks became tired of waiting, and they accepted the services of Capt. Hobart. The authorities at Whitehall selected Admiral Sir William Wiseman, Bart., K.C.B., who conducted the naval operations in the last New Zealand war, and informed the Turks of their choice. The latter declined the offer "with thanks," being already suited. Their Lordships, in great anger at losing such a piece of patronage, ordered Capt. Hobart home, and declared they should erase his name from the "Navy List" if he did not obey them. Naturally enough, that gallant officer did not see why he should give precedence to Sir William Wiseman, and he refused point-blank to return to England. His name was, therefore, struck out of the "Navy List." Three years ago the injustice was recognised, and Capt. Hobart's name was replaced on the Retired List; and as he served with distinction in the Russian war, it seems very unfair to deprive him of his retired pay, which amounts to rather less than £500 per annum.

Furnish on the New Hire System.—The "New Hire System" is quite distinct from anything yet attempted. Houses furnished throughout. 20 Wholesale Houses to select goods from. "An excellent idea."—"Army and Navy Gazette." Prospectus, with Press opinions, post-free. General Furnishing Company—Offices, 9, Southampton-street, Strand

PARLIAMENT.

The Arctic Expedition.

On Saturday, in reply to a question put by Capt. Pim as to the reason of the Arctic crews being given extra leave,

Mr. Hunt said that in consequence of the exceptional character of the service of the Arctic Expedition, and the fact that for eighteen months during which they were absent from England no leave could be given to the crews of the Arctic ships, three weeks' extra leave on full pay was granted to the officers and men, and I do not think any member of the House will grudge that little indulgence. (Cheers.) The production of the minute, to which there will not be the slightest objection, would give the hon. and gallant member no further information.

Navigating Officers.

On Monday Mr. Anderson asked whether it was not the fact that the concessions made to the navigating officers last year had resulted in junior navigating officers getting over the heads of their seniors in the same branch.

Mr. Hunt: I believe there has been no case at present in which junior navigating officers have been put over the heads of their seniors in the same branch; but I find it is possible that the thing might happen in a case which has been brought to my notice, and to that I am giving my attention. If the hon. member will communicate with me on the exact point suggested by his question I shall be happy to consider the matter.

Hobart Pacha.

Sir George Campbell asked whether there would be any objection to lay upon the table the correspondence between Capt. Hobart, the Admiralty, and the Foreign Office with reference to that officer's removal from, and restoration to, the Navy, and to any intermediate applications from him; and also whether the calculation of his service for retired pay would be given.

Mr. Hunt: There is no objection to lay the correspondence on the table. The retired pay was calculated under the Order in Council, and the years during which the officer was not in the Service were not taken into account.

The Russian Fleet.

On Tuesday, in answer to Captain Pim, who asked what precautions had been taken to guard against disaster in the Pacific, where, he asserted, the Russians have a fleet of eleven corvettes,

Mr. Hunt said that it had been reported to him that on Jan. 24 the Russians had but one corvette, two gunvessels, and three gunboats in the Pacific. Mr. Hunt went on to remark, amid much cheering, that he did not share in the anticipation implied on the question of a war with Russia, with whom our relations were of a friendly character. In the event of British interests being threatened in any quarter of the world, he hoped the House would rely on the Government taking proper steps for their protection.

The Royal Marines.

In answer to Sir G. Balfour, the Chancellor of the Exchequer said the First Lord of the Admiralty, in bringing forward the Navy Estimates, would make a statement with regard to the retirement of officers of the Royal Marine Corps.

Navy Administration.

Capt. Pim, who had a motion on the paper for the appointment of a Select Committee "to inquire fully into the present Admiralty organization," &c., was proceeding later to point out the importance of the subject, when the attention of the Speaker was called to the fact that there were not forty members present. A "count out" followed.

Training Boys for the Navy.

On Thursday, in answer to Mr. Downing,

Mr. Hunt said he was told the rule that Irish boys anxious to enter the Navy could not be received at the guard ship in Queenstown has been in force some twenty years. It was impossible to train boys perfectly there, and to remove them to another port would entail heavy expenses on the Admiralty. As at present the supply of boys for the Navy was greater than the demand, he could not hold out any hope of altering the rule.

The Eastern Question.

In the House of Lords last night, Lord Stratheden and Campbell said that he wished to inform their Lordships of the exact form of the motion which it was his intention to move on Monday, that an humble address be presented to her Majesty praying her to adopt such measures as appeared to be best for the prevention of hostilities, and for securing adherence to the treaties of March 30 and April 15, 1856, as modified and re-established by the Conference of 1871 and to promote the welfare of the subjects of the Ottoman Empire. Enquiry had been made of him as to whether it was his intention to proceed with the motion, and he now begged to say that it was his intention to do so, the object of his motion being to prevent hostilities, inasmuch as the Armistice was to expire on the 1st of March. The only contingency that would prevent his doing so was the declaration of war in the meantime between Turkey and Russia, and he did not think he need anticipate anything of that kind.

Amongst the "printed papers" presented to the House are a "Report by the Inspector-General of Recruiting for 1876," and a "Report of the Proceedings in Reference to Artillery Volunteers (Shoeburyness) in August, 1876," also a Return under the head of "the Navy," of the number of ships paid off.

Building of Ships of War.

In the House of Commons last night,

Mr. W. Whitworth asked the First Lord of the Admiralty if he would lay upon the Table of the House a copy of the Minute or order authorising the construction or other department of the Admiralty to furnish to the Russian Government (previous to and up to the commencement of the late Crimean war) general and detailed working plans of any of our war ships building or about to be built, and also if information of this description could still be obtained by that Government.

Mr. Ward Hunt said that several had been made at the Admiralty so far back as the year 1848, and no trace of any such minute or order as that referred to in the question of the hon. member had been found. There was no general rule or order bearing on the subject, but when any application in relation to the matter contained in the question put by the hon. gentleman was made to the Admiralty by any foreign Government, it was considered on its merits, and if there were no objection to it, consent was given at the time.

The Old Indian Ordnance Corps.

Mr. Dunbar rose to ask the Government whether the Secretary of State had taken or will take into consideration "the conditions and rates of the retiring pensions of officers of the old Indian Ordnance Corps," as suggested by the Commissioners on Army Promotion and Retirement at page 32 of their Report: whether he proposed to take any and what steps to ensure "to these officers, as far as may be, an equality in this respect with those of the other branches of the Service": whether he would adopt, as far as might be, the plan proposed to be adopted (subject to the sanction of the Treasury) by the Secretary of State for War, which that right hon. gentleman had stated would proceed generally on the lines recommended by the commissioners, or what other steps he proposed to take in the matter; and, if he had determined on any plan to secure that the flow of promotion in these corps should be such as to ensure efficiency which the Commissioners had reported was essential.

Mr. Hardy said that the question put by the hon. gentleman was one of a very complex character, and the subject was engaging the attention of his noble friend the Secretary of State for India. It was necessary that his noble friend should communicate with the Secretary of State for War on the subject, and ask also for the opinion of the Indian Government respecting it. He could not give the hon. member any positive information beyond stating that the whole matter was under the consideration of the Indian Department of the Government.

FOREIGN MILITARY.

The Odessa correspondent of the *Cologne Gazette* reports upon the impression made by the Russian Cavalry regiments which have recently joined the camp, and which were reviewed a few days ago by the Commander-in-Chief, Grand Duke Nicholas. The Cavalry consist of dragoons, hussars, and Cossacks. The dragoons, which were first reviewed, made the least favourable impression. They are well-built, strong-looking men, well mounted, but their horsemanship is not creditable. Their unsatisfactory appearance may be partly attributable to fatigue, they having only just arrived, and having come that day some distance. The name "dragoons," in the European sense, when applied to them, is really a misnomer, for they are not dragoons, but mounted Infantry carrying muskets with bayonets, and intended for Infantry duty, using their horses only as a means of locomotion. Every fifth or sixth man is without a musket, his duty being to hold the horses while his comrades dismount and act as Infantry. The hussars are, in their outward appearance, an imitation of the French force of that name, having French caps and bright red trousers. Some of them carry lances. They are likewise, as a rule, fine men, but bad horsemen. The Cossacks appeared far superior in every respect to the other Cavalry, being evidently well trained and well up to their duty.—*Morning Post.*

A Berlin telegram to the *Pall Mall Gazette* states that "the Army Estimates which are to be submitted to the Imperial Parliament renew two proposals rejected last year. The one is to strengthen the Landwehr by the formation of a new brigade in Berlin, the other to create 105 new captaincies in the Infantry of the Line. It is considered unlikely that either proposal will be approved by Parliament."

A telegram dated Berlin, Feb. 22, says that "Prince Alexander of Hesse has authorised a contradiction to be published refuting the statement that he had been offered the command of the Russian Army."

RECRUITING NON-COMMISSIONED OFFICERS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—I observe in your last week's issue of the Army and Navy Gazette an article on the recruiting of non-commissioned officers from a separate class of the population than the privates, and their training under a separate system also. I beg to acquaint you that this subject had already formed the drift of a letter from me inserted in the *United Service Gazette* some time since (Jan. 29, 1876), under the signature of "Pro Bono Militis." The views of your contributor, too, seem very closely to resemble mine in their chief features, and I should be obliged if you would therefore intimate that such like scheme had already been inserted in the military papers. I fully believe that the subject will eventually press for discussion in that direction, and that tendency is just shown by two writers having hit upon the same project to mend matters as they now stand. I discussed my views with several military men at the time, and their opinions were then not favourable to its realisation. This was in consequence of increased expense in enlisting, training, and educating the middle-class non-commissioned officer, and undesirability of causing any check to the future career of deserving private soldiers who would wish for and merit promotion to the non-commissioned or commissioned ranks.—I am, &c., Pro Bono Militis.

OFFICERING THE NATIVE ARMY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—As you did me the favour of publishing my letter on the above subject in a recent issue, I should feel much obliged by your kindly allowing me to add a few lines more on so important a matter as the officering of our Native Army in India. I do not think that the commanding officer who stated in his letter to Col. Dillon that the present system was "cursed" at all overstated the case. That it is so, few who have served with the Native Army since the present system was introduced will deny. I feel firmly convinced that until a regimental system of promotion is introduced into our native armies amongst the English officers, it will be impossible to go on. As long as the present plan of Staff Corps promotion is kept up, whereby officers daily become lieutenant-colonels and majors, irrespective of the requirements of their regiments, things will remain in the same state of chaos as at present. The Staff Corps of the three presidencies should have been kept for the civil departments of the Army, such as Commissariat, Pay, Stud, Judge Advocate-General's, &c., as also for the officers in civil and political employ. To officer the native armies from them was a great mistake; and I am sure that, until this is rectified, things will remain in the same unsatisfactory state. The Staff Corps system of promotion also causes the armies of India to contain too many officers of the higher ranks, by which the native regiments become deluged with field officers. This would not only be very awkward in time of war, but makes colonels and majors do the duties of subalterns during peace. In conclusion, I am glad to find that Lord Napier recognises the importance of keeping officers with the same regiments as much as possible; although, I believe, his Lordship is against increasing the number of British officers per regiment, a matter in which, in the opinion of many experienced officers, he is mistaken. Field Officer.

January 29, 1877.

INSTRUCTION IN TACTICS.

Lieut.-Col. C. B. Brackenbury, R.A., Superintending Officer of Garrison Instruction, delivered a lecture at the Royal United Service Institution yesterday, on "The Value of Systematic Instruction in Tactics for all Ranks of the Army." He said, after some preliminary remarks, "I propose to examine, with your permission, three main questions. What is to be taught? How is it to be taught? Who is to teach it? That which is to be taught is—The art of Tactics. And to each individual in his own sphere. An English army is formed out of two classes of raw material. With rare exceptions the whole of the officers come from the upper classes or the most select portions of the middle classes, the whole of the men from what are popularly called the working classes. The young officer has to be trained to command wisely, to lead cleverly; the recruit has to learn, first, command over his own limbs, weapons, and spirit; then, action in combination with others; and, lastly, the power of acting individually, according to certain definite and well understood rules. All, whether officers or recruits, have to learn unquestioning obedience to orders. Bravery is taken for granted. It can never be manufactured where it does not exist naturally; but it can be assisted in a very high degree, by cultivating that greatest antidote to nervousness—self-reliance, based on knowledge. The answer to our first question, namely 'What is to be taught,' is this. Each officer, non-commissioned officer and private should be taught exactly what he, in his own sphere will be called upon to perform in war, and the officers must be taught the work of the grade superior to them, because the losses experienced in battle may place lieutenants in charge of companies and oblige captains to perform the duties of field officers at a moment's notice. Surely no one can say this is an unreasonable standard. Our next question is, 'How is it to be taught?' The answer seems to me to be perfectly clear. Exactly as every other subject of human knowledge is taught, namely, by a combination of theory and practice, beginning with easy and simple rules and examples and rising by degrees to more complicated problems. Tactics, like music and painting, is both a science and an art. We allow that months and years of study are requisite before a man can become a musician, a painter, or a linguist, and it is almost incredible that we go on day by day satisfied that the study of tactics may be postponed till the time when the most momentous issues depend on our knowledge. Can it be that we neglect this study because our productions in music or painting, our familiarity with languages are likely to be judged by critical audiences, while our knowledge of tactics is seldom tested, and then before extremely merciful judges? But, during the past year there have been at Aldershot a series of interesting small manœuvres, which have proved to be popular and more instructive than the larger field days. It is, I believe, in contemplation to carry the system still further, and to set battalions and companies to work practising the minor details of tactics. If this principle be carried out, the whole army will have reason to rejoice, for all regiments pass at some time or other through our great camp of instruction. It is to be hoped that means will be found for extending the teaching of such eminently practical work to other stations, both at home and abroad. We now come to our third question, which is, however, partly mixed with that which has gone before—'Who is to teach these minor tactics?' And here, gentlemen, you must allow me to remark that I would not venture to say what I am about to do concerning Infantry, had I not been pressed to do so most urgently by officers of that arm, which is, and must ever be, the backbone of armies. It seems to me that to answer the question rightly, we must first determine who is, or ought to be, the officer thrown most closely into contact with the men? Who goes every step with them in battle? Surely this officer is the captain of the company. I do not propose to touch on the vexed question of the size of companies, for I should be treading on too delicate ground; but even admitting that the company is to remain weaker than that of other civilised nations, the fact still remains that the captain is the personal leader in fight, that he is always liable to be detached with his men, that he knows every one of them, and is, more than any other officer, responsible for the conduct of those he leads. Now it appears—I am only quoting Infantry officers—that a strong opinion exists on this question throughout the Line. The feeling is that captains neither see enough of their men, nor are called upon to train them as they would wish to do. If I am wrong in saying the lieut.-col, the adjt., and the sergt.-major, are looked to by the men of every company for instruction and for reward, you must ascribe the mistake not to me, but to the numerous officers of the Line, not captains only, but field officers, who are perpetually asserting the truth of the statement, and condemning the system in no measured terms. You do not need to be told that the opposite system has long prevailed in Prussia; it was adopted by the Austrians after 1866, and since 1870-71 by the French. With Artillery the battery remains now as ever—the fighting unit. Nothing in all this is calculated to filch from the lieut.-col. one jot of his legitimate influence or power of direction, for to him every capt. must be responsible for the training of his men. There has long been in the Artillery a system based exactly on these principles. Each lieut. in a battery has his command of two guns with all the men, horses, and material appertaining to them. If anything goes wrong in his division, as it is called, the commanding officer holds him responsible, and it may be asked whether the emulation, which is considered in the English Service to be so sharp a spur to different battalions and batteries, is likely to fail of its good effects when applied to the companies within the battalions. If you agree with what has been said, my point is proved that the tactical instructors should be the chiefs of squadrons, companies, and batteries."

MINOR TACTICS.

What appears to be a most excellent method of studying minor tactics, with the aid of modelled ground, has been introduced at Aldershot by Capt. Wilkinson Shaw, 102nd Fusiliers, Garrison Instructor. A large model of ground, 22 feet in length by 15 feet in width. has been constructed, standing about the height of a table from the floor of the lecture-room. The scale is 20 yards to an inch, or 88 inches to the mile, the vertical heights being exaggerated as 1½ to 1. The ground is mostly ideal, but so designed as to present the varied kinds of country of ordinary English type necessary to illustrate the secondary operations of war. The model being to scale, three miles long by two miles wide, it follows that six square miles of ground are shown thereon. The difficulty of getting to the centre of a large model for purposes of painting, cleaning, and repairing, has been met by a special arrangement of the framework, the centre portion of which is stationary, the remainder, divided into four wings, two at each side of the centre frame, opening out to an angle, sufficient to admit a person between any two portions as required. The wings, which are fifteen feet (the width of the model) long, by four feet wide, are pivoted at one end, and move out on iron racers something after the manner of a traversing platform. There are thus four sections across the length of the model, but when closed up the wings fit exactly so that no division in the ground is perceptible. The surface of the model is formed of a mixture of three parts of lime, to two parts of sand, and two and a-half parts of plaster of Paris, spread nearly half-an-inch thick, over a substratum of damp sand beaten down hard and modelled to the desired contours of the ground. The surface composition sets so far in about three days as to enable the final modelling of details to be effected, and the elevations of hedges, trees, &c., to be fixed, by letting them in a portion of their height. When the surface has quite dried out, in about a week's time, it is sized with two coats of thin glue, and is then ready for painting. It requires two or three coats of oil paint, the colors being light green for fields and downs, dark brown for ploughed fields, the surface being previously scored in drills, various shades of green for trees, light brown for roads, very bright shade of purple for heather, and light blue for water. Finally the houses, which are cut out in soft wood, and painted red and slate colour, are fixed on with strong glue. The blocks representing troops are cast in lead, and fairly to scale so far as frontage and depth go. Individual scouts, sentries, or vedettes are exaggerated in size, so as to be seen on the model without difficulty. Guns are only to scale so far as their total length when limbered up is concerned. Small parties of Cavalry, not to scale as regards depth, have also been added as a matter of convenience. Vertical heights are, of course, exaggerated, and the blocks, while coloured red or blue on the upper surface, to distinguish the troops of one side from the other as in the war game, are painted white at the sides, so as to show out clearly wherever placed, on the green, heather, and brown tints of the modelled ground. The lecturer and his assistants move the blocks on the model, as required, by means of bamboo rods or pointers with a magnetic tip, a small piece of soft iron being let into each block to facilitate this arrangement. As a general rule, therefore, the model does not require to be opened out during demonstrations, but should the lecturer for any special purpose wish to enter between the wings he can easily do so. By means of a model of ground constructed on these principles, Studies in the minor operations of war can be illustrated with a minuteness of detail hitherto not much practised in our Service. In the case, for example, of a small reconnoitring party, it is possible to show the exact position and route followed by each man. The exercises given in a course of study will be very elementary at first, but will gradually be increased in importance, so as to finally illustrate the tactical movements of small forces of the three arms combined, under varying conditions. Sometimes the troops of one side only will be shown, at others opposing forces will be allowed to come in contact. The object of such Studies will be to accustom the student to the position of leading small bodies of troops, and to force him to make up his mind as to a course of action under given conditions; and more than this, it will practise the commander in the art of carrying out his own designs when once he has determined upon them. In other words, he will learn not only what to do, but how to do it. Having gone through a course on this system it is confidently expected that the officer or non-commissioned officer will be enabled to profit by subsequent exercises in the field, to a degree that he would not otherwise have done. This subject was brought under the notice of the United Service Institution in a lecture yesterday afternoon by Colonel Brackenbury.

THE ROYAL NAVAL COLLEGE.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I hope, in the interests of those half-pay officers at present studying at the Royal Naval College and those who have intentions of so doing, that you will give the following letter a space in your valuable paper. In your edition of last week I notice a paragraph in which you state that the Admiralty do not intend the Royal Naval College to be made a kind of lounge for officers awaiting employment afloat, and that three lieuts. have been discharged for insufficiency of attendance. How is this? Having some experience of the place, I can safely assert that the fault lies in those in authority trying to treat the officers studying there as school boys, and because they occasionally come into study at 9.15 a.m., instead of 9 a.m., they receive a *billet doux* from the President requesting their reasons in writing for being absent 15 minutes. Now men between the ages of 22 and 42 naturally object to being treated in this manner, and, because two or three make a stand (rash youths) a long-winded yarn is written to the Admiralty, and the poor unfortunates are discharged from the College, the Admiralty being probably informed that the said delinquents were continually absent from study, whereas if called upon they can show that such is not the case. However, it remains to be seen whether the system of the present or past Presidents answers the requirements of the Service the best; the number of half-pay officers studying there now and the number studying there last session are facts which speak for themselves, and, if I am rightly informed, the present small number will be considerably reduced after the Easter vacation. Hoping I have not trespassed on your valuable space.—I remain, Sir, your obedient servant,

OLD COLLEGIAN.

February 21, 1877.

TERRITORIAL REGIMENTS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Previous to publishing any improvements connected with the localization of the Forces, would it not be desirable to correct palpable mistakes in the first scheme, one of which is the allotment of the 93rd to Aberdeen—four intermediate counties being between it and its territory—Sutherlandshire? Would it not be desirable that the 71st Highland Light Infantry—without any territorial title—at present at Fort George, temporary for Inverness, should exchange with the 93rd? In a few years the title Sutherland, for the 93rd Highlanders, will be a misnomer, if its present localization continues.—I am, &c.,

AN ADVOCATE OF THE LOCALIZATION SCHEME.

THE RETIREMENT SCHEME.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—In your impression of the 30th December last, under the heading "The Retirement Scheme," the date of my first commission is given as 5th April, 1854. I was gazetted Second Lieut., 21st Foot, 5th April, 1844. Will you oblige me by rectifying the error in a future number of the paper.—I am, &c.,

W. H. BALLINGALL, Brevet Major
35th Regiment.

Newcastle, Jamaica, 23rd January, 1877.

DEATHS.

MACDONALD.—Feb 9 (her birthday), at 42, Coates Gardens, Edinburgh Mary Ann, widow of Captain R. D. Macdonald, late 42nd Royal Highlanders.—*R.I.P.*

SMITH.—Feb 16, at Manchester, Paymaster and Hon. Major William Smith, King's Dragoon Guards, aged 67.

Advertisements.

HOLLOWAY'S OINTMENT and PILLS.—Glad Tidings.—Some constitutions have a tendency to rheumatism, and are throughout the year borne down by its protracted tortures. Let all sufferers bathe the affected parts with warm brine, and afterwards rub in this soothing Ointment. They will find it the best means of lessening their agony, and, assisted by Holloway's Pills, the surest way of overcoming their disease. More need not be said than to request a few days' trial of this safe and soothing treatment, by which the disease will ultimately be completely swept away. Pains that would make a giant shudder are assuaged without difficulty by Holloway's easy and inexpensive remedies, which comfort by moderating the throbbing vessels and calming the excited nerves.

NAVAL CADETS, ASSISTANT CLERKS,
HOPE HOUSE, SOMERSET-PLACE,
SOUTHSEA.
Principal—Mr. T. H. VICKERY.

In addition to the general course of study pursued at this long-established School, pupils are specially prepared for the examination required for the above.

At the competitive examination in November, 1875, and at the recent examination in June, of candidates for Assistant Clerkships, all the pupils sent up from this Establishment were successful.

TRURO SCHOOL. Founded A.D. 1549.—Special preparation of a limited number for Woolwich, the Line, Navy, and Cooper's Hill. Five experienced and energetic resident masters in mathematics and geometrical drawing, the classics, and English, French, science, and German; besides visiting masters in drawing and English composition.

NAVAL CADETSHIPS, &c. "EASTMAN'S" R.N. ACADEMY, SOUTHSEA. Principal, G. EASTCOTT SPICKERNELL, since 1860.

At the last two Naval Cadet Examinations pupils took the first place.

More than 1,000 pupils have entered H.M. Service. For every information address the Principal, Burgoyne House, Burgoyne Road, of late called Eastern Parade.

NEWTON COLLEGE, S. DEVON.—President of Council, EARL of DEVON.—This College is for gentlemen's sons only, on very moderate terms. Officer's nomination, £60 per annum. One Woolwich Scholarship of £20 per annum open this Christmas. Candidates under 15. Papers forwarded January 1st to boys' homes. The situation is healthy and elevated: gravel soil; good cricket ground; racquet and fives court, &c. Apply, Rev. G. TOWNSEND WARNER, Head Master.

WILLIAM S. BURTON,

JAY'S,
THE LONDON GENERAL MOURNING WAREHOUSE, REGENT STREET, W.

DR. J. COLLIS BROWNE'S
CHLORODYNE.
THE ORIGINAL AND ONLY GENUINE,
Which is admitted by the Profession to be the most wonderful and valuable remedy ever discovered.

CHLORODYNE is the best remedy known for Coughs, Consumption, Bronchitis, Asthma.

CHLORODYNE effectually checks and arrests those too often fatal diseases—Diphtheria, Fever Croup, and Ague.

CHLORODYNE acts like a charm in Diarrhœa, and is the only specific in Cholera and Dysentery

CHLORODYNE effectually cuts short all attacks of Epilepsy, Hysteria, Palpitation, and Spasms.

CHLORODYNE is the only palliative in Neuralgia, Rheumatism, Gout Cancer, Toothache, &c.

From Lord FRANCIS CONYNGHAM, Mount Charles, Dec. 11, 1868.

Lord Francis Conyngham, who this time last year bought some of Dr. J. Collis Browne's Chlorodyne from Mr. Davenport, and has found it a most wonderful medicine, will be glad to have half-a-dozen bottles sent at once to the above address.

⁂ Earl Russell communicated to the College of Physicians that he had received a despatch from her Majesty's Consul at Manilla, to the effect that Cholera has been raging fearfully, and that the ONLY remedy of any service was CHLORODYNE.—See *Lancet*, Dec. 31, 1864.

CAUTION.—BEWARE of PIRACY and IMITATIONS.

CAUTION.—Vice-Chancellor Sir W. Page Wood stated that Dr. J. COLLIS BROWNE was, undoubtedly the INVENTOR of CHLORODYNE; that the story of the Defendant, Freeman, was deliberately untrue, which, he regretted to say, had been sworn to.—See *Times*, 13th July, 1864.

Sold in Bottles, at 1s. 1½d., 2s. 9d., and 4s. 6d. None is genuine without the words "Dr. J. COLLIS BROWNE'S CHLORODYNE" on the Government stamp. Overwhelming Medical Testimony accompanies each bottle.

SOLE MANUFACTURER
J. T. DAVENPORT, 33, Great Russell Street, Bloomsbury,
LONDON.

ESTABLISHED 1864.

TIMEWELL,
SPECIAL TAILOR & MILITARY OUTFITTER
TO GENTLEMEN WHO REQUIRE NO CREDIT
8, SACKVILLE STREET,
PICCADILLY, LONDON, W.

A large private trade of highest class and character, yielding to its patrons the full advantages of their position.

E. LAZENBY and SON'S PICKLES, Sauces, and Condiments.—E. Lazenby & Son, sole proprietors of the celebrated receipts and manufacturers of the pickles, sauces, and condiments so long and favourably distinguished by their name, beg to remind the public that every article prepared by them is guaranteed as entirely unadulterated.—92, Wigmore Street, Cavendish Square (late 6, Edward's Street, Portman Square), and 18, Trinity Street, London, S.E.

HARVEY'S SAUCE.—CAUTION.—The admirers of this celebrated sauce are particularly requested to observe that each bottle prepared by E. LAZENBY and SON bears the label used so many years, signed, "Elizabeth Lazenby.

In consequence of Spurious Imitations of
LEA and PERRINS' SAUCE, which are calculated to deceive the Public, LEA and PERRINS have adopted A NEW LABEL, bearing their Signature—
LEA AND PERRINS,
which signature is placed on every bottle of
WORCESTERSHIRE SAUCE,
and without which none is genuine.

Sold Wholesale by the Proprietors, Worcester, Crosse and Blackwell, London; and Export Oilmen generally.

Retail, by dealers in Sauces throughout the World.

COCKS' READING SAUCE
Is the best and most economical Sauce ever manufactured for
FISH, ENRICHING SOUPS, GRAVIES, &c.
It only requires a trial to convince the purchaser of its excellence.

CAUTION.—The genuine is protected by Trade Mark, viz., CHARLES COCKS' Signature on a white ground across the Reading Arms.

LIEBIG COMPANY'S EXTRACT OF MEAT.
Finest Meat-Flavouring Stock for Soups, Made-Dishes, and Sauces. Caution.—Genuine ONLY with facsimile of Baron Liebig's signature across Label.

FALKNER'S "REAL MALT" WHISKEY.
The same as supplied to the principal Clubs and Regimental Messes. Has been esteemed in Ireland for the last century as the FINEST IRISH WHISKEY procurable, being pure as distilled, and refined by age only.
LONDON, 40, CHARING CROSS.
DUBLIN, 83, GRAFTON STREET.

KINAHAN'S LL WHISKY.

KINAHAN & Co. finding that, through the recommendation of the Medical Profession, the demand for their CELEBRATED OLD LL WHISKY for purely medicinal purposes is very great, submit with pleasure the following ANALYSIS by DR. HASSALL:—

"I have very carefully and fully analysed Samples of this well-known and popular Whisky. The samples were soft and mellow to the taste, aromatic and ethereal to the smell. The Whisky must be pronounced to be pure, well-matured, and of very excellent quality. The medical Profession may feel full confidence in the purity and quality of this Whisky." 20, GT. TITCHFIELD ST., LONDON, W.

SWISS CHAMPAGNE.—LOUIS MAULER'S SWISS CHAMPAGNE de Cortai lod, Neuchatel, so well known to travellers in Switzerland, may be obtained of Messrs. BELL and HUGHES, Wine Merchants, 38, Fenchurch Street, agents in England for the sale of this excellent champagne. Price, 42s. the dozen quarts; 46s. per twenty-four pints net. All other wines at equally moderate prices.

LANE'S PRIVATE HOTEL (Nos. 1, 2, and 3, ST. ALBAN'S PLACE, CHARLES STREET, St. James's, S.W.), for Officers in the Army and Navy, Members of Clubs, and others. Most eligibly situated in the immediate vicinity of the principal Club Houses. Gentlemen requiring sleeping accommodation only, are respectfully informed every attention will be paid to their comfort and convenience. A trustworthy porter in attendance all night.

CHLORODYNE.—FREEMAN'S is the original and only true.—Lord Chancellor Selborne, Lord Justice James, and Lord Justice Mellish decided in favour of R. Freeman and against J. C. Browne and J. T. Davenport; see "Times" of July 24, 1873. Thousands of medical practitioners testify that there is no substitute for it in the treatment and cure of asthma, bronchitis, coughs, and other chest affections, neuralgia, fevers, cholera, dysentery, spasms, and all nerve pains. Bottles 1s. 1½d., 2s. 9d., 4s. 6d., 11s., and 20s. Sold by patent medicine dealers in all parts of the world. See that "Freeman's Original Chlorodyne" is engraved on the Government stamp.

OLDRIDGE'S BALM OF COLUMBIA
(ESTABLISHED 50 YEARS)
The best and only certain remedy ever discovered for preserving, strengthening, beautifying, or restoring the
HAIR, WHISKERS, OR MOUSTACHES,
And preventing them turning grey.
Price 3s. 6d., 6s., and 11s.
C. & A. OLDRIDGE,
22, WELLINGTON STREET, STRAND,
LONDON, W.C.,
AND ALL CHEMISTS AND PERFUMERS.

For children it is invaluable, as it forms the basis of a magnificent head of hair, prevents baldness in mature age, and obviates the use of dyes and poisonous restoratives.

ST. LAWRENCE-ON-SEA, NEAR RAMSGATE.

THE "GRANVILLE" HOTEL.

THE "GRANVILLE" PRIVATE SPECIAL EXPRESS TRAINS to ST. LAWRENCE-ON-SEA, near Ramsgate, in two hours. Departures every Friday, from Charing Cross at 3.45, and Cannon Street at 3.50 p.m. (see bills.)

THE "GRANVILLE" HOTEL. The "Morning Post" says:—"Nowhere in England can a series of baths such as that at the 'Granville' be seen."

THE "GRANVILLE" HOTEL. The "Globe" says:—"As a residential hotel during winter, the 'Granville' is second to none."

THE "GRANVILLE" HOTEL. The "Saturday Review" says:—"The scenery, the air, the accommodation for visitors were described as of the most perfect kind; and we could not help wondering how it was that this place, which had been in existence in a quiet way for several years, had suddenly, like Byron, gone to bed and awoke famous."

THE "GRANVILLE" HOTEL. "Land and Water" says:—"The 'Granville' Hotel is likely to become a popular winter resort, not only for invalids, but also for those seeking a few days' relaxation from work."

THE "GRANVILLE" HOTEL. "Mayfair" says:—"The proprietor of the hotel, which has carried the name of St. Lawrence-on-Sea to the utmost ends of the earth, has energetically and judiciously lavished a fortune, first in making the 'Granville' Hotel one of the most charming seaside residences in the Kingdom, and next in bringing the fact under the notice of the public."

THE AGRA BANK (LIMITED)

Estblished in 1833.—Capital £1,000,000.
HEAD OFFICE.

ESTIMATES ON APPLICATION.

MAJOR CREASE'S PATENT SELF-REGULATING, CLEANABLE

CHARCOAL FILTER

Has been universally adopted in the Royal Navy, East Indian and English Transport Services; the German, Russian, American, and Austro-Hungarian Navies;
ALSO BY
HER MAJESTY'S WAR DEPARTMENT,
For BARRACKS, HOSPITALS, CAMPS, &c., &c.
And for which Patents have been granted by the Governments of Great Britain, the United States of America, Italy, France, and Canada to Major Crease, Sole Patentee of the Self-regulating, Cleanable Filter.

The designs are of three classes—
1.—For dwelling rooms and halls. To suit different styles of furniture three types have been employed—the Classic, the Japanese, and the Mediæval. None of these forms have been before employed for Filters.
2.—Those of simpler and cheaper designs for kitchen use.
3.—Filters of galvanized iron, either to fix to mains or cisterns, which, being capable of being made of any size, can supply pure water in sufficient quantities for the largest hospital or hotel.
The Filters, being made of special sizes, all their parts are interchangeable.

Full particulars can be obtained on application to
MESSRS. GARDNER AND SONS,
Sole Manufacturers of the Land Filters,
453 & 454, STRAND; and 3 & 4, DUNCANNON STREET, LONDON.

OVERLAND ROUTE and SUEZ CANAL.

IT may be gathered from the Army Estimates, just laid on the table of the House of Commons, that the organization of the Royal Regiment of Artillery has engaged the attention of the military authorities during the recess. Perhaps it may conduce to a clearer understanding of what is now proposed, to revert to the report rendered by Lord Airey to the Secretary of State for War in 1872 on this subject, and which was presented to both Houses of Parliament. In the enquiry upon which this report was based three Artillery officers—viz., Major-Generals Sir John Adye, Sir Edwin Johnson, and the late Colonel Middleton, then Deputy Adjutant-General of the Royal Artillery—were associated; and, as might have been expected, the evidence obtained revealed the existence of considerable differences of opinion amongst the officers of the regiment. Opinions ranged from preserving unchanged what has been known as the brigade system to its total abolition and the recognition of the battery as an administrative as well as tactical unit. Perhaps, under these circumstances, Lord Airey's recommendation was a safe one, to modify what existed rather than to embark in any radical changes respecting which there was no unanimity. The modifications suggested by him pointed in opposite directions, so that it almost followed that success in one direction must condemn the changes made in the other. The existing brigades, of which it was complained that they were so large as to be unsuited to the requirements either of Indian or of active service, were reduced in size and increased in number; and betraying a suspicion that they were even then unsuitable, Sir Richard Airey showed how they were to be "fitted into the districts." In the other direction, the regimental Colonels were to be appointed to command Artillery districts conterminous with the districts of the Army, and the brigades left to the command of the Lieutenant-Colonels. The work of the brigade officer was, at the same time, to be lightened by means of the Record Office. The Blue Book to which we are referring is an example of the value of these inquiries, even though they may lead to no immediately decisive results. The value of evidence founded on facts and diversified in expérience remains, affording safe ground upon which amendments may be based or from whence a fresh departure may be taken. And so we find that, beyond the Adjutant-General's recommendations, by degrees the strangling coils of the brigade system have been loosened and the battery commander enfranchised, until at the end of five years from the date of the report the brigade system, as hitherto understood, receives its death-blow. The fact is, after eighteen years it is recognized that the opinion recorded by the late Duke of Wellington in favour of "the system of detachments by companies" for the Royal Artillery was a sound one. Thanks to the requirements of our Indian and Colonial Empire, the system which has obtained for the last eighteen years, in opposition to that deliberate opinion, is now to pass away without disaster; and we cannot but think that his Royal Highness and his advisers have shown a timely boldness, in the face of the existing political atmosphere, to delay no longer the introduction of a system which requires no argument to prove it as suitable to the requirements of an European war, as of an Indian frontier expedition. The Royal Artillery will henceforth, it appears, be organized into three brigades of Horse, six brigades of Field, and five brigades of Garrison Artillery. The head-quarters of each brigade will be permanently located at a station selected for its suitability as a training-station for the particular branch it represents. Thus, we may expect to find the head-quarters of a garrison brigade at each of our principal maritime stations—such as Portsmouth, Plymouth, Dover, and Cork—whilst the Horse and Field will naturally find a home inland at such places as Woolwich, Aldershot, Manchester, and the Curragh. The special function of the brigade will be to constitute a group of batteries for recruiting and discharging men, for which purposes one depôt battery will be maintained at every head-quarters, the existing depôt brigade being abolished. The number of batteries in each brigade are so arranged that, generally, one half of them will be abroad and the other half at home, thus admitting of the latter acting as feeders to the former, and so extending to the Artillery the same advantages as the brigades render to the Infantry. Moreover, the batteries may be moved singly, or in such numbers as circumstances may render necessary. Whilst each battery will be able to move with perfect freedom, the discipline of all the Artillery in each military district will be under one Colonel on the Staff, without respect to brigade or description. The Colonel commanding each district will likewise be the Colonel of a brigade, so that the system proposed involves economy rather than additional expense. We apprehend that advantages will be obtained by the system about to be introduced beyond the facility of moving batteries. It should assist recruiting and lead to a more intimate connection with the Auxiliary Artillery. The gain to the Garrison Artillery of having as their home the works they would be required to defend in case of invasion is immense from a professional point of view alone. Similarly, we shall expect to find in every Army district the capabilities of every Artillery position recorded. Great praise is certainly due to his Royal Highness and his Staff for the fair hopes we may now indulge that the burning question of the last fifteen years of Artillery organization has at last been satisfactorily settled. There is, however, one provision we fail to discern, and that is for the employment of officers of adequate rank in the larger commands. Surely the command of the brigades localized at Portsmouth and Aldershot with the important Artillery districts should be exercised by Brigadier-Generals. It has been laid down by regulation that a Lieutenant-General commands a division, having a Brigadier-General to command the Artillery. In the two districts named, Lieutenant-Generals command, and the Artillery should therefore be adequately represented, the rank of the commanding officer of Artillery being at present the one exception to the regulations. The reason for this must be more curious than satisfactory.

We find in a French Liberal contemporary some remarks concerning promotion. The writer observes that whereas the strength of the German Army and that of France is about the same, there are many more General officers in the latter; and, at the same time, promotion is less rapid. This comes from the irregular method pursued in France, where Generals of Division and Lieutenants of forty years of age are to be found. Some officers are unduly favoured; others of equal merit remain stationary. In France some officers reach the highest grades prematurely, and serve as Generals of Division for, perhaps, twenty-five years. In Germany the flow is more regular, and officers seldom command a division more than six years, after which they pass into a superior category, supposing they are apt for further service, and possess great military qualities. In case of war commanders are drawn from this veteran nursery. It is considered high time to change all this, and no longer to permit an officer to stop the way for a quarter of a century. The journal to which we allude adds—"A study of the German 'Army List' shows us that the nation which conquered us ever since its unhoped-for triumphs has had but one preoccupation—that of reforming its 'working material,' rendering it more youthful, and introducing that mobility and elasticity which can alone give it new force, and make it equal to every occasion. It is thus that all the German Generals of Division have been appointed to the rank they now hold posterior to 1870, whilst we have fifty Generals of Division promoted previous to that year, and some who dated as far back as 1857. None of the German Brigadiers held that rank before the late war, whilst half of ours date from an earlier period." The writer points out the very obvious defects of this system, which discourages many officers of real merit, and gives rise to a host of abuses and other inconveniences. That there is something radically wrong in the French system was clearly shown by what happened during the last war. The Germans had 212 Generals, which number proved sufficient for the command of their armies, divisions, and brigades. The French, on the other hand, had 489 Generals on the Active List, and yet they were obliged to fall back on Admirals, Colonels, Post-Captains, and even Majors. Most of the Generals, when called on to serve, were found *hors de combat*. In 1870 the German Staff consisted of one Field-Marshal, one "Feld Zeugmeister," 46 Generals of Cavalry or Infantry, 55 Lieutenant-Generals, 108 Major-Generals; total, 212. The French Staff consisted of 7 Marshals, 5 life Generals, 81 Generals of Division on the Reserve (but disposable in time of war), 157 Generals of Brigade *idem*, 79 Generals of Division on active service, 160 Generals of Brigade *idem*; total, 489.

The two crowded meetings recently held at the United Service Institution, to discuss the paper written by Mr. W. S. Lindsay on "Belligerent Rights: the Declaration of Paris, 1856," testify to the interest felt in this all-important subject by not only naval and military officers, but by the country at large. We do not propose to attempt to deal even superficially with such a large question as our maritime rights, which deserves more attention from our statesmen than it has hitherto received, but we may briefly point to a few of the points which were brought into strong relief by the discussions we have referred to. The most remarkable of these points is, that neither the author of the paper nor any of the numerous speakers—the great majority of whom differed so widely from his conclusions—believed that it would be good policy for this country to remain in the position in which the Treaty of Paris has left our maritime rights. Mr. Lindsay held it as certain that our mercantile flag would disappear from the ocean almost immediately on war being declared with any foe, however insignificant, and he pointed out that the merchant fleet of this country was now composed of vessels of an aggregate tonnage amounting to more than 9,000,000. Something must be done, he urged, and he hoped that our Government would, in agreement with other nations, allow free goods to make free bottoms, and, in short, declare the neutrality of the seas except for contraband of war. The majority of the speakers differed entirely from the lecturer, declaring his proposal to amount to a commercial peace while a military war was being waged, which they denounced as not only absurd, but even wicked. Sir Edmund Commerell said flatly that we could not, under such circumstances, trust our merchants not to be sending munitions of war to our enemy, and it certainly would be difficult to prevent them. Mr. Ayrton defended the proposition at great length, pointing out—truly enough—that civilized nations have by mutual consent limited the natural destructiveness of war. This we may admit without, however, allowing his conclusions. Take, for instance, the proposition that an enemy had landed an army successfully at Dover, and that they were awaiting for reinforcements to march on London, it would, according to Mr. Ayrton, be a legitimate and not unpatriotic act for a London contractor to agree to supply them with provisions, although he would charitably except munitions of war. The fact is, however, as demonstrated by this *reductio ad absurdum* argument, that in many cases there is extreme difficulty in drawing a distinction between what the French term *munitions de bouche* and *munitions de guerre*. Perhaps it would be more exactly on all fours with Mr. Ayrton's argument to suppose the case of the enemy's merchant ships supplying the invading army at Dover with provisions, which, if the proposals of Mr. Lindsay were adopted, we should clearly have no right to interefere with. We will not follow the argument further. It is enough that we are at present in an illogical position, and that it is generally agreed that our whole Mercantile Marine would, in case of war, be at the mercy of our foes. We must accordingly either advance on the lines of the Declaration of Paris, or withdraw from it; and we repudiate with Captain Wilson Mr. Ayrton's assumption that naval officers are, consciously, at least biassed by their pecuniary interests in attempting to draw public attention to the important bearing of the Declaration of Paris on the maritime power of this country.

The former Commissariat officers have, since the abolition of the Control Department, been working together in their own interests, and may, we trust, succeed in getting their position looked into. But if Mr. Hardy does not of his own accord take up the case of the old Military Train officers, it is to be feared that they will be left out in the cold, for they have no friends at the War Office. The following extract from a speech made by Mr. Hardy in the House on the subject of officers' grievances generally would now appear to apply to these officers in particular:—"Those who engaged upon the old terms, and who do not like the new terms, will not be compelled to accept them, because I think that keeping faith is better than anything else." It will be remembered that this branch of the Service was merged into the Administrative Department when the Control Department was formed for the good of the Army generally. With the old Military Train officers it was a case of accepting service under the new order of things or retiring on half pay. As they held combatant saleable commissions and the right of exchanging, they were certainly unfairly mated with the Commissariat officers, who, for giving up these advantages, had already obtained the relative rank of Captain. They were, therefore, at a disadvantage from the beginning, and must always remain so unless the authorities make a separate list for them. This the War Office seems not disinclined to do, but it seems to be thought that they have no right to aspire to any position but that of Colonel Shervinton, when he leaves, probably some eight or ten years hence. This, of course, is manifestly unfair. A proper establishment of upper ranks should be provided—say, one Colonel, two Lieutenant-Colonels, and two Majors. Such and a separate list would be fair, and give general satisfaction. If this is impracticable, were the three present Commissaries, who are affected, promoted when they come to the top of the General List and Deputy-Commissaries of the old Military Train advanced in their stead until a fair proportion of field officers is obtained, these officers would have something to look forward to. As things stand at present, none of them know what course will be followed; and, as they are all of long service, they are naturally disappointed. Some excellent officers have service of more than twenty-two years, have been seven years in their present positions, and do not see the smallest prospect of a step in the years they must still serve. They are not permitted to leave on retired pay, although they did not elect to leave the combatant Service to join the present Commissariat Department, but to enter a much larger and more important Service, the late Control Department. It is doubtful whether an officer can legally be gazetted to a new commission, except on promotion, without having any option in the matter. This none of them had when the Control Department was abolished. Had they wished to join the Commissariat Department, some of them could have done so in the Crimea, and would now have been Assistant Commissary-Generals high up the list; but they joined the Transport Train, and it was from no fault of theirs that their branch of the Service was merged into one in which they could not be fairly placed, as regarded position, by any other method than by taking the date of first commission for departmental standing. Had that course been followed throughout the whole Department, when it was formed in 1870, it is possible that the Control Department might have succeeded. As matters stand at present, there seems to be only one way of ensuring contentment and consequent efficiency, by giving each officer the option of going on the Retired List of the late Control Department, or of serving in the present Commissariat and Transport Department on somewhat similar terms to those suggested above. If it is desired to make the Transport Corps more suited for expansion into a body sufficient for the requirements of an army corps of 37,000 men, two of the present companies should be merged into one, and a Major placed in command of each, with one Captain and four subalterns to help him. We should then have five units of transport, each capable of expanding to 1,000 animals, and one to form a depôt at home. The reduction of the present corps from twelve to six units would create a saving of about £6,000 a-year; the double company would make a body about the size of a troop of Engineer Train, which is not found to be too large for a company staff to manage. It may be remembered that the first organization of the Military Train was six battalions, and it was the best we have ever had for expansion. As things are at present there are only three field officers who have the practice necessary to fit them for managing the large bodies of undisciplined men that would of necessity be drafted into the Transport on the first call to arms. It is absolutely necessary, both out of justice to the officers affected and for the sake of the efficiency of the Army, that the present state of affairs should be quickly remedied.

An endeavour has lately been made to rouse public interest in a subject of the highest importance, whether it be looked at from a military or from a benevolent point of view. In the current number of *Blackwood's Magazine* there is an article on "Philanthropy in War," and in the latest number of the *Journal* of the Royal United Service Institution there were two papers, one on the same, the other on a kindred theme. In this country there exists the most extraordinary amount of ignorance as to the true scope of the Geneva Convention. It cannot be too clearly recognised that the Convention does not give privileges to any International Society. It only neutralizes the ambulances, *matériel* and *personnel*, belonging for the time being to the military establishments of the belligerents. Neutrals do not obtain any right whatever to enter the lines of an army in the field or a garrison in time of war by joining Red Cross Societies. The military commanders may grant permission, but they are in no way bound to accord it. The aid given by neutrals during the Franco-Prussian war was under very special circumstances, and the experience of those employed as agents of the Red Cross Societies has led to the conviction that the privileges conceded to the wearers of brassards were occasionally much abused. Indeed, there is an evident tendency to exclude neutral assistance. As a matter of fact, there can be no such thing as thoroughly impartial aid to the sick and wounded. A society may devote to each belligerent precisely the same amount of stores and *personnel*; nevertheless, the value of such aid may be infinitely greater to one side than to the other. The resources of the administration of an army are as much assisted by aiding the sick and wounded as if by a present of a train for the transport of provisions or ammunition. Philanthropy is all very well in its way, but it must be borne in mind that misery inflicted both on soldiers and the civil population is one of the most powerful instruments in the hands of a commander, one of the chief means for bringing war to a speedy termination. Red Cross Societies have still great scope for diminishing the horrors of war if they adhere to their legitimate functions as purely national societies. There can be no doubt that it is as legitimate to send volunteer Surgeons, into the field as to make use of volunteer combatants, but in order to bring either within the rules of warfare they must for the time be subjected to military discipline, and constitute an integral portion of the Army. The British National Aid Society has not been recognised by the Government, is practically without organization, and has made no preparations for war. That the existing official resources of this country are insufficient in case of war is well known. The Army Hospital Corps cannot supply even a single army corps. According to the mobilization scheme, the strength of the Medical Department attached to each of the eight army corps is 267 medical officers, 130 other officers, 2,195 Army Hospital Corps, 568 drivers, 268 ambulance waggons, 150 general service waggons, and 418 draught horses. Of the 2,195 Army Hospital Corps, 1,000 are to be for the sanitary detachments—*i.e.*, to act as bearers. Now the present strength of the Army Hospital Corps is about 1,500, some of whom are employed in the colonies. As to medical officers, Dr. Sandford Moore estimates that we should, on mobilization, require at least 1,000 beyond the present establishment. Some retired Army medical officers and volunteers from civil practitioners would no doubt be forthcoming, but we require an immediate reliable and certain, not a merely probable, reserve, which it might take some time to raise, organise, and distribute. It has, therefore, been suggested that the National Aid Society should take the matter in hand. There would be no lack of civil practitioners willing to join any organization instituted by the National Aid Society. It has been suggested that the bandsmen, who have always been employed in carrying wounded in action, could be utilized. Unfortunately the Infantry regiments of each corps would only furnish 630 bandsmen, a number evidently insufficient. Here the volunteer forces could render assistance. Comparatively little training would be required. As to the material in the way of ambulance waggons, it is the duty of the War Office to see that a sufficient number are always kept in store. We fear, however, that this has been sadly overlooked. War now comes like a thief in the night, and when it does come the time for preparation has passed away. Is nothing to be done?

Colonel Brackenbury, in his thoughtful lecture at the United Service Institution, which we quoted last week, stated that the proper persons to teach the young officers of the Army the minor tactics are, undoubtedly, the company leaders; and in this opinion we entirely agree. Unfortunately, however, the great majority of company leaders have not hitherto had the opportunity of acquiring the knowledge which it is desirable that they should impart, and it is to supply this deficiency that Captain Wilkinson Shaw, Garrison Instructor at Aldershot, has devised a system of practically teaching elementary tactics by means of modelled ground traversed by metal blocks representing bodies of troops, which he illustrated in his lecture at the United Service Institution on the 23rd ultimo. Sir Thomas Steele is understood to have expressed great satisfaction with Captain Shaw's system, and has approved of a voluntary class of officers being formed at the camp to master its details. It is gratifying to learn that a very considerable number of regimental officers have expressed a wish to go through this course of study, and thus enable themselves to impart a general knowledge of those principles of strategical movements of which no soldier should be ignorant. The camp at Aldershot cannot better justify its *raison d'être*, or more completely fulfil its legitimate purpose, than by becoming a training-school in the various essential branches of military science and practical work, and we are pleased to learn that the Lieutenant-General commanding has lent his approval and encouragement to Captain Shaw's ingenious and simple system of instruction. We understand that the sections of the model which were exhibited at the lecture last week are deposited at the United Service Institution, where anyone interested in the subject will be permitted to inspect them on presentation of his card.

The deaths of the following officers on the Active List have been officially reported to the Admiralty since January 20, 1877:—Admiral of the Fleet Sir Fairfax Moresby, G.C.B.; Captains Radulphus B. Oldfield, C.B., and Hugh Campbell; Lieutenant James B. Fellowes; Staff Surgeon Benjamin H. McCurdy; Surgeons George J. Gray, Matthew Reed, M.B., and Lewis Edwardes, M.B.; Assistant-Paymaster John H. Brimacombe; Engineer Richard G. Foster; and Captain Edward F. Thomson, Royal Marines. During the same period the names of the following officers have been removed from the List of the Royal Navy:—Sub-Lieutenant Robert H.

Walpole; Navigating Sub-Lieutenants Eland H. H Mossom and Edward B. Turner; Assistant-Paymaster George Spain; Naval Cadet Armine W. Pearse; Boatswain Edward Bartholomew; Carpenters Thomas Edwards and William Nodder. The resignation of Mr. Richard G. Callaway, Engineer, has been cancelled.

Although Captain Pim's efforts to play the part of Admiralty reformer met with the cold shoulder in the House, the gallant member being unable to obtain more than a score of members willing to sit and listen to him, it is possible that Mr. Seely will meet with greater success. On Tuesday he will endeavour to induce the Government to take into consideration the propriety of administering the Admiralty Department by means of a Secretary of State, of appointing to the offices of Controller of the Navy and Superintendents of her Majesty's dockyards persons who possess practical knowledge of the duties they have to discharge, and of altering the rule which limits their tenure of office to a fixed term.

Reference to the Commanders' List will show that there are a fair number unemployed, and, in the majority of cases, anxious to serve. Yet the Admiralty seem to experience some difficulty in selecting a Commander for the Britannia, which became vacant by the promotion of Captain A. T. Dale in December last. Can their Lordships have forgotten to fill the appointment, or is it being kept open for some fortunate officer now absent from home?

It has been remarked that although the complement of the Rover is larger than that of the Volage, the latter vessel only is allowed to carry a Commander. The fact is that the complement of the Volage was especially altered on the promotion of her senior Lieutenant, by which means he has been privileged to remain in the ship instead of coming home to go on half pay.

A month ago we announced the equipment of an Egyptian squadron, under the command of Admiral McKillop Pacha, on an anti-slavery expedition in the Red Sea. Since then, however, we regret to have been informed that the intended leader of the expedition has been suffering from ill-health, and that the number of ships detached for this cruise has been materially reduced. Captain Morice Bey, R.N., will now take the command.

Mr. W. H. Smith, M.P., has received a deputation from the Council of the Royal United Service Institution with a request that when the appropriation of the Crown lands in the neighbourhood of the Institution takes place its claim for a permanent site may not be forgotten. Mr. Smith assured the deputation that the claims of the Institution were fully recognized by the Government, and would be duly considered. The library now contains 17,700 volumes, and the total number of members is 4,320.

The wisdom of the selection of Dartmouth as the place for the establishment of the Naval Cadet College has not been allowed to pass unquestioned. Mr. Reed, as member for the Pembroke Burghs, has had a word to say for Milford, and Mr. Baillie Cochrane, as representing the Isle of Wight, has given notice that he will call attention to the matter and move a resolution.

The officers and men of the little Sheldrake may be proud of the position she held at the recent award of testimonials by the Royal Humane Society, for no fewer than three fell to the lot of this small craft. The recipients were Sub-Lieutenant Lingham, now in the Audacious, and an A.B. named D. J. Shay, for an act of gallantry in saving life in September last; and Mr. Melrose, Engineer, for a similar act the following month.

The Naval Service is to be congratulated on the happy escape of Admiral Willes from being drowned while in the execution of his duty. An account of the accident will be found under the name of his flagship. *Punch*, some time since, attempted to make fun of our Admiral-Superintendents, and represented then toddling about in second childhood with an ear trumpet as a companion. Plainly, "Admiral Punch," as he is sometimes pleased to style himself, never met Admiral Willes.

News has been received of the serious illness of Captain Poland, of the Juno. He has left his ship at Singapore and taken passage by mail to Hong Kong, for hospital treatment.

Whichever way the British Fleet in the Mediterranean may be sent, it is wrong in somebody's eyes. Considerable fuss was made about the muster in Besika Bay, and now that orders have been given for the ships to visit Malta, this "concentration" is said to be a violation of the Treaty of Paris!

The Warrant Officers of the Royal Navy, feeling deeply aggrieved that they should be the only class of executive officers in the Service in whose pay a distinction is made between "sea-going" and "other ships," and feeling also the inequitableness of such distinction—a distinction which they believe not to be clearly understood by those who influence and conduct the naval administration of the country—have drawn up a statement, which we have printed elsewhere, as we are assured that it represents the feeling of the officers of this class. The aim these officers have in view is the removal of the objectionable "other ships" clause of the Order in Council of August 12, 1875, and thus place the whole class upon the one scale of pay, the same as all other officers. We trust their case may meet with the favourable consideration of the Admiralty.

Captain Hon. Victor Montagu, who has just been gazetted to Post rank, stood on the Commanders' List immediately below Captain King, upon whose good fortune in being selected for promotion we remarked last week. Captain Montagu entered the Navy in 1853, became Lieutenant in 1860, and Commander in 1867. He has thirteen years' sea time as a commissioned officer, but since obtaining the rank of Lieutenant nearly one-third of his time has been—we believe we may say unwillingly—passed upon half pay. He wears five medals and two clasps, and is decorated with the Medjidie of the Fifth Class.

On Monday a special general meeting of Fellows of the Royal Geographical Society will be held to consider the appointment of a committee to investigate the circumstances relating to the issue of visitors' tickets on the occasion of Sir George Nares' and other Arctic officers' appearance at the meeting of December 12, when many Fellows were turned away owing to the crowded state of the hall.

As inconvenience and confusion might arise at some critical moment owing to the system of signalling in the Army being different to that of the Navy, it is intended to prepare a code for the use of both Services.

There is, we believe, some probability of the movements of troops ordered to be carried out by the Himalaya being modified. It had been arranged that she should return from Hong Kong with Artillery, making the passage by way of the Suez Canal. But a wish has been expressed that the 32nd Regiment should be brought home as early as possible, and it is therefore likely that the Himalaya will move a portion of the 80th to East London to relieve the 32nd, with which she will then return to England. Under these circumstances provision will have to be made to bring the Artillery home from China by private vessel.

An exception to the rule forbidding the family of an officer from taking passage in the ship under his command is, we hear, to be made in the case of Admiral Sir James Drummond, who will have the privilege of returning to England to resign his last command afloat accompanied by his family.

The December examination of cadets on board the Britannia has failed to give satisfaction to the examining officers, and to judge by the result they must have made a strong report on the matter to the Admiralty. At least, we are informed that a communication has been received on board the ship by which nearly twenty cadets have been warned to mend their ways or to anticipate a speedy ending to their life afloat, and more than that number have lost a little of that seniority of which they rejoiced by being put back a term. Some of these fondly hoped that they were about to pass out of the school-ship and become full-blown "young gentlemen" in a gun-room mess. But they have got into quite another kind of mess, and unless they quickly mend their ways they will find themselves unappreciated by the Service, or even at home, when they return "rejected."

Whatever their Lordships may feel inclined to do in order that the position of Assistant-Paymasters may be a little more bearable than at present, it is to be hoped their seniority may meet with recognition with regard to rank, even if there is but a small advance in the matter of pay. It is a lamentable thing to see an exemplary officer wearing the badge of the junior commissioned rank long after his years and service have entitled him to a better uniform. To outsiders there is but one explanation for the solitary stripe on the sleeve and the absence of epaulettes, worn by so many who are much younger. It is only too natural for them to believe that he must have been deprived of seniority through misconduct. An officer's uniform costs not a penny to the public, and we hope that all Assistant-Paymasters of ward-room rank may be given the dress of a ward-room officer.

There has, we believe, been some slight hitch as to the relations existing between the military authorities and the Royal Marines at one of the ports, and the Deputy Adjutant-General, Royal Marines, has been directed to prepare regulations setting forth clearly the arrangements to be observed as to attendance of Marine officers at general courts-martial, application for leave of absence, &c., in accordance with the views of the War Office and Admiralty, which have lately been corresponding on this matter.

Vice-Admiral Inglefield has been engaged for some time past in preparing an elaborate table showing the comparative value of armour-plated ships of war of all nations, from which a reliable estimate of the relative strength of our own and foreign navies will be obtained. The Admiralty have so far recognised the possible value of such a statement, that every information has been afforded to Admiral Inglefield, and he has also been given some clerical assistance. The table will, we imagine, be placed at the disposal of the Admiralty and be treated as a confidential paper.

There is some probability that the troops which were intended to leave England for the Cape of Good Hope early in April will not sail until May, the latter date being more convenient as regards the dispatch of a troopship.

The Admiralty has just received a handsome offer from a private individual of a painting the of St. George, which was lost in 1811. Their Lordships have accepted it with many thanks.

The Horse Guards has requested the Admiralty to convey to the officers and men of the Active and Spartan the satisfaction felt at the report received from the officer in command of the Buffs, recently wrecked in the transport St. Lawrence, of the ready assistance afforded by them to the troops on this trying occasion.

The present strength of the Mediterranean Squadron will not be maintained any longer than is deemed actually necessary, and the second in command, Rear-Admiral Rice, who is now afloat, will return to duty as Admiral Superintendent at Malta, and Rear-Admiral Luard will return to England. At this time there are twenty sea-going vessels on the station, having more than five thousand souls on board.

Captain Frank T. Thomson has, we understand, been offered the command of the Royal yacht Victoria and Albert, in which he formerly served as Commander. At present he is Flag Captain to Vice-Admiral Key, on the North America and West Indies Station.

Colonel A. B. Johnson, Bengal Staff Corps, is now fully installed at the India Office, where he has relieved Major-General Sir Thomas Pears, K.C.B., as Military Secretary. Colonel Johnson is a member of a family which has many representatives in the Army, and a brother of Sir Edwin Johnson, who has just sailed for India to join Lord Lytton's Staff. It is an encouraging fact for the Indian Army that this relationship should exist between the Military Member of Council at Calcutta and the Military Secretary in London. There never was a time, perhaps, when the higher Staff appointments in connection with our Eastern Army were filled by abler men. There is one thing greatly in favour of the present Staff—they are, all of them, in the prime of life.

Surgeon-Major V. S. Gouldsbury, M.D., C.M.G., has been selected to administer the Government of the Gambia. Dr. Gouldsbury entered the African Medical Department in September, 1863, and his services during the Ashantee campaign were such as to cause his name to be mentioned on the Coast in connection with employment under the Colonial Office. He was made a C.M.G. in recognition of the diplomatic ability he displayed when sent as Special Commissioner to Dahomey about two years ago. Dr. Gouldsbury, who is now in England, will proceed out very shortly to enter upon his duties, his appointment having been made for three years.

When A Brigade, Royal Horse Artillery, left India for England, Colonel J. E. Michell, C.B., elected to remain in that country, and applied for permission to exchange with Colonel W. B. Saunders, C.B., of B, the relieving brigade. The Horse Guards complied with the officer's wish, and the exchange was approved. We now learn that Colonel Michell has been recommended for an early vacancy on the establishment of Brigadier-Generals, though he only became a Lieutenant-Colonel at the end of 1870; so that he will, no doubt, become a Brigadier-General within seven years of his promotion as substantive Lieutenant-Colonel. But, then, he had the good fortune to obtain his Brevet Colonelcy three years and a-half before he passed from the list of First Captains.

Very considerable jubilation appears to exist at the unusually plethoric condition of the ranks of our Army. Much ingenuity has been displayed to trace this singular condition to the effect of recent legislation. We are inclined to think that the crucial test of this will be to patiently await the discovery of its retentive power. We have caught our hare. But even here has there not been great assistance rendered by the depressed condition of that very delicate machine the labour market?

There is only too much reason to fear that the pastime of "drawing" is at present very prominent in the Army. We should imagine that its having obtained publicity would be sufficient for its immediate suppression, not by the authorities, but by the officers themselves. This, however, does not appear to have been the case.

Since the proposed helmet has received general approval as a suitable and soldierlike head-covering, it is difficult to understand why no steps are being taken for its issue with the new clothing. In the Territorial Army which we are promised the rather overpowering number of bearskins would be pleasantly relieved by the pickelhaube. Most certainly the present shako cannot be retained. Not only is it uncomfortable, but is as unsightly as a headpiece well could be. Not only are Infantry regiments to take the helmet into war, but it has been arranged that the Royal Horse Artillery, Royal Artillery, Army Service Corps, and Army Hospital Corps shall have it too; so that the shako is to become with us a thing of the past. The Fusiliers, we are pleased to say, are to retain their present busby, and the Rifles theirs.

Under the new system at the Royal Military College the duties of Adjutant are to be fulfilled by Quartermaster Davis, whose pay is raised from £339 to £368 per annum--15s. 2d. per diem being drawn as Quartermaster, with 5s. a-day for the performance of extra duties.

It has been decided to increase the head-quarter Staff in Ireland by two Assistant-Adjutant and Quartermaster-Generals, one of whom will be obtained by reducing the Dublin District Staff by one of its present officers. To compensate, a Deputy Assistant-Adjutant and Quartermaster-General is to be withdrawn from the head-quarter establishment and told off for duty in the Dublin District.

The post of Assistant to the Governor of the Royal Military College is to be abolished, a Commandant and Secretary being substituted. The pay of the present Assistant is £500 per annum; the new Commandant will draw £750.

It has been decided to build officers' quarters and a new riding-school in connection with the Knightsbridge Barracks. This was not at first considered necessary; £50,000 extra expense will thus be incurred.

The Principal Veterinary-Surgeon will in future draw £750 per annum, which sum will include allowances.

A Camp Quartermaster is recommended to be appointed at the Curragh Camp.

A reduction of one subaltern is to be made in all regiments of Cavalry and Infantry of the Line for the home establishment from April 1.

The pay of the Inspector of Submarine Mining (Lieutenant-Colonel W. Crossman, R.E.) has been fixed at £500 per annum, in addition, of course, to his pay as Lieutenant-Colonel of Royal Engineers, and that of Captain S. Anderson, the Assistant-Inspector, at £200 per annum. These sums include allowances.

Two additional Instructors, *one for Tactics and a* second in Fortification, are required for the Royal *Military College, but they will only be employed* during a part of the year, and will not be added to *the permanent establishment.*

The friends in England of Lieutenant-General Sir Neville Chamberlain, G.C.B., G.C.S.I., will be glad to learn that further telegraphic advices from Madras state the General to be recovered from the cholera by which he was a few days since attacked.

The Army medical officers are much discontented with the manner in which they are being constantly transferred from one duty to another. This system is not only extremely harassing to them, but must also be detrimental to the interests of the Service. In one regiment alone on home service there have been during the last eight months no fewer than six medical officers. No wonder commanding officers are opposed to the present regulations.

We are pleased to be able to state that the suggestion we offered some months ago as to the Adjutancies of the two Engineer Militia regiments is to be acted upon, and that instead of drawing these Adjutants from the Line (as in the case of Volunteer Engineers) Captains of the Corps of Royal Engineers will be told off to the Anglesey and Monmouth regiments for the ordinary period of five years. The Adjutancy of the Royal Anglesey is to be filled by Captain A. J. Hepper, R.E., that of the Royal Monmouth having been accepted by Captain Sir Arthur Mackworth, Bart.

Major-General J. M. Primrose, C.S.I., embarks at Brindisi on Thursday next for India, *en route* to relieve Lieutenant-General Lord Mark Kerr, C.B.

Captain B. M. Dawes, 100th Regiment, succeeds Captain C. H. Boileau as Deputy Assistant-Adjutant and Quartermaster-General at Malta. Captain Dawes passed through the Staff College in December, 1875. He entered the Army July 24, 1861, and became Captain July 3, 1872.

The Garrison Instructorship at Dublin is falling vacant, Captain Duncan being about to obtain promotion in his regiment, the 102nd Fusiliers, which he will be required to rejoin.

To what is to be attributed the delay of nearly five years which has elapsed in the settlement of the pay of Majors in the Ordnance corps which arose on July 5, 1872? The pretext for the non-settlement of this claim is understood to be based on the circumstance that certain contract allowances were granted to some of the Majors to keep gun-carriages in repair and to renew stable gear and the like, and the Indian Government wish to have this contract money paid back, less actual disbursement, before they give the pay justly due under her Majesty's Warrant confirming the rank. The contract service having been performed, the Indian Government now demur to the rates paid for it. It does not appear that the Indian Government has the shadow of a right, either legally or equitably, to have refused any money paid in respect of a contract duly executed. But, even if it had, that circumstance is no reason for withholding the pay due to officers who never had any contract engagements with the Government. Many officers avoided these contracts, as the method of payment for services was not in accordance with her Majesty's regulations, being altogether an extra-military and commercial transaction. The contracts were especially for the care and repair of material, and although very much to the profit of the Government, and of some pecuniary benefit to the officer contracting, it would be most improper to imply that any part of that contract money was the pay of the rank or personal allowance for strictly military service. In connection with this question, which we trust Parliament will consider at an early date, is the marked hostility of the Indian officer to the Royal (late Indian) Artillery, of which can be produced ample evidence.

As the dates of assembly of many Militia regiments are still subject to alteration, we have been requested to caution officers against relying too implicitly on the lists which usually appear at this season, and which are calculated to mislead.

The half-yearly changes of quarters of the Brigade of Foot Guards took place on Thursday, as follows, viz.:—1st Battalion Grenadier Guards, from Chelsea to Windsor; 2nd Battalion Grenadier Guards, from Wellington Barracks to Shorncliffe; 3rd Battalion Grenadier Guards, from Chelsea to the Tower; 1st Battalion Coldstream Guards, from Wellington Barracks to Chelsea; 2nd Battalion Coldstream Guards, from Windsor to Wellington Barracks; 1st Battalion Scots Fusilier Guards, from Shorncliffe to Chelsea; and 2nd Battalion Scots Fusilier Guards, from the Tower to Wellington Barracks.

The Coast Brigade of Royal Artillery are in great hopes that they may induce the War Office to bestow some consideration on their undoubtedly hard case. They are, however, few in number, destitute of influential friends, and, for some reason or another, do not obtain the powerful support of the Royal Artillery. It is, therefore, specially incumbent on the Press to say a few words on behalf of these meritorious and gallant men. Their grievances are obvious and their desires modest. All they ask is, that they shall be treated, as regards retirement, in the same way as officers of the Line who have been promoted from the ranks. At present there are no fixed terms of retirement for the Coast Brigade. All depends on the Secretary of War for the time being. Under such circumstances they not unnaturally hang on in the hope that a Warrant dealing with their case may at length be issued. Hence there is an absolute stagnation of promotion, though many of the seniors would gladly retire, if they could do so on reasonable terms. The date of the first commission of the senior Captain is May, 1855, of the four junior Captains and three senior Lieutenants April, 1860. The senior Lieutenant has held his present rank for nearly seventeen years. Now, few of the senior officers of the Coast Brigade obtained commissions much under forty; some, indeed, were older when gazetted. Consequently the average age of the Captains must be sixty, or close upon it.

So far from it having been found possible to raise a second battalion of Aberdeenshire Militia, the one existing battalion is about 500 under its establishment. The fact is, Aberdeenshire is no longer a good recruiting district. Indeed, Scotchmen now move about so much that it would be wise either to make a redistribution of the Sub-Districts in Scotland, or to lump them in one large district. As to Aberdeen, it is not to be wondered at that, though its population numbers 100,000, few recruits either for the Scots Fusilier Guards, the 56th Brigade, or the Aberdeenshire Militia, are to be obtained. There is considerable difficulty in obtaining lodgings for the poorer classes. Ordinary workmen can obtain on the quays 8½d. per hour. Moreover, statistics show that the proportion in Aberdeenshire of unmarried men between the ages of eighteen and twenty-five is smaller than in any other part of Scotland. When a man is out of work he does not stay in Aberdeen, but is off to Glasgow or Edinburgh, where, indeed, most of the recruits in Scotland are picked up.

The *Avenir Militaire* complains of the relative smallness of the retiring pay accorded to French officers as compared with what they draw on active service. Thus, a General of Division on active service draws 19,836fr., his minimum retiring pension 5,200fr., or £208 a-year. For a General of Brigade, 13,224fr. active pay, 3,900fr., retiring pension; for a Colonel, 9,073fr. and 3,120fr.; for a Lieutenant-Colonel, 7,457fr. and 2,340fr.; Major, 6,281fr. and 1,950fr.; Captain, 1st Class, 3,783fr. and 1,560fr.; Captain, 2nd Class, 3,379fr. and 1,560fr.; Lieutenant, 1st Class, 2,681fr. and 1,120fr.; Lieutenant, 2nd Class, 2,608fr. and 1,120fr.; Sub-Lieutenant, 2,608fr. and 840fr. This is the highest pay and the minimum pension; a Sub-Lieutenant may have to retire on £33 10s. a-year. As our French military contemporary makes out, these pensions are very small, and we are reminded that when the French Consul at Salonica was murdered his widow received a pension of 3,333fr., though her husband had only been in the Service for fifteen years. The editor considers that it would be going rather too far to assimilate the grade of the Consul to that of a Colonel, and yet the widow of a Colonel, killed in battle at the head of his regiment after thirty years' service and any number of campaigns, is only entitled to a pension of 1,950fr., or less than £80 a-year. The *Avenir Militaire* admits that, with War Estimates which exceed £22,000,000 it would be impossible for the Government to ameliorate the position of the Army in the way of pensions and retiring pay, but it suggests that five per cent. levied on the active pay of officers would produce £162,000 a-year, and that this sum, added to what is already accorded by the State, would set matters on a more respectable footing.

The Committee engaged in revising the pay instructions for the Royal Marines will soon complete their labours. It would appear that the work they have had in hand must have been one of great magnitude or have had but limited attention given to it, for we understand the order for it to sit was issued about nine years ago.

MARITIME WARFARE.

A paper on "Maritime Warfare" was read by Mr. Donald Currie at the Royal United Service Institution yesterday. Major-General Sir Garnet Wolseley presided, and there were present several gentlemen connected with the naval and military Services of the country, who seemed to take a deep interest in the matter under discussion. In the course of the reading of his paper a special point taken by Mr. Currie was the necessity for telegraphic communication, especially in their West African possessions, making proper arrangements for graving docks on that coast, and also establishing suitable coaling stations, in the view of a probability of war. The lecturer commented strongly on the fact that at the present time we were depending on a telegraphic communication with the East through Russian or Persian territory, and that such might be at any moment cut off. He went on to show that it was possible the communication between this country and the East by means of the Suez Canal might by some means or other be cut off, and it was, therefore, the more necessary that they should keep up the communication with the East by the Cape of Good Hope. That was the route both to the Eastern possessions and to Australia, and it was, therefore, all the more necessary that they should have a proper line of telegraphic communication along that route, and that they should have proper and efficient coal depots for the ocean-going steamers established along it. The lecturer went on to show that in this respect there had been a great deficiency during the Ashantee war, and strongly advocated telegraphic communication with the Gold Coast. What he wanted to see between England, St. Helena, Ascension, the Gold Coast, and the Cape, and it was absolutely necessary that this should be provided for without delay. Some of their first-class ironclads could not steam between the places he had mentioned without the establishment of coal depôts as well as the means of telegraphic communication, and he therefore thought that the Admiralty ought to see that proper coaling stations were appointed on these coasts, and also that proper telegraphic communication with them should be established. Then there was another matter which was most imperatively called for out on these coasts. He meant graving-docks. One of their ironclads might be disabled in those waters, but there was no means of repairing her unless she came home to England. He considered, therefore, that it was most essential to have these graving-docks, and he very ably illustrated his remarks on that point by instances which had actually taken place. The lecture was listened to throughout with the greatest attention, and some of the lecturer's remarks were received with applause. On the conclusion of it some conversation ensued upon Mr. Currie's able paper. Mr. Robinson, a member of the Legislature of South Natal, stated that as a native of South Africa he could testify as to the truth of Mr. Currie's remarks. They felt the want of telegraphic communication very much, so much so that when the foe with which they had to deal threatened them they had to use beacon fires, causing them to blaze from hill to hill, and from eminence to eminence, so as to rouse the district and put people on their guard. They had, no doubt, plenty of coal, but it was a long way off from the sea-coast. It could, however, easily be utilized for the purpose of supplying the ships. Mr. Rishwood, from the Cape Colony, cordially thanked Mr. Currie for his paper, and he trusted that it would be the means of carrying out the improvements which that gentleman had pointed out as necessary. Capt. Fremantle stated that he had been out in command of vessels on the Gold Coast, and the great want he felt was that of proper telegraphic communication, loading places for the vessels, and the total want of graving docks, that the vessels could be cleaned and repaired. The chairman, General Sir Garnet Wolseley, wound up the conversation by paying a high tribute to Mr. Donald Currie for the able paper he had read, and hoped that it would be the means of producing an improvement in respect of the matters of which it treated. A cordial vote of thanks to General Sir Garnet Wolseley terminated the proceedings.

Major-Gen. J. Forbes, C.B., Bombay Cavalry, is expected to succeed Major-Gen. G. C. Montgomery, C.S.I., Bombay Infantry, in command of the Mhow Division, when he vacates in May.

The Army.

4th Dragoon Guards. Major Gunter, of the King's Dragoon Guards, is understood to have been selected for the command, it being felt that Major Shaw-Hellier's recent promotion renders it desirable that a senior officer should be promoted.

5th Dragoon Guards. Major Blake is retiring.

6th Dragoon Guards (Carabiniers). Col. Napier is about to retire from the command.

1st (Royal) Dragoons. Capt. Maunsell has sent in his papers to retire.

2nd Dragoons (Scots Greys). Lieut. Kennedy obtains the troop vacant in consequence of Capt. Scott's retirement.

3rd Hussars. Lieut. Peyton has sailed for India in the Euphrates to join on appointment from the 2nd Stafford Militia.

4th Hussars. Capt. Cherry has sailed for India in the Euphrates to join on promotion from the depôt. Qrmr. Leetch has passed the lower standard examination in Hindostanee.

10th Hussars. The vacant troop will be filled by selection.

11th Hussars. The services of Capt. Rivett-Carnac have been placed temporarily at the disposal of the Department of Revenue, Agriculture, and Commerce, from the date on which he joined the personal Staff. Capt. Grissell has been granted leave from India to England, for twelve months, on private affairs.

13th Hussars. Major Butler has been granted an extension of leave, to remain in England from March 15 to Sept. 15.

16th Lancers. Lieut. Hill obtains the vacant troop.

Royal Artillery.

An important change in the organization of the regiment has been decided upon by the War Office, its object being the application, as far as possible to that corps, of the system of localization and linked battalions now being completed in the case of the Infantry of the Line. The *Times* thus sums up the arrangement:—"At present there are six brigades of Royal Horse Artillery and twenty-five brigades of Royal Artillery, in addition to the depôt brigades. Of the Horse Artillery three brigades belong to the Home and three to the Indian establishment, and these six brigades are to be redistributed into three—designated A, B, and C respectively—each having its head-quarters and six batteries at home, and the remaining five batteries in India. The present depôt batteries, numbering 422 of all ranks, will be divided and attached to the head-quarters of the brigades at home, making the strength of each about 970 of all ranks, instead of 830 as at present. The batteries of each brigade serving in India will amount to 821 of all ranks, showing a very slight reduction—altogether in the Brigade Staff—upon the present establishment, and making the total strength of the Royal Horse Artillery in India 2,462 instead of 2,497, as now provided for. The Royal Artillery will be subject to a greater change. Of the twenty-five brigades of which the corps now consists, twelve are Field and thirteen Garrison Artillery, the former being, like the Horse Artillery, equally divided—six and six—between the United Kingdom and India, while of the latter five brigades are usually at home, four in India, and four in the colonies, a complete brigade of seven batteries being stationed at Gibraltar, another at Malta, and the two remaining brigades being distributed between Halifax, Bermuda, Ceylon, and other garrisons. Under the new organization, these twenty-five brigades will be resolved into eleven, of which six—the 1st to the 6th—will be Field, and the remaining five—the 7th to the 11th—Garrison Artillery. The head-quarters of each will always remain in the United Kingdom, and the existing depôt brigade, numbering 1,946 of all ranks, will be distributed between the home or head-quarters division of the newly-formed brigades. As regards each of the Field brigades, eight batteries, seven service and one depôt, will remain at home, the aggregate strength being 1,306, while seven batteries will remain in India, at an aggregate strength of 1,145, except in the case of the new 3rd Brigade, which will have eight batteries at a strength of 1,308 on the Indian establishment. As in the case of the Horse Artillery, the reduction of the total strength of the Field and Garrison Artillery in India will only affect the brigade Staff, and will be from 9,736 to 9,637 of all ranks. Respecting the five newly-formed brigades of Garrison Artillery, the head-quarters and home establishment of each will be alike, consisting of seven service batteries, of a strength of 994, and a depôt battery of 299, making the total numbers at home 1,221. But the arrangement for the foreign establishment varies somewhat in each case. Thus the new 7th Brig. will have four batteries (strength 600) in the Mediterranean, and seven (strength 763) in the Eastern Colonies—viz., two in Ceylon, and one each at Hong Kong, the Straits, the Cape, the Mauritius, and St. Helena. The 8th Brig. will have twelve batteries in India. The 9th Brig. will have two batteries in the Western Colonies and nine in India; the 10th Brig. will have five batteries in the Western Colonies and six in the Mediterranean; while the 11th Brig. will have four in the Mediterranean and seven in India. Thus, in fact, the linking system has been applied by bringing the existing brigades into pairs, and amalgamating them in the same manner as the double battalion regiments of the Line, while the principle of localization will be so far applied that the depôt and head-quarters of each brigade will be located in a particular district at home, 'the officers in command of these local head-quarters will command the Artillery in the district, and as far as possible the batteries in each district will be worked as a distinct organization combined with the Auxiliary Forces.'"

The following officers are *en route* to India in H.M.S. Euphrates, viz.:—Brevet Col. A. W. Twiss, 6th Brig.; Lieut.-Col. C. B. Le Mesurier, 8th Brig.; Majors T. Mahon, 6th Brig., and W. A. P. Wyllie, 9th Brig.; Capt. J. C. Robson. 9th Brig., and Lieuts. A. C. Daniell and J. R. K. L. Heyland, 4th Brig.; C. T. J. Noble and F. J. Fox, 5th Brig; W. L. White, 6th Brig.; F. R. Thackeray, 8th Brig.; C. A. Anderson and F. G. Stone, 13th Brig.; and L. C. M. Blacker, 21st Brig.

Major S. Penny, 20th Brig. (late Madras), has been granted leave from India to England for six months, on private affairs.

Major G. O'Connor, 8th Brig., has applied for leave to England, on medical certificate.

Lieut. W. T. G. Deany, 4th Brig., has applied for leave from India to England, on medical certificate.

Capt. H. S. Higginson, 19th Brig. (late Bengal), having passed the prescribed examination, has been confirmed in his appointment as aide-de-camp to Major-Gen. Chamberlain, C.S.I., commanding the Oudh Division, with effect from April 17 last.

Lieut. C. B. Wickham, F Brig., has passed the lower standard examination in Hindostanee.

Lieut.-Col. H. L. Balfour, 11th Brig., has been directed to proceed to England from India and report himself at the Horse Guards on arrival.

Royal Engineers.

The Chatham correspondent of the *Morning Post* writes:—"An order has been received at the School of Military Engineering from the War Office directing that during the next two months all non-commissioned officers and men of the corps of Royal Engineers who have completed their twenty-one years' service are to be discharged. This will, of course, cause a number of vacancies in the corps, and, although recruiting has been stopped, men of particular trades—masons, bricklayers, &c.—will be taken on to fill these vacancies."

The following very interesting statement is from a private letter, dated Cairo, Feb. 17, received from Col. Gordon:—"His Highness to-day has signed the Firman. He could not have given me greater power. He has given me over the Soudan, in addition to the Province of the Equator and the littoral of the Red Sea, absolute authority over the finance, &c. I am astounded at the powers he has placed in my hands. With the Governor-Generalship of the Soudan, it will be my fault if slavery does not cease, and if these vast countries are not open to the world. So there is an end of slavery if God will, for the whole secret of the matter is in the Government of the Soudan, and if the man who holds that government is against it, it must cease."

The rumour, says the *Civil and Military Gazette*, that Col. R. Young (late Bengal), our popular Commissioner, had accepted a bonus of 20,000rs, and was about to retire from the Commission, is not strictly correct. In reply to an offer made by Col. Young to go if he obtained the bonus offered to other military civilians in the Punjab Commission, the Government of India stated that as he was a R.E. officer, the terms of the scheme did not apply to him. We fancy, however, that Col. Young has only to renew his offer to the India office, and it will be accepted, inasmuch as the military and uncovenanted civilians of the Punjab are not "rising" with the avidity expected from them by the Secretary of State for India to the bait he offered them, to induce them to make room for the aggrieved civilians of the N.W.P. This application, it is very likely, Col. Young will make, and it is not improbable that he will, pending the decision of the Home authorities upon it, defer taking his furlough.

Grenadier Guards. The 3rd Batn., under command of Col. Earle, C.S.I., passed through the City on Thursday on its way from Chelsea to the Tower. Special permission had been granted by the Lord Mayor for the men to march with fixed bayonets and with their band playing, the only regiment having that privilege being the 3rd Buffs, the descendants of the Trained Bands of the City. The battalion was met at the City boundary on the Thames Embankment by Major Campbell, the City Marshal, who escorted them through the City. On passing the Mansion House the regiment "shouldered arms" by way of compliment to the Lord Mayor, who, from the balcony of his residence, acknowledged the salute.

Scots Fusilier Guards. We (*Globe*) hear that it is proposed to restore to the 3rd, or Scots Fusilier Guards, the old title of the "Scots Guards," which that distinguished regiment bore from the time it was originally raised until the Union. This is not the first time that an effort has been made in the same direction. Upwards of ten years ago Lieut.-Gen. Dalrymple, then in command of the regiment, collected a number of documents referring to the subject, and embodied them in a statement which was laid before the authorities. The proposal did not then meet with a favourable reception; but of late some regiments of the Line have had their old designations restored to them, and the gallant 21st claim that of "Scots Fusiliers." We hope it may be granted to them, and, as a necessary consequence, that the famous old "Scots Guards" may again be known by the title under which they gained their earliest laurels.

1st or Royal Scots. Major Manners, Capt. Crowther-Benyon, and Capt. Paterson, have been appointed to act as a committee of paymastership for the 2nd Batn., vice Paymr. (Capt.) Elliott, proceeding on leave to England on medical certificate—Capt. Paterson performing the duties on the responsibility of the committee.

3rd Buffs. A telegram dated Madeira, Feb. 25, says:—"The 2nd Batn. 3rd Buffs were to proceed from East London to Natal, but everything was quiet in the colony."

6th Regiment. Lieut. O'Beirne, 1st Batn., has been detailed for depôt duty. Brevet Lieut.-Col. Feilden, Brevet Major Austin, and Lieut. Gibbs obtain the steps in succession to Col. Elkington.

7th Fusiliers. Lieut. Anderson has been appointed assist.-instr. of musketry of the 2nd Batn.

10th Regiment. Major Davies has sent in his papers. Lieut. Knatchbull obtains Capt. Vaughton's troop.

11th Regiment. The 1st Batn. was to have embarked at Bombay on Tuesday for conveyance to England, and is expected to arrive at Portsmouth on the 1st proximo.

12th Regiment. Lieut. Cave, 1st Batn., has passed lower standard examination in Hindostanee.

15th Regiment. Brevet Major Hallowes, 2nd Batn., has passed the lower standard examination in Hindostanee.

17th Regiment. Lieut. Creasy, 1st Batn., has been granted leave from India to England, on medical certificate. Lieut. Beatson, 1st Batn., is a candidate for the Indian S.C., and has been appointed officiating second squadron subaltern of the 11th Bengal Cavalry on probation.

18th Royal Irish. The following farewell order on the departure of Surg.-Major Beath, M.D., for Jamaica, has been published by the officer commanding the 2nd Batn.:—"It is with great regret that the commanding officer has to announce the departure of Surg.-Major Beath on foreign service. His never-failing kindness and attention will be long remembered in the regiment, that has numerous instances to recall of his patient attention to duty, his great professional skill, and his genial friendship. Sincere good wishes accompany him for his future prosperity."

19th Regiment. Lieut. Michell is to be promoted to the vacant company.

23rd Fusiliers. The 1st Batn. will be moved to Enniskillen in May to relieve the 91st Highlanders. It has been arranged that the depôts of both battalions are to remain in Dublin, attached to the 1st Batn. 7th Royal Fusiliers, from May until the formation of the 23rd Brigade Depôt at Wrexham in July. Lieut. Boyle, 1st Batn., is retiring by sale of his commission.

25th Regiment. Sub-Lieut. Travers has been appointed officiating wing officer of the 2nd Goorkhas on probation, on becoming a candidate for the Indian S.C.

29th Regiment. Lieut. Prendergast obtains the company vacant by Capt. Bourke's retirement.

33rd Regiment. Lieut. and Adjt. Conor has been granted leave from India to England for nine months, on private affairs.

34th Regiment. Lieuts. Champion and Ovens have passed the lower standard examination in Hindostanee.

37th Regiment. Major Glass obtains the lieut.-colonelcy, Capt. King the majority, and Lieut. Verner the company, in succession to Col. Bowles, retired upon half pay.

38th Regiment. Capt. Morrisey's company is to be filled by an outsider.

43rd Light Infantry. At a full-dress parade of the 1st Batn. Rifle Brigade at Dublin, Col. G. S. Young, assist. adjt.-gen., presented to Garrison Sergt.-Major W. B. Garland, late of the 43rd, a medal for long service and good conduct. Sergt.-Major Garland has seen service both in India and New Zealand, and was present throughout the Maori campaign of 1866-67. He is in possession of the Indian and New Zealand medals and a medal for distinguished conduct in the field. The medal was accompanied by a gratuity of £5.

44th Regiment. Major Rennie has sailed in the Euphrates for India to rejoin from leave.

Royal Marines.

A number of non-commissioned officers and men of the Chatham division have been selected to proceed to Ascension for duty at that island, to relieve the non-commissioned officers and men of the corps whose period of service has expired. The Marines selected for Ascension are those acquainted with some trade or handicraft, and they will be accompanied by their wives and families. They will be conveyed out in the Industry, which takes a quantity of stores for Ascension.

The badges and prizes for good shooting and prizes for judging distances have been presented to the non-commissioned officers and men of the Royal Marine Artillery who have been successful in obtaining the requisite number of points for the past year. The highest score was by Sergt. C. Monk, who scored 134 points in the 1st and 2nd classes, Colr.-Sergt. Carruthers standing 2nd with 133 points; prize of £5, with badge of gold crossed muskets and crown. Sergt. Collins came next with 131 points, prize of £2 10s. This non-commissioned officer obtained 64 points in the 1st period, 68 points in the 2nd class, and 63 points in the 1st class. The first and second on the list for judging distances were Sergt. Mark Elmer and Colr.-Sergt. Luxton, each of whom has received a prize of 20s.

The Horse Guards have notified to the Admiralty that Royal Marine officers wishing to undergo a course of instruction at the riding establishment, Canterbury, should commence the same on Jan. 1, annually, as the present method of joining the school at any season of the year has caused considerable inconvenience.

An exchange on the general foreign service roster has been sanctioned between Lieuts. McCheane, of the Iron Duke, and J. Craigie, R.M.L.I.

Mr. Archibald Gell Cochran has been appointed, 1st inst., a lieut. in the Corps of Royal Marines, and attached to the Portsmouth Division.

An exchange of divisions between Capt. and Brevet Major R. W. B. Hunt, Portsmouth Division, and Capt. James Lecky, Plymouth Division, has been approved.

51st Light Infantry. Lieut. Barnett has been granted leave from India to England, on medical certificate.

55th Regiment may be expected at Portsmouth about the 18th instant from Aden.

56th Regiment has taken over quarters at Aden, where it has relieved the 55th.

60th Rifles. An advance party of the 3rd Batn., about 250, arrived at Aldershot from Winchester on Thursday. The remainder of the battalion will follow about the middle of the month. Lieut. Wilson, 2nd Batn., has been told off for duty in connection with the Indian famine relief arrangements.

66th Regiment. The old colours were duly deposited in the Church of St. Mary's, Reading, on Tuesday. A party from the depôt, now at Portsmouth, under command of Capt. Soady, accompanied them. They were escorted to the station at Portsmouth by a guard of honour from the 49th Regt. On arrival at Reading, they were joined by the Staff and band of the Royal Berks Militia, under Capt. and Adjt. Murphy, and a strong guard of the Berkshire Volunteers. Preceded by the band, the colours, carried by Capt. Hall and Lieut. Beresford-Peirse, were marched to St. Mary's Church through the principal streets, which were densely crowded. After a full choral service in the fine old church, the colours were handed, according to the form laid down, to the Vicar, the Rev. N. Garry, Rural Dean of Reading, in the presence of the Line, Militia, and Volunteers of the county of Berks and a crowded congregation, to be laid up in their appropriate resting-place, the principal church of the county, from whence they truly derive their territorial title. Lieut. Barclay has been permitted to resign his probationary appointment for the Bengal S.C. and revert to his regiment.

70th Regiment. Lieut. Freeman has been granted leave from India to England, on medical certificate.

81st Regiment. Sub-Lieut. Chambers has passed the lower standard examination in Hindostanee.

83rd Regiment. Brevet Major Gore and Lieut. Graves have sailed in the Euphrates for India—the former from depôt duty, the latter on appointment from the Jersey Militia.

94th Regiment. Sir Colman O'Loghlen has moved that the proceedings of the court-martial on Capt. Roberts, and other papers relating thereto, be laid upon the table of the House this session, and be printed. The motion has been agreed to.

95th Regiment. Surg.-Major Forsayeth has sailed for

India in H.M.S. Euphrates for duty in that country on appointment to the Staff.

100th Royal Canadians. Capt. Kersteman has been appointed adjt. of the School of Instruction at Aldershot for officers of the Auxiliary Forces, vice Capt. Pyne, 19th Regt., who has *left* the station.

102nd Fusiliers. Capt. Woods, *from* the Supernumerary List, is to rejoin head-quarters on promotion to the majority, which Major Wood's retirement has left vacant.

104th Fusiliers. Lieut. Alcock succeeds to the company.

Rifle Brigade. Capt. Wilson, 1st Batn., has been selected for the adjutancy of the 2nd Admin. Batn. Suffolk R.V. Lieut. W. Wright, on the Half-Pay List, one of the few remaining Waterloo officers, died a few days since at Maryon-road, Charlton, in his eighty-second year. The deceased obtained his first commission March 11, 1813, and served in Holland in 1813 and 1814, and was present at the attack on Merxem and bombardment of the French Fleet at Antwerp. He served also in the campaign of 1815, and was severely wounded at Waterloo. His commission as first-lieut. was dated July 20, 1815, and he was placed on half pay Dec. 25, 1818.

23rd Brigade Depôt (Wrexham). Arrangements are being made for the formation of the brigade in July, when the depôt companies of the 23rd Fusiliers will be moved over from Dublin to join it.

Medical Department. The following officers are *en route* to India in H.M.S. Euphrates, viz.:—Surgs.-Major Forsayeth, Hassard, Lithgow, M.D., Kilroy, Cullen, Murray, Young, Nicholson, Ffolliott, and Owen. Surg.-Major W. Temple, M.B., V.C., has passed the lower standard examination in Hindostanee.

THE AUXILIARY FORCES.

MILITIA.

Royal Berks. Hon. Major W. S. Braham died at Reading on Monday last. He joined the regiment May 2, 1855, and became capt. Feb. 19, 1863. Lieut. Vincent has passed, in India, the examination in Hindostanee.

West Kent. The recruits are not to assemble for drill until further orders, in consequence of the prevalence of small-pox in and about the neighbourhood where they were enrolled. The training of the regiment may be put off from a similar cause, as much anxiety naturally exists among the people of Maidstone. Major Cragg, on leaving the regiment after five years of unremitting duty as adjt., presented Qrmr. Pratt with a piece of handsome plate bearing the following inscription:—"Presented to Qrmr. H. Pratt by Major Cragg, Jan. 21, 1877."

West Cork Artillery. Capt. Hewson has been appointed instr. of artillery.

Limerick City Artillery. Capt. Osborne has obtained twelve months' leave of absence to proceed to India.

Mr. Sullivan asked the Secretary of State for War, on Monday, whether he would inform the House how many recruits were obtained for the Militia during the year 1876, and what was the maximum age at which they were usually taken. Mr. Hardy: In answer to the hon. member's question, I have to say that 38,437 recruits were enlisted for the Militia between Jan. 1 and Dec. 31, 1876. Of these, 27,330 were from England and Wales, 3,720 from Scotland, and 7,387 from Ireland. Thirty-five years is the maximum age at which a recruit may be enrolled, 19 years is about the average age at which they are enrolled, and 23 years about the maximum age at which they are taken in any regiment.

VOLUNTEERS.

49th Middlesex (Post Office) Rifles. H.S.H. the Duke of Teck, G.C.B., distributed the prizes to the corps—of which he is hon. col.—in the Guildhall, on Saturday evening last. It was stated during the evening that the total strength of the 49th is 709; and the strength at the end of the last Volunteer year 638. The number of enrolments since the close of the last Volunteer year has been 122, and the resignations 51. The efficients last year had been 633, showing a percentage of 99.21. The officers in possession of certificates of proficiency were 17, and the sergeants in possession of such certificates 50. The number who attended the annual inspection was 545, and the camp of exercise 247. The capitation grant earned was £1,157.

2nd Adm. Batn. Suffolk Rifles. Capt. Wilson, Rifle Brigade, has been given the adjutancy, vice Capt. Anstruther, who rejoins the Rifle Brigade, his five years' service having expired.

The following memorandum has been issued from the War Office:—1. The Secretary of State for War has approved of a review of Metropolitan and other Volunteer corps taking place near Dunstable on Easter Monday, April 2, 1877. 2. The usual applications from corps desirous of attending this review must be made in time to be received by the general officers commanding in their respective districts, on or before Monday, the 19th inst., after which date no further applications will be received. 3. It should be stated in each application from what railway station it will be most convenient for the corps to take its departure for Dunstable. It must, however, be distinctly understood that no promise is given that corps can be allowed to start from the stations selected by them, although care will be taken to meet their wishes as far as possible. 4. It is particularly requested that commanding officers will make their applications as early as possible before the 19th inst., as their doing so will greatly facilitate railway and other arrangements. 5. His Royal Highness the Field-Marshal Commanding-in-Chief approves of the necessary arrangements as to the military organization of the force being carried out by the Staff of the Home District, as the majority of the Volunteers will belong to that district. 6. With reference to Paragraphs 2 and 5 of this Memorandum, the general officers commanding other districts will communicate direct with the general officers commanding the Home District upon this subject.—J W. Armstrong, Major-Gen., I.G.A.F.

The following return of the total number of Volunteers, exclusive of those now serving, who have joined and passed through the force from its re-establishment in 1859 down to the present time, was issued on Saturday:—Light Horse, 515; Artillery, 124,897; Engineers, 20,739; Mounted Rifles, 262; Rifles, 486,498; total, 632,911. These numbers are exclusive of Volunteers who have passed through some of the corps now disbanded, and with those now enrolled will bring up the grand total to about 850,000 of all ranks and arms.

THE INDIAN ARMY.

4th Bengal Cavalry. Capt. W. R. Hamilton, adjt., has been told off for duty in connection with the famine arrangements.

5th Bengal Cavalry. Capt. M. Armstrong is permitted to retain his appointment as second squadron subaltern on promotion.

6th Bengal Cavalry. Lieut. C. W. Muir, squadron officer, has joined the Governor-General's Body Guard as adjt., vice Capt. Deane, appointed a third assistant secretary to the Government of India, Military Department.

11th Bengal Cavalry. Lieut. S. B. Beatson, 17th Foot, having become a candidate for the Staff Corps, has been appointed officiating second squadron subaltern on probation.

18th Bengal Cavalry. Capt. A. P. Broome, second squadron officer, has been told off for duty in connection with the Indian famine arrangements.

19th Bengal Cavalry. Capt. W. W. Biscoe, adjt., has been told off for duty in connection with the Indian famine arrangements.

1st Bengal N.I. Major L. H. P. de Hochepied Larpent, second in command, is about to be promoted lieut.-col., with effect from Jan. 20.

9th Bengal N.I. Capt. F. F. J. Toke, wing officer, is about to be promoted major, with effect from Jan. 22.

11th Bengal N.I. Col. C. F. G. Lamb has returned to India and resumed command from European furlough.

14th Bengal N.I. Lieut.-Col. L. H. Williams, commandant, has been granted leave from India to England for one year and eight months on private affairs.

16th Bengal N.I. Lieut. W. H. Bacon, wing officer, has returned to India and resumed duty from European furlough.

23rd Bengal N.I. Lieut. D. Chesney has passed the examination in Punjabi.

26th Bengal N.I. Col. J. Williamson, commandant, is about to return to duty in India from European furlough. Lieut. T. L. Lewis, wing officer, has returned to India aad resumed duty from European furlough. Lieut. T. G. Barclay, 66th Foot, has been permitted to resign his probationary appointment for the Staff Corps, and revert to duty with his own regiment.

34th Bengal N.I. Capt. E. S. Cooke has been allowed to retain his appointment as qrmr. on promotion.

39th Bengal N.I. Lieut.-Col. H. M. Wemyss, wing commander, has returned to India and resumed duty from European furlough.

41st Bengal N.I. Lieut.-Col. W. C. B. Ryan, second in command, has applied for permission to retire from the Service on the pension of his rank. He entered the Army Dec. 10, 1850, and became lieut.-col. Dec. 10, 1876.

42nd Bengal N.I. Brevet Lieut.-Col. J. P. Sherriff, commandant, is about to obtain substantive rank, with effect from Jan. 20. Capt. A. K. Abbott has been allowed to retain his appointment as qrmr. on promotion.

45th Bengal N.I. Major F. M. Armstrong, second in command, is about to be promoted lieut.-col., with effect from Jan. 20.

2nd Goorkhas. Sub-Lieut. E. A. Travers, 25th Foot, a candidate for the Indian S.C., has been appointed officiating wing officer on probation.

3rd Goorkhas. Capt. E. D. Smith, second wing subaltern, has been appointed first wing subaltern, vice Hughes, permitted to resign the Service, with effect from Nov. 16, 1876. Capt. G. C. Gregory, wing officer, is about to be promoted major, with effect from Jan. 20. The following appointments have been made, vice Capt. Hughes, permitted to resign the Service, with effect from Nov. 16, 1876, viz.:—Capt. E. D. Smith, second wing subaltern and officiating qrmr., to officiate as first wing subaltern, and to continue to officiate as qrmr., and Lieut. C. Pulley, officiating second wing subaltern, to officiate as first wing subaltern.

4th Goorkhas. Lieut. C. A. Mercer, second wing subaltern, has been told off for duty in connection with the famine relief arrangements.

4th Punjab Cavalry. Major J. Gillespie, second in command, is about to obtain the rank of lieut.-col., with effect from Jan. 20.

3rd Punjab Infantry. Lieut. H. F. V. Gaitskell, qrmr., has applied for furlough to Europe on medical certificate.

5th Punjab Infantry. Lieut.-Col. W. H. Paget, commandant, has been granted an extension of leave from India for six months.

1st Madras Cavalry. Lieut.-Col. J. N. Maclean, second in command, is about to be promoted brevet col., with effect from Jan. 26.

29th Madras N.I. Lieut.-Col. P. J. P. Wetherall, second in command, has qualified for promotion as brevet col., with effect from Jan. 26.

Poona Horse. Capt. G. C. Hogg, squadron commander, has been granted leave to England for two years.

5th Bombay N.I. Col. F. Roome, commandant, has been granted leave to England for two years on medical certificate.

9th Bombay N.I. Major L. H. Sibthorpe has qualified for promotion as lieut.-col., with effect from Jan. 20.

21st Bombay N.I. (Marine Battalion). When the Prince of Wales visited Bombay in Nov., 1875, one of the most interesting ceremonies he took part in was the presentation of new colours to the Marine Battalion, the oldest Native Infantry regiment on the Bombay establishment. The regiment has now completed the hundredth year of its existence, having been raised on Jan. 3, 1777, and on Feb. 1 a dinner and a ball were given in the mess-house on the Esplanade, by Col. Carnegy and the officers, to commemorate the centenary. Amongst the company were his Excellency the Governor. After dinner Col. Carnegy rose and proposed the toasts of "The Queen and Empress" and "The Prince of Wales and the rest of the Royal Family." Col. Carnegy then proposed the health of the Governor of Bombay, who was, he said, beloved and respected by all, and society would sustain a severe loss when his Excellency left, which he was afraid would be only too soon now. Who was there that had ever visited Bombay, Poona, or Mahableshwur, who had not partaken of Sir Philip Wodehouse's most generous hospitality? Col. Carnegy having returned thanks to the toast of his health, the company adjourned to the ball-room, where about one hundred other guests had assembled, and dancing was kept up with much vigour till a late hour in the morning.

27th Bombay N.I. Major J. H. Castall, wing officer, has qualified for promotion as lieut.-col., with effect from Jan. 20.

30th Bombay N.I. Major W. T. Mills, wing officer, has qualified for promotion as lieut.-col., with effect from Jan. 20.

PARLIAMENT.

Compassionate Allowances.

On Monday Mr. Puleston put a question to Mr. Ward Hunt respecting the advisability of extending compassionate allowances to petty officers and men dismissed the Service, but the suggestion did not meet with much favour.

The Pay of the Marines.

On Thursday, in answer to Dr. Kenealy,

Mr. W. Hunt said the pay of the officers of the Marines and of the Army was identical, but there was a difference with regard to the pay of the men. The soldiers now received 1s. per day, and for the first twelve years of service 2d. per day deferred pay *plus* rations. The pay of Marines on shore and afloat differed. On shore it was 1s. 2d. per day pay with 1d. per day beer money, from which was deducted 4½d. per day for rations. The net pay on shore was therefore 10½d., but when afloat the Marine received 1s. 2d. per day pay and three naval rations. If half his time was spent on shore and half afloat, his average net pay was 1s. 0¼d., so that as regarded substantive pay he had a farthing per day more than the soldier throughout his service; but he was worse off than the latter as regarded deferred pay. The pay to sergeants in the Army was in excess of that to Marine sergeants. It was impossible to make an accurate comparison as regarded pensions in the two Services, and whether the pay of the soldier and the Marine should be equalised was a matter for discussion.

Naval Cadets' College.

Mr. Reed asked the First Lord of the Admiralty if his attention had been called to the inconsistencies in the reports of the committee on the site for the Naval Cadets' College, as shown by some statement relative to Milford Haven (Newton Noyes), which site was rejected on the ground of "immoral temptations," whereas the tabular report signed by the chairman declared it to be "unobjectionable in this respect."

Mr. Hunt gave the explanation of th echairman of the committee, which seemed to him (Mr. W. Hunt) to be satisfactory, and to reconcile the inconsistencies which the hon. member for Pembroke pointed out.

Control Paymasters.

Last night Sir Henry Havelock gave notice of the following question for Monday next:—To ask the Secretary of State for War whether several general officers commanding districts have recently made representations regarding the unsatisfactory position of the Control paymasters in their relations with the commissaries-general of Supply and Ordnance, and the conflict of authority arising therefrom: whether his attention had been drawn to the desirability of making the Pay Department independent of interference from those commissaries-general, as regards its financial functions, in respect to payments for contracts originating with those officers: and, whether it was a fact that, in consequence of the officers of the Pay Sub-Department bearing commissions appointing them to the defunct Control Department, and their designations not having been changed since its abolition thirteen months ago, their promotions and appointments, unlike those of officers in any other branch, are at a standstill because they cannot be gazetted in the customary form.

Captain the Hon. R. W. Napier.

Sir Alexander Gordon will also, on the same evening, ask the following question of the Secretary for War:—What was the service on account of which Captain the Honourable R. W. Napier, second squadron subaltern of the 18th Bengal Cavalry, and now serving as an aide-de-camp at Gibraltar, was, on the 19th August last, rewarded by promotion to the rank of brevet major, over the heads of (about) 1,443 captains who were senior to him in the Army.

The Late Gunner Charlton.

Sir Edward Watkin has likewise given notice that on going into Committee of Supply on the Army Estimates he will call attention to the case of the late Gunner Charlton, and move that the facts disclosed in the case of the late Gunner Charlton call for the serious attention of the War Office, both as respects the cruelty inflicted upon the individual soldier, and the delay and uncertainty exhibited in reference to the compensation for his suffering and injuries.

Expulsion of an Officer from Jersey.

Mr. Cowen gave notice that on that day (Friday) three weeks he would call attention to the arbitrary expulsion of an officer from Jersey without trial, and without intimation of his offence, or of the names of his accusers.

Enlistment of Recruits.

Mr. Anderson, on the part of Mr. John Holms, asked the Secretary for War how many recruits were enlisted over twenty-five years of age from June 1 to Dec. 31, 1876, in accordance with the General Order issued on the previous date; and how many Infantry recruits under 5ft. 5in. were enlisted from Oct. 24 to Dec. 31, 1876, in accordance with the General Order of the previous date.

Mr. Hardy said that the returns were not yet ready, but they were being prepared.

The Sanitary State of the War Office.

Mr. Kay-Shuttleworth asked the First Commissioner of Works what steps were being taken to carry out the suggestions of the commission on the sanitary state of the War Office, suggestions which they state "if carried out, will, in our opinion, only mitigate evils, not remove them;" and whether—considering that Sir William Jenner and the other commissioners express that opinion, and further declare "that by no alterations can the building be rendered sanitarily satisfactory, but that its salient sanitary defects are inherent to its structure, and cannot, we believe, be so effectually removed as to render possible the retention of the present War Office"—her Majesty's Government had any scheme under consideration for the erection of a new War Office.

Mr. G. Noel said the plans and estimates were now being prepared for the expenses which were to be incurred to carry out the recommendations of the committee on the question of the unsanitary condition of the War Office. He feared that he could not give any definite answer as to the scheme for the erection of a new War Office, which was a very important undertaking.

The Arctic Expedition.

Captain Pim asked the First Lord of the Admiralty if the three medical officers who were promoted from the late Arctic Expedition were so promoted on the recommendation of the Director-General of the Medical Department of the Navy; and, if not, whether any reference was made to that officer before such promotions were made, and why Fleet Surg. Colan, the senior medical officer, was not included in those promotions; and if it is his intention to bestow any reward on that meritorious officer.

Mr. Ward Hunt: I am very sorry I must decline, on general principles, to satisfy the curiosity of the hon. member. (Hear, hear, and a laugh.) Promotions in the Navy are made upon the responsibility of the First Lord of the Admiralty. He consults those persons whom he thinks it his duty to consult before making such promotions. The latter part of the question seems to imply ignorance on the part of my hon. friend that the rank fleet surgeon is limited by an Order in Council to a very small number, and that no promotion can take place until there is a vacancy.

The Treaty of Paris.

Mr. Percy Wyndham then brought before the House a series of resolutions on the above subject, the first of which was that the object of the Declaration of Paris respecting maritime law, signed in that city on April 16, 1856, was, as expressed in the preamble, to endeavour to attain uniformity of doctrine and practice in respect to maritime law in time of war; that as such important maritime States as Spain and the United States having declined to accede to the Declaration of Paris in this matter, and in consequence of some Powers adhering to the new rules, whilst others retained their national rights in time of war, it was therefore desirable that no unnecessary delay should take place on the part of this country withdrawing from the Declaration of Paris on the subject of maritime belligerent rights.

The subject gave rise to an animated discussion, in which Mr. Baillie Cochrane, Mr. Grant Duff, and other hon. members took part.

Ironclads.

On the motion of Sir John Hay, the following returns were ordered:—Nominal lists of all ironclads, and date of their first completion for sea; of ironclads which have received new boilers since their first completion, and date when these boilers were put on board; list of ironclads for which boilers are now in store; and return of the number of tons built up to the present date of all ironclads now building (in continuation of Parliamentary Paper No. 224, of Session 1876.)

Naval Cadets.

On the motion of Capt. Pim, the following returns were ordered:—A return of the total number of naval cadets who have been trained on board H.M.S. Britannia since that ship has been stationed at Dartmouth up to Jan. 1, 1877, specifying, during that period, the total number of officers so trained, with their present rank now in the naval Service; the total number who have died; the total number who have been killed; the total number who have been invalided; the total number who have resigned the Service; the total number who have left, been discharged, or dismissed, stating the cause; the total number who have been unable to pass their examinations, and the total number on the sick list each year.

Training Ships.

The following paper has also been ordered:—A return of the number of training ships in English, Irish, and Scotch waters, specifying the number of boys on board each ship, and the port in which it is stationed.

THE ARMY ESTIMATES.

The Army Estimates for 1877-78 have been issued. From the general abstract on the second page it appears that their total for the ensuing year is £14,538,700, and deducting £603,500 on account of estimated Exchequer extra receipts, the net charge for Army services in 1877-78 is reduced to £13,935,200. The first-mentioned sum is, however, that which Parliament will be asked to grant, and on comparing it with the amount of this year's Estimates we find that there is a net decrease of £742,900. There is an increase in the number of men on the home and colonial establishments of the Army, including the Staff, the Militia forces, but excluding men serving in India. For the coming year 133,720 are provided for, as against 132,884 last year, or an addition of 836 to the strength. The pay of the regular forces, which is accounted for under votes 1 to 4, is taken at £4,885,200 whilst in 1876-77 it amounted to upwards of five millions, There is a reduction on each of the votes in this group. In the aggregate of the votes which provide for the pay of the Auxiliary Forces—namely, votes 5 to 8 inclusive—there is again a reduction; the amount taken for 1877-78 being £1,209,100, whereas in 1876-77 the sum taken for these forces was £1,337,100. There is a decrease in the vote for Militia pay and allowances amounting to £138,700, but an increase on the pay and allowances for Volunteers of £10,700. The net decrease, therefore, comes to £128,000 on these several votes. In the sum total of votes 9, 10, 11, and 12, which provide for commissariat and ordnance store establishments, there is again a falling off from £5,397,000 last year to £5,286,400 for this. There is an increase of £4,400 in the first of these votes (9), which bears the wages of the commissariat, transport, and other cognate establishments; a decrease of £11,000 on vote 10 for forage, provisions, fuel, &c.; an increase of £5,000 on the vote for clothing establishments, services, and supplies; and a large reduction, amounting to £109,000, on vote 12 for supply, manufacture, and repair of warlike and other stores. In vote 13, for works and buildings at home and abroad, there is a reduction of £16,400, the amount of the vote for 1877-78 being £828,700, and that for 1876-77 £845,100. The votes classed under the head of various services have altogether increased from £395,400 in 1876-77 to £434,500 for the new year. The establishments for military education are answerable for an increase of £10,300 to vote 14, which amounts to £154,400, and the administration of the Army (vote 16) is put down at an increased cost of £34,400; the sum to be asked on this account is £249,100. The third vote under this heading, vote 15 for miscellaneous effective services, is reduced by £5,600, and amounts to £31,000. All the foregoing are effective, and the estimate for them amounts to £12,643,900, against £13,036,300 for 1876-77. The estimates for the non-effective services, votes 17 to 25, amount to £1,894,800. These services last year called for £2,245,300. With the exception of votes 21, 24, and 25, which are for pensions for wounds, superannuation allowances, and Militia, Yeomanry, and Volunteer corps respectively, all the votes under this branch are reduced.

Cols. A. Ternan, Bengal S.C., and R. Phayre, C.B., Bombay S.C., have succeeded to colonel's allowances, with effect from Jan. 26.

TERRITORIAL REGIMENTS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—At the conclusion of your admirable article of the 24th ult., you think the above idea too monstrous to be carried out. In my humble opinion no treatment of the Army is too monstrous to be carried out now, sir. In the days before Mr. Cardwell was heard of, the purchase officers were proud of their regiments, and happy to serve for nothing, but since 1871 they have been robbed of their money, their rank, and their promotion, and now it is proposed to rob them of their homes. But, if it is true, and the glorious old regiments of the British Army are to be improved off the face of the earth at the recommendation of a committee, why should all the time-honoured numbers be obliterated? Let us preserve all we can. Taking the proposed new titles of regiments as given by the *Times* newspaper, I would propose the following plan as being not quite so bad:—We have the first twenty-five regiments of Foot left in their integrity (except for some absurd new titles, for which let us be duly thankful); and, taking the linked battalions as they now stand, we could preserve the British Line down to the 35th inclusive. Thus, why cannot the 26th and 74th become the 26th Cameronian Highlanders, the 27th and 108th the 27th Royal Inniskillings, and so on? The present 36th, being "linked" to the 29th, would disappear; but why not renumber two other regiments now linked together—the 36th? Make the 68th and 106th into the 36th Royal Durham Light Infantry. Going down the list, we find all the next regiments to the 44th complete with their linked battalions. Then make the new 45th out of the 71st and 78th as the 45th Highland Light Infantry, and the new 46th out of the 72nd and 91st as the 46th Argyllshire Highlanders. This takes us to the 52nd inclusive. The new 53rd should be formed of the 73rd and 90th as the 53rd Royal Lanark Light Infantry. We have the 54th complete. The new 55th would be formed of the 83rd and 86th as the 55th Royal Ulster Fusiliers; and the 56th, out of the 87th and 88th, as the 56th Royal Connaught Fusiliers. The 57th we have. The new 58th would be composed of the 89th and 94th as the 58th Princess Victoria's Irish; the 59th of the 92nd and 93rd as the 59th Gordon and Sutherland Highlanders. The 60th would remain the 60th. The 61st would be formed of the 100th and 109th as the 61st Prince of Wales's Leinster. From the 62nd to the 65th are complete. The new 66th would be composed of the 101st and 104th as the 66th Royal Munster Fusiliers, and the 67th out of the 102nd and 103rd as the 67th Royal Dublin Fusiliers. By the above we should preserve the present numbers of no less than fifty-seven regiments out of the sixty-seven that would appear in the "Army List," which is surely worth doing, if possible. It is too true that, even by this means, many magnificent regiments would disappear, but more would remain, and so I commend it to your notice and to the powers that be. I say nothing of the value in action of being able to distinguish the men of different regiments by the numbers they bear on their clothing, &c., but every soldier will acknowledge it.—I am, &c., XXXV.

March 1, 1877.

Sir,—It would appear as if Mr. Hardy had determined to carry out the recommendations of the Commission on Reorganization, viz., that of linking the battalions (above the 25th Regt.) together; and although by so doing all *esprit de corps* will be effectually stamped out, yet in these levelling-up days I suppose it must be put up with; in other words, we must grin and bear it. As far as a good system is contemplated, I, of course, am too small a personage to pretend to argue, but I fail to see how promotion is to be accelerated by it. If, however, it is the intention of Mr. Hardy to carry out fairly and honestly the recommendations of the Commission on Promotion and Retirement, &c., then, perhaps, we may hope for some of the loaves and fishes of the Service. For the last five years I have not had a single step of promotion. Where I was in 1872, there am I now. I am tired of seeing my name recorded month after month in the same position in the "Army List." I see no prospect of a step in my regiment for the next two years, by which time I shall be verging on my twenty-fifth year of service, and only a poor captain still. However, my case is only one among hundreds, but that does not exonerate the powers that be from rendering the officers of the Army speedy justice. To obtain only one step in five years is not what Lord Cardwell pledged himself to when purchase was abolished. Things surely cannot go on like they have done much longer. There must be some sense of honour and justice still to be found at head-quarters. If fair play is not soon meted out to us, the Abolition of Purchase Act will have been as great a swindle as that of the great South Sea Bubble. No more unfair, stingy, and pernicious Circular than the late one anent forage ever emanated from the War Office, and although Mr. Hardy has been frequently remonstrated with by officers of the highest rank in the Service, he still obstinately persists in allowing it to remain in force, evidently preferring the advice and opinions of civilian advisers who know nothing whatever of the wants of the Army to those of experienced and well able to judge military men. Is, or is not, Mr. Hardy responsible for this Circular? If he is, then upon him, and him alone, rests the onus of its issue. If not, he should speedily rid himself of those whose pernicious advice is causing to be heaped upon his head the ridicule of the whole Army.—I am, &c., One Who Suffers.

Feb. 28, 1877.

THE STATE OF THE ARMY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—On Monday next we may expect to hear Mr. Secretary Hardy confidently assert that our Army is in a flourishing condition, and that recruiting, stimulated by the recent liberal increase of pay to soldiers, is progressing most satisfactorily. The numerical strength is complete, but what about the physique of the men? The standard for Infantry up to 1870 remained at 5ft. 7in., after having occasionally been as high as 5ft. 8in. In August, 1870, Mr. Cardwell was in such want of men that he abolished the standard of height. In November of that year it was fixed at 5ft. 5½in., and it has now been reduced to 5ft. 4½in. The Guards were last year sadly below their establishment, and have now only been completed by payment of £1 bounty to Militiamen, and an increase of reward to the bringers to 25s. A notice of these facts in your valuable paper might perhaps enlighten some of our legislators.—I am, &c., X.

London, March 1.

INDIA.

The Rifle Brigade, which had halted at Rawul Pindee, has gone forward to Peshawur at short notice. Though there was ample preparation, it is understood that the Government have not at present decided to take active measures on the frontier. The *Times of India* thinks it will be no easy matter to inflict upon the Afridees a suitable lesson. "We can enter their country," it says, "in force, and drive before us their armed bands at the daily loss of men to be expected in these hill campaigns; but beyond diminishing their numbers a little, we cannot do much. They have no strongholds, posts, or towns, whose loss would cripple the tribe; whereas we in these days attach much importance to the daily cost of an expedition, in money value, and to the daily loss of valuable lives which must necessarily ensue. If we choose to pay the cost, in money and in lives, of course we can carry war into the Afridee territory; but the Government is obviously unwilling to proceed to such exremities, and there are good grounds for doubting whether the object is worth the trouble. The frontier of the Peshawur valley seems to be a limit indicated alike by physical and political considerations, and one which it must require strong reasons to induce us to cross; and we may, after all, have made a mistake in quarrelling with the Afreedees about the Kohat Pass if the dispute could have been amicably settled."

The privilege of India troopship passages upon payment of table money is, the *Homeward Mail* thinks, worth fighting for by officers of the Staff Corps and Local Army of India. By present rules only officers of British corps can travel by these vessels. Any officer at home desiring the boon would strengthen the hands of a Bombay field officer who is moving in the matter by presenting without delay a memorial to the Secretary of State for India, through the Military Secretary at the India Office, asking for the indulgence of a passage for himself or for his family, whenever there is room, upon payment of table money. Unless we are misinformed, there are, upon an average, from fifteen to twenty vacant berths in each troopship, so that no inconvenience or extra cost to the State would arise if this boon were extended to Indian officers. The saving would, of course, be considerable to each officer. When the Transport Rules were published no mention was made of the Indian officers, and the result is that the India Office authorities—however considerate for their officers—are unable to comply with the frequent and pressing appeals made to them. The privilege gives a saving of £50 a head, or thereabouts. Indian officers above the rank of lieutenant do not receive passages to or from India, but have to find their own from their own pocket. This is an invidious distinction between them and officers of the home Service. Officers would, perhaps, do well to press their claims while Parliament is sitting.

We (*Morning Post*) learn that Col. Sir Andrew Clarke, K.C.M.G., has drawn the attention of the Indian Government to the great importance of putting the strong places of Northern India into a more defensible and effective condition than they are at present. Nothing has been done in that direction since the mutiny, though measures for improving their state have been talked of freely at different times. The Minister of Public Works has also ordered details of the works to be prepared for the defence of Aden and Burmah, with the view of making those places independent of men-of-war. By this means her Majesty's ships would be free to cruise about, which would be a more useful employment than lying at anchor guarding these stations. Sir Andrew Clarke is said to be anxiously endeavouring to get money for these works at once, and also to push on with thedefences of Rawul Pindee. It is said that a committee of officers has been called upon to consider the state of the defences of Allahabad. These precautionary measures are quite necessary.

Brig.-Gen. C. P. Keyes, C.B., Madras S.C., will be permitted, says the *Pioneer*, to retain his command of the Punjab Frontier Force for a further period of six months. It has been considered unadvisable to dispense with the services of such an experienced officer in face of the present complications on the Peshawur frontier.

The *Times* correspondent telegraphs from Calcutta:—"Major Playfair, Bengal S.C., whose dismissal from the appointment of superintendent at Havareebaugh Penitentiary by Sir Richard Temple on a charge of altering the records, and whose subsequent trial and acquittal by court-martial I mentioned some months ago as being much talked of here, has been appointed a political agent of the second class—a tardy act of justice to an ill-used man."

In consequence of the deaths of Major-Gen. F. Maitland, Bengal Infantry, on Aug. 3, 1876, and Major-Gen. L. S. Hough, Bombay S.C., on Nov. 23, 1876, the name of Col. C. F. M. Mundy, Bengal S.C., and Col. G. Caulfeild, Bengal Infantry, are placed on the list of major-gens.; and those of Major C. H. S. Scott, Bengal S.C., and Major W. H. Mackesy, Bengal S.C., are placed on the list of lieut.-cols. on the Indian Gradation List.

The following promotions are made, subject to H.M.'s approval:—Capt. H. A. Shakespear, Bengal Cavalry, to be brevet major, with effect from Aug. 4, 1876, vice Major-Gen. F. Maitland, Bengal Infantry, deceased. Capt. H. M. Buller, Bengal Cavalry, to be 13th Major, from Nov. 24, 1876, vice Major-Gen. L. S. Hough, Bengal S.C., deceased.

Major C. M. Griffith, Bombay S.C., brigade-major at Nusseerabad, has been granted eight months' leave to England.

Capt. H. S. Higginson, Royal (late Bengal) Artillery, having passed the prescribed examination, has been confirmed, in his appointment as aide-de-camp to Major-Gen. C. T. Chamberlain, C.S.I., commanding the Oudh Division of the Bengal Army.

An account of the sum expended, compared with the sum granted, for the Army Purchase Commission in the year ended March 31, 1876, has been issued. The surplus to be surrendered is £145,837 19s. 11d., the grant having been £636,600, and the expenditure £490,762 0s. 1d. The surplus of £74,921 14s. 10d. shown in the account of the vote "Army Purchase Commission" for the year ending March 31, 1875, has been surrendered.

A telegram to the *Times*, dated Philadelphia, Feb. 25, says:—"An Army Appropriation Bill introduced into the House from the Appropriation Committee on Saturday reduces the Army to 17,000 men, reducing Cavalry regiments to eight, the Artillery to four, and the Infantry to sixteen. The Bill prohibits any money being used to maintain troops for supporting either State Government in Louisiana until Congress recognises the Government."

ROYAL CAMBRIDGE ASYLUM FOR SOLDIERS WIDOWS, KINGSTON, SURREY.
OFFICE: 40, Charing Cross, S.W.

This Asylum was opened in February, 1854, to provide a home for the widows of non-commissioned officers and privates of the Army.

There are 57 widows in the Asylum.

Each widow has a furnished room, and receives six shillings weekly, besides a monthly allowance of two shillings and sixpence for coals.

The funded income of the charity yields only £556, with an additional £50 from the Princess Mary's Fund for Nurses, to meet an estimated expenditure of £2,100 per annum.

An annual subscription of half-a-guinea, or a donation of five guineas, entitles to one vote at each election, with the right of nominating a candidate.

A regiment can purchase a vote in perpetuity by paying five guineas J. A. STEWART, Colonel, Secretary.

Office, 40, Charing Cross, S.W.

NOTICES TO CORRESPONDENTS.

No communications can be published which are not accompanied by the name of the writer, given in confidence to the EDITOR.

Letters cannot be received in answer to Advertisements.

Remittances should be made payable to Mr. RICHARD JAMES WOOD, to whom all business communications should be addressed.

PONTYPOOL.—Certainly he can.

A FOURTEEN YEARS' SUBSCRIBER.—We will not lose sight of the matter.

DEATH'S HEAD.—One, the 17th Lancers.

ROYAL.—We have referred to the subject.

Q. P.—Compelled to hold it over this week.

R. M. A.—Yes, in all probability, though you will not have to thank the doctor for it.

C. P. O.—It was very good of you to order so many copies in the event of your letter being inserted, but we must decline to be the medium for the circulation of such views.

ANXIOUS.—You will have to wait fully another fortnight.

Army & Navy Gazette.

LONDON, SATURDAY, MARCH 3, 1877.

On Tuesday last the *Times* contained an article on the Army Estimates, in which were these sentences:—"The public may, therefore, conclude that our Army is now, both in equipment and numbers, in such a condition as to need no exceptional expenditure to render it effective." And, again:—"On the whole, the Estimates bear witness at once to the sound condition of the Army, and to the vigilance of the military authorities, and we may face with greatly increased confidence any political anxieties which may await us." We shall not dissect an article which is a dissertation on the Estimates—not a critical examination of them—nor stop to inquire how the writer could prove that for "these charges we maintain a total effective force, &c., of which 61,593 are serving in India;" as if the Indian establishment expenses were not borne by the revenues of India. We feel it our solemn duty to warn the country, as far as our voice can reach it, that our Army is not in such a state as to enable us to face any anxiety which may await us with any confidence, except that officers and men will do their duty. We feel bound to tell the authorities—that which they know full well—no Army can be efficient of which the officers are discontented and the organization incomplete. No Army can be relied upon with confidence of which the Commissariat, the Transport, and the Medical Departments are in a state of "suppressed revolt." No Army can be relied upon with confidence of which the Reserve is only in an inchoate state, which consists largely of recruits, which has not its proper supply of non-commissioned officers, whose Artillery is undergoing change, and is armed with guns on different systems. No Army can be relied on with confidence over the heads of whose officers there is hanging a sword of Damocles, forged by a Royal Commission, the Report of which has unsettled their career and cast a black cloud over their prospects. To begin with the beginning—Is the Commander-in-Chief content? Does he accept with satisfaction the *rôle* which has been forced on him—the officer's friend—of striking them the heaviest blows and giving them the deepest discouragement? We have on record the expression of the Duke of Cambridge's opinions respecting the compulsory retirement of commanding officers of regiments, and the duty of selection which has been thrust down his throat. Are the Generals who have been menaced with the shelf, the Colonels, Majors, and Captains whose fate is in the hollow of Mr. Hardy's hand, quite joyous and grateful? Are the commanding officers satisfied with the recruits they receive? Do the number of desertions and the aggregate of the soldiers dismissed with disgrace tend to give confidence in the materials of which our Army is composed? Will the head of any one department say that the subordinates are without complaints? Sir W. Drake and Sir W. Muir would scarcely aver so much. The able head of our Artillery well knows that our field ordnance is not equal in weight of projectile and power to that of at least one great Continental Power, and, if we are to judge from pamphlets and letters, neither the Royal Artillery nor the Royal Engineers are satisfied. Well, it may be said that the Army always grumbles. So be it. But, granting we have 100,000 men, minus a certain quantity at home, and that we could face any anxiety abroad with a corps of 50,000 men—how Pall-Mall would pale at the demand!—is a reserve of 15,000 men one to which we can look with satisfaction? It may be said in former wars there was no reserve at all. But, then the soldiers were men—not boys—and they could be relied upon, and there were plenty of old soldiers in the ranks from whom gaps in the non-commissioned ranks could be filled with safety. All this is now changed. And as the Army of England has been diminishing in efficiency, the Armies of other nations have been increasing both in efficiency and in numbers. It is not our actual state, but our comparative state, which makes thoughtful men so serious in contemplating the possibility of our country being involved in hostilities, and till the comparison between our military forces and those of other Powers is more accurately adjusted any self-congratulation is assuredly premature.

From more than one point of view it appears questionable whether the intention of the Admiralty to fit out the Urgent for service as a receiving-ship at Port Royal is altogether wise. After the time and money that have been spent upon her, it may seem rather late in the day to be offering objections to her appropriation for this duty; but much still remains to be done before she will be ready, and there would be no difficulty in employing her as a harbour-ship at home if her orders for Jamaica should be cancelled. Glad as the officers and men of the Aboukir will be to get out of that old hulk, yet we know that they do not look with pleasure upon the prospect of serving in Port Royal Harbour, under a blazing sun, in an iron vessel. They have an idea that they will find her very much like an oven, radiating by night the heat of the sun's rays which have been absorbed by day, and in fact keeping her crew in a constant stew. It is said that the Rover, an iron corvette which has been employed in the West Indies, is a remarkably warm vessel, and though she cannot be called an unhealthy ship, yet her sick-list has maintained a high average. If this is to be attributed to her being of iron, the Urgent may be expected to be far worse, moored from year's end to year's end in harbour. Life at Port Royal is none of the cheeriest, under the best circumstances, and the double advantage of reducing the number employed at that place and effecting a considerable saving might be gained if the Admiralty saw fit to abolish the depôt ship. As far as the requirements of the port and yard are concerned, only some six officers and thirty men need be stationed there, and to provide permanent residence for them on shore, together with quarters of a more temporary nature for any influx of supernumeraries, or if necessary to land the crew of a ship, would not cost nearly as much as the fitting out of the Urgent, while the maintenance of that iron hulk in a state of repair will be far more costly than keeping a shore establishment in order. Had the Urgent retained her engines, it might reasonably be urged in her favour that she would be able to move to a colder climate in the event of an epidemic of yellow fever making its appearance, but as they have been removed she will be as stationary as a house with the disadvantage of being a floating one. Another expense attached to her is the number of boats supplied, and the complement of needless strength which is given her as a ship in commission. As regards the Commodore's flag, there would be no difficulty in flying that in the tender, so that the formality of having his pendent afloat might be observed. We feel convinced that the adoption of the idea here given would prove a real economy, and would further relieve a large number of officers and men from service in an unhealthy climate on board one of those expensive establishments, floating houses.

His Royal Highness the Prince of Wales honoured Captain the Marquis of Shrewsbury and the Corps of Gentlemen-at-Arms with his presence at dinner, at their Mess-room at St. James's Palace, last night.

This time twelvemonth, nearly, Sir Jung Bahadoor, G.C.B., was entertaining the Prince of Wales in the Terai of Nepal full of life and energy, and intent on showing his royal visitor all the sport that could be found in the finest hunting-grounds of the world. He was first and foremost in the field, indefatigable in the saddle—*acer, inexorabilis, impeger*—the slayer of nigh 700 tigers, and determined to kill at least 300 more. Once or twice he was indisposed in consequence of his exertions, and suffered a little from fever; but he seemed of iron constitution, and although he indulged somewhat in opium, was temperate, active, and hardy. The telegram which announces his death in the Terai gives us no particulars. It is to be feared that there will be a renewal of the factious contests which he put down with such effect some thirty years ago in Nepal.

Two officers—Captains J. Bourke, 29th Regiment, and E. R. Keough, half pay, late 14th Regiment—gazetted out of the Service on Friday last, have been granted, on retirement, the honorary rank of Major. Under what Warrant, we wonder, has this privilege been claimed? If it were made more generally known what the circumstances are under which honorary rank is accorded to retiring officers, there are many who would avail themselves of the privilege. A Militia officer on completing a given service retires with extra rank, and why should not the Regular?

The Brigade-Majorship of Cavalry at Aldershot may be expected to fall vacant ere long. Colonel Napier is retiring from the command of the Carabiniers, and it is understood that he will be succeeded by Major Fryer; so that Captain Salis-Schwabe will, no doubt, be promoted to the Majority. This would render him ineligible to retain his Staff appointment.

An officer of rank, quite incapable of making a joke on such a serious matter, writes from Delhi to a friend to say that "the bulk of the natives did not understand the proclamation ceremony at all. The general idea was that Barnes, the Herald, was the new Emperor, for the sex of the Kaiser-i-Hind is dubious, and the notion of the Empress-Queen has not penetrated their heads at all. They think there must be a husband—a Kaiser—living. Barnes certainly was the most prominent-looking person in the fantastic performance, which was quite out of accord with native feeling, and was certainly considered ludicrous by sensible Europeans." A letter from another officer by the same mail says:—"You must not pay the least regard to what Sir George Campbell says respecting the feelings of Mahometans in India on the Eastern Question. His experience of India was gathered in Lower Bengal, where there are very few Mussulmen. In the North-West, where the Mahometan element is large, the feeling is very strong, and the question is often asked, "Angregi logue humko kuch madad déwéngé?"—"Will the English people assist *us*"—(humko) not "will they assist *them?*" However, the value of Sir George Campbell's opinions on that point has been pretty well discounted here already.

It will be a source of satisfaction to Adjutants of Auxiliary Forces to learn that all doubt as to their pay, on handing over their appointments, on the expiration of their periods of appointment, has been set at rest. The officers will now draw full pay whilst remaining on the Supernumerary List the same as though they were on the establishment of their regiments.

An "ex-Adjutant" has written a smart little *brochure* on "Uniform, and How to Wear It," but he has not told us how "the figures" are to be provided in all cases—for the clothes to match. That is a small matter, however, for if the tailor does not always succeed in making the man, nature is generally pretty good-natured to the British Sub, and it is only when he developes into field rank that his proportions become exuberant. But what is *he* to the real old French Infantry Captain of twenty-five years' service? The pamphlet, which is published by Mitchell and Co., is really full of excellent matter. There is not a doubt that the Infantry officer does not "turn out" as he should, and that the Colonels of that arm are very lax in comparison with the commanding officers of Cavalry regiments. We join heart and hand with the "ex-Adjutant" in denouncing "the battered forage cap and shabby patrol jacket, dim scabbard, and tattered sword-knot," too often visible, and we most heartily recommend the work—if it can be called so, for it *is not* thirty pages in all—to our military readers as exceedingly well worthy of their perusal. It is crammed full of usefulness.

Some papers assert General Ignatieff is suffering from defective vision, and is making a tour to consult some eminent oculists. Other authorities say his object, in the round of visits the distinguished diplomatist is about to pay the Courts of Europe, is of a larger and less personal kind. At all events, we may be sure "he has something in his eye" wherever he goes.

Mounted police employed at the various stations are not in future to be borne on the establishment of the Cavalry regiments from which they are drawn, but will be formed into a separate corps, which will be referred to in all official documents as the Corps of Mounted Police. The corps numbers eight non-commissioned officers and sixty-seven men.

The post of Solicitor to the War Office has been abolished, and a "Legal Secretary to the Secretary of State for War" is substituted. This is, of course, but a change of title, for Mr. Clode continues a member of the War Office Staff.

"In Statu Quo," in a letter on the Army Medical Department, speaks of it as "once popular and contented." As we have fought the battles of the Army medical officers, we may be pardoned for asking our correspondent to indicate the exact period when the department could have been fairly styled "contented"? Certainly it must have been before the Crimean war. And when before?

The War Office has consented to allow the Secretary of the Royal Engineer Institution, Captain R. H. Vetch, R.E., the same extra rate of pay as is at present drawn by the Secretary of the kindred institution at Woolwich, viz., £128 per annum.

A small paper, about the size of one of our English halfpenny organ, has appeared in Paris, called *L'Echo de la Presse Etrangère.* Just fancy what a noise the child must make! The first number, however, deals with very uncertain sounds from a few very small voices, mostly of *la petite bourse.*

We beg to call the attention of the benevolent to a letter from the Rev. J. Mansfield which appears elsewhere under the heading of "A Sad Case of Distress." Surely a few pounds would be better employed in relieving such urgent needs than in helping Dr. Sandwith's rebellious and defeated clients, the Servians? We wonder what can have made that "excessive Christian" so very bitter against the Turks, among whom he won the only distinction he ever achieved? But for Kars there would have been no C.B. for Dr. Sandwith.

One of the youngest substantive Majors in the Army, Major Baillie, 52nd Light Infantry, who became a Major in less than nine years from the date of his entrance, was, we understand, among the candidates for a civil appointment the other day. It does not say much for the prospects of the British Army as a profession when men who have been so lucky are content to exchange their duties in it for those of a chief constable.

Major-General Lefroy's term as Governor of Bermuda expires next month.

Consequent on the reorganisation of the Royal Artillery, Brigade-Majors are to be added to Staff establishments as follows, viz., to the Northern District, South-Eastern District, Southern District, Western District, Dublin District, Cork District, Gibraltar and Malta. These appointments will absorb the whole of the Artillery Captains who are holders of the Staff College certificate.

Lieutenant-Colonel Brackenbury, in his lecture at the Royal United Service Institution, on Friday last, mentioned, among other works, as excellent guides to tactics, Hugo Helvig's "Taktische Beispiele," and also V. Armin's "Aus dem Tagebuche eines Compagnie Chefs." We understand that the former is in course of translation by Sir Lumley Graham. As regards the latter, it is a matter for satisfaction that it, also, will soon be forthcoming in an English dress. The author has generously presented to the Institution the right of translation, and an English version, by Major East, D.A.Q.M.G., will, therefore, be issued to members of the Institution at the beginning of April. The translation will form that portion of the journal which is now in each number devoted to foreign military intelligence.

REVIEWS.

Dispatches and Correspondence of Field-Marshal the Duke of Wellington, K.G. (John Murray.)

The recently-published volume of the Wellington dispatches, extending over the period which elapsed from July, 1829, to April, 1830, becomes exceptionally interesting from the light it throws upon the Eastern Question as it existed nearly half a century since. In the month of July, 1829, we find that considerable apprehension existed in the Duke's mind as to the increased demands that were likely to be made by Russia on the Porte, and the latter's total inability to resist them. Furthermore, in the Duke's opinion the direct interest of England was to prevent the extension of the Russian power in Asia. His estimate of the nature of the Russians of that period was, that they were harmless only when single-handed—that, if united with France, or either of the great German Powers, they became very formidable, and that, having the desire, not only as a nation, but as individuals, to mix themselves up as principals in every concern, having a real interest in none, they were the most inconvenient for England to deal with, on friendly terms, of any of the Powers of Europe. The circumstances connected with the retirement of Mr. Canning from Constantinople, and the appointment of Mr. Gordon, are fully stated in a dispatch of this period. The English Government were of opinion that the Greek frontier ought not to be extended much, if at all, beyond the Isthmus of Corinth. The Ambassadors, however, decided otherwise, and the two other contracting parties to the Treaty having adopted their recommendation, England agreed to make propositions to the Porte on the basis of the scheme recommended by the Ambassadors, stating, however, at the Conference, and placing upon the protocol, their opinion of what the limits of the Greek State ought to be. Mr. Gordon was sent to Constantinople with instructions to make propositions to the Porte on the basis of the recommendation of the Ambassadors. They were by no means to be regarded as an ultimatum, but, on the contrary, as stated in the protocol, the objections of the Porte were to be fairly considered, and were, together with the propositions of the Porte, to be sent to the Conference in London. It appears that the Duke was under the impression that Mr. Canning may have thought that the proposals to be made by Mr. Gordon were not to be pressed *bonâ fide*, in the first instance, on the Porte. It might be that the Porte would reject the propositions which the English and French Ambassadors were authorized to make. If so, a new state of things would arise, and in the discussions consequent upon the rejection of the propositions of the contracting parties to the Treaty, and in the consideration to be given to any counter-propositions that might be made by the Porte, the opinion formed and acted upon by Mr. Canning might prove seriously inconvenient, not only to him, but to the Government. These considerations, coupled with the prospect that in the progress of the negotiations the British Ambassador might, in the person of Mr. Canning, be called upon to urge opinions at variance with his own, alone influenced the Government in accepting his conditional resignation.

(*To be continued.*)

MAGAZINES.

Colburn's.

The current number of *Colburn* opens with an interesting article on "Army Administration and War Budget of France." Having accorded well-merited praise to the energy with which France resumed new strength in the face of calamities which seemed likely to strike her down for ever, the writer points out how the true cause of these disasters lay in the very essence of the institutions of that country, and how incumbent it is on those who wield the destinies of England to forefend such calamities by taking advantage of the experience of France. That experience forcibly points out that something more than valour and military efficiency is needed to preserve an empire, some new element—namely, the science of the organization of armies. The author then proceeds at considerable length to investigate the causes why this new science has acquired so decisive an influence on the results of the conflict of nations. The article is worthy of attentive perusal. Major R. E. Cane contributes an amusing sketch of German soldier-life, called "The Magazine Ghost." We find a continuation of Lieutenant Low's excellent "History of the Indian Navy," "Notes on the Services of the 54th Regiment," and some other readable articles.

Fraser.

Fraser for March opens with an exhaustive paper on "The Discipline and Seamanship in the Navy, Past and Present." Having dealt very fully with the charges so repeatedly made against the Navy of the present, pointing out the groundlessness of some and admitting the truth of others, the writer suggests remedies. The *personnel* of the Navy has not received sufficient consideration, and the officers are suffering from the vicious system of half pay and insufficient employment. This should be otherwise; moreover, many points of discipline which have remained unsettled for years require immediate attention from the governing body of the Navy. The question of naval barracks shows how matters of discipline in which the whole well-being of the Navy is concerned are shelved:—"There is, we believe, but one opinion as to their desirability, and, but for the expense, every Board of Admiralty for the last twenty years would have erected them." The article concludes with an extract from the report of Captain S. B. Luce, U.S.N., on the manning of the United States' Navy and Mercantile Marine, in which he says:—"Money can be raised by the State, and money will produce any number of craft, but money will not make sailors. Gold will not make a disciplined crew nor an experienced staff of officers, and what use are ships without the soul to command and the ready hand to obey? To collect, form, and train these should be the first solicitude of a great maritime Power, and it is the most important part of its task." It is not probable that many will question these assertions. There are several other articles of considerable merit in this number.

Baily.

Baily for this month is, as usual, pleasantly written. In "Our Van" will be found some particulars—interesting to sporting men—of Captain Little, the celebrated cross-country rider, who died recently. Some forty years ago he held a Cornetcy in the Royal Dragoon Guards, and in 1848 he won the Grand National at Liverpool, his mount being Chandler, reported as seventeen years of age. What rendered that event particularly interesting was that Curate, steered by Tom Oliver, Captain Little's coach, ran second, and was beaten by his pupil only by a head. In 1853 Captain Little won the Grand National a second time, his mount being the celebrated Peter Simple. There was a touching tribute to the memory of the subject of this notice in the *Daily Telegraph* a few days ago.

St. James's.

There is nothing in the present number of the *St. James's Magazine* requiring particular notice. Perhaps the best article is that entitled "Our Modern Poets," treating of Charles Kingsley and Arthur Clough. "A Chat About the Post Office" is pleasant reading.

Sleeplessness. By E. W. Allen.

Those who suffer from that terrible complaint "insomnia" may find some pleasure, if not profit, in reading the country clergyman's pamphlet on this subject. If the afflicted patient would follow only one-half of the advice given, no doubt he would find a change in his constitution which would puzzle him.

A NEW FORM OF WAR-VESSEL.

On Monday at a meeting held at the Royal United Service Institution, under the presidency of Admiral of the Fleet Sir H. Codrington, Mr. R. Griffiths, C.E., read a paper on "A New Form of Vessel for War Purposes." He said that when circular war-vessels came to be tried practically it was found that they required four times more steam power than ordinary vessels, and he had therefore endeavoured to design a ship to combine the advantages of a circular vessel and at the same time avoid the loss of speed. He had nearly arrived at the desired effect by making the immersed surface of an elongated form, and by fitting it with twin screws internally. The advantages gained by his improvements were protection against sinking, from leakage, ramming and torpedo attacks, powerful guns, speed, and protection to the propelling power. In ramming, the power of turning quickly was of great importance, and he proposed fitting his vessel with two sets of double engines and screws, each screw to be independent of the other, so as to enable the ship to turn rapidly. To provide against torpedoes, the outer parts of the vessel were divided into several watertight compartments, and, being used for coal bunkers, they would protect the centre part where the engines and boilers were placed from injury. Powerful guns could be placed in the circular part of the ship, which would occupy the centre of the vessel. The main deck would be plated with iron to resist the effects of bursting shells, and above the water-line he proposed to make the ship of wood like the old line-of-battle ships, so that shots from heavy guns would pass through her. He thought that in future naval actions guns would be found to be of very little use; but one thing was certain, that, provided 80 and 100-ton guns could be used effectively, the armour plating of ships of war all round was perfectly useless; but it might be desirable in ships fitted with screws at each end in tunnels to protect the bow with armour, as such ships could always keep the bow towards the enemy, whether advancing or retiring. As regarded speed, so much depended on the facility with which the ship could manœuvre that every attention should be paid to having the most powerful engines. The advantage of having four separate screws was that, unless required in cases of emergency, only one or two need be used at once, while, when required, four screws would enable the vessel to move with greater speed and greater facility. The necessity of protecting the propelling power was obvious, although it had been up to the present unaccountably neglected. His proposal was to place the screws in tunnels. The screw was the most vital part of the ship, and should be protected in every way, for should it be disabled in action, it would be admitted by every naval officer that he would then have no choice but to strike his flag or sink. The authorities would have to take upon themselves the responsibility for neglecting to apply the simple protection here proposed, should any of our costly ships be lost through the want of it; for most certainly that would happen, and the question would have to be answered at some future day. Mr. Griffiths, at the conclusion of his paper, exhibited models of his new form of war-vessel and explained it in detail.

FURNISH ON THE NEW HIRE SYSTEM.—The "New Hire System" is quite distinct from anything yet attempted. Houses furnished throughout. 20 Wholesale Houses to select goods from. "An excellent idea."—"Army and Navy Gazette." Prospectus, with Press opinions, post-free. General Furnishing Company—Offices. 9, Southampton-street, Strand.

The Navy.

GAZETTE.

ADMIRALTY, February 23, 1877.

In accordance with the provisions of H.M.'s Orders in Council of Aug. 1, 1860, July 9, 1864, and March 24, 1866, the undermentioned officer, having attained fifteen years' seniority as Commander, has been allowed to assume the rank and title of retired Captain from the 19th inst.:—Com. Alfred Prowse Hasler Helby.

February 24, 1877.

In accordance with the provisions of H.M.'s Order in Council of Feb. 22, 1870, Capt. David Spain has been placed on the Retired List of his rank from the 20th inst.

The following promotions have this day been made:—Com. the Hon. Victor Alexander Montagu to be Captain in H.M.'s Fleet. Lieut. Francis John Jeffrey Elliott to be Com. in H.M.'s Fleet.

In accordance with the provisions of H.M.'s Order in Council of Feb. 22, 1870, Fleet Surg. John Gray has been placed on the Retired List of his rank from this date.

February 28, 1877.

Royal Marines—Mr. Archibald Gell Cochran has been appointed to be a Lieut. in the Royal Marine Light Infantry; Feb. 1, 1877.

APPOINTMENTS.

Commanders—Edward Pilkington, to the Castor, vice Arthur C. Curtis, promoted; George Usborne, to be inspecting commander of the Coastguard at Moville, vice Pilkington; John E. Stokes, to the Dryad, vice King, promoted.

Lieutenants—Frank E. Hudson, to the Pembroke; Robert W. Davies, to the Endymion, for gunnery duties; Alfred Carpenter, to the Audacious; J. Baker, Andrew F. Baker, and George Pirie, to the Nassau, when recommissioned.

Sub-Lieutenant—E. P. Chapman, to the Nassau, for navigating duties.

ACTIVE, Com. Sir William N. W. Hewett, was in Simon's Bay on Jan. 29. Sir W. Hewett intended to transfer the command to Com. Sullivan on Feb. 1, and then leave for Table Bay, St. Helena, Ascension, Sierra Leone, and England.

ALEXANDRA, Capt. R. O'B. Fitzroy, flagship of Vice-Admiral G. P. Hornby, got up steam on Wednesday and proceeded on her six hours' trial, which proved very satisfactory, and she returned to her anchorage at Spithead. In reporting this trial, the *Hampshire Post* says:—"She commenced the first hour at a quarter to eleven, and the trial went on without a hitch of any kind until five o'clock, when it terminated. Two sorts of coal were used during the six runs, viz.: Nixon's steam navigation and the ordinary North country coal. The first gave an indicated power of 8,599·67 horses, or six hundred more than the contract; while the ship coal gave 8,088·32 as a result, which is also above the standard. This last result is of great importance, as showing what the engines are capable of doing under ordinary conditions. At the official trial, when the ship was not so deep in the water, and when the stoking was done by the Steam Reserve stokers at Sheerness, the power developed was 8,497·8 horses. The speed realised by the Alexandra on Wednesday was fifteen knots, the same as at the mile trial, notwithstanding her present greater dimensions. The machinery is by Messrs. Humphreys and Tennant, of Deptford, who have thus the credit of having engined the quickest ironclad in the Service. The amount of coal consumed during the six hours was 2½lbs. per indicated horse-power developed." Vice-Admiral Hornby went over from Portsmouth to Osborne on Tuesday, and had an audience of her Majesty.

ARAB, Com. F. S. Broughton, was to leave Rangoon on Jan. 24 for the Andaman Islands.

BARRACOUTA, Capt. Charles E. Stevens, which recently returned from the Australian Station, is under orders to pay off at Sheerness, where she was commissioned on March 10, 1873. The court of inquiry held at Portsmouth—consisting of Capt. Herbert, of the Excellent; Capt. Wilson. of the Thunderer; and Com. Pearson, of the Osborne, assisted by Mr. G. P. Martin, Deputy Judge Advocate of the Fleet—for the purpose of investigating certain charges brought by Capt. Stevens against one of the officers, was concluded on Saturday.

BULLFINCH, Com. R. M. Lloyd, sailed from Bermuda on Jan. 26, taking some men for the Bellerophon and the Zephyr.

COCKATRICE, Com. A. J. Musgrave, was out of the dockyard hands at Malta on Feb. 25.

COQUETTE, Lieut.-Com. E. Shirley, was in dock at Malta on Feb. 25.

CROCODILE, Capt. P. R. Sharpe, arrived at Suez on Feb. 28.

DAPHNE, Com. G. B. Evans. Her new crew arrived on Feb. 2, and she would be sent from Bombay to the Persian Gulf without loss of time.

DECOY, Lieut.-Com. J. Hayes, was paid off at Devonport on Wednesday into the Fourth Division of the Steam Reserve. The crew have been granted ten weeks' leave—eight weeks for having been over four years in commission, and two weeks for having taken part in the Ashantee war.

DEVASTATION, Capt. F. W. Richards, rejoined the flag on Feb. 17.

DIAMOND, Capt. G. S. Bosanquet, was to have left Zanzibar on Jan. 11, to cruise in the Mozambique Channel.

DUKE OF WELLINGTON, Capt. Hon. W. C. Carpenter, flagship of Admiral George Elliot. The testimonial on vellum of the Royal Humane Society has been given to W. Hill, A.B., of this ship, for saving the body of E. O'Neill, who had fallen overboard in Portsmouth Harbour, and through striking a lower deck port was insensible when he reached the water; he died after from the effects of the accident, which took place on Jan. 23.

ENCHANTRESS, Staff Com. E. H. Hills. In alluding to the extravagant statements circulated as to the cost of repairing this vessel, a correspondent of the *Hampshire Telegraph* says:—"It was quite right in supposing that the statement made as to the cost of repairing the Enchantress would be accepted as an instance of extravagant bungling, if allowed to go uncontradicted. On the same day as I made that remark a gentleman at Liverpool was penning a letter to the *Times*, pointing out that an iron vessel of the same dimensions and power could be built for about £30,000, and many builders would be glad of the job. It should not be forgotten that although the cost of the hull and the engines is put down at £45,000 in 1862, it would require a much larger sum to replace the Enchantress as she now is, for additional fittings and alterations in her interior arrangements have been made almost every time she has come into the hands of the dockyard authorities."

Fawn, Com. W. J. L. Wharton, was at Massowa on Dec. 22.

Flying Fish, Com. H. F. Crohan, arrived at Zanzibar on Jan. 7 from Tamatave.

Helicon, Lieut.-Com. Stopford, was at Malta on Feb. 25. She was to have sailed on the 17th for Athens, but her orders were countermanded. A court of inquiry was held on board on the 14th to investigate the cause of her touching ground the other day in the Gulf of Corinth. She received little or no damage.

Hercules, Capt. Bowden - Smith, flagship of Admiral Hon. Sir J. Drummond, arrived at Malta on Feb. 25, all well. Five midshipmen of the Hercules are reported to have been sent to hospital at Athens with measles, but the disease had not spread. The ship was about to have a theatrical entertainment, but the appearance of measles has prevented it.

Implacable, Com. C. E. Cardale. Mr. Henry Sanderson, ship's steward of this ship, died on Saturday after a few days' illness, and the commanding officer of the vessel expressed a desire that he should be buried with naval honours. The coffin was placed on a gun-carriage, drawn by petty officers of the ship, chief petty officers of deceased's rank acting as bearers, and besides the firing party and band there was a very numerous attendance from the ship, a lieutenant being in charge, and the paymaster and assistant-paymaster amongst the mourners. The service was read by the Rev. F. W. Nickoll, M.A., chaplain of this ship, and three volleys of blank cartridge were fired over the grave. The band played the "Dead March" in *Saul* on the way out, and "Tom Bowling" on returning.

Indus, Capt. Curme, flagship of Rear-Admiral Willes, Superintendent of Devonport Dockyard. Rear-Admiral G. O. Willes had a narrow escape from drowning on Saturday last. Having inspected the Emerald, 12, screw corvette, which had arrived from Pembroke, and while passing over the brow connecting the ship with the jetty, Admiral Willes tripped and fell from a height of 20ft. into the water, just missing a floating stage in his descent, which, if he had struck it, would have inflicted fatal injuries. Fortunately, the admiral is a good swimmer, and, although the tide was running very strong, he managed to reach one of the mooring chains, where he held on until picked up by a boat. Had Admiral Willes missed the mooring chain, he would have been swept by the under-current underneath the jetty, where it would have been impossible to save him. It is said that seven persons have been drowned within the last three years at the same spot, though able to swim. The *Western Daily Mercury* says:—"Much surprise is expressed by many engaged in the yard that several on board the ship who witnessed the accident, and are known to be good swimmers, were not promptly overboard to the admiral's assistance, although, as the result has fortunately proved, their services were not required. In view of a like accident happening to any persons less able to save themselves, orders have been given to increase the number of life buoys, lines, and hooks on the sea wall and the numerous jetties."

Jackal, Lieut.-Com. H. A. Digby, returned to Portree on Feb. 23 from St. Kilda, and would return to Greenock.

Jumna, Capt. J. D'Arcy, arrived at Bombay on Feb. 27.

Malabar, Capt. E. Kelly, sailed from Bombay on Feb. 27.

Orontes, Capt. E. H. Seymour, left Penang on Jan. 11 for Pulo Pankore, and arrived there early next morning, and embarked troops for Malacca, arriving there on Jan. 15, and having embarked the company of the 10th Regt. stationed there she left in the evening for Singapore, which place she reached on the 16th. The correspondent of the *Western Morning News* states that "she was to have sailed on the 25th, but owing to a considerable defect in the high-pressure piston her sailing is deferred *sine die*. I hear, however, that she will probably start about the 28th or 29th, which will be about a fortnight later than was expected when she sailed from England. The high-pressure piston is badly cracked and split, and it has been replaced by a spare one, and should that one give out during the passage home the Orontes will be some months before she reaches her destination."

Pallas, Capt. Beamish, arrived on Feb. 13 at the Piræus.

Philomel, Com. Henry H. Boys, was at Zanzibar, according to latest advices.

Raleigh, Capt. G. Tryon, C.B., arrived at Malta on Feb. 19.

Rifleman, Com. F. S. Clayton, was in the Persian Gulf by last accounts. The health of the crew was very good.

Ringdove, Com. U. C. Singleton, was to leave Malta about Feb. 26 for England.

Rover, Capt. T. Barnardiston, was docked at Bermuda on Jan. 31 to clean bottom and repair valves.

Rupert, Capt. H. J. Grubbe, C.B., arrived at Malta on Feb. 15. Her machinery is under examination.

Sheldrake, Lieut.-Com. J. B. Haye. The testimonial on vellum of the Royal Humane Society has been presented to Sub-Lieut. A. Lingham, and parchment to D. J. Shay, A.B., both of this ship, for saving three Chinamen who were upset from a canoe in the Straits of Malacca on Sept. 24, 1876, and the testimonial on vellum to Mr. J. Melrose, engineer of this ship, for saving H. J. Lacy, who was upset from a canoe in the Straits of Malacca on Oct. 3 last.

Spartan, Capt. R. E. Tracey, arrived at Zanzibar on Jan. 1, and would leave on the 15th for Bombay.

Sultan, Capt. H.R.H. the Duke of Edinburgh, arrived at Malta on Feb 15, and was docked the same day.

Swiftsure, Capt. J. K. Baird, was on passage to the Piræus from Salonica by last accounts, and will return to Salonica.

Tamar, Capt. Liddell, arrived at Spithead from Plymouth on Sunday and came into harbour. She is expected to leave for China with draughts on the 5th inst., having first called at Devonport. The new crews she takes out have been supplied with Martini-Henri rifles of the latest pattern, with spare parts and ammunition, in lieu of Snider rifles, whilst the Charybdis will be furnished with a 45-inch Gatling gun, also complete with spare parts, and 100 rounds of ammunition, together with an unarmoured ship's proportion of new pattern torpedo stores, and, in addition as a reserve, 250 detonators, No. 9. Passages have been granted to Capt. C. F. Hotham, and Lieuts. A. N. Moore and F. H. N. Harvey, of the Charybdis; Lieuts. D. Nicholls and H. S. F. Niblett, of the Modeste; Lieuts. A. B. Fulforde and F. I. D. Thomas, of the Hart; and F. D. S. Scott, of the Audacious. The new appointments are:—To Audacious, Paymr. A. De Denne (Duke of Wellington); Lieut. J. D. Deane (Charybdis); Sub.-Lieut. Baine (Modeste); Assist.-Paymr. W. Allman (Charybdis); E. C. Greenway, naval cadet; Assist.-Clerk W. J. Willoughby (Royal Adelaide); Gunner F. Lattimer (Excellent); Boatswain Throwgood (Asia); and T. Hector, carpenter. To Modeste—Paymr. H. M. Harrison (Royal Adelaide); Nav.-Lieut. J. G. Scott; Assist. Clerk J. H. F. Campion (Duke of Wellington); Gunner F. J. Nuthall (Excellent); Boatswain J. Beer (Asia). To Hart—Boatswain J. Appleton (Asia). To Sylvia—Paymr. N. D. Roberts; and Lieut. A. Havergal, now undergoing a course of gunnery in the Excellent. For the Nassau—Paymr. E. Hickson (Excellent).

Thetis, Capt. T. Le H. Ward. Orders were telegraphed on Jan. 30 for her to proceed to England, and she left Aden on Feb. 1. A letter from Suez, dated Feb. 17, says:—"The Thetis arrived here on the 15th inst., and will pass through the Canal as soon as possible, coaling at Port Said. She will proceed to Malta, where she is expected to arrive about March 1."

Tourmaline, Capt. F. W. Sullivan, C.B., arrived at Simon's Bay on Jan. 29.

Triumph, Capt. G. H. Parkin, flagship of Rear-Admiral Rice, was at the Piræus by last accounts. On Feb. 5 a court-martial was held on board for the trial of W. T. Piper, boatswain's mate of the ship, for theft. The prisoner was found guilty, and sentenced to be discharged from her Majesty's service with disgrace.

Undaunted, Capt. H. W. Brent, flagship of Vice-Admiral Sir R. Macdonald, was at Bombay on Feb. 8. The Admiral hoisted his flag at the fore on Jan. 30, on promotion.

Valiant, Capt. N. Salmon, V.C., arrived in Cork harbour on Friday. She had on board twenty cases of typhoid fever, which have been placed in the Haulbowline Hospital. There were already in the hospital twelve cases, which were brought round by tender, but are now convalescent. The Valiant was stationed at Foynes, and in consequence of the sickness on board was ordered to proceed to sea, with the view of stamping out the disease. She proceeded to Castletown, Berehaven, whence she arrived in Cork harbour.

Valorous, Capt. L. Jones, arrived at Sheerness on Monday, and was ordered to fill up at once with coal, and proceed to the Tyne with navigating party to bring two torpedo boats from that place to Sheerness. The correspondent of the *Western Morning News* says:—"Why the navigating party could not have been sent by rail, and the Valorous have gone from Grimsby to Shields, instead of steaming down here and back again—a matter of 300 miles—is incomprehensible to any but an official mind. The railway fares would have been about one-twentieth of the cost of the coal the Valorous will burn, besides which there would have been a great saving of time."

Wizard, Lieut.-Com. W. Neilson, returned to the Piræus on Feb. 17 from Syra with mails. She left the Piræus on the 12th for Syra, where she received the mails, and sailed again for the fleet on the 14th; but owing to a strong northerly gale she was compelled to take refuge, and anchor under the lee of one of the islands for two days, and the Monarch went in quest of her, some uneasiness being caused by her prolonged absence.

Wye, Staff-Com. W. W. Vine, returned at Malta on Feb. 18, and was docked on the 20th.

ADMIRALTY CIRCULAR.

The following Fleet Circular No. 3 (S.), dated 27th Jan., 1877, has been issued:—

"It being considered desirable that in ships having deep bilge-keels, provision should be made for placing in position the Service Collision Mats lately ordered to be provided, I am commanded by my Lords Commissioners of the Admiralty to acquaint you that orders have been given to the Home Dockyards, and to Malta, Bermuda, and Hong Kong Dockyards, to fit in all such ships, as they come in hand, hauling-down lines or chains which can be rove freely through holes cut in the webs of the bilge-keels, and have their upper ends secured so that they may readily be made available for placing in position the mats referred to.

"2. These hauling-down lines will be placed about 12 feet apart, over the length occupied by the engines and boilers, and passed under the keel from gunwale to gunwale.

"3. The lines need not be kept permanently in place, and arrangements will be made for stowing them in convenient positions on board; but the commanding officers of ships thus fitted, are to take care that these hauling-down lines are rove occasionally for practice.

"4. The commanding officers are also to take care that before going into action these lines are in place, ready for immediate use, if required.—By command of their Lordships,

"Robert Hall."

It is stated in *Truth* that evidence has been laid before the Arctic Commission showing that the atmosphere between decks in both ships of the late expedition to the Pole was foul. This arose from every cranny having been stuffed up through which fresh air might have entered. Actual figures prove that the air had attained a degree of contamination unknown in the most crowded dwellings of the poor.

It appears from the report of both officers and crews of the Arctic ships Alert and Discovery that the book of sea songs compiled by the Rev. W. Guise Tucker, late chaplain of Greenwich Hospital, was most extensively used for the promotion of the musical entertainments during their winter in the icy regions. We feel bound to say that the compiler and editor deserve the thanks of the Service for having produced a book of songs with music, the usefulness of which does not end in becoming popular, but produces a healthy tone of patriotism, loyalty, and morality.

Epps's Cocoa—Grateful and Comforting.—"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected cocoa, Mr. Epps has provided our breakfast tables with a delicately flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—*Civil Service Gazette*. Made Simply with Boiling Water or Milk.—Sold only in Packets labelled—"James Epps & Co., Homœopathic Chemists, London."

THE COLLEGE FOR NAVAL CADETS.

Mr. Ward Hunt, Lord Gilford, Mr. Shaw Lefevre, Admiral Wellesley, and Rear-Admiral Vansittart, arrived at Portsmouth on Tuesday, and, with the exception of Mr. Shaw Lefevre, proceeded in the Fire Queen, steam yacht, to the Isle of Wight, and, having visited Wootton, returned to London. The object of the visit is believed to be connected with the selection of the site for the proposed College for Naval Cadets.

In the report of the Committee appointed to report on the best site for the Cadets' College, it is remarked that whatever importance may be attached to the College being situated in close proximity to a naval dockyard, the Committee are strongly of opinion that the selection of any one of the sites available in the immediate vicinity of Portsmouth or Devonport yards would either subject the cadets to immoral temptations or involve the necessity of an entire alteration in the admirable system now in force in the Britannia of allowing them free range for exercise in the surrounding country. For this, as well as other reasons which would make these sites unsuitable, the Committee cannot recommend any of them. Hayling Island possesses no special recommendation, except its comparative seclusion. It is not near enough to Portsmouth Dockyard to benefit by any supposed advantages of proximity, and the small tidal harbours, though frequented by coasting vessels, are neither suitable for a training vessel nor for boating and bathing. The same may be said of Hill Head in regard to its proximity to Portsmouth Dockyard, and the absence of special recommendations, and there is no close harbour and little or no facility for boating and bathing. One site, near Poole, was generously offered by Sir Ivor Guest, but the Committee thought it wholly unsuitable. Another at Weymouth was deemed quite unsuitable, on account of the difficulty of boating in rough weather. Other sites had no good water supply; others no suitable bathing place. At last the Committee reduced the number to three—a site at Wootton, Isle of Wight, a site at Southampton Water, and Mount Boon, at Dartmouth. The first was in many respects the most attractive, as the Committee reported, "The Solent affords very superior advantages for the cruising of a training vessel, the benefit of which would be much more apparent in the event of the scheme of instruction embracing a more extended course of practical seamanship." In some respects, however, this site was deficient. There was found to be no good water supply; the sloping clay ground was considered unsuitable for the College buildings, and they would be exposed to the north-east winds. The site on Southampton Water was reported to be in all respects suitable for a Naval College, and if no better one had offered would have been selected. But that at Dartmouth was declared to be superior in all respects except climate. Speaking of the site at Mount Boon, the Committee said, "This estate forms part of a projecting mass of old red sandstone rock and shales belonging to the Devonian series, on the west side of the Dart, into which it juts for a short distance. The sides of the projection are steep, and covered with grass and wood down to the water's edge; and a little to the east, in the channel of the Dart, the Britannia and Hindostan are moored. About 200 feet above the water the ground slopes gently upwards to the westward, and ends in a nearly level plain about 265 feet above the water level, partly enclosed by woods. Further westward it rises to the height of 284 feet. On all sides the proposed site is sheltered by higher hills, and on the south-east it overlooks the town of Dartmouth and the opening of the Dart into the English Channel. The site is one of great natural beauty. The commanding Royal Engineer of the district was so good as to make an examination of the site by boring in four separate places to a depth of 3 feet 6 inches, and found it to consist of small stones overlying slate. The climate is a moist one. From information before the Committee, it appears that the average rain fall is 41·58 inches, which is greater than that of any other south-west site visited. Rain fell on 197 days in 1875. The means of drainage on all sides are ample. The best outlet for sewage would be into the Dart. Water from four sources in the neighbourhood of the site was submitted to analysis by the commanding Royal Engineer, with the result that, with one exception, a stream rising near Norton Damey, which had a slight vegetable contamination, all are remarkably pure and soft, so much so that care should be taken in collecting and distributing any of these waters to use iron pipes and tanks. The report of the commanding Royal Engineer shows that sufficient water can be obtained. The site is completely removed from the population. There are ample means of exercise in the adjacent countries. The facilities for bathing are not all that could be desired, but if a college were erected they might be extended and improved. The buildings could be so placed as to be sheltered from the north-east winds, and to face the mouth of the estuary, so as to receive the south-east winds. As there is no population close to the site there are no means of ascertaining death-rates, except for Dartsmouth and Kingswear, where the circumstances of the population are so different from that of any that might be placed upon the proposed site that no comparison could be instituted between them. The cadets have been remarkably healthy. At the time of our visit there was not a single case in hospital, and only one of the lads on the sick list, arising from boils. Except in the moisture of the climate, the Mount Boon site must be pronounced the finest we have seen for a cadet college, and may also be considered to be a perfectly healthy one, though not so invigorating for young lads destined to a sea life as might be desired."

On a review of the whole subject the Committee, subject to the remarks they have made as to the advantage of a position on the Solent, advised the selection of Mount Boon, at Dartmouth, as the site for the proposed College.

The *Official Gazette* of Berlin, in alluding to the despatch of an English man-of-war for the protection of German subjects who had suffered ill-treatment in Nicaragua, remarks that "the readiness with which England intervened with her naval power in behalf of Germans at a place where German ships of war were not immediately available, is worthy of all our thanks. The principle of solidarity between friendly Powers with regard to the mutual protection of their subjects in distant lands has been again confirmed."

Rossetter's Hair Restorer.—This unrivalled preparation has now been before the public for many years, and as its success has led to several spurious imitations, the public should be on their guard. Rossetter's preparation is the only one that will with certainty restore grey hair to its original colour, remove dandruff, prevent the hair from falling off, promote its growth, and give it the lustre of youth.

PAY OF WARRANT OFFICERS.

The following is a statement of the disadvantage under which warrant officers now feel themselves placed in comparison with all other officers :—

On the first perusal of the Order in Council of August 12, 1875 (although observing the fact that an old grievance had been re-established by placing sea-service warrant officers upon reduced or harbour pay, while serving at home), the scheme was received as a most liberal one; but on finding by the subsequent official interpretation put upon it that the term "other ships" is meant to embrace all ships not upon foreign stations or in the Channel Squadron, the warrant officers feel they are placed in a very anomalous position as compared with all other officers who receive full pay while serving.

They humbly and respectfully submit that the duties of warrant officers serving in "other ships" are in most cases as onerous as are those of the officers serving upon foreign stations, as instanced by the following examples :—

1. Warrant officers serving in the ships of the first reserve and their tenders :—The duties of these officers are more or less peculiar, according to circumstances, but at all times important, which we may confidently leave to the testimony of the captains commanding those ships. A short period also of each year in a first reserve ship is served at sea.

2. Warrant officers appointed for service in ships fitting for commission :—The duties of these officers are the same now as they have been from time immemorial. Drawing and stowage of ships' stores, attending to the fitments of the ship under the captain and officers of the steam reserve, to whom they are responsible, and afterwards to the captain of the ship, on her being commissioned, for the efficiency of their respective departments.

3. Warrant officers appointed to commissioned ships in harbour—*i.e.*, flag and steam reserve guard-ships :—The officers, as a rule, are appointed to those ships as a reward for long and meritorious services. The number of men continually passing through them, the superintendence of their employment while there, added to which the charge of the stores for the use of the non-commissioned ships and the tenders, entail sufficient work to entitle them to full pay, and to recommend them to the favourable consideration of the Admiralty for the same.

4. Warrant officers requalifying in the gunnery ships, or doing duty in their tenders.

5. Warrant officers serving in the several training ships :—The duties of these officers are equal to any they have to perform when serving on a foreign station.

6. Warrant officers who are appointed for service with the pensioner working parties in the dockyards :—The claim for favourable consideration in the case of these officers is respectfully left for recommendation in the hands of the respective captains, &c., under whom they are serving.

7. The remaining warrant officers who are awaiting appointment :—The duties performed by those officers are various, in carrying out the general routine of the Steam Reserves. They are also subject to "call" for immediate active service, sometimes with only a few hours' notice, to proceed upon foreign service.

In conclusion, the warrant officers, in common with all other ranks, look upon a turn of home service as a legitimate claim, and as necessary to recruit health injured in unhealthy and tropical climates.

A home appointment is looked upon as a reward for long and meritorious service at sea.

Officers have no option as to service.

They are compelled to serve where they are ordered.

In some cases it thus becomes a positive punishment to keep an officer on reduced or "other ships" pay.

The official interpretation put upon what constitutes "other ships," places nearly two-thirds of the warrant officers of the Navy on a reduced scale of pay, and such treatment they most respectfully submit they do not deserve.

A circular has been issued directing that seamen gunners on returning to a gunnery-ship will be required to go through a re-qualifying course according to the time they have been absent; but such re-qualification will not necessitate re-engagement unless they have been absent from a gunnery-ship three years and upwards. In the event of seamen gunners declining to re-engage after being three or more years absent from a gunnery-ship, they are to go through the gunnery course approved for men absent over one year and less than three, at the expiration of their leave, and are to be drafted to sea-going ships to complete their time.

The members of the Junior Naval and Military Club are to be congratulated in having escaped the unhappiness of being burnt out of their house at the beginning of the season. The fire was fortunately discovered before it had gained any hold, and a bath-room was the only part affected. The outbreak was caused by a ventilating shaft having been ingeniously utilized as a flue without taking the precaution to remove some wooden beams.

Letters for the Detached Squadron should be sent by the mails made up in London this evening and on March 23, addressed to St. Vincent, Cape de Verde, *viâ* Southampton.

At the regular meeting of the Wanderers' Lodge, No. 1,604, at Freemasons' Hall, Great Queen-street, W.C., on the 13th ult., Capts. R. Vivian, Lord Francis Gordon-Lennox, W. E. Montgomery, and Fred. L. Campbell, Scots Fusilier Guards, and Capt. Lord Algernon C. Gordon-Lennox, Grenadier Guards, were initiated into Freemasonry by the Worshipful Master, Sergt.-Major G. D. Roe, R.E., who attended from Dublin for the purpose. Several more officers were proposed, and a grant was unanimously voted to the Royal Masonic Institution for Aged Freemasons. The Wanderers' Lodge is composed of military men alone, and although only consecrated by the Grand Secretary in March last, now numbers over eighty subscribing members, a most unprecedented success, which will, doubtless, be hailed with delight by the members of the craft in the Services.

Oughterard, according to the *Irish Times*, will be occupied again as a military post during the coming summer, and arrangements are now in progress for the purpose of putting the barracks in good order. The detachment will be furnished by the regiment, which may be stationed at Athlone at the time.

The *Standard* states that "the War Office has decided no longer to maintain the Magnetical and Meteorological Institution at Kew. The saving thus effected will be £458 per annum."

The London Fine Art Association has been formed to supply the public with copies of old engravings. Subscribers of this gazette will be entitled, upon paying the small price charged, to receive a copy of Burnett's engraving of the late David Wilkie's painting, entitled "The Chelsea Pensioners," which forms an admirable companion to Wilkie's other pictures, such as "The Rent Day" and "The Blind Fiddler."

MEDICAL BOARDS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I trust the following acts of injustice may plead my excuse for trespassing on your valuable space. My son went up for examination for the Army on July 3, 1876. In accordance with the usual practice, he had been previously examined by a medical officer at Burlington House. After proceeding with his examination for six days he received an intimation from one of the Civil examiners that he had been rejected on medical grounds. On inquiry at the Horse Guards, I received an official notice that such was the case, and at once applied for a special medical board, which was granted, and before which my son appeared on July 13, the result being that in addition to the confirmation of the former opinion, that he had heart-disease, curvature of the spine was detected, and alleged as a new ground for disqualification. Knowing my son to be a young man of more than ordinary strength and endurance, I was somewhat surprised at this judgment, and had him examined by my family physician, who reported very favourably indeed upon his physique and general state of health. Here was a direct conflict of opinion, and I determined to take him to a medical man, who, by his position and experience, should be above the suspicion of partiality, and unlikely to make a mistake. Sir William Gull could not discover what was so very patent to the medical officers, and declared him to be fit for the most active life. I transmitted the letter containing this opinion to the authorities, when permission was granted to my son to present himself again as a candidate for the Army in November. At this point the powers that be were not quite so cautious in their behaviour as they had hitherto been. They actually allowed a medical officer to make an impartial examination, and my son was there and then passed as fit. This *faux pas*, however, was speedily retraced. The very-much-examined candidate was to go through the ordeal again. He was just leaving the room when he was stopped by a medical officer, who inquired his name, and, upon learning it, produced Sir William Gull's certificate, stating that he had special orders to look into his case. Then the process recommenced, and the end of it was, the two gentlemen had a discussion, not to say a disagreement, the one maintaining the opinion he had previously expressed, that my son was fit, the new-comer the contrary. With all humility, I submit that the point at issue was whether the blunder was to be sustained, or whether the etiquette of the profession was for once to yield place to honesty, seeing that the whole prospects of an honourable career were in the balance. To any one who understands how rigid are the courtesies of this non-combatant branch of the Service, the result can be no cause of astonishment—he was again rejected. Myself an officer of many years' service, I wished to give all credit to the medical officers for straightforward judgment, and thought that perhaps the family physician and Sir William Gull, with all his experience, might be mistaken. With the view of satisfying myself, I resolved to take the opinion of Sir James Paget, who, after making a most minute examination of the young man, corroborated the opinion of Sir William Gull, declaring that he had neither heart disease nor curvature of the spine, and that he was fit for any, even the most active, manner of life. This certificate was duly forwarded to the Horse Guards, and by them transmitted to the Director-General for his comments, but the military authorities declined further to entertain the case, informing me that the decision of the board must be adhered to. This was the end. Now, I would ask any impartial man, on the facts as I have above stated them, whether he would not come to the conclusion that the prospects of my son have been sacrificed on the altar of professional etiquette, that one mistake has led to many; that, in fact, the incapacity of the first board has resulted in the stultification of many? Beyond the personal resentment that I cannot help feeling, I think it to be my duty to lay the case before the public, that parents who intend presenting their sons for examination for the Army may take warning by this example of the treatment they may expect, and I say—more than that—the nation has a right to require that its institutions shall be above suspicion. For the last ten years my son has never had a day's illness, and has led a most active life, of which I informed the authorities. Thus, on one side we have ranged a fact which cannot be a matter of opinion, the unhesitating certificates of two of the most eminent practitioners in London—Sir William Gull, Sir James Paget, and the family physician; on the other side a board, supported by a board, confirmed by a third board, which was divided in itself. Apologizing for the length of this letter, I am, &c.,

A LIEUTENANT-COLONEL OF TWENTY-EIGHT YEARS' SERVICE.

SIR,—Mr. Hardy stated the other day in the House of Commons that he did not think that, "under the circumstances," fifty-six candidates was a small number. If, instead of a system of departmentalism, regimental appointments were to be offered to medical officers in the Army, Mr. Hardy would have found that a much larger number of candidates would have been forthcoming. He may rest assured that as long as his "ten years' scheme" is entwined by existing circumstances men will not present themselves in anything like a number to constitute competition, nor even to fill the gaps of the attenuated department. The "real" cause of the unpopularity of the service is not the short-service scheme, but the loss of prestige, position, comfort, and fair treatment which recent maladministration and the removal of medical officers from corps have inflicted on the officers of a once popular and contented department. It is not too late to retract, and before this session is far advanced it is hoped that the combatant officers may be listened to, and the claims of the "old *régime*" be fairly reconsidered.—I am, &c.,

Feb. 21, 1877. IN STATU QUO.

The forty-sixth anniversary meeting of the Royal United Service Institution will be held in the theatre of the institution on Saturday, March 3. The chair will be taken by the Right Hon. Gathorne Hardy, M.P., Secretary of State for War, at noon precisely, when the gold medal will be presented to the writer of the prize essay on the "Causes which have led to the Pre-eminence of Nations in War."

The Woolwich correspondent of the *Times* says :—"The number of soldiers charged by civil process at Woolwich last year with fraudulent enlistment was seventy-four, of which number sixty-nine were convicted and sentenced to various terms of imprisonment."

The Army Gazette.

WAR OFFICE, PALL MALL, FEBRUARY 27, 1877.

Chaplains' Department—Chaplain of the Fourth Class the Rev. George Mead, M.A., to be Chaplain of the Third Class; Feb. 10, 1877.

The Militia Gazette.

WAR OFFICE, MARCH 2, 1877.

Where not otherwise specified, the following commissions and announcements bear date March 3, 1877 :—

Bedford—Lister Sunderland, gent., to be Sub-Lieut. (Supy.); Feb. 26, 1877.

1st Royal Cheshire—Sub-Lieut. C. F. de Lys Eardley-Wilmot, from the 5th Royal Middlesex Militia, to be Sub-Lieut.

2nd Royal Cheshire—Lieut. G. Moore, from the Royal Westmoreland Militia, to be Lieut.

Royal Cumberland—St. George Henry, Earl of Lonsdale, to be Honorary Col. Christopher Montague Blackett, gent., to be Sub-Lieut. (Supy.).

1st Derby—Major and Hon. Lieut.-Col. A. Mosley to be Lieut.-Col. Lieut. A. S. Coke resigns commission.

2nd Durham—Lieut. E. Scarth resigns commission.

Royal South Gloucester—John Langford Probyn, gent., to be Sub-Lieut. (Supy.).; Feb. 26, 1877.

Hereford—Herbert Ramsay Feilden, gent., to be Sub-Lieut. (Supy.).

West Kent—Lieut.-Col. M. D. Treherne to be Lieut.-Col. Commandant. Major C. Larking to be Lieut.-Col. Sub-Lieut. J. J. Parland resigns commission.

2nd Royal Lancashire—Capt. G. C. Bancroft to be Major.

4th Boyal Lancashire—Spencer Broadbent, gent., to be Sub-Lieut. (Supy.).

Leicester—Lieut. F. G. Fowke to be Capt.

2nd, or East Norfolk—Lieut. F. C. N. Knox resigns commission; June 24, 1876.

The Prince of Wales's Own Norfolk Artillery—Major R. S. Bedingfeld is granted the hon. rank of Lieut.-Col. Edwin Alfred Hervey Alderson, gent., to be Sub-Lieut. (Supy.).

The (King's Own) 1st Stafford—Capt. A. W. Stapleton resigns commission.

2nd Warwick—Alexander John Bond Redmayne, gent., to be Sub-Lieut. (Supy.).

Royal Westmoreland—Charles Greenwood, gent., to be Sub-Lieut. (Supy.).

1st West York—Lieut. A. Walmesley resigns commission.

2nd West York—The Hon. Charles Cathcart to be Lieut. (Supy.).

6th West York—Frank James Norvel Maitland, gent., to be Sub-Lieut.

Edinburgh Artillery—John Proudfoot Dick, gent., to be Sub-Lieut.

1st Royal Lanark—Robert Blake Finnie, gent., to be Sub-Lieut.

West Cork Artillery—Edward Sylvester Gillman, gent., to be Sub-Lieut.

Royal North Down—Alexander McDonnell Moore, gent., to be Sub-Lieut.

Galway—Major J. A. B. Daly to be Lieut.-Col.

Royal Limerick County—Sub-Lieut. T. B. Baker resigns commission. Godrey Massy Hunt, gent., to be Sub-Lieut. (Supy.).

Limerick City Artillery—Lieut. W. C. Hare resigns commission.

YEOMANRY CAVALRY.

Ayrshire—Surg. J. Ronald resigns commission.

Buckinghamshire—Major W. Levi resigns commission, also is permitted to retain his rank and to continue to wear the uniform of the regiment on his retirement; Capt. G. Morgan to be Major; Capt. P. C. Lovett resigns commission; Lieut. J. Poynter to be Capt.; Sub-Lieut. J. F. H. Harter to be Lieut.; Jan. 23, 1875.

Royal 1st Devon—Lieut.-Col. Commandant Sir T. J. B. Duckworth, Bart., resigns commission; Sir J. T. B. Duckworth, Bart., late Lieut.-Col. Commandant, to be Hon. Col.

Nottinghamshire (Sherwood Rangers)—Capt. W. F. Webb resigns commission.

ARMY MEDICAL DEPARTMENT.

The following is a list of gentlemen who were successful at the examination for appointments in her Majesty's Army Medical Service, held at the University of London on February 12, 1877 :—

Merit.	Marks.	Merit.	Marks.
1. Mullen, J. J.	2,623	10. Hogan, E. M. A.	1,781
2. Murphy, F. H. S.	2,353	11. Ellis, P. M.	1,770
3. De Caux, T.	2,210	12. Kearney, T.	1,705
4. Johnston, W. F....	2,011	13. Kenny, W. J. ...	1,645
5. Hodson, R. D. ...	1,995	14. Irwin, A.	1,550
6. Armstrong, J. ...	1,945	15. O'Sullivan, P. J.	1,521
7. Kirkpatrick, H. C.	1,886	16. M'Carthy, W. ...	1,465
8. Browne, A. W....	1,875	17. Brodie, J. F.......	1,290
9. Powell, C. R.	1,808		

The *Irish Times* states that "the preliminary examinations heretofore held immediately before the half-yearly competitions will be held also in April and May. Failure at one of these examinations will not be counted as failure at one of the three trials allowed to a candidate; and—most important of all to Irish candidates—these examinations will be held in Dublin."

The following officers have taken passage to India, on appointment, in H.M.S. Euphrates, viz. :—Sub-Lieuts. Greenwood, 10th Hussars; Stayner and Sherrard, 5th Foot; Currie, 6th Foot; Georges, 9th Foot; Mackenzie, Scudamore, and Ashby, 12th Foot; Aspinall, 15th Foot; MacDonell, 16th Foot; Shaw and Whittuck, 17th Foot; Simpson, 18th Foot; Stevens, 21st Foot; Huggins, 34th Foot; Schnieder, 39th Foot; Eardley-Wilmot and Maxwell, 40th Foot; Mockler, 43rd Foot; Melvill, 44th Foot; Prior, 54th Foot; Gordon and Atkinson, 59th Foot; Francis and Watson, 62nd Foot; Foss, 63rd Foot; Iremonger, 65th Foot; Fitzgerald, 66th Foot; Evans-Gordon, 67th Foot; Beresford and Noel, 68th Foot; Clark-Kennedy and Purvis, 70th Foot; Scallon, 72nd Foot; Inglis, 73rd Foot; Weston and Knox, 85th Foot; Jervis, 89th Foot; Sedden, 92nd Foot; and Biggs, 109th Foot.

STATIONS OF THE BRITISH ARMY.

[Where two places are mentioned, the last-named is that at which the depôt is stationed.]

Corrected up to March 3.

	Year in which the corps last went on or returned from foreign service.	*Foreign Station to or from which it last changed.*

COLONIAL CORPS.

1st West India Regt.—Sierra Leone
2nd—Jamaica
Malta Fencibles—Malta

ARMY SERVICE CORPS

Head-quarters—109, Victoria-street, Westminster.

THE GUARDS' STOCK-PURSE.

The *Times* states that "a committee, consisting of some of the senior officers of the Guards and financial officials, was appointed last year to investigate and report upon what is known as the 'Stock-purse System' of the Guards, under which a lump sum has been voted to the officers out of which to defray the recruiting and hospital and other incidental expenses of their regiments and retain the balance as an addition to their pay. The result has been a change in the system. In the Army Estimates the charges made against the Stock-purse Fund for recruiting and hospital services, &c., will in future be charged against the general votes properly applicable to those items, while the sums hitherto received by the officers as part of their emoluments will be voted under the head of extra pay."

RECRUITING.

The following General Order has been issued:—"Until further orders no men are to be enlisted into the Army over twenty-five years of age. The minimum standard of recruits for the Royal Engineers (Sappers) is raised from 5ft. 5½in. to 5ft. 6in. General Orders 44, 56, and 97 of 1875 are hereby cancelled, and so much of Section 2 (Conditions of Enlistment) of Appendix F to General Order 73 of that year as directs that 'short service' gunner recruits for the Royal Artillery, Sapper recruits for the Royal Engineers, and 'short service' recruits for the Brigade of Foot Guards and for the Infantry of the Line may be taken up to thirty years of age, will be amended accordingly. The gratuity of £1 granted by Clauses 78 and 95, Army Circulars, 1876, to Militiamen volunteering for service as privates in the Brigade of Foot Guards, or as gunners in the Royal Artillery, will be discontinued on and after March 1, 1877. Clauses 78 and 95, Army Circulars, 1876, are hereby cancelled."

The Queen has been pleased to appoint Col. Laffan, Royal Engineers, to the Governorship of Bermuda, which will shortly become vacant by the retirement of Major-Gen. J. H. Lefroy, C.B., Royal Artillery. Dr. Gouldsbury, C.M.G., has also been appointed to be Administrator of the Gambia."

The German Army Estimates for the coming year have just been published. They form a bulky volume of 432 pages. The figures refer to all Germany with the exception of Bavaria. For Prussia alone the estimated ordinary expenditure amounts to 249,843,770 marks, which is 7,629,837 marks in excess of last year's vote. The extraordinary expenditure is placed at 11,543,760 marks, which is 5,130,096 marks more than last year. The new expenditure proposed includes the cost of an additional brigade depôt to be established at Berlin as the nucleus of a new brigade of Landwehr; also the pay of 105 captains of the first class, who are to be added to the "Army List," and an augmentation of salaries of regimental surgeons, besides some minor items. The ordinary expenditure in Saxony is estimated at 18,899,783 marks, the extraordinary at 263,056 marks. For Wurtemburg the corresponding figures are 13,659,657 marks and 233,699 marks.

COMMISSARIAT DEPARTMENT.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—You give prominence in your last issue to a statement of the grievances of which "old" Commissariat officers complain. That statement contains jealous and invidious comparisons as to officers of other "old" departments, which I am sure the "old" Commissariat officers will be the first to feel should never have found expression, and which, when examined, as they will be in due course at the War Office, will be found so utterly erroneous, both in construction and deductions, that they will prove damaging only to the framers. It is worse than folly for "old" Commissariat officers to blind themselves, and to try to blind the authorities, as they have done in this statement, to the fact that amalgamation into Control saved, *just in time*, the reduction of very large numbers in their higher ranks, which would have taken place *with absolute certainty* had the "old" departments remained separate, by the reduction which took place in 1869-70-71 in the military establishments in the Colonies. Silence regarding these invidious comparisons would have been taken as confirmatory of their accuracy, or I would fain not have taken up my pen even to notice them. I would rather appeal to "old" Commissariat officers to withdraw as speedily as possible their statement of grievances from official criticism and consideration, and, instead, to take such steps as will result in a scheme being brought before the Secretary of State which will redress grievances of *all* officers in the new Commissariat and Transport Departments, as well as re-organize the Department in a manner which would enable it to perform *efficiently* its important duties, which it certainly cannot now do. The condition of the Supply Services of the Army, as regards organization and almost everything which is necessary to efficiency, is indeed most lamentable. This state of things is directly the result of self-interest outside the department which has tinkered at it, and with it, during the last seven years, in such a way as positively to create, instead of to dissolve, causes of dissension between the several cadres of "old" officers, thus preventing the department from becoming a homogeneous whole. To end this disastrous manipulation, which is at this very moment being carried on in schemes of re-organization reported on by a committee, three-fifths of whose members have not the slightest practical experience of military organization or requirements, let the department itself endeavour to become homogeneous. This can be done; and I venture to say, if Mr. Hardy and Lord Eustace Cecil would at once appoint a committee of three general officers not holding, but who have held, commands, and who are not on staff employ, and associate with them the Accountant-general of the Army, who is versed in supersession (the main grievance common to all Commissariat and Ordnance officers), as having been secretary of the Indian Colonels' Supersession Royal Commission, together with a high official of the Treasury for financial purposes; and if notice were given that this committee would be prepared, on the 1st May next, to receive oral and documentary evidence of grievances from officers of the late Control Departments to the extent of not more than three or four cadre; also any schemes, not exceeding one from each cadre, for the redress of such grievances, and the re-organisation of the departments, there would, I believe, be efficient Commissariat and Ordnance departments before next Christmas, an object which, under existing circumstances, seems likely only to be attainable after some crowning disaster has overtaken the British Army.—I have the honour to be, Sir, your obedient servant,

L'UNION FAIT LA FORCE.

ADJUTANTS OF AUXILIARY FORCES.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—The paragraph in your last impression relative to the case of Capt. Singleton, who has been placed on half pay, on the completion of his five years as adjutant in the Auxiliary Forces, touches upon a question of very great importance, for it opens out a new condition in connection with these appointments. Until the case above referred to, and which I think is the first under the new system, officers were under the impression that adjutants in the Auxiliary Forces would, at the expiration of their five years, return at once to do duty with their regiment on full pay, and continue to serve on full pay until their steps were absorbed. In fact, they thought they would be on an equal footing with those officers who return to their regiments from Staff employ. To put men upon half pay is simply ruination to about nine out of every ten who accept the appointment; and if the War Office intended this from the beginning, it should have been clearly stated, for now the men so employed have been got under false impressions, to say the least. I hope, sir, you will ventilate this subject, in order that the authorities may be induced to declare their intentions in the matter. I imagine few officers will, in future, accept these appointments, when they know for certain that at the end of their five years they will be placed on half pay for an indefinite time.—Yours, &c.,

H.

ERRATUM.—By a printer's error the word "no" was inserted before the word "modification" in an article on Honorary Colonelcies last week. It is a potent monosyllable in the wrong place.

BIRTH.

PARSONS.—Feb. 26, at 2, Norwood Villa, Woburn Road, Bedford, the wife of Captain Geo. Parsons, R.N., of a daughter.

Advertisements.

THEATRE ROYAL DRURY LANE.—Every evening, THE FORTY THIEVES. The Vokes Family. Premiere danseuse, Mdlle. Bossi. Double Harlequinade: Clowns, C. Lauri and F. Evans. Preceded by BOX AND COX. The SEANCE, by the Polytechnic Medium. The TALKING LION, &c., by Mr. James Matthews. The GIANT CHRISTMAS TREE. Admission to the whole, 1s.; Schools and Children under 10 years, 6d. Open from 12 till 5 and 7 till 10.

INSTITUTION OF NAVAL ARCHITECTS.—The ANNUAL MEETINGS for 1877 of the INSTITUTE of NAVAL ARCHITECTS will take place on THURSDAY, FRIDAY, and SATURDAY, the 22nd, 23rd, and 24th March. They will be held, by permission of the Council of the Society of Arts, in the Hall of that Society, John Street, Adelphi. There will be morning meetings each day at Twelve, and evening meetings on Thursday and Friday at Seven.

Papers on the Principles of Naval Construction, on Practical Shipbuilding, on the Construction, Armour, and Armament of Ships of War, on the Mercantile Marine, and on Marine Engineering, will be read at the meetings.

A. SEDGWICK WOOLLEY, Secretary.
20, John Street, Adelphi, London, W.C.

ROYAL NATIONAL LIFEBOAT INSTITUTION.—The ANNUAL GENERAL MEETING of this Institution will be held at WILLIS'S ROOMS, King Street, St James's Square, on THURSDAY, the 15th inst., at Three o'clock precisely. His Grace the Duke of Northumberland, P.C., President of the Institution, in the Chair.

RICHARD LEWIS.
14, John Street, Adelphi, March 1st.

TO CANDIDATES for WOOLWICH and SANDHURST.
MILITARY EDUCATION IN GERMANY.

COLONEL BERDOE A. WILKINSON, Retired Full Pay Royal Engineers, being about to reside in HESSE DARMDALT, proposes to receive Pupils to Educate for the Army. They will have the advantage of preparing for the Examinations under the superintendence of an officer of long service, assisted by competent masters, and, at the same time, of acquiring a colloquial knowledge of the German language.

Address,
Colonel B. A. WILKINSON, late R.E.,
Care of Messrs. Cox and Co., Craig's Court, London.

ROYAL ARTILLERY AND ROYAL, ENGINEER CLUB,

WILLIAM NICHOLLS, 21, TICHBORNE STREET, REGENT CIRCUS, PICCADILLY.

MESSMAN WANTED for Battalion of Guards quartered at Tower of London. Applications in writing, with copies of testimonials, to be sent to the Field Officer in Brigade Waiting, Horse Guards, S.W.

PARTNER WANTED (a gentleman having influential connections preferred) to act as editor for a monthly statistical publication, and to invest £2,000 or £3,000. Terms and particulars on application, by letter only, to the Dr. Johnson's Press, 2 and 3, Johnson's Court, Fleet Street, E.C.

RETIRED OFFICERS and OTHERS.—Patentee of an article that must command an enormous sale, in consequence of its supplying an universal want, seeks co-operation of a gentleman to undertake correspondence, &c., relating thereto. Two or three hours daily. Liberal terms. Capital required about £300 or £400.—W. T. 55, Messrs. Deacon's, 154, Leadenhall Street, E.C.

HORSES EXAMINED.—GENTLEMEN PROFESSIONALLY ASSISTED in the SELECTION of HORSES. Examined as to soundness. Tattersall's and other sales attended by WILLIAM SEWELL, M.R.C.V.S., 53, Elizabeth Street, Eaton Square, London, S.W.

CHLORODYNE.—FREEMAN'S is the original and only true.—Lord Chancellor Selborne, Lord Justice James, and Lord Justice Mellish decided in favour of R. Freeman and against J. C. Browne and J. T. Davenport; see "Times" of July 24, 1873. Thousands of medical practitioners testify that there is no substitute for it in the treatment and cure of asthma, bronchitis, coughs, and other chest affections, neuralgia, fevers, cholera, dysentery, spasms, and all nerve pains. Bottles 1s. 1½d., 2s. 9d., 4s. 6d., 11s., and 20s. Sold by patent medicine dealers in all parts of the world. See that "Freeman's Original Chlorodyne" is engraved on the Government stamp.

THE STAFFORD HOUSE COMMITTEE for the RELIEF of SUFFERING among the TURKISH SOLDIERS.—Chairman, the Duke of SUTHERLAND, K.G.—Communications to be addressed to T. Gibson Bowles, Esq., Hon. Sec., 2, Harriet Street, Lowndes Square, S.W.

Subscriptions will be received by Major-General Sir Henry Green, Hon. Treasurer, Stafford House, S.W.; by Messrs. Drummond and Co., Charing Cross; Messrs. Smith, Payne, and Co., 1, Lombard Street; Messrs. Barnetts, Hoares, and Co., 62, Lombard Street; and by Messrs. H. S. King and Co., 45, Pall Mall, and will be acknowledged in the published list.

The Right Hon. the Lord Mayor has undertaken to receive subscriptions for the fund, which may be paid to him at the Mansion House.

Contributions are especially invited of blankets, warm jerseys, warm underclothing, and hospital linen, which will be received at Taylor's Depository, Pimlico, and should be labelled "For Relief of Suffering Turkish Soldiers."

THE
COLONIAL PIANOFORTE.
With entire metal string-frame, full trichord scale, and check repeater action.

This Pianoforte is most strongly recommended for the families of Military gentlemen. Its construction is such that durability under adverse conditions of climate, &c., may be confidently relied upon, whilst its musical and artistic qualities are of the highest order. It is of small dimensions, and is sold at the moderate net price of £35.

W. HANSON,
FOREIGN PIANOFORTE COMPANY,
15, Lower Seymour Street, Portman Square, London, W.

COLT'S NEW GOVERNMENT ARMY REVOLVER, after a severe competitive trial by the U. S. Ordnance Department in 1873 and 1876, has been exclusively adopted by the United States Government, and the whole of the United States Cavalry is now armed with them. It is now made to take the English Government Boxer cartridge. Length of barrel 5½ and 7½ inches.

In the trial of 1869, advertised by another maker, the Colt's pistol used was a muzzle-loader adapted to the use of metallic cartridges, which pistol has not been made or sold after that year.

COLT'S NEW 41-CAL. FIVE-SHOT DERINGER REVOLVER,

RUPTURES (BY ROYAL LETTERS PATENT)
WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 medical gentlemen to be the most effective invention for the curative treatment of hernia. The use of a steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body, two inches below the hips, being sent to the manufacturer,

MR. WHITE, 228, PICCADILLY, LONDON.

Price of a single truss, 16s., 21s., 26s. 6d., and 31s. 6d.; post free. Double ditto, 31s. 6d., 42s., and 52s. 6d.; post free. An umbilical ditto, 42s. and 52s. 6d.; post free. Post-Office Orders to be made payable to JOHN WHITE, Post Office, Piccadilly.

Every description of RIDING BELTS, ELASTIC STOCKINGS to draw on, and ELASTIC SILK SUSPENDERS, on new and improved principles.

JOHN WHITE, Manufacturer, 228, Piccadilly London.

Note the Address—40, LUDGATE HILL.
Lowest price for nett cash, 16s. 6d.
Warranted waterproof, and as soft as a glove. Gentlemen with tender feet have been known to wear these boots for two years without repairing.

WILLIAM S. BURTON,
39, OXFORD STREET, W.

THE PERFECT SUBSTITUTE FOR SILVER.—The REAL NICKEL SILVER introduced more than thirty years ago by WILLIAM S. BURTON, when plated by the patent process of Messrs. Elkington and Co., is the best article next to silver that can be used as such, either usefully or ornamentally, as by no test can it be distinguished from real silver.

Patterns.	Fiddle or Old Silver	Bead or Thread	King's or Shell.
	£ s. d.	£ s. d.	£ s. d.
Table Forks or Spoons, per doz.	1 10 .	2 1 .	2 5 .
Dessert do., per doz.	1 2 .	1 9 .	1 11 .
Tea Spoons „	. 14 .	1 . .	1 2 .

These are as strongly plated, and are in every respect at least equal to what other houses are selling as their first quality at very much higher prices.

A second quality of Fiddle Pattern:—Table Spoons and Forks, 23s. per doz.; Dessert, 17s. per doz.; Tea Spoons, 12s. per doz.

Tea and Coffee sets, in white metal, from £3 15s. to £7 7s.; Dish Covers, beaded pattern, £11; Ditto, ditto, fluted, £15; from £9 to £24 the set of four; Corner Dishes, from £7 10s. to £18 18s. the set of four; Warmers, £7 2s. 6d. to £15 15s.; Biscuit Boxes, 14s. to £5 10s.; Cruet and Liquor Frames, &c., at proportionate prices.

The largest stock in existence of Plated Dessert Knives and Forks, and Fish-eating Knives and Forks, and Carvers.

All kinds of re-plating done by the patent process.

WILLIAM S. BURTON, General Furnishing Ironmonger, by appointment to H.R.H. the Prince of Wales, sends a Catalogue, containing upwards of 850 Illustrations of his unrivalled Stock, with Lists of Prices and Plans of the 30 large Show-Rooms, post free.—39, Oxford-street, W.; 1, 1A, 2, 3, and 4, Newman-street; 4, 5, and 6, Perry's-place; and 1, Newman-yard; Manufactories, 84, Newman-street and Newman Mews, London, W.

LONDON, 40, CHARING CROSS.
DUBLIN, 83, GRAFTON STREET.

KINAHAN'S LL WHISKY.

KINAHAN & Co. finding that, through the recommendation of the Medical Profession, the demand for their CELEBRATED OLD LL WHISKY for purely medicinal purposes is very great, submit with pleasure the following ANALYSIS by DR. HASSALL:—

"I have very carefully and fully analysed Samples of this well-known and popular Whisky. The samples were soft and mellow to the taste, aromatic and ethereal to the smell. The Whisky must be pronounced to be pure, well-matured, and of very excellent quality. The medical Profession may feel full confidence in the purity and quality of this Whisky." 20, GT. TITCHFIELD ST., LONDON, W.

SWISS CHAMPAGNE.—LOUIS MAULER'S SWISS CHAMPAGNE de Cortai lod, Neuchatel, so well known to travellers in Switzerland, may be obtained of Messrs. BELL and HUGHES, Wine Merchants, 38, Fenchurch Street, agents in England for the sale of this excellent champagne. Price, 42s. the dozen quarts; 46s. per twenty-four pints net. All other wines at equally moderate prices.

LANE'S PRIVATE HOTEL (Nos. 1, 2, and 3, ST. ALBAN'S PLACE, CHARLES STREET, St. James's, S.W.), for Officers in the Army and Navy, Members of Clubs, and others. Most eligibly situated in the immediate vicinity of the principal Club Houses. Gentlemen requiring sleeping accommodation only, are respectfully informed every attention will be paid to their comfort and convenience. A trustworthy porter in attendance all night.

LEFT OFF CLOTHES, Old Uniforms, Epaulettes, Books, Jewellery, Miscellaneous Property, &c., PURCHASED in any quantity or condition.

All letters punctually attended to.

Ladies waited on by Mrs. N.

N.B.—Mr. Norton has always on hand a large stock of present Regulation Uniforms, Patrol Jackets, Great Coats, &c., equal to new, at very low prices.

HOLLOWAY'S PILLS.—Pure Blood.—When the blood is pure, its circulation perfect, and the nerves in good order, we are well. These Pills possess a marvellous power in securing these great secrets of health by purifying, regulating, and strengthening fluids and solids. Holloway's Pills can be confidently recommended to all persons suffering from disordered digestion, or worried by nervous fancies, or neuralgic pains. They correct acidity and heartburn, dispel sick headache, quicken the action of the liver, and act as alteratives and gentle aperients. The weak and delicate may take them without fear. Holloway's Pills are eminently serviceable to invalids of irritable constitution, as they raise the action of every organ to its natural standard, and universally exercise a calming and sedative influence.

ST. LAWRENCE-ON-SEA, NEAR RAMSGATE.

THE "GRANVILLE" HOTEL.

THE "GRANVILLE" PRIVATE SPECIAL EXPRESS TRAINS to ST. LAWRENCE-ON SEA, near Ramsgate, in two hours. Departures every Friday, from Charing Cross at 3.45, and Cannon Street at 3.50 p.m. (see bills.)

THE "GRANVILLE" HOTEL.
The "Morning Post" says:—"Nowhere in England can a series of baths such as that at the 'Granville' be seen."

THE "GRANVILLE" HOTEL.
The "Globe" says:—"As a residential hotel during winter, the 'Granville' is second to none."

THE "GRANVILLE" HOTEL.
The "Saturday Review" says:—"The scenery, the air, the accommodation for visitors were described as of the most perfect kind; and we could not help wondering how it was that this place, which had been in existence in a quiet way for several years, had suddenly, like Byron, gone to bed and awoke famous."

THE "GRANVILLE" HOTEL.
"Land and Water" says:—"The 'Granville' Hotel is likely to become a popular winter resort, not only for invalids, but also for those seeking a few days' relaxation from work."

THE "GRANVILLE" HOTEL.
"Mayfair" says:—"The proprietor of the hotel, which has carried the name of St. Lawrence-on-Sea to the utmost ends of the earth, has energetically and judiciously lavished a fortune, first in making the 'Granville' Hotel one of the most charming seaside residences in the Kingdom, and next in bringing the fact under the notice of the public."

ROYAL UNITED SERVICE INSTITUTION, WHITEHALL YARD. 1877.

The FORTY-SIXTH ANNIVERSARY MEETING will be held in the Theatre of the Institution on Saturday, March 3rd.

The Chair will be taken by
The Right Hon. GATHORNE HARDY, M.P.,
Secretary of State for War,
at NOON precisely,
When the Gold Medal will be presented to the writer of the Prize Essay on the
"Causes which have led to the Pre-eminence of Nations in War."

By Order of the Council,
B. BURGESS, Captain, Secretary.

THE SOLDIERS' DAUGHTERS' HOME, Hampstead. Instituted 8th March, 1855.

Chairman—
Major-General J. T. Boileau, R.E., F.R.S.

Inmates, 178; vacant beds, 22; candidates, 110.

Owing to the loss, by death, of several of the largest annual subscribers, and to the great falling off in donations, the funds are at present unequal to support the increased number of girls (26) who have been added to the Foundation during the last two years.

Further aid is earnestly solicited to meet the increased call upon the funds. Remittances to be made to C. R. Low, Esq., Secretary, No. 7, Whitehall, London, S.W. A guinea yearly gives 1 vote; five guineas, 2 votes for life.

RODRIGUES.—MONOGRAMS, ARMS, CRESTS, and ADDRESSES Designed, and Steel Dies Engraved as Gems.

RUSTIC, GROTESQUE, and ECCENTRIC MONOGRAMS artistically designed for any combination of letters.

NOTE PAPER and ENVELOPES stamped in colour, relief, and brilliantly illuminated in gold, silver, and colours, in the highest style of art.

A VISITING CARD-PLATE, ELEGANTLY ENGRAVED, and 100 SUPERFINE CARDS PRINTED for 4s. 6d.

BAND CARDS, BALL PROGRAMMES, and DINNER CARTES of new designs arranged, printed, and stamped with Arms, Crests, or Address in the latest fashion.

At HENRY RODRIGUES', Heraldic Stationer to the Royal Family, 42, PICCADILLY, LONDON, W

THE DIRECTORS of the BRIGHTON LIVERY STABLES COMPANY, Limited, give notice that Prospectuses inviting application for the portion of unallotted Shares may be obtained from he Secretary at the Offices of the Company, to whom an early application should be made.

A. J. BODDINGTON, Secretary.
17 Prince Albert Street, Brighton.

IMPORTANT NOTICE.

GRAND PREMIUM GIFT.

THE

LONDON FINE ART ASSOCIATION,

317, STRAND, W.C.,

Have concluded arrangements by which each Subscriber to this week's ARMY AND NAVY GAZETTE will be entitled to receive one copy of a magnificent Engraving by BURNET of the celebrated Painting by the late DAVID WILKIE, R.A., entitled

"THE CHELSEA PENSIONERS

Reading the 'Gazette' of the Battle of Waterloo."

(COPYRIGHT. 17½IN. BY 33IN.)

THIS Picture commemorates one of England's proudest days—the Battle of Waterloo had been fought and won, and the official account of the victory was nowhere so eagerly received as by the true and gallant Chelsea Pensioners. Although then old and wounded, the vivid remembrance of former campaigns would naturally excite their keenest interest in the Continental warfare which was then raging. It can, therefore, easily be imagined the intense excitement which must have prevailed amongst them upon the receipt of so authentic a report of the success of the British troops. Wilkie, as usual, proved himself equal to the occasion in grasping the subject with his extraordinary skill, and by leaving behind him a picture of such a national character, painted in a manner which defies not only being surpassed, but even equalled, an importance was certainly obtained which must ever be associated with his splendid works. Composed, as the picture is, of nearly fifty figures, description is, perhaps, a little difficult. The centre position is occupied by the most important thing, namely, the *Gazette*, which is being read aloud by an old Pensioner, to the perfect delight of the exuberant and motley crowd surrounding him. Characters of every kind seem to be depicted, from the six-foot Guardsman to the tiny child. Excitement is the only word with which to describe so animated a scence. All are evidently absorbed in the momentous question.

This Engraving will form an admirable companion to Wilkie's other pictures, "Duncan Grey," "The Rent Day," and "The Blind Fiddler," which have previously been published by the London Fine Art Association.

The school with which Wilkie, Cox, and Turner were so closely associated is no doubt that which English taste has pronounced to be the most acceptable and popular. It is, in fact, open to question whether at any time there has been such a demonstrative feeling in favour of any one style as has been shown in connection with pictures by the above celebrated artists.

Engravings of works which accord with the taste above described will be published in connection with the London Fine Art Association, and the present is the fourth of a series of Engravings which will be published from time to time.

It is important that early application should be made for THE CHELSEA PENSIONERS by those who wish to become possessed of the whole set of Engravings which will be published, as after the date mentioned below it will be too late to send for a copy of the above celebrated work.

It is particularly requested that the names and addresses of applicants may be written as legibly as possible, and that the instructions below may be carefully attended to.

INSTRUCTIONS.

This Presentation Picture will be sent free to any part of Great Britain or Ireland, securely packed, upon receipt of the Coupon found below, together with Twenty Pence in Stamps or Post Office Order for Eighteen Pence *(the latter much preferred)*, to pay cost of case, transmission, copyright, and other charges. Post Office Orders should be made payable to Mr. HENRY STANLEY, General Post Office, London.

NO COPY will be sent without a COUPON, together with Twenty Pence in Stamps or Post Office Order for Eighteen Pence, as stated above, except on receipt of TWO GUINEAS, the ordinary retail price of the Engraving.

No. 14.

PREMIUM VOUCHER.

THE

CHELSEA PENSIONERS.

ONE COPY.

FOR THE

LONDON FINE ART ASSOCIATION.

Branch Office—317, Strand, W.C.

HENRY STANLEY, SECRETARY.

IMPORTANT NOTICE.

Applications for Copies of THE CHELSEA PENSIONERS must be made at the BRANCH OFFICE of the London Fine Art Association, 317, Strand, W.C., and not at the Offices of this Newspaper, and with each application the above Voucher, which will not be available after the 18TH MARCH, 1877, must be enclosed, and, as the Premium Voucher for the above Engraving will not again appear in the ARMY AND NAVY GAZETTE, early advantage should be taken of the present occasion.

EMANUEL,
3, THE HARD, PORTSEA,
By appointment to H.R.H. the Duke of Clarence, 1827; H.R.H. the Duke of Edinburgh, 1872.

New Designs in High Class Jewellery at Moderat Prices.
Bridesmaids' Lockets from Three Guineas.
Bracelets from Five Guineas.
English and Foreign Watches and Clocks.
Regimental, Presentation, and Prize Plate.
Old Plate, Jewels, Epaulets, &c., bought.
Foreign Money exchanged.
Miniature Copies of all Medals and Decorations.
Field, Race, and Opera Glasses, and Nautical Instruments.
Rare China, Bronzes and Curios.
Collections Valued and Purchased.
Cheques payable to EMANUEL EMANUEL

Established for upwards of half a century on the Credit System, but now conducted exclusively for Ready-Money Payment and supplying

UNIFORMS AND MUFTI

Of precisely the same high-class quality as heretofore

AT GREATLY REDUCED PRICES.

ESTIMATES ON APPLICATION.

MAJOR CREASE'S PATENT SELF-REGULATING, CLEANABLE

CHARCOAL FILTER

Has been universally adopted in the Royal Navy, East Indian and English Transport Services; the German, Russian, American, and Austro-Hungarian Navies;
ALSO BY
HER MAJESTY'S WAR DEPARTMENT,
For BARRACKS, HOSPITALS, CAMPS, &c., &c.
And for which Patents have been granted by the Governments of Great Britain, the United States of America, Italy, France, and Canada to Major Crease, Sole Patentee of the Self-regulating, Cleanable Filter.

The designs are of three classes—
1.—For dwelling rooms and halls. To suit different styles of furniture three types have been employed—the Classic, the Japanese, and the Mediæval. None of these forms have been before employed for Filters.
2.—Those of simpler and cheaper designs for kitchen use.
3.—Filters of galvanized iron, either to fix to mains or cisterns, which, being capable of being made of any size, can supply pure water in sufficient quantities for the largest hospital or hotel.
The Filters, being made of special sizes, all their parts are interchangeable.

Full particulars can be obtained on application to
MESSRS. GARDNER AND SONS,
Sole Manufacturers of the Land Filters,
453 & 454, STRAND; and 3 & 4, DUNCANNON STREET, LONDON.

OVERLAND ROUTE and SUEZ CANAL. Under Contract for the conveyance of the Mails to the Mediterranean, India, China, Japan, and Australia. The Peninsular and Oriental Steam Navigation Company dispatch their Steamers from Southampton, *via* the Suez Canal, every Thursday; from Venice every Friday; and from Brindisi, with the Overland Mails, every Monday.

Offices—122, Leadenhall-street, E.C., and
25, Cockspur-street, S.W.

HALL LINE.—STEAM from LIVERPOOL to BOMBAY, via SUEZ CANAL.—Average passage, 26 days, including all detentions. Sail punctually as advertised.

Passengers booked at through rate from London, via Genoa, Naples, and Alexandria (Rubathino Line), joining the "Hall" steamer at Suez. Full particulars on application.

The magnificent fast steamship TRENTHAM HALL, 2,100 tons, 300 horse-power nominal, sailing 13th March. This steamer has been specially adapted for the East India trade. Her saloons and cabins are spacious and well-ventilated, and the accommodation is unsurpassed. Only first class passengers taken. Fare from Liverpool, 45 guineas. Surgeon and stewardess carried.

Succeeding steamers:—
Branksome Hall .... 10th April.
City of Baltimore .... 30th April.

For passage apply in London to Henry S. King and Co., 65, Cornhill, and 45A, Pall Mall; or for freight and passage to
ALEXANDER and RADCLIFFE, 8B, Liverpool and London Chambers, Exchange, Liverpool.

H. PEAT,
SADDLER AND HARNESS MAKER,
14, OLD BOND-STREET,
HAS REMOVED TO 173, PICCADILLY.

☞ *It is particularly requested that applications for copies of the* Army and Navy Gazette, *and Advertisements, shall* not *be sent to the Editor, but to* Mr. Richard James Wood, AT THE OFFICE, 16, WELLINGTON STREET, STRAND, W.C., *to whom all business communications shall be addressed and remittances made payable.*

The subscription to the paper is 7s. per quarter, or 28s. per annum payable in advance, *inclusive of postage to any part of the United Kingdom; to India, £1 10s. 4d. per annum; viâ Brindisi, £1 14s. 8d*

THE First Lord of the Admiralty is to be congratulated on the double success which has attended the production of the Navy Estimates for 1877-78, for not only has he been able to satisfy the British taxpayer by showing a reduction of no less than £309,043 on the Estimates of last year, but he has also given the Service much cause for thankfulness by the evident efforts that have been made to remove the grievances of which various grades have complained for many years past. As we stated some weeks ago, the considerable additions made to the Fleet since Mr. Hunt came into office and gave it to be understood that the condition of our Navy was not such as should be expected of the first maritime nation in the world, had so far strengthened the position of this country that the Admiralty felt able to reduce the programme of ship-building and to turn its attention to the wants of the *personnel.* No effort has been made to effect a great reduction in the Estimates at the expense of those serving in the Fleet, tempting as the opportunity might have been. Instead of that, the earliest moment has been seized, when the demands in the way of ship-building were lessened, to give the advantage of the situation to those upon whom we are dependent for the proper manning and fighting of our ships. Thus we find that provision has been made for an additional rate of pay to be granted to all seamen who re-engage for a second term of service. These are the men who are valuable to the Navy before all others, for having been trained from their boyhood in the Service, and having passed through that period when they are liable to be unstable, they have become thoroughly trustworthy and efficient, and are in the prime of life. Too often they have forsaken the Service for employment elsewhere, but we trust that the extra inducements now offered may enable the Navy to retain those who are so truly valuable. And not only has the Admiralty paid attention to the present, but the future of the men has also been considered, for an increase of no less than £19,249 appears in the Estimates as set aside for pensions and gratuities to seamen and Marines. This is sufficient to prove that their Lordships have every wish to encourage the good and tried men to remain by the Navy, rather than allow them to leave the profession of their youth for callings on shore, and in this they have acted in a spirit of true economy. But it is not alone with the "bone and sinew" of the Navy that the advantages of increased pay rest. The Warrant officers and Engineers have met with consideration, for under the head of pensions to Officers of this class there is an increase of £12,022. Five thousand six hundred pounds has been provided for improving the pay of engineers, £548 for making some addition in the half pay of Inspectors of Machinery, and £4,200 for the anticipated retirement of Chief Engineers which will take place under the projected scheme. Another £5,000 is also asked for to meet the extra demand which may be looked for when further inducements to retire are offered to officers of the Royal Marines, and another £1,000 for readjustment of Staff at the divisions. The rumoured increase of pay to the non-commissioned officers and men has not been provided for, but we have reason to believe that this omission will be rectified at an early date. We trust, also, that the case of the Assistant-Paymasters may meet with that consideration to which it is most certainly entitled. On these points, something will probably be heard when the First Lord of the Admiralty makes his statement to the House on laying the Estimates on the table. The modest sum of £1,000 only is required to meet the possible demands that may be made upon their Lordships to relieve the distress of any officer who has been obliged to leave the Service, and from this it is evident that the Admiralty has no intention of abusing the power of granting compassionate allowances recently placed in their hands, and the question is scarcely worthy of the fuss that has lately been made about it both in and out of Parliament. The number of men serving in the Fleet remains unchanged—namely, 46,000 seamen and 14,000 Marines; total, 60,000. The actual number of petty officers and seamen is to be 34,100; boys, 6,300; officers, 4,360; officers and men of the Coast-guard employed on shore, 4,300; non-commissioned officers and privates of the Royal Marines, 13,495; officers, 505; employed in troop-ships for Indian service, 1,300 officers, men, and boys. The Coast-guard and Naval Reserves cost £207,900, a decrease of £2,330. The strength of the Reserve is 20,000. Turning to the dockyards, we find the vote increased by £17,930, of which sum £10,806 is appropriated for wages in yards abroad. In fact, it is intended to develope the yard at Malta by the employment of two hundred additional hands, who will absorb £8,563 of the increase on the wages vote. It is evidently the intention of the Admiralty to keep the Royal establishments up to full working power, while, on the other hand, there is a notable reduction in the amount of work to be done in private establishments. Indeed, the present condition of the Fleet affords an opportunity of curtailing the building programme very considerably. The actual decrease on this head is £107,706 for steam machinery, and £292,644 for contract-built ships. The amount to be spent in these branches is, however, still large, being £430,455 and £394,295 respectively. The contract shipbuilding work for the ensuing year consists of the completion of two ironclads at Glasgow, two composite gun-vessels at Birkenhead, four composite gunboats at Glasgow and Hull, six iron gunboats for river service at Jarrow, one tug at Birkenhead, and sixteen torpedo-vessels. The tonnage of the contract work for 1877-8 is 6,248 tons. The machinery to be constructed by contract this year, and most of which is to be completed during the year, includes engines for seven ironclads, one ironclad ram, two iron corvettes, two composite corvettes, six steel and iron corvettes, two armed despatch-vessels, six composite sloops, four composite gun-vessels, seven composite gunboats, six iron gunboats for river service, one tug, and three torpedo-vessels. The indicated horse power of engines to be constructed this year is 26,770, of which 18,957 is for unarmed vessels, and 7,813 for ironclads. The Royal dockyards are to contribute 12,240 tons, of which 8,621 tons are ironclads, 1,637 tons are corvettes, 2,074 tons are composite sloops, and the remainder gunboats and smaller vessels. The following is the programme of work proposed to be undertaken at the dockyards. At Chatham, a new armour-plated ship of the Agamemnon type and an iron-covered battery corvette are to be begun, the refit of the Ariel, gunboat, undertaken, and repairs to the Monarch, armour-plated ship, commenced. At Sheerness, a new sloop of the Gannet class is to be commenced, the Blanche and Druid, corvettes, completed for sea, while the repairs of the Barracouta and Philomel, of the Encounter, corvette, and Ready, gun-vessel, are to be begun. At Portsmouth, a new armoured-plated ram is to be commenced, the ironclads Hercules and Triumph refitted, the Lord Clyde completed for a gunnery-ship, and the Inconstant and Glasgow, frigates, the Dido, corvette, and Dwarf, gun-vessel, are to be repaired for commission. At Devonport two new sloops, the Dragon and Pegasus, are to be laid down. The ironclads Invincible, Iron Duke, store-ship Liffey, corvette Tenedos, dispatch-vessel Lively, and gunboats Merlin and Decoy are to be completed for further service. The repairs to the Northumberland, armour-plated ship, are to be begun. At Pembroke two new brigs of the Seaflower class are to be commenced. This is in addition to the further progress which will be made on the ships already ordered to be built. We notice the six steel corvettes building on the Clyde are to be three-fourths completed, and the Iris, steel dispatch-vessel, wholly so during the ensuing financial year; also, the armour-plated turret-ships Inflexible and Dreadnought, together with the broadside ships Nelson and Northampton. £80,000 is to be spent upon torpedoes, and £65,100, being an increase of £10,100, upon machinery and fittings connected with turrets and torpedoes. £5,000 more than last year, or a total of £15,050 is to be devoted to experiments. The total effective fleet, excluding Indian troopships, was, on Dec. 1, 123, against 122 twelve months before. They include 4 armour-plated line-of-battle ships, 13 armour-plated frigates and corvettes, 30 other frigates and corvettes, and 65 steam sloops and small vessels, and 11 sailing vessels of the same class. Including reserve-ships, training-ships, store-ships, and others, the total fleet on Dec. 1 consisted of 248 vessels, against 240 on Dec. 1, 1875. The sum total of the Estimates amounts to £10,979,829, which may be reduced by estimated receipts and repayments to £10,762,829, being a reduction of £302,014 upon last year, but £259,322 above the expenditure in 1875-6. The decrease upon steam machinery and ships built by contract is £311,600. Naval stores show a reduction of £54,020; new works, building, machinery, and repairs, £23,534; the conveyance of troops, £29,200; in half pay, £7,676; £6,967 in law charges, and £5,413 in miscellaneous services. Nearly all the other votes show an increase—namely, wages to seamen and Marines, an increase of £49,144; victuals and clothing, increase £25,243; Admiralty Office, increase £4,070; dockyards and naval yards at home and abroad, increase £17,930; military allowances and pensions, increase £33,804. The votes to which no allusion has here been made differ very slightly from those of 1876-7.

Mr. Hardy was fairly entitled, when moving the Army Estimates, to all the credit to be got out of the increased number of recruits. The men had been collected, and, in the absence of any official information to the contrary, the quality was presumably satisfactory, although the amount of desertion admitted certainly impugned the assertion as to quality. Sir Henry Havelock went nearest to the mark in suggesting that quantity had been obtained at the expense of quality. A fair consideration of the causes which affect the supply of recruits would, perhaps, lead to the conclusion that the additional advantages lately offered, in the form of deferred pay and increased pay, to non-commissioned officers had in a measure conduced to the present influx, but *plus* depression of trade and deterioration of the physical standard, and a retrospect of our Army Estimates shows that a combination of these means will always fill the ranks—stagnation of trade and more money offered for an inferior article. However, let us accept the situation. Assume that the question of quantity has been solved. The value of a small army such as ours can only be estimated by its quality. We have to consider, first, whether every man possesses physical fitness in a high degree; secondly, whether every man has received such an amount of education as will, at least, enable him to use with the greatest effect the arms of precision placed in his hands. Will any honourable member who congratulated the Secretary of State examine a field gun, and then give his views on the value of a gunner whose intelligence is indicated by his innocence of reading and writing? Or will he indulge in a mental comparison of the equally intelligent Private Thomas Atkins' performance at the rifle butt with that of one of our Volunteers? The number of men in prison during the year, the number dismissed as bad characters, and the number of deserters do not testify to the recruits being of good quality, any more than do the number of discharged soldiers, disembodied Militiamen, and Reserve men wandering about the country living upon charity or by their wits (?) testify to economy. Nay, rather these conditions show that the supply of recruits for the Army and the final disposal of old soldiers yet remain problems for statesmen of the future. We venture to affirm that in the present advanced state of military science no Secretary of State should pronounce the quality of his recruits satisfactory till he has adopted means to ensure the following qualifications—physical fitness, good character, and good elementary education. If there be one company of any regiment in the British Army so constituted, we shall be glad to be informed. The want cannot be set aside by the assertion that such men will not enter the Army in sufficient numbers, and all the old Philistinism about British pluck, which is so enrapturing in an after-dinner speech. The fact remains, and cannot be too strongly insisted upon, that our Army is only to be measured by the actual worth of each individual who dons its uniform. We have thought it necessary to insist upon these fundamental points in consequence of their marked omission from Mr. Hardy's speech, especially as the Report of the Committee on Boy Enlistment, just presented to Parliament, and of which the late Inspector-General of Recruiting was chairman, has dwelt so forcibly upon the subject. Reserving for a future opportunity a more detailed consideration of this Report, the Committee has shown that recruits might be obtained in sufficient numbers, possessing, besides the qualifications we have insisted upon above, a fair knowledge of a trade or of superior education, fitting them for clerks and drill, by giving encouragement to the managers of industrial, union, and other suitable schools. After recommending a small addition to the number of boys at present with regiments, the Committee advise the establishment of boy companies, and encouragement to be given to the formation of training schools by private enterprise. The experiment of enlisting boys who have received an industrial training appears to have been lately tried in the Royal Artillery, and with such marked success that the delay in extending it to the Army seems the more unaccountable, unless it be from the consideration of a certain immediate cost, although that, as shown by the Committee, would soon be abundantly reproductive. A large permanent addition has been made to the Army Estimates in the shape of deferred pay for the mere production of numbers. For the amount of only one halfpenny a-day of such cost, a considerable step might have been made in obtaining quality as well, if expended in the direction of the recommendations of the Committee. Nor do we believe that the remaining 1½d. a-day would have been less successful than is 2d. on producing mere numbers. Giving 2d. a-day to a soldier as an enticement to enlist, rather than as a reward for service, was like extending the franchise to the labourer before he could sign his name, and we must remedy our hasty legislation in a similar manner by enforcing an educational qualification. Again, though the Army is at present filled up, we should remember that we have little assurance of a continued supply, and less of improved quality. Now, then, is the opportunity for placing our means of supply both as regards quantity and quality, upon a permanent footing, by the adoption of a system of boy enlistment, as suggested by General Taylor's Committee. By so doing we should really appeal to the truest and best expression of the national heart, the instructors of the British nation which is to be. We should not then require a Secretary of State to palliate desertion, nor to weigh the arguments for and against branding bad characters. May not our military administrators take courage by the example of the Navy, now recruited, so far as sailors are concerned, by boys from training-ships, and who are now said to be superabundant? In a paper on the subject, read on the 12th ult., by Major Gerry, R.A., at the United Service Institution, the subject was finally dealt with from a social point of view, as well as in the discussion which followed. The lecturer showed that only too strong grounds existed for believing that the enlistment of poor boys from good schools would be of so great a benefit to the community at large, and so practically felt by the ratepayers, that any small cost, as a first outlay, would be an actual economy. Although our present reason for approaching the subject of boy enlistment is for the improvement of the Army, we hold it to be one of far higher importance to the public at large—one which all may find it their interest to promote, whether they be mere ratepayers or citizens desirous of the public weal.

On Tuesday night the House of Commons performed its duty as the great safety-valve of the national boiler, and we have no doubt that the debate on Mr. Seely's motion will prove interesting and instructive to those who trouble themselves about the affairs of the Navy. Few people, however, were likely to agree with Mr. Seely's proposition, that a change of name from First Lord of the Admiralty to Secretary of State for the Navy would be a panacea for all naval misfortunes, while the second part of his resolution, which recommended the Government to appoint to the offices of Controller of the Navy and Superintendents of her Majesty's dockyards "persons possessing practical knowledge of the duties they have to discharge," was, as pointed out by Mr. Hunt, simply a truism in which all might concur. Mr. Seely's speech consisted chiefly in a long catalogue of accidents to her Majesty's ships, culled principally from the newspapers, some of which were previously as unknown to us as they were to Mr. Hunt. Mr. Reed followed with the complaint with which his recent letters have made us familiar, that the First Lord of the Admiralty had failed to realise fully the great change which machinery had made and was making in the constitution of our Naval Service, and he repeated his former comparison between the number and salaries of the Engineers and the Admirals employed at Whitehall. Mr. Reed will find the answer to his implied conclusion, that the Constructors and Engineers should be placed on an equality with the executive officers of the Navy, in his own quotation from the Secretary for War's speech at the United Service Institution, the meaning of Mr. Hardy clearly being that the officer in command of such a ship as the Alexandra, with thirty-five steam engines on board, should "know how to control and use the enormous power on board her;" in other words, that this had become one of the most important parts of a Captain's duty which could not be left entirely to the Engineers or mechanical experts. The remedy, then, is rather to improve the scientific and mechanical knowledge of the executives than to relieve them too much of responsibility by inordinately raising the status of the Engineers. We do not want a dual government either on board ship or at the Admiralty, and so long as the details of naval service include discipline, gunnery, seamanship, accounts, correspondence, diplomacy, and other numerous details, we must agree with Mr. Jenkins that the responsibility of the Engineer must, after all, be as nothing compared with that of a Captain, or the executive officers at the Admiralty. The debate was somewhat dreary till Mr. Egerton spoke, and we cannot wonder that when Mr. Baxter was talking to empty benches during the dinner hour an attempt was made, which we are glad the Government did not approve, to count the House out. Mr. Shaw Lefevre made a smart attack upon the Admiral Superintendents, but, in accordance with the moderate and statesmanlike tone of his speech, he was only able to support in a modified form the second part of Mr. Seely's motion. Mr. Samuda made some sensible remarks as to the advantages of decentralising the dockyard management, which are worthy of attention. But perhaps the most remarkable fact is, that although the attack, such as it was, should reflect principally on the Constructive Department of the Admiralty, of which Admiral Houston Stewart is the head, as Controller of the Navy, we had the most unanimous testimony to his personal merits and qualifications for the post, one speaker emphatically designating him as "the right man in the right place." Such being the course of the debate, and the front Opposition bench showing some coyness in taking part in it, Mr. Ward Hunt had not a very difficult part in defending his administration of the Navy, and there are only two points in his speech to which we wish to call special attention. He claimed boldly that many of the so-called breakdowns which were attributed to maladministration were really due to the determination of the Admiralty to put up with nothing of a doubtful or inferior character, and this we can to some extent corroborate. In the case of the temperature of the stokeholes of the gun-vessels of the Seagull class, for instance, which was stated recently to be extraordinarily high, attention was first called to this by the Admiralty endeavours to improve their ventilation, which had been complained of in former commissions. Again, in the Danae case, the simplest plan would probably have been to have got her to sea, and, as she could have steamed eight or nine knots, there could have been no absolute danger in this course; but she would have been an ineffective vessel, and the Admiralty decided rightly to remove her faulty boilers. Another claim of Mr. Hunt's was that the Navy was stronger in every way than it was when he assumed office, and, if it were not so, he admitted that he would have betrayed his trust. A return moved for by Sir John Hay last year enables us to verify his statement to some extent, though it only gives us the tonnage estimated for and built up to the end of the financial year 1875-76. In this, repairs are, of course, not included; but, according to the return, in five years of Liberal administration, 1869 to 1874, we find that the tonnage of new ships actually built amounted to 98,784 tons, 50,862 tons of which were on ironclad ships. Taking four years of Conservative administration, 1867-69 and 1874-76, we find that the tonnage built amounted to 96,187 tons, 50,226 of which were on ironclads. If we compare the years 1872-74, when Mr. Goschen was First Lord, with 1874-76, when Mr. Hunt was in office, we shall find the same result, Mr. Goschen having built 33,492 tons, only 8,848 of which were armoured vessels, while Mr. Hunt built 36,196 tons, 22,196 of which were ironclads. So far, then, as this return goes, it is evident that if Mr. Hunt has asked us for larger Estimates than his predecessors, and his demand for the present year when he proposes to build 20,480 tons, 14,240 of which are to be ironclads, amounts to £10,979,829, it will not be grudged if he can show, as we believe he can, that the country has had its money's worth and that the efficiency of the Navy has been improved during his administration.

The Channel Squadron will receive orders to return to England from Cadiz as soon as his Majesty the King of Spain has left that place. The Black Prince, Resistance, and Defence will be ordered to Plymouth, and the Minotaur to Spithead. They may be expected to arrive at the end of the present month or early in April.

The Report of the Arctic Scurvy Committee, extracts from which will be found in another column, distinctly condemns the action taken by Sir George Nares in withholding the lime-juice ration from the sledging parties. It is stated that Sir George Nares did not properly provision those parties, and that he had no sufficient reason for departing from the medical instructions drawn up by Sir Alexander Armstrong.

Vice-Admiral Lord William Compton, who has succeeded to the Marquisate of Northampton by the death of his brother, entered the Navy in June, 1831, and obtained his commission as Lieutenant in December, 1839, and served on the Cape of Good Hope and East India Stations. He was appointed to the Wellesley, 72, Commodore Sir James Bremer, in which ship he took part in the Chinese war. When in command jointly with Acting Lieutenants G. Campbell Fowler and John Astle of the barge and two cutters belonging to the Wellesley, he had the good fortune of preserving the ship, then in the Boca Tigris, from a formidable and well-planned attempt made on the part of the Chinese to destroy her by means of a flotilla of nearly twenty-five vessels, the whole of which, though in many instances chained in couples, and some even three together, were towed clear, without doing the slightest injury. He afterwards, in October of the same year, commanded the Wellesley's boats at the capture of Chinghae. Both gallant services were mentioned in the *Gazette*, and he was rewarded by being promoted to the rank of Commander. He obtained the rank of Captain October 20, 1853, was placed on the Retired List in 1866, became Rear-Admiral in 1869, and Vice-Admiral in 1876.

Satisfactory reports of the health of the ships of the squadron on the China Station have been received at the Admiralty.

We understand that an engineering firm has received the pleasing hint that it need not be at all surprised if it does not receive any further invitations from the Admiralty to tender for engines, even for the smallest class of vessels. We are not surprised in the least, and are inclined to believe that the firm will acknowledge that some work they have recently done has not been up to the contract. The merciless badgering to which the First Lord has been subjected, because engines, which he never saw and knows nothing about, will not work according to the high standard of efficiency anticipated, is having an effect upon somebody.

We are glad to be able to state, on the best authority, that Surgeon George Gray, R.N., whose name appears in the Obituary in the official "Navy List" for the present month, is still alive. The Editor of the "List" has evidently killed Mr. Gray by accident, and we hasten to correct the error, as such an announcement, if uncontradicted, cannot fail to cause pain to the officer's friends.

Rear-Admiral Luard will return to England in the Triumph upon Rear-Admiral Rice shifting his flag from that ship to the Hibernia and resuming the duties of Admiral-Superintendent at Malta Yard.

In consequence of the number of Surgeons recently entered for the Naval Service being insufficient, the Director-General of the Medical Department of the Navy has received instructions that any gentlemen who have passed the qualifying examination for the Army or Indian Medical Services, but failed to obtain commissions, may be accepted for the Navy provided they are in every respect eligible.

The inquiry into the cause of the recent grounding of the Vigilant in the Peiho River has satisfactorily shown that no blame is attributable to any of the officers of the vessel.

We regret to have received a report of the death of the Chief Engineer of the Tourmaline under distressing circumstances.

Two of the new dial semaphores worked by hand, an invention of the signal staff of the Port-Admiral at Devonport, are to be sent to the Mediterranean to be tried and reported upon.

The entry of ordinary seamen from the Merchant Service has been ordered to be discontinued on board the various district ships of the Coast-guard. This circumstance, coupled with Mr. Hunt's statement that the supply of boys for the Royal Navy is at this moment in excess of the demand, is sufficient to show that the Navy is in a flourishing condition and is held in high estimation by our coasting population. It is evident, too, that there is a decided preference at the Admiralty for those whom we train from their boyhood to the less disciplined ordinary seamen of the Mercantile Marine.

"You acted quite right, but should not have done so," seems to be a free translation of a sentence recently delivered by a court-martial on the China Station. The case to be tried was, whether a Commander had hazarded his ship, and after due deliberation it was decided to fully acquit him of the charge, but the court desired to record its opinion that he had committed an error in judgment, thereby hazarding his ship. This reads rather like a "bull."

Instructions have been received at Chatham for the Staff-Commander of the Reserve to qualify in pilotage for the Medway, as it is only intended that pilots shall be employed when ships are running on the measured mile, or should their heavy draught render it advisable, in the opinion of the senior officer, that a local pilot should be placed in charge.

Three new torpedo-mooring steamers are now ready to be handed over to the Admiralty. They are twin-screw vessels of seventy-two tons, and have been built and engined by Palmer's Company at Hull.

Lieutenant Doxat, the senior of the Devastation, has been appointed by Sir James Drummond to the command of the Wizard, her former commander, Lieutenant Neilson, having been invalided.

Although Rear-Admiral Houston Stewart, C.B., has accepted the post of Controller of the Navy for a further term of five years, we have reason to believe that an early opportunity will be given him of temporarily hoisting his flag, so that he may qualify for promotion, and regain his proper position on the Active List. Three juniors have already passed over his head while holding the appointment of Controller.

Admiral Henry Gosset, whose death has been reported, entered the Navy in June, 1809, joining the Euryalus as a first class volunteer. After the expedition to Flushing he proceeded to the Mediterranean, where he witnessed, in 1813-14, the capture of Port D'Anzo and Via Reggio, the unsuccessful attack on Leghorn, the occupation of Santa Maria and the enemy's other forts in the Gulf of Spezzia, and the taking of Genoa. On appointment to the Havana he took part in operations against America, and on returning to Europe contributed to the cutting out, on July 18, 1815, of a convoy and several armed vessels lying under the protection of a fort at Corrijon, near Brest. Towards the close of the same year he escorted Napoleon Bonaparte to St. Helena, where he served for some time under Admiral Sir George Cockburn, in the Northumberland. His commission as Lieutenant was dated December 30, 1816, and became Captain January 1, 1829, when serving in the Mersey, but invalided home immediately afterwards, and had not since been afloat. He became Rear-Admiral in 1855, Vice-Admiral in 1862, and Admiral in 1865.

We regret to hear of the death of Commander Charles W. Jones, at Tokio, Japan, where he held the appointment of Director of the Japanese Naval College.

An authorised contradiction is given to the statements which have appeared that the Duke of Edinburgh will shortly return to England, and that there was any question at any time of his Royal Highness being appointed to the command of the Royal yacht.

As only a limited number of Lieutenants can be promoted annually, and out of that number the yacht and gunnery officers' promotions have to be taken, it behoves the Admiralty, when a vacancy occurs, to be strictly just in the selection. Lieutenants who have arrived at the head of their list ought never to be passed over to satisfy personal interest or clamouring relations, for zeal and interest in the Service must be greatly diminished when it is found that promotion is a mere lottery, and that officers who have seniority and good service can be passed over without just cause. In a recent gazette a Lieutenant is promoted to Commander over the heads of forty of his seniors, the cause being a mystery to the uninitiated. He may be very deserving, but many above him are equally meritorious and ought in all fairness to have been promoted before him.

Commander Cameron, C.B., has been transferred from the Cambridge to the Aurora, vice Commander the Hon. A. Hewett, who joins the Duncan.

In a speech of very moderate length, and of a somewhat ligneous type, the Army Estimates for the coming year were on Monday night laid before the House of Commons. That the matter-of-fact cipher has an antagonistic effect on speech we are well aware; but this difficulty, provided there be personal interest in the subject, can be overcome, for in introducing that intensification of cipherical productions, the Budget, the late Premier can afford to point to some of his most brilliant orations. The circularity of Mr. Hardy's speech was startling, it having the tone and bearing of the Royal Warrant throughout, and thus the too prominent appearance of the civil element at the War Office. The reorganization of the Royal Artillery occupied a prominent position, and we trust that the idea may be beneficial in its results. The territorial reorganization was conspicuous by its absence. The officers who are affected by the Promotion and Retirement Commission are sincerely thanked for their patience in adversity, which, from the tone of the speech, we imagine, will still be somewhat more sorely tried. We are not sorry to find that it has been decided to make alteration in the regulations for obtaining officers for the Line from the Militia, notwithstanding a very excellent counterpoise of bone and muscle to competitive examination has thus unfortunately had to be withdrawn. The position of the medical officers would, from the speech, appear now to depend entirely upon themselves. As regards the all-important question of recruiting, we have the undoubted information that the Army is now being taken by force, that men are pressing in faster than required. We are exceedingly pleased to hear that this is the case. Such is the principal detail of our War Secretary's speech. It is to be regretted that much of it which would seem to require immediate solution has been postponed to the more convenient season, and we must again remark that an Army without Commissariat, Medical, or Transport Departments can be but a very poor sort of Army; at all events, our neighbours will think so.

We took occasion lately to point out the necessity for our adopting some regulation revolver for officers. We are glad to find our remarks have had the desired effect, for the following will be found among the March General Orders:—"Officers of the Army who may wish to provide themselves with pistols are informed that if they procure Adams' revolvers, of either of the patterns described below, they will be in a position to obtain service ammunition for them from the stores of an army in the field. No. 1.—The service pistol (Mark III.) A breech-loading self-cocking revolver, six chambers, parts interchangeable. Length of barrel, 6 inches; length of chambers, 1·85 inches; weight, 2lbs. 4 oz.; calibre, 0·45 inch. No. 2.—A pistol identical with the above, except in length of barrel and weight. Length of barrel, 4 inches; weight, 2lbs. 2 oz. These pistols are marked 'Adams' Patent,' and bear a trade mark. They may be obtained from John Adams, managing director, Adams' Patent Small Arms Company, Limited, 391, Strand."

The command of the Royal Artillery in the Dublin District, and also a Horse Artillery jacket, are falling vacant by the promotion of Colonel C. B. Fuller.

It must have been very satisfactory to members of the Service to have read of the effectual snub administered last Monday to Sir George Campbell. That tedious M.P., in effect, urged on the Government the necessity of taking security that naval and military officers who commuted their half or retired pay should not subsequently enter a foreign Service contrary to the wishes of the authorities of their own country. As Mr. Hardy justly observed, it would be intolerable that an officer should be unable to sever his connection with the Army or Navy. The commutation which an officer receives is for past services, and it would be most unjust were the receipt of that sum to fetter his freedom of action for the future more than that of any other civilian.

With the Army Estimates, on Monday night, in the House of Commons, all would seem to have been intense jubilation, warm congratulation, and rosy smiles. No croaking raven was to be heard. "Where is Lawson?" was asked. Can the irrepressible baronet have become content? Maybe he has learned a lesson by recent events.

A French chronicler, Bernadille, thus describes how village lads drew lots thirty years ago. They arrived at the chief town of the canton with drums and banners, singing the "Conscript of 1810" in a lugubrious strain:—

Le maire, aussi le préfet
N'en sont deux jolis cadets,
Ils nous font tiré-z-au sort,
Tiré-z-au sort, tiré-z-au sort,
Ort!
Ils nous font tiré-z-au sort
Pour nous conduire à la mort.

Adieu donc, mes chers parents,
N'oubliez pas votre enfant;
Crivez lui de temps en temps,
De temps en temps, de temps en temps,
Emps!
Crivez-lui de temps en temps
Pour lui envoyer de l'argent.

Then the Sous-Prefect arrived, with head erect, and glittering with gold lace, escorted by the Mayor with his scarf, and respectfully followed by all the little boys of the place. The drawing always terminated by the bad numbers getting tipsy through seeking consolation in the bottle, and by the good numbers getting equally intoxicated in their delight at having escaped military service.

It is much to be feared that the interests of the Auxiliary Forces are not sufficiently studied at the War Office. When an officer retires from the Army the question ought to be put to him—"Are you disposed to accept service either in the Militia, Yeomanry, or Volunteers?" A list of those replying in the affirmative should be kept in the office of the Inspector-General of Auxiliary Forces, with particulars as to the age, eligibility, &c., of the candidates. Were this done, the services would be retained of many and many a good officer who never thinks of applying for a commission, but who would, nevertheless, be ready to accept one were the authorities to encourage him to do so. The War Office ought to take the initiative in all changes calculated to produce good. Yet, owing to the predominance of the civilian element, it is content in at least one Service—the Volunteer—to allow matters quietly to run their course, until the members at last, in utter hopelessness, move for themselves. It does not say much for our military system that we should not only not compel retired officers to accept service in the Auxiliary Forces, but never even solicit their acceptance of commissions. All a commanding officer ought to be required to do when he stands in need of a Major or a Captain should be to request the War Office to recommend him one. It will, of course, be said that "difficulties stand in the way." This is too common an excuse; it is put forward whenever any suggestion is made. It is in these small matters that our military system is so faulty, and its shortcomings are nowhere more strikingly exemplified than in the Militia and Volunteers—two Services the value of which might be largely increased if only they were properly administered.

ADMIRALTY CIRCULAR.

The following Dockyard Circular, No. 2, N.S., dated February 21, has been received by the Admiral-Superintendents:—

My Lords have had under their consideration the question of iron *versus* wooden mooring buoys, and they adhere to the decision come to in 1865, approving of iron mooring buoys being used, and the following directions are to be observed in future:—

2. No more wooden mooring buoys are to be obtained, and all new mooring buoys supplied in future are to be of iron.

3. With a view to the due preservation of iron buoys, they are to be taken up as often as may be considered necessary, and well coated with a good protective paint or composition.

4. A printed slip for the insertion of the above directions in the book of home dockyard instructions is enclosed.—By command of their Lordships, VERNON LUSHINGTON.

We learn from the *Irish Times* that "the quartermastership at the Curragh is to be filled by Sergt.-Major Sim. Sergt. Sim served in the Crimea with the 1st Batn. 21st Fusiliers, when his courage and conduct as a soldier won for him every decoration that a non-commissioned officer could obtain. The late Earl de la Warre, who commanded the 21st in the Crimea, some years since recommended Sergt.-Major Sim for his present appointment, as being one of the most distinguished soldiers in the Army. He has the Crimean and Turkish Medals, the Legion of Honour, the French War Medal, and Long Service Medal, and latterly was granted the annuity."

The Army.

Royal Horse Guards. The Special Correspondent of the *Times* at Pera writes, under date Feb. 27:—"I have a letter from Capt. Burnaby, dated Erzeroum, Feb. 9, some of the particulars of which may interest those friends of the intrepid traveller who have lately been longing for news of his progress. Capt. Burnaby arrived at Erzeroum on the 7th, after a long and very hard march through deep snow and over very high mountains, his route being by Ismid, Angora, Yuzgat, Tokat, and Sivas, from which latter place he made a detour by Arabkir and Egin to Ersingan, and hence to Erzeroum. He describes the roads, or rather tracks, for roads do not exist, as being in a fearful state, the spots where no snow was being quagmires, with the mud 2ft. to 3ft. deep. The journey, however, had been an interesting one. The Captain tells us that he has visited Circassian, Tartar, Kurd, Turkoman, Armenian, and Greek villages, besides the Turkish, and he has had a fair opportunity of learning the actual state of affairs in that out-of-the-way part of the world. He found that the Armenians get on tolerably well with the Turkish authorities in all the towns he went through, with the exception of Direcke; but, he adds, they are certainly bullied by the Turkish lower orders, who are in their turn bullied by the Circassians. Capt. Burnaby attributes this to the prostrate and cowed disposition of the Armenians, who are not as ready with the cold steel as the Circassians. He seems to have no very high opinion of the Armenians, whom he describes as Christians only in name, and superstitious to the last degree. The fact, however, that their women are kept in similar bondage to the Mussulman women, and are usually shut up in the harem, admits of an easy explanation, for, wherever the Armenian women are safe, as here in Constantinople or at Smyrna and other large towns, the yasmak has been laid aside, and harem seclusion has ceased. Capt. Burnaby has visited some of the prisons, and has taken care to come upon them unannounced, giving no time to the authorities to prepare for his visit. He found very few Armenians among the prisoners, and witnessed no instances of torture or of cruel treatment of the inmates. He says that things at Erzeroum look very warlike, and every one believes war imminent. He purposed, when he wrote, to leave Erzeroum in the following week, and proceed to Van, a twelve days' march over the mountains. From Van he intended to make his way through Bayazid, Kars, and Ardahan to Batoum. His English servant was knocked up, and he had to get a fresh Turkish one, having been robbed by the Turkish attendant he had hired at Constantinople. Of his various adventures he will have not a little to tell when he gets back 'all right,' as is always the case with him, to his friends."

3rd Hussars. Lieut. and Adjt. Berkeley will obtain the troop vacant in consequence of Capt. Nettles' retirement, and Lieut. Mac Ivor is thought likely to be appointed adjt. Sub-Lieut. Jackson has passed the lower standard examination in Hindostanee.

10th Hussars. Lieut. Hon. J. P. Napier has been appointed interpreter. Sub-Lieut. Fisher has qualified for promotion.

11th Hussars. Lieut. Close has been granted leave from India to England for twelve months, on private affairs.

12th Lancers. Surg.-Major J. Landale, M.D., has been appointed to the medical charge on the arrival of the regiment in India from England.

20th Hussars. The regiment gave a grand assault-of-arms under the dome of the Royal Pavilion, Brighton, on the 28th ultimo. There was a large attendance. The performance, which was under the able superintendence of Capt. Onslow, passed off with great *éclat*. The regimental theatricals take place at the Theatre on Tuesday next, when *Caste* and *Round the World in Eighty Days* will be acted. Capt. Chenevix-Trench met with an accident on Friday last. He was riding, when his horse stumbled and rolled over him. He was much bruised and shaken, but suffered no serious injury. Surg.-Major W. Ffolliott has left for India, much to the regret of all ranks.

ROYAL ARTILLERY.

The death is announced of Lieut.-Gen. Sir John Fordyce, K.C.B. (late Bengal), col. commandant, 16th Brig. The late General, who was educated at Addiscombe, obtained his commission as second lieut. May, 1822, and soon after his arrival in Bengal served with the force under Gen. Morrison in the attack on and capture of Arracan in 1824-5. He served the campaign of the Sutlej of 1845-6, and commanded a battery of Artillery at the battles of Ferozeshah and Sobraon, and in the advance on and occupation of Lahore. He served the Punjab campaign of 1848-9, and commanded the 9-pounder troop of Horse Artillery at the battles of Chillianwallah and Goojerat, and commanded the division of the Bengal Artillery sent with the forces under Gen. Gilbert in pursuit of the Sikh Army, and was present at its surrender at Rawul Pindee. He was also present at the passage of the Attock and further pursuit of the Sikhs and Afghans to the Khyber Pass. He commanded the Artillery first sent into the Eusofzai country with the force under Col. Bradshaw in Dec., 1849, and commanded the Artillery with the force under Sir Charles Napier in forcing the Kohat Pass in Feb., 1850 (medal for Arracan, the medal and clasp for Sobraon, and medal and two clasps for Chillianwallah and Goojerat). His commissions bore date as follows, viz.:—Second lieut., May 10, 1822; first lieut., March 25, 1826; brevet capt., May 10, 1837; capt., April 29, 1840; brevet major, June 19, 1846; major, Feb. 1851; brevet lieut.-col., June 7, 1849; lieut.-col., June 8, 1856; brevet col., Nov. 28, 1854; col., Feb. 18, 1861; major-gen., April 29, 1861; lieut.-gen., Jan. 21, 1872; and col. commdt., April 5, 1873.

Col. G. Selby, 21st Brig. (late Madras), has applied for leave from India to England, on medical certificate.

The following transfers have lately been made:—Major H. McLeod, from F Bat. 20th Brig., at Kamptee, promoted to be lieut.-col., and appointed to the 4th Brig., at Ahmedabad, vice Lieut.-Col. H. Le Cocq, transferred to the 24th Brig., at Woolwich; Major C. R. Buckle, from half pay, to F Bat. 20th Brig., at Secunderabad; Major H. Anderson, from temporary half pay to G Bat. 24th Brig.; Capt. J. A. Tillard, from C Bat. 4th Brig., at Belgaum, promoted to be major, and appointed to No. 2 Bat. 21st Brig., at Gwalior, vice Jackson, retired on full pay; Capt. P. M. Rolland, from A Bat. 20th Brig., at St. Thomas' Mount, to be major, and appointed to No. 1 Bat. 5th Brig., at Tonghoo, vice Armstrong, deceased; Capt. F. T. Lloyd, from B Bat. 4th Brig., at Deesa, to No. 3 Bat. 1st Div. Depôt Brig., at Sheerness; Capt. G. Best, from the Riding Establishment, Woolwich, to C Bat. D. Brig., at Dublin, vice F. J. Mortimer, transferred to No. 4 Bat. 21st Brig., at Lucknow; Capt. C. F. Dickson, from No. 6 Bat. 13th Brig., at Kyragully, to No. 3 Bat. 3rd Brig., at Pembroke Dock, vice Capt. F. W. Carey, transferred to D Bat. 19th Brig., at Fyzabad; Capt. G. J. Gillies, from the 19th Brig., at Lucknow, to No. 6 Bat. 13th Brig., at Kyragully, vice Dickson; Capt. T. B. Tyler, from adjt. 4th Brig., at Ahmedabad, to the Riding Establishment, Woolwich, vice Best; Capt. W. F. Nelson, to B Bat. 4th Brig., at Deesa, vice Capt. Lloyd, transferred to the Depot Brig.; Capt. G. A. French, from the Supy. List, to No. 3 Bat. 23rd Brig., at Woolwich; Capt. F. E. Loraine, from the Supy. List, to A Bat. 2nd Div. Depot Brig., at Woolwich, vice Capt. E. S. Lockyer, appointed adjt. 4th Brig., at Ahmedabad; Capt. G. Firebrace, from the Supy. List, to F Bat. 9th Brig., at Ahmednugger, vice Capt. H. W. Rooke; Capt. A. J. Pearson, from the Supy. List, to A Bat. 20th Brig., at St. Thomas' Mount, vice Rolland; Lieut. R. Fox, from No. 5 Bat. 2nd Brig., at Portsmouth, to C. Bat. 4th Brig., at Belgaum, on promotion to capt.; Lieut. R. H. Wallace, from A Bat. Depot Brig., at Woolwich, to E Bat. 9th Brig., at Kirkee; Lieut. J. P. Ewing, from E Bat. F Brig., at Campbellpore, to No. 2 Bat. 5th Brig., at Secunderabad, on promotion to capt.; Lieut. F. H. Taylor, from A. Bat. E Brig., at Canterbury, to No 1 Bat. 12th Brig., at Malta; Lieut. G. C. Wynne, from F Bat. 16th Brig., at Hilsea, to No. 1 Bat. Depot Brig., at Sheerness, vice J. T. Bury, transferred to No. 2 Bat. 6th Brig., at Aden, on appointment as aide-de-camp to Gen. Primrose; Lieut. W. W. Rawes, from C Bat. D Brig., at Dublin, to No. 2 Bat. Depot Brig., at Sheerness, vice Lieut. C. T. Noble, transferred to No. 7 Bat. 5th Brig., at Tonghoo; Lieut. J. P. Cundill, from No. 3 Bat. 7th Brig., at Halifax, to No. 1 Bat. Depot Brig., at Sheerness, vice Lieut. C. M. Barlow, transferred to No. 6 Bat. 10th Brig., at Dover; Lieut. H. H. Costobadie, from B Bat. D Brig., at Newbridge, to C Bat. C Brig., at Bangalore; Lieut. W. D. Corfe, from No. 4 Bat. 5th Brig., at St. Thomas's Mount, to E Bat. 9th Brig., at Kirkee; Lieut. G. M. Stevens, from No. 7 Bat. 10th Brig., at Dover, to E Bat. 20th Brig., at Kamptee, vice Lieut. P. G. Hepburne, transferred to E Bat. F Brig., at Campbellpore; Lieut. F. O. B. Foote, from B Bat. Depot Brig. R.H.A., at Woolwich, to A Bat. E Brig., at Canterbury, vice Taylor, promoted; Lieut. W. C. Arbuthnot, from No. 1 Bat. 10th Brig., at Dover, to G Bat. 24th Brig., at Woolwich, vice Lieut. J. Wodehouse, transferred to A Bat. Depot Brig. R.H.A., at Woolwich; Lieut. G. J. Playfair, from G Bat. 14th Brig., at Dublin, to C Bat. D Brig., at Dublin, vice Rawes; Lieut. the Hon. H. C. Denison, from A Bat. Depot Brig. R.H.A., at Woolwich, to B Bat. D Brig., at Newbridge, vice Costobadie, transferred to the C Brig.; Lieut. F. W. Radcliffe, from D Bat. 1st Brig., at Aldershot, to No. 1 Bat. 7th Brig., at Bermuda, on appointment as insptr. of warlike stores at that station; Lieut. F. J. Roch, from E Bat. 24th Brig., at Woolwich, to A Bat. Depot Brig. R.H.A., at the same station; Lieut. W. R. Daunt, from No. 7 Bat. Depot Brig., at Woolwich, to No. 2 Bat. 2nd Brig., at Portsmouth, vice Lieut. E. A. Burrowes, transferred to No. 5 Bat. same brigade, also at Portsmouth; Lieut. T. E. Rowan, from No. 4 Bat. 17th Brig., at Gibraltar, to No. 5 Bat. 21st Brig., at Agra, vice Lieut. A. J. Hughes, transferred to No. 1 Bat. 10th Brig., at Dover; Lieut. C. N. Simpson, from No. 4 Bat. 23rd Brig., at Golden Hill, to D Bat. 1st Brig., at Aldershot, vice Lieut. Radcliffe, embarked for Bermuda; Lieut. H. J. Croft, from No. 7 Bat. 23rd Brig., at Tilbury Fort, to F Bat. 16th Brig., at Hilsea; Lieut. E. A. Lambart, from G Bat. 20th Brig., at Kamptee, to G Bat. 11th Brig., at Nowgong; Lieut. J. L. Keir, from No. 6 Bat. 13th Brig., to G Bat. 14th Brig., at Dublin; Lieut. F. A. Curteis, from No. 6 Bat. Depot Brig., at Sheerness, to E Bat. 24th Brig., at Woolwich; Lieut. E. H. Walker, from No. 7 Bat. 7th Brig., at Jamaica, to No. 3 Bat. same brig., at Halifax; Lieut. F. B. Russell, from B Bat. 9th Brig., at Kurrachee, to No. 3 Bat. 6th Brig., at Aden; Lieut. C. M. Downing, from C Bat. C Brig., at Bangalore, to B Bat. Depot Brig. R.H.A., at Woolwich; Lieut. F. L. Archer, from No. 3 Bat. 22nd Brig., at Mauritius, to C Bat. C Brig., at Bangalore; Lieut. R. Purdy, from B Bat. A Brig., at Exeter, to E Bat. F. Brig., at Campbellpore; Lieut. R. C. North, from the 24th Brig., at Woolwich, to B Bat. A Brig., at Exeter; Lieut. A. R. Fraser, from C Bat. 1st Brig. at Aldershot, to D Bat. A Brig., at Woolwich; Lieut. L. W. Parsons, from 24th Brig., at Woolwich, to C Bat. B Brig., at Umballa; Lieut. W. B. Fletcher, from G Bat. 20th Brig., at Kamptee, to No. 8 Bat. 3rd Brig., at Plymouth; Lieut. E. Warde, from B Bat. Depot Brig., at Woolwich, to C Bat. 1st Brig., at Aldershot, vice Fraser; Lieut. G. W. Howard-Vyse, from A Bat. 24th Brig., at Woolwich, to B Bat. 9th Brig., at Kurrachee; Lieut. A. E. Russell, from No. 7 Bat. 5th Brig., at Tonghoo, to A Bat. 11th Brig., at Barrackpore, vice W. L. Davidson, transferred to A Bat. B Brig., at Bengal; Lieut. A. Lambert, from No. 6 Bat. 10th Brig., at Dover, to G Bat. 20th Brig., at Kamptee; Lieut. K. J. Murchison, from No. 3 Bat. Depot Brig., at Sheerness, to No. 4 Bat. 3rd Brig., at Staddon; Lieut. E. M. Baker, from the Supernumerary List, to No. 6 Bat. 6th Brig., at Bombay; Lieut. E. Buckle, from B Bat. 8th Brig., at Meerut, to E Bat. same brig., at Ferozepore.

The Woolwich correspondent of the *Morning Post* writes:—"The absorbing subject of interest throughout the Artillery branch of the Service is at present the reorganization scheme, more definite details of which have now transpired. It is understood that the redistribution of the brigades will take the following form:—Royal Horse Artillery: A and B Brigades will be combined into A Brigade, and its head-quarters fixed at Woolwich; C and D Brigades will become B Brigade, with head-quarters at Dublin. E and F will form C Brigade, whose head-quarters will be at Aldershot. Field Artillery: 1st and 9th Brigades will form the 1st Brigade, with head-quarters at Woolwich; 4th and 18th will become the 2nd at Sheffield; 8th and 14th will become the 3rd at Newbridge; 11th and 16th will become the 4th at Leith Fort; 19th and 24th will become the 5th at Woolwich; 20th and 25th will become the 6th at Woolwich. Garrison Artillery: The 2nd and 22nd will become the 7th Brigade, whose head-quarters will be at Portsmouth; 3rd and 5th will form the 8th Brigade at Devonport; 10th and 13th will constitute the 9th Brigade at Dover; 12th and 15th will become the 10th Brigade at Cork; and the 21st and 23rd will be formed into the 11th Brigade at Sheerness. The disestablished Depôt Brigade will probably be distributed as follows;—A and B Batteries of Royal Horse Artillery to A and C Brigades respectively (a new depôt brigade will be formed at Dublin for B Brigade); A Field Battery to 1st Brigade, B Battery to the 5th Brigade, and C to the 6th Brigade. Three new batteries will be formed for the 2nd, 3rd, and 4th Brigades, but the garrison brigades will suffer a reduction of two batteries. There will be no garrison brigade at Woolwich, and the abolition of the depôt brigade is regarded with general satistfaction, as it has grown too large and unwieldy for proper management."

The following exchanges have been sanctioned:—Between Major H.W. Shakerley, A Bat. 2nd Div. Depôt Brig., at Woolwich, and Major L. C. A. de Cetto, No. 4 Bat. 3rd Brig., at Staddon; between Capt. H. F. Phillpotts, No. 4 Bat. 2nd Brig., Portsmouth, and Capt. W. Law, No. 1 Bat. 7th Brig., Bermuda; between Capt. J. C. Robson, F Bat. 16th Brig., Hilsea, and Capt. R. H. Wallace, E Bat. 9th Brig., Kirkee; between Capt. H. Soames, G Bat. 18th Brig., Leith, and Capt. W. R. Rudge, No. 5 Bat. 3rd Brig., Golden Hill; between Lieut. G. R. Moore, A Bat. 20th Brig., Thomas's Mount, and Lieut. W. L. Alves, No. 6 Bat. 5th Brig., Cannanore; between Lieut. B. Burton, F Bat. 24th Brig., Woolwich, and Lieut. W. J. J. Fowler, C Bat. 16th Brig., Newcastle.

ROYAL ENGINEERS.

The following changes have taken place:—Brevet Col. E. M. Grain, from Pembroke to Gravesend; Lieut.-Col. W. H. Noble, from Gravesend to the Royal Arsenal at Woolwich; Brevet Lieut.-Col. P. H. Scratchley, at the Royal Arsenal, Woolwich, ordered to Australia; Brevet Lieut.-Col. F. Mould from Exeter, on sick leave; Brevet Lieut.-Col. E. T. Brooke, ordered home from the Cape of Good Hope; Major J. T. Twigge, ordered home frem Roorkee; Capt. C. R. T. Davidson, from Cork to Shorncliffe; Lieuts. A. C. Alexander, from Cork to Chatham; C. H. Gordon, at Halifax, N.S., ordered home; H. O. Selby, from Kirkee to Poona; W. Peacocke, from Roorkee to Allahabad; F. Gosset, from Canterbury to Manchester; C. H. Johnston, at Bermuda, ordered to Halifax, N.S.; C. R. Conder, from sick leave, on special duty; H. H. Kitchener, from sick leave to Palestine; H. P. Knight, from Cork Harbour to Devonport; and J. Clarke, from the S.M.E., Chatham, on leave. Late Bengal.—Capt. E. G. Clayton, from Chatham to Dublin. Late Madras.—Lieut.-Col. J. O. Mayne, from Madras to Lucknow. Late Bombay.—Capt. G. W. Oldham, from leave to Europe to Bombay.

Capt. C. R. Davidson, late in command of the 23rd Comp., which has recently left Cork Harbour for Chatham, has assumed command of the 1st Comp. at Shorncliffe.

A statement has been issued showing the rank and names of the several officers who since July, 1876, have been sent to various places in the European and Asiatic provinces of Turkey—the dates of their departure, &c. From this it appears that Col. W. O. Lennox, V.C., C.B., embarked for Ragusa and Constantinople on Nov. 3, 1876, arriving on Nov. 10; Lieut.-Col. Home, C.B., Capt. T. Fraser, and Lieut. Cockburn embarked for Constantinople Oct. 29, and arrived Nov. 11; Capt. Grover and Capt. Anstey left for Constantinople Dec. 19, and arrived Jan. 9; and Lieut. W. A. H. Hareleft Dec. 19, and arrived Jan. 17; Capt. Ardagh proceeded to Vienna about Aug. 29 last on duty connected with the Intelligence Branch, and subsequently joined Lieut.-Col. Home's party at Constantinople.

Major-Gen. G. W. Walker (late Madras) has obtained permission to return to England from India on the 2nd proximo, from which date he will reside and draw pay in Europe.

Lieut. W. Coles has passed the lower standard examination in Hindostanee.

Grenadier Guards. Until further orders the minimum standard of recruits for the brigade of Foot Guards is raised from 5ft. 7in. to 5ft. 8in., with a chest measurement of not less than 34in. Recruits of 5ft. 10in., or upwards, must measure 35in. round the chest, as at present fixed.

6th Regiment. Lieut.-Col. Feilden remains with the 2nd Batn. on promotion, Major Austin passing to the 2nd from the 1st Batn., and Capt. Gibbs to the 1st from the 2nd Batn. Major Crawford, 1st Batn., has been granted leave from India to Australia from Jan. 15 to Oct. 15, on medical certificate.

7th Fusiliers. A detachment of the 1st Batn., consisting of three officers and 110 rank and file, under Capt. Keyes, has removed from Richmond Barracks to the Pigeon House Fort, Dublin, to make room for a party of the Royal Scots, about to be sent from Mulligar to join the half-battalion in Dublin. Major Daubeny, 2nd Batn., has been granted an extension of leave from India to England from April 30 to Aug. 31.

8th King's. Brevet Lieut.-Col. Drew succeeds Col. Webb, who has retired, in command of the 2nd Batn., Brevet Major Whitting, adjt. 2nd Royal Lancashire Militia, obtaining the majority.

9th Regiment. Lieut. Massy, 2nd Batn., has been allowed to enter himself as a candidate for the Indian S.C., and has been appointed officiating wing officer of the 20th Bengal N.I., on probation.

11th Regiment. Major Osborn, 1st Batn., obtains command of the 2nd Batn., vice Col. Crompton-Stansfield. Brevet Major Birch will be given the majority, and Capt. Smyth that in succession to Major Naper, retired. Lieut. Jackson, a probationer, second wing subaltern, 1st Bombay Light Cavalry, is to be admitted to the Bombay S.C., with effect from Dec. 8, 1875.

15th Regiment. Sub-Lieut. Phillips, 2nd Batn., has passed the lower standard examination in Hindostanee.

17th Regiment. Lieut. Clarke, 1st Batn., has applied for leave to England, on medical certificate.

22nd Regiment. Brevet Lieut.-Col. Panter, 2nd Batn., has been granted an extension of leave to remain in England from India, from June 13 to Oct. 15, on urgent private affairs.

24th Regiment. Capt. Upcher is posted to the 1st Batn. on transfer from the Supernumerary List. By advices from the Cape of Good Hope we regret to learn that "a fatal accident had befallen Sub-Lieut. R. G. Deane, 1st Batn., whilst bathing in a pond at the Black River, in company with Sub-Lieut. Heaton. Mr. Deane took a high leap into the pond followed with a sudden rise after the dive, such as expert divers are wont to make when diving in shallow water. Mr. Heaton, not seeing his companion swimming about, dived in after him, and found him helpless. Medical advice was obtained, and it was discovered that Mr. Deane was suffering from a fracture of the spine. The poor young fellow lived until the following afternoon when he died painlessly. A post-mortem examination showed the fracture of two bones. Mr. Deane was only nineteen years of age, and was much beloved in his regiment, where he was regarded as a young officer of much promise."

33rd Regiment. Capt. Durrant and Lieut. Jefferson have been detailed for duty at the Wellington Convalescent Depôt during the year. Sub-Lieut. Lyons-Montgomery has qualified for promotion.

37th Regiment. Sergt.-Major M'Kee is about to be transferred to the Royal North Down Militia as sergt.-major.

40th Regiment. Capt. Story has been appointed chief garrison instructor at Sealkote.

44th Regiment. Capt. Irvine has been detailed for duty at the Wellington Convalescent Depôt during the ensuing season.

48th Regiment. Lieut. Fair has been detailed for duty at the Wellington Convalescent Depôt during the ensuing season.

53rd Regiment. Capt. Auchinleck has returned to duty at head-quarters, Birr, on vacating the adjutancy of the 6th Royal Lancashire Militia.

56th Regiment. This regiment has again had the honour of winning the Deccan and Poona Cups. In 1871 the regiment won the Poona Cup, the only one offered for competition, and in 1872 and 1873 both the Deccan and Poona Cups. In 1874 there was no meeting, and in 1875, on account of cholera, the meeting was for regiments stationed in the Poona district only, and no cups were competed for. Thus, the regiment has won all the cups that have been offered for competition by the Bombay Presidency Rifle Meeting since its arrival in India. In 1871 and 1873 the Northern India Rifle Association silver medals were won by Lieut. Alexander and Corpl. Melody respectively, and in the latter year Colr.-Sergt. Tuck won the championship of Southern India, with silver medal of National Rifle Association. The following is a list of the prizes and prize-winners during the meeting of 1876, at which sixteen non-commissioned officers and men represented the regiment:—Sergt.-Instr. of Musketry Moulton, seven prizes, 155 rs.; Paymr.-Sergt. Baines, five prizes, 65 rs.; Colr.-Sergt. Tuck, thirteen prizes, 415 rs.; Sergts. Nunn, one prize, 5 rs.; Sullivan, eight prizes, 167 rs.; and Dignam, three prizes, 30 rs.; Corpls. Salter, eight prizes, 125 rs.; and Weller, five prizes, 70 rs.; Privates Sutton, five prizes, 50 rs.; Robins, five prizes, 80 rs.; Baldry, one prize, 10 rs.; and Connolly, three prizes, 30 rs.; Deccan and PoonaCups, two prizes, 275 prizes; total, sixty-six prizes and 1,477 rs. Capt. Maine's period of appointment as garrison instructor at Poona expires on Thursday next.

59th Regiment. Capt. Griffith's period of appointment as garrison instructor at Mhow expires on Thursday next.

60th Rifles. Capt. Charley, 2nd Batn., has applied for leave from India to England, on medical certificate.

62nd Regiment. Major Hay has been granted leave from India to England for fifteen months, on private affairs. Capt. Kyle has been appointed station Staff officer at Landour.

63rd Regiment. Capt. Stourton has been granted leave from India to England, on medical certificate.

65th Regiment. Lieut. Whittall has been appointed interpreter. Lieut. Rendle is a candidate for the Indian S.C., and has been appointed officiating wing officer of the 22nd Madras N.I., on probation.

67th Regiment. Capt. Brereton has been detailed for duty at the Wellington Convalescent Depôt during the ensuing season.

68th Light Infantry. Lieut. Marx has been granted leave from India to England for six months, on private affairs. Sub-Lieut. Paget has passed the lower standard examination in Hindostanee.

73rd Regiment. Capt. Gunter has been appointed assist. garrison instructor at Sealkote.

83rd Regiment. Sub-Lieut. Tinley has passed the lower standard examination in Hindostanee.

89th Princess Victoria's. An interesting racquet match was played at Thayetmyo during the race week. The players were Major Plant, Deputy-Commissioner, Thayetmyo, and Lieut. Anderson, 6th N.I., against Capt. Cuthbert and Lieut. and Adjt. McMurray, 89th Regt. The game, best three out of five. The 89th team won the toss, went in, and won the first three games easily. Sub-Lieuts. Munn and Shakespear have joined on appointment.

90th Light Infantry. Lieut. Stevens obtains the vacant company.

Commissariat Department. In answer to a question from Col. Sir H. Havelock as to a conflict of authority arising from the relations between the Control paymasters and the Comy.-Gen. of Supply and Ordnance, and as to a standstill of promotions and appointments to the Pay Sub-Department, owing to the fact that the officers bore commissions appointing them to the defunct Control Department, on Monday. Mr. Hardy said:—"Representations have been made with regard to certain paragraphs of the Ordnance Store Regulations which have been interpreted by some Ordnance Store officers in a sense opposite to that in which the Commissariat Regulations as to pay have been understood by Commissariat officers. It has been suggested at times that the Pay Department should be independent of the Commissariat. The promotions and appointments in the Pay Sub-Department of the late Control are practically suspended. Both the latter points stand for decision in a scheme now under immediate consideration, and with regard to the first matter mentioned advantage will be taken in the issue of revised regulations to clear up the point in dispute."

Medical Department. Surg.-Major J. Watts, Surgs. E. H. Joynt and J. A. Clery, M.B., are detailed to proceed from India to England in H.M.S. Crocodile, Surgs.-Major R. W. Berkeley and W. L. Baker, embarking at Aden. Surg.-Major F. W. Wade and Surg. W. R. G. Hinde are to take up duty at Aden. Depty. Surg.-Gen. Macbeth is about to be placed on the Retired List.

It has been notified under the authority of her Majesty's Government that, for all purposes under the Staff Corps Warrant, except for the calculation of service qualifying for admission to the Staff Corps and for furlough and pension, an officer's service will be considered as commencing from the date of his first permanent commission, that is, from the date of his commission as lieutenant.

THE AUXILIARY FORCES.

MILITIA.

Royal Anglesey. Capt. A. J. Hepper, Royal Engineers, has taken up duty at Beaumaris as adjt. The regiment is to train this year as an Engineer corps.

Royal Glamorgan. The adjutancy is vacant, Capt. French, 69th Foot, having resigned his appointment.

Hampshire Artillery assembles for training at Gosport on April 26.

2nd Royal Lancashire. The adjutancy is falling vacant, Brevet Major Whitting, 8th King's, being on the point of rejoining his regiment on promotion.

4th Royal Lancashire. The regiment is ordered to assemble for training at Warrington on April 23, the recruits undergoing six weeks' preliminary drill. There are still serving six officers who joined on the formation of the regiment in 1853, viz., the hon. col., col.-commandant, two majors, and two capts., the latter being the seniors of their rank in the Service. Notwithstanding the utter want of accommodation at Warrington for both officers and privates, the billeting system is still in vogue.

Royal Monmouth. Capt. Sir A. Mackworth, Bart., Royal Engineers, has taken up duty as adjt. at head-quarters, Monmouth. Arrangements are being made for the regiment to be trained this year as an Engineer corps.

Queen's County Rifles. Major Abbott has been recommended for the hon. rank of lieut.-col.

Royal North Down Rifles. Sergt.-Major M'Kee, 37th Regt., is about to be transferred to the regiment as sergt.-major.

The reopening of the Militia school of instruction at Dublin garrison has been postponed to the latter end of March or the beginning of April.

VOLUNTEERS.

London Rifle Brigade. Major Sir Hector Hay, Bart., is retiring.

3rd Norfolk Rifles. Capt. Upcher, 24th Foot, has vacated his appointment as adjt. on the expiration of his five years, and returns to regimental duty.

Shropshire Artillery. Capt. E. H. Moore, Royal Marine Artillery, has been appointed to the adjutancy.

1st Surrey Artillery. The annual ball took place at Willis's Rooms on Thursday evening. The number present was about 200, including H.S.H. the Duke of Teck (hon. col.), Lieut.-Col. Hope, V.C., and most of the officers. Dancing commenced at half-past 9 o'clock, and was sustained throughout the evening.

THE INDIAN ARMY.

5th Bengal Cavalry. Surg.-Major T. G. Skardon has been appointed to the medical charge.

4th Bengal N.I. Col. H. C. Anderson, commandant, has been granted furlough to Europe for two years on private affairs. Col. F. Duffin, wing commandant, has been granted leave to the hills to July 8, on medical certificate.

6th Bengal N.I. Capt. W. Atkins, wing officer, has been granted leave from India to England for two years on private affairs. Capt. A. H. Handcock, wing officer and adjt., has been granted leave to Darjeeling to Sept. 1 next, on private affairs.

20th Bengal N.I. Lieut. H. S. Massy, 9th Foot, has been appointed officiating wing officer on probation, on becoming a candidate for the Indian S.C.

39th Bengal N.I. Surg.-Major J. A. C. Hutchinson, M.D., has been appointed medical officer.

43rd Bengal N.I. Capt. C. McD. Skene, wing officer, has returned to duty in India from leave in England.

4th Punjab Cavalry. Major J. Gillespie died on Feb. 7 from apoplexy. Major Gillespie served in the Meranzaie Expedition under Brigdr. Chamberlain in 1856 (medal with clasp). Was present at Kohat on the outbreak of the Mutiny in 1857, and served on the frontier throughout the subsequent operations. Served with the force under Brigdr. Chamberlain against the Wuzeerees in 1859 (medal with clasp). Commanded the troops in the Goomul Valley in 1860, had several skirmishes with marauding parties of Wuzeerees, and retook camels and plunder. He entered the Army Jan. 20, 1851; became lieut., Jan. 29, 1854; capt., Jan. 20, 1863; and major, Jan. 20, 1871.

2nd Goorkhas. Lieut. R. C. Hadow, 55th Foot, officiating wing officer on probation, has been granted leave to Calcutta from Jan. 18 to May 18 to study the native languages.

Central India Horse. The following brigade orders by the commandant, dated Nov. 5 and 6, 1876, making the following appointments, have been confirmed:—Lieut. H. A. Vincent will take charge of the duties of Staff officer to the force, as a temporary arrangement, from Nov. 6. Surg. R. Caldecott received the medical charge of the 1st Regt. Central India Horse, from Surg. A. Barclay, who received medical charge of the 2nd Regt. from Surg. Caldecott, from Nov. 6, 1876. Capt. A. H. S. Neill, adjt. 1st Regt., officiated as second squadron officer from May 5 to Sept. 30, 1876, in addition to his duties as officiating third squadron officer. Lieut. H. A. Vincent, first squadron subaltern 1st Regt., and officiating adjt., to officiate as adjt. in addition to his duties as first squadron subaltern, from Oct. 1, 1876. The following orders, issued by the commandant, Jan. 1, 1877, consequent on the return from furlough of Capt. M. G. Gerard, first squadron subaltern 2nd Regt., have been confirmed from Dec. 22, 1876:—1st Regt.—Lieut. A. G. A. Durand, officiating second squadron subaltern, to officiate as first squadron subaltern, vice Lieut. Vincent, officiating as adjt.; and Lieut. H. E. Ravenshaw, officiating first squadron subaltern 2nd Regt., to officiate as second squadron subaltern, vice Lieut. Durand. 2nd Regt.—Capt. M. G. Gerard, first squadron subaltern, to officiate as third squadron officer; and Lieut. E. D. H. Daly, second squadron subaltern, to officiate as first squadron subaltern.

Corps of Guides. The following appointment has been made:—Lieut. W. R. P. Hamilton, officiating wing officer on probation, to be squadron officer, vice Lieut. C. G. Mansel, whose appointment to this corps is cancelled at his own request.

1st Madras Light Cavalry. Major G. S. Hooper has been appointed a member of the Madras Committee on Remounts.

11th Madras N.I. Lieut.-Col. S. New, wing commander 29th N.I., has been appointed wing commander.

19th Madras N.I. Lieut. C. W. Walker, Madras S.C., has been appointed wing officer.

20th Madras N.I. Capt. J. O. Goldie, wing officer, has been granted furlough to Europe for two years on private affairs.

22nd Madras N.I. Lieut. A. W. Rendle, 65th Foot, having entered himself as a candidate for the Madras S.C., has been appointed officiating wing officer.

29th Madras N.I. Major H. S. M. Wynch has been confirmed in his appointment as wing commander. Capt. A. T. Woodhouse, wing officer, has been appointed adjt.

37th Madras N.I. Col. H. C. Z. Claridge, officiating commandant, has returned to India and resumed duty from European furlough.

38th Madras N.I. Capt. W. H. M. Franklyn, Madras General List, has been appointed wing officer.

41st Madras N.I. Capt. E. H. Eyre, adjt., officiating depty.-assist. qrmr.-gen., Northern District, Madras Army, has been transferred to Malabar and Canara.

1st Bombay Light Cavalry. Lieut. F. W. Jackson, 11th Foot, second squadron officer on probation, is about to be admitted to the Bombay S.C.

29th Bombay N.I. Lieut. W. A. Broome, second wing officer, has been appointed wing officer, vice Cunningham, seconded, and Lieut. H. E. W. Beville, officiating second wing officer on probation; Lieut. Broome will continue to act as adjt.

THE ROYAL MILITARY COLLEGE.

The following has been published as a Royal Warrant, dated Feb. 7, 1877:—

The pay and allowances of the officers of our Royal Military College shall, from and after Jan. 1, 1877, be as follows:—Governor, £1,500 a year, with quarters, and in addition to any unattached pay as general officer or pay as a colonel of a regiment to which he may be entitled, but inclusive of all allowances. Commandant and secretary, £750 a year, with quarters, and in addition to any regimental half pay to which he may be entitled, but inclusive of all allowances. Chaplain, surgeon-major, and surgeon, pay in accordance with our Warrants for their respective departments, with quarters, fuel, light, and servants' allowance, in accordance with the regulations in force for their respective departments. Adjutant and quartermaster, regimental pay of his rank (captain or subaltern) and extra-duty pay of 5s. a day, with quarters, fuel, light, forage allowance for one horse, and two soldier servants. Riding-master, 14s. a day, increasing to 15s. a day after fifteen years' service as riding-master, with quarters, fuel, light, servants' allowance, and forage, in accordance with the regulations in force for his department. Professor of fortification, £500 per annum; professor of military surveying, £450; professor of military history and tactics, £450; instructor of fortification, £350; professor of military surveying, £350; professor of military history and tactics, £350, with quarters, but inclusive of all allowances.

2. The foregoing scale of pay and allowances shall include all remuneration of every kind, except any additional pay to which an officer may be entitled as a reward for distinguished service in the field. No person appointed to any office in our Royal Military College subsequent to July 22, 1871, shall be entitled to pension or superannuation allowance for his services in such appointment.

3. When quarters cannot be allotted, the officers of our said College, other than the professors and instructors, shall be entitled to lodging allowance, according to the regulated Army rates, less the proportion for fuel and light in the case of those not entitled thereto.

4. The professors and instructors shall be entitled to £50 a-year as lodging allowance when quarters cannot be allotted to them, in addition to the rates of pay and allowances specified in Article 1. All issues in kind, or allowances in lieu thereof, are inadmissible at the public expense, whether the professors and instructors be in quarters or not.

5. Each officer in charge of a division shall receive extra-duty pay at the rate of £100 a year.

6. The governor, the commandant, and secretary, the adjutant, and quartermaster, and the riding-master of our Royal Military College shall be officers of our Army, and shall be appointed upon the recommendation of our Commander-in-Chief, with the approval of our Secretary of State. The appointments of these officers shall be for seven years, subject to re-appointment in the event of our Secretary of State considering it beneficial for the public service that they should be re-appointed.

7. The professors and instructors shall be officers of our Army; the appointments being open to officers of all ranks, except second lieutenants.

8. The professors and instructors shall be appointed and removed upon the recommendation of the governor of our said College to our Commander-in-Chief, subject to the approval of our Secretary of State.

9. The professors and instructors shall be appointed for seven years, subject to reappointment in the event of our Secretary of State considering it beneficial for the public service that they should be reappointed. Their tenure of office shall not continue after the age of fifty-five years, unless an extension be specially recommended by the governor, and approved by our Secretary of State.

PROVISIONAL ARRANGEMENTS.

10. The officer now holding the appointment of professor of military surveying in our said College, who is in receipt of brevet pay, in addition to his pay of £450 a-year, shall continue to receive the same during his tenure of that appointment.

11. The senior medical officer now serving at our said College shall receive 7s. a-day, in addition to any half pay to which he may be entitled, together with the quarters, servants' allowance, fuel and light, and forage allowance, of which he is at present in receipt. He shall vacate his appointment at the expiration of seven years from the date of our present Warrant, or on his attaining the age of sixty-five years.

12. The quartermaster now employed at our said College, if appointed adjutant and quartermaster, shall receive pay according to service as Cavalry quartermaster, and extra-duty pay of 2s. 6d. a-day for performing the duties of adjutant, or 5s. a-day if he should continue to perform the duties of acting commissary in addition to those of adjutant, together with the quarters, fuel, and light, and servants' allowance, of which he is at present in receipt. He shall vacate his appointment at the expiration of seven years from the date of our present Warrant.

Gathorne Hardy.

The Army Gazette.

WAR OFFICE, PALL MALL, MARCH 6, 1877.

Where not otherwise specified, the following commissions and announcements bear date March 7, 1877 :—

1st Dragoon Guards—Capt. R. J. C. Marter to be Major, vice J. Gunter, promoted into the 4th Dragoon Guards; Lieut. W. C. Underwood to be Capt., vice R. J. C. Marter.

14th Foot—Lieut. W. Mils to be Capt., vice H. A. Burton, made Supy. on being appointed Adjt., 4th West York Militia; Jan. 31, 1877. Lieut. R. H. Atkinson, from the Supy. List, to be Lieut., vice W. Mills; Jan. 31, 1877.

15th Foot—The appointment as Adjt. of Lieut. G. H. Johnson, to be ante-dated to Jan. 1, 1877.

19th Foot—Lieut. G. D. Michell to be Capt., vice C. Skinner, retired: Feb. 24, 1877.

20th Foot—Lieut. F. W. Birch to be Capt., vice G. G. Liddell, made Supy. while serving as Adjt., 49th Middlesex Rifle Volunteer Corps; Feb. 10, 1877.

24th Foot—Capt. R. Upcher, from the Supy. List, to be Capt., vice E. H. B. Sawbridge, retired; Feb. 10, 1877.

29th Foot—Lieut. W, M. Prendergast to be Capt., vice J. Bourke, retired; Feb. 24, 1877.

34th Foot—Lieut. E. Vanrenen to be Capt., vice W. F. C. Grace, made Supy. on being appointed Adjt., 1st Lancashire Rifle Volunteer Corps; Jan. 20, 1877.

37th Foot—Lieut.-Col. R. C. Watson, from half pay, late Ceylon Rifle Regiment, to be Lieut.-Col., vice Brevet-Col. V. H. Bowles, retired on half pay.

38th Foot—Lieut. M. S. Crofton to be Capt., vice P. Morrisey, retired on half pay; Jan. 31, 1877.

46th Foot—Lieut. C. E. de la P. Beresford retires temporarily to the Half-Pay List, without drawing half pay.

47th Foot—Qrmr. M. Carey retires on temporary half pay.

60th Foot—Lieut. C. Hope to be Instructor of Musketry, vice Lieut. H. D. P. Okeden, who resigns that appointment; Jan. 5, 1877.

69th Foot—Capt. P. M. French (Supy. List) retires from the Service, receiving the value of his commission.

81st Foot—Lieut. W. S. Birdwood has been appointed a Probationer for the Indian S.C.

83rd Foot—Lieut. W. Stewart to be Capt., vice G. E. S. Cartwright, retired; dated Feb. 10, 1877.

90th Foot—Capt. F. R. Harvey retires from the Service, receiving the value of his commission.

92nd Foot—Lieut. C. W. H. Douglas to be Adjt., vice Lieut. R. H. Oxley, promoted; Dec. 31, 1876.

94th Foot—Lieut. C. A. Grubb is superseded for absence without leave.

99th Foot—Lieut. G. G. Blaxland retires from the Service, receiving the value of his commission.

100th Foot—Sub-Lieut. J. G. Glancy to be Lieut.; Feb. 11, 1875.

101st Foot—Lieut. J. H. Barnard, C.M.G., from the 19th Foot, to be Capt., in recognition of his services in the Ashantee Expedition of 1874, vice J. W. Arrowsmith, retired.

102nd Foot—Capt. J. Duncan, from the Supy. List, to be Major, vice J. A. Woods, retired on a pension; Feb. 24, 1877.

104th Foot—Lieut. P. Alcock to be Capt., vice H. J. R. Villiers-Stuart, retired; Feb. 24, 1877.

Rifle Brigade—Lieut. T. A. Maberly, to be Capt., vice C. D. Broadbent, deceased; Jan. 9, 1877.

Medical Department—To be Surgs. under the Royal Warrant of April 28, 1876, dated Feb. 4, 1877 :—W. B. Allin, M.B.; M. R. Ryan, M.D.; E. O. Reynolds, gent.; H. J. Robbins, M.D.; J. J. Morris, M.D.; A. E. Hayes, gent.; J. F. Williamson, M.B.; J. T. Carey, M.B.; W. J. R. Rainsford, gent.; I. Boulger, gent.; P. B. Tuthill, M.D.; T. Boyd, gent.; P. H. Johnston, M.D.; F. Murchison, M.B.; I. B. Emerson, gent.; A. Hewett, gent.; E. A. Roche, gent.; G. Laffan, M.D.; U. J. Bourke, gent.; R. Robinson, gent.; J. J. Lamprey, gent.; W. H. Allen, gent.; R. C. Gunning, gent.; G. M. Russell, M.B.; H. Cotton, gent.; J. P. Hunt, M.D.; J. L. Peyton, M.B.; A. W. Carleton, M.B.; G. A. Hughes, M.B.; A. C. Keith, M.B.; J. Brodie, M.B.; F. G. L. Eagar, gent.; and B. W. Large, gent.

Army Hospital Corps—The retirement on temporary half pay of Capt. of Orderlies J. Collin, announced in the *Gazette* of Jan. 16, 1877, to be post-dated from Nov. 11, 1876, to Jan. 17, 1877. Lieut. of Orderlies A. Platt to be Capt. of Orderlies, vice Collin; Jan. 17, 1877. Sergt. E. Enright, to be Lieut. of Orderlies, vice A. Platt.

BREVET.

Lieut.-Col. J. G. Medley, Royal (late Bengal) Engineers, having completed the qualifying service in the rank of Lieut.-Col., to be Col.; Feb. 8, 1877.

Lieut.-Col. J. Jerome, 86th Foot, to be Col.; March 6, 1877.

Lieut.-Col. J. V. W. H. Webb, 8th Foot, to have the hon. rank of Col. upon retiring on full pay.

Capt. C. E. Nettles, 3rd Hussars, to have the hon. rank of Major upon retiring on full pay.

MEMORANDUM.

For, Lieut.-Col. and Brevet Col. E. Seager, from half pay, late 4th Dragoon Guards, to be Inspecting Officer of Yeomanry Cavalry in Great Britain, dated Feb. 24, 1877, as stated in the *Gazette* of Feb. 23, 1877, read, Lieut.-Col. and Brevet Col. E. Seager, from half pay, late 4th Dragoon Guards, to be an Inspecting Officer of Auxiliary Cavalry in Great Britain; Feb. 24, 1877.

The Militia Gazette.

WAR OFFICE, MARCH 6, 1877.

Where not otherwise specified, the following commissions and announcements bear date March 7, 1877 :—

Royal Anglesey—Sub-Lieut. M. C. Curry resigns commission.

Royal Carmarthen Artillery—Sub-Lieut. W. E. Jennings resigns commission.

Dorset—Lieut. R. J. Farquharson resigns commission.

North Durham—Lieut.-Col. J. J. Allison is granted the hon. rank of Col.

Royal Flint—A. F. Jones, Esq., late Capt. 4th Hussars, to be Lieut. (Supy.).

Royal Glamorgan—C. S. C. Crespigny, Esq., late Lieut., 41st Foot, to be Capt.

Royal North Gloucester—Arthur Mainwaring Goodrich, gent., to be Sub-Lieut.

East Kent—Robert Maitland Christie, gent., to be Sub-Lieut.

7th Royal Lancashire—William Byron Browne, gent., to be Sub-Lieut.

Royal London—Lieut. G. Bowring resigns commission.

Norfolk Artillery—George Manners, Baron Hastings, to be Sub-Lieut. (Supy.).

2nd West York—Capt. A. Barff resigns commission. For, the Hon. C. Cathcart to be Lieut. (Supy.), dated March 3, 1877, notified in the *London Gazette* of March 2, 1877, read the Hon. C. Cathcart to be Sub-Lieut. (Supy.), March 3, 1877.

6th West York—Capt. W. C. B. Calverley resigns commission. Stanley Lees Smythe Giffard, gent., to be Sub-Lieut. (Supy.).

Forfar and Kincardine Artillery—Capt. W. McB. Rankine resigns commission.

Highland Borderers Light Infantry—James Russel, gent., to be Sub-Lieut.

1st Royal Lanark—Thomas Dick Smith-Cuninghame, gent., to be Sub-Lieut.

Scottish Borderers—For, Robert Scott Kerr, gent., to be Sub-Lieut. (Supy.), dated Jan. 10, 1877, notified in the *London Gazette* of Jan. 9, 1877, read Robert Scott-Kerr, gent., to be Sub-Lieut. (Supy.), Jan 10, 1877. Charles Copland, gent., to be Sub-Lieut. (Supy.).

Royal Dublin City—Sub-Lieut. H. Perssé to be Lieut., dated July 26, 1876, with date in the General Militia Service of Aug. 8, 1874.

Monaghan—Qrmr. W. Watson resigns commission, and is placed on a retired allowance.

YEOMANRY CAVALRY.

Denbighshire—Francis Egerton Cotton, gent., to be Sub-Lieut. (Supy.).

Duke of Lancaster's Own—Lieut. the Hon. R. G. Molyneux resigns commission.

Leicestershire—Walter Ancell Peake, gent., to be Sub-Lieut.

Nottinghamshire (Sherwood Rangers)—Lieut. F. F. Anderson resigns commission.

ROYAL UNITED SERVICE INSTITUTION.

The forty-sixth annual meeting was held on Saturday in the theatre of the institution, Whitehall, under the presidency of the Right Hon. Gathorne Hardy, M.P. The report for the past year, which was read by Capt. Burgess, the secretary, stated that 38 life members and 124 annual subscribers, making a total of 162 new members, had joined the institution during the past year. The loss by death amounted to 72, and 42 members withdrew their names, whilst the names of 36 had been struck off the list in consequence of the non-payment of their subscriptions for many years, after frequent applications. The increase therefore was 12. Life subscriptions to the amount of £583, including £127 not invested in 1875, had been invested in Three per Cent. Consols. The funded property of the institution on Jan. 1, 1877, was £11,304, as compared with £10,721 on Jan. 1, 1876. The subject for the essay for the current year was—"Great Britain's Maritime Power; how best developed as regards—1. Fighting-ships. 2. Protection of commerce. 3. Naval volunteer or supplemental force. 4. Colonial and home defence; the classes, armament, and description of the vessels needed; and the organization required to secure a powerful and economic imperial naval force." Lord Elcho briefly moved the adoption of the report. Gen. Sir Lintorn Simmons seconded the motion, and alluding to the importance of the library of the institution, said that twenty years ago there was very little literature in the English language upon military subjects. The institution had taken an honourable part in promoting the study of professional subjects connected with the Army and Navy. Officers, if they wished for success now-a-days, were compelled to study. The discussions which took place on naval and military subjects were very valuable. He remembered attending and taking part in a discussion in 1851 on Ferguson's proposed system of fortifications. He was afterwards summoned to the Ordnance Office, received a "severe wigging," and was reminded that there was a military station in the West Indies, to which he might perhaps be sent for the benefit of his health. (Laughter.) But things were changed now-a-days, and so long as in their discussions they did not admit questions of discipline to be canvassed—(hear, hear)—he considered that they were the means of affording valuable information to officers of both Services. (Hear, and cheers.) Sir George Balfour moved and Admiral Sir George Buckle seconded a vote of thanks to the members of the council who retired by rotation, which was carried *nem. con.*, and the members of the council for the ensuing year were then duly elected. Col. Lord Waveney moved and the Rev. Mr. Halpin seconded a vote of thanks to the auditors, who were re-elected. The name of the winner of the prize essay on "The Causes which have led to the Pre-eminence of Nations in War" was announced as John Ross of Bladensberg, who accordingly received the gold medal from the chairman amid loud cheers. The secretary read the report of the referees, viz., Gen. J. R. Crawford, Gen. C. Stuart, and Major-Gen. J. P. Collinson, which stated that sixty essays had been sent in, nearly all of which were well written, and that, in addition to the gold medal essay, they considered five other essays to be so able as to merit publication, viz., those written by Col. Fletcher, of the Scots Fusilier Guards, Lieut.-Gen. Sir Richard Wilbraham, Capt. De Thoren (half pay, 38th Regt.), Lieut. Elsdale, R.E., and Capt. Hime, R.A., who won the first gold medal presented by the institution. The reading of these names was received in each case with loud applause. On the motion of Admiral Codrington, seconded by Gen. Stevens, a cordial vote of thanks was awarded to the referees for their labours.

Mr. Hardy, in responding to a vote of thanks, said:—My Lords and Gentlemen,—Far from being like my predecessor in the War Office, at the time alluded to by Sir Lintorn Simmons, I have looked upon this institution as one which is calculated to bring out the talent of the young and to keep up the interest of the old, in advancing science and art, which are applied now to all military and naval purposes. My strong impression is that the discussions which are held here upon military and naval subjects are calculated to put us in possession of the best means of procedure in both cases. It enables you to eliminate the weak points, and to inform yourselves on the strong; and by these discussions, which go on from year to year—irrespective of all questions of discipline—on naval and military subjects, by those who are practically acquainted with them, there is brought to those of us who are not technically acquainted with them an immense amount of information which we could not obtain in any other form. It would be idle to suppose that a layman in any position would be able to acquaint himself with those technical works which, according to the testimony of Sir Lintorn Simmons, have only recently begun to be studied by military men themselves; but from the papers which are read here, and from the discussions which take place here from time to time, we obtain a sufficient insight into what is going on to be able to form opinions thereon. (Hear, hear.) And here let me say that I very much value the assistance which I have received since I have been at the War Office; in fact I have never called upon any military officer for advice in whatever department of the Service he may have been engaged, whether in the Line, the Artillery, or the Engineers, without receiving an amount of disinterested and valuable assistance which I could never sufficiently acknowledge. (Cheers.) It would be impossible for any one to hold the office which I do without receiving that kind of assistance. A good deal has been said about the library. Now, the library seems to me to be very useful, not only from its being valuable to you, but to the public at large, in its character of a scientific library. When we read, as we did the other day, of the Alexandra going to sea with thirty-five engines on board, I say that it makes me feel perfectly bewildered. I am sure that no man could properly take the command of a ship like that without being possessed of an amount of scientific knowledge which must be gained not only by the study of works bearing on the subject, but must also be fortified by actual and considerable experience. (Hear, hear.) One of the things proposed to be dealt with in the prize essay for next year is the most economical mode of obtaining sufficient vessels for our purposes with the armament which is needed. Depend upon it, gentlemen, that at the bottom of half the difficulty which surrounds you is this question of economy. If you can succeed in doing things at a much cheaper rate, and that is a study to which I think the attention of military officers might be called, by an essay being given for competition on the subject of—How you can best secure a cheaper mode of fortification than that which exists at the present time. (Hear, hear.) Because if you are not able to solve that problem, you will not be able to accomplish your object at all, or at all events not without great difficulty. It is a question for much study and for much consideration; but it is one which will come to the front, because when you have enormous ironclads floating about the ocean, which are enabled to approach all ordinary fortifications without the slightest risk, you must be prepared to meet them and resist them. (Hear, hear.) I may mention, for instance, the necessity of fortifying the coaling stations of the world, without which our Navy, some time or other, may be rendered utterly helpless. (Hear, hear.) Whilst on the question of economy I may carry the subject a little further. You want to get into a new building, and so do I. (Laughter.) There is no one who can speak more feelingly on being situated in unpleasant quarters than I can. Not that I complain personally so much, but on account of my surroundings. I think it a most unreasonable thing to expect to get good work out of people who are subjected to the evils of bad ventilation, who are located in unpleasant rooms, who have noises continually resounding in their ears, rendering them unable to properly concentrate their attention upon their work, and who cannot open their windows without getting into their rooms the dust of Pall Mall. These are things which ought to be considered by the country. I know that it seems to me that the War Office would be an admirable place in which to study the problem of how to find your way about under difficulties? It is a place with an intricacy of passages which would be almost as much a subject for study for a military man as if he were to be suddenly set down in a strange country. I am afraid that you will not get a new building before we do, and therefore you must use all your efforts to persuade the country to build a new War Office. (Laughter.) You have rightly gone to the Treasury, for you may depend upon it that the bottom of every improvement in this country is the Treasury, whether that improvement is carried out or not. (Hear, hear.)

The proceedings then terminated.

RECRUITING AND THE ARMY MEDICAL DEPARTMENT.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—I see by your issue of the 24th inst. that the increased number of recruits for 1876 was 10,876, and I think that here we may find a drop of comfort in the ocean of discontent at present existing in that glorious corps the Army Medical Department. I think the increase of recruits may not incorrectly be traced to Sir Wm. Muir's changes. Let me, as an ex-Army surgeon, who served under both new and old regulations explain. Under the old regulations I had the honour of serving with what I, of course, thought "the finest regiment in the Service;" at any rate, a regiment very attractive to recruits. Taking a great pride and interest in the regiment, and recruits coming freely, I took none but exceptionally smart-looking young fellows, and at one time (while stationed in Manchester) the majority—if, indeed, not all—could read and write. At this time, I recollect being so proud of a two months' batch of recruits, that I had them all ready to strip in a ward, being anxious to show them to my deputy inspector-general when he visited my hospital. I knew the recruits were good, but I confess I was astonished myself when I saw the long line of fine young soldiers standing stripped. My deputy-inspector-general congratulated me, and I felt very proud of my new lot, with their lean loins, flat thighs, sound chests, &c. Well, the time came when I had to leave the regiment, and was chucked about from pillar to post, as nobody's child. I passed more recruits; they had nothing wrong with heart or lungs. I do not recollect ever feeling bewildered by their being particularly smart or educated, nor do I recollect ever showing a batch up with pride to a deputy surgeon-general. I expect I cared little so long as I did my bare duty with my stethoscope. I recollect so well when in the old days, I used to go into the ante-room after hospital and say, "I got such a capital recruit for you this morning, major." *Nous avons changé tout cela.* While on the subject of the Army Medical Department, although my hint would have greater power of appeal if inserted in the *Lancet*, let me call the attention of aspirants to the new Medical Department to the fact that the bait of £250 a-year, although looking pretty well on paper, will not make any difference to them during their early service on the old 10s. a-day, since it is the rule that the first five years are spent abroad, probably in India, where pay remains 317 rupees per month, exactly £31 14s., which I believe was the pay of the old assistant-surgeons when I was in India in 1866. After six years' service under the old rules an assistant-surgeon got 12s. 6d. a-day, could not be "shunted" at the end of ten years, had a home and friends, could exchange, &c.; so that it appears to me the young ones have "gained a loss" with a vengeance.—I am, &c.,

THE OLD REGIMENTAL SYSTEM.

The *Irish Times* states that "from the 1st proximo the office of the assist. qrmr.-gen. at head-quarters in this command will be established at the Royal Barracks and attached to the Staff of the Dublin District. Some further changes will be made in the District Staff, but not till towards the end of the present year. We hear that a depty. assist. adjt.-gen. will be substituted for the appointment of brigade-major when Lieut.-Col. Johnson vacates."

In reply to Mr. O'Beirne, Mr. Hardy stated on Tuesday that "officers of Field Artillery receive only dismounted pay and are mounted on troop horses, which do not become their own property. Officers of Cavalry and Horse Artillery, who receive a higher rate of pay, to cover expenses of their chargers, have certain privileges given them as to selecting horses from the ranks at moderate prices. If the Cavalry officers are to be placed on the same footing as the Field Artillery, as the hon. member suggests, they would have—first, to be reduced to Infantry rates of pay, and, secondly, they would have to ride troop horses not their own property. This would certainly, I think, be unpopular. (Hear, hear.) I have only to add that there are no vacancies in Cavalry regiments except those kept open for sub-lieutenants still under garrison instruction."

The Governors of the Drummond Institution for orphan daughters of soldiers, at Dublin, acknowledge the receipt of the following subscriptions, viz.:—Col. Crealock, C.B., D.Q.M.G., £15; Lieut.-Col. Wynyard, £2; "Seaton" Association (per Capt. M'Gill, Secretary), £20; W. Russell, Esq., £2 2s.; the Hon. Mrs. C. Thesiger, £1; Major Hackett, £2; sixth annual payment for Jane Dunne, from 2nd Batn. 10th Regt., £15; Capt. C. W. Long, Adjt. 16th Brig. R.A., £10 10s.; 1st Batn. 16th Regt. (Canteen Fund), £5 5s.; 75th Regt. (Canteen Fund), £5 5s.; 82nd Regt., £5; J. Robinson, Esq., £5; and also to Messrs. W. Drummond and Sons, for garden seeds value £1 9s. 5d., presented free to the institution. The Governors admitted conditionally Emma, daughter of the late Private E. Norman, 2nd Life Guards, she being a total orphan. This will leave forty-nine girls in the institution.

The Queen has been pleased to appoint Roger Tuckfield Goldsworthy, Esq., C.M.G., to be Colonial Secretary for the Colony of Western Australia.

The *Hampshire Telegraph* says:—"A somewhat serious accident has happened to the general commanding the Southern District. Sir Hastings Doyle was in London last week, and, whilst about to enter his carriage at his residence in Piccadilly, he stepped on the roller of one of the mats, which threw him violently forward. His head came in contact with the sharp edge of the carriage step, and two severe wounds near the eyes were inflicted. Sir Hastings was also much shaken, but he is doing well. Sick leave has been granted him, and during his absence from Portsmouth the command devolves on Col. Petrie, Royal Artillery."

The following General Order has been published:—"From and after April 1 next a fine for drunkenness will not of itself carry with it an entry in the Regimental Defaulter Book, unless accompanied by some other punishment entailing such entry. Section 6, paragraph 23, and section 23, paragraph 31*d*, of the 'Queen's Regulations and Orders for the Army, 1873,' are to be amended accordingly. In publishing this order to the Army the Field-Marshal Commanding-in-Chief desires to draw the special attention of general officers commanding to Section 5, paragraph 6, of the regulations above referred to; and his Royal Highness trusts that the discretion now allowed to commanding officers will be exercised with judgment and firmness, and that serious or repeated acts of drunkenness will in all cases be dealt with so as to entail regimental entry."

THE UNIFORM QUESTION.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—Would you allow me a small space in your valuable paper to correct a statement made by one signing himself "Kismet la Mort," which appeared in the ARMY AND NAVY GAZETTE of Feb. 17. With respect to the uniform question, he says:—"It is a fact, which cannot be denied by any of your readers, that on those frequent occasions when the Naval Hospital officers (by whom I suppose he means officers of the Royal Naval College) who are on full pay there and on special service accept the hospitality of the Royal Artillery mess at Woolwich, they invariably appear in mufti." I for one among your readers entirely deny such a fact. I studied at the Royal Naval College for nine months, and during that time whenever any of the officers on full pay (and even those on half pay) dined at the Royal Artillery mess at Woolwich, they invariably wore the uniform which is considered correct at dinner parties, viz., gold-laced trowsers, jackets, and white waistcoats; and upon the occasions when officers went to the balls given by the Royal Artillery they always wore undress coats with epaulettes. "Kismet la Mort" says that "great censure and blame ought to be cast upon those officers who set such an example to their inferiors by their infringement in their persons of all rules of the Service." He seems to be unaware that by a late Admiralty Circular commissioned officers, when on leave from their ships, are permitted to wear plain clothes. Apologising for troubling you, I am, &c.,

AN OFFICER IN THE ROYAL NAVY.

Feb. 26, 1877.

A SAD CASE OF DISTRESS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—May I endeavour through your columns to enlist the sympathy of the public, and especially of officers in the Army, in a sad case of distress which has lately been brought to my notice? A captain in her Majesty's Army sold out in 1868 and took an appointment in the uncovenanted service in Calcutta. He lately met with reverses and fell into difficulties, which so preyed on his mind that he lost his health, and, as a last hope, came to England in December last, but only to die at the early age of forty, a month after he landed, leaving a widow and five children entirely destitute. Help is earnestly requested to precure a small annuity for the widow, and to place the two boys (aged eleven and nine), and also the three girls (aged respectively fourteen, twelve, and ten), in institutions where their education may be carried on, and they may thus be able in the future to earn their own bread. I shall be happy to answer any questions which may be addressed to me, and reference may also be made to Messrs. Rickards and Walker, solicitors, 29, Lincoln's-inn-fields, to whom, or to Messrs. Grindley and Co., 55, Parliament-street, subscriptions may be paid.—I am, &c.,

JOSEPH MANSFIELD,
Rector of Blandford St. Mary.

Feb. 24, 1877.

QUARTERMASTERS v. COMMISSARIES.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—In the year of our Lord 1813 a certain commissary complained to his Grace the Iron Duke that Sir Thomas Picton had threatened to hang him (the commissary) if certain arrangements touching *munitions de bouche* were not promptly carried out. "Did Sir Thomas Picton really say he would hang you, sir?" said his Grace. "Yes, indeed he did," reiterated, emphatically, this "fleecer of many flocks." "Then," said his Grace of Wellington, "unless you do as he commands you, he will most assuredly do as he has said, for I have never known Sir Thomas Picton to break his word." The above anecdote is given for the special benefit of "Commissary," who wrote a letter in your issue of the 3rd ult., by which he will see that the great captains whom this country has been, and still is, proud of were inclined to give a "long rope and a short shrift" to the commissary class when they failed in their duty. I, for one, am sorry that generals of the Picton stamp are gone. Sir Thomas Picton, who knew how to deal with the genus commissary, was quartermaster of the 12th Regt. in 1776, and, for all I know to the contrary, "Commissary" of Feb. 3 may be a lineal descendant of the delinquent Picton said he would hang, as without provocation he turns up his nose at certain worthy soldiers after the manner of Shakespeare's fop, who riled Harry Hotspur. "Commissary" should bear in mind that the majority of his class are officers, but not soldiers, but that the quartermasters whom he affects to ignore are soldiers from choice and officers by merit. Our Indian Commissariat Department is admitted by every soldier to be A 1 in every respect. Why? Because the civilian element has been most carefully eliminated; soldier-officers direct the administrative and executive branches. Whatever Mr. Haliburton may have recommended is entirely distinct from another essential on which I can safely speak, and this is that the commissary who fears an invasion of quartermasters on his lotus-eating preserves may reassure himself that they, the quartermasters, would not consider the opening of the junior grades of the Commissariat Department to them as promotion in any sense of the word; in fact, it would be a "levelling down." Probably some retired half-payman might be induced by *res angustæ domi* to become a candidate, but I believe I am correct in stating that no quartermaster on full pay would consider an appointment to the grade of commissary promotion. Would your "Commissary" of the 3rd ult. be surprised to hear that Gen. Wolfe, the hero of Quebec, was one of the quartermaster class.—I am, &c.,

Feb. 21, 1877. CENTURION.

ARMY EXPENSES.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—Much has been said on the above; much more might be said; much may be done to better those concerned, so please allow me a brief space. Now, Army expenses are of two kinds—1, preventible, and (2) non-preventible. An officer in a Line regiment can, if he chooses, keep his mess-bill down to a less moderate sum, as far as his own eating and drinking are concerned. For instance, he need not drink champagne, smoke expensive cigars, or play for high stakes. These items, therefore, are clearly under his own control. But there are things which he cannot prevent. For instance, the custom of asking regiments to dine on coming into garrison, and the many subscriptions with which he is invariably saddled. Then, again, his uniform is about one-third more expensive than it ought to be. If only the wretched, tawdry, gold lace and beads on the tunic and mess-jacket and waistcoat were dispensed with, those articles would be much cheaper and much more soldierlike to look at. Do not imagine that I would do away with one single regimental badge or distinction. Far from it. Once more, why should the luckless British officer be obliged to furnish himself with mufti as well as uniform? Surely, if there are such individuals in the Service who are ashamed of being seen in her Majesty's uniform, the sooner they go the better for all. When officers appear on all occasions in uniform we shall hear no more of soldiers being refused admission to public resorts, and such like insults to her Majesty's uniform. It only requires a few strokes of the pens of those who hold high power to lessen the extravagant expenditure, to render the Service popular, and to make it respected by all true and loyal men. —I am, &c., A SUB WHO FEELS WHAT HE SAYS.

INDIA.

Lieut.-Gen. Sir A. H. Gordon, K.C.B., asked the Secretary of State for War on Monday what was the service on account of which Capt. the Hon. R. W. Napier, second squadron subaltern of the 18th Bengal Cavalry, and now serving as an aide-de-camp at Gibraltar, was, on Aug. 19 last, rewarded by promotion to the rank of brevet major, over the heads of about 1,443 captains who were senior to him in the Army. Mr. Hardy.—It has been usual when the Commander-in-Chief in India vacates his command to grant to one of his personal Staff, if he has sufficient claims for services performed, promotion to a higher grade. Capt. the Hon. R. W. Napier, of the Bengal Cavalry, was the senior aide-de-camp, and had performed good service in the field during the Umbeyla and Abyssinian campaigns. As this compliment had been paid to many retiring Commanders-in-Chief of the British Service—viz., granting a step in rank to members of their Staff who were British officers—H.R.H. the Commander-in-Chief would have been extremely loath to have seen an invidious and unfavourable distinction made when the officers concerned were, and for the first time, of the Indian Service, and the Secretary of State for India in Council fully concurred with his Royal Highness in recommending the promotion to her Majesty. (Hear, hear.)

The following has appeared in the *Gazette of India*:—"Col. C. H. Dickens, C.S.I., Royal Artillery, is permitted at his own request to resign the appointment of Secretary to the Government of India in the Public Works Department, from Feb. 6, 1877. The services of Col. Dickens are accordingly placed at the disposal of the Military Department from that date. His Excellency the Governor-General in Council is pleased to make the following appointments:—Major-Gen. W. A. Crommelin, C.B., Royal Engineers, to be Secretary to the Government of India in the Public Works Department; Col. C. W. Hutchinson, Royal Engineers, to be Inspector-General of Military Works, vice Major-Gen. Crommelin. The following arrangements are sanctioned as a temporary measure:—Col. C. Pollard, Royal Engineers, Consulting Engineer to the Government of India for Guaranteed Railways, Lahore, to officiate as Deputy Secretary to the Government of India in the Public Works Department, Military Works Branch, vice Major-Gen. Crommelin; Lieut.-Col. J. G. Medley, Royal Engineers, Superintending Engineer, 1st Grade, in the Punjab, to officiate as Consulting Engineer to the Government of India for Guaranteed Railways, Lahore, vice Col. Pollard; Lieut.-Col. C. M. Brown, Royal Engineers, Executive Engineer, 1st Grade, with temporary rank of Superintending Engineer, 2nd Grade, Military Works Branch, is transferred in that rank to the Punjab, vice Lieut.-Col. Medley."

Lieut.-Col. E. H. Parke, Bengal S.C., depty.-comy., 1st Class, Punjab, in civil employ, is retiring from the Service on a pension of £292 per annum, with an additional annuity of £257 8s., from Jan. 1, 1877. The pension and annuity are payable in England.

Major F. W. Boileau, Bengal S.C., D.A.Q.M.G., Rohilcund District, has been granted leave from India to England for one year and two months, on private affairs.

Capt. H. R. Elliot, Madras Infantry, D.A.Q.M.G., Mysore Division, has been transferred to Malabar and Canara.

Brig.-Gen. A. T. Cadell, Royal Artillery, has been posted to the Malabar and Canara Brigade of the Madras Army, and Brig.-Gen. F. G. Kempster, Madras S.C., to the Ceded Districts.

Major-Gen. E. Waddington, col. on the Retired Full Pay List, late Bombay S.C., died on Saturday last, after a few hours' illness. Gen. Waddington served with the Persian Expeditionary Force in 1857, and was present at the bombardment and capture of Mohumra, for which he received the medal and clasp. Also in the operations in Central India against Tantia Topee in 1858-59, and commanded a detachment of his regiment with the Oojein Force in 1859-60. His commissions bear date as follows, viz.:—Ensign, Dec. 9, 1842; lieut., April 1, 1845; capt., Nov. 23, 1856; major, Dec. 9, 1862; lieut.-col., Dec. 9, 1868; and col., Dec. 9, 1873. He retired upon a special annuity in August 26, 1873, having previously served for several years with the 23rd Bombay N.I.

The Queen has been pleased to appoint Capt. Arthur Elebank Havelock to be President of the Island of Nevis.

Mr. H. Lewis, who was for forty years with Messrs. Cox and Co., of Craig's-court, Charing-cross, having died very suddenly, leaving two unmarried daughters unprovided for, it has been determined by many who long knew him, and uniformly received attention and courtesy from him to form a committee for the purpose of receiving donations to a fund for the benefit of his daughters. The following officers and gentlemen have already consented to act upon the Committee:—Major-Gen. Raines, C.B., Lieut.-Gen. W. M. Wood, Lieut.-Col. J. K. Mackenzie, Major F. W. Lane, Major M. H. Mahon, Capt. Graham, Capt. Frobisher, Henry Richard Woodhouse, Esq., Lionel L. Woodhouse, Esq., and Francis S. Clayton. Esq. Officers and gentlemen who may wish to show their sympathy are invited to join the committee. Donations may be sent to the Treasurers—H. R. Woodhouse, Esq., 7, Stone-buildings, Lincoln's-Inn, W.C., or F. S. Clayton, Esq., 10, Lancaster-place, Strand, W.C., or may be paid to the credit of the "Henry Lewis Fund" account at the National Bank, Charing-cross Branch. Subscriptions to the amount of more than £70 have already been received.

HUNYADI JÁNOS.
NATURAL APERIENT WATER.

LONDON, SATURDAY, MARCH 10, 1877.

The general question of the right of foreigners to travel where they please is not one which can be settled in an offhand way. There is *de jure gentium* no right of the kind. In many countries passports are still needed and demanded, and in those and other countries there is a controlling power exercised by the authorities over the movements not only of their own subjects, but of foreigners. Nor does the British Government forego the exercise of similar control, as anyone may learn who looks at the unrepealed "Alien Act," or who lands at the outports and at the Thames Custom House wharfs, where he will see notices relating to the passports of foreigners.

It was for a long time forbidden to any British subject to land in any part of India without the permission of the authorities, and an unfortunate comedian who arrived in Calcutta, not fifty years ago, to entertain the public, was ordered to leave at short notice because he had not obtained the sanction of the H.E.I.C. That restriction has been removed, but very recently indeed the Indian Government has refused leave to foreign officers to travel in the North-West Provinces, and it restricts the intercourse of British officers with Cashmere very rigidly. These remarks are necessary because of a very inopportune discussion forced on the House of Commons by Mr. Grant Duff—who ought to, but who does not, know better—and by Mr. Goschen, whose indiscretion in dealing with the subject of Captain Burnaby's visit to Khiva was regrettable. The enterprise of that gallant officer, who is now engaged in an enterprising but not extraordinary tour in a district which presents no difficulties to the traveller in the ordinary season for travelling, was very creditable to his adventurous spirit; but he was, and is, an officer on full pay, and, according to his own story in the book which has been so successful, he was evading the lawful authorities of the country in which he was travelling, and was acting in defiance of their prohibition, when he was recalled by the Commander-in-Chief. "What is sauce for the goose is sauce for the gander." How should we like to hear that a Russian officer who had received permission to go so far as Peshawur—and let us say, by the way, that it is very unlikely any such leave would be granted just now—had pushed on through the passes, and had taken up his quarters at Cabul, or among the ill-disposed frontier tribes? Is it not very likely that a representation would be made to the Russian authorities, and that our Government would expect that they would recall that officer, if they could reach him by telegraph or otherwise? It would be taken in very ill part if they did not, and, however disposed we might be to admire the courage and adroitness of clever explorers, we should certainly consider we had a right to complain if the Russians, being able to order him back, refused to interfere. If Mr. Grant Duff and Mr. Goschen will inquire, they will find that the Indian authorities would not be at all grateful for any efforts of theirs to establish the right of Russian or other foreign officers to travel, in virtue of reciprocal obligations, all over our Indian possessions, and to wander about the frontier at discretion. Now, if it be contended that Captain Burnaby had a perfect right to go to Khiva, and that the Duke of Cambridge should not have recalled him, it follows that any foreign officer who is permitted to visit Delhi or Lahore is quite justified in going anywhere else he can get to, and that it would be wrong to request General Milutin or the corresponding authority to order him back. Is that to be wished for? We can have no "one-sided reciprocity" in such matters. There is a manifest inconvenience in officers on full pay engaging in expeditions in which they may come in conflict with those who are charged with the execution of the rules laid down by a foreign State for visitors and travellers. They cannot be abandoned to their fate, as poor Stoddart and Conolly were abandoned to the Khan of Bokhara, unless we are willing to sink still lower in the estimation of the Central Asiatic tribes than we did—a degradation which is in deplorable contrast with the prestige gained by Russia in consequence of her vigorous assertion of her rights and by the vindication of her position. But, if we are to assume a different attitude, it is plain that there must be no just ground of complaint given to friendly States, still less to States which may be on the look-out for causes of quarrel or for opportunities of inflicting affronts which it will be by no means easy to avenge.

There was something very quaint in the selection of Tommy Moore's "Let Erin remember the days of old, Ere her faithless sons betrayed her," as the closing "lyric" for the induction of the Duke of Manchester as a Knight of St. Patrick the other evening in Dublin. Nothing could be more "congruous" with the nature of the pageant and its attendant circumstances. The Order of St. Patrick has at least as much to do with the old Branch Knights as the Duke of Manchester has with the Irishry. However, all will wish that the new Knight may long enjoy his honours. He has Irish property, at all events, and the Montagus are as Celtic as the Boyles, Beresfords, Probyns, Caulfields, Achesons, Wingfields, Carews, Hares, and Stewarts, and who are recognized as "racy of the soil."

It is now definitely arranged that Major-General Sir R. D. Kelly, K.C.B. (from the Cork District), shall succeed Major-General Sir E. H. Greathed, K.C.B., in command at Colchester on the 1st proximo. We stated some weeks since that Sir Richard Kelly had expressed to the Horse Guards a desire to be transferred to Colchester.

Indian Good Service Pensions of £100 per annum have been awarded to the following officers of the Royal (late Indian) Artillery, viz.:—Colonels H. E. L. Thuillier, C.S.I., H. Le G. Bruce (late Bengal), and G. Petrie, C.B. (late Bombay). Colonel Thuillier entered the Army December 14, 1832; became Lieutenant-Colonel, February 18, 1861; and Colonel, September 20, 1865. Colonel Bruce served in the Gwalior campaign, and was present at the battle of Maharajpore (Bronze Star); Sutlej campaign of 1845-46, including the affair of Buddewal and battles of Aliwal and Sobraon (medal with clasp); Punjab campaign of 1848-49, including the battles of Sadoolapore, Chillianwallah, and Goojerat (medal with clasp). Commanded the 3rd Punjab Light Field Brigade in the first Meranzaie Expedition under Brigadier-General Chamberlain in April, 1855 (medal). Served in the Mutiny campaign in 1857-59, including the relief of Lucknow, battle of Cawnpore, action of Kalee Nuddee, and entry into Futtehghur as Brigade-Major of Horse Artillery (six times mentioned in dispatches, Brevets of Major and Lieutenant-Colonel, medal with clasp). He entered the Army February 15, 1842; became Lieutenant-Colonel, March 24, 1865; Brevet Colonel, July 14, 1866; and Colonel, August 1, 1872. Colonel Petrie served in the campaign of 1843 in Scinde, including the battles of Meanee and Hyderabad (medal); also during the Mutiny of 1857-58, including the attack on Ahwar, siege of Kotah, and battle of Bunass (mentioned in dispatches, Brevet of Major, medal with clasp); commanded the Artillery throughout the Abyssinian campaign from January 1, 1868, and was present at the action of Arogee and capture of Magdala (mentioned in dispatches, C.B., and medal). He joined the Service June 11, 1841; became Lieutenant-Colonel, February 10, 1861; Brevet Colonel, February 18, 1866; and Colonel, April 26, 1866.

Deputy Commissary-General E. Strickland, C.B., has left England for the Cape of Good Hope, to assume Commissariat charge, vice Deputy Commissary-General H. Moore, who returns to England.

The Instructorship attached to the head-quarters of the Army Hospital Corps at Aldershot is to be considered a two years' appointment, and Surgeon S. Moore, M.B., will hold it for that period.

Captain D. M'Mahon, half pay, late Military Train, has been transferred from Newry to the charge of the Leeds Pension District, having handed over his duties in Ireland to Captain W. G. Buller, 94th Regiment.

Major-General J. Abbott, C.B., succeeds to the vacancy among the Colonels-Commandant on the Bengal List of the Royal Artillery, consequent upon the death of Lieutenant-General Sir J. D. Fordyce, K.C.B.

Captain A. Glen, 10th Regiment, has been appointed Brigade-Major on the Staff of the Straits Settlements, vice Brevet Major C. W. Lloyd, 16th Regiment, whose term of service expires on the 22nd proximo. Captain Glen entered the Army February 4, 1872; passed from the Staff College in December, 1875; and became Captain, March 22, 1876.

We fear the new barracks at Knightsbridge will be some years completing, for only £35,000 is to be spent on them during the approaching financial year. We hope, now that the demolition of the officers' quarters is decided on, the officers' stables will also be swept away, and that the unsightly high brick walls that used to surround the old buildings will not be imitated. Nothing has improved the appearance of the Wellington Barracks so much as the removal of the hoarding that used to close up the now open railing towards Birdcage-walk. In the new Knightsbridge Barracks an equal improvement might be effected by the substitution of railing for wall where practicable, and the planting of a row of trees along the edge of the footpath on the Knightsbridge-road side, in front of the new building would materially add to the general effect.

It will give satisfaction to the friends of Captain F. C. H. Clarke, Royal Artillery, to learn that the officer, whose five years' service expires on the 22nd proximo is to be continued on the Staff of the Intelligence Department for a further period of two years, to complete the work upon which he has been for some time engaged.

The *Standard* recently published a *résumé* of the French Army Estimates, from which, amongst other interesting details, we learn that their mounted officers are furnished with chargers at a cost to the State varying from £50 to £56. This is a very remarkable contrast to the economical practice which prevails on this, the more wealthy, side of the Channel. In the English Army our mounted officers are not only called upon to mount themselves and provide horses for the public service, but latterly they have not even been permitted to draw forage or forage allowance unless they certify that the horses they use are *bonâ fide* their own property. Surely the foreign practice is the right one, and officers' chargers should be *bonâ fide* public property. In this country horseflesh commands a very high price, whilst the pay of our officers is very small indeed. The War Office, therefore, is not justified in requiring them to put their hands so deeply into their pockets to save its own. It is quite time that the practice which prevails abroad should be followed here, and that horses required for the public service should be provided out of the funds of the State.

The Venerable Archdeacon Henry Press Wright, M.A., has arranged to leave England in May, to take up his colonial appointment, on retirement from the Chaplains' Department.

Colonel G. T. Gough, half pay, late Cavalry Depôt, Aide-de-Camp, and late Military Secretary to General Sir Frederick Haines, in India, was among the numerous candidates who offered themselves lately for the Chief Constableship of an important English county.

It is satisfactory to learn that the change being carried out at the Royal Military College will not interfere with Colonel Middleton, who will draw the additional rate of pay on receiving the newly-created, or rather resuscitated appointment.

Mr. Roger Goldsworthy, C.M.G., is expected in England about the 14th instant from Nevis, at which place he has been relieved as President. He will spend a few weeks at home before proceeding out to take up his new appointment in Western Australia.

Lieutenant-Colonel A. W. Durnford, R.E., is proceeding out to Natal in order to superintend the works in progress for the proper defence of the colony.

We learn by private letter from India that it is probable Lord Lytton will be allowed to retain the services of Lieutenant-Colonel Owen Burne, C.S.I., for a further period of twelve months, from April 12, the date upon which his Lordship assumed the Governor-Generalship. Colonel Burne's retention would cause the very greatest satisfaction.

Captain C. F. Clery, 32nd Light Infantry, Deputy Assistant-Adjutant and Quartermaster-General in Ireland, is to be transferred in a similar capacity to Aldershot, to succeed Major R. J. C. Marter, King's Dragoon Guards, who rejoins his regiment, on promotion.

We would correct an erroneous impression with regard to the post of Town-Major at Halifax, N.S. It has been stated that Captain Nagle, half pay, late Royal Canadian Rifles, was reappointed in December, 1875, for an additional term of twelve months, and that he is about to be called upon to vacate his appointment. The truth is, Captain Nagle was given a five years' extension, and his time will not be up until December, 1880.

As to the future of Army Paymasters, no decision has yet been arrived at, but it may be considered certain that one change will be introduced—*i.e.*, a change of title—and that the present Paymasters will give place to "Army Accountants," who will simply be the old officers in a new dress.

The following promotions take place in the Army in consequence of the death of Lieutenant-General Sir J. D. Fordyce, K.C.B., Royal (late Bengal) Artillery, deceased, viz.—Major-General J. Abbott, C.B., Royal Artillery, to be Lieutenant-General; Colonel C. B. Fuller, Royal Artillery, to be Major-General; Major H. G. Browne, V.C., half pay, late 100th Regiment, to be Lieutenant-Colonel; and Captain J. Stanley, 47th Regiment, to be Major.

Brevet Major F. Russell, 14th Hussars, and Captain H. C. Sitwell, 91st Highlanders, have vacated their appointments—the former as Instructor of Tactics, the latter as Instructor in Fortification—at the Royal Military College, Sandhurst.

Major-General Leicester Smyth, C.B., who, as we stated last December, had been noted for employment, has been posted to the Devonport, instead of to the Cork District, which it was at first arranged he should be given. General Smyth is to relieve Lieutenant-General H. Smyth on the 1st proximo. General Smyth served in the Kaffir war of 1852-53 (medal); also at the battle of Berea. Served in the Eastern campaign of 1854-55 as Assistant Military Secretary to Lord Raglan, and afterwards to General Simpson (medal with clasps, Brevets of Major and Lieutenant-Colonel, Knight of the Legion of Honour, Sardinian and Turkish medals, and 5th Class of the Medjidie). He entered the Army December 29, 1845, and became Major-General February, 1874.

The announcement which appeared in the *Gazette* of Tuesday last, under the head of 101st Foot, will have given the utmost satisfaction. Captain Barnard's case had long been referred to as one of rather hard treatment, and we are glad to find that the Horse Guards has not been unmindful of the excellent services the young officer performed when attached to Sir John Glover's expedition on the Volta. Promotion was never more deserved.

REVIEWS.

A Critical History of the Late American War. By A. Mahan. (Hodder and Stoughton, London.)

Lieutenant-General M. W. Smith, C.B., Colonel, 20th Hussars, observes in an introductory letter that this work will prove both interesting and instructive to those who wish to trace the causes which have led to the success or failure of campaigns, and how battles have been lost and won. The author is most unsparing, General McClellan meeting more especially with his disapproval and censure. He first of all relates what actually came to pass, describing the battle-fields and the strategy pursued by the different Generals. After having placed before the reader what *was* done, he endeavours to point out what *ought* to have been done. He maintains that the war should not have lasted longer than twelve months, and that bloodshed and treasure were unnecessarily wasted. It is impossible to read the book without arriving at the conclusion that the author has no mean idea of his own strategy.

Messrs. Kelly and Co. are the great caterers for the wants of those who desire to know "who's who?" and "where is he?" in this world of ours, where there is a growing tendency to invade what is called the "sanctity of private life," and to make public every fact which can be collected respecting the manners and customs of the very smallest people. Messrs. Kelly do not imitate the gossip-mongers who tell the world how "poor Topsey Bigge died of measles in Stuttgart last week, leaving only £60 in the bank and a small insurance to his widow, the daughter of an old friend, Dick Grub," or who enlighten us as to the doings of the great and the small "behind the scenes" with equal graphic power. They give their readers in a very concise way an immense quantity of hard facts about the "titled and official classes" whom they term "the Upper Ten Thousand," which, but for this volume, must be sought for under several heads in Peerages, Baronetages, official and other Directories, and they supply a legitimate market with a very sound article; but whether all the gentlemen and ladies whose names appear in this well-printed and compact book belong to "the Myriad" or not we shall no more pretend to decide than we shall venture to say that any of the "Upper Ten Thousand" proper have been omitted.

ROYAL NAVAL ARTILLERY VOLUNTEERS.

On Saturday the annual meeting was held in the Cannon-street Hotel—Viscount Ashley, M.P., in the chair. The secretary read the general statement, which stated that at the commencement of 1876 there had been a balance of £129 18s. in hand, thanks to the liberality of Mr. Brassey. During the year 1876 the expenses had considerably increased, as they had had to vacate the room kindly lent by Mr. Brassey, who, however, paid £25 towards the rent of the new office. Expenses had also been incurred by the appointment and operations of a prize committee, which amounted to £15 for preliminary expenses and £20 towards the general prize fund. The balance at the end of the year 1876 was £183 16s., the expenditure having been £148 14s. 9d. Mr. Field read the report of the Shooting Committee, the accounts of which had been some £208, and the expenses about £198. The chairman said he thought the reports which they had just heard had been very satisfactory, and proposed that the Shooting Committee and the Finance Committee should be re-elected. They might congratulate themselves on having gone through a brilliant inspection last month, which had met with the approbation of the inspector, and also of the First Lord of the Admiralty, who had paid them the compliment of being present. The efficients were in greater number than they had been last year; the men of all ranks, including the batteries of Brighton and Hastings, amounted to 381, which, deducting the 38 for Hastings and 37 for Brighton, left 306 as the London contingent, quite a sufficient number to man as many gunboats as the Admiralty could place at their disposal. The question of having a better ship was one of some difficulty, and Government had not so many ships at their disposal that they could readily find one for them, but he was not without hope that they might succeed in the endeavour to get a larger ship than at present. A larger ship must be lower down the river, but he believed that the general feeling of the members was rather in favour of a ship lower down. The Admiralty were more in their favour than they had been, and he thought that if they bided their time they need not despair of having a larger ship. A long discussion ensued upon various matters connected with the brigade, and it was urged that if they had a larger ship the number of the brigade would be speedily doubled.

We understand that Mr. Mudie has 1,000 copies of Com. Cameron's "Across Africa" in circulation. We believe the same number of Capt. Burnaby's "Ride to Khiva" is also in circulation at the same library.

The Berlin correspondent of the *Nord* writes:—"The German coast is now bristling with guns and torpedoes from Memel to the Dutch frontier. The ironclad fleet, especially destined for the protection of the coasts, is composed of five frigates and a corvette, without counting one frigate in course of construction. Naturally, it is French money which has paid for all these works. With such preparations, it appears to me that the Germans could contemplate with a well-grounded tranquillity the military reorganization of France, and this so much the more as this reorganization does not affect the Navy, of which the efficiency appears at present even more doubtful than in 1870."

Throat Irritation.—The throat and windpipe are especially liable to inflammation, causing soreness and dryness, tickling and irritation, inducing cough and affecting the voice. For these symptoms use glycerine in the form of jujubes. Glycerine, in these agreeable confections, being in proximity to the glands at the moment they are excited by the act of sucking, becomes actively healing. Sold only in 6d. and 1s. boxes (by post for 14 stamps), labelled "James Epps and Co., Homœopathic Chemists, 48, Threadneedle Street, and 170 Piccadilly London."

The Navy.

GAZETTE.

Admiralty, March 8, 1877.

Royal Naval Artillery Volunteers—The following appointments have been made:—Liverpool Brigade—Charles Stewart, Esq., to be Sub-Lieut., with seniority of March 6, 1877; Armand Bernard, Esq., M.D., William Williams, Esq., M.D., to be Surgs., with seniority of March 6, 1877; Robert Lloyd James, Esq., to be Sub-Lieut., with seniority of March 8, 1877. London Brigade—Arnold Havard Wright, Esq., to be Sub-Lieut., with seniority of March 7, 1877.

APPOINTMENTS.

Commander Horace W. Rochfort, to be Inspecting Commander in the Coastguard, vice Thomas Hooper, deceased.

Staff Commander—Richard C. Dyer, to the Industry when commissioned.

Lieutenants—William H. G. Nowell, to the Penelope; Herbert Swire, to the Excellent, additional, for a course of gunnery.

Sub-Lieutenants—Keppel Wade, to the Tamar, to be appointed to the Hart when recommissioned; Walter S. Smith, to the Eurydice; Arthur T. Stuart, to the Danae for navigating duties.

Fleet Surgeon—Robert Irvine, M.D., to the Castor.

Staff Surgeon—Maxwell Rodgers, M.D., to the Indus.

Paymaster—Thomas Mitchell, to the Asia, for temporary service.

Active, Commodore Sir William N. W. Hewett, sailed from Simon's Bay on Feb. 2 for Table Bay and England.

Alacrity, Lieut.-Com. W. U. Moore, was paid off at Sydney on Dec. 31, 1876, and was recommissioned on Jan. 1, 1877. Her gunner, Mr. Ham, and twenty men come to England in the Pearl.

Alexandra, Capt. R. O'B. Fitzroy, with the flag of Vice-Admiral Hornby, arrived in Plymouth Sound on the 4th inst., and sailed the following day for Gibraltar and Malta. The Princess of Wales did not visit the ship before she sailed, as was intended, probably owing to her Royal Highness having been confined to Marlborough House from slight indisposition arising from cold. It is stated by a correspondent of the *Times* that Capt. Fitzroy has issued an order which has caused much comment in Portsmouth. It seems that there are not fewer than seventy-three stokers on board the Alexandra, and the captain insists that the whole of them, with the exception of eight, shall be employed on deck on Mondays, and on Wednesday and Friday afternoons. This is a standing order, and should the chief engineer at any time require the services of more than eight stokers on the days mentioned the captain will grant him or refuse him more according to his discretion.

Amethyst, Capt. A. J. Chatfield, arrived at Coquimbo on Jan. 8, and would remain on the Coast of Chili as senior officer after the departure of the Admiral.

Antelope, Lieut.-Com. E. Wingfield, was at Malta on Feb. 27.

Assistance, Capt. F. M. Prattent, arrived at Portsmouth on Friday, last week, from Gibraltar, with naval and military invalids, time-expired men, and prisoners. The former comprised Lieuts. Hulbert, Duncombe, Elton and Bourke; Sub-Lieut. Tottenham. The military comprised Major Wilton and two daughters, Surg.-Major Thompson, Capts. Simpson and Mansergh, Lieuts. Preston, Penno, and Hickman, and Assist.-Commy. Bridgeman.

Audacious, Capt. P. H. Colomb, flagship of Vice-Admiral Ryder, was at Hong Kong on Jan. 18.

Barracouta, Capt. Charles E. Stevens, will be ready to pay off at Sheerness on the 16th inst.

Beagle, Lieut.-Com. C. Caffin, was expected to return to Sydney, being no longer required by the Governor of Fiji.

Bellerophon, Capt. F. T. Thomson, flagship of Vice-Admiral Sir A. C. Cooper Key, was at Trinidad on Feb. 8. She left Barbados on Jan. 30 with the Encounter, Eclipse, and Dryad in company, and, having visited St. Vincent and Grenada, arrived at Trinidad on Feb. 5. The squadron would leave on Feb. 9 for Jamaica, calling at La Guayra and St. Domingo.

Black Prince, Capt. T. B. Lethbridge, left Lisbon on Feb. 19, and having called at Lagos Bay, arrived at Gibraltar on Feb. 24. After visiting Cadiz she will return to England.

Cockatrice, Com. A. J. Musgrave, was at Malta on Feb. 27.

Conflict, Lieut.-Com. J. G. Musters, paid off at Sydney on Dec. 31, 1876, and a portion of her officers and crew will come home in the Pearl. She will be recommissioned on arrival of the Hankow.

Crocodile, Capt. P. R. Sharpe, left Port Said on the 2nd inst. for Portsmouth.

Coquette, Lieut.-Com. E. Shirley, was at Malta on Feb. 27.

Defence, Capt. R. P. Cator, left Lisbon on Feb. 19, and having called at Lagos Bay, arrived at Gibraltar on Feb 24. After visiting Cadiz she will return to England.

Devastation, Capt. F. W. Richards, left Salamis Bay for the Ionian Islands, and was to rejoin the flag at Malta early in March.

Diamond, Capt. G. S. Bosanquet, has been despatched from Zanzibar to cruise in search of the Lynx.

Eclipse, Capt. J. E. Erskine, will be detached from the squadron, and will remain as senior officer on the Barbados division.

Euphrates, Capt. W. H. Cuming, arrived at Malta on the 4th inst., and sailed in the afternoon of the 5th for Bombay.

Growler, Com. W. Stewart, had been refitted, and was at Hong Kong on Jan. 18, ready to receive her new crew.

Hector, Capt. C. M. Buckle, returned to Netley from Cowes on the 3rd inst.

Helicon, Lieut.-Com. Stopford, was at Malta on Feb. 27 ready for sea.

Hercules, Capt. Bowden-Smith, flagship of Admiral Hon. Sir J. Drummond, was at Malta on Feb. 27. She was docked on Feb. 26. On leaving the Piræus all the ships of the squadron steamed past the Hercules, playing "Auld Lang Syne," &c., and cheering the gallant admiral as he left them for good, on his way to Malta to be superseded. The Hercules is to leave this port about the last week in March.

Hornet, Com. H. N. Hippisley, had been refitted, and was at Hong Kong on Jan. 18, ready to receive her new crew.

Hotspur, Capt. T. M. Jones, arrived at Malta on the 6th inst.

Immortalite, Capt. F. A. Hume, arrived at Mauritius on Jan. 24, and would leave the next day for the Cape of Good Hope and England.

Jumna, Capt. J. D'Arcy, is expected to arrive at Devonport from Bombay about April 14 with the 1st Batn. 11th Foot. After landing the troops the Jumna will proceed to Portsmouth.

Lapwing, Com. Sir W. Wiseman, Bart., was under repair at Shanghai, and would be ready for service by the first week in February.

Liberty, Lieut.-Com. C. Johnstone, was at St. Vincent, Cape de Verde, on Feb. 14. She would leave for Porto Praya and Plymouth, calling at Fayal.

Lynx, Com. F. M. Ommanney, has not been heard of for some time. The Cape papers received by the last mail mention that at Mozambique grave fears were entertained for her safety. Early last year she received considerable damage by running on a reef in the Mozambique Channel, and, having had these defects repaired, spent the summer in cruising between Madagascar and the East Coast of Africa. She started, early in November, for a cruise along the East Coast, and was expected to return in two or three weeks, and certainly would have been back long before Christmas if all had been well, but up to Jan. 15, when the latest news left, she had not been seen at Mosambique, nor had she been spoken by any steamer or coasting vessel along the coast between Aden and Natal. There had been very severe weather, including a cyclone of much violence. It is hoped that the worst may be that her machinery had broken down, and that she had been driven out of her course, and was endeavouring to reach the coast under sail. The following information concerning H.M.S. Lynx has been communicated to the *Western Morning News*, by an officer lately invalided from the ship:—"Com. Ommanney joined that ship prior to Nov. 24, as I received a communication from him of that date written on board the Lynx at Majunga. Now, from then until Jan. 15, when the latest news left, is only seven weeks, and it was always doubtful after leaving Majunga whether the ship would return there for the mail within two or even three months, as when away cruising along the coast of Madagascar it was necessary sometimes to hang about certain parts, especially Myanterano, for a month or more, in the hope of picking up a prize and also to meet the sailing launch, which was always provisioned for that period. With regard to any severe weather she may have had, I may state that there is not a better sea-boat in the Service. On her passage out to the East Indies two cyclones of unusual severity were encountered, which she rode out in the most praiseworthy style. I think it, therefore, rather premature to alarm the friends and relations of the officers and men, most of whom reside in the neighbourhood of Plymouth."

Martin, Lieut.-Com. E. Hicks, was at St. Vincent, Cape de Verde, on Feb. 14. She would leave for Porto Praya and Plymouth, calling at Fayal.

Midge, Capt. H. Salmond, was at Hong Kong being prepared for her new crew.

Minotaur, Capt. Lord W. Kerr, flagship of Vice-Admiral Beauchamp Seymour, arrived at Gibraltar on Feb. 24. The Gibraltar correspondent of the *Western Morning News* gives the following particulars of the squadron's movements:—On leaving Lisbon the Minotaur, in hoisting one of her anchors, found that the cable had parted. The other ships proceeded to the anchorage at Paço d'Argos—the Minotaur returning to her former berth to endeavour to recover her lost anchor and cable. The boats were employed in dredging all Saturday afternoon and Sunday, but without success, and on Monday at 1.30 the Minotaur left Lisbon, and, being joined by the other ships, proceeded to sea, anchoring in Lagos Bay at 10 a.m. on Tuesday, 20th, when the crews were exercised in manning and arming boats; in the afternoon at target practice with boats and guns; and at 11 p.m. at night quarters. On Wednesday the squadron weighed, and proceeded outside for target practice with electric broadsides, anchoring again at 2 p.m. On Thursday the vessels weighed at 9 a.m., and, after occupying the day with such steam tactics as could be done with four ships, proceeded under easy steam, and sailed for Gibraltar, staying for about ten days, as the ships will proceed to Cadiz about March 6, to be in readiness for the embarkation of the King of Spain, who is about to visit the Spanish ports in the Mediterranean. The Salamis arrived at Lagos on the night of the 21st, and, after communicating, left directly for Cadiz and Gibraltar. The Admiral proposes to put to sea with his squadron about March 8, and cruise towards Cadiz, where they will probably arrive about March 12, and where the Salamis will rejoin. After the arrival of the King of Spain the squadron will return to England.

Myrmidon, Com. the Hon. R. Hare, left Valparaiso on Jan. 8 for England.

Narcissus, Capt. Lord Charles Scott, flagship of Rear-Admiral Lambert, C.B., was at Mauritius on Jan. 25. The squadron passed out of the limits of the China Station on Jan. 3, and arrived at Mauritius on Jan. 24, and would leave the next day for the Cape of Good Hope and England.

Newcastle, Capt. R. G. Douglas, arrived at Mauritius on Jsn. 24, and would leave the next day for the Cape of Good Hope and England.

Nymphe, Capt. S. P. Townsend, was at Sydney on Jan. 12, and would shortly be ready for a cruise.

Opal, Capt. F. C. Robinson, would shortly leave Coquimbo for the Coast of Peru.

Orontes, Capt. E. H. Seymour, was at Singapore on Jan. 29, and was then leaving for Mauritius.

Osborne, Com. H. L. Pearson, is to leave Portsmouth on the 12th, and will proceed to Marseilles or Brindisi to embark a member of the Royal Family, probably Prince Leopold, for passage to Malta, whence she will take the Duchess of Edinburgh and family to Villa Franca.

Pallas, Capt. Beamish, left Salamis Bay on Feb. 21 for Smyrna, to send the Hotspur to the Piræus.

Pearl, Commodore Hoskins, was at Sydney on Jan. 12, and would leave Sydney for Auckland on Jan. 17, to communicate with the Sapphire, and will then come to Spithead, *viâ* Cape Horn.

Plover, Com. B. H. Stewart, left Port Royal on Jan. 30 for Cartagena in consequence of the murder of the Dutch vice-consul and other inhabitants, and the disturbed state of affairs, in order to protect British interests, should occasion arise.

Raleigh, Capt. G. Tryon, C.B., was at Malta on Feb. 27.

Ready, Com. S. Grove, was to leave St. Vincent, Cape d Verde, on Feb. 18, for Plymouth.

Renard, Lieut.-Com. H. J. Pugh, was cruising at New Zealand, according to last accounts.

Resistance, Capt. C. W. Hope, left Lisbon on Feb. 19, and having called at Lagos Bay, arrived at Gibraltar on Feb. 24. After visiting Cadiz she will return to England.

Repulse, Capt. F. W. Wilson, flagship of Rear-Admiral de Horsey, was at Coquimbo on Jan. 18. Her movements are dependent upon those of the Shah.

Ringdove, Com. U. C. Singleton, left Malta on Feb. 26 for Devonport.

Rupert, Capt. H. J. Grubbe, C.B., was at Malta on Feb. 27.

Salamis, Com. F. W. Egerton, joined the Channel Squadron at Gibraltar from Cadiz on Feb. 24, and sailed on the 27th to survey the Gettysburg shoal.

Sandfly, Lieut.-Com. J. Bell, regulating the pearl fisheries, was at Port Darwin on Dec. 23.

Sappho, Com. Noel N. S. Digby, arrived at Sydney on Dec. 29 from Launceston. When refitted she would go to Samoa.

Seaflower, Lieut.-Com. R. H. Eyre, was at St. Vincent, Cape de Verde, on Feb. 14. She would leave for Porto Praya and Plymouth, calling at Fayal.

Sealark, Lieut. F. H. Haygarth, arrived at Gibraltar on Feb. 26 from Vigo. She will be sent to Plymouth after having been inspected.

Serapis, Capt. G. D. Davidson. We have been so accustomed of late to record failures in the working of the engines on board her Majesty's ships, that it is quite refreshing to be able to chronicle the fact that on the return of the Serapis to this port after her last cruise, the engines and boilers of that ship were in such a very creditable condition, that there were not any defects to be made good, notwithstanding that the vessel had run over 12,000 miles.—*Portsmouth Times.*

Shah, Capt. F. G. D. Bedford, arrived at St. Vincent, Cape de Verde, on Feb. 3, and would sail on Feb. 5 for Monte Video and Valparaiso.

Squirrel, Lieut.-Com. R. N. Hamond, was at St. Vincent, Cape de Verde, on Feb. 14. She would leave for Porto Praya and Plymouth, calling at Fayal.

Sultan, Capt. H.R.H. the Duke of Edinburgh, was at Malta on Feb. 27.

Swiftsure, Capt. J. K. Baird, left Salamis Bay on Feb. 21 for Salonica.

Swinger, Lieut.-Com. E. A. Bolitho, was at Hong Kong being prepared for her new crew.

Tamar, Capt. W. H. Liddell. The following is the route of this ship on her present service:—Outward—Arrive at Gibraltar March 11, leave the same day; arrive at Malta March 16, leave March 19; arrive at Port Said March 24, leave March 25; arrive at Suez March 26, leave the same day; arrive at Aden April 2, leave the same day; arrive at Trincomalee, April 15, leave April 19; arrive at Singapore April 27, leave April 19; and arrive at Hong Kong May 6. Homeward—Leave Hong Kong May 20; arrive at Singapore May 28, leave May 30; arrive at Trincomalee June 9, leave June 11; arrive at Aden June 28, leave June 30; arrive at Suez July 7, leave July 8; arrive at Port Said July 9, leave July 11; arrive at Malta July 16, leave July 19; and arrive at Portsmouth July 31. The days on which the mails leave London, and the ports to which the letters should be directed, are as follows:—March 8 to Malta *viâ* Italy, March 16 to Suez *viâ* Brindisi, March — to Aden *viâ* Brindisi, March 23 to Trincomalee *viâ* Brindisi; March — to Singapore *viâ* Brindisi; April 6 to Hong Kong *viâ* Brindisi; April 27 and May 3 to Trincomalee *viâ* Brindisi; May 10, 17, 24, 31, and June 7 to Aden *viâ* Brindisi; June 14 and 21 to Suez *viâ* Brindisi, June 28 to Port Said *viâ* Brindisi, July 4 and 11 to Malta *viâ* Italy. The mails which convey seamen's letters, *viâ* Southampton, at a uniform rate of one penny, leave London as follows:—March 15 for Trincomalee, March 22 for Hong Kong, April 5 for Singapore, April 19, 26, and May 2 for Trincomalee, May 9, 16, 23, 30, and June 6 for Aden, June 13 and 20 for Suez, June 27 for Port Said, and July 3 and 10 for Malta.

Topaze, Capt. A. T. Thrupp, arrived at Mauritius on Jan. 24, and would leave the next day for the Cape of Good Hope and England.

Tourmaline, Capt. F. W. Sullivan, C.B., was at Simon's Bay on Feb. 5. The Commodore assumed the command of the Cape of Good Hope and West Coast of Africa station on Feb. 1, in succession to Com. Sir W. Hewett. Mr. Herbert Pitt, chief engineer, has committed suicide by cutting his throat the day before reaching Simon's Bay. He died in the Naval Hospital at Simon's Town on the morning of the 2nd.

Valorous, Capt. L. Jones, arrived at Plymouth on Sunday for repairs.

Victoria and Albert, Royal yacht. Orders have been received at Portsmouth to have this vessel ready for service by the last week in June, and she will be docked as soon as the Urgent comes out. Monday is the day named.

Vigilant, Lieut.-Com. H. C. Ryder, was at Hong Kong on Jan. 18.

Volage, Capt. H. Fairfax, senior officer on South-East Coast of America, was at Colonia on Jan. 29. She left Monte Video on Jan. 8.

Vulture, Com. H. H. Washington, arrived at Malta on Feb. 27 from England.

Wolverene, Capt. L. Brine, arrived at Sydney on Jan. 5, and was refitting. It is announced by telegraph from Adelaide, that on visiting the Crozet Islands, with the view of ascertaining if there was any trace there of the missing ship Great Queensland, nothing was found.

Wye, Staff-Com. W. W. Vine, was in dockyard at Malta on Feb. 27.

Zephyr, Lieut.-Com. W. G. Le Cocq, has gone to Nassau to relieve the Pert.

A telegram of Tuesday last states that the Flying Squadron was sighted off Cape Recife on the 11th ult., bound for Simon's Bay.

Some interesting relics of the Spanish Armada, which had been presented to the Queen, have been conveyed to the armoury at Windsor Castle. They consist of a cannon and an anchor, much worn and corroded, which had been cast up by the sea on the coast of Scotland. They will be placed near the Nelson relics, and upon the reopening of the State apartments will be shown to visitors..

Furnish on the New Hire System.—The "New Hire System" is quite distinct from anything yet attempted. Houses furnished throughout. 20 Wholesale Houses to select goods from. "An excellent idea."—"Army and Navy Gazette." Prospectus, with Press opinions, post-free. General Furnishing Company — Offices. 9, Southampton-street, Strand.

REPORT OF THE ARCTIC COMMITTEE.

The First Lord of the Admiralty has received the report of the Committee which was appointed to inquire into the cause of the outbreak of scurvy in the crew of the Arctic Expedition. They report that the outbreak of scurvy in this expedition was due to the fact that lime-juice was not supplied to the men despatched on the sledging expeditions; secondly, that the ships were amply and well provided with provisions of suitable character and good quality; and, thirdly, that Sir G. Nares did not give proper orders for the provisioning of the sledge parties, and that he had no sufficient reason for departing from the instructions conveyed in the memorandum on the maintenance of the health of the crews transmitted to him by the Admiralty from the Director-General of the Medical Department of the Navy. They state that Sir George Nares, after giving evidence as to the careful manner in which he attended to the dietary and maintenance of the health of the men on board ship, informed the Committee that during the month of March preceding the start of the sledge expeditions he voluntarily served out two ounces of lime-juice daily to his men on the Alert, instead of the regulation allowance of one ounce; he did this on his own impulse, and in a printed minute addressed to the Admiralty on December 14, 1876, and laid before the Committee, he explains that by this means "I knew that every man by the time of starting would, from the double issue, I may say, be saturated with lime-juice." Being asked to look at his Arctic sledge diet list and point out which of the substances in that list were in his opinion antiscorbutics, Sir George Nares said, "I consider all good food an antiscorbutic." He did not, he said, carry into effect Sir Alexander Armstrong's recommendation that the use of lime-juice in travelling should be enforced in the same manner as on board ship. His reason for not doing so was the extra time that would be occupied to thaw the water necessary, and the extra weight of the ration, which would necessitate a reduction of three days of provisions out of 42 that are generally carried, and also the difficulty in extracting the frozen lime-juice from the bottle in which it would be obliged to be carried. He was quite sensible of the value of lime-juice, could it have been carried, and considered it very seriously, and also in a medical point of view, and as being recommended by the medical officer of the ship. He considered himself responsible for all that concerned the maintenance of the health of the men, and if he took upon himself the regulation of the sledges in any future expedition he should consider lime-juice essential for the sledging parties. He regulated his sledge rations by the rations adopted by M'Clintock and Mechan. The memorandum furnished to Sir George Nares by the Admiralty from Sir William Armstrong on the maintenance of the health of the men was laid before the Committee. It insists in the strongest manner on the importance of the uninterrupted daily use of a ration of an ounce of lime-juice, and expressly directs that this ration should be continued during the sledging expeditions, in order to preserve the men from scurvy. Sir George Nares, in his evidence, stated that after he had decided not to send lime-juice on the sledging parties on account of the difficulty of carrying and melting it (a decision which he states that he took without consulting his medical officer), Dr. Colan, the chief medical officer of the expedition, expressly drew his attention to the paragraphs in the Director-General's memorandum, and this is confirmed by Dr. Colan's own evidence before the Committee. Sir George Nares accepts the whole responsibility of the course taken. He and Capt. Stephenson state that on any future sledge expeditions they would so modify the arrangements as to admit of sending lime-juice. Capt. Markham, alone of all the witnesses, declares that he does not consider lime juice to be a preventive of scurvy, and that he would not send lime-juice on any future sledge expedition.

A bright and sparkling little piece, entitled *A Night Surprise* has just been introduced at the German Reed entertainment. It is full of humour, is admirably mounted, and is well worth seeing. The author is Mr. Arthur Law, late of the 21st R.N.B. Fusiliers, who is to be heartily congratulated on his success. The music is by Mr. Reed.

The Executive Committee of the Corps of Commissionaires have lately issued a special appeal to the officers of her Majesty's Navy, urging its claims on every branch of that Service, and stating that, although hundreds of sailors have been admitted to all the advantages of the Corps, very little pecuniary assistance has been received from them. It appears that the officers of every regiment or equivalent unit on subscribing £25 not only constitute themselves perpetual governors of the Corps, but that their men on becoming members are entitled to a reduction of 10s. in the entrance fees. It is proposed, therefore, that all officers of her Majesty's ships who are willing to accept similar conditions shall be entitled to corresponding advantages; but as the constitution of the Navy differs so much from that of the Army, the subscription from ships having 500 men and upwards has been fixed at £20, below this number but above 350 at £15, below 350 but above 200 at £10. As regards the donations of the petty officers and men, it is particularly to be noted that as, according to a fundamental principle of the Corps, the subscriptions of non-commissioned officers and privates could not be taken from the Endowment Fund, from its being specially devoted to the expenses of the officers 'Staff (in consequence of which the founder recently established a special fund, entitled the Convalescent Hospital, to which all subscriptions of private soldiers are exclusively devoted), so it is specially requested that the donations of the petty officers and men of the Royal Navy may be kept distinct from those of their officers and forwarded on a separate list. When it is considered that the chances of accident to sailors in time of peace are so many more than in the case of soldiers, and that in time of war both are liable to loss of health as well as of limb, it is hoped that this appeal to all ranks in the naval Service will meet with the same liberal response that has already been accorded by a large majority of the regiments in the sister Service.

Rossetter's Hair Restorer.—This unrivalled preparation has now been before the public for many years, and as its success has led to several spurious imitations, the public should be on their guard. Rossetter's preparation is the only one that will with certainty restore grey hair to its original colour, remove dandruff, prevent the hair from falling off, promote its growth, and give it the lustre of youth.

THE ARMY ESTIMATES.

Mr. Hardy introduced the Estimates on Monday. On rising, the right hon. gentleman said—In moving the total number of men for 1877-78 at 133,720, I will be as brief as possible in the remarks I have to make on the Estimates generally. Last year there was good reason for doing so, because it was necessary to ask for a considerable sum of money to carry into effect the objects I had in view, and which the House will have no reason to regret. All that has been done for the soldier and non-commissioned officer has had a very beneficial effect.

The Retirement Question.

Having done what was necessary to the privates and non-commissioned officers in the case of promotion and retirement, I hope the Committee will not think me neglectful of the interests of the officers, and through them the Army, in the delay which has taken place in bringing forward the question of their promotion and retirement. The Committee that was appointed to inquire into the subject has been a long time occupied in preparing its report. I am aware that strong comments have been made outside the Army and by officers themselves about it, but since it has been in my possession I have come to a full knowledge of the difficulties and intricacies of the question, and how necessary it is not to take a step without looking narrowly to the position and interests of all those who would be affected by it. It was a difficult task to accomplish, and so far as the War Office is concerned it is nearly accomplished, but there is an amount of work still to be done which prevents my bringing it now before the Committee.

Artillery Reorganization.

The principal change I have to notice this year is that which takes place in the Artillery, a change that does not affect the cost very much, but is done for the benefit of the Service. Relief by brigade is found to be cumbrous and unsatisfactory, and it was found necessary to make a change in that respect. The brigades will be reduced in number, and the batteries will belong to the larger brigades, but they will only be connected with them practically for the purpose of keeping a record of what is done by each battery. As they will be placed in different districts the batteries will come under the command of the commander of the district, and he will have the promotion of non-commissioned officers, except one or two of the higher rank, such as the brigade-quartermaster sergeant and battery sergeant-major.

"The Stock Purse."

I last year made a promise to look into an item in the accounts which puzzled a great many hon. members, and I believe a generation of hon. members before them—viz., the Stock Purse Fund. It is an item brought into the account as payments to the companies of the Guards at the rate of £158 to each company. This year, without my attempting to set it in order in the sense of making any alteration in the amount of money, I have set it out of the Estimates as it appears according to the item to which it is really applied.

Recruiting.

Last year the House agreed to an increase of the pay of the Army by deferred pay, and I believe it has very materially affected the recruiting, which last year amounted to 29,370. (Hear, hear.) I know there are many who suppose that we are taking away from the Militia when we get this enormous number of recruits. There were 38,437 recruits enlisted last year for the Militia, and 70,000 for the Militia and Army, which is far beyond anything that has taken place since 1858. Up to June the Army was actually decreasing in numbers; but in June, when the publication of the new terms for the Army was made for the first time, the Army showed an increase, but only by eighty-four, and towards the end of the year the recruits came in about 800, 900, and 1,000 a week. We have been gradually going back to our old conditions, and the result is that whereas upon no previous occasion has the Army been up to its establishment—never, I believe, but in almost all instances when the Estimates have been introduced it has been upon the supposition that it would be 1,000 or 1,300 below the proper number—this year at the end of January the Army consisted of 1,857 men above the establishment. From having had my attention called to this fact I have considered the necessity of passing the men into the Reserve rather more rapidly, and I trust that in that way I shall not have to stop recruiting, my desire being to keep on recruiting and increase the Reserve. Though we have had to reduce the height, it is satisfactory on the whole. The lowest height is 5ft. 4½in., bearing comparison with the height of any of the Armies in Europe. With regard to age, not a great many over twenty-five have been enlisted. The desertion, though large, is not large in proportion to the number of recruits. Desertion takes place in the British Army early. Out of 4,878 deserters, 2,063 returned, leaving a net loss of 2,815.

The Mobilization.

This year it is not my intention to ask the House for any grant for manœuvres. I think the Army may very well have one quiet year, and particularly in relation to the question of Artillery. I cannot help calling attention to what occurred last year. We called out two army corps, and a great deal of criticism—and I think not unjust criticism—has been expended on what was done. It has been said that there was a want of transport and a great want of Artillery, Engineers, and so on. When I first mentioned the army corps I said I thought it was never intended to fill up those that were low down in the list, but to keep a nucleus as occasion required. This division which we are making in the Artillery will enable us, I hope, to spread the men more freely among the army corps than before. I think what was done last year—call it mobilization or what you please—was of the greatest possible benefit; in fact, it had two most distinct benefits. I believe it did the greatest possible good. It showed those regiments something of this country, to which they were entire strangers. They found themselves kindly welcomed, and were admired very much. Some of the Irish and Scotch regiments were as fine a set of men as could be seen anywhere. I was very much struck with them indeed, and I was glad to find that what I thought was confirmed by a number of officers to whom I spoke on the subject.

The Reserve.

This year there were on the 1st of January 6,062 men in the first class Army Reserve. There are to come normally about 5,000 men. If we get somewhere about 3,000 we shall have almost as many as we are entitled to expect, considering all the circumstances. Therefore, the demands upon recruiting this year might seem to be not so large as last, because anybody who will look at the enormous demands made last year, in consequence of the retirement of the twenty-one years' men, will see that there will not be so many again. In fact, the number that left the Army from different causes last year was no less than 26,154—an enormous gap to fill. The Committee will remember that the year before we had only 17,000 recruits, and it will see that if we had not taken some steps last year to meet the increasing demands we should have been involved in very serious difficulty. But last year we got a net gain of 6,000 by recruiting and returns from desertion. That accounts for the condition of the Army at the end of January this year. Of those 5,000 and odd men who would naturally go in the course of this year, there are 2,018 at home, 1,213 in the Colonies, and 2,200 in India. That is the reason why, looking at the division, I cannot but apprehend that there will be a loss upon those in the Colonies and in India, so that we may not gain them all for the Reserve. We hope, however, as recruiting goes on, we may in other ways supply an additional force for the Reserves.

The Localization System.

Now I come to a question which is, perhaps, not altogether appropriate to the Estimates, viz., the brigade depots. These brigades are going on rapidly. Four have been formed during the year; forty have been formed up to this date; another is in course of formation, and it is hoped that fourteen more will be formed in the course of the present year, as many of the barracks are in a forward state. This will leave only fifteen to be formed after the close of this year. The delay has mainly arisen from the difficulty in obtaining sites. With respect to the northern station, near York, the store depots are about six miles from that city, and considerable progress has been made in the purchase of the land. Though it does not affect the present Estimates, I may inform the Committee that the expenditure, up to Dec. 31, 1876, was £1,487,000, and the expenditure anticipated during the present quarter is £323,800; the total liabilities incurred up to the present time being £2,870,000. I am glad to add that, as far as can be seen, the whole sum voted, though required, will not be exceeded.

The Militia Committee's Report.

With regard to the report placed in the hands of hon. members this morning, respecting the Militia and brigade depots, I may say that, as to all questions affecting the Line, no steps have been taken; but certain things have been done with reference to the Militia. Questions connected with the Line could not be gone into because of the illness of his Royal Highness the Commander-in-Chief. I cannot help thinking that these brigade depots will materially increase recruiting. I may say generally that I have given my approval to the recommendations of that committee, so far as regards the Militia. Adjutants of Militia are to receive their actual travelling expenses, and, in addition, 2s. 6d. head money for each recruit. It has been a great point, with respect to the condition of Militia recruiting, that it has been too much left in the hands of non-commissioned officers. It is proposed to compensate the permanent Staff by an enrolment fee not exceeding 2s. 6d. each. Those payments are not to be made unless the recruit is actually enrolled. The men are to receive 10s. on enrolment, and £1 bounty on each year's training. There has been a good deal of bickering and dispute about the alteration made from five years to six without any *increase* of pay. Now, the Militiamen would receive £1 for each year; and to encourage re-enrolment it is desirable to give those men who have been in training a fee of £1 10s., and a bounty of £1 10s. for each year's training. It is also proposed that discharges should be given on somewhat easier terms than at present. We want also to provide better arrangements for instruction, and these matters are under careful consideration, both as respects Infantry and Cavalry. (Hear.) Each battalion is to have its own permanent Staff. Before, they were to be taken from the brigade depot, but now we have reversed the order. The Militia battalion will have its permanent Staff, and when not in training the Militia Staff will be working at the brigade depot. There is one point to which I hope I may obtain the assent of the Committee.

Military Education.

I wish to say a few words on the subject of education. Sandhurst and Woolwich are now put in a better position than they have occupied before. Sandhurst is just beginning the new system. The men who have passed for the Army go there as cadets without commissions, and at the end of the year, if they pass the military examination, they will obtain a commission. With respect to the schools for the children of soldiers, I have directed that wherever possible the children should be sent to the ordinary public elementary school. It is far better that they should mix with the general population than that they should be treated as an exceptional class.

Militia Nominations.

The Committee is aware that, in order to connect more completely the Militia and the Line, a proposal was made some years ago that while the Lord-Lieutenant appointed to the first commissions, it should be in the power of the colonels of Militia to give commissions from the Militia regiments to those of the Line. I confess I am not satisfied with the working of that system. (Hear, hear.) The consequence of it is that it becomes a system of promises and engagements respecting young men, which I think very detrimental. Instead of taking their training entirely in the regiments of Militia for which they are nominated, it constantly happens that they are moved into the regiment simply for the purpose of being nominated upon a particular occasion; and when I find that this matter is beginning seriously to attract the notice of Army agents I think the time has come for me to interfere. (Hear, hear.) Therefore, I am going to make a proposition on the subject. I propose that those who qualify themselves in the Militia for those commissions should compete for them, not as under the Civil Service Commissioners, but as men do by going to Sandhurst. The plan I propose will, I think, be an inducement to young men thoroughly to train themselves in military subjects, so that they may be able to compete for the commissions. This, at all events, will put an end to the system of jobbery, for there are cases where it is open to make a bargain, and it ought not to be possible to make a bargain in giving away a commission. I do not think it would be fair to make this alteration without notice. At present there are many young men on the verge of being nominated for these commissions who have such an interest in them that I think it would be unfair and unreasonable to interfere. The system has been sanctioned by my predecessor and by the House of Commons, it is one to which they have a right to look forward, and therefore I propose that the alteration should not come into force until after the end of the year 1878.

The Volunteers.

I now come to the Volunteers. There is this year an increase for the capitation grant owing to the augmented number of efficient Volunteers. I cannot help alluding to what all members of the House had an opportunity of witnessing last year in the loyalty and efficiency of the Volunteers who came to London and made a display which was very gratifying to my feelings, as having sanctioned that review, and I am sure also to the feelings of his Royal Highness the Commander-in-Chief. (Cheers.)

The Medical Department.

The subject I wish next to touch upon is one which has been very troublesome ever since I have been in the office I now hold. When I came into office I found that steps had been taken for what was called the Staff system, instead of the regimental system. Changes had been made under my predecessor in 1873. No doubt a great deal of discontent and dissatisfaction existed when I came into office. From the first moment I arrived there I was waited upon by deputations and memorialised upon the subject. I may assure the medical men in the Army that I have done my best to ascertain their grievances, and if possible to relieve them; but there has been a difference between them as to the relative merits of the regimental and Staff systems. There was a sort of half-and-half system in existence, because an attempt had been made to combine the two. After going carefully into the subject, I came to the conclusion, as everybody admitted, that the arrangements and regulations in time of war should also be the arrangements and regulations in time of peace. That is the unification system. What was the case before? You had small regiments of Cavalry and two medical men attached, and when their services were not required it was a waste of their time and skill. You would have a system of general hospitals in which there was the best instruments, the best appliances, and I hope the best medical men. There is a school for training men in the way in which hospitals shall be managed. It would be impossible to have only a system of regimental hospitals. You must have a general hospital, and be able to take the medical men where they are wanted. The Army is generally in a satisfactory position with regard to health, except on that point which gives us sometimes painful discussions; and it seems to me to be unfair to begin to call upon me to reconsider the system. It has had really no trial. It has not yet come into operation, for the men who havd just passed their examinations will not be attached to the Army before August next. We must see first whether the medical men will enter in sufficient numbers; next, whether they will be contented with their position; and, thirdly, whether there is any grievance affecting any of the regiments. I adhere to the unification system, and I hope the House will adhere to it until it has undergone a much greater trial than it has hitherto done.

Ordnance Stores.

With respect to guns, we have 102 38-ton guns, five 35-ton guns, 71 25-ton guns, and 243 18-ton guns. We have lent India 30,000 Martini-Henry rifles, which will be returned next year. We have now 215,000 of these rifles in store, but in April, 1878, the number will be 245,000. All the Infantry regiments and the Royal Marines are now armed with this weapon. With respect to bayonets, arrangements have been made for the manufacture of 150,000 long bayonets, and experiments are going on with a Martini-Henry carbine for the Cavalry. If these improvements succeed, 35,000 carbines will be manufactured for the Cavalry. The reports in the newspapers of the experiments with the 81-ton gun have been so full that I need not go into general details, but I may mention that it has been fired 168 times. The 81-ton gun, being the first of its class, has been very hardly used—much more so than would be the case with any subsequent gun of the same kind. The slight crack in the tube will be replaced, and there was not the least apprehension with regard to trying it again, for in spite of the enormous pressure applied to it, it does not seem to have expanded in the least. The four guns of this size, which are ordered for the Inflexible, are nearly complete.

Knightsbridge Barracks.

With regard to the rebuilding of Knightsbridge Barracks, I intended to preserve the old officers' quarters. When they were examined it was found that it would be throwing away money to repair them, and it was decided that they should be taken down, and a change made in the new site. The riding-school will be moved to the site upon which the men's stables are. The future quarters of the officers will be placed where the present riding-school is, and thus you will have the whole machinery for training the men close together, and the riding-school between the men and the officers. (Hear, hear.) The work has been given to Mr. Shaw, a well-known contractor, who, I believe, will execute it thoroughly.

Concluding Remarks.

With regard to the general condition of the Army, the House may be satisfied that, though I dare say there is much fault to be found, it is an improving arm. It is improving in numbers. We are getting recruits in a manner which I did not anticipate last year, when I thought it necessary to go to considerable expense in order to secure the numbers that would be required. I had no idea that they would come in such numbers as to bring the Army far above its establishment. I think that if recruits continue to flow into the Army we will be enabled more rapidly to fill up our Reserves, and when our Reserves are filled then it will be time to deal with the cadres of our Army. But for the present you must rely on your Regular Force, and cannot yet go into the question of reduction. For my own part, I believe that the Army is contented, that the men see the advantages which the Army gives them, and that they are beginning to appreciate them more fully. I hope that such justice will be dealt out to the officers as will show that they are not forgotten in the reconstruction of our Army, and I am sure that neither officers nor men—whether in these piping times of peace, in their ordinary duties, or whether they may be called to serve in the dangers and glories of war—will be found wanting. (Cheers.)

Sir W. Barttelot congratulated the right hon. gentleman on the success with which he had dealt with the subject of recruiting. He was glad that his right hon. friend had been gradually altering the system of appointments from the Militia to the Line, so as to place competitors from the Militia and competitors from civil life on an equal footing. Col. Mure gave the greatest credit to the right hon. gentleman for having grappled with several questions of great difficulty, but very much regretted that the Reserve was not to be called out this year. Sir G. Balfour said he must congratulate the right hon. gentleman upon the change which he intended to effect in the mode of distributing the Artillery. That change was highly creditable to him. At the same time, what was now proposed was only a half-measure—one of those compromises which he could well make allowance for when he remembered the difficulty which the right hon. gentleman must have had in overcoming the prejudices which existed on the subject. He earnestly hoped that in a short time an entire change would be made with regard to the whole of the brigades. Gen. Shute was glad to find that the right hon. gentleman had solved a most difficult question, and that with little or no increase of the Army Estimates he had been able to obtain the necessary number of recruits. With regard to the Cavalry, he should like to know why there had been a reduction in every regiment of one subaltern officer. The Cavalry were very short of subalterns, and there were not a sufficient number to carry out the ordinary duty of officers. Dr. Lush expressed his dissatisfaction at the position of the medical officers, and at the attitude of hostility which the right hon. gentleman had taken up with regard to them. Sir. H. Havelock regretted that a question which had so long agitated the minds of officers in the Army had received so small and curt attention from the right hon. gentleman, and that the right hon. gentleman had not set their minds at rest upon it. He alluded to the suggestion in the report of the commission, that captains after twenty or twenty-five years' service should retire from the Army. Earl Percy expressed satisfaction at the proposal to increase the bounty, though he was rather doubtful whether that increase on the bounty would alone be sufficient to bring the strength of the Militia up to what it ought to be. He trusted the vote would be allowed to pass. The motion for reporting progress was subsequently negatived without a division. The vote was then agreed to; as was also a vote of £50,000, being an excess expenditure of the Army Purchase Commission. Progress was then reported.

THE HEAD-QUARTER AND GENERAL STAFF.

It is provided in a Royal Warrant, dated Feb. 16, 1817, that such rates of pay as are granted to the "deputy-adjutant and quartermaster-general," the "assistant-adjutant and quartermaster-general," and the "deputy assistant-adjutant and quartermaster-general" of the head-quarter Staff of our Army, by our Warrant of Dec. 27, 1870, be cancelled, and that Article 113 of our said Warrant of Dec. 27, 1870, be corrected and amended in the following particulars, viz.:—Head-quarter Staff: Deputy quartermaster-general, £1,200 per annum; deputy adjutant-general of Royal Artillery or Royal Engineers, £1,000; assistant adjutant-general, £600; assistant quartermaster-general, £600; deputy-assistant adjutant-general, £450; deputy-assistant quartermaster-general, £450. General Staff: Deputy-adjutant and quartermaster-general, 19s. at home, 19s. abroad (daily); assistant-adjutant and quartermaster-general, 14s. 3d. at home, 14s. 3d. abroad; deputy-assistant adjutant and quartermaster-general, 9s. 6d. at home, 9s. 6d. abroad.

The House Committee of Naval Affairs of Washington has submitted the committee's report upon the bill to authorise and equip an expedition to the Arctic Seas. They recommended that there should be a colonisation party of at least forty hardy, resolute men, provided with supplies for at least three years. A strong substantial building, materials for which should be taken on shipboard, should be erected as a depot in Lady Franklin Bay, or, if possible, as high as Cape Union, between 82 deg. and 83 deg. United States vessels should make annual visits to the locality for the purpose of transporting men and supplies, and of keeping the colony in communication with the outside world. The committee further reports upon the necessity of military discipline being observed, and recommends that an astronomer and two or more naturalists, to be selected by the National Academy of Sciences, together with one or more competent members of the Academy, should accompany the expedition. The committee conclude as follows:—"The honour of the American name is involved. Will Congress suppress this jealous spirit of inquiry and adventure, or give it scope by the passage of this bill and a meagre appropriation of 50,000 dols.? To us it appears there should be but one answer, and therefore we report back the bill with the recommendation that it do pass." The approval of this report has been announced by telegram.

On Monday afternoon a special meeting of the Royal Geographical Society was held in the theatre of the London University, which was crowded by the Fellows, to consider a motion by Sir Mordaunt Wells, "That a committee should be appointed to investigate the circumstances under which tickets had been issued to so large a number of visitors for the meeting held at St. James's Hall to meet the members of the Arctic Expedition." Sir M. Wells urged that some 400 to 500 seats had been reserved, and that one of the most distinguished Fellows, the Rev. Dr. Moffat, had been unable to obtain admission till, after a strong representation had been sent in, he was at last admitted to the orchestra. Several Fellows with their wives had had to leave the hall. The council admitted that 406 seats in all had been reserved, of which 148 were in the body of the hall. Lord Aberdare moved an amendment—"That a committee of ten Fellows be appointed, five of whom should be named by the council, to consider the past working of the rules, and to report such alterations as they should recommend." He urged Sir Mordaunt Wells, who represented the views of a strong body of the Fellows, to accept the amendment, which was nearly to the same effect as his motion, as the council would resign should the motion be carried. The amendment was put and carried by a majority, and the following were appointed members of the committee:—Sir Mordaunt Wells, Sir Alexander Armstrong, Mr. Galton, and Sir George Balfour.

Depty. Surg.-Gen. J. N. Tresidder, Bengal Medical Service is retiring from the Service on a pension of £550 per annum, with the additional pension of £250, and Surg.-Major E. McKellar, M.D., on a pension of £365 per annum, both from the 31st inst.

PARLIAMENT.

HOUSE OF LORDS.

The Case of Captain Burnaby.

Last night Lord Dorchester gave notice of the following question for Monday next:—To ask the Secretary for Foreign Affairs by whose authority and for what reasons the leave of Captain Burnaby, of the Royal Horse Guards, granted by her Majesty to travel in Russia and Asia, was rescinded; and by whom the cost of a telegram conveying an order to that officer to return was borne.

Army and Navy Returns.

The following returns have been laid upon their Lordships' table:—The Report of the Committee upon Boy Enlistment; Yeomanry Cavalry Inspection Return, 1876; Army Supplementary Estimates, 1876-77; Army Purchase Commission, 1876-77; Supplementary Estimates and Navy Estimates, 1877-78.

HOUSE OF COMMONS.

Naval Artillery Volunteers.

On Thursday Mr. Hunt informed Mr. Whalley that he was most anxious to give all the facilities in his power to the Naval Artillery Volunteers for gun drill and exercise, but he doubted whether it would be practicable to provide guns, as suggested by the hon. member, suitable to the size and capacity of yachts that might be placed at the service of any of the corps.

Superintendents of Dockyards.

In answer to Mr. S. Lefevre,

Mr. Hunt said no fresh instructions had been issued recently for giving more direct responsibility to the superintendents for the work of the shipbuilding and manufacturing establishments of their respective dockyards. Their responsibility was defined by Article 2 of their instructions, which gave them full and complete authority over all the persons employed under them. They are directly responsible for all that goes on in the dockyards, according to the order. The regulation has not been altered; and, therefore, they are bound by it.

Flogging in the Navy.

Mr. P. Taylor gave notice that he would on an early day move that the time had arrived when flogging in the Navy should be entirely abolished. (Hear, hear.)

The Slave Trade.

Last night Mr. Hanbury, in the absence of Sir Henry Wolff, asked the First Lord of the Admiralty whether, in compliance with the instructions stated by him on the 4th of July, 1876, to have been given at the commencement of that year, any of Her Majesty's ships of war had called at the Red Sea ports, and whether any reports have been received respecting the Slave Trade in the Red Sea; if so, whether such reports can be laid upon the table.

Mr. Ward Hunt replied in the affirmative. The Dwarf and Fawn had called at the ports referred to, and the report of the latter was already before the House. There would be no objection to lay the report of the Dwarf on the table, and it would be included in the next returns.

The Recent Polar Expedition.

Capt. Pim asked the First Lord of the Admiralty when the report of the Committee on the outbreak of scurvy in the recent Polar Expedition would be laid upon the table of the House, and whether the summary of the same which had appeared in the newspapers might be considered as substantially correct.

Mr. Ward Hunt said that the report had not yet reached the Admiralty, but he had been informed by the chairman of the Committee that he hoped shortly to present it to the Admiralty.

Prison Dietary and Drill.

Sir Edward Watkin has given notice of the following motion for Thursday next:—Address for return of the dietary and drill of civil and military prisoners respectively on the 1st day of March, 1875, and at this date, in comparative columns, as respects Millbank and other civil prisons in which military prisoners are subject to confinement.

DOCKYARD ADMINISTRATION.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—The subject of the following remarks is one which I believe ought to have been taken up before. On the safe launching of one of H.M.'s ships at a Royal dockyard, the Chief Constructor is allowed a gratuity varying from £40 to £50, according to her armour, weight, &c. Now, is it fair that no such gratuity be allowed to the foreman who has built her? for, whilst he has the ship under his immediate charge, such is not the case with the Chief Constructor, who only has charge of her in general with the other ships building. Of course the Chief Constructor is the head of the department, but I think it is very unjust that, while he has £40 or £50, the foreman, who has the greater part of the bother and anxiety about the building and launching, does not receive a penny; besides, it cannot be very encouraging to him to think that, while he does the work, the other has the credit and draws the pay.—I am, &c.,

Justitia.

THEATRES.

Globe.—Attempts to transfer to the British boards pieces which have achieved success in the French capital have rarely carried out the hopes of their translators and adapters. The exceptions are so few that one might count them on his fingers during as many years, and it is to be feared that *Cora*, recently produced here, will not add to the list. The original is a play by Adolphe Belot, which attained great popularity some six or seven years ago under the title of *L'Article* 47. It is, in fact, a romance of the French criminal courts, and takes its title from the circumstance that the Forty-seventh Article of the Code directs that offenders who have been condemned to penal servitude under certain conditions must remain under police supervision even after their release, and must report every change of address. Messrs. W. G. Wills and Frank Marshall have executed their work well, and, had the material been more promising, there is little doubt they would have produced a much better play. In fact, so well is the piece put together, and so admirably does the dialogue serve its purpose of bringing the action to a desired end, that it seems more than a pity so much ability should be wasted in cultivating unprofitable soil. Nor does the waste end here, for one of our best, if not our very best, actress, Mrs. Hermann Vezin, gives in her rendering of the principal character one of the finest pieces of acting seen upon the stage for many a year. Despite its faults and its generally unpleasant nature, the piece is worth seeing, if solely on account of such a splendid performance.

Adelphi.—The *Colleen Bawn* has been revived here for a time, pending the production of *True to the Core* at Easter. It seems as attractive as ever, and actually vies with the famous *Green Bushes* in vitality. At present Mr. Charles Sullivan is Myles-na-Coppaleen, and plays the part with a good deal of humour, but with the same eccentricities of elocution which were noticeable when he appeared in the *Shaughraun*.

Strand.—The management have thought fit to supplement the attractions of their programme by the addition of the well-known dramatic cantata, *Trial by Jury*. They have certainly given novelty to its character by making it more of a musical farce than anything else, and have thus rendered it more suitable to the peculiar powers of the Strand company. One cannot very well witness the piece in any form without feeling a twinge of regret for the absence of poor Fred. Sullivan, who had made the part of the Learned Judge his own; but since his place must be filled, a much more amusing representative of "his Lordship" could not be found than Mr. J. G. Taylor. Miss L. Venn is excellent as the Plaintiff, and M. Marius makes a great deal of fun out of the *rôle* of the Defendant.

Drury Lane.—*Haska*, a new drama by Henry Spicer, is announced for representation this evening.

THE COMMISSARIAT DEPARTMENT.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—The concluding remarks of your correspondent, "L'Union Fait la Force," are more to the point than his initiatory observations. He forgets that if the Commissariat Department had been reduced in 1869-70-71, the reason for such reduction would have applied with equal force to other departments with establishments in the Colonies, and that the relative positions and advantages of the various departments would not have been affected. As regards the Commissariat Department, moreover, the reduction could not have been applied to the higher ranks alone, for the most important provision in the Royal Warrant of 1858 was that of a fixed establishment, and without a flagrant violation of that Warrant a reduction could not have been made, disturbing the proportion of officers of each rank. Had a reduction of establishment been decreed and a certain number of officers of each grade been placed on half-pay, the officers of the Commissariat would have accepted the reduction in preference to the loss of their distinctive privileges and departmental prestige. However, the mischief having been done, let the advice of your correspondent be followed; though, indeed, it has been anticipated by the officers of the Commissariat, who have taken action in the matter of the grievances of the department, and who have already agreed that the Secretary of State for War should be solicited to appoint a committee of general officers to hear and report upon the grievances of the officers of the late Commissariat, Military Train, Military Store, Surveyors, and Barrack Department, arising out of the amalgamation of those departments with the Control Department, and their subsequent division into Commissariat and Transport and Ordnance Store.—I am, &c.,

C. de G.

RECEIVING-SHIP AT PORT ROYAL, JAMAICA.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—With reference to your article on H.M.S. Urgent, now fitting as a receiving-ship for Port Royal, Jamaica, I beg to offer a few remarks. In the first place, I think, with you, that life, or rather existence (should it be mercifully prolonged), in a floating tea-kettle under the rays of a tropical sun at Jamaica, would be simple martyrdom, especially if, as is not generally known, she would be moored, as the Aboukir is, head-and-stern, with the sun always shining on her starboard side. Secondly, the new receiving-ship, as she now is, is of no manner of practical use as an offensive or defensive unit of strength to the station, as she is to be denuded of her engines and boilers. I will, therefore, strongly recommend that instead of the Urgent, which can now be made available for harbour service at home, another line-of-battle ship, or, what is far better, a first-class wooden frigate, should be fitted to hoist the commodore's broad pendant on the Jamaica station. She need not have her full complement of guns, but those she is supplied with should be effective, and she should be fully rigged and engined, and ready to proceed to any part of the station which the commodore could visit periodically, thus giving his ship an occasional "blow through," and the officers and men the benefit of a change, while a corvette could remain at Port Royal to do the duty of senior officer. The remainder of her guns could be stored in the dockyard in case of emergencies. For my part, I would have no such thing as a "dummy" senior officer's ship on any station; but some of the magnificent hulls we are sending to the "knackers' yards" could be stationed as tenders to the flagship, for the purpose of temporarily receiving the crews of ships fumigating or refitting.—I am, &c.,

Anti-Parsimonious.

London, March 3, 1877.

THE RIDINGMASTER.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—There is a rumour that the position of the Army is to be brought before the House of Commons during the present Session. It is hoped that the case of the ridingmasters will not be forgotten. It is also desirable that they should hold the same position that they did before the Crimean war, when they had substantive and progressive rank, more especially since purchase has been abolished. To cause a flow of promotion, for deserving non-commissioned officers, compulsory retirement on the completion of 30 years' service, 10 as an officer, should be one of the changes for both ridingmasters and quartermasters.—I am, &c.,

One of Them.

NAVAL PROMOTION.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—May I crave your powerful assistance to induce "my Lords" to make a "batch" of, say, from ten to twelve of the senior lieutenants? The Order in Council of August, 1875, authorized the promotion of from twenty to twenty-five lieutenants a-year. Why not commence now and reverse last year's tactics, when nearly all those promoted (that is, fourteen out of twenty-one) were comparatively juniors, some very much so? and when the Christmas promotions came out only one lieutenant figured in the *Gazette*, and that lieutenant was two, three, and four and a-half years junior to those who have been selected to fill the vacancies which have arisen since the commencement of the present year. It does not seem quite fair, and I am sure that if, as I have suggested, ten or twelve lieutenants were promoted at an early date, it would remove much heart-burning and conduce to the good of the Service, for any of the seniors who might be passed over or excluded would see at a glance that their chances were gone, and would accept Coast-guard appointments or retirement, and help to clear the list.—I am, &c.,

One who has the Good of the Service at Heart.

MILITIA QUARTERMASTERS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—From War Office Circulars published some time back, I understood that the position of quartermaster in the Militia was abolished, and that those then serving, being specially provided for, were not to serve after attaining the age of sixty. Notwithstanding all the regulations issued from time to time, I find that there are still serving several quartermasters over the prescribed age, whilst in other regiments the quartermasters have long since been placed on a handsome retiring allowance, and I understand that the duties in such cases have since been efficiently performed by the quartermaster-sergeant. I would, therefore, like to know what grounds there are for making exceptions, and if those so favoured possess any special qualifications by which their corps would suffer by their loss. Should the authorities feel disposed to call for a special report in those cases, they will be surprised to learn that many illiterate eye-servers have, in the good old times, managed to crawl into positions for which they were never fitted.

Commissary.

Errata.—In our notice of the dinner given to H.R.H. the Prince of Wales on March 2 by the Hon. Corps of Gentlemen-at-Arms, the Earl of Shrewsbury was erroneously styled the Marquis of Shrewsbury; also, in last week's paper, in the notice of Sir Jung Bahadoor's death, "impiger" was printed "impeger."

BIRTH.

Harvest.—Feb. 27, at Dawlish, Devonshire, the wife of Captain H. L. Harvest, 89th (Princess Victoria's) Regiment, of a daughter.

MARRIAGE.

Maunsell.—Caswell.—Feb. 26, at St. Mary's Cathedral, Limerick, by the Very Rev. the Dean of Killaloe, assisted by the Rev. Canon Hamilton and Rev. F. Studdert, R. Mark S. Maunsell, Captain Royal Dragoons, only son of George Woods Maunsell, J.P., D.L., Dublin, to Mary Eliza, only child of the late Samuel Caswell, Esq., J.P., Blackwater, County Clare.

Advertisements.

ROYAL POLYTECHNIC.—Entire change of Entertainment. HYLDEMOER, a Fairy Story, with a ghost effect. CHRISTMAS AND ITS CUSTOMS, and a New Optical Entertainment, consisting of FAMOUS STATUARY UNDER THE LIME LIGHT, and the SHADOW PANTOMIME, by Mr. J. L. King. CHEMICAL MAGIC, by Professor Gardner. The SEANCE, by the Polytechnic Medium. The TALKING LION, &c., by Mr. James Matthews. The GIANT CHRISTMAS TREE. Admission to the whole, 1s.; Schools and Children under 10 years, 6d. THE
OXFORD MILITARY COLLEGE,
With the Approval of
HIS ROYAL HIGHNESS THE DUKE OF CAMBRIDGE, K.G., &c., FIELD-MARSHAL COMMANDING-IN-CHIEF.

BOARD OF MANAGEMENT.
Major-General Eardley-Wilmot, R.A., F.R.S. (Chairman).
Major F. Duncan, R.A., D.C.L., LL.D.
Marshall Hall, Esq., F.G.S., F.C.S., Barrister-at-Law, late Captain 1st (Royal East) Middlesex Militia.
The Rev. G. W. Kitchen, M.A., Censor of Unattached Students, and late Censor of Christ Church, Oxford.
Lieutenant-Colonel Loyd-Lindsay, V.C., M.P.
Major-General F. O. Salusbury, C.B.
Colonel E. Wray, C.B., R.A.

Governor.
Colonel J. Desborough, C.B., R.A.
Secretary to Governor and Director of Drills:—Major Graham.

Head-Master.
The Rev. Arthur H. Dyke Acland, M.A., Ch. Ch.

Assistant Masters.
Cyril F. Ransome, Esq., M.A., late Postmaster of Merton.
Charles Hawkins, Esq., M.A., Corpus Christi College, Cambridge.
H. W. Cunningham, Esq., B.A., Brasenose College, Oxford.
W. F. Donkin, Esq., M.A., F.C.S., Lecturer in Chemistry at the University Museum.
Alexander Macdonald, Esq., Ruskin Teacher of Drawing in the University of Oxford.
Dr. Hamann, Taylorian Teacher of German in the University of Oxford.
Mons. A. F. P. Manier, Teacher of French.
Archibald Maclaren, Esq. (Gymnastics).

Physician.
Richard Fernandez Freeborn, Esq., M.D., F.R.C.P.

THIS COLLEGE is intended:—
(1.) To provide the best possible Education for the Sons of Officers.
(2.) To train and prepare Candidates (whether Sons of Officers or not) for Commissions in the Military Service.
(3.) To enable its Senoir Pupils to enter as Unattached University Students, and to take degrees.

Two Scholarships, of £30 and £20 per annum respectively for two years, have been placed at the disposal of the Board of Management by a gentleman interested in the success of the College.

The competition for these Scholarships will take place on the 10th of April, 1877, and is open to Sons of Officers and all who are preparing for the Military Service, whether sons of officers or not.

Candidates must be between the ages of 13 and 15.

The subjects of the examination will be such as are included in an ordinary public school education.

Copies of the Prospectus may be obtained from the Bankers, Messrs. Cox and Co., Craig's Court, London, S.W.; from Mr. Henry Naidley, the Secretary of the Company, 35, Lincoln's Inn Fields, W.C.; or from the Governor, Military College, Cowley, Oxford, who will supply information as to the admission of Students and the competition for Scholarships.

£800 INVESTMENT.—An opportunity occurs for retired officers or others to join a profitable undertaking, in working order, connected with the Services. Returns immediate. Apply, in first instance, to Captain Archer, 2, Vigo Street, W.

TO OFFICERS ON LEAVE.—BOARD and RESIDENCE (Superior) in the house of a young widow lady near Kensington Gardens. Bath-room, private study. Terms moderate, according to requirements. References. Cards. Marion, care of Burling's, 81, High Street, Notting Hill Gate.

TO CANDIDATES for WOOLWICH and SANDHURST.
MILITARY EDUCATION IN GERMANY.
COLONEL BERDOE A. WILKINSON, Retired Full Pay Royal Engineers, being about to reside in HESSE DARMDALT, proposes to receive Pupils to Educate for the Army. They will have the advantage of preparing for the Examinations under the superintendence of an officer of long service, assisted by competent masters, and, at the same time, of acquiring a colloquial knowledge of the German language.
Address,
Colonel B. A. WILKINSON, late R.E.,
Care of Messrs. Cox and Co., Craig's Court, London.

NAVAL CADETSHIPS, &c.

"EASTMAN'S" ROYAL NAVAL ACADEMY,
BURGOYNE HOUSE, SOUTHSEA.
Principal, since 1860, G. EASTCOTT SPICKERNELL.

At the last two Naval Cadet Examinations pupils took the *First* Place. More than 1,000 pupils have entered her Majesty's Service.

The House is situated close to and directly facing the sea. Pupils have good Bathing and Boating, under careful superintendence.

Pupils are received from Nine years of age and upwards. To make the School specially adapted for Junior Pupils intended for the Royal Navy and the Public Schools, Senior Pupils are not now received.

NAVAL CADETS, ASSISTANT CLERKS,

HOPE HOUSE, SOMERSET-PLACE,
SOUTHSEA.
Principal—Mr. T. H. VICKERY.

In addition to the general course of study pursued at this long-established School, pupils are specially prepared for the examination required for the above.

At the competitive examination in November, 1875, and at the recent examination in June, of candidates for Assistant Clerkships, all the pupils sent up from this Establishment were successful.

NAVAL CADETS' EXAMINATIONS.—A Retired Naval Instructor can receive a few young gentlemen into his house to board with the family (three in number), or in any manner parents may wish Having no other occupation, and taking pupils only for the purpose of having something to do, the whole time of the instructor will be devoted to the pupils.

Sons of Naval Officers will be received at a lower rate than the sons of civilians, and sons of deceased officers at only a small increase on the actual cost of board and lodging, if surviving parent or guardian is unable to pay more.

A French gentleman will instruct in speaking French, and a German gentleman in German, under the supervision of the instructor. References to officers, admirals, and captains with whom the instructor has served have been kindly granted. Address, A. B. C., care of Willing, jun., Advertising Offices, 301, Strand, W.C.

MALVERN COLLEGE.

The SECOND TERM will begin on MONDAY, May 7th.

BOURNEMOUTH.—Overton Hall.—The Rev. LOVELL J. PROCTER, M.A., assisted by five highly qualified English and Foreign Masters, receives a select number of boys for preparation either for the public Schools or Royal Navy. A few taken for more advanced tuition. Spacious school premises, with three acres of grounds, prettily situated near the sea. Particulars and prospectuses on application.

TRURO SCHOOL. Founded A.D. 1549.—Special preparation of a limited number for Woolwich, the Line, Navy, and Cooper's Hill. Five experienced and energetic resident masters in mathematics and geometrical drawing, the classics, and English, French, science, and German; besides visiting masters in drawing and English composition.

TUITION IN HEIDELBERG.—Three Oxford Graduates, first-class men in Classics, Mathematics, and Natural Science respectively, propose to undertake the preparation of a limited number of *resident* pupils in the above town for the entrance examinations *for* the Army, Woolwich, Cooper's Hill, &c. For terms, testimonials, &c., apply to E. B. Iwan-Müller, Droitwich.

MUCH TIME AND WORRY SAVED
by sorting your papers into
STONE'S PATENT BOXES AND CABINETS.
"Exceedingly useful."—"Standard."
Sold by Stationers everywhere. Illustrated Catalogues post free from
HENRY STONE, Manufacturer and Patentee, Banbury.
All sizes can be seen at
13, CRANBOURNE STREET, LEICESTER SQUARE, LONDON.

THE SURPLICE SHIRT.—SAMPSON and CO.—All the new patterns in coloured French cambric shirts, Saratta gauze cotton shirts, Lorne collar attached. Patterns and self-measurement cards sent on application. A register kept of all goods made to order.—Hosiers and Tailors, 130, Oxford Street, London.

MILITARY CLOTHIERS, CAP, HELMET, SHABRACQUE, and CAVALRY ACCOUTREMENT MANUFACTURERS, with every description of UNIFORM, and Appointments for the Army and Navy, Yeomanry, Militia, &c., 30, KING STREET, COVENT GARDEN, LONDON. W.C

THE DIRECTORS of the BRIGHTON LIVERY STABLES COMPANY, Limited, give notice that Prospectuses inviting application for the portion of unallotted Shares may be obtained from the Secretary at the Offices of the Company, to whom an early application should be made.

A. J. BODDINGTON, Secretary.
17 Prince Albert Street, Brighton.

WANTED, a BANDMASTER, a pensioner from the Army preferred. Liberal salary. Apply, Adjutant, 2nd Northumberland Artillery Volunteers, Alnwick.

WANTED, Particulars, Anecdotes, &c., respecting the recipients of the Victoria Cross in the Crimea, India, and the Colonies; as also "Undecorated Heroes." Any INFORMATION on the subject will be gladly received, addressed to Major Knollys, who is editing a series of books entitled "Deeds of Daring Library," care of Dean and Son, Publishers, 160A, Fleet Street.

A GENTLEMAN WANTED, of education and good social position, for about an hour daily in a confidential capacity. A fair salary offered, with furnished rooms, &c., near St. James's Square. Address, F. O. T., Kelly's, 2, Vigo Street, W.

PARTNERSHIP.—To Cavalry Officers or Gentlemen fond of Horses.—Required, a partner in an old-established business. Capital required, £3,500. Apply by letter, giving real name, to Captain D., care of Steel and Jones, 4, Spring Gardens, Charing Cross.

LONDON AND SOUTH-WESTERN RAILWAY.

OXFORD AND CAMBRIDGE BOAT RACE.
1877.

TICKETS of admission to view the Race from Barnes Railway Bridge, price 20s. each, including railway fares between London, Kingston, Shepperton, Hounslow, or intermediate stations, and Barnes, can now be obtained at this office on personal application or by letter. In the latter case, a remittance in payment for the number required must accompany the application. Tickets can also be obtained on application at the Company's West End Office, 30, Regent Circus, Piccadilly, and at the City Office, Arthur Street West, London Bridge.

For the accommodation of the holders of these tickets only, a special train will leave Waterloo Station on the day of the race, for Barnes Bridge, at a time to be announced by advertisement in the daily papers, &c., and will return from the Bridge, with passengers for London only, about ten minutes after the conclusion of the race.

Early applications are desirable, as the number of tickets will be strictly limited.

By order,
FREDERICK CLARKE, Secretary.
Secretary's Office.
Waterloo Bridge Station,
London, 2nd March, 1877.

ROYAL SCHOOL for DAUGHTERS of OFFICERS of the ARMY.

The Daughters of all Officers in her Majesty's Army, inclusive of the Royal Marines, on full or half-pay, or who may have died in the Service, are eligible.

The ages of admission are from ten to fifteen.

The next ELECTION will take place on June 20, 1877.

Pupils elected by votes of Subscribers pay only £12 per annum.

With a view to afford the advantages of a good education to the daughters of officers of competent means at a moderate cost, and at the same time to aid the primary object of the Institution, a limited number of pupils are admitted on payment of £80 a year, which includes all extras. The new form of application can be obtained at the office.

Each Donation of £5 5s. entitles to one Life Vote.

Each Annual Subscription of 10s. 6d. entitles to one Vote at all elections during the current year.

Further contributions to meet the current expenses are earnestly solicited by the Committee.

By Order,
G. W. FORSTER, Secretary.
22 Cockspur Street, London.

ARMY AND NAVY CO-OPERATIVE SOCIETY, LIMITED.

Established for the advantageous supply of
PROVISIONS AND GOODS OF ALL KINDS
TO ITS MEMBERS,
Comprising
Officers and Non-Commissioned Officers serving, or who have served,
The Widows, Sons, and Daughters of Officers, and Friends introduced by the above;
Also, the Secretaries of Naval and Military Clubs, and the Representatives of Regimental and Naval Messes and Canteens.

For further particulars address the Secretary, 117, Victoria-street, Westminster, S.W.

DINNEFORD'S FLUID MAGNESIA.

The best remedy for ACIDITY of the STOMACH, HEARTBURN, HEADACHE, GOUT, and INDIGESTION; and the safest aperient for delicate constitutions, ladies, children, and infants.

DINNEFORD & Co.,

THE NEW REGULATION MILITARY BUCKLE now ready in all sizes.

N.B. Jewellery of every description kept in stock.

BAUMGARTEN'S INVIGORATIVE NERVINE ESSENCE. A most powerful nutritive cordial, which restores to their normal condition all the secretions on the integrity of which perfect health depends.

Report by Dr. Hassall—"Having analysed the preparation to which Messrs. Baumgarten and Co. have given the name of 'Invigorative Nervine Essence,' I am of opinion that it is a combination well calculated, from its containing, among other ingredients, Pepsine and Phosphate of Soda, to prove most serviceable to the debilitated, the nervous, and the dyspeptic."

Price 8s. per bottle, or four quantities in one, 22s. Carriage free on receipt of remittance. Sole agents, BRANT and CO, 283, Strand, London, W.C.

HOLLOWAY'S OINTMENT and PILLS.—No Eruptions.—Cold winds, heated rooms, and disordered stomachs display their deleterious effects upon the human skin. Roughness, irritation, eruptions about the mouth and nose, cracked lips, and chapped hands are readily cured by the application of Holloway's Ointment, which renders the skin soft and healthy. This Ointment is the best corrective of the red spots, dry patches, and irritable pimples incidental to tender skins. It saves all the torments of such affections, and spares their unsightly blemishes, which are not slight or questionable advantages. At the change of seasons in all countries, no means of securing the human frame against disease can surpass in safety and potency the good effects derivable from Holloway's remedies.

COLT'S NEW GOVERNMENT ARMY REVOLVER, after a severe competitive trial by the U. S. Ordnance Department in 1873 and 1876, has been exclusively adopted by the United States Government, and the whole of the United States Cavalry is now armed with them. It is now made to take the English Government Boxer cartridge. Length of barrel 5½ and 7½ inches.

In the trial of 1869, advertised by another maker, the Colt's pistol used was a muzzle-loader adapted to the use of metallic cartridges, which pistol has not been made or sold after that year.

COLT'S NEW 41-CAL. FIVE-SHOT DERINGER REVOLVER,

THIRD EDITION, NOW READY.

Crown 8vo, 10s. 6d.,

LIFE OF A SCOTCH NATURALIST.

BY SAMUEL SMILES.

With Portrait and Illustrations by GEORGE REID, R.S.A.

BLACKWOOD'S MAGAZINE.
"Lord Beaconsfield has never done a more graceful and seemly act than when, in obedience to the personal wish of the Queen, he secured the future comfort of this veteran naturalist."

TIMES.
"Mr. Smiles has, in a very charming and very beautifully illustrated volume, rescued the fame and character of Thomas Edward from oblivion as a most accomplished naturalist."

PUNCH.
"The wonderful true story of a wonderful true man—a story to bring tears into the eyes, and to fill the heart with sadness and gladness—a story to make those who read it better, humbler, and gentler, and, above all, more thankful to the Great Father of All."

LAND AND WATER.
"Regarding this 'Life of a Scotch Naturalist' as a mere narrative, it is one of the most enjoyable books it has ever been our good fortune to read."

OBSERVER.
"If ever a man was carried away by a subject, it has been Mr. Smiles on the present occasion, and the subject is fortunately quite worthy of him. . . The work is a credit to the head and heart of Mr. Smiles."

SPECTATOR.
"Never has Mr. Smiles written with more of freshness and zest than in presenting to us the picture of this Palissy of Naturalists. A noble lesson of unaffected humility here goes hand-in-hand with the lesson of self-help, and elevates it."

SATURDAY REVIEW.
"The biography of this remarkable man owes much of its charm to the manner in which Mr. Smiles has done his part as narrator. The unobtrusive way in which the story is told, and the pleasant style of the smooth and experienced pen, deserve more than a passing word of approval."

JOHN MURRAY, ALBEMARLE STREET.

A CORRECT IMPRESSION

Prevails among the public that Silks are generally dearer, and that they cannot now be bought at former prices; but this idea will be removed, as far as MESSRS. JAY'S transactions are concerned, by an inspection and comparison of the under-mentioned BLACK SILKS, which are :—

3s. 9d.	per yard	... ...	worth 5s. 3d.
4s. 6d.	"	... ...	worth 5s. 9d.
5s. 3d.	"	... ...	worth 6s. 9d.
5s. 9d.	"	... ...	worth 8s. 3d.
6s. 9d.	"	... ...	worth 9s. 6d.

FOREIGN VELVETS, from 4s. 6d. per yard.

MESSRS. JAY, having had consigned to them before the rise in the price of Silk, a very large stock of these elegant Dress Materials, they are enabled to sell Black Foreign Velvets at 4s. 6d., 5s. 6d., 6s. 6d., and 7s. 6d. per yard. Patterns free.

JAY'S,
THE LONDON GENERAL MOURNING WAREHOUSE, REGENT STREET, W.

DR. J. COLLIS BROWNE'S

CHLORODYNE.

THE ORIGINAL AND ONLY GENUINE,

Which is admitted by the Profession to be the most wonderful and valuable remedy ever discovered.

CHLORODYNE is the best remedy known for Coughs, Consumption, Bronchitis, Asthma.
CHLORODYNE effectually checks and arrests those too often fatal diseases—Diphtheria, Fever Croup, and Ague.
CHLORODYNE acts like a charm in Diarrhœa, and is the only specific in Cholera and Dysentery
CHLORODYNE effectually cuts short all attacks of Epilepsy, Hysteria, Palpitation, and Spasms.
CHLORODYNE is the only palliative in Neuralgia, Rheumatism, Gout Cancer, Toothache, &c.

From Lord FRANCIS CONYNGHAM, Mount Charles, Dec. 11, 1868.

Lord Francis Conyngham, who this time last year bought some of Dr. J. Collis Browne's Chlorodyne from Mr. Davenport, and has found it a most wonderful medicine, will be glad to have half-a-dozen bottles sent at once to the above address.

⁂ Earl Russell communicated to the College of Physicians that he had received a despatch from her Majesty's Consul at Manilla, to the effect that Cholera has been raging fearfully, and that the ONLY remedy of any service was CHLORODYNE.—See *Lancet*, Dec. 31, 1864.

CAUTION.—BEWARE of PIRACY and IMITATIONS.

CAUTION.—Vice-Chancellor Sir W. Page Wood stated that Dr. J. COLLIS BROWNE was, undoubtedly the INVENTOR of CHLORODYNE; that the story of the Defendant, Freeman, was deliberately untrue, which, he regretted to say, had been sworn to.—See *Times*, 13th July, 1864.

Sold in Bottles, at 1s. 1½d., 2s. 9d., and 4s. 6d. None is genuine without the words "Dr. J. COLLIS BROWNE'S CHLORODYNE" on the Government stamp. Overwhelming Medical Testimony accompanies each bottle.

SOLE MANUFACTURER

J. T. DAVENPORT, 33, Great Russell Street, Bloomsbury,
LONDON.

CHLORODYNE.—FREEMAN'S is the original and only true.—Lord Chancellor Selborne, Lord Justice James, and Lord Justice Mellish decided in favour of R. Freeman and against J. C. Browne and J. T. Davenport; see "Times" of July 24, 1873. Thousands of medical practitioners testify that there is no substitute for it in the treatment and cure of asthma, bronchitis, coughs, and other chest affections, neuralgia, fevers, cholera, dysentery, spasms, and all nerve pains. Bottles 1s. 1½d., 2s. 9d., 4s. 6d., 11s., and 20s. Sold by patent medicine dealers in all parts of the world. See that "Freeman's Original Chlorodyne" is engraved on the Government stamp.

HORSES.—GENTLEMEN PROFESSIONALLY ASSISTED in the SELECTION of HORSES. Examined as to soundness. Tattersall's and other sales attended by WILLIAM SEWELL, M.R.C.V.S., 53, Elizabeth Street, Eaton Square, S.W.

FURNISH YOUR HOUSE or APARTMENTS THROUGHOUT on MOEDER'S HIRE SYSTEM. The original, best, and most liberal. Cash prices; no extra charge for time given. Large useful stock to select from. Illustrated price Catalogue, with terms, post free. 248, 249, and 250, Tottenham Court Road. Established 1862.

ESTABLISHED 1864.

PRUDENTIAL ASSURANCE COMPANY.

CHIEF OFFICES—

62, LUDGATE-HILL, LONDON.

SUMMARY OF QUINQUENNIAL REPORT.

FOR THE PERIOD ENDING 31ST DECEMBER, 1876.

In valuing the business of the Company for the period ending 1871, the Carlisle Table of Mortality, with 3 per cent. interest, was adopted for both Branches. Since that time the Institute of Actuaries have published the result of its investigations into the mortality existing among assured lives, and the Directors, desirous to obtain the latest experience on the subject, had no hesitation whatever in deciding to adopt the result of such experience for the valuation of the Ordinary Branch.

The only question requiring any serious consideration on their part was the rate of interest which should be assumed in the calculations, and after mature deliberation on the subject, the Directors resolved to adhere to the rate used on the previous occasion, viz.: 3 per cent., and they therefore instructed the Actuary of the Ordinary Branch to value his policies by the Institute HM 3 per cent. Table, and with pure premiums only.

The effect of the adoption of these principles will be to increase the amount required to be held in reserve, to a very considerable extent.

In the Industrial Branch, the Directors have, for some years, recorded their own mortality experience, but they hesitated to use this until the results shall have been confirmed by still further experience, and they thought it unadvisable to adopt a table of mortality which had not been made public.

The various published Tables of Mortality were compared with the Prudential experience, and finding that Dr. Farr's English Life Table (No. 3) very closely approximated to their own experience, they preferred using it for the present valuation; and they were further induced to adopt this table from the fact that the results were deduced from the mortality of the population at large,

The instructions to the Actuary of the Industrial Branch were, therefore, to value by the English Life Table (No. 3), with 3 per cent. interest.

The Directors have had under consideration the anomalous results which would be produced by classifying the ages in the Industrial Branch according to the usual methods: and it was therefore resolved to adopt a different system, keeping the policies issued in each year distinct, and making a sperate valuation for each year of issue.

They further instructed the Actuary to make separate valuations for male and female lives, and, as the first policies were issued by the Company in the year 1852, this involved the enormons labour of fifty separate valuations. He was also instructed, not merely to exclude negative values, but to provide a positive liability for every single policy in force. This has been done.

The reports of the Actuaries show that while the Assurance Funds on 31st December, 1876, amounts to …… £869,259

The Reserves required are—		
Ordinary Branch ………	£404,835	
Industrial Branch ……	356,736	
		£761,571
Showing a surplus of……………		£107,688

The Directors have submitted the reports of their Actuaries to Mr. A. H. Bailey, to whose important report they beg to draw special attention.

During the five years the premium income of the Company has increased from £348,975 15s 6d. to £1,063,821 14s. 4d., showing an increase of £714,845 18s. 10d.

The Assurance Fund, notwithstanding the charges incurred for extension expenses, has been increased from £354,438 13s. 1d. to £868,401 5s. 4d., showing an increase of £513,962 12s. 3d.

It may be interesting to the Share and Policy-holders to be informed that the Valuation of the Business of the Company has been completed in six weeks from the time of closing the books on 31st December, 1876, and when it is borne in mind that the number of contracts in the Ordinary Branch was 17,912, and in the Industrial Branch 2,643,665, the operation is one totally unexampled in the history of Life Assurance, and testifies in an unmistakable manner to the efficiency of the staff of the Company.

In conclusion, the Directors again congratulate the varions connections of the Company upon its present satisfactory condition, and assure them that the very cautious principles which have hitherto guided them will continue to animate them in the future, and they rely on the cordial co-operation of every one interested in its welfare to help to advance the Company to a still greater position of prosperity.

TO THE DIRECTORS OF THE PRUDENTIAL ASSURANCE COMPANY.

Gentlemen, the Quinquennial Valuation of the liabilities of your Company, to the 31st December, 1876, a work far surpassing in magnitude any similar operation in the history of Life Assurance in this country, has been completed. During the progress of the work, I have from time to time inspected the various operations, and have now had submitted to me the results.

The business of the Company is divided into two branches, called the "Ordinary" and the "Industrial." These are henceforth, in pursuance of powers which have been obtained for that purpose, to be worked independently of each other, separate accounts being kept for each.

The total premium income of the Policies in force on the 31st December, 1876, was £1,063,821 per annum.

Of this, £83,245 belongs to the Ordinary, £980,576 to the Industrial Branch.

Of the former premiums, about 62 per cent. are payable annually, the remainder half-yearly, quarterly, and in a few cases monthly. The whole of the premiums of the Industrial Branch are payable weekly.

The liabilities of the Ordinary Branch have been estimated, as explained in Mr. Hughes's Report, the Assurances by what is techinally termed an HM 3 per Cent. Pure Premium Valuation, the Annuities by the Government Experience, also at 3 per cent. interest. It will suffice to say that the effect of these processes is to subject the liabilities to a very stringent test, which I believe that the greater number of ordinary Life Assurance Companies could not bear.

In the Industrial Branch, the average amount assured by each Policy is £8 8s. 9d, and the average weekly premium rather less than 1¾d.; the average rate of premium is £4 7s. 11d. per cent. per annum on the sum assured. Of the total premiums, 83 per cent. are payable on Policies that have been issued during the last five years; and of the remaining 17 per cent., more than one-fourth are for assurance on lives not exceeding 15 years of age.

In acquiring and carrying on such a business as this, heavy expense must necessarily be incurred. The cost of acquiring the business is met by the condition of the Policy stipulating that less than the full sum assured shall be payable if death occur during the first year of assurance; thus reviving in another form the practice of requiring an entrance fee. The cost of conducting the business is met by charging materially higher rates of premium than in the Ordinary Branch. Again, it is found by experience that many of these Policies are allowed to lapse after short periods; thus, of the Policies that were existing at the date of the last Valuation, five years ago, about 58 per cent. only now are in force.

Attention is drawn to these peculiarities to show why the methods of valuation in common use, and which alone were contemplated by the Life Assurance Companies Act, are in my judgment not applicable to, and should not have been required for, such a business as this. Nevertheless, in obedience to the law, the enormous labour has been gone through of making a careful and detailed Valuation of the more than two millions and a half of Policies comprised in this branch. The sums assured and premiums have been valued by the English Life Table No. 3 at 3 per cent. interest, and from the value of the premiums deductions have been made to provide for future expenses and profits. The deduction has been such as to make a reserve for all Policies of five years standing on lives above 30 years of age, equivalent to the result of a pure premium valuation. For the remaining Assurances, a deduction has been made from the value of the premiums sufficient to provide an actual reserve for every single Policy in force. The rate of deduction averages more than 42 per cent., and in no case is less than 25 per cent.

Of the ample sufficiency of these reserves, no one conversant with the subiect can have the slightest doubt. As a further precaution, however, you have thought it desirable not to divide the whole of the resulting surplus without previously making a substantial addition to the Contingency Fund; and, after these precautions have been taken, the Assured's share of the surplus will provide a bonus of 28½ per cent. of the premiums paid during the quinquennium on the participating Policies, a rate of bonus which but few of your contemporaries can equal or surpass.

In conclusion, I may be allowed to congratulate you on the soundness of the Company's financial condition.

I am, Gentlemen,
Your obedient Servant,
ARTHUR H. BAILEY.

7, Royal Exchange, 21st February, 1877.

The full Reports of the Actuaries, Messrs. T. C. Dewey and W. Hughes, can be obtained on application to the Chief Office, or from any of the Agents of the Company.

ESTIMATES ON APPLICATION.

MAJOR CREASE'S PATENT SELF-REGULATING, CLEANABLE

CHARCOAL FILTER

Has been universally adopted in the Royal Navy, East Indian and English Transport Services; the German, Russian, American, and Austro-Hungarian Navies;

ALSO BY

HER MAJESTY'S WAR DEPARTMENT,

For BARRACKS, HOSPITALS, CAMPS, &c., &c.

And for which Patents have been granted by the Governments of Great Britain, the United States of America, Italy, France, and Canada to Major Crease, Sole Patentee of the Self-regulating, Cleanable Filter.

The designs are of three classes—

1.—For dwelling rooms and halls. To suit different styles of furniture three types have been employed—the Classic, the Japanese, and the Mediæval. None of these forms have been before employed for Filters.
2.—Those of simpler and cheaper designs for kitchen use.
3.—Filters of galvanized iron, either to fix to mains or cisterns, which, being capable of being made of any size, can supply pure water in sufficient quantities for the largest hospital or hotel.

The Filters, being made of special sizes, all their parts are interchangeable.

Full particulars can be obtained on application to

MESSRS. GARDNER AND SONS,

Sole Manufacturers of the Land Filters,

453 & 454, STRAND; and 3 & 4, DUNCANNON STREET, LONDON.

OVERLAND ROUTE and SUEZ CANAL. Under Contract for the conveyance of the Mails to the Mediterranean, India, China, Japan, and Australia. The Peninsular and Oriental Steam Navigation Company dispatch their Steamers from Southampton, *via* the Suez Canal, every Thursday; from Venice every Friday; and from Brindisi, with the Overland Mails, every Monday.

Offices—122, Leadenhall-street, E.C., and 25, Cockspur-street, S.W.

HALL LINE.—STEAM from LIVERPOOL to BOMBAY, via SUEZ CANAL—Average passage, 26 days, including all detentions. Sail punctually as advertised.

Passengers booked at through rate from London, via Genoa, Naples, and Alexandria (Rubathino Line), joining the "Hall" steamer at Suez. Full particulars on application.

The magnificent fast steamship TRENTHAM HALL, 2,100 tons, 300 horse-power nominal, sailing 13th March. This steamer has been specially adapted for the East India trade. Her saloons and cabins are spacious and well-ventilated, and the accommodation is unsurpassed. Only first class passengers taken. Fare from Liverpool, 45 guineas, Surgeon and stewardess carried.

Succeeding steamers:—
Branksome Hall ……… 10th April.
City of Baltimore ……… 30th April.

For passage apply in London to Henry S. King and Co., 65, Cornhill, and 45A, Pall Mall; or for freight and passage to ALEXANDER and RADCLIFFE, 8B, Liverpool and London Chambers, Exchange, Liverpool.

THAT part of the Report of the War Office Committee which deals with the Militia is scarcely less interesting than that portion which refers to Brigade Depôts and that latest invention—the "Territorial" regiment. A vast amount of evidence about the Militia was obtained from officers of that branch of the Service and others, and the Committee had the further advantage of numbering among its members several Militia commanding officers. We may, therefore, assume—as, indeed, is abundantly evident—that the investigation into the question was pertinent and searching. The Militia, always a favourite force in this country, has become one of extreme importance owing to its systematic connection with the Line, which will, it is confidently believed, render the former a still more reliable feeder to the Line than of old. An obstacle has always existed in the shape of the opposition of those Militia Lieutenant-Colonels who have been unwilling to "spoil" their regiments by parting with their best men. This narrow-mindedness, this forgetfulness of the fact that the Militia exists for the benefit of the country generally, and not for its own advantage, is rapidly disappearing. Many Militia Lieutenant-Colonels are very public-spirited, and never try to prevent their men joining the Line. A few take a different view of their duty, however, and it is desirable that nothing should be left to the option of such men. The Committee wisely recommend that transfer to the Line should be facilitated, and that during the non-training period a Militiaman should be allowed to join the Regular Army on the condition of—should he not have served one training—repaying his enrolment bounty. Were this condition not exacted, most intending recruits would, for the sake of obtaining the bounty in question, first enter the Militia. In order to make the Militia more popular it is also suggested that any man wishing to leave it, for other causes than a desire to join the Army, should, if his reasons were deemed valid, and the regiment be disembodied, be granted his discharge on payment of £1, without the necessity of providing a substitute. A further good suggestion is that commanding officers should be empowered to grant leave of absence from training to men of good character. Most Militia officers of experience assert that the re-enrolled men constitute the main strength, as regards quality of the regiment. A recruit costs about £9 3s. for the Militia Artillery, and £8 2s. for the Infantry of the Militia during his first year of service, whereas a re-enrolled Artilleryman costs £4 2s., and an Infantryman £3 11s. less. Moreover, re-enrolled men never desert or join the Regular Service. The Committee therefore advocate the encouragement of re-enrolment. As they observe, looking at the Militia solely as a feeder for the Line, re-enrolment is bad in theory, but practically it is found that no great obstacle to volunteering for the Regular Army is thus caused. Besides, seeing how much below the establishment the Militia now is, and the impossibility hitherto experienced in many districts of raising second battalions, it would be unwise in the extreme to neglect any means likely to complete the numbers of the force. It is universally admitted that the weak point of the Militia is to be found in the so-called "Volunteer Sergeants." Not only are they generally speaking ignorant of their duties, but incapable of enforcing discipline. It is not to be wondered at that they should be slack, or wanting in authority. If they do their duty they are liable to be accused of harshness, and to suffer vengeance at the end of the training, for the Sergeant who to-day sends a private to the guard-room may next week be working alongside of the latter. It is difficult to see how they are to be protected, save by the imposition of heavy penalties whenever an assault could be proved to have arisen out of matters connected with the training. As to deficiency of knowledge, of course something could be done by requiring Militia Sergeants to attend schools of instruction. Some commanding officers think that this could be managed provided pay were allowed for the days of attendance, that the schools were local, and open for this purpose during the winter months only. There is a fear, however, that the very best men would be precisely those who, on account of their civil avocations, would find it most difficult to spare time for this purpose. The Committee, nevertheless, consider that it would be worth while trying the experiment. We would suggest that evening instruction classes might be opened for such men as could not attend during the daytime. As an encouragement to make themselves efficient, the proposal of the Committee, that a small proportion of the "Volunteer Sergeants" might be promoted to the permanent Staff, appears deserving of the consideration of the authorities. The balance of evidence is rather against the enrolment in the Militia of old soldiers, who are either not qualified for or do not choose to enter the 1st Class Army Reserve. The Committee do not, however, attach much importance to the objections, and rightly so. We ourselves fail to see why such men should not be a very useful leaven, provided the officers and non-commissioned officers knew their duty and enforced their authority. In our opinion, there is no better principle than that the Line should take young men from the Militia, and give them back again, when the period of Line and Army Reserve service had been completed, provided such men were physically fit. The idea of the framers of the Brigade Depôt system was undoubtedly that Militia recruits should be drilled there immediately on enrolment, and, consequently, at all times of the year. The witnesses examined by the Committee do not seem to think such a plan advisable. They say that little time being available for the instruction of the Militia recruit, it is necessary to push him on more rapidly than the young soldier of the Line, and that, therefore, they cannot be drilled in the same squad. They add "that *esprit de corps* . . . is best inculcated by the training of the recruit under the officers and non-commissioned officers of the same battalion in which he will find himself hereafter." There is, no doubt, some weight in the latter objection; but, as to the first difficulty, it could easily be surmounted. The permanent Staff of the Militia would afford a sufficient number of Instructors to keep two squads of Militiamen going at the same time, without interference with the drilling of the Line recruits by their own non-commissioned officers. Moreover, there is, practically, very little drilling of Line recruits at the Brigade Depôts, the latter being, practically, rather reception than training establishments. It is apprehended by some that men would not enrol so freely if it were obligatory on them to commence drill at once. This difficulty might, however, be obviated by allowing an option in the matter. The Committee advocate drill immediately after enlistment when possible, and very truly observe, "No doubt if men could be drilled immediately on enrolment a good deal of desertion would be stopped." In connection with this crime, both in the Militia and the Army, we would observe that the police could, if they chose, do much to check it; whereas they seem to consider the apprehension of deserters almost outside the scope of their obligatory duties. The Committee draw attention to this shortcoming, and also recommend that magistrates, in cases of aggravated or repeated desertion from the Militia, should be empowered to award imprisonment without the option of a fine. It is painfully apparent that it has been more difficult of late years to keep the ranks of the Militia filled; indeed, there are many regiments which come out for training from 20 to 35 per cent. under their establishment. The causes of this unwillingness to enrol are various, but one certainly is the recent practice of placing the Militia in camp, instead of billets. The latter are undeniably demoralising and injurious to discipline, and the Committee recommend that the Militia should only occasionally be placed under canvas. The principle of small but efficient cadres, with substantial reserve, has been accepted in this country. There is no reason why it should not be applied to the Militia as well as to the Line. Militia officers naturally like to see strong regiments; but, as the amount of money available for the force is limited, it is better to have small but efficient than large and inefficient regiments. As the Committee observe, recruits for the Militia are easily obtained in times of great national excitement. They therefore recommend that the strength of each company, exclusive of Staff and Militia reserve, be reduced to seventy-five. We cannot conceive why a reserve for the Militia should not be instituted, to hold towards it the same relation as the 1st Class Army Reserve. Many men would be willing enough to join it after completing their first six years if they received a small annual bounty. It would only be necessary to muster them once in twelve months. The proposal that the present Militia Reserve should be reckoned as supernumerary to the establishment will prevent its being counted twice over, and thus creating a delusive idea of strength. Among other recommendations connected with the officers, it is advised that there should be a Quartermaster to each battalion of Militia, and that Quartermasters of the Line should be induced to take this post after twenty years' service in the Line; after five as Quartermaster they would be granted half pay on condition of serving ten years more with the Militia. Another recommendation is, that from Lieutenants aspiring to commissions in the Line, three instead of two trainings should be exacted as a qualification. There are many other excellent measures submitted for the consideration of the Secretary of War, but we have already exceeded our limits of space, and must, therefore, bid farewell to the subject for to-day, at all events.

"We warn the public that there is no great nation whose military medical arrangements are less prepared to meet a great war than our own." Such is the opinion expressed by the author of the very able article on "Philanthropy in War," in *Blackwood's Magazine* for February, and we shall endeavour to examine the grounds that exist to corroborate or confute this statement. In the sad medical collapse of the Crimean war we have a known quantity which will always furnish us with a standard of failure—a zero of medical administration—from which we can index upwards the degree of success at any time attained. The condition of the Medical Department at the opening of the war with Russia in March, 1854, was as follows:—There were three medical officers in each regiment of Infantry, two in Cavalry, and an Ordnance Medical Department for Artillery and Engineers, but over and above this there were only thirty medical officers on the whole Staff then serving in Great Britain. We may, therefore, take the Infantry, as forming the great bulk of the expedition, to illustrate what happened. Fifty-three Infantry regiments sailed for the Crimea, numbering in all 43,276 men, and were accordingly provided with 159 medical officers, or in the proportion of one medical officer to 272 men, and with a result to the medical arrangements which Miss Nightingale described before the Royal Commission of 1857 in these words:—"We had in the first seven months of the Crimean campaign a mortality among the troops at the rate of 60 per cent. per annum from disease alone, a rate of mortality which exceeds that of the great plague in the population of London." Experience so dearly bought led to reformation, so that when in 1867 an expedition was sent to Abyssinia, thirty-five executive medical officers accompanied a force of less than 3,000 Europeans, or one medical officer to eighty-six men; while in 1873, in the Ashantee campaign, seventy-three medical officers were provided for an expedition, the European components of which only numbered 2,600 men, and of this proportion Sir A. D. Home in his report says:—"The number was ample, but not disproportionate to the duty; a large margin for ineffectiveness from sickness had to be allowed." Again, as the result of mature deliberation, the Mobilization Scheme, published in the "Army List" for August, 1875, divides our active Army, which is intended for service in the event of invasion, into eight army corps, and lays down a fixed medical establishment of 267 medical officers for each. Of these, 250 would belong to the executive ranks, and as each army corps numbers 36,000 men, official authority stamps the recognised proportion of medical officers to strength for active service at one to 144 men, or as nearly as possible double that with which the ill-fated Crimean campaign was undertaken. We have thus a fixed quantity by which to measure our medical preparedness for war. Assuming, then, that all the medical officers on foreign stations are placed in localities in which they are indispensable, it is obvious that an army corps leaving the shores of England for active service must be furnished with medical officers from the list of those at the time on home service. The total number in Great Britain on January 1, 1877, was less than 300; therefore, when the first army corps had sailed, there would be left in England to fulfil the requirements of all remaining duties and any further expeditionary preparations a balance of fifty medical officers, most of whom will have been weeded out from the first selection on account of ill-health or other unfitness. It consequently amounts to this, that, were we involved in an European war, we could provide military medical aid for only one army corps, and that all other troops arriving at the seat of war from foreign stations or from England must be accompanied by a proportion of medical officers far below that laid down in the Mobilization Scheme—must, in fact, revert to the fatal Crimean ratio. Under these circumstances, it is perfectly inexplicable that the Secretary of State for War should have, in reply to Dr. Lush's question on February 20, spoken in terms of self-congratulation at having obtained twenty-three candidates for the Army medical examination when fifty were publicly advertised for, more especially as he was quite aware that this was a diminution of 20 per cent. upon the number that presented themselves at the previous examination in August last. Since Mr. Hardy can thus lightly regard this decreasing supply of medical candidates, it is plain that he must either be profoundly sceptical of the value of the medical element in war, or must have some secret spring from which he hopes to draw an ample supply in the hour of need. Possibly he trusts to the development of the International Aid Society to make good the deficiency, and thus, looking placidly on while the military Medical Department languishes, falls at the same time into the error pointed out by the author of "Philanthropy in War" in these words—"Now this neutral help has only been tried on a great scale in one war, and these objections would be unanswerable if we found France and Germany counting on such help in the future, endeavouring to encourage it, and reducing their military medical establishments." Nevertheless, while experience has thus taught our more military neighbours the wisest course to follow, the Medical Department of England, which numbered 946 executive medical officers on May 1, 1872, has been reduced within five years to a total (on January 1, 1877) of 805, there having been offered up a sacrifice of 141 medical officers to a pledge of economy given for permission to introduce a new scheme, which, whatever may be its theoretical merit, has practically narrowed the medical establishment to an "irreducible minimum," incapable of discharging the duties of peace, much less of meeting the demands of war, and which has rendered the Service so universally unpopular that the Secretary of State is compelled to regard it as a matter for congratulation that there be yet found twenty-three medical candidates, and will accept that number out of a total of fifty vacancies.

Comparing the French and Prussian Cavalry, a French critic points out that the 72 Prussian regiments consist each of 25 officers, 702 men, and 739 horses, with the exception of the Guard, where the regiments are composed of 35 officers, 713 men, and 777 horses. The whole German Cavalry consists of 93 regiments—63 Prussian (not counting the Guard), 10 Bavarian, 6 Saxon, 4 Wurtemburg, 3 Baden, 2 Hesse, 2 Mecklenburg, 1 Oldenburg, 1 Brunswick. France, on her side, has but 77 Cavalry regiments, but she is far richer in officers, and where Prussia has 25 she has 45. We find compared the 24th French and the 24th German Dragoons. 24th French:—1 Colonel, 1 Lieutenant-Colonel, 2 Majors, 1 Captain-Instructor, 1 Captain-Paymaster, 1 Aid-Paymaster, 1 Clothing Captain, 1 Standard-Bearer, 1 Surgeon-Major, 1 Assistant, 2 Veterinary-Surgeons, 5 Captains-Commanding, 5 Second Captains, 5 First Lieutenants, and 12 Sub-Lieutenants. 24th German:—1 Colonel, 1 Major, 1 Paymaster, 1 Surgeon-Major, 2 Assistants, 5 Captains-Commanding, 5 First-Lieutenants, and 10 Sub-Lieutenants. If the difference be multiplied through 77 regiments, it will be found that the French have 1,200 officers more than the equivalent number of German regiments. In France there are 78 Cavalry Colonels and 5 others engaged on detached duty; in Germany, 62. In France there are 85 Lieutenant-Colonels for 77 regiments; in the Prussian Army, 40 for 73 regiments. Among other contrasts, it is remarked that whereas there are only 490 Cavalry Lieutenants in Germany, France has 879. At the Cavalry School in Hanover there are 15 officers; at the Cavalry School of Saumur 53. There is only 1 Commandant in Hanover, 6 at Saumur; 8 Captains in Hanover, 25 at Saumur. Our critic also points out what appears to be a very curious blunder made by the re-organizers of the French Army. In addition to the independent Cavalry divisions, there is a brigade of Cavalry attached to each of the 18 army corps. These brigades are each commanded in time of peace by a General, who has at his disposal an Aide-de-Camp to carry his orders. But in time of war these brigades pass under the command of the General of Division, and the Generals of Brigade and their Aides-de-Camp are left alone. According to the *Journal des Sciences Militaires*, Cavalry regiments were formerly the property of some great lord, possibly in long clothes, or a lady, and therefore it was absolutely necessary to have a gallant officer of fortune to do field and garrison duty. Hence the Lieutenant-Colonel and other "second" officers; and this has been going on for the last 200 years, to the great detriment of successive budgets. It appears astonishing to us that such abuses—if abuses these be—should have escaped such men as Carnot and Napoleon, and the cheese-paring economists of the reign of Louis Philippe. The critics argue that it would be much better to have fewer officers, to pay them better, and to secure more rapid promotion than at present exists. In the Infantry regiments the number of officers in both France and Germany varies a great deal, but on an average the difference is 16—French regiments 73 officers, and German 57. This makes a total difference of 3,700 officers. In the Engineers there is also a marked difference in the number of officers. It is not, therefore, to be wondered at that the French War Estimates should exceed those of its powerful rival by about £6,000,000. The German War Estimates for last year were, in round numbers, 391,000,000 francs; those of France to-day 541,000,000 francs — say £16,000,000 and £22,000,000.

On Monday night, in moving the Navy Estimates, Mr. Hunt showed that the important part which torpedoes may be expected to play in future naval warfare had not been overlooked by the Admiralty. The establishment of a special torpedo school on board the Vernon has already done good service, and in the courses of instruction for Captains and superior officers something has been done towards supplying a real want in causing officers in command to understand and appreciate the new weapons of offence and defence. We may here remark that Mr. Hunt was not accurately reported with reference to the two courses of instruction on board the Vernon, as the report in the *Times* makes no mention of Captains and Gunnery-Lieutenants, for whom Mr. Hunt stated that the long course was intended. Those who have experienced the difficulties encountered by Captains and Commanders in obtaining gunnery instruction on board the Excellent will feel specially grateful to the present First Lord for having provided them with information with regard to torpedoes on board the Vernon, though it is difficult to see why officers should not be placed on full pay while so studying. Mr. Hunt, on Monday night, explained the vote of £80,000 for the purchase of torpedoes as having been proposed on account of his "having become a little alarmed lest we should be behind other nations in this matter," and we imagine that there will be little or no opposition to the sum being voted if only it is understood that it has been judiciously expended. It is curious that the morning papers of Tuesday, giving Mr. Hunt's statement, should have also contained a somewhat sensational account of some French experiments off Cherbourg with a special "submarine" torpedo-vessel called the Thorneycroft. The Thorneycroft appears to carry an outrigger torpedo, and though not really a "submarine boat," to be scarcely discernible in the water. She is stated to steam nineteen knots, and to have successfully blown up an old hulk, which is stated to have been "literally swallowed up by the sea," while the Thorneycroft received no injury whatever. The speed at which this experiment was carried out was decidedly high, but there is nothing improbable in the other circumstances related, and there is little doubt as to the Thorneycroft being a most formidable torpedo-boat. It would be interesting to know the exact facts about this vessel, as, if not very large, such a boat might be carried by our ironclads, and would make a most formidable tender on active service. We have now no naval *attaché* on the Continent of Europe, but it is probable that information is in possession of the Admiralty with reference to this experiment, and it shows us that other nations are not idle, and that we must not shrink from such improvements and experiments in offensive torpedo warfare as may from time to time be found necessary.

The Admiralty, on receiving intelligence of a complete break-down in the engines of the Sirius, has decided to order her home to Devonport, where she was fitted out in October, 1875. Her engines are by Maudsley.

Captain J. A. Fisher, R.N., who was lately given the temporary command of the Pallas during the absence of Captain Beamish on sick leave, having been appointed Flag-Captain to Vice-Admiral Sir Cooper Key, vice Captain Thomson, who has been selected for the command of the Royal Yacht, has been recalled from the Mediterranean.

Deputy Inspector-General Alexander Eugene Mackay, M.D., R.N., died on Saturday last, after a short illness. Dr. Mackay had seen considerable service, but owing to the non-completion of a necessary term of foreign service had not been advanced to the list of Inspectors-General. He served as Assistant-Surgeon in the Vernon, flagship in the East Indies of Rear-Admiral Samuel H. Inglefield, C.B., from April, 1845, until July, 1849, when he was transferred to the Medical Establishment at Hong Kong, and in October, 1853, was appointed Surgeon of the Fantome, sloop, on the Australian station. In April, 1857, he was appointed to the Cumberland, fitting for the South-East Coast of America, and in August, 1858, was transferred to the Royal Albert, flagship of Sir Charles H. Fremantle, K.C.B., with the Channel Squadron, from which ship he removed in March, 1861, to the Marlborough in the Mediterranean. He was appointed to her Majesty's ship Fisgard for special service at the Medical Department of the Admiralty in December, 1872, and in this department discharged most important duties, his chief work being the preparation of the statistical reports of the health of the Navy. It involved a critical examination of the journals and returns of medical officers, and the fairness and discrimination which marked Dr. Mackay's observations won for him universal respect among his brother officers. Dr. Mackay had only been absent from his office for a few weeks, and died at the comparatively early age of fifty-five from typhoid fever.

Some anxiety having been felt in reference to the safety of the Lynx, Commander Ommanney, owing to reports of her continued absence from Zanzibar, it is satisfactory to learn that a letter has been received from her, dated at Madagascar, January 20, "all well."

Mr. G. W. Bentinck, in his speech in the House of Commons on Monday evening, did not deal altogether fairly with the Martin anchor. Speaking of the supply of anchors to the Navy, the hon. gentleman said :—"Latterly he believed that a good many of her Majesty's ships had been supplied with Martin's anchor on the singular ground that it was stowed much more easily, and that it did not interfere with the line of fire of a turret-gun "—adding that "the use of an anchor was not when it was stowed, but when it was let go." Considering that in the Navy the Martin anchor has proved that it possesses, amongst other high qualities, those of strength and holding power, these remarks are scarcely just to the inventor. It is true that the advantages named by Mr. Bentinck of "easy stowage," and of "not interfering with the line of fire," even if it had no others over the Admiralty pattern or any other anchor extant, are not to be overlooked, considering the form of bow now given to our ironclad and other ships. But when, with these, it has proved its superiority in strength, holding power, and reduced weight, &c., over every other anchor, an attempt to detract from its merits and efficiency savours much of ignorance. We are enabled to state that on the day these disparaging remarks were made in the House of Commons, Mr. Martin received a communication from the Admiral commanding the Turkish squadron in the Bosphorus, where, in the recent gales, its superior holding power was manifested in a marked degree, in which that officer states :—"All the experiments and trials of the Martin anchor have proved its holding powers to be most excellent," that he had the greatest confidence in it, and would do his utmost to persuade the Turkish Ministry of Marine to adopt it, and authorises Mr. Martin to express this high opinion of his anchor to the Turkish Ambassador in London.

Lieutenant F. L. Lawrence, who has been doing duty as Flag-Lieutenant to Rear-Admiral Luard, has, on the recall of his late chief, been appointed to her Majesty's ship Swiftsure, vice Lowry, invalided.

Another little squabble with the Congo people has just resulted in the burning of a few huts, which are commonly dignified by the name of villages, and the destruction of such property as the naked natives may possess. This unpleasant duty, which was, we suppose, performed for the protection of British interests, although an American ship having been seized and pillaged is stated as the immediate cause, devolved upon the Avon, which has lately joined the station, and the operations appear to have been carried out with judgment by Commander Keppel.

Eighty thousand pounds certainly appeared a large sum to devote to the purchase of torpedoes for one year, and we find that a portion of that amount will be required to pay for a number of these weapons already ordered, it being the opinion of the Admiralty that sufficient provision under this head was not made in 1876-7.

The passive manner in which the blockade of the Dahomey Coast has been conducted, although it has been anything but perfect, seems to be having some effect upon the King, who has so far come forward as to offer a portion of the tribute demanded. Commodore Hewett, is, however, a man of no half measures, and consequently Gelélé has been informed that he must pay the whole or none. Let us hope that he will quickly determine to send the required number of puncheons of oil to the senior officer, and relieve the ships of the wearisome duty of maintaining the blockade on this coast.

Commander Cameron has been closely tracked by the energetic Commissioner of the *New York Herald* and *Daily Telegraph*, who has gone round Lake Tanganyika making notes on Cameron's observations, which were sent out to Stanley as soon as they were made public in England. The result is a difference of opinion, and Cameron is declared to be both right and wrong in his announcements. We presume this is an allusion to the Lukuga outlet theory; and we shall receive Mr. Stanley's opinion with critical interest.

Captain Frank Tourle Thompson, who has been appointed to the command of her Majesty's yacht Victoria and Albert, entered the Navy in 1844, and served as mate of the Indefatigable, commanded by the late Sir Robert Smart in the Mediterranean from March, 1851, until the close of 1852, when he joined the Sidon, and after being attached to the Channel Squadron and with the Mediterranean Fleet, was promoted to the rank of Lieutenant May 23, 1854, and at once appointed to the Britannia for service in the Black Sea. From August, 1854, until the close of the Russian war he served in the Fury, being present at the siege operations against Sebastopol, for which he has the Crimean and Turkish war medals; and at the conclusion of peace in May, 1856, he commanded the Bullfinch, tender to the Illustrious, training-ship at Portsmouth, until June, 1858, when he joined the Scourge, Commander Prince Victor of Hohenlohe-Langenberg, and remained with her until October, 1860. From May, 1861, until transferred in the following December to the Defence, he served in the Hero, attached to the Channel Squadron, and was promoted to Commander January 29, 1863. He was appointed to the Hector, Captain G. W. Preedy, C.B., attached to the Channel Squadron, in January, 1864, and in December, 1865, was transferred from that vessel to the Royal yacht, then commanded by the Prince of Leiningen, in which he remained until posted in December, 1868. He has since held the appointment of Captain of the Royal Naval College, and has commanded the Modeste and Bellerophon.

It has for a long time been felt that the Auxiliary Naval Forces have been less fortunate than their comrades in arms ashore in obtaining the support and active sympathies of those of power and influence. No longer, however, will there be cause for complaint on this head, for H.R.H. the Prince of Wales, who takes much interest in the Navy, has now expressed his willingness to be enrolled in the Royal Naval Reserve. The highest relative rank to be borne in the Reserve is that of a Naval Lieutenant, but it is probable that a slight alteration will be made in the Act so as to provide a more suitable position for his Royal Highness.

Official confirmation has been given to the statement that the sons of H.R.H. the Prince of Wales will shortly join the Britannia, training-ship for naval cadets.

Rear-Admiral Luard has not waited to come to England in the Triumph, as was anticipated, but has chosen the more expeditious passage by mail steamer.

Captain Purvis, of the Danae, will assume the duties of senior officer on the West Coast Division of the Cape station on arrival at Sierra Leone, and will relieve the Sirius.

Commander Thomas Hooper, who recently died while in command of the Coast Guard Division at Carrickfergus, entered the Service in 1846, became Lieutenant in 1855, and Commander in 1868. Of the more than thirty years he was in the Navy he had not been much upon half pay, but it was never his fortune to obtain an independent command at sea, and many officers were promoted over him. His age was forty-three years, and he stood twenty-eighth on his list.

Commander Jermain and the officers and crew of the Argus have, we hear, received the thanks of the Legislative Assembly at Tobago for the assistance rendered during the disturbances in that island.

His Majesty the King of Spain is due on Tuesday at Cadiz, where the Channel Squadron is now awaiting his arrival.

The Arctic Scurvy Committee having concluded its sittings at Delahay-street, all communications for the Committee should now be addressed to the Secretary of the Committee, Admiralty, Whitehall.

The missing Thetis was made the subject of an inquiry in the House on Thursday night, when Mr. Hunt stated that the Admiralty had no further information than what had appeared in the papers. The Sultan was again going to search for her.

Rear-Admiral Phillimore, Superintendent of Reserves, is now engaged on a tour of inspection of the Clyde District of the Coast Guard.

The Commander of the Pandora has not been left out in the cold in the distribution of Arctic distinctions and rewards, Mr. Allen Young having received the honour of knighthood. Twenty years ago he served for two winters with Sir Leopold M'Clintock in his voyage in the Fox, when the fate of Franklin and his companions was solved. He had previously commanded a ship in the Merchant Service, and did good work and gained credit at Balaclava during the Russian war, as acknowledged by the late Lord Lyons. In 1875 he made, in the Pandora, an attempt to accomplish the North-West Passage, and to throw some further light on the proceedings of the lost expedition under Franklin by a search for their records on King William's Land, and the following year he refitted the Pandora for a second attempt, but accepted the invitation to carry out the duty of communicating with the late Arctic Expedition.

We hear that the authorities, stirred up by the lecture of Mr. Donald Currie, are about to assemble a Commission to inquire into the selection, dockage, and fortification of Imperial points of strategic defence. It is only fair to an officer who has worked hard in the cause of a general scheme of Imperial defence, in which our colonies and mother country should equally participate, to point out that Captain Colomb, of the Royal Marine Artillery, advocated the defence of these points more than ten years ago, and has persistently advanced his views during that time both in our columns, in pamphlets, and in lectures at the Royal United Service Institution.

Enforced retirement is a thing we are not disposed to advocate any extension of, as a rule, but there are circumstances which justify even so arbitrary an arrangement. It has yet to be decided whether our present Commissariat Department shall be swept away or not. Should it be determined to allow the existing members to die out and to introduce a new system by degrees, a course which cannot fail to recommend itself, the question will require to be considered how promotion is to be ensured, for it is certain that matters cannot continue as they are. "Dum Spiro, Spero," whose letter we publish this week, thinks that there ought to be some limit put upon the period for which Commissary, Deputy - Commissary, and Assistant Commissary - Generals are appointed; and his proposal will meet the views of the general body of officers. There would, of course, be some who might be expected to protest most vigorously against any such interference, but it has to be borne in mind that many of those in the higher grades have got as much as ever they can get, and it would only be fair were they required to vacate in favour of juniors, whose prospects are about as gloomy as any it would be possible to conceive. The "Army List" offers the most convincing proof that the grievances of the junior Commissariat officers are not imaginary ones. The thought of having to pass from thirty to forty years as an Assistant-Commissary is not one calculated to promote zeal, and if the War Office is not driven by the present stagnation to adopt sweeping measures, there will be nothing for it, we fear, but for some limit to be introduced in the case of those in the senior ranks. The difficulty exists, and it is no use closing our eyes to it. The Commissariat question is one which the War Office would willingly shirk if it could, but the efficiency of the Army is so closely connected with it that it must not be allowed to delay its decision.

We have all along laboured under the impression that Surgeon-General J. Mouat, C.B., won the Victoria Cross whilst serving as Surgeon of the Inniskilling Dragoons in the Crimea. Yet, on turning to column 640 of the "Army List," we find the two letters which are usually prefixed in the case of officers so decorated conspicuous by their absence. What has Dr. Mouat done that he should thus be made to appear in a false position when he has occasion to place the cherished letters after his name? The "Army List" is an official publication, and cannot be wrong!

There is another point upon which information should be furnished. Why has Captain T. E. S. Hickman, promoted some months since by selection to a troop in the 14th Hussars, been allowed an antedate to his commission? Captain Hickman obtained his Lieutenancy November 7, 1868, and it would seem as though, for some reason not obvious, he is allowed to hold rank as a Captain from the same date. Perhaps the Editor of the "Army List" can explain, for Cavalry officers are naturally anxious for information on the subject.

Major-General R. Y. Shipley, C.B., holds the rank and draws the pay of a Major-General on the Staff at Aldershot. Then why is he represented in the "Army List" as being only a Brigadier-General? It is in small matters such as this that the information furnished by the "Army List" is so unreliable. Were the publication issued as a private speculation so much would not be looked for; but there is no excuse for the inaccuracies of which complaint is so constantly being made, seeing that the work is official, and emanates from the War Office itself, one of the clerks on the Staff of which being actually responsible for its correctness.

A correspondent, whose letter on the subject of promotion in the Royal Engineers will be found elsewhere, offers a reasonable suggestion—*i.e.*, that all officers employed as Governors of Colonies, Equerries, &c., should be seconded. The system which allows of officers absent from military duty being retained on the establishment of their regiments is an indefensible one. It is bad enough that the names of those holding Staff appointments should continue on the establishment.

Referring to Mr. Hardy's reply to Sir H. Havelock's question about Control Paymasters, it is as well to remind those persons who advocate the formation of a department of "Army Accountants," separate from the Commissariat, that such a division of responsibility is most inconvenient, and almost impossible in the field. During war, officers of the Commissariat must be cash accountants, and, therefore, it is manifestly desirable that they should acquire during peace a familiarity with the details of cash accounts and with the mode of handling public money; and further, as a much larger number of Commissariat officers is required during war, and many can be usefully engaged upon Commissariat duties at other times, it is very important to extend as much as possible their sphere of employment during peace. A Commissariat without the full command of money and transport is like a body without arms and legs, and would only be an useless encumbrance to an army.

Surgeon-Major J. H. Porter, Assistant-Professor of Military Surgery at Netley Hospital, has discovered that the small oil bottle, carried by every soldier in his valise, can be turned into a most useful lamp for field service, or on any occasion when proper lamps or candles cannot be procured. By simply inserting a piece of the lint bandage (which all soldiers also carry), and setting fire to it, he has found that this will give sufficient light for almost any operation. During last session at Netley, Dr. Porter tried several experiments. On one occasion all the windows in a certain room in the hospital were darkened, when, by the light of this small lamp, the doctor first of all operated himself, and then made several of the medical candidates do the same, one and all expressing themselves most favourably regarding the sufficiency of the light for any ordinary operation.

It is to be hoped that the interview between Sir Lewis Pelly and Nur Mahomed Shah, the envoy of the Amir of Cabul, will at length place our frontier relations on a sound footing. The convention with the Khan of Khelat has shown that Lord Lytton has resolved to abandon the traditional policy of masterly inactivity, but unless the arrangement with Khelat be supplemented by a good understanding with Shere Ali our position will become worse instead of better. The Amir claims to be the Suzerain of Khelat, and our occupation of Quettah with 400 men has not unnaturally excited the jealousy of that most suspicious race, the Affghans. Should we fail in arriving at a good understanding with the Amir, it is much to be feared that he will throw himself into the arms of Russia and use his influence to stir up the Momunds and the Swatees to join the Affridis in undertaking operations on a large scale against us. Already the Momunds, with whom Shere Ali is connected by marriage, are reported to be displaying a hostile spirit towards us. It is also said that the Swatees are in an unsettled state. We do not, therefore, see how we can much longer delay a campaign against the Affridis, whom our ten months' blockade has so little impressed that only the other day they made a raid on the Nowshera Bazar. The authorities seem to entertain the same view, and everything is ready for inflicting a lesson on these insolent freebooters.

It appears that the Germans are drawing horses, and especially brood mares, for their Cavalry from South America. The best market is not Monte Video; but in La Plata, some distance up the Parana, where wild horses abound, they are excessively cheap, hardy, and easily embarked.

The announcement made by the *Morning Post* on Thursday, that General Sir William Knollys is to be the late Sir Augustus Clifford's successor as "Black Rod," will have given unfeigned satisfaction wherever the General is known. Few men in the Service are more proverbially popular than Sir William Knollys, and the appointment will be a fitting retirement, well and honourably earned. Sir William will, of course, quit the household of his Royal Highness the Prince of Wales.

The Infantry Brigade-Majorship at the Curragh is vacant.

The Brigade-Majorship of Cavalry at Aldershot is not unlikely to be filled by the transfer of Captain Percy Barrow, 19th Hussars, from Ireland.

There is a proposal to grant Lieutenant-General Sir Henry de Bathe, Bart., a twelvemonth's extension of his command at Manchester, an arrangement which would meet with universal approval in the district of which this officer has charge.

Lieutenant C. W. Murray, 61st Regiment, is permitted to retain his appointment as Acting Deputy-Assistant Quartermaster-General in Ireland for a further period.

A correspondent, who signs himself "Anglophilus," writing to the *Edinburgh Courant* on the subject of the suggested—it is wrong to say proposed, for we cannot bring ourselves to believe that a suggestion calculated to stamp out once and for all every particle of *esprit de corps* ever could find sufficient favour to take the form of a proposal—alteration of the names of Infantry regiments, says :—"In the proposed scheme for renaming regiments in the Army, so as more effectively to carry out my Lord Cardwell's localization scheme, I perceive that it is intended to name the 26th and 74th Regiments (now linked together with their depôt centre at Hamilton, Scotland) 'The Cameronian Highlanders.' I would ask—Are those who propose such nomenclature for these gallant corps competent to propose anything, seeing the total ignorance they exhibit of *all Scottish history and tradition!* Being a civilian, I rejoice that I am not so personally interested in the question as those of my acquaintance whose lot is in the Line appear to be, but who by their position are prevented from expressing any opinion on the matter." The military lexicographers employed in the questionable operation of "renaming" very renowned old regiments, and at a blow dashing to pieces the treasured traditions of all good soldiers, might, at least, remember that the word Cameronian had no more association with the Clan Cameron than had or has the word covenanter. Cameronians were so-called from their "shepherd," one Richard Cameron, an extreme fanatic of his time, whose followers were perpetually engaged in hostility against the Camerons—that is to say, probably against all clans but that of Campbell, so that a "Cameronian Highlander" would be a term that "no fellow could understand." In fact, the 26th Foot was formed out of these bands, and employed in fighting the Highlanders.

The Army.

Royal Horse Guards. "Gwalior" writes :—"In former days a Cavalry officer was supposed to delight in throwing sticks into the water and watching their passage through the bridge and then down stream. Since then things have changed, and, as an instance in favour of the Cavalry, here is Capt. Burnaby, of the Blues, who shows by his writings, his actions, and his education his fitness for appointment to the Quartermaster-General's Department. I have never even seen Capt. Burnaby; but a man who can turn his thoughts from London gaiety to record his travels, undergo the marvellous feats incidental to such bodily exposure, and is able to make his reports to the world in the unostentatious way in which he has accomplished his self-imposed work, deserves a trial, at all events, and is more likely to succeed than men who have received no military education whatever and have risen to the highest posts on the Staff of the Army. Capt. Burnaby was recalled from the Carlist camp at the request of the Spanish Minister as made to our Secretary for War, and subsequently at the command of Russia while in pursuit of the truth of the character of that nation. Being in receipt of her Majesty's pay made it impossible for him to remain in either place, because he told the truth, and they did not like it. Let H.R.H. the Duke of Cambridge reward him for his honesty, high character, and great ability."

4th Hussars. Lieut. Grant has been appointed temporarily to the Staff of Gen. Sir F. P. Haines, K.C.B., in India, as aide-de-camp.

9th Lancers. Lieut. Fife has been granted leave from India to England for fifteen months, and Lieut. and Adjt. Hon. E. Vesey for twelve months, on private affairs.

12th Lancers. The *Times of India* regrets to hear from Secunderabad that there have been a few cases of cholera in the 12th Lancers, a regiment recently disembarked from England. The last case occurred on the night of the 8th or the morning of the 9th inst., and there have been in all four deaths, two of men and two of children. The disease never assumed any threatening proportions, but still the most energetic preparations were made as if to encounter an appalling epidemic. Medical officers and apothecaries were ordered up from other corps, whose presence could not fail to exercise a disturbing effect on a regiment young to the country. Zeal is apt among timid administrators to outrun discretion, and that officer is unquestionably the best manager who knows how to hit the happy medium.

ROYAL ARTILLERY.

Referring to the recent court-martial in India, the *Bombay Gazette* says :—"The case of Major Fletcher, R.A., was one in which there were considerable complications, and one which required delicate and careful handling; but, whatever may be the shortcomings of that unfortunate officer, there must be something wrong in the manner of supervising accounts when money said to be misapplied 'between the month of Dec., 1874, and the month of May, 1876,' is the subject of a charge in Oct., 1876. Were irregularities of this sort nipped in the bud, and a man at once brought to book when his accounts were the least out, these sad cases would not be so frequent. We are not apologists of Major Fletcher, but, in judging of a case, no point should be lost sight of. His trial began on Oct. 9, ended on Oct. 25, and was confirmed on Nov. 27. Now, we would ask why it is necessary that anyone should be kept in suspense for more than a month until he may know what sentence has been passed on him? The court lasted sixteen days, but it took exactly thirty-four days to confirm the proceedings. Surely this delay is unnecessary. We wish to do no one an injustice, and we feel sure much of the delay which thus takes place on most courts-martial is due to a desire on the part of the authorities to do exact justice in each case, and to take care that no one is wronged by excessive haste. But there is moderation to be observed in all things, and as wise and witty old Falstaff once observed, 'It was ever a trick of the English nation, if they have a good thing, to make it too common.' In the matter of courts-martial the good thing that caution undoubtedly is is apt to degenerate into the faults of over-refining and undue regard to technicalities and forms of procedure."

The *Times of India* says :—"We hear that Col. R. C. Romer, R.A., who has commanded the 9th Brig. for seven and a half years, and R.A., P.D. A, since Nov., 1873, will shortly proceed to England, handing over the command to his successor, Col. H. L. Chermside, C.B. The departure of Col. Romer from this command will be much regretted by the officers, non-commissioned officers, and men who have served under him for so long, as they will miss in him a good commander, strict, as regards discipline, but at the same time kind and indulgent. He ever had the interest of the men at heart, as is evident by the improvements for their benefit in the several regimental institutions at Kirkee. We feel sure that Col. Romer will carry with him the good wishes of all who have served under him, and that his memory will be long cherished by them."

Major-Gen. F. M. M. Ommanney, col. on the Retired Full-Pay List, died at Great Yarmouth on the 6th inst. Gen. Ommanney served in India in the suppression of the Mutiny. He was present at the affair at Futtyabad on March 6, 1858; commanded the Artillery of the 1st Brigade Central India Field Force, under Sir Hugh Rose, at the capture of Chandairee Fort, the siege and capture of Jhansi, and the action on the Betwa, and also commanded the Artillery of the force at the attack on Koonch and the capture of Calpee (mentioned in despatches, brevet of major and medal). His commissions bore date as follows, viz. :—Second lieut., Dec. 20, 1833; first lieut., Sept 3, 1845; capt., Jan. 2, 1852; major, July 20, 1858; lieut.-col., Nov. 1, 1865; col., Nov. 1, 1870; and major-gen., on retiring upon full pay, Sept. 8, 1875.

Lieut. C. M. Smith has been assigned local rank as captain in India, with effect from Dec. 23, 1876.

Lieut. W. S. G. Denny, 4th Brig., has been granted leave from India to England, on medical certificate.

Capt. G. M. Lyon-Montgomery, on the Half-Pay List, died at San Remo, Italy, on the 27th ult. The deceased entered the Army July 31, 1855; became capt., Jan. 19, 1864; and retired upon half pay, Oct. 12, 1867.

Col. Tudor Lane, on the Retired List (late Madras), died suddenly on the 11th inst., aged seventy years.

Mr. Ritchie asked the Secretary for War on Thursday whether it was contemplated to take any steps to remedy the present stagnation of promotion among the officers of the Coast Brigade, Royal Artillery. Mr. Hardy said he was at that moment proposing steps which he trusted would have the effect that the hon. member desired.

ROYAL ENGINEERS.

Cel. H. Drummond (late Bengal), Deputy Secretary to the Government of India in the Railway Branch of the Public Works Department, has, we regret to say, had a paralytic stroke. Col. Drummond was seized with tremulousness of the hands while sitting at dinner on the 16th ultimo, and in a few minutes one of his legs was found to be paralysed. During the next twenty-four hours his state caused the gravest anxiety, but on the 17th he rallied, became conscious, and eventually was able to maintain himself for a short time in a sitting attitude in bed.

Major-Gen. F. H. Baddeley, col. on the Retired Full-Pay List, writes requesting us to contradict the statement that he served at Waterloo.

Lieut. J. T. Wiggins has been assigned local rank as capt. in India, with effect from Dec. 9, 1876.

Scots Fusilier Guards. Lieut.-Col. J. E. Ford, late of the regiment, died at Hastings on the 11th inst., aged forty-one years.

2nd Queen's. Lieut. Fulton, 1st Batn., is a candidate for the Indian S.C., and has been appointed to the 33rd Bengal N.I., on probation. Lieut. Adams, 1st Batn., is *en route* from India in H.M.S. Crocodile, hourly expected at Portsmouth.

7th Fusiliers. Major Daubeny, 2nd Batn., has been granted an extension of leave to remain in England from India from April 30 to Aug. 31. Capt. Beauchamp, 2nd Batn., has been granted leave from India to England on medical certificate, and is expected home in H.M.S. Crocodile.

8th King's. The leave from India to England granted to Capt. Wheeley has been cancelled at the officer's own request. Lient. Harrison, 1st Batn., is *en route* from India in H.M.S. Crocodile.

9th Regiment. Brevet Major Roberts and Lieut. Shepherd, 2nd Batn., are expected home from India in H.M.S. Crocodile.

11th Regiment. Capt. V. Williams, 2nd Batn., died at Exeter on the 9th inst., aged thirty-eight. He entered the Service June 4, 1858; became lieut., Nov. 6, 1860; and capt., June 8, 1872.

15th Regiment. Lieut. Dun, 2nd Batn., is a candidate for the Indian S.C., and has been appointed officiating wing officer on probation of the 22nd Bengal N.I. Paymr. (Major) Hopson, 2nd Batn., has been granted leave from India to England on medical certificate, and is expected home in H.M.S. Crocodile.

17th Regiment. Lieut. Pollock, 1st Batn., is a candidate for the Indian S.C., and has been appointed to the 1st Sikh Infantry on probation. Lieut. Allfrey, 1st Batn., is *en route* from India to England in H.M.S. Crocodile, hourly expected at Portsmouth.

18th Royal Irish. Major MacGregor, 1st Batn., has been granted an extension of leave to remain in England from India from July 18 to Oct. 17, on private affairs. Lieut. Lawrence, 1st Batn., has applied for leave to England, on medical certificate. Lieut. Forster, 1st Batn., is expected home from India in H.M.S. Crocodile, hourly looked for at Portsmouth.

22nd Regiment. The 1st Batn. is under orders of readiness to move from Fleetwood to Ireland, where it will take over quarters in the Cork District.

25th Regiment. Lieut. Radford, 1st Batn., is a candidate for the Indian S.C., and has been appointed to the 3rd Sikh Infantry on probation.

37th Regiment. The regiment moved on Thursday from Gosport to Winchester, and relieved the 3rd Batn. 60th Rifles.

39th Regiment. Lieut. Berkeley has been assigned local rank as capt. in India, with effect from Nov. 17, 1875.

40th Regiment. The services of Lieut. Browne have been placed at the disposal of the Lieut.-Governor of Bengal for employment on his personal Staff.

43rd Light Infantry. Capt. Money is expected home from India in H.M.S. Crocodile.

48th Regiment. Lieut. Bennett is expected home from India in H.M.S. Crocodile.

ROYAL MARINES.

Qrmr. J. Woon, Royal Marines, died at Walmer on the 8th inst. The deceased greatly distinguished himself in the Arctic Expedition of 1849-54, and in the attack on the Peiho forts in 1859, and his death is deeply regretted by all who knew him.

Lieut. L. Edye is under orders for embarkation in H.M.S. Endymion, to relieve Capt. R. D. Tully, on promotion.

Capt. E. H. Moore, R.M.A., has been appointed adjutant in the 1st Administrative Brigade of the Shropshire Artillery Volunteers, from Feb. 10, 1877.

The following promotions, dated March 10, 1877, consequent on the retirement, under the provisions of her Majesty's Order in Council, dated Feb. 22, 1870, of Lieut.-Col. and Brevet Col. A. Butcher, have taken place in the R.M.L.I., viz. :—Capt. and Brevet Major G. Gregory, to be lieut.-col. at the Portsmouth Division; Lieut. R. D. Tully, to be capt. at the Portsmouth Division.

51st Light Infantry. Capt. Carter and Lieut. Burnett are expected home from India in H.M.S. Crocodile. Lieut. Maturin is expected home from India in H.M.S. Crocodile.

54th Regiment. Lieut. Timbrell has been assigned local rank as capt. in India, with effect from Dec. 30, 1876.

55th Regiment. The following officers are *en route* to England in H.M.S. Crocodile from Aden, viz. :—Lieut.-Col. Hume, Majors Morgan and Rowland, Capts. Gillies, Riley, Kay, Ogden, and Cargill; Lieuts. Braddon, Pitt (adjt.), Drew, Inglis, Brind, Eyton, Moncey-Kyrle, and Burke; Qrmr. Vickers, Paymr. Burke, and Surgs.-Major Berkeley and Barker.

59th Regiment. Lieut. Kennedy is about to retire from the Service.

60th Rifles. The head-quarters and remainder of the 3rd Batn. moved from Winchester to Aldershot on Wednesday, and took over the quarters in the North Camp lately vacated by the 2nd Batn. 11th. Capt. Charley, 2nd Batn., has been granted leave from India to England, on medical certificate.

62nd Regiment. Capt. Kelly proceeds home from India for depôt duty.

66th Regiment. Lieut. Pigott was to have taken passage from Bombay to England in H.M.S. Crocodile.

68th Light Infantry. Capt. Kay has been assigned local rank as major in India, with effect from June 5, 1875.

70th Regiment. We regret to learn of the death of Paymr. (Major) G. E. Huddlestone, at Mooltan, under painful circumstances, on the 13th ultimo. The deceased served with the 8th Regt. at the siege and capture of Delhi in 1857; also at the action of Bolundshur, affair of Allyghur, battle of Agra, affair of Dec. 2, and action of Dec. 6 at Cawnpore, and action of Khundagunj; commanded the light company at the capture of the town and fort of Sanda, Oct. 24 and 25, 1858, and was present at the subsequent operations in Oudh (medal with clasp). He obtained his commission as ensign Dec. 30, 1848; became lieut., June 27, 1844; was appointed paymr., March 23, 1855; became hon. major, March 23, 1865; and was appointed to the 70th Regt., Aug. 25, 1871. Lieut. Jones has leave to Calcutta to Aug. 31, to study the native languages.

72nd Highlanders. Capt. Tingcombe is expected home from India in H.M.S. Crocodile.

73rd Regiment. The name of Lieut. Swiny has been removed from the list of officers detailed for depôt duty, his services being required at head-quarters.

76th Regiment. A correspondent writes:—"An 'Army List' of April, 1808, shows the 76th Regt. with the word 'Hindostan' as its mark of service distinction. County titles there were none, except the 91st Argyle and 93rd Sutherland Highlanders, and few corps had the names of actions recorded. Turning to an 'Army List' for 1816, where service distinctions appear, the 76th have the 'Elephant' circumscribed, 'Hindostan' with 'Peninsula' added; and in the 'Naval and Military Calendar' for 1821 they are given the 'Elephant,' 'Hindostan,' 'Peninsula.' Thus the 76th is shown to be the original regiment bearing the distinction 'Hindostan,' and the only regiment that bore it up to the year 1821, although the 17th, 52nd, and 71st have it in an 'Army List' of 1831, and the 72nd appear to have received it afterwards. We read in the 'Annual Register' for 1804, relative to the operations carried on by Gen. Lake, that 'having got possession of Goa, he at once proceeded to the reduction of the fort of Allyghur,' one of the strongest in India. 'As soon as Col. Monson saw he was perceived, he endeavoured, by pushing on with the flank companies of the 76th, to enter the fort along with the Guard. He succeeded in passing the breastwork, but found the first gate shut. A 12-pounder was brought up, but some time elapsed before it could be placed opposite the gate, and four or five discharges took place before any effect was produced. During this time the storming party were exposed to a most severe and raking fire of grape, wall pieces, and matchlocks. Col. Monson was wounded by a pike fired from a gun. At this spot fell four officers, the adjutant of the 76th, and Lieut. Turton, of the 4th Native Infantry. As soon as the first gate was blown open the troops advanced along a narrow road and through two gateways, which were easily forced, to a fourth gateway leading into the body of the place, during which time they were much exposed to a heavy cross fire in every direction. Upon this occasion the personal gallantry of Major M'Leod was conspicuous. In defiance of all opposition he burst open the gate, and the party entered the fort with resistless impetuosity. The commander, M. Pedron, was taken prisoner. Their loss amounted in killed alone to two thousand. The fall of Allyghur was of considerable importance. It was the residence of M. Perron, and the grand depôt of his warlike stores. The main army, under Gen. Lake, reached Secundra on Sept. 9, on the 10th it made a short march, and on the 11th reached its ground of encampment on the Jena Nullah, about six miles from the city of Delhi. On the march intelligence was received that Scindia's forces, under M. Louis Bourquine, to the number of 13,000 Regular Infantry, 6,000 horse, and a considerable train of ordnance, had crossed the Jumna in the night for the purpose of attacking the English Army.' Gen. Lake's despatch says—'The enemy opposed to us a tremendous fire from a numerous artillery, which was uncommonly well served, and cost us considerable loss in officers and men. Often the gallant and steady charge of his Majesty's 76th Regt., led by Capt. Boyce—and the whole of the Infantry line, who advanced to within one hundred yards without taking their firelocks from their shoulders, when they fired a volley and rushed on with the bayonet with a determination that nothing could resist—had forced the enemy to abandon their artillery. The consequence of this victory was the evacuation of Delhi, and the dispersion of the enemy in all directions. At the earnest request of his Majesty, who is anxious to put himself under the protection of the British Government, I shall cross the river with my army as soon as a sufficient number of boats can be procured. (Signed) G. Lake. 76th Foot—Killed, 2 sergeants, 3 corporals, and 29 privates; wounded, 1 lieutenant, 1 sergeant, 3 corporals, and 93 privates.' The greatest event of national importance that ever took place in the history of the British nation was the proclamation of her Majesty as Empress of India at Delhi on New Year's Day, 1877. It realized the proud boast, 'Her empire on which the sun never sets.' Other regiments bear on their colours the words 'Seringapatam,' 'Assaye,' 'Mangalore,' all of which their forefathers earned nobly and well. It is shown above that the 76th was the only regiment of England's Infantry that fought and won for England in 1803 that ground on which England's Queen was the other day proclaimed Empress of India. The wording of the despatch and list of killed and wounded shows it was a well bought victory; why, then, should not the fine old regiment bear on its colours 'Delhi, 1803?' Allyghur and Delhi were the first two of a series of engagements in which the old 76th highly distinguished itself. Agra was also a scene of their victorious exploits, and then we are led on to Leswarree, of which we read in Gen. Lake's despatch—'When the 76th Regt., which headed the attack, had arrived at the point from which I intended to make the charge, they were so much exposed to the enemy's fire, and losing men so fast, that I judged it preferable to proceed to the attack with that regiment, and as many of the native Infantry as had closed to the front, to losing time in waiting till the remainder of the column should be able to form. As soon as this handful of heroes arrived within reach of the enemy's canister shot, a most tremendous fire was opened upon them. The loss they sustained was very severe, and sufficient alone to prevent a regular advance. At this moment the enemy's Cavalry attempted to charge, but were repulsed by the fire of this gallant body.' These extracts are necessarily curtailed and confined to the achievements of the 76th Regt., and to describe which what could be better than the words given above? The 8th Hussars shared with the 29th Light Dragoons the glories of this fight. The 8th Hussars is the only corps that bears the word 'Leswarree,' but it is shown that the 76th should have it too. They also served at the various attacks on Bhurtpoor, but there their conspicuous bravery failed to ensure success." Brevet Major Franklin is *en route* from India in H.M.S. Crocodile, his period of service as D.A.A.G. for Musketry having expired.

77th Regiment is to be moved from Cork to Newry, in relief of the 94th, ordered to England.

81st Regiment. Brevet Major Chichester has been assigned local rank as lieut.-col. in India, with effect from Jan. 17 last.

85th Light Infantry. Capt. Grant has been granted leave from India to England for fifteen months on private affairs.

86th Regiment. The *Irish Times* hears that the regiment will be moved from the Curragh to Dublin in May and be quartered at Beggar's Bush Barracks, in place of the 93rd Highlanders, proceeding to the Curragh for the summer drills.

88th Connaught Rangers, stationed at Athlone, have been placed under orders of readiness to embark for the Cape of Good Hope, and will, it is expected, proceed about the middle of May. The regiment will embark in H.M.S. Simoom.

93rd Highlanders. It is now pretty well decided that the regiment shall proceed from Dublin to the Curragh in May for the drill season.

94th Regiment. H.M.S. Assistance is about to proceed to Ireland to transport the regiment from Belfast to Fleetwood.

101st Fusiliers. Capt. Macleane is recommended for the adjutancy of the Kerry Militia.

102nd Fusiliers. The application of Brevet Major Bruce to retire from the Service has been accepted.

109th Regiment. Lieut. Hutton is about to retire, after thirteen years' service as seventh subaltern.

Rifle Brigade. We (*Indian Public Opinion*) told our readers some days ago that the Cabul Expedition had been given up, and now we hear that the 4th Batn. Rifle Brigade, which for months has been halted at Rawul Pindee, moves at once to its original destination, Peshawar. Commissariat arrangements are still being pushed on as vigorously as ever, but within the last few days there seems to have been a change of policy, and the movements of the Rifles tend to show that this is the case. Lieut. the Hon. G. N. Lyttelton has been assigned local rank as capt. in India, with effect from Jan. 17, 1877.

Medical Department. The following is from the *Time of India*:—"By the General Orders for the Army issued in England in the beginning of last month, we learn that after Jan. 1, 1877, medical officers of the British Service will no longer be called upon to contribute or subscribe to regimental bands and messes. This is manifestly a fair and just ruling, because medical officers were placed in the absurdly anomalous position of being compelled to support institutions in the management of which they were allowed no voice whatever. Moreover, as we pointed out at the time, many regiments in this country abused the power given them in regard to subscriptions from medical officers. It was intended that a regiment should receive the subscription of only one surgeon-major, that is of the senior medical officer in charge of it; but in those cases, where junior surgeons-major were temporarily told off for duty because surgeons were not available, certain regiments exacted from them the full rate of subscription attaching to their rank. No wonder that protests both loud and deep were heard against this unmistakably sharp practice. By the above General Order we presume that medical officers are also released from compulsory attendance on any mess, so that they may dine when and where they please. A variety of reasons, apart altogether from pecuniary considerations, will conspire to render this an unquestionable boon to many men. The practice has been introduced in England of attaching medical officers not to regiments, but to station hospitals, and thus the severance of the department from its old military life has been satisfactorily completed. But, in consequence of this system, commanding officers have lost every remnant of direct authority over the medical officers entrusted with the sanitary care of their regiments. For this grievous loss of power commanding officers have themselves to blame in consequence of the slackness with which they opposed the initial scheme nicknamed unification. It seems to us that Mr. Hardy and his coadjutors in Pall Mall and Whitehall-yard have now done their utmost in transmogrifying the unfortunate Medical Department, which has lapsed into a condition of utter demoralization. There is not an atom of truth, we may observe, in the statement which interested parties have been attempting to spread at home, that medical officers are becoming reconciled to the new *régime*. The department is also painfully short-handed, and seductively-framed advertisements fail to lure any except the needy and the unfortunate. If England were to embark in a European war, at the present time there are barely sufficient surgeons available for a single army corps, while there exists no reserve whence to fill up casualties in the field; and, oddly enough, the non-combatant medical officers perish by the various accidents of war in the ratio to combatants of three to one. The lowest depth has now been reached. What will happen next?" Depty. Surg.-Gen. J. Gibbons has been transferred from the administrative Staff of the Madras to that of the Bengal Presidency, vice Surg.-Gen. T. Crawford, M.D., appointed P.M.O. in Ireland, and has been appointed to the medical supervision of the Allahabad Circle.

Veterinary Department. Staff Vet.-Surg. F. F. Collins, Officiating Inspecting Vet.-Surg., 1st Circle, and Principal Vet.-Surg., Bengal, is confirmed in those appointments from Oct. 2, 1876, vice Principal Vet.-Surg. A. Turnbull, retired.

Gen. Sir C. Hastings Doyle, K.C.M.G., has, we (*Standard*) are happy to hear, so far recovered from his late accident that hopes are entertained that he will next week be able to resume his official duties at Portsmouth. The gallant officer came to town to attend the levée of the Prince of Wales, on Monday, the 26th ult., but his foot slipped when he was about to enter his brougham, and he fell, his face striking with great violence against the iron step of the carriage. The severe lacerated wound which resulted has confined the general to the house of his brother, Col. North, M.P., with whom he was staying at the time. The general is in his 73rd year, and the fortunate result is very gratifying to his numerous friends.

THE AUXILIARY FORCES.

MILITIA.

Durham Artillery. Lieut. Ditmas has been appointed instr. of artillery.

4th Royal Middlesex. The recruits are to assemble for preliminary drill on the 9th prox., and the regiment will come up for training on June 4.

1st Stafford. The two battalions are to train separately this year, one assembling in May and the other in July.

Armagh. The training has been fixed to take place in July instead of June. The recruits will assemble for eighty-three days' preliminary drill on the 20th prox., and be dismissed on July 11, prior to the assembly of the regiment on the 13th of that month.

Royal Cork City Artillery. The death is announced of Surg. R. N. Townsend, M.D. Dr. Townsend was appointed July 5, 1869.

Dublin City Artillery. Major O'Meara is resigning his commission, and will be granted the hon. rank of lieut.-col., and permission to wear the uniform of the regiment. Hon. Major Magill will be promoted to the majority.

Dublin County. The recruits, to the number of 198, have assembled, and are undergoing preliminary drill at the Curragh under Hon. Major Thomas, Capt. and Adjt. Parry, and Sub-Lieut. Acton.

Kerry. Capt. Macleane, 101st Fusiliers, is recommended for the adjutancy.

King's County. Capt. Armitt is about to resign his commission.

Waterford Artillery. Major Mulcahy has been recommended for the hon. rank of lieut.-col.

Wicklow Rifles. The War Office is negotiating for the purchase of the Wicklow Marine Hotel, which it contemplates converting into barracks for the regiment on its conversion into an Artillery corps. In the event of the purchase being made, the Wicklow Town Commissioners, who are the head landlords, will take a surrender of the existing lease and give a new lease for 999 years, at £25 per annum.

Col. Mure asked the Secretary of State for War on Thursday whether it was the intention of her Majesty's Government to take into consideration the case of surgeons of Militia, who, by the clauses of the Royal Warrant, dated War Office, July 19, 1876, and the instructions of the Secretary of State thereon, have been deprived of the larger proportion of the income derived from their appointments. Mr. Hardy said the subject was one which was receiving a good deal of consideration from the War Office. He had been requested to see a deputation after Easter from the medical body of the metropolis, and he should be prepared to pay every attention to any representation they might make with respect to it.

Gen. Shute on Thursday asked the Secretary of State for War with reference to the statement that Militia lieutenants wishing to pass into the Line would, after the end of the year 1878, have to do so by competitive examination, whether young officers at present in the Militia would be exempted from that rule. Mr. Hardy said the rules which it was proposed to issue would apply to all officers after the end of 1878.

YEOMANRY.

Royal 1st Devon. In reply to an invitation to the colonel to visit Dawlish at the next annual training of the regiment, the hon. secretary, Mr. H. L. Friend, has received a letter from Sir J. T. B. Duckworth, Bart., stating that the place for training had not yet been definitely settled, and that another town had been proposed. The satisfactory manner in which the regiment was received on the last occasion would be a strong inducement to repeat the visit when the proper time came.

The following officers have joined the Aldershot School of Instruction, viz.:—Lieut. Grant and Sub-Lieuts. Hargreaves and Pole, Hants; Sub-Lieuts. Davenport, Staffordshire, and Bland, Yorkshire Hussars; and Capt. M'Bride, Lieut. Alston, and Sub-Lieuts. Stewart and Campbell, Lanarkshire and Glasgow.

THE INDIAN ARMY.

6th Bengal Cavalry. Lieut. J. C. F. Gordon, Bengal S.C., has been appointed squadron officer, vice Lieut. Muir, appointed adjt. of the Governor-General of India's Body Guard.

7th Bengal Cavalry. Major T. Graham has applied for furlough to Europe on medical certificate.

12th Bengal Cavalry. Lieut. C. Egan, squadron subaltern, is about to be promoted capt., with effect from Jan. 24.

13th Bengal Cavalry. Capt. C. R. Pennington, squadron commander, has returned to India, and resumed duty from furlough.

15th Bengal Cavalry. Capt. C. O. W. Apperley has been appointed station Staff officer at Jhelum, vice Cock, appointed to officiate as brigade-major at Mooltan.

2nd Bengal N.I. Lieut. S. C. F. Peile, officiating wing officer, has been confirmed in the appointment.

6th Bengal N.I. Surg.-Major R. H. Perkins returned to duty on the 2nd ult., and resumed medical charge from European furlough.

14th Bengal N.I. Lieut.-Col. G. C. Rowcroft, wing commander 35th N.I., and officiating commandant 27th N.I., has been appointed to officiate as commandant during the absence of Lieut.-Col. Williams on furlough, and Capt. W. Campbell, attached, officiating wing commander, has been appointed wing officer, to complete the establishment. Surg. H. Boyd has resumed medical charge on return to India from European furlough.

16th Bengal N.I. Lieut.-Col. W. B. Girdlestone, commandant, has qualified for promotion as brevet col. Capt. J. M. Tulloch, attached, has applied for leave to England on medical certificate.

19th Bengal N.I. Lieut. S. H. P. Graves, officiating wing officer on probation, 26th N.I., has been transferred to the 19th on probation. Lieut. D. E. Gouldsbury, adjt., is expected home in H.M.S. Crocodile.

22nd Bengal N.I. Lieut. E. W. Dun, 15th Foot, a candidate for the Staff Corps, has been appointed officiating wing officer on probation.

26th Bengal N.I. Referring to the case of Major Moray, as exemplifying a delay injurious to the cause of justice in the matter of Indian courts-martial, the *Bombay Gazette* says:—"It seems that early in 1876 Major Moray was putting a company of the 26th N.I. through its musketry; the Chief Insptr. of Musketry came down to the range one morning, and found the subadar keeping one of the registers in an improper manner. Major Waring taxed him with the irregularity, and the subadar fainted. Major Moray states that in his report of the matter to Col. Becher, commanding the 26th, he told him about this fainting. Col. Becher denied that he had done so. This was on March 3, 1876, and the affair appears to have smouldered until Oct., 1876, when a court of inquiry was held 'to investigate certain alleged misconduct' imputed to Major Moray by his commanding officer. Before this court Major Moray held to his statement that he had told Col. Becher about the subadar fainting, and the upshot of it was that Major Moray was tried by general court-martial in Poona on Nov. 21, 1876, for having wilfully made a false statement to his commanding officer regarding the subadar. The court acquitted him, but was ordered to reconsider its finding, which, however, on reassembling for revision, it adhered to. On Dec. 2 Sir Charles Staveley, having no alternative, confirmed the finding of the court, which he characterised as being 'opposed to and inconsistent with the evidence adduced.' The Commander-in-Chief afterwards removed Major Moray from his appointment as wing officer. Now, what must strike every unprejudiced man about this case is, that something must be wrong about a system under which a fault said to have been committed on March 3 lingers and dawdles through the successive stages of official correspondence and court of inquiry, culminating finally in a court-martial with whose opinion the Commander-in-Chief finds it impossible to agree, and whose finding he reluctantly confirms on Dec. 2. That is, from March 3, to Dec. 3, 1876, the case, in one form or another, drags its weary length along, ending finally in the court and the confirming authority taking diametrically opposite views of it. On Major Moray's guilt or innocence of the fault imputed to him we offer no opinion whatever, merely citing his case because it is fresh in the memory of everyone, and because it seems to us that to keep a matter of that sort in hand for ten months is out of all reason." Lieut. H. N. Webb, officiating wing officer on probation, has been appointed wing officer on probation, in succession to Capt. Pratt, promoted wing commander.

33rd Bengal N.I. Lieut. R. Fulton, 2nd Foot, a candidate for the Indian S.C., has been appointed officiating wing officer on probation.

42nd Bengal N.I. Lieut. A. Melvin, officiating wing officer, has been appointed wing officer, to complete the establishment, and will continue to act as qrmr.

45th Bengal N.I. Lieut. P. A. Buckland, officiating wing officer, has been appointed a sub-assist. comy.-gen., third class, on probation, from Jan. 23.

1st Punjab Cavalry. Major G. C. Bird, second in command, is about to return to duty in India.

2nd Punjab Cavalry. Lieut. A. F. Cotton, wing officer 45th N.I., and officiating squadron officer 3rd Punjab Cavalry, has been appointed to officiate as squadron officer, vice Lieut. E. C. Dowse.

3rd Punjab Infantry. Capt. C. Young, qrmr., has been granted a three months' extension of leave from India. Lieut. H. F. V. Gaitskell, qrmr., is expected home in H.M.S. Crocodile.

1st Sikh Infantry. Lieut. J. A. H. Pollock, 17th Foot, a candidate for the Staff Corps, has been appointed wing officer on probation, vice Lieut. F. G. Maltby, appointed to the 2nd Infantry Hyderabad Contingent.

3rd Sikh Infantry. Lieut. O. C. Radford, 25th Foot, a candidate for the Staff Corps, has been appointed officiating wing officer on probation, vice Capt. W. B. Aislabie, officiating as wing commander.

Central India Horse. Capt. M. M. Carpendale, second in command, returned to India on Feb. 2 and resumed duty from leave in England.

Deoli Irregular Force. Lieut.-Col. C. H. Clay, commandant, has obtained six months' furlough to Europe.

14th Madras N.I. Lieut.-Col. A. F. Williams, second in command, has qualified for promotion as brevet col.

37th Madras N.I. Lieut.-Col. T. S. Hawks, second in command, is about to be promoted col. by brevet, with seniority from the 4th ult.

3rd Bombay Cavalry. Lieut. M. James, squadron subaltern, has been granted a six months' extension of leave from India, and has joined at Aldershot for a course of instruction in Army signalling.

1st Sind Horse. Lieut.-Col. W. R. Alexander, commandant, has qualified for promotion as brevet col.

4th Bombay N.I. Lieut.-Col. A. P. Chesshyre, second in command, has qualified for promotion as brevet col.

10th Bombay N.I. Lieut.-Col. T. W. W. Pierce, second in commaad, has returned to duty from European furlough.

16th Bombay N.I. Col. W. L. Cahusac, commandant, has been granted furlough to England for one year.

21st Bombay N.I. Lieut.-Col. W. Bannerman, second in command, has qualified for promotion as brevet col.

22nd Bombay N.I. Lieut.-Col. W. Blakeney, second in command, has been granted a three months' extension of leave from India.

23rd Bombay N.I. Capt. F. T. Ebden, qrmr., has joined at Aldershot to undergo a course of instruction in Army signalling, on the conclusion of which he will return to duty in India.

26th Bombay N.I. Col. A. Becher, commandant, has been granted furlough to Europe for two years on medical certificate.

We understand, says the *London and China Telegraph*, that during the absence of Sir William Jervois from the Straits Settlements the government is to be administered by Colonel M'Leod, at present commanding the troops. While we have pleasure in congratulating Sir William Jervois on the honour which is conferred upon him on being selected to proceed to Australia to advise on the defensive arrangements of the colonies, we cannot but regret that he should be removed, even though temporarily, from the sphere of his labours. This principle of borrowing governors for special objects is obviously to be deprecated; and it curiously happens that the Straits Settlements afford a warning of the disasters likely to be produced by its being acted upon. Sir Andrew Clarke, formerly governor there, after he had taken pains to adjust the troubles in the Malay States, was suddenly withdrawn to take a post in India, and there is too much reason to believe that the outbreak which arose shortly after was attributable to a great extent to this fact.

The Army Gazette.

WAR OFFICE, PALL MALL, March 13, 1877.

Memorandum.

Paymr. J. McI. Green, of the Pay Sub-Department of the Control Department, to retired pay, from March 15, 1877.

WAR OFFICE, PALL-MALL, March 16, 1877.

Where not otherwise specified, the following commissions and announcements bear date March 17, 1877:—

2nd Life Guards—Lieut. H. French, from the 69th Foot, to be Lieut., vice H. R. Toler, retired.

5th Dragoon Guards—Major M. P. Blake retires on half pay.

6th Dragoon Guards—Lieut.-Col. and Brevet Col. E. Napier retires on half pay.

10th Hussars—Capt. A. Hunt, from half pay, late 2nd Dragoon Guards, to be Capt., vice W. Yeldham, retired on temporary half pay. Capt. A. Hunt, appointed to the Militia, retires on half pay. Sub-Lieut. R. B. W. Fisher to be Lieut.; Aug. 28, 1875, but his commission as Lieut. in the Army to bear date June 27, 1874.

18th Hussars—Capt. F. C. Hooper retires from the Service, receiving the value of his commission.

5th Foot—Sub-Lieut. E. J. Robinson to be Lieut.; Feb. 11, 1875.

15th Foot—Capt. J. H. H. Ruxton retires from the Service, receiving the value of his commission.

16th Foot—Sub-Lieut. E. H. Vallings to be Lieut.; Feb. 11, 1875.

20th Foot—Sub-Lieut. C. J. Blomfield to be Lieut.; Feb. 11, 1875.

23rd Foot—Lieut. H. R. Boyle retires from the Service, receiving the value of an Ensigncy.

24th Foot—The undermentioned Sub-Lieuts. to be Lieuts.:—G. F. J. Hodson; Feb. 28, 1874. W. Heaton; Feb. 28, 1874. C. J. Atkinson; Feb. 28, 1875; W. E. D. Spring; April 30, 1875.

25th Foot—Lieut. A. L. Sinclair has been appointed a Probationer for the Indian S.C.

33rd Foot—Sub-Lieut. H. F. Lyons-Montgomery to be Lieut.; June 13, 1875.

46th Foot—Lieut.-Col. and Brevet Col. M. Walker, C.B., V.C., retires on half pay.

55th Foot—Sub-Lieut. C. G. Matthews, from the 3rd Foot, to be Sub-Lieut., in succession to Lieut. R. C. Hadow, a Probationer for the Indian Staff Corps.

56th Foot—Lieut. G. P. M. Prichard has been appointed a Probationer for the Indian Staff Corps.

58th Foot—Sub-Lieut. R. V. Garrett to be Lieut.; Feb. 11, 1876.

64th Foot—Sub-Lieut. J. W. Parker to be Lieut.; Feb. 11, 1875.

76th Foot—Capt. B. Simner retires from the Service, receiving the value of his commission.

100th Foot—Lieut. H. A. Eyre, from the Antrim Militia, to be Second Lieut., in succession to Lieut. W. Gatey, deceased.

102nd Foot—Capt. and Brevet Major S. Bruce retires from the Service, receiving the value of his commission.

106th Foot—The undermentioned officers retire from the Service, receiving the value of their commissions:—Capt. H. Bailey, Lieut. A. T. Boyle.

Unattached—Sub-Lieut. B. C. Hannen resigns commission.

Medical Department—Depty. Surg.-Gen. J. M. S. Fogo, from half pay, to be Depty. Surg.-Gen., vice H. L. Cowen, retired upon half pay; Jan. 24, 1877. Surg.-Major J. C. Ovens retires upon temporary half pay; Feb. 4, 1877. Surg.-Major L. G. Hooper retires upon temporary half pay; Feb. 15, 1877. Surg.-Major H. A. Gogarty, M.B., retires upon temporary half pay; Feb. 21, 1877.

INDIA OFFICE, March 15, 1877.

Her Majesty has been pleased to approve of the following admissions to the Staff Corps made by the Government in India:—

BENGAL STAFF CORPS.

To be Lieuts.—Lieuts. H. H. R. Heath, 10th Hussars, July 24, 1872; and G. A. Money, 8th Regt., Sept. 11, 1873.

BOMBAY STAFF CORPS.

To be Lieut.—Lieut. A. A. Pearson, 107th Regt.; Oct. 28, 1871.

Her Majesty has been pleased to approve of the transfer to the Half Pay List of the Bombay S.C. of the undermentioned officer:—Capt. H. Gardiner; March 16, 1877.

Her Majesty has been pleased to approve of the following admissions to H.M.'s Indian Medical Service:—To be Surgs., dated Sept. 30, 1876—Bengal: J. Moorhead, M.D., C. H. Beatson, C. W. Owen, G. S. Griffiths, P. M. Grant. Madras: W. A. Lee and M. S. Eyre. Bombay: J. B. Eaton, O. H. Channer, E. W. Young, H. McCalman, M.D., and D. R. Ross, M.D.

The Militia Gazette.

WAR OFFICE, March 13, 1877.

Where not otherwise specified, the following commissions and announcements bear date March 14, 1877:—

Royal Denbigh and Merioneth—Samuel Sandbach, gent., to be Sub-Lieut.

Royal Glamorgan—Sub-Lieut. A. D. Sim resigns commission.

2nd Royal Lancashire—Capt. C. L. A. Farmar resigns commission.

Royal Lancashire Artillery—William Hall Walker, gent., to be Sub-Lieut. (Supy.).

1st or West Norfolk—Robert Horace Walpole, Esq., late Royal Navy, to be Capt.

Northampton and Rutland—Rowland Hunt, gent., to be Sub-Lieut. (Supy.).

The (Kings's Own) 1st Stafford—George Brettell Henderson, gent., to be Sub-Lieut.

2nd Royal Surrey—Sub-Lieut. W. E. Phillips to be Lieut.; May 12, 1875.

2nd Warwick—Sub-Lieut. Sir Peyton Estoteville Skipwith, Bart., to be Lieut.; Aug. 1, 1874. Sub-Lieut. H. W. D. de Windt to be Lieut.; June 2, 1875.

2nd West York—Lieut. J. I'Anson to be Capt., vice A. Barff, resigned.

4th West York—Capt. J. Snepp resigns commission.

5th West York—Sub-Lieut. E. C. Milner resigns commission.

6th West York—The appointment of Harry de Courcy Hay, gent., as Sub-Lieut., dated Jan. 20, 1877, notified in the *London Gazette* of Jan. 19, 1877, is cancelled.

The Duke of Edinburgh's Own Edinburgh Artillery—Capt. J. S. Bird resigns commission; Dougall Braddock MacDougall, gent., to be Sub-Lieut.

Haddington, Berwick, Linlithgow, and Peebles Artillery—Charles Lisle Cookson, gent., to be Sub-Lieut.

2nd Royal Lanark—Lieut.-Col. G. A. Alston resigns commission, also is granted the hon. rank of Col., and is permitted to continue to wear the uniform of the regiment on his retirement.

Antrim—Sub-Lieut. C. H. Hawtrey resigns commission.

Donegal—Douglas William Cornwall, gent., to be Sub-Lieut. (Supy.).

Royal North Down—Thomas Roger Johnson-Smyth, gent., to be Sub-Lieut. (Supy.); Charles Tritton, gent., to be Sub-Lieut. (Supy.).

Royal Dublin City—Sub-Lieut. W. R. Higginson resigns commission.

Fermanagh.—William Knox, gent., to be Sub-Lieut. (Supy.).

Louth—Edward Lister Kay Talbot, gent., to be Sub-Lieut. (Supy.).

1st or South Tipperary Artillery—William Joseph Murphy, gent., to be Sub-Lieut. (Supy).; Stanley Charles Gough, gent., to be Sub-Lieut. (Supy.).

YEOMANRY CAVALRY.

Gloucestershire—Capt. J. C. Bengough resigns commission.

Nottinghamshire (Sherwood Rangers)—William George Frederick Cavendish Bentinck, gent., to be Sub-Lieut. (Supy.)

THE KNELL OF ESPRIT DE CORPS.

Somewhat impalpable and difficult of analysis are the constituents of that peculiar force called *esprit de corps*, but its influence is felt in every regiment of our Regular Army, and its value may be estimated by the effects it produces if it cannot be exactly described. It makes the motto *Noblesse oblige* an abiding law to every distinguished corps, a command indisputably to be orderly in camp and quarters, spick and span on parade. It is a reserve of strength at moments of great emergency, bracing the nerves to the highest efforts, and giving a grim fortitude in the hour of darkest despair. It sends the forlorn hope with ringing cheers into the deadly breach, closes up ranks rapidly thinning under a murderous fire, evokes the mute heroism displayed by hundreds of disciplined men as they stand motionless and without a murmur upon the deck of a sinking ship. Most tenacious is its grip upon all who come within its reach. The young recruit acknowledges the spell directly he has taken the shilling; he outbids the oldest veteran in passionate devotion to the regiment he has just joined, and burns with eagerness to show himself no unworthy wearer of the mantle of inherited *prestige*. If in after years he shoots like a star above the military horizon he never forgets his first love; the greatest general is always glad to renew as honorary colonel his connection with the old corps, in which he mastered the rudiments of his drill. By a thousand traditionary usages is *esprit de corps* cherished and kept alive—by curious customs, peculiar badges, distinctive names; by regimental nights dedicated to some patron saint or commemorative of victories in which the regiment played a prominent part; by regimental pets—the snow-white goat, the antelope, or tame bear, strutting by the drum-major's side; by *sobriquets*, such as the "Fighting 50th," the "Saucy 6th," the "Die Hards," Slashers, Slaughterers, Avengers, Celestials, Pompadours—quaint gossipy titles gained often at the cannon's mouth, and stereotyped now into imperishable monuments of fame. Each regimental ornament and emblem, every device and motto, is a record of prowess and doughty deeds. Elephants and tigers, the dragon, the sphinx, the castle and key, speak of Indian battle-fields, of China, Egypt, Gibraltar, and its lengthened siege; the phrase "Primus in India" tells its own tale; there is a special history in the word "Firm," which the 36th carry upon their colours and their caps; in the red pompons worn by the company of the 46th, which once took a French company prisoner to a man; in the double shako-plate of the 28th, recording how the rear-rank faced about, and the regiment fought back to back against Cavalry at Aboukir. A lever so effective cannot, therefore, be lightly tampered with; to remove it entirely or in part must entail a distinct loss of strength; a positive waste of power. It is because they tend in this direction that the proposals of a recent committee on military organization must be viewed with extreme suspicion and disgust. The leading idea threatens to destroy at one blow the strongly-marked individualism which is the great characteristic of every regiment of the British Line. To abolish existing numerical designations, and replace them with "Territorial" titles—in a word, to substitute new names for old numbers—is a sweeping innovation which no arguments, however plausible, can conclusively recom mend.—*World.*

With a view of removing young soldiers further from the alluring influences of the recruiting depôt of London, the *Standard* announces that it is proposed by the War Office authorities to transfer the transport depôt of the Army Service Corps to Aldershot, where all recruits enlisted in London will at once proceed. The remount horses purchased by Comy.-Gen. Healy will be conveyed to the same place.

The following alterations took place amongst the officers of the Army last month, viz.:—Four gentlemen were appointed to commissions as lieuts., sub-lieuts., &c.; nine capts. and four lieuts. retired by sale; one lieut. of the Royal Artillery and four sub-lieuts. of the Line resigned; one capt. of the Indian Army was removed; and the deaths of two gens., two cols., three capts., one lieut., one paymr, one ridingmr., one assist. comy.-gen., one assist.-paymr., and three surgs.-major were notified.

Mr. Reed asked the Secretary of State for War on Thursday if he would inform the House, by laying papers upon the table or otherwise, what is the present state of the British graveyards in the Crimea, and whether a guardian has been appointed to protect them. Mr. Hardy was glad to inform the hon. gentleman that care had been taken to keep the graveyards in question in good order, and that a custodian had been appointed for the purpose of protecting them.

PARLIAMENT.

PENSIONS FOR THE WIDOWS OF SEAMEN AND MARINES.

On Monday Capt. Price called attention to a scheme for raising a fund to provide pensions for the widows of seamen of the Royal Navy and of the Royal Marines. The idea he mentioned had been first started by a number of the men themselves, who proposed that sixpence per month should be deducted from every man's pay, but Mr. Finlaison had reported that the fund thus raised would be utterly insufficient. He then explained a scheme of his own, based on a calculation that 20,000 men would come into it, and that 120 widows annually would have to be provided with a pension of £20. This would require when it came into full operation a sum of £40,000 a-year, of which £20,000 would be furnished by the men themselves subscribing 1s. 8d. per month, and £20,000 would have to be found from extraneous sources. At the end of seventeen years, however, a sufficient fund would have accrued from unexpended balances which would make it possible to dispense with these extraneous payments. As to the sources from which these payments would be drawn he indicated fines, savings on provisions, stoppages, &c.

Mr. Childers thought the plan sketched out extremely objectionable, and whenever its principle had been tried it had always failed. He had, however, a plan of his own for providing these pensions. Whenever a seaman married he should be allowed to give notice to the Admiralty that he desired his pension or part of it to be extended over the joint lives of himself and his wife, and the requisite deductions could easily be made from actuarial tables.

RAISING THE VANGUARD.

Dr. Cameron called attention to the negociations of the Admiralty for raising her Majesty's ship Vanguard, and in doing so complained of the delays which had taken place in adopting active measures for recovering from the sea public property which had cost the nation a half million of money. Mr. A. Egerton pointed out some of the difficulties of conducting sub-marine operations of the sort required to raise the ship; but he trusted that these would soon be overcome by a gentleman with whom the Admiralty were now in treaty, and a contract for the work would be concluded in the course of the next three weeks.

CRIME AND PUNISHMENT IN THE NAVY.

Mr. P. A. Taylor rose to move that it was desirable that more detailed information should be furnished to Parliament in regard to crime and punishment in the Navy, such as was afforded by the returns for the years 1863, 1864, and 1865. The hon. gentleman explained that the returns of the years named in his motion gave a record of every punishment in every ship on every station, furnished comparative tables, and showed in what ships crime was above the average, and in what ships it was below the average. Considering the Draconian severity of our discipline in the Navy, and the fact that flogging was *still* retained in our Navy alone amongst the navies in the world, he thought it doubly and trebly necessary that the fullest details of our disciplinary system should be published.

Mr. Hunt pointed out that when the hon. gentleman brought forward this question two years ago it seemed to the Admiralty that although it was not desirable that details should be presented, it was reasonable that some returns should be furnished for the information of the House. They showed that corporal punishment, though not abolished, was very seldom had recourse to in the Navy. It was a punishment which, in his opinion, should be had recourse to very sparingly. The hon. member would have returns of crime and punishment not only from every station, but from every ship. It might be that on some ships there were many young sailors who would be more troublesome than those of more mature years. Was an officer to be gibbeted in that House in consequence of a heavy return of punishment under these circumstances? The returns at present furnished appeared to him to give sufficient details, and he did not think it desirable to go further.

The House divided—For the amendment, 65; against, 121; majority, 56.

OUR IRONCLAD NAVY.

Sir J. D. Hay rose to call attention to the condition of the ironclad navy, especially with respect to their boilers, and hoped to hear from the right hon. gentleman (Mr. Hunt) either a denial of his statements or a frank admission of them, in which latter case it would be for them to consider whether it would not be advisable to spend a little more money in securing a more efficient Navy.

Mr. Bentinck next rose to call attention to the great variety of the form and proportions of the ships of the same class in her Majesty's Navy, to the comparatively small numbers of vessels which can be handled under canvas and without the use of steam, and to the description of anchors and cables supplied to her Majesty's ships. He said that the greater part of our ironclads were lumbering, unmanageable, unwieldy batteries, not fit to go beyond the Channel, as if they did they might not be able to re-coal.

Mr. Lefevre contended that whatever test be applied, the British Navy was relatively stronger at the present moment than it had ever been before.

Mr. Reed thought that we should make a great mistake if we plumed ourselves on the excessive strength of our Navy at the present time, and found fault with the manner in which the First Lord of the Admiralty had treated the question of the boilers of our ironclad ships. He (Mr. Reed) could not believe that this country was so deficient in practical men that, if the right hon. gentleman had really applied himself to the production of the proper results, we might not have been in a much more satisfactory position with regard to boilers and their management than we were at the present time.

Mr. Goschen said it was significant that when these members were pronouncing their annual dirge, the Government actually thought themselves in a position to reduce our Navy Estimates by £300,000, and that against their speeches we had the testimony of other Powers that our recent demonstration at Besika Bay was entirely worthy of the great naval power of this country.

Mr. R. W. Duff attributed many disasters to the fact that officers were not sufficiently acquainted with the ships before taking command, and recommended that captains should enter upon their duties on board at least six weeks before their vessels sailed.

Mr. W. Hunt hoped some change would some day be made in the rules of the House to enable a Minister in charge of Estimates to move them without preliminary discussion, except when a real grievance had to be discussed. The distinction between the positions of different warrant officers was made because the duties of such officers on sea service were more responsible than those of officers on harbour service. The change effected by the right hon. member for Pontefract in reducing the number of rates pay to two had created dissatisfaction, and under the altered scheme pay was given according to length of service. The officers benefitted by that change when it was made, but certain hardships had since been pointed out, and he was willing to look into the inequalities mentioned by the member for Chatham, with the view of seeing how they could be remedied. The member for Devonport called attention to the movement originated by the men of the Fleet for establishing a widows' pension fund. That scheme had been regarded with great favour by the Admiralty, but had not prospered for the want of money. That which was paid by the men being insufficient to carry out the object in view, it was suggested that assistance might be given from the Admiralty if the scheme was to be adopted. Fully recognising the advantage to the Service, he did not see how the Admiralty could contribute from savings on provisions, and when he went to the Treasury he was told that if contributions were made to the Navy, the same thing must be done for the Army and the Civil Service, and the expense would be enormous. It was, therefore, impossible for him to pledge himself in the matter. With regard to the state of the boilers, he had pressed the Boiler Committee to present their report; but he was afraid the House would have to wait for it a little longer. It was of no use discussing before all the world the actual condition of every ship in the British Navy. The thickness of the armour and the tonnage might be found out, but one thing could not be found out, and that was the state of the boilers.

THE NAVY ESTIMATES.

The House having resolved itself into Committee of Supply, Mr. Hunt proceeded to make his annual statement on the Navy, which is fuller dealt with elsewhere.

BULLYING ON BOARD THE BRITANNIA.

On Thursday, in answer to a question relative to a letter in a morning paper on the subject of bullying and cruelty, which practices were alleged to prevail among the cadets of her Majesty's training-ship Britannia at Dartmouth, Mr. Hunt said he had seen the letter, and he was sorry to say that there had been some cases of bullying on board the Britannia. These cases happened at every large school, and the Britannia was no exception to the general rule. Since he had been at the head of the Admiralty he had discontinued such practices as much as possible. It was not usual in matters of this kind relating to the Army and Navy to lay the reports upon the table of the House, but under any circumstances he should not be inclined to do so in the present case, and in his own case he should be sorry to see all his schoolboy delinquencies recorded in a Blue-book. Certain specific charges had been made, but the Admiralty thought they had not been substantiated in any important point.

NAVAL CADETS (BRITANNIA).

On Friday Mr. S. Lefevre moved for a return of any reports made since Jan. 1876, by the Director of Naval Studies at Greenwich, on the state of proficiency of the cadets of the Britannia appointed under the revised system of nomination without competition. Agreed to.

THE ARCTIC EXPEDITION.

Captain Pim gave notice that on April 13 he would call attention to the result of the Polar Expedition, and would move a resolution on the subject.

THE CASE OF PRIVATE GEORGE MILLS.

Mr. Joseph Cowen asked the Secretary of State for War whether it was true that Private George Mills, of her Majesty's 94th Regiment, was, on January 29 last, put under arrest, he having made a grave charge against an officer of his regiment; that he so continued under arrest until February 10 following; that in the meanwhile the officer against whom such charge was made, having been placed under arrest, broke his arrest and absconded, and subsequently sent in his resignation, whereupon Mills was released; whether the imprisonment of George Mills in the above circumstances, and his subsequent discharge without a trial, were in accordance with military law; and whether he is entitled to receive any compensation for his imprisonment.

Mr. Hardy: The statement contained in the question is generally correct, but not altogether so. The private, George Mills, referred to in the question made a charge against the officer of his regiment for an offence committed in the August previous. He was put in detention. He was not imprisoned, but confined in the guard-room; and as his pay was continued to him, he suffered no loss whatever. On the officer's absconding, an order was sent from the Horse Guards for his release on Feb. 8, and on the 10th he was released. Under such circumstances his detention was strictly in accordance with law, and was both legal and justifiable.

STAFF PAY OFFICERS IN THE ARMY.

Col. North asked the Secretary of State for War if it was true that officers who accepted appointments as generals, lieutenant-generals, and major-generals in the mobilization of 1876, have been disallowed the Staff pay of their respective ranks as named in General Orders by reducing it to that of inferior rank, and whether this reduction was made known to those officers before appointment, and under what Warrant or regulation this reduction has been made.

Mr. Hardy, in reply, said that no reduction had taken place in the pay of officers who accepted appointments as generals, lieutenant-generals, and major-generals under the mobilization of 1876.

ARMY (PURCHASE AND DISCHARGE).

Mr. Archdale will on Monday night move for returns showing the number of men who purchased their discharge from the ranks of the Army in the military years 1875 and 1876; also of the amount received for such purchases, and a statement of how the money so received was applied.

THE MUTINY BILL.

Sir Alexander Gordon has given notice that on the motion for going into Committee on this Bill, he will move:—That, in the opinion of this House, it is not desirable to bring under the provisions of the Mutiny Act any persons belonging to the Militia, except persons receiving pay for duty performed, as already provided for by the Act 38th and 39th Vic., c. 69, secs. 56 to 58, and 66 to 70.

ARMY (DUTY STATES.)

Sir George Balfour has moved an address for a copy of the duty states, dated March 10, of one battalion of each of the three regiments of Guards, also of two battalions in the camp at Aldershot, one of the 780 privates, and one of 480 privates; also of two battalions of the force in Scotland and of two battalions of the force in Ireland of the above establishment, with explanatory details of the various employments for which privates are allowed, and their numbers on each of these employments.

INDIA.

The removal of the Madras arsenal from Fort St. George to a more convenient locality has been finally decided upon, and a special committee is to be formed to examine the plain west of Perambore to ascertain whether an eligible site cannot be found nearer the town than Avady. The site at St. Thomas' Mount, proposed by the Special Ordnance Commission, has been abandoned in deference to the opinions of the present and late Commanders-in-Chief.

In future, says the *Pioneer*, all marine expenditure is to be under the entire control of the Military and Financial Departments of the Government of India, and nothing larger or more important than a row-boat is to be obtained or constructed without the special sanction of these two departments. This rule applies to every department of Government, and whether the expense will be borne by Imperial, provincial, or local funds. In the case of steam launches and smaller boats, permission may be given for the expense on their account being charged to some other heading than "Marine"; but anything larger is only to be shown in the Budget under "Marine."

According to the *Times of India*, "the Khelat escort, when restored to its original strength, will consist of the 1st Regiment of Sikh Infantry, about 600 strong; one squadron of the 4th Punjab Cavalry, say 160 sabres; and the Peshawur Mountain Battery. The head-quarters of the above will be at Quettah; a company of the Sikhs and half the Cavalry being available as a personal escort for the Political Agent, should he have occasion to visit Khelat. But the policy laid down for our future relations with the Khan wisely prescribes as little interference with the internal affairs of the State as possible, and Major Sandeman's visits to its capital will probably be as rare as angel's visits hereafter.

Lieut. H. F. Grant, 4th Hussars, has been appointed temporarily to the Staff of Gen. Sir F. Haines, K.C.B., as aide-de-camp.

The Madras brigade vacated by Major-Gen. W. Gowen, Madras Infantry, on promotion, is to be filled by Col. A. C. Silver, Madras Infantry, lately employed as Military Secretary to the Government of Madras. Col. Silver has no war service. He entered the Madras Army June 12, 1838, and became col. Jan. 1, 1867.

The following officers of the Madras Army have been given a renewal of their appointments from Jan. 25, viz.:—Capts. T. R. Byng, adjt. 6th N.I.; R. J. B. Simpson, adjt. 12th N.I.; J. P. James, qrmr. 13th N.I.; W. Foord, adjt. 14th N.I.; A. S. Grove, adjt. 15th N.I.; J. W. S. Butler (Eur.) adjt. 17th N.I.; F. Stanley, qrmr. 19th N.I.; J. O. Goldie, adjt. 20th N.I.: B. B. Faunce, adjt. 23rd L.I.; T. J. Cotton, qrmr. 25th N.I.; J. W. Swifte, adjt. 27th N.I.; G. Godfrey (Eur.), adjt. 28th N.I.; W. L. Ranking, adjt. 34th N.I.; Q. S. A. Jamieson, qrmr. 34th L.I.; and F. J. Wroughton, adjt. 39th N.I. The following have vacated their appointments from the same date:—Capt. A. F. Orchard, qrmr. 2nd N.I.; Capt. J. M. Barnett, qrmr. 4th N.I.; and Capt. J. H. Prendergast, adjt. 29th N.I.

Cols. W. Nembhard and J. A. Steel, Bengal S.C., the former Commissioner, Hyderabad Assigned Districts, the latter Deputy Commissioner, Bharaich, Oudh, are retiring from the Service—Col. Nembhard on a pension of £365 per annum, with an additional annuity of £325 7s. per annum from March 31, and Col. Steel on a pension of £465 5s. per annum, with the capitalized value of the additional annuity, viz., £5,143, from March 15.

Surg.-Major T. Duka, Bengal Medical Department, is retiring from the Service on a pension of £220 per annum from the 22nd inst.

The Secretary of State for India has ruled that officers of the Staff Corps and Indian Army selected for admission to the Staff College, Sandhurst, who may hold appointments with native regiments, shall be seconded for the whole period of their absence from regimental duty.

The Madras correspondent of the *Pioneer* writes:—"Our popular chief, Lieut.-Gen. Sir Neville Chamberlain, has been—indeed, I fear I must say is—very seriously ill from an attack of diarrhœa, which, being neglected, turned to something very like cholera. It is hoped that he has fairly turned the corner, though he still remains sadly weak. *On dit* that one of the evil effects of the hard service Sir Neville has seen is to render him very unlike the reaping folk whom Horace congratulates with a *gourmet's* envy, and that it is quite on the cards that he will treat this attack as an admonition not to be disregarded, and retire from the country. We shall all be very sorry if this should come about, for though our new chief has not been very long amongst us, he has made himself much liked, and we are, beside, somewhat proud of him. Out of compliment to him there has been a suspension of cold weather gaiety for the last two or three days, and the dinners, balls, and what-not have been put off. Not that we are capable of much gaiety in these times, nor is our weather at all cold as it ought to be, the nights especially having been unpleasantly close this past week."

The Queen has been pleased to appoint Surg.-Major V. S. Gouldsbury, M.D., C.M.G., to be Administrator of the Government of her Majesty's Settlement on the Gambia.

Messrs. Siebe and Gorman, submarine engineers, write:—"In Monday night's discussion upon the question of raising the Vanguard, the Government divers are spoken of as being shallow-water divers. This idea is entirely erroneous. In our presence the Sheerness and Portsmouth trained men have descended in 120ft. of water, and remained for a considerable time. The men in a very short space of time would be quite accustomed to the depth at which the Vanguard is sunk; but, the difficulty to be overcome was the quantity of loose wreckage, wire ripes, &c., combined with a strong current. That is simply why the Government divers could not remain any length of time at work. The Whitstable divers are constantly working at depths varying from 90ft. to 130ft., sending cargo out of ships' holds, but, of course, the men are trained *for* deep water, and while diving regulate their diet."

SPECIAL NOTICE.

TO THE NOBILITY AND GENTRY.

WM. PUGH (many years coat cutter at Messrs. Poole's, Savillerow), having succeeded to the old-established first-class business of Jackson and Co., 5, CORK STREET, BOND STREET, W., solicits the patronage of the nobility and gentry.

Best trade only at fixed fair prices, and 10 per cent. allowed for prompt cash.

N.B.—All first-class tailors give credit, and it is only by the discount system noblemen and gentlemen who pay cash get the full value ready money entitles them to.

WM. PUGH (from Poole's), 5, CORK STREET, BOND STREET, W.

SCHWEITZER'S COCOATINA

Anti-Dyspeptic Cocoa or Chocolate Powder

Guaranteed Pure Soluble Cocoa, Without Sugar, Spice or any Admixture.

Specially adapted for Ships, Camps, Sportsmen, &c., being in a concentrated form, made with BOILING Water. Keeps in all climates, and palatable without milk.

Being all Cocoa, it is four times the strength of preparations mixed and therefore *weakened* with arrowroot, &c., and is in reality cheaper a Tea-spoonful to a Breakfast Cup costing less than a halfpenny.

The Faculty pronounce it "The most nutritious, perfectly digestible Beverage for Breakfast, Luncheon, or Supper," and invaluable for Invalids and Children.

Highly commended by the entire Medical Press.

In air-tight canisters at 1s. 6d., 3s., &c., by Chemists and Grocers.

The above Wines are constantly supplied to HER MAJESTY'S GOVERNMENT, REGIMENTAL MESSES, and to OFFICERS OF THE HIGHEST RANK in both Services.

SPECIAL NOTICE.—MARCOVITCH and CO., Manufacturers of the celebrated PELLEGRINI, VANITY FAIR, and CZAREWITCH (mouthpiece) CIGARETTES (by appointment to H.R.H. the Prince of Wales and H.I.H. the Czarewitch of Russia), beg to inform their numerous customers and the public in general that they have received the finest Turkish Dubec growth of Yenidge that has ever been imported into this country. It is only owing to the want of money by the Turkish merchants that MARCOVITCH and CO. have been enabled to get this tobacco.

The only Manufacturers in England who deal solely in Turkish Tobacco and Cigarettes.

Address—11, AIR STREET, REGENT STREET, LONDON, W.

NOTICES TO CORRESPONDENTS.

No communications can be published which are not accompanied by the name of the writer, given in confidence to the EDITOR.

Letters cannot be received in answer to Advertisements.

Remittances should be made payable to Mr. RICHARD JAMES WOOD, to whom all business communications should be addressed.

REAL ECONOMY.—We find that there are twenty-two vacancies and there are twenty-four candidates to fill them. The insertion of your letter would do harm rather than good, but you will observe that we have drawn attention to the evil.

FURIOUS.—Why endeavour to encourage ill-feeling? It is bad enough to be given such convincing proof that this unfriendliness exists.

R. A.—The difficulty in obtaining good stewards is undoubtedly great, and your want of success is *remarkable*. Possibly you have advertised in a paper which is not much seen at the ports.

NEMO.—The want of space was the only cause of your letter failing to appear, and the matter has now been fully discussed in the recent naval debate.

X.X.—5th Royal Middlesex Militia.

INNISKILLING.—No such list has appeared.

Army & Navy Gazette.

LONDON, SATURDAY, MARCH 17, 1877.

Monday was essentially a naval night in the House of Commons, no fewer than half-a-dozen debates on different subjects of considerable importance to the Service having taken place during the evening. Satisfactory as it may be to see naval affairs thus attracting the attention of Parliament, yet it is to be regretted that they should be so crowded into one night, for many who would otherwise be willing to give attention to these subjects are often driven away from the sameness of the questions raised—questions with which they can have but an imperfect knowledge. Mr. Goschen protested against the wearisome manner in which certain members brought forward motions year after year, delayed the statement of the First Lord of the Admiralty, and cleared the House. As he remarked, no man went to see the same piece performed at a theatre night after night, and members of the House could not be expected to stand the same wearisome iteration of the same speeches lamenting the decline and decay of the British Navy. When Mr. Hunt was given the opportunity of introducing his Estimates he was received with cheers, for it has been generally acknowledged that the Navy Estimates for the coming financial year, and the progress made in the now expiring one in the direction of strengthening the Fleet, give satisfaction. As we remarked last week, Mr. Hunt has on this occasion a double success, inasmuch as he is enabled to ask for a reduced sum, feeling that the state of the Service renders such a course perfectly safe, and can also propose to increase the pay of certain branches of the *personnel*, thus adding to that contentment which goes hand in hand with efficiency. It was explained that the net estimated cost of the Navy for 1877-8 was £10,885,892, the net decrease on those of the present financial year being £309,043. Then followed a most interesting statement of the building and repairing work undertaken during the term of office of the present First Lord. In the last three years 54 ships, excluding the smallest class, have been laid down, 4 being ironclads, and 47 others for fighting purposes. Of these, 13 are corvettes, 8 sloops, 4 gun-vessels, 21 gunboats, and 1 torpedo-boat; and while six have been completed, twelve more are in a forward state. As regards tonnage of armoured ships built in the dockyards, it has been 28,800, and by contract 8,500. That is an amount equal to ten Vanguards, or seven Sultans, or eight-and-a-half Devastations. During the same period the tonnage of unarmoured ships added to the Fleet has been 29,000, 13,500 of which has been built at dockyards and 15,500 by contract. In addition to that, 31 sets of new boilers have been ordered, and new machinery to the extent of 92,340 indicated horse-power. With regard to repairs, new boilers have been put into 48 ships, and sets are being completed for 20 others. This must convince the most confirmed croaker that the money voted has been by no means wasted, and that the promises made by Mr. Hunt to clear the Navy of dummies, and to strengthen the fighting power of the Fleet, have been redeemed. The Alexandra has been commissioned. The Thunderer is ready for commission, though considerable delay took place in consequence of fitting her guns with hydraulic loading machinery, and also by the catastrophe that occurred on board. The Cyclops, Hecate, and Hydra, which were nominally completed some time ago, are now actually ready for sea. The Dreadnought, Temeraire, Shannon, Nelson, and Northampton will be completed in the coming financial year. Considerable progress has been made with the Inflexible, which will be ready for trial this year. The progress of the Ajax and the Agamemnon will, at the end of the present financial year, be advanced respectively 36·100 and 44·100. Mr. Hunt stated that last year his programme was practically fulfilled, and that this year it will also be so. With regard to the present year, Mr. Hunt objected to the fault which had been found on account of the great variety of the types of ships which the Admiralty is laying down. As regards the ironclads, he did not think that criticism, even if it were just, could be made in this case, because the ironclads proposed are of the Nelson class, and at Chatham another Agamemnon. It is also intended to lay down a ship of a kind that has never before been built, and which has been urged upon the Admiralty by the gallant veteran who stands at the head of the Navy, Sir George Sartorius, and Mr. Hunt remarked that for a gallant officer who has attained such years to propose such an invention shows that his mind must be youthful, even though his years are many. That ship is called a torpedo-ram. The designs are not yet completed, but she will carry armour, but no guns. She will carry torpedoes, and will prove a very formidable weapon, and may be considered, in the opinion of the Admiralty, a sort of rival to those monster ships with tremendous armaments that we hear of as being likely to be built by foreign Powers. The detailed programme of ship-building and repairs given by us last week was also explained to the House. In alluding to the navigating class, Mr. Hunt remarked that for some time there might be some little discontent, but in the course of a few years the transition will be effected and the difficulty overcome, and that, we suppose, is the best consolation to be offered to those who do not appreciate being left to die out. As regards the Engineers, those at present in the Service will receive additional pay, but we welcome most heartily the announcement that it is intended to endeavour to obtain officers for this branch from amongst those occupying a higher social position. This step has already been advocated in these columns, for we could not fail to see that all efforts to place Engineer officers, while entered as at present, on an altogether equal footing with other officers, must result in failure. Mr. Hunt now proposes to try the experiment of attracting to the Service persons in a higher social position, for he does not see why gentlemen should not send their sons into such an honourable profession. Greater care will be taken as to the candidates admitted to compete. It is suggested that £25 a-year for three years should be paid for their instruction, certain privileges are recommended for them in the dockyards, there will be a distinction made between them and the workmen, and Mr. Hunt promises to endeavour to make their apprenticeship as easy and as pleasant as under the circumstances it can be. The cause of the delay that has attended the production of a scheme for improving the position of the officers of the Royal Marines was satisfactorily explained away by the First Lord of the Admiralty, who must be acquitted of any want of readiness to come to the assistance of the gallant corps. No mention was made of the wretched position of the Assistant-Paymasters; but we trust the delay in dealing with their case will be but short. The other points upon which Mr. Hunt touched have already been dealt with in these columns, and we shall take an early opportunity of noticing other questions raised by members on important matters on Monday last.

At a recent meeting of the Commissioners of the Isle of Wight Highways, the clerk is said to have reported, in the case Hine *v.* Colonel Thring, R.A., that "the appeal against conviction for unlawfully obtaining toll of Colonel Thring, R.A., when on duty and driving his own dog-cart, the conviction had been quashed on the ground that the vehicle was not in her Majesty's Service. The costs would fall on the Colonel." As this is a question affecting many officers, perhaps some of our legal readers might feel disposed to enlighten the Army as to the law on the subject. The decisions have in many cases lately been very unsatisfactory, and we almost fear that officers have had good reason for complaining of inconsiderate treatment on the part of the magistrates before whom they have appeared.

It is much to be hoped that General Stephenson will not allow himself to be cajoled or bullied into the Dunstable Review against his better judgment. The ground is said to be ankle-deep in mud, and the season is too rude for men who are unprovided with great-coats. The expense is an excessive burden on regimental funds, amounting in many cases to one-sixth of the available income, and no compensating advantage is derivable. The Volunteers have nothing more to gain in public estimation, and their ranks are recruited without effort. The opinion of the commanding officers themselves is very divided, and nothing would better please a large proportion of the force than that the review should this year be countermanded, and a good march out organized in lieu of it.

If any had been hoping that it was the intention of the Secretary of State for War to abandon his position with regard to the now famous "Forage Circular," they are doomed to bitter disappointment. The document was a cruelly unjust one. The pay of regimental officers is quite small enough without the demands being made upon them which this circular imposes. To compel a man to keep a horse, and to give him only half the amount which, go he ever so economically to work, he has to spend upon it, is enough to make the most contented of individuals complain.

Major E. Maitland, Royal Artillery, is to vacate his appointment as Assistant-Superintendent of the Royal Laboratory, Royal Arsenal, Woolwich, on April 1. Major Maitland is to be succeeded by Captain J. F. Owen, R.A., at present Captain-Instructor, who will hand over his duties to Captain M. L. Porter, R.A.

The command of the Cork District, about to fall vacant by the transfer of Major-General Sir R. D. Kelly, K.C.B., to Colchester, is to be filled by Major-General H. Hamilton, C.B. General Hamilton joined Sir Hope Grant's column advancing to the relief of Lucknow in November, 1857; commanded a battalion of detachments in the skirmish before, attack, and capture of Bunterab, as also during the operations resulting in the relief of the garrison of Lucknow; commanded the 78th Highlanders during the occupation and defence for three months of the Alumbagh, and in the closing operations against Lucknow; was present at the affair of Galilee; served in the Rohilcund campaign in 1858, and commanded the 78th Highlanders at the capture of Bareilly (C.B., medal with two clasps, repeatedly mentioned in dispatches, thanked by the Governor-General in Council, also thanked in divisional orders by Sir James Outram "for judicious conduct when in command of the rear-guard on the occasion of retiring when bringing away guns captured from the enemy"). He joined the Army August 13, 1829, and became Major-General December 29, 1874, having previous to his promotion commanded the Brigade Depôt at Omagh.

Expectation with the concealed sword would appear to be rather high in the air just at present; we are, therefore, not yet in a position to advise selling the pasture to buy the horse. We do not, however, shake with fear, although rather a pale policy would seem to endeavour to divert our purposes. Our Army is small, but it hath a mighty heart; and we, fortunately, have no hollow bosoms to breed discontent.

Major Woods, 102nd Fusiliers, retains his appointment as Garrison Instructor at Dublin until June next.

So great is the popularity of Mr. Roger Goldsworthy, C.M.G., at Nevis, that the inhabitants have memorialised the Colonial Office to allow him to continue in his duties as President for a further term of twelve months.

Major-General Lord Alexander Russell has been appointed to succeed Major-General Parke, C.B., in command of the South-Eastern District. His Lordship served with the 1st Battalion Rifle Brigade in the Kaffir war of 1852-53 as Deputy-Assistant Quartermaster-General to the 1st Division, and was present at the battle of Berea (mentioned in General Orders, medal, and Brevet of Major). Served also in the Crimea from July 11, 1855, including the siege and fall of Sebastopol, and commanded the 1st Battalion from October 25, 1855, until the evacuation of the Crimea (medal with clasp, Brevet of Lieutenant-Colonel, Sardinian and Turkish medals, and 3rd Class of the Medjidie). He joined the Service July 11, 1839, and became Major-General March 28, 1874.

Captain C. L. Harvey, 71st Highland Light Infantry, Deputy-Assistant Quartermaster-General at Cork, succeeds Captain C. F. Clery, 32nd Light Infantry, transferred to Aldershot, as Deputy-Assistant Quartermaster-General at Irish head-quarters, and is succeeded on the Cork Staff by Captain E. J. Lugard, 4th King's Own. Captain Lugard served in the Abyssinian campaign with the Transport Train (medal). He entered the Army January 16, 1863; became Lieutenant, January 11, 1867; Captain, October 28, 1876; and passed out of the Staff College in December, 1874.

The Governors of the Drummond Institution for the Orphan Daughters of Soldiers, Chapelizod, Dublin, are anxious, if possible, to increase the number of children for which the Institution furnishes a home. But before this can be done a more certain income will have to be secured, the home being maintained now almost exclusively by the small subscriptions of those who are serving, or who have served, on the Staff in Ireland. If regiments could only be induced to contribute a few pounds annually from the canteen fund, they might rest certain that the money would be well laid out.

In most large garrisons it is the custom to invite all Staff and departmental officers doing duty in the district to meet the General officer at the "inspection dinner." Now the District Staff usually consists of ten to fourteen officers, and when it is borne in mind that all the officers of a regiment share alike in the matter of subscriptions towards the entertainment, the inability of the younger ones to keep their expenditure within bounds is scarcely to be wondered at. At Portsmouth, since 1874, it has been the invariable practice for the General commanding to go to mess at inspection dinners in a mess-jacket, the officers entertaining him being similarly attired; and he has allowed no one to be invited excepting his Aide-de-Camp. Nor has he stopped here. At his own request he has partaken of the every-day dinner and the usual wines; so that he has been able to make a really conscientious report to H.R.H. the Field-Marshal Commanding-in-Chief as to the expensive character or otherwise of the arrangements of the mess. It would, indeed, be well for the Service were the excellent example set by Sir Hastings Doyle more generally copied. When General Sir William Rowan commanded in British North America he used always to request his Aide-de-Camp to intimate to the mess president, on the occasion of his accepting an invitation to dine with a regiment, that he desired to see no champagne on the table. Why should not all General officers do the same?

Captain R. O. De Montmorency, 83rd Regiment, who has been employed for some time as Brigade-Major at the Curragh, succeeds Captain H. C. Sitwell, 91st Highlanders, as Instructor in Military Surveying at the Royal Military College. Captain de Montmorency, who passed from the Staff College in December, 1872, joined the Army July 17, 1863; became Lieutenant, November 10, 1865; and Captain, September 16, 1868.

The Instructorship of Tactics at the Royal Military College, vacated by Brevet Major Russell, 14th Hussars, has been given to Captain L. F. B. Cary, Rifle Brigade, Garrison Instructor at Colchester. Captain Cary served for five years in the Royal Navy, and was on board H.M.S. Albion with the Black Sea Fleet in 1854-55, including the bombardments of Sebastopol on October 17, 1854 (medal with clasp and Turkish medal.) Served, also, in the Ashantee campaign of 1873-74. He entered the Army February 22, 1858; became Captain, February 3, 1872; and passed from the Staff College in December, 1868.

The pay of Militia Adjutants has been assimilated to that of Captains of the Line, and a vote in the Estimates for 1876-77 was understood to have been taken in order to extend this arrangement to Adjutants of Volunteers; but this has not been done yet. Why the delay?

The Volunteers have gone on increasing in numbers and efficiency in spite of the absence of any additional encouragement, but the growing desire for a week's training in camp each year deserves to be fostered. As the cost seems to be found too much for the funds of most regiments, it would, perhaps, be a wise and acceptable measure to give free rations to regiments while under canvas, instead of the present small grant of 2s. 6d. per head, which is quite inadequate. If this were done there would, we believe, be very few Volunteer battalions which would not avail themselves of the advantages of a week's continuous drill and instruction.

The Navy.

GAZETTE.

ADMIRALTY, March 10, 1877.

In accordance with the provisions of H.M.'s Order in Council of Feb. 22, 1870, Depty. Inspr.-Gen. of Hospitals and Fleets Thomas Nelson, M.D., has been placed on the Retired List from the 29th ult., with permission to assume the rank and title of Inspr.-Gen. of Hospitals and Fleets from the same date.

March 13, 1877.

Royal Naval Artillery Volunteers—Brighton Corps—Athol Archibald Wood Johnstone, Esq., F.R.C.S., to be Hon. Surg.; March 13, 1877.

March 15, 1877.

The date of the retirement of Depty. Inspr.-Gen. of Hospitals and Fleets Thomas Nelson, M.D., with permission to assume the rank and title of Inspr.-Gen. of Hospitals and Fleets on the Retired List, as notificed in the *London Gazette* of the 13th inst., has been altered to the 1st inst.

Royal Marines—The undermentioned promotions, dated March 10, 1877, have taken place in the Royal Marine Light Infantry, viz.:—Capt. and Brevet Major George Gregory to be Lieut.-Col., vice Butcher, retired under the provisions of H.M.'s Order in Council of Feb. 22, 1870; Lieut. R. D. Tully to be Capt., vice Gregory.

March 16, 1877.

Royal Naval Artillery Volunteers—Bristol Brigade—George Henry Thatcher, Esq., to be Hon. Lieut.; March 16, 1877.

APPOINTMENTS.

Captains—F. I. Thomson, to the Royal yacht Victoria and Albert, vice Campbell, deceased; J. P. Fisher, to the Bellerophon, vice Thomson.

Commander—James Brown to the Vernon, additional, for torpedo instruction.

Lieutenant—Hon. Francis Spring-Rice, to the Osborne, for temporary service.

Fleet Surgeon—George F. Augustus Brew, to the Audacious.

Surgeon—William Brown, to the Industry.

COASTGUARD.

The following appointments have been made in the Kingston District:—Mr. John Hourihane, acting chief officer to Dunny Cove Station; Michael Keane and James Donevan to be chief boatmen in charge.

ACTIVE, Commodore Sir William N. W. Hewett, K.C.B., left Table Bay on Feb. 8 on her way to England, and arrived at St. Helena on Feb. 21, and Madeira on March 15.

ALEXANDRA, Capt. R. O'B. Fitzroy, with the flag of Vice-Admiral Hornby, arrived at Gibraltar on the 10th inst., and was to sail on the evening of the 12th for Malta.

ASSISTANCE, Capt. F. M. Prattent, arrived in Plymouth Sound on Wednesday morning from Sheerness, and landed a portion of No. 3 Bat. Depôt Brigade Royal Artillery, under the command of Major R. O'Hara. The Assistance left in the afternoon for Queenstown. She proceeds to Liverpool to embark the 1st Batn. 22nd Regt. for Queenstown, where she embarks the 77th Regt. for conveyance to Belfast, to relieve the 94th Regt., which she will take to Liverpool. She then returns to Portsmouth to commence a fresh series of reliefs.

AVON, Com. L. C. Keppel, has been up to the Congo. Private letters state that on Jan. 2, Com. Keppel went away in the boats to punish some natives who had been plundering an American schooner, called the Joseph Nickerson, recently cast away in the neighbouring Point. Their guilt having been established by evidence, five villages were burned down. The boats were repeatedly fired on by the natives, but no one was hurt, though the boats had to pull up a narrow creek some distance.

BOXER, Com. A. H. Alington, left Plymouth Sound on the 13th inst. for the West Coast of Africa.

COCKATRICE, Com. A. J. Musgrave, will replace the Rapid at Constantinople.

CONTEST, Lieut.-Com. G. W. Allen, arrived at St. Helena on Feb. 23 to recruit.

COQUETTE, Lieut.-Com. E. Shirley, was at Malta on March 6.

CRUISER, Com. J. Hext, arrived at Malta on the 6th inst.

DAPHNE, Com. G. B. Evans, was inspected at Bombay on Feb. 13, and left the same day for Muscat and service in the Persian Gulf.

DEVASTATION, Capt. F. W. Richards, left Salamis Bay for Corfu on the 21st ult.

EUPHRATES, Capt. W. H. Cuming, arrived at Malta on the 4th inst. from England, and proceeded the day following for Suez, which place she left again on the 12th inst. for Bombay.

EURYDICE, Capt. Hare, is, says the *Hampshire Telegraph*, to have a general mess on the same system as adopted in the troopships. At first the Admiralty refused, but on reconsidering the matter their Lordships have been pleased to grant the application, and to yield to the arguments set forward by Capt. Hare. There can be no doubt that where there are no mere boys, in the way of naval cadets, the abolition of the gun-room mess is an unmixed blessing. By the establishment of one mess a much better table can be kept at a lower rate than if divided, and the disadvantages of having all the junior officers crowded together without any check upon them are removed. If the young gentlemen were first sent to sea in training ships, under special supervision, and were not transferred to regular sea-going ships until they had reached the age of eighteen, they would then be qualified to join the general mess, and many a youngster would be kept straighter, from the fact of being under the eye of his seniors.

EXCELLENT, Capt. F. A. Herbert. It is stated that Capt. E. H. Howard, who has just completed a term of service as Naval *Attaché* to the Courts of Europe, will join the Excellent shortly as additional.

FLYING FISH, Com. H. F. Crohan, returned to Zanzibar on Jan. 5, after a short cruise south to the Comoro Islands.

HERCULES, Capt. Bowden-Smith, flagship of Admiral Hon. Sir J. Drummond, was at Malta on March 6.

HELICON, Lieut.-Com. Stopford, was at Malta on March 6.

HIMALAYA, Capt. E. White, arrived at Penang on March 12, and would sail on the 13th for Rangoon.

IMPLACABLE, Com. C. E. Cardale. On Monday afternoon as a lad named Johnston, whose friends reside in London, was carrying some articles down the ladder, he tripped his foot, and fell headforemost a considerable distance below. When picked up he was found to be severely injured, and was immediately removed to the Royal Naval Hospital, where, however, he died soon after his admission. Deceased had not long joined the ship, and was a bright, intelligent, and well-behaved young sailor.

INDUSTRY, Staff Com. Dyer, was inspected at Devonport Dockyard on the 13th inst. by the captain of the Steam Reserve and dockyard officers on being passed out of the Steam Reserve as ready for commission. She was commissioned on Wednesday for the West Coast of Africa.

JUMNA, Capt. J. D'Arcy, left Bombay on March 13.

LIBERTY, Lieut.-Com. C. Johnstone, arrived in Plymouth Sound during Tuesday night from Fayal.

LONDON, Capt. T. B. M. Sulivan. The London's boats have, says the correspondent of the *Western Morning News*, kept up their monthly routine in captures. On Dec. 28, not far from Cape Hay, in the east or ocean side of Pemba, Lieut. Mathews in the steam pinnace, successfully tracked and captured at Tumbe a slave dhow of 189 tons, securing the owner and part of the crew, but was too late for the slaves, which had been landed and disposed of before his arrival.

LYNX, Com. F. M. Ommanney, is reported to have been at Madagascar on Jan. 20.

MALABAR, Capt. E. Kelly, arrived at Suez on the morning of March 14, and left Port Said on the 16th.

MALLARD, Lieut.-Com. Warry, was at Whydah on Feb. 2.

MONARCH, Capt. M. C. Seymour, left the Piræus for Malta on March 4.

OSBORNE, Com. H. L. Pearson, sailed from Portsmouth on Thursday afternoon for Gibraltar and Brindisi. She will proceed to Malta to receive the Duchess of Edinburgh for passage to Villa Franca.

PALLAS, Capt. Beamish, has gone to Smyrna to relieve the Hotspur.

RALEIGH, Capt. G. Tryon, C.B., left Malta on March 5 for Palermo to remain there during the visit of the Duke and Duchess of Edinburgh.

RAPID, Com. E. C. Drummond, arrived at the Piræus on March 3 on her way to Malt.

READY, Com. S. Grove, arrived at Sheerness on Wednesday from the South-East Coast of America, to pay off. She was commissioned at Chatham on April, 15, 1873, and left Plymouth on May 18, arriving at Madeira on May 29, and on July 4 at Rio de Janiero, where she relieved the Pert. On Aug. 9 she sailed for the River Plate, calling at Santa Catherina, and was employed in the rivers Parana and Uruguay until Feb. 9, 1874, when she returned to Monte Video. Since that time she has been principally employed in the River Plate, during the frequent revolutions which take place in the neighbouring republics. On July 26, 1876, orders were received to proceed to Gibraltar, on the arrival of the Foam, but owing to the detention of the latter vessel on the coast of Africa, the Ready did not sail until Dec. 30. She arrived at Ascension on Jan. 29, 1877, and on Feb. 16 at St. Vincent, where orders were received to proceed to Plymouth. She arrived at Fayal on Feb. 28, and left for Plymouth the following day. There have been several changes amongst the officers and ship's company during the commission, and only four of the original officers return in the ship, namely, Staff-Surgeon W. J. Inman, Nav. Sub-Lieut. F. J. Atkinson, Assist.-Paymr. E. P. Rimell, and Boatswain W. E. Lediard.

RINGDOVE, Com. U. C. Singleton, left Malta on Feb. 26 for Devonport to be paid off. She arrived at Gibraltar on the 11th inst., and was to leave the day following.

ROVER, Capt. T. Barnardiston, was put out of dock at Bermuda on Feb. 15, and would be out of the dockyard hands on March 7.

RUPERT, Capt. H. J. Grubbe, C.B., was at Malta on March 6.

SEAFLOWER, Lieut.-Com. R. H. Eyre, arrived in Plymouth Sound, from Fayal, on the 13th inst.

SERAPIS, Capt. G. D. Davidson, arrived at Bombay on March 13. The *Hampshire Telegraph* states that Mr. Shearman, chief engineer of the Serapis, has had conveyed to him their Lordships' opinion that the circumstance of that ship having run 12,000 miles without requiring any repairs to engines or boilers is highly creditable to those in charge of the engines.

SHAH, Capt. F. G. D. Bedford, was to leave Monte Video for the Pacific on the 10th inst.

SIMOOM, Capt. R. G. S. Pasley, left Sierra Leone on the 4th inst. for Barbados.

SIRIUS, Capt. G. L. Sulivan, was at Quittah on Feb. 2.

SPARTAN, Capt. R. E. Tracey, left Zanzibar on Jan. 15; she left Seychelles on Jan. 27, and arrived at Bombay on Feb. 17.

SPITEFUL, Com. A. T. Powlett, has been ordered to Sierra Leone.

SQUIRREL, Lieut.-Com. R. N. Hamond, arrived at Plymouth on the 12th inst.

SULTAN, Capt. H.R.H. the Duke of Edinburgh, was at Malta on March 6.

SUPPLY, Staff Com. F. Inglis, was at Whydah on Feb. 2.

SWINGER, Lieut.-Com. E. A. Bolitho, was docked at Kourloom on Jan. 27, and returned to her moorings on Jan. 31, and commenced dismantling preparatory to paying off and recommissioning.

SYLVIA, Capt. H. St. John. Com. B. W. Bax arrived at Hong Kong by P. and O. mail steamer on Jan. 31 to supersede Capt. H. C. St. John, whose term of service has expired.

TAMAR, Capt. W. H. Liddell, arrived on the night of the 10th inst. at Gibraltar, and would proceed to Malta at noon on the 11th inst.

THETIS, Capt. T. Le H. Ward. A Reuter's telegram, dated Malta, March 13, says:—"Her Majesty's ironclad Sultan returned here to-day, and the steam tug escorting her yesterday, from an unsuccessful search after her Majesty's steam corvette Thetis, which has been reported 200 miles south-east of Malta with her machinery disabled and short of provisions. The Sultan will probably leave again to-morrow and resume the search."

THISTLE, Com. E. B. Pusey, arrived at Shanghai on Jan. 22 from Nagasaki. The *Rising Sun*, of Nagasaki, says her departure was unexpected, and in obedience to urgent orders received from the admiral late the previous evening.

TOURMALINE, Commodore F. W. Sullivan, C.B., was at Simon's Bay on Feb. 12.

TYRIAN, Lieut. A. H. Duthie, put into Aberdeen on Thursday morning with bowsprit carried away and other damage, having been in collision with the schooner Vigil, of Banff, the previous night. The Vigil was struck on the port side abaft the main rigging, the stroke starting her stanchions and bulwarks and damaging the planking down to the water's edge.

UNDAUNTED, Capt. H. W. Brent, flagship of Vice-Admiral Sir R. Macdonald, was at Bombay on Feb. 19.

VALIANT, Capt. N. Salmon, V.C., arrived at Plymouth on the 11th inst. It is satisfactory to learn that the fever on board this ship has been of a very mild type. No case of typhoid has appeared since Jan. 12. It is hoped that the fumigation to which this vessel is now being subjected will entirely eradicate the disease.

VALOROUS, Capt. L. F. Jones, is to convey a navigating party and stores to Barrow-in-Furness, to navigate to Devonport the new four-gun screw composite gunboats Forward and Foxhound.

VESTAL, Com. H. Hand, was to leave Aden for Jeddah on Feb. 15; she would take provisions for the Fawn at Mussawa.

VULTURE, Com. H. H. Washington, arrived at Malta from Plymouth on the 27th ult., on her way to the East India Station.

WIZARD, Lieut.-Com. C. Doxat, was at Zante on the 5th inst. on her way to Malta.

AN AMERICAN ARCTIC EXPEDITION.

The House Committee on Naval Affairs of the American Congress have presented a report strongly in favour of the equipment of an expedition to the Arctic Seas. The committee say that the object of the Bill referred to them is so interesting and important in its character that they have, while not neglecting to consider it with reference to its results to science and commerce, availed themselves of all information accessible, and called into requisition the testimony of experience and learning. They discussed the inquiry whether, under the constitution or otherwise, to fit out an exploration such as is contemplated would be an appropriate and legitimate function of the Government; and, if so, whether the nation would get value received for the expenditure incurred and the perils to which its citizens would be exposed. They review the results attained from the various exploring expeditions which, from time to time, have been organized and dispatched to the Arctic Regions, and express grave doubts as to the chances of future success in the enterprise if continued upon the plans heretofore followed. They think that to render success assured, the men and the vessels must be near the channel by which the North-west Passage is to be reached at the fortunate hour, and prepared to take prompt advantage thereof. Polar colonisation is represented to be the plan suited to the exigency. This plan requires a colonisation party of at least forty hardy, resolute men, enlisted in the United States for such service, provided with supplies for at least three years; a strong, substantial building transported on ship-board, and the principal depôt to be in Lady Franklin Bay, between 81 deg. and 82 deg.; or, if possible, as high as Cape Union, between latitude 82 deg. and 83 deg.; the United States' vessels to be only used for transporting men and supplies to the location of the colony, and to make annual visits thereto with fresh supplies and keep the colony in communication with the outside world; military discipline to be enforced by officers selected for their fitness for the duty, &c.; an astronomer and two or more naturalists to be selected by the National Academy of Sciences, and one or more members competent to make meteorological observations. The region proposed for the colony abounds in coal, and in fish, and game, and never before, the committee say, has an opportunity offered so promising in its results as now presents itself. The committee review what has been and is being done by various foreign nations to attain the desirable ends sought by the exploration in question, with a view to advance in scientific discoveries. They say there is scarcely a natural science but would be enlarged and utilized by proper observations in the Polar seas. Natural forces there are subject to extreme conditions, and consequently produce phenomena not seen elsewhere, which serve to reveal the character of the forces themselves. Wonderful already are the discoveries made in each field of inquiry noted; but we are yet in the vestibule—the region of the unknowable is just beyond. The committee are of the opinion that to reach the ends desired a complete change of operations must be had, and this change is effected in the Bill before the House, and meets the exact needs. Boards of trade and chambers of commerce are now, through memorials, invoking the National Legislature to renew the honourable work. The cost is slight; the ends arrived at will provoke no intelligent opposition. The methods proposed are not experimental, but the product of experience. They have the sanction and even the warmest commendation of all scientific men of all nations. The supervision of the National Academy of Science will ensure wise provisions and safeguards against accident, disease, or failure. Dr. Hayes, the eminent and successful Arctic explorer, coincides fully with the views expressed by the committee, as also do others familiar by actual experience. Their letters are so conclusive that the committee make them a part of their report. The committee conclude by saying:—"The honour of the American name is involved. Will Congress suppress this jealous spirit of inquiry and adventure, or give it scope by the passage of this Bill and a meagre appropriation of 50,000 dollars? To us it appears there should be but one answer, and, therefore, we report back the Bill with the recommendation that it do pass."

The House of Commons has ordered a return of the total number of naval cadets who had been trained on board her Majesty's ship Britannia since that ship had been stationed at Dartmouth up to Jan. 1, 1877, specifying the total number of officers and their rank in the Naval Service; the total number who had died, who had been invalided, who had resigned the Naval Service, how many had left or had been dismissed or discharged, with the cause, together with the total number who had been unable to pass their examination, and the total number on the sick list each year.

FURNISH ON THE NEW HIRE SYSTEM.—The "New Hire System" is quite distinct from anything yet attempted. Houses furnished throughout. 20 Wholesale Houses to select goods from. "An excellent idea."—"Army and Navy Gazette." Prospectus, with Press opinions, post-free. General Furnishing Company—Offices, 9, Southampton-street, Strand.

PENSIONS FOR GOOD AND MERITORIOUS SERVICES.

The following is an official record of the services of officers who have been granted Good Service Pensions during the past year :—

Admiral Sir George St. Vincent King, K.C.B., entered the Navy Feb. 8, 1822; became lieut., Jan. 15, 1830; commander, Aug. 8, 1834; capt., Aug. 28, 1841; rear-admiral, April 4, 1862; vice-admiral, March 20 1867; admiral, April 20, 1875. As captain, has served in command of H.M.S. Leander, Rodney, and St. Jean d'Acre, on the Mediterranean station, from June, 1852, to Nov. 7, 1856, and of the Princess Charlotte, on the East India and China station, from April 23, 1857, to April 18, 1858. While captain of the Leander, was mentioned in *Gazette* (Nov. 5, 1854) as present at defence of Eupatoria, and was mentioned in high terms in despatches for his services on that occasion. While captain of the Rodney he served in the trenches before Sebastopol from April 14, 1855, to July 9, 1855, and was awarded the Companionship of the Bath for such services in July, 1855. In December, 1856, he was appointed Naval Aide-de-Camp to the Queen. As flag officer, he served as commander-in-chief on the East India station from Feb., 1864, to Jan. 17, 1865, when he was transferred to the command of the China station, with temporary rank as vice-admiral; he continued in command of that station until 1867, striking his flag on July 31 of that year, and receiving the expression of the satisfaction of the Board at the manner in which he had conducted the duties of so extensive a station. Sir George King was advanced to be Knight Commander of the Bath in May, 1873, and holds the Legion of Honour and the 3rd Class of the Order of the Medjidie for his war services. He has upwards of twenty-one years' service as a commissioned officer.

Capt. George Augustus Cooke Brooker entered the Navy May 22, 1846; became lieut., June 11, 1852; commander, Jan. 9, 1856; capt., April 15, 1862. In April, 1852, while mate of H.M.S. Superb, the commander of that ship reported him to the Board with the highest praise for his conduct and abilities. In June, 1852, he was specially promoted to the rank of lieutenant on account of the creditable examination he had passed at the Royal Naval College. In March, 1855, while lieutenant of the Bittern, Rear-Admiral Sir James Stirling reported his very creditable conduct while engaged in the suppression of piracy. On Jan 11, 1856, he was gazetted for gallantry in operations against Chinese pirates, and was specially promoted to the rank of commander for such services, with seniority of Jan. 9, 1856. While commander of the Inflexible was gazetted (Feb. 16, 1858) as taking part with naval brigade in assault on and capture of Canton, and was again gazetted with high praise for his services at the destruction of a Chinese piratical fleet. As captain, has served in command of H.M.S. Wivern from October 22, 1867, to Aug. 26, 1868; of the Scorpion from Aug. 26, 1868, to Dec. 31, 1869; and of the Egmont (receiving and store ship at Rio) from July 25, 1871, to Dec. 31, 1874. Capt. Brooker has upwards of nineteen years' service as a commissioned officer.

Capt. John Bythesea, V.C., entered the Navy Dec., 1841; became lieut., June 12, 1849; commander, May 10, 1856; capt., May 15, 1861. In Jan., 1856, when lieutenant in command of Locust (Baltic), Rear-Admiral Sir Charles Napier reported a gallant and successful secret service performed by him in seizing the enemy's mail bags; for this service he was awarded the Victoria Cross (*vide Gazette* of Feb. 24, 1857), and specially promoted to the rank of commander. In Jan., 1859, when commander of the Cruizer, Rear-Admiral Sir M. Seymour reported his zeal and ability in releasing the Furious and Cruizer from the Yang-tse-Kiang. In Dec., 1859, he was thanked by the French Government for services rendered by him during services at Ning-po, and in Jan., 1861, Rear-Admiral Sir James Hope reported the zeal and ability displayed by him as commander of the Cruizer in the survey of the Gulf of Lia-tung. In Feb., 1862, he was selected by the Board to sit on the commission for enquiring into the state of the defences of British North America, and in Dec., 1862, the Board expressed their satisfaction at the care and ability with which he had drawn up the report on the naval yards, &c., of the United States. In April, 1865, he was appointed Naval Attaché at Washington, and received the thanks of their Lordships in June, 1866, for the very satisfactory manner in which he had performed the duties of that appointment. As captain, he served in command of H.M.S. Phœbe from May, 1867, to Nov., 1870, and of H.M.S. Lord Clyde from Sept., 1871, to May 26, 1872. In Nov., 1873, he was appointed Consulting Naval Officer for the Marine Department of the Government of India, which appointment he still holds. Capt. Bythesea has about twenty-three years' service as a commissioned officer.

Capt. John Dobree McCrea entered the Navy Aug., 1842; became lieut., Sept. 2, 1850; commander, May 10, 1856; capt., April 15, 1862. While midshipman of the Iris was gazetted for services in Borneo (Bruné). On Nov. 10, 1853, while lieutenant of the Alecto, Rear-Admiral Bruce reports his very creditable conduct in an expedition against Kosoko, late Chief of Lagos. On March 28, 1854, Capt. Kitchen reports the destruction of a slave vessel by Lieut. McCrea. In Aug., 1854, while lieutenant of the Penelope, was mentioned in despatches by Sir C. Napier as a most zealous and deserving officer, and was praised for conduct at Bomersund. On Aug. 20, 1855, while lieutenant of the Hastings, was gazetted as having been engaged in rocket boats at bombardment of Sweaborg, and on May 10, 1856, he was promoted to commander by the Board for such services. As captain, has served in command of the Favourite (Nov., 1867, to Aug., 1869); Prince Consort (Feb., 1871, to Nov., 1871); Bellerophon (Nov., 1871, to March, 1873); and Triumph, (from March, 1873, to Jan. 1, 1874), when he was appointed senior officer at Gibraltar, which appointment he still holds. Capt. McCrea has upwards of twenty-five years' service as a commissioned officer.

Capt. Norman Bernard Bedingfeld entered the Navy June, 1839; became lieut., Nov. 16, 1846; commander, Aug. 30, 1856; captain, April 15, 1862. Specially promoted to the rank of lieutenant for services while acting mate of the Dolphin, on the South-east Coast of America. In April, 1851, Commodore Fanshawe reported his good conduct while in temporary command of the Jackal, at the destruction of an African town in the River Benin. In March, 1854, Lord Clarendon reported his most judicious and praiseworthy conduct in endeavouring to establish peace between Lagos and Eppé, while lieutenant in command of the Pluto. In Jan., 1862, while commander of the Prometheus, Commodore Edmonstone bore the strongest testimony to his unceasing exertions, zealous conduct, and valuable services under very trying circumstances at Lagos; and the Foreign Office further expressed approval of his services on that occasion. In October, 1867, while captain of the Wasp, he gained the approval of the Colonial Office for the assistance rendered by him at Terang during a Chinese riot; and in December, 1867, he received the approval of the Board for services in suppressing piracy at Nicobar Islands. As captain, has served in command of H.M.S. Wasp, Gladiator (senior officer on the South-east Coast of America), Valiant, and Favourite, and is at present in command of H.M.S. Lord Warden, First Reserve ship at Queensferry, N.B. Capt. Bedingfeld has upwards of twenty-seven years' service as a commissioned officer.

Capt. John Clark Soady entered the Navy Nov. 10, 1842; became mate, Nov. 20, 1848; lieut., April 9, 1851; commander, Dec. 9, 1858; captain, Dec. 12, 1863. On July 23, 1855, when lieutenant of H.M.S. Magicienne, he was gazetted for service under fire against Vibourg. Was first-lieutenant of the Arrogant, at bombardment of Sweaborg, in 1855; and on Sept. 12, 1855, served in boats at the cutting out of Russian vessels from Kodoista. On Nov. 2, 1858, when serving in H.M.S. Magicienne, was gazetted with high praise for his conduct in a successful action with a Chinese piratical fleet in Aug., 1858; and he was specially promoted to the rank of commander for services at the destruction of a horde of Chinese pirates in Oct., 1858. As a captain, he has commanded her Majesty's ships Serapis, Pallas, and Invincible, and is now serving as captain in charge of the Steam Reserve in the Medway. He has about twenty-one years' service as a commissioned officer.

INSTITUTION OF NAVAL ARCHITECTS.

The following meetings will be held in the Hall of the Society of Arts, John-street, Adelphi:—On Thursday, March 22 morning at 12, and evening at 7 o'clock; on Friday, 23rd, special meeting at 11, general meeting at 12, and evening meeting at 7 o'clock; and on Saturday, 24th, morning at 12 o'clock only. Lord Hampton, G.C.B., D.C.L. (president), will occupy the chair.

At the morning meeting on Thursday, March 22, papers will be read and discussed—1. "On the Fighting Power of the Merchant Ship in Naval Warfare." By N. Barnaby, Esq., C.B., Director of Naval Construction of the Royal Navy, vice-president. 2. "On Citadel Ships." By E. J. Reed, Esq., C.B., F.R.S., M.P., vice-president. 3. "On Improved Ships of War and Defence against Torpedoes." By Michael Scott, Esq., C.E., F.R.S.E., member. And at the evening meeting at 7 o'clock—1. "On the Merchant Steamship of the Future." By J. Scott Russell, Esq., F.R.S., vice-president. 2. "On the Lengthening of the s.s. Poonah." By E. de Rusett, Esq., member. 3. "On the Self-Trimming Screw Collier." By W. Denton, Esq., member.

On Friday, March 23, at 12 o'clock—1. "On the Results of Experiments upon the Effect produced by the Wave-making Resistance of Ships by Length of Parallel Middle Body." By W. Froude, Esq., M.A., F.R.S., vice-president. 2. "On Strains of Ships." By W. John, Esq., member. 3. "On Cast Iron, Wrought Iron, and Steel, considered in Relation to their Powers to Resist the Attack of Heavy Projectiles." By Commander Grenfell, R.N. 4. "On a New Naval Gun-Carriage." By Lieut. Raskaroff, Imperial Russian Navy. And at the evening meeting at 7 o'clock—1. "On Raising Sunken Ships." By Latimer Clark, Esq., C.E. 2. "On a Method of Recording and Comparing the Performances of Steamships." By J. Inglis, Esq., Jun. 3. "On Safety Valves." By J. Fortescue Flannery, Esq., member.

On Saturday, March 24, at 12 o'clock—1. "On a New System of Blocking, enabling the Heaviest Loaded Ships to be Docked with Perfect Safety." By Latimer Clark, Esq., C.E. 2 "On the Stability of Ships." By W. John, Esq, member. 3. "On Launching." By J. W. Shepherd, Esq., member. 4. "On Dredgers for the River Clyde." By W. Simons, Esq., member.

NAVAL PRIZE MONEY.

The distribution of tonnage and slave bounties awarded for the slave dhow Mansuri, and one slave, captured on Jan. 28 and Feb. 1, 1876, respectively, by H.M.S. London, commenced yesterday in the Prize Branch of the Department of the Accountant-General of the Navy, New-street, Spring-gardens, S.W. The following are the shares due to an individual in the several classes:—Flag, £11 14s. 5d; captain, £34; second class, £5 17s. 5d.; third class, £5 0s. 8d.; fourth class, £3 7s. 2d.; fifth class, £2 0s. 4d.; sixth class, £1 13s. 7d.; seventh class, £1 3s. 6d.; eighth class, 13s. 5d.; ninth class, 6s. 8d.

ROYAL NATIONAL LIFEBOAT INSTITUTION.

On Thursday the annual general meeting of the Royal National Lifeboat Institution was held at Willis's Rooms, the Duke of Northumberland in the chair.

His Grace, in opening the meeting, said the last year had been one of great calamity at sea, the gales had been most violent and frequent, and the result had been that the loss of lives had been considerable. The secretary would, however, have the pleasure of announcing to them that no less than 600 lives had been saved during the past year by means of this institution. They had to lament the disaster to the fishermen of Yarmouth in the North Sea, whereby about 200 lives were sacrificed. Misfortunes of that kind were, however, beyond the scope of the means of saving life possessed by this institution. At the same time he felt assured that he need not impress upon them the necessity of supporting it.

The adoption of the report was moved by Admiral Sir R. Collinson.

Admiral of the Fleet Sir George Sartorius, in seconding the resolution, called attention to the very gratifying circumstance that every year there are 12,000 men employed by the institution in its lifeboats, and that they are ready on all occasions of difficulty and danger to come forward voluntarily to save life at sea. He earnestly hoped that so great and national an institution would continue to win its way in English hearts. (Loud cheers.)

The following resolution was then proposed by the Earl of Erne, seconded by Mr. N. B. Downing, and carried unanimously:—"That this meeting, having learned with much satisfaction of the success which continues to mark the career of the Lifeboat Institution, trusts that renewed exertions will be made to support its committee and officers in its great and national undertaking; and particularly so in view of the fact that the institution has now under its management a noble life-saving fleet of 256 lifeboats, which necessarily involves a large annual outlay to maintain it in that state of thorough efficiency which matured experience and management indicate."

Admiral Sir Walter Tarleton then moved, and Captain the Hon. F. Maude, R.N., seconded:—"That this meeting has to acknowledge the continued brave and ever-active exertions of the coxswains and crews of the lifeboats, through whose laudable efforts, which were particularly conspicuous last winter, the lifeboats of the institution were the means of saving last year 515 lives from shipwreck."

Sir W. Tarleton said, that notwithstanding what had been said concerning the lifeboat-men, he must say one word concerning their wives and daughters, and on that point he spoke from experience. They were great women, for in the absence of their encouragement the noble deeds of which they had heard to-day in such eloquent terms would not in many instances be performed. He thought it was his duty to call attention to this important fact, as he felt sure that in acknowledging the encouragement given by the wives and daughters of our lifeboats' crews the men themselves would be fired afresh to renewed deeds of daring.

NAVAL ENGINEERS.

A copy of the report of the committee appointed in September, 1875, by the Admiralty to "consider the best means of securing the highest mechanical skill and scientific knowledge in the management of the various engines of her Majesty's ships of war, and the supply of engineer officers and engine-room artificers for her Majesty's Navy," has been received by the *Morning Advertiser*. The committee consisted of Admiral Sir Cooper Key, K.C.B., Captain Dowell, C.B., Captain Sir John E. Commerell, K.C.B., Mr. Wright, Engineer-in-Chief, Admiralty, and Mr. Oliver, Chief Inspector of Machinery Afloat, Portsmouth, on whose departure in October, 1875, with the Serapis, Mr. Covey, of Devonport, was added to the committee. The committee states that the evidence of 68 witnesses has been taken, including that of the General Inspector of Engineering Works of the United States' Navy, and that the motive power of our steamships has increased from 155,000 horse-power in 1855 to 458,000 in 1875. In addition to this, they say the vessels now "carry numerous engines for duties which, in former days, were performed entirely by manual labour. Indeed, a ship of war, with her powerful engines for propulsion, elaborate machinery for the steering gear and capstans, her guns and gun-carriages, and all her interior fittings connected with the various compartments, pumps, pipes, and valves forms one large and complicated machine." They declare that the present system, first established in 1863, for the practical and theoretical instruction of the engineer officers of the Royal Navy, is well suited to the objects in view, but they add that they have had to take into account "a defect of much importance, a defect which is recognised by nearly all the witnesses we have examined, and to which they bear decided testimony. It is that, notwithstanding the high education to be given, and the position in which the engineer officers will be placed on board ship as commissioned officers, a large portion of the candidates for entry as engineer students are sons of artificers of various grades in the dockyards, of seamen and marines, or of others belonging to the same class of society. As it is undoubtedly desirable that officers should be highly educated to perform the duties of naval engineers and hold the rank of commissioned officers, it is equally desirable that they should be in all respects fitted to take their place with officers of corresponding rank in ward-room or gun room messes. This evidently cannot be the case with the majority of the students lately entered." As a remedy for this defect the commissioners recommend more searching inquiry of the referees, and that "the students should pay a certain sum to defray in part the expenses of their education, as is the case in other branches of the Service and the custom in every other inlet to the profession of engineer." Students, the report adds, should be entered from 14 to 16 years of age, and should be examined on the first Tuesday in May in *writing from dictation (75 marks), *reading and parsing (75), *composition (100), grammar (150), translation from French to English (50), French grammar (100), geography (100), *arithmetic (250), algebra up to and including quadratic equations (300), and geometry (first six books of Euclid) (300), but none are to be passed who do not satisfy the examiners in the subjects marked with an asterisk. The students, entering July 1 at the dockyard, are to be put under practical instruction of a greater number of leading men than at present, and to be encouraged in practical work by small prizes. They should live in the dockyard, and be under the care of naval engineers of the Reserve, which would encourage parents from a distance to send their sons. The lads should be six years under instruction, and at the end of that time, on passing in the theory and practice, should be appointed to the reserves as acting assistant-engineers, and after three months join the Royal Naval College for a course of study. Then comes this proviso:—"Those who take first and second places at this examination should, provided they reach the standard of a 1st class certificate, and have previously passed a 'creditable' examination as workmen, be allowed the option of remaining at the college for further study during two sessions of nine months each. Those who obtain 1st class certificates should receive commissions dated the same day as their acting appointments. Those who obtain 2nd class certificates should receive commissions dated the same day as their acting appointments. Those who obtain 2nd class certificates should receive commissions dated six months after the date of their acting appointments, and those who obtain 3rd class certificates should receive commissions dated the day after their discharge from the Royal Naval College. The additional time given for 1st class certificates and 2nd class certificates to reckon in all respects as time served as assistant-engineers." The pay of acting assistant-engineers at the College should be 6s. a day, with 1s. 6d. per diem for mess expenses. The commissioners further recommend that "all engineer officers now holding, or who may in future obtain, 1st class professional certificates from the Royal Naval College, and officers who have taken the first place in each year amongst those who now hold, or may, in future obtain, 2nd class professional certificates, should be advanced to the rank of chief engineer after 10 and 13 years' service respectively. These promotions should in all cases depend on the officers having conducted themselves satisfactorily in every respect, and proved themselves thoroughly efficient in the performance of their duties. The above regulation should also apply to engineer officers who hold diplomas of the 1st class, and those who obtained the first place in each year amongst the 2nd class fellows of the Royal School of Naval Architecture." They further "think it desirable not to confine the entry of assistant-engineers entirely to the students who have been trained in the dockyards, and suggest that a limited number of young men who have received their education in private engineering firms be entered between the ages of 21 and 25, provided they pass the same examination, in all respects, as the engineer students who have completed their time at the dockyards. After their entry they should undergo the same course of study at the Royal Navel College, and receive the same pay and allowances as the assistant-engineers who have been trained as engineer students." As regards engineers now in the Service, "the committee are of opinion that in consideration of the important nature of their duties, the age at which promotion is obtained in other branches of the Service, the high educational standard now required, and the actual marketable value of the knowledge and skill the engineer officers possess, their prospects of promotion and the amount of pay they receive are insufficient." It is recommended that chief-engineers should be increased from 173 to 220, that engineers and assistant-engineers should be only 600 in number instead of 735, and that there should be 450 engine-room artificers in lieu of 290, as at present. Provision is also made for retirement of chief-engineers at the age of 50, engineers at 45, and assistant-engineers at 40; and it is recommended that the following should be the rates of pay and half-pay:—

FULL PAY.

	Year of 365 Days.	One Day.
Assistant-engineers under one year's service	£109 10 0	£0 6 0
Assistant-engineers over one year's service	136 17 6	0 7 6
Engineers	164 5 0	0 9 0
,, over three years' service	182 10 0	0 10 0
,, ,, six ,,	200 15 0	0 11 0
,, ,, nine ,,	219 0 0	0 12 0

HALF PAY.

	Year of 365 Days.	One Day.
Assistant-engineers	£82 2 6	£0 4 6
Engineers	100 7 6	0 5 6
— after three years' service	109 10 0	0 6 0

The members of the Navy Club dined together on Tuesday evening at Willis's Rooms, King-street, St. James's. Admiral Lord F. Gordon Hallyburton, G.C.H., presided, and Gen. Lord William Paulet was the guest. There were also present—Admirals Sir Rodney Mundy, K.C.B., Sir Henry Codrington, K.C.B., Sir Charles Eden, K.C.B., Lord Edward Russell, Erskine, Hon. Sir Henry Keppel, G.C.B., P. J. Blake, Oliver, Gordon; Vice-Admirals Sir Claude Buckle, K.C.B., Sir W. Tarleton, K.C.B., Hand, C.B., T. D'Eyncourt, C.B., Sir Edward Sotheby, K.C.B.; Rear-Admirals Willes, C.B., and Tatham, C.B., Houston Stewart, Boyle; Commander Sir John Heron Maxwell, Bart.; Capts. G. M. Buckle, R. Wells, A. Heneage, Martin, E. S. Adeane, Henry Stephenson, C.B., the Hon. E. Fremantle, Mayne, and Durant, and Com. Verney. The following officers were elected members of the Club:—Capts. Douglas Walker, R. S. H. King, Sir Lambton Loraine, G. R. Hope, E. St. J. Garforth, the Hon. Victor Montagu, and William Codrington; and Coms. Lord Ramsay, Sebastian Gassiot, the Hon. Edward Dawson, Lord Charles Beresford, and Edward Gye.

In a letter to the *Portsmouth Times*, Rear-Admiral Sir John E. Commerell, V.C., replies to some remarks made at the late Liberal banquet at Portsmouth by Mr. E. J. Reed, M.P., late Chief Constructor of the Navy. In the course of the letter Sir John says:—"If Mr. Reed would hold and advance his own arguments in a temperate manner no one would complain less than myself. But when he speaks in a sneering manner about the 'be-epauletted' and 'be-sworded' class caring for themselves alone and ignoring the claims of the engineers, he must expect an expression of opinion as good as, if not better than, his own. No class, sir, more than the executive desire a well-considered scheme of amelioration for the engineers, and a year ago a committee sat for the purpose. With respect to the superintendents of the dockyards, I contend that no others are so well suited to overlook as the men who know the requirements, nay, the necessities of ships at sea, men who belong to no particular branch, therefore have no undue preference, but who command the respect of all alike. Mr. Reed says that I accused him of never speaking well of an executive naval officer, and, in refutation, instances the case of an admiral superintendent, to whom he gives a most glowing testimonial. Now, sir, Mr. Reed in his letter to the *Times* accuses this officer of having done that which Mr. Ward Hunt and Sir W. K. Hall assures us he did not do, and I have no doubt the testimonial will be received and valued with just the same measure of respect that the recipient feels for Mr. Reed! I assert now, as I did before, that Mr. Reed never loses an opportunity of speaking disparagingly of the executive branch of the Navy, and if, as I have been informed by a friend of his, he entertains great respect for them, he has a curious way of showing it, and I can only ascribe it to a habit he has got into of saying hard things of us, while benevolently thinking quite the reverse."

To Ladies.—Spring Dresses, 4s. 11d. and 6s. 9d. (a factor's stock clearing out); also Black Cashmere, 1s. 11½d. per yard, 44in.; White Fancy Pique, 4s. 9d. 12 yards. Patterns free.—S. Amery, 7, High Street, Clapham, London, S.W.

FRENCH TORPEDO EXPERIMENTS.

Some interesting experiments have been made at Cherbourg with the little torpedo launch, much submerged, named the Thorneycroft, with the view of testing whether a torpedo could be launched against a ship in full sail. Admiral Jaurez ordered a disabled ship, the Bayonnaise, during a rather rough sea, to be towed out by a steamer, and a lieutenant was selected to make the experiment of launching the Thorneycroft against the Bayonnaise. Taking three men, he went down with them into the interior of the Thorneycroft, of which only a small portion, painted of a grayish colour, was above water. The torpedo was placed so as to project from the bow of the vessel. The towing steamer then took up its position in front of the squadron, and the Thorneycroft and Bayonnaise both got under way, when about three miles from each other. The steam-tug went at 14 knots an hour, going at full speed, in order to escape the Thorneycroft. The latter went at 19 knots an hour. The chase lasted about an hour, at the end of which time the distance between the Thorneycroft and the Bayonnaise had sensibly diminished, and the latter at the same time slacked speed to eight knots. It was feared, so the report states, that the lives of the lieutenant, Lemoinne, and his three companions were absolutely sacrificed. However, the two vessels got visibly nearer. All at once the Thorneycroft put on a last spurt, and struck the Bayonnaise with its whole force on the starboard bow. The sea was terribly agitated, a deafening report was heard, and the Bayonnaise, with a rent as big as a house, sank with wonderful rapidity. As for the Thorneycroft, rebounding by the shock about fifteen metres off, even before the explosion occurred, it went round and round for a few moments, and then quietly resumed the direction of the squadron. No trace remained of the Bayonnaise; it was literally swallowed up by the sea. The experiment was repeated two days later, under the same conditions, with another disabled ship, and with the same success; and, in the opinion of competent men, this is one of the most decisive torpedo experiments which have yet been made. The little torpedo boat resembles a small gray lizard, and is scarcely discernible in the water. It is evident that a single boat of this kind would be unable to approach an enemy's ship unless at dusk, or when it would be impossible to distinguish it at a distance, for had such an attack been attempted in broad daylight the Thorneycroft would manifestly have been knocked to pieces by the guns of the threatened ship before it could have carried out its project. On the other hand, it would be quite impossible for one, or even several ships, to defend themselves against a simultaneous attack, say by twenty or twenty-five Thorneycrofts.

The stories about "break-downs" which have appeared in the papers which receive information from the ports have been accepted as truth by too many, and Mr. Seely is amongst the number. I have been inquiring where he could have got hold of the idea that four cylinders of the Invincible were found to be cracked, and have traced it to a paper which would be surprised if it were told that its correspondents were not reliable. The fact seems to be that four new boilers have been ordered for that vessel from Messrs. Rennie, and these have been changed into cracked cylinders. I should think that the inventor of the yarn must be cracked. The boilers of the Invincible had done their work when she paid off, and that they should be removed and replaced by new ones has actually been made a charge against Admiralty administration.—London correspondent *Hampshire Telegraph*.

The Committee which has been appointed to inquire into the reorganization of the Admiralty Departments, with a view to the introduction, as far as possible, of the system recommended by the Playfair Committee, is to consist of Mr. Mills, of the Treasury; Mr. Hamilton, of the Board of Trade; and Mr. Vernon Lushington, of the Admiralty, with Mr. E. Swainson as secretary.—*Globe.*

The funeral of Com. C. W. Jones, R.N., late Director of the Imperial Naval College, Tokio, was attended by over 400 persons, who accompanied the remains of the deceased officer from his residence at Hanabusa Yashiko to the railway station, whence the body was conveyed by train to Yokohama. Here about 120 cadets and a large number of Japanese officers connected with the Naval College were drawn up four deep as a guard of honour. The coffin was placed on the carriage of a 9-pounder field-piece, and was drawn by eighteen gunnery instructors dressed in British naval uniform. The procession was headed by the Mikado's band playing the "Dead March" in Saul, then came the gun-carriage with the coffin, followed by the personal friends of the deceased officer, amongst whom was his Excellency Sir Harry Parkes. One hundred and twenty-five cadets, four deep, marched afterwards; then came a number of Tokio and Yokohama residents, and about thirty-five or forty Japanese officers. The rear of the *cortège* was brought up by a carriage, in which were seated Admiral Kawamura, Vice-Minister of Marine, and Admiral Nakamuda. At the French Hatober a firing party of forty sailors from the Modeste and a number of officers, including Capt. Buller, were waiting. On arriving at the cemetery the coffin was carried by eight of the gunnery instructors to the grave. The burial service was then read by the Rev. C. C. Shaw, of the S.P.G. Mission, Tokio, and the remains of the deceased were lowered to their last resting-place. The blue-jackets fired three volleys over the grave, and the procession dispersed. Com. Jones was only in his thirty-fourth year. He had been employed in the Naval College, Tokio, for the last four years, and greatly aided Capt. Douglas, whom he succeeded in the directorate, in the formation of that now efficient institution. A Japanese paper says:—"His unassuming kindliness of disposition had greatly endeared him to all who knew him, and his assiduity in the discharge of his duties had gained for him the respect of the Japanese officials of his own and other departments."

Epps's Cocoa—Grateful and Comforting.—"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected cocoa, Mr. Epps has provided our breakfast tables with a delicately flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—*Civil Service Gazette.* Made Simply with Boiling Water or Milk.—Sold only in Packets labelled—"James Epps & Co., Homœopathic Chemists, London."

THEATRES.

Drury Lane.—It is difficult to regard as a serious work the new drama by Mr. Henry Spicer, now being played here. Those who remember the *repertoire* of the old Coburg Theatre may take some interest in *Haska*, but for the modern playgoer it can have no attraction. This has been already seen from the absence of patronage. The play is built upon principles which have been exploded years ago by the salutary influence of burlesque. The heroine of Mr. Spicer's piece is a young damsel of uncertain parentage, who is persecuted by a wicked Count of Trannsylvania. The Count claims her as a serf, hangs her newly-married husband, and causes her to fling herself from a high window into a courtyard to escape from his snares. But Trannsylvanian people of the period seem to have been very tenacious of life, for later on in the action she is found alive and well, and actually leading an insurrection against her master. He by this time has found out that the supposed serf is his own sister, therefore he repents his evil deeds, and he reunites her to her husband, who has not suffered any more injury from his hanging than she from her fall. Such is the summary of a story which Mr. Spicer has thought fit to turn into a play, with a result which must be patent to any one. Even Mr. Creswick, good actor as he is, can do nothing with the Count, and all the ability and intelligence of Miss Leighton are wasted upon the thankless part of the heroine. The scenery is good; so is the grouping, in more than one sense, but here all praise for the work must cease.

Park.—The dramatic company, which has been recently travelling in the provinces, under the management of Mr. Lin Rayne, is now appearing at this theatre in a drama called *A Fight for Life*. This piece is founded upon a novel by Mr. Moy Thomas, which came to light some years ago in *Cassell's Magazine*. Great alterations have been made in the conduct of the story by the adapters, Messrs. Saville Clarke and Du Terreau, and the result is most satisfactory from a dramatic point of view. The construction of the play is worthy of all praise, the action being exceedingly clear and the situations uniformly effective. Mr. Lin Rayne plays the hero with skill and force. Mr. Langford gives a clever picture of a broken-down, drunken banker's clerk, and Miss Harfleur is a pleasing representative of the heroine. Miss Eva Ross-Church also leaves a very favourable impression by her rendering of an unsentimental young lady with a taste for repartee. The interest of the piece never falls off, and if it does not succeed at the Park the fault cannot certainly be laid at the door of either authors or actors.

St. James's.—This theatre has at last fallen upon prosperous times, the famous French play *The Danischeffs* having proved a great and deserved success. A comedietta, called *Extremes Meet*, has been added to the programme, and forms a very pleasant addition. The heroine is a charming young girl, who converts a confirmed mysognist from the errors of his ways in the most amusing fashion. The character is well played by Miss Kate Field, who is also responsible for the transfer of the trifle from the French to the English tongue.

Opera Comique.—Mr. Byron's well-known comedy, *Partners for Life*, has been played here during the week in the place of *The Prompter's Box*. Miss Hollingshead, Miss Litton, Mr. Maclean, Mr. Barnes and Mr. Terry, are in the cast, and the evening's entertainment is brought to a most agreeable conclusion by the latest burlesque from the pen of the same prolific author.

St. George's Hall.—The last novelty at the German Reed's is a musical piece called *The Foster Brothers*, written by Mr. Gilbert a'Beckett, to whose sprightly words Mr. Alfred Collier has composed some capital music. It is, in effect, a rattling musical farce, and is as well suited to the audience as it is to the clever company.

The Horse Guards and Admiralty have nominated a committee to inquire into the existing arrangements for communication between the two Services by signal, and the committee is instructed to prepare a code for use in both Services to supersede the distinct systems now in use.—*Standard.*

A telegram in the *Standard*, dated Madrid, Sunday, says:—"The British squadron, under Admiral Seymour, anchored in the Bay of Cadiz yesterday. The King is still delayed in the Balearic Islands by a storm. His Majesty will visit several ports in Andalusia before he reaches Cadiz."

It is stated that General von Stosch, the chief of the German Admiralty, has tendered his resignation, feeling hurt by some remarks of Prince Bismarck. Count Moltke is understood to have interposed with a wish to mediate.—*Morning Post.*

The efforts of Mr. Plimsoll appear at last to have aroused the latent energies of all those interested in maritime affairs, judging from the decided action which the Shipwrights' Company of London has taken in resolving to offer prizes for the best models of ships. The scheme embraces almost every important vessel, from the first-class steamer to the lowly river tug; in fact, for the best model of the latter, a special prize of £21 with the freedom of the Company is offered. The first prize, for the first-class steamer, is 50 guineas, a gold medal, and the freedom of the Company. The other prizes decrease in proportion to the class of the vessel. An exhibition of the models and drawings will be held in Fishmongers' Hall in May. Particulars may be obtained of the hon. sec., A. Sedgwick Woolley, Esq., Institution of Naval Architects, 20, John-street, Adelphi, London. The scheme has already obtained the support and patronage of the highest authorities in naval matters.

There have now been placed in the Marine Picture Gallery, in New Bond-street, in addition to other fine examples of the Danish School of Marine Pictures, Rasmussen's "Discovery of Greenland;" Sorensen's prize picture from Vienna, "Swedish Fisherboats in the North Sea;" Melby's "Summer Midnight in Iceland;" Rasmussen's "Discovery of America;" Carl Bille's "Atlantic Wave;" also Bradford's "Wreckers;" Bradford's "Arctic Sunrise in Melville Bay," kindly lent to the Arctic Gallery by James Ashbury, Esq., M.P.

The Brighton and Kemp Town Supply Association has been established to afford the residents and visitors at Brighton the facilities of purchasing goods upon the co-operative principle. The capital of the Company is £40,000, in 200,000 ordinary shares of £1 each and 4,000 preference shares of £5 each, but of the latter only 2,000 will be issued for the present. The preference shareholders will be entitled to a dividend of 5 per cent. per annum and to three-tenths of the net profits, after providing for this dividend, to be divided by means of a ballot at the end of each year, in certificates of £5 each, whilst the ordinary shareholders will be allowed to deal at the stores and participate in four-tenths of the net profits by £1 certificates. Sir Howard Elphinstone, Bart., is the Chairman of the Association, and the offices are at 126, St. James's-street, Brighton.

MUSKETRY INSTRUCTION.

In order to improve the target practice of the Army, and increase the interest taken in the annual competition by causing every shot in individual firing to directly influence both the figure of merit and the award of prizes, his Royal Highness the Field-Marshal Commanding-in-Chief has approved of the following alterations in musketry instruction, taking effect from the commencement of the ensuing course:—1. Trained soldiers will in future fire at the present authorised distances for individual firing, viz.:—From 200 to 800 yards, without any immediate classification. 2. To guard against an indifferent shot wasting both time and ammunition at the longer ranges, no soldier will be permitted to fire with his company and compete for prizes until, in a recruit's course, he qualifies as a first-class shot. 3. At the conclusion of the individual firing a classification will take place, when all men obtaining 120 points, and upwards, will be classified as 1st class; those scoring 80, but failing to obtain 120 points, as 2nd class; and those failing to obtain 80 points, as 3rd class shots. 4. The term "classes" is retained to define the distances and size of targets at which the practice takes place, and which remain as at present, the term "period" becoming obsolete, as far as the course for the trained soldier is concerned.

STAGNATION IN THE ROYAL ENGINEERS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I trust, through the medium of your influential columns, to draw the attention of the Secretary of State for War to the depressing stagnation now prevailing in the corps of Royal Engineers, in the hope that he will give the subject consideration with a view to the speedy issue of the Army Retirement Warrant, which is the only available means of meeting the difficulty. The present state of things is the harder to bear because the Engineers see their former comrades at the Royal Military Academy, the Artillery, giving them the go-by at an alarming rate, as the following figures will show. Taking the promotion for the two years 1875 and 1876, and excluding the old Indian establishments, we find the January Army List" showing:—R.A.—Promoted to lieutenant-colonel, 28; percentage of lieutenant-colonels, 30; promoted to major, 42; percentage of majors, 25; promoted to captain, 104; percentage of captains, 38. R.E.—Promoted to lieutenant-colonel, 3; percentage of lieutenant-colonels, 6; promoted to major, 4; percentage of majors, 5; promoted to captain, 23; percentage of captains, 17. The above figures speak for themselves, and it is easy to calculate the patriarchal age which some of the subalterns are destined to see unless some steps are taken to ensure a flow of promotion. Before the Committee on Army Retirement and Promotion, the late Deputy Adjutant-General, Royal Engineers, stated that there was "nothing to complain of" in the way of promotion so far as the Royal Engineers were concerned. That is surely an extraordinary statement, even though qualified as regards the subalterns. It is well known that there is abundant influence at work in high quarters to upset or delay the expected Warrant, and, therefore, it behoves those to whom it has become a necessity of their existence to make their voices heard in its favour, hard though its operation may be in some cases. A temporary expedient for ensuring a certain amount of promotion in the Royal Engineers, and which would alleviate a great deal of current discontent, would be to "second" in the corps officers holding such appointments as the governors of colonies, master of the Royal household, equerries to the Royal Family, colonial engineers, &c., who should, in accordance with precedent and reason, be "seconded" in the corps during their tenure of such offices.—I am, &c., X.

SLAVE TRADE IN THE RED SEA.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—It may interest some of your readers to know the efforts that are being made in this country for the suppression of the slave trade. A few days ago an Egyptian man-of-war was sent down the Red Sea with this laudable object in view. It is of little consequence that she had no powder on board. At the same time, some 300 women were sold in this town. I understand they fetched about £50 to £60 a-piece. Should any one doubt these facts, they can easily ascertain the truth of them.—I am, &c.,

W. R. KENNEDY, Captain R.N.

Cairo, March 3.

THE COMMISSARIAT.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—It cannot be too well known that young civilians who have of late joined, after competing for what they believed would be the suitable position of officers, are intensely dissatisfied on finding that the title of "commissary" they have gained is, in the Army, also the designation of Indian "Warrant" officers, a circumstance unknown to them in civil life, but which they unhappily, to their surprise, have soon found out after joining the Army. They do not attribute it to arrangements of the military, with whom are observed unity and *esprit de corps* in their departments, as the young lieutenants joining them for Staff employ have a similar designation (relative grade excepted) to their seniors. This makes exceptions in the Commissariat the more marked, especially as it is known that in former times no unsatisfactory distinction was made with the junior officers on joining that department. A. B.

March 13, 1877.

SIR,—I think it is pretty generally allowed that the most prominent grievance of the officers of the Commissariat Department is the absence of an adequate flow of promotion. A glance at an "Army List" will show the stagnation which exists, and that a "step" is an event which is rarely chronicled." To remedy this state of things, the following suggestion is made:—Service in the two senior grades of the department (*i.e.*, commissary-general and deputy commissary-general) to be limited to five years from date of commission in the latter rank, as is the case with regimental colonels. This would at once retire two commissary-generals, promoting (and retiring) two deputy commissary-generals, and so on, as the several officers fall within the prescribed limit. The deputy commissary-generals thus retired, after promotion to the higher rank, would derive an immediate and substantial benefit. Those not fortunate enough to be promoted would fare no worse than they inevitably will do under existing regulations. The outlay, when compared with the results, is insignificant, and I may be permitted to add, that as all the eggs for the late "Control" omelette were taken from the "junior" basket, it is only fair that the "seniors" should, in turn, contribute a few towards the "Commissariat" omelette, which, it is understood, is now being prepared.—I am, &c.,

DUM SPIRO SPERO.

REGIMENTAL DESIGNATIONS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—The process (which has now for some time been continued) of destroying, both in officers and men of the Regular Army, especially the former, any love for and pride in their profession could not have received more able assistance than by this last proposed destruction of the distinctive numbers of regiments with their *sobriquets*, so long and highly prized by many corps, who have won them in hard fights and by noble deeds, the memory of which is still a glory to the regiment and an incentive to future bravery—for instance, the "Black Watch" and the "Die Hards." One might speak of the "short service system," which must make a vast difference in the feelings of men with regard to the Service and their officers from the times when a soldier felt his regiment to be his home, and looked forward, after long and faithful service of his country, to an honourable retirement on a well-earned pension. Those days are gone by, and something may possibly be said in favour of shorter service. But to what can be attributed the apparent desire in some quarters to reduce the whole Regular Army to a level with the Militia and Volunteers, so that no one could know an officer of the former from those of the latter, especially if the Volunteers assume universally—as is desired—the scarlet uniform? What is left to make the Regular Army an attractive profession to gentlemen, from the class which has furnished its officers? Certainly not the pay, which is small enough, truly, and the social rank and position of officers is almost lost to them, their titles being now borne by men of other professions and trades. It is a "revolution," and a pulling-down revolution, in the British Army, and it will remain to be seen whether—in case England has again to call upon her soldiers to defend her cause and her honour—the "revolutionised" Army of "short-service men," with no interest in their regiments or officers, and officers who have been willing to join the Service with the traditions of former glories forgotten and *esprit de corps* abolished, will be the officers and the men to fight her battles as they have been fought, and to gain glorious victories.—I am, &c.,

AN OLD SOLDIER.

United Service Club, London,
March 15, 1877.

We (*Morning Post*) are informed that the office of Black Rod, vacant by the death of Sir A. Clifford, has been accepted by Gen. Sir W. Knollys, K.C.B.; and that the salary has been fixed at £2,000 per annum, with a residence within the precincts of the Palace of Westminster.

The sum of £100 is needed to complete the amount required to purchase an annuity for Mrs. Peter Burrowes, the widow of an officer, now 55. Mrs. Burrowes is without a penny, and has no pension, her husband not having served ten years. She is in bad health, and is trying to support herself by needlework. Contributions will be thankfully received by John Balfour, Esq, 10, Duke-street, St. James's; Capt. Orde Browne (late R.H.A.), Downham, Shooter's-hill; Rev. A. Robertson, St. Saviour's, Brixton; and Joliff Tufnell, P.R.C.P., Merrion-square, Dublin.

TERRITORIAL REGIMENTS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Your correspondent "XXXV.," writing on the above subject, appears somewhat illogical, and conveys (perhaps unintentionally) the idea that the proposed change might be acceptable to certain regiments, which he is good enough to particularise and legislate for. He starts by agreeing with you, that the scheme proposed by the committee is "monstrous in the extreme," and thus proceeds to expound an equally monstrous and nonsensical scheme, devised by himself. Let us suppose, for the sake of argument, that the change is necessary; does "XXXV." imagine that any regiment would feel satisfaction at being known by such eccentric and meaningless titles as "Cameronian (*sic*) Highlanders," or "Royal Ulster Fusiliers?" What connection is there between the 68th and his "36th Royal" Durham Light Infantry, or between the 88th and his "56th Royal Connaught Fusiliers?" Let us hope that we shall soon hear the last of this extraordinary "scheme," unnecessary in itself, distasteful to the Army, and ridiculous in the titles suggested for the proposed "territorial regiments."—I am, &c. "LXVIII."

March 4, 1877.

ARMY HOSPITAL CORPS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—It is to be hoped that the very large increase about to be added to the commissioned ranks of this corps will include promotions from the intelligent non-commissioned officers of the R.A., R.E., and other corps and departments, who have not been so fortunate as their brother non-commissioned officers in the Army Hospital Corps. Captains of orderlies might be selected from the lieutenants of the Coast Brigade, Royal Artillery, and assistant-commissaries in the Commissariat and Ordnance Store Departments, &c., being attached for a short time to a hospital for the purpose of learning their duties. Only a few sergeant-majors have been commissioned in the A.H.C. and the Sergeants have had more chances o promotion than their superior non-commissioned officers in all the other branches of the Service.—I am, &c., NEM-DIS.

Feb. 5, 1877.

LOCALIZATION.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I often see the localization system condemned, but from my experience I fee bound to express my firm belief in it. I have been on depôt duty for some time now, and in the district in which I serve nobody can possibly complain. Married officers do not altogether like the arrangement, and "cry it down" whenever they find an opportunity, but married men must not be considered. Officers, when they marry, should make up their minds to leave the Army, for they are never satisfied, and do no end of injury by advocating permanent localization of regiments, and all sorts of similar senseless changes, which would do more to ruin the Service than any of the reforms which Lord Cardwell introduced, sweeping and unpopular as many of them were.—I am, &c.,

CENTURION.

BIRTHS.

TRIMBLE.—February 14, at Ireland Isle, Bermuda, the wife of Staff-Surgeon Jas. Trimble, R.N., of a daughter.

VERNON.—March 12, at Stoke Park, near Towcester, Northamptonshire, the wife of Bertie Wentworth Vernon, of a son and heir.

DEATHS.

BELL.—March 1, at St. Helier's, Jersey, of bronchitis and pleurisy, Jessie Eleanor, wife of Capt. John C. Bell, 47th Regt.

WILLIAMS.—March 9, at the Town Barracks, Exeter, Vyvyan Williams, Captain 2nd Batn. 11th Regt., aged 38.

THE PRINCE OF WALES' TOUR IN INDIA,

BY

DR. W. H. RUSSELL,

Will be ready for delivery to the Trade and to the Public on the 20th instant,—selling price, as originally announced, **42s.**

The Publishers have determined to adhere to the above price in order to keep faith with the many Subscribers who have already sent in their orders, but owing to the fact that the volume will contain more Illustrations and nearly 200 pages more of Text *than was originally contemplated, they find it necessary to announce that, on and after the Second of April next, the price will be raised to* **52s. 6d.** *Orders received after March 31 can be executed only at the advanced price.*

N.B.—*A Large-paper Edition, royal quarto, handsomely bound in cloth extra, gilt edges, price* **84s.**, *will also be ready shortly.*

LONDON AND SOUTH-WESTERN RAILWAY.

OXFORD AND CAMBRIDGE BOAT RACE.
1877.

TICKETS of admission to view the Race from Barnes Railway Bridge, price 20s. each, including railway fares between London, Kingston, Shepperton, Hounslow, or intermediate stations, and Barnes, can now be obtained at this office on personal application or by letter. In the latter case, a remittance in payment for the number required must accompany the application. Tickets can also be obtained on application at the Company's West End Office, 30, Regent Circus, Piccadilly, and at the City Office, Arthur Street West, London Bridge.

For the accommodation of the holders of these tickets only, a special train will leave Waterloo Station on the day of the race, for Barnes Bridge, at a time to be announced by advertisement in the daily papers, &c., and will return from the Bridge, with passengers for London only, about ten minutes after the conclusion of the race.

Early applications are desirable, as the number of tickets will be strictly limited.

By order,
FREDERICK CLARKE, Secretary.
Secretary's Office,
Waterloo Bridge Station,
London, 2nd March, 1877.

THOMAS D. MARSHALL and BURT'S WATERPROOF SHOOTING BOOTS, 42s.
Illustrated Catalogues post free.
THOMAS D. MARSHALL and BURT,
192, OXFORD STREET, LONDON, W.

THE STAFFORD HOUSE COMMITTEE for the RELIEF of SUFFERING among the TURKISH SOLDIERS.—Chairman, the Duke of SUTHERLAND, K.G.—Communications to be addressed to T. Gibson Bowles, Esq., Hon. Sec., 2, Harriet Street, Lowndes Square, S.W.

Subscriptions will be received by Major-General Sir Henry Green, Hon. Treasurer, Stafford House, S.W.; by Messrs. Drummond and Co., Charing Cross; Messrs. Smith, Payne, and Co., 1, Lombard Street; Messrs. Barnetts, Hoares, and Co., 62, Lombard Street; and by Messrs. H. S. King and Co., 45, Pall Mall, and will be acknowledged in the published list.

The Right Hon. the Lord Mayor has undertaken to receive subscriptions for the fund, which may be paid to him at the Mansion House.

Contributions are especially invited of blankets, warm jerseys, warm underclothing, and hospital linen, which will be received at Taylor's Depository, Pimlico, and should be labelled "For Relief of Suffering Turkish Soldiers."

THE SOLDIERS' DAUGHTERS' HOME, Hampstead. Instituted 8th March, 1855.
Chairman—
Major-General J. T. Boileau, R.E., F.R.S.
Number of Children in the Home, 171; Vacancies, 29; Candidates awaiting Admission, 124.

Owing to the loss, by death, of several of the largest annual subscribers, and to the great falling off in donations, the funds are at present unequal to support the increased number of girls (26) who have been added to the Foundation during the last two years.

Further aid is earnestly solicited to meet the increased call upon the funds. Remittances to be made to C. R. Low, Esq., Secretary, No. 7, Whitehall, London, S.W. A guinea yearly gives 1 vote; five guineas, 2 votes for life.

ESTABLISHED 1844.

BAUMGARTEN'S INVIGORATIVE NERVINE ESSENCE. A most powerful nutritive cordial, which restores to their normal condition all the secretions on the integrity of which perfect health depends.

Report by Dr. Hassall—"Having analysed the preparation to which Messrs. Baumgarten and Co. have given the name of 'Invigorative Nervine Essence,' I am of opinion that it is a combination well calculated, from its containing, among other ingredients, Pepsine and Phosphate of Soda, to prove most serviceable to the debilitated, the nervous, and the dyspeptic."

Price 8s. per bottle, or four quantities in one, 22s. Carriage free on receipt of remittance. Sole agents, BRANT and CO, 283, Strand, London, W.C.

RUPTURES (BY ROYAL LETTERS PATENT)
WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 medical gentlemen to be the most effective invention for the curative treatment of hernia. The use of a steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body, two inches below the hips, being sent to the manufacturer,

MR. WHITE, 228, PICCADILLY, LONDON.

Price of a single truss, 16s., 21s., 26s. 6d., and 31s. 6d.; post free. Double ditto, 31s. 6d., 42s., and 52s. 6d.; post free. An umbilical ditto, 42s. and 52s. 6d.; post free. Post-Office Orders to be made payable to JOHN WHITE, Post Office, Piccadilly. Every description of RIDING BELTS, ELASTIC STOCKINGS to draw on, and ELASTIC SILK SUSPENDERS, on new and improved principles.

JOHN WHITE, Manufacturer, 228, Piccadilly London,

THEATRE ROYAL DRURY LANE.—On MONDAY, and during the week (Saturday excepted), at 6.45, TEN OF 'EM. At 7.30, BASKA—Mr. Creswick. Miss Leighton, Messrs. H. Russell. F. Fyars, G. Weston, P. Bell, R. Dolman, C. Fenton, J. Johnstone, Douglas. Evans. Misses C. Nott, Clara Jecks, &c. At 9.10, CORSICAN BROTHERS—Louis and Fabian dei Franchi, Mr. H. Sinclair. On Saturday next, March 24th, THE COLLEEN BAWN. Prices from 6d. to £5 5s. Doors open at 6.30, commence at a quarter to 7. Box office open from 10 till 5 daily.

ROYAL POLYTECHNIC.—Entire change of Entertainment. HYLDEMOER, a Fairy Story, with a ghost effect. CHRISTMAS AND ITS CUSTOMS, and a New Optical Entertainment, consisting of FAMOUS STATUARY UNDER THE LIME LIGHT, and the SHADOW PANTOMIME, by Mr. J. L. King. CHEMICAL MAGIC, by Professor Gardner. The SEANCE, by the Polytechnic Medium. The TALKING LION, &c., by Mr. James Matthews. The GIANT CHRISTMAS TREE. Admission to the whole, 1s.; Schools and Children under 10 years, 6d. Open from 12 till 5 and 7 till 10.

THE TOURNAMENT CLUB.—This Club has been formed, under distinguished patronage, for the revival of Chivalric Sports by a number of ladies, noblemen, and gentlemen.

Meetings will be held from time to time in the Club grounds, which will be situated within easy driving distance of London, where Tilting at the Ring, Tournaments, and Falconry will form the chief features; and prizes will be awarded by a "Queen of Beauty" who will preside.

No person who is not a member of the Club will be permitted to take an active part in any of the sports; but each member may introduce a friend to witness the tournaments, &c.

Garden parties, afternoon dances, and other amusements will also be given to the members of the Club; and another house will be established in town, situated in close proximity to the Park, where tea will be supplied to the ladies in the drawing-room from three to half-past six o'clock during the season.

The whole of the affairs of the Club will be managed by a committee appointed for the purpose, who will also arrange the dates of the meetings.

The annual subscription is fixed at ten guineas; and no entrance fee will be charged for the present.

A list of the patrons and patronesses of the Club will shortly be published.

Foreigners of rank and distinction will be eligible as honorary members, and will be elected by ballot.

Gentlemen who wish to join are requested to write to the Hon. Secretary of the Tournament Club, 7, Albany Court Yard, Piccadilly, for the forms of application. Ladies are also requested to forward their names either to one of the members of the "Ladies' Committee," or to the Hon. Secretary direct, who will submit the names of the Committee for approval.

The following ladies are among those who form the "Ladies' Committee":—

Lady Diana Huddleston, 43, Ennismore Gardens, S.W.
Lady Florence Dixie, Melton Mowbray.
Mrs. Henry Oppenheim, 17, Park Lane, W.
Madame de Murietta, 11, Kensington Palace Gardens, W.
Mrs. Frank Morrison, 8, Cromwell Houses, S.W.
Mrs. Herbert Stepney, Hill Street House, Rutland Gate, S.W.

UNITED MILITARY AND NAVAL CLUB.—Temporary Offices, with use of Dining and Waiting-room, 17, St. James's Place, S.W. For Officers who hold or have held her Majesty's Commission in the Army, Navy, Royal Marines, Militia, Yeomanry, and the other branches of the Auxiliary Forces. No Entrance Fee at present. Annual Subscription — Town Members, £4 4s.; Country, £3 3s.; Abroad, £1 1s. For Prospectus, &c., apply to the Secretary.

ROYAL ARTILLERY AND ROYAL ENGINEER CLUB,

3, PALL MALL EAST.

TO CANDIDATES for WOOLWICH and SANDHURST.

MILITARY EDUCATION IN GERMANY.

COLONEL BERDOE A. WILKINSON, Retired Full Pay Royal Engineers, being about to reside in HESSE DARMDALT, proposes to receive Pupils to Educate for the Army. They will have the advantage of preparing for the Examinations under the superintendence of an officer of long service, assisted by competent masters, and, at the same time, of acquiring a colloquial knowledge of the German language.

Address,
Colonel B. A. WILKINSON, late R.E.,
Care of Messrs. Cox and Co., Craig's Court, London.

WANTED, for the Royal Military Asylum at Chelsea, a Master Shoemaker. Applications, giving references, to the Quartermaster, Royal Military Asylum. None but first-class tradesmen need apply.

TO SERGEANTS of 17 YEARS' SERVICE.—WANTED, immediately, for the 17th Worcestershire Rifle Volunteers, a first-class SERGEANT-INSTRUCTOR. Apply, enclosing testimonials, to the Adjutant, 2nd A.B. Worcestershire Rifle Volunteers, Worcester.

WANTED, immediately, a MAN-COOK for an Officers' Mess. None need apply but a good general workman. Apply, with copy of last testimonial, to A. B., care of Mr. John Foster, Lower St. James' Street, Newport, Isle of Wight.

TO MESSMEN and OFFICERS CATERING.—WANTED, a SITUATION by a First Class COOK. Good testimonials. Apply, Chef, 29, Marlborough Road, Peckham, London, S.E.

AYAH, ready to return to India immediately, offers her services to a Lady, or as NURSE to Children. For particulars, apply to Mrs. T. Nicholls, 2, The Terrace, Clapham Park Road, Clapham.

MESSMAN WANTED, for the 8th Hussars, Aldershot. Applications in writing, with references, to be made to the Mess President.

RETIRED OFFICERS (Army and Navy) and other gentlemen with good private connection required as agents. £100 to £500 a-year may be realised. Address, N. 152, Messrs. Deacon's, 154, Leadenhall Street, E.C.

At all the Libraries.

THE CITY OF SUNSHINE. A NOVEL.
By ALEXANDER ALLARDYCE.
Author of the "Pundrapore Residency" in "Blackwood."
In 3 vols., crown 8vo, £1 5s. 6d.

OPINIONS OF THE PRESS.

"Nor does he represent India after the manner of the gushing special, as a Paradise of luxuriant splendour; he is content to paint her as he finds her, as imagination and experience have shown her to him—with all her faults and weakness, her unreliability, caprices, and deceits, but at the same time with all her dreamy fascination; her grace, her pathetic tenderness, above all her poetry, which hides a multitude of sins. . . But every page of Mr Allardyce's charming novel contains some happy idea or description worthy of perusal. . . A few more such romances as 'The City of Sunshine' would do more both to sustain and satisfy the increasing interest felt by all cultured Englishmen in the far Asiatic home of so many of their countrymen than a whole library of reports."—"Examiner."

"A picture of rural life in Bengal, drawn with vigour and finished with wonderful minuteness, yet so skilfully adapted to the mental vision of the English reader in every detail, that though all, or nearly all, is new, nothing seems strange—that is what has been given us by the author of this remarkable novel. . . As a work of fiction it is full of interest, while it is pregnant with grave political teachings for those who care to receive them. It will at once take rank as one of the most important of recent contributions to Anglo-Indian literature."—"Scotsman."

WILLIAM BLACKWOOD & SONS, Edinburgh and London.

WILLIAM NICHOLLS,
21, TICHBORNE STREET,
REGENT CIRCUS, PICCADILLY.
(Opposite the County Fire Office.)
BEDFORD CORD HUNTING BREECHES.
BUCKSKIN LEATHER HUNTING BREECHES.
LEATHER SHOOTING JACKETS and RIDING PANTALOONS.
Newmarket Breeches and Leggings.

WILLIAM NICHOLLS, 21, TICHBORNE STREET, REGENT CIRCUS, PICCADILLY.

PRIVATE SECRETARY.—A retired Military officer of nearly 21 years' good service, and who can produce the highest references as to general ability, experience, and other qualifications, is desirous of an appointment as Secretary to a Nobleman or Gentleman. Is a bachelor, a good correspondent, and can, if necessary, undertake management of the household, or other confidential duties. Address, O. J., care of J. W. Vickers, General Advertising Offices, Nicholas Lane, Lombard Street, E.C.

HOLLOWAY'S PILLS.—Indigestion.—How much thought has been bestowed, and what ponderous volumes have been written upon this plague of every household, which is with certainty and safety dispelled without fear of relapse, by a course of this purifying, soothing, and tonic medicine. It acts directly on the stomach, liver, and bowels—more indirectly, though not less effectively on the brain, nerves, vessels, and glands, and commands such order throughout the entire system that harmony dwells between each organ and its functions. Dyspepsia can no longer be the bugbear of the public, since Holloway's Pills are fully competent to subdue the most chronic and distressing cases of impaired digestion, and to restore the miserable sufferer to health, strength, and cheerfulness.

NAVAL CADETSHIPS, &c.

"EASTMAN'S" ROYAL NAVAL ACADEMY,
BURGOYNE HOUSE, SOUTHSEA.
Principal, since 1860, G. EASTCOTT SPICKERNELL.

At the last two Naval Cadet Examinations pupils took the *First* Place. More than 1,000 pupils have entered her Majesty's Service.

The House is situated close to and directly facing the sea. Pupils have good Bathing and Boating, under careful superintendence.

Pupils are received from Nine years of age and upwards. To make the School specially adapted for Junior Pupils intended for the Royal Navy and the Public Schools, Senior Pupils are not now received.

NAVAL CADETS, ASSISTANT CLERKS,
HOPE HOUSE, SOMERSET-PLACE,
SOUTHSEA.
Principal—Mr. T. H. VICKERY.

In addition to the general course of study pursued at this long-established School, pupils are specially prepared for the examination required for the above.

At the competitive examination in November, 1875, and at the recent examination in June, of candidates for Assistant Clerkships, all the pupils sent up from this Establishment were successful.

NAVAL CADETS' EXAMINATIONS.—A Retired Naval Instructor can receive a few young gentlemen into his house to board with the family (three in number), or in any manner parents may wish. Having no other occupation, and taking pupils only for the purpose of having something to do, the whole time of the instructor will be devoted to the pupils.

Sons of Naval Officers will be received at a lower rate than the sons of civilians, and sons of deceased officers at only a small increase on the actual cost of board and lodging, if surviving parent or guardian is unable to pay more.

A French gentleman will instruct in speaking French, and a German gentleman in German, under the supervision of the instructor. References to officers, admirals, and captains with whom the instructor has served have been kindly granted. Address, A. B. C., care of Willing, jun., Advertising Offices, 301, Strand, W.C.

BOURNEMOUTH.—Overton Hall.—The Rev. LOVELL J. PROCTER, M.A., assisted by five highly qualified English and Foreign Masters, receives a select number of boys for preparation either for the public Schools or Royal Navy. A few taken for more advanced tuition. Spacious school premises, with three acres of grounds, prettily situated near the sea. Particulars and prospectuses on application.

TRURO SCHOOL. Founded A.D. 1549.—Special preparation of a limited number for Woolwich, the Line, Navy, and Cooper's Hill. Five experienced and energetic resident masters in mathematics and geometrical drawing, the classics, and English, French, science, and German; besides visiting masters in drawing and English composition.

WILLIAM S. BURTON,
39, OXFORD STREET, W.

THE PERFECT SUBSTITUTE FOR SILVER.—The REAL NICKEL SILVER introduced more than thirty years ago by WILLIAM S. BURTON, when plated by the patent process of Messrs. Elkington and Co., is the best article *next* to silver that can be used as such, either usefully or ornamentally, as by *no test* can it be distinguished *from* real silver.

Patterns.	Fiddle or Old Silver	Bead or Thread	King's or Shell.
	£ s. d.	£ s. d.	£ s. d.
Table Forks or Spoons, per doz.	1 10 .	2 1 .	2 5 .
Dessert do., per doz.	1 2 .	1 9 .	1 11 .
Tea Spoons "	. 14 .	1 . .	1 2 .

These are as strongly plated, and are in every respect at least equal to what other houses are selling as their first quality at very much higher prices.

A second quality of Fiddle Pattern:—Table Spoons and Forks, 23s. per doz.; Dessert, 17s. per doz.; Tea Spoons, 12s. per doz.

Tea and Coffee sets, in white metal, from £3 15s. to £7 7s.; Dish Covers, beaded pattern, £11; Ditto, ditto, fluted, £15; from £9 to £24 the set of four; Corner Dishes, from £7 10s. to £18 18s. the set of four; Warmers, £7 2s. 6d. to £15 15s.; Biscuit Boxes, 14s. to £5 10s.; Cruet and Liquor Frames, &c., at proportionate prices.

The largest stock in existence of Plated Dessert Knives and Forks, and Fish-eating Knives and Forks, and Carvers.

All kinds of re-plating done by the patent process.

WILLIAM S. BURTON, General Furnishing Ironmonger, by appointment to H.R.H. the Prince of Wales, sends a Catalogue, containing upwards of 850 Illustrations of his unrivalled Stock, with Lists of Prices and Plans of the 30 large Show-Rooms, post free.—39, Oxford-street, W.; 1, 1A, 2, 3, and 4, Newman-street; 4, 5, and 6, Perry's-place; and 1, Newman-yard; Manufactories, 84, Newman-street and Newman Mews, London, W.

THE DIRECTORS of the BRIGHTON LIVERY STABLES COMPANY, Limited, give notice that Prospectuses inviting application for the portion of unallotted Shares may be obtained from the Secretary at the Offices of the Company, to whom an early application should be made.

A. J. BODDINGTON, Secretary.
17 Prince Albert Street, Brighton.

THE BRIGHTON AND KEMPTOWN SUPPLY ASSOCIATION.

(LIMITED.)

Incorporated under the Companies' Acts of 1862 and 1867.
CAPITAL £40,000 in 4,000 Preference Shares of £5 each, and 20,000 Ordinary Shares of £1 each.

PRESIDENT.
Viscount POLLINGTON.
DIRECTORS.
Chairman—Sir HOWARD ELPHINSTONE, Bart.,
Hon. HUGH ROWLEY,
Rev. G. F. ALLFREE,
M. R. BRANDRETH, LLD.,
Captain EOX.
AUDITORS.—Messrs, GRAHAM, LEARED, and Co., 7, Poultry, London, E.C.
BANKERS.—Messrs. HALL, LLOYD, BEVAN, and WEST, Union Bank, Brighton.
SOLICITORS.—Messrs BRANDRETH and Co., Middle Street, Brighton.
GENERAL MANAGER.—JOHN HENRY TRINDER.
SECRETARY.—JOHN BRAY.
OFFICES AND STORES.—126, ST. JAMES'S STREET, BRIGHTON.

ABRIDGED PROSPECTUS.

Notice is Hereby Given, that the Directors are prepared to receive application for the 20,000 Ordinary Shares at £1 as above, which will entitle the holders to all the benefits of the Association, and to a participation in 4-10ths of the profits, to be drawn by ballot in certificates of £1 each.

Also for 2,000 Preference Shares, which will constitute a first issue at par. The Preference Shares will receive a Preferential dividend of 5 per cent., and also participate in 3-10ths of the net profits of the Association, to be drawn for in £5 certificates, as in the case of the Ordinary Shares. The Preference Shares can be paid up in full on application, less the six months' interest at 5 per cent. per annum, or 20s can be paid on application and 20s on allotment. Calls will not exceed £1 each, to be paid monthly from the date of allotment, if required.

The Ordinary Shares are payable 10s. on application and 10s. on allotment.

Deposits should be paid to the account of the Association at the Union Bank, Brighton; and to Messrs. Bolton, the London Agents.

If no allotment be made the amount deposited will be returned in full. Prospectuses and forms of application for shares may be had from the auditors, bankers, solicitors, and the secretary to the company; also Messrs. Bolton and Son, 26, Great St. Helen's London, E.C.

OPINIONS OF THE PRESS.

From the "Money Market Review," March 3rd, 1877.

"A new undertaking has been introduced under the title of the Brighton and Kemptown Supply Association, Limited, with a capital of £40,000 in 20,000 ordinary shares of £1 each, and 4,000 preference shares of £5 each. But of the latter it is proposed to issue only 2,000 at present. The preference shareholders will be entitled to a preferential dividend at the rate of five per cent. per annum, and to three-tenths of the net profits after providing for this dividend, to be divided by means of a ballot at the end of each year, in certificates of £5; while the ordinary shareholders will be entitled to deal at the stores, and to participate (after the preference shares) in four-tenths of the net profits of £1 certificates. Each ordinary share will also entitle the holder to one drawing in the annual ballot, and carry one vote for each share up to five, and subsequently in proportion. Annual tickets will be granted to the public on payment of 5s., and monthly tickets will be granted on payment of 2s., authorising the holders to deal at the stores. Attention is drawn to the successful result of the operations of an existing store at the western part of Brighton, and to the consequent prospect of large profits being made by this undertaking at the eastern part of the town. The resident population of Brighton is now 120,000, while the visiting population amounts to 500,000. The business of the association will be placed in the hands of experienced men. The shares will be allotted on the 13th inst."

From the "Investors' Guardian," March 3rd.

"This is a company on the now accredited and profitable co-operative system of supply, for carrying on, firstly, in the Eastern part of Brighton, a Supply Store such as has already answered so advantageously in the Western district of the town. The Company, of course, takes further powers in its memorandum of Association for extending its operations where requisite. The capital is £40,000 in 4000 Preference shares of £5—payable, 20s. on application, and 20s. on allotment—and 20,000 ordinary shares of £1—payable, 10s. on application, and 10s. on allotment. Of the 4000 preference shares, only 2000 will be issued, the holders of which will be entitled to, first, a preferential dividend of 5 per cent., or 5s. per share, and, secondly, to three-tenths of the net profits (after such dividend has been provided for), in certificates of £5 each, to be divided by ballot at the end of each year. The ordinary shareholders will also receive £5 certificates for four-tenths of the profits, divisible in the same manner by ballot, having also the right of dealing at the Stores, free of further charge, which to non-shareholders will be 5s. for annual tickets and 2s. for monthly tickets. The visitors to Brighton exceed half-a-million, and the resident population is 120,000, so that there is ample room for the operation of the Company, with every prospect of advantage. The directorate of the Company is such as to guarantee the honourable conduct of its affairs, and means have been taken to assure it the most efficient business management."

From the "Bullionist," March 3rd.

"The success of co-operative stores in ministering to the wants of large classes of the population, has been put beyond doubt by recent experience. Although imprudent management has ruined some promising ventures of the kind, there is little doubt that in a locality where they can command a sufficiently large public, and if they are conducted with prudence and enterprise, they will prove remunerative to those who institute them, as well as a great convenience to their customers. There seems every reason to hope that such will be the issue in the case of the Brighton and Kemptown Supply Association. The western part of Brighton is already provided with a flourishing Store, and it is now proposed to establish one for the wants of the eastern district. Brighton boasts of a resident population of 120,000, and its annual visiting population is estimated at 500,000 very many of whom come from towns where such stores exist, and which can therefore arrange with the Brighton Company to cater for the wants of their customers during their temporary residence. The facts and figures given regarding the success of similar associations are very encouraging, and the arrangements that have been made for the management of the affairs of the Brighton and Kemptown Company are of such a nature as to attract confidence. In order to meet the wants of all classes, there will be £1 and £5 shares (as with the Westminster Supply Association), both classes of Shareholders having a voice in the conduct of the Store. The arrangements as to the practical working of the association are on the model supplied by similar companies, which have secured a large degree of success. According to the prospectus, the capital reqnired is £40,000, in 4,000 preference shares of £5 each, and 20,000 ordinary shares of £1. Only 2,000 of the former at par will be issued at first, further issues being deferred till such times as may seem opportune to the directors. The conditions of subscription, the amount of dividends, the mode of distributing profits, and all other details necessary to be known by intending investors, will be found fully set forth in the prospectus."

From "Herapath's Railway Journal," March 3rd.

"The co-operative movement, which is now so widely diffused and successful throughout the kingdom, has already found its way to Brighton, where one flourishing store already exists. It is now proposed, under the above title, to establish a second Supply Association, with a capital of £40,000. We believe there is hardly a town in the United Kingdom affording a better opening of the establishment of an association such as the one proposed than Brighton. With a resident population of 120,000, and an annual visiting population of 500,000, there is ample scope for an additional store. The Board of Directors of the new company are gentlemen of good social position and local experience, and, as stated in the prospectus 'the business of this Association will be placed in the hands of those possessing great experience in conducting commercial matters.' No doubt much of the success which has attended Co-operative Associations elsewhere is primarily due to the efficiency of the management. If this be kept in view, in the present instance, the undertaking must, we should say, prove equally flourishing."

From the "Financier," February 28th.

"Co-operative Stores are making good progress at Brighton, as it is natural they should, seeing that the principal is now well-established in London, and that Brighton is London-on-the-sea. The rapidity of the growth of Brighton is certainly marvellous. Thus it is stated that the resident population of the town is now 120,000, while it may easily be believed, as stated, that the annual visiting population reaches half a million. To meet the views of this visiting population, the proposed new company will enter into relations of reciprocity with existing Co-operative Companies in London and elsewhere. Annual tickets will be granted on payment of 5s., and monthly tickets on the payment of 2s. The arrangements in cocnection with the capital are so framed as to embrace some new features. It is intended to have two classes of shares—namely 5*l* and 1*l* shares, the former being designed for investors, and the latter for persons who desire to trade with the Company. The promoters are wise enough to promise every facility to the public upon the important point of the delivery of goods carriage free.

MAJOR CREASE'S PATENT SELF-REGULATING, CLEANABLE

CHARCOAL FILTER

Has been universally adopted in the Royal Navy, East Indian and English Transport Services; the German, Russian, American, and Austro-Hungarian Navies;

ALSO BY

HER MAJESTY'S WAR DEPARTMENT,
For BARRACKS, HOSPITALS, CAMPS, &c., &c.

And for which Patents have been granted by the Governments of Great Britain, the United States of America, Italy, France, and Canada to Major Crease, Sole Patentee of the Self-regulating, Cleanable Filter.

The designs are of three classes—

1.—For dwelling rooms and halls. To suit different styles of furniture three types have been employed—the Classic, the Japanese, and the Mediæval. None of these forms have been before employed for Filters.
2.—Those of simpler and cheaper designs for kitchen use.
3.—Filters of galvanized iron, either to fix to mains or cisterns, which, being capable of being made of any size, can supply pure water in sufficient quantities for the largest hospital or hotel.

The Filters, being made of special sizes, all their parts are interchangeable.

Full particulars can be obtained on application to

LAST year an attempt was made in the French Chamber of Deputies to induce the House to change the period of service in the Active Army, but it failed—thanks to the opposition of M. Gambetta. A similar proposal, renewed this year, not having been opposed by M. Gambetta, permission has been given for a Bill to be brought in, and a committee has been appointed to report on the matter. There is naturally a question of politics involved in this affair. The Radicals wish to see the nation armed, and to have perfect equality as regards active service. They are not satisfied with compulsory service in its present shape, the system of two classes of the contingent, and one-year volunteers. These rabid politicians, who under the Empire denounced standing armies, and declared that the National Guard would be quite good enough to meet the Prussians, and who hampered Marshal Niel's reorganization, are once more attacking the War Minister and trying to dabble in military affairs. When the reorganization of the Army was first determined upon, M. Thiers, who was President of the Republic, insisted that the period of service in the Active Army should be fixed at seven years, and he threatened to resign unless his views were accepted. After an obstinate resistance he was induced to accept the present system, or five years in the Active Army, four years in the Reserve of the Active Army, five years in the Territorial Army, and six years in the Reserve of that force, and one-year volunteers. As the strength of the peace establishment only just exceeds 400,000 men, it is clear that all the conscripts cannot serve five years; five contingents would produce nearly 800,000 men. The consequence is that the annual contingent has to be divided into two portions; one portion serves for five years, and the other portion is called out for one year, or, perhaps, not at all. The Radicals exclaim against this state of affairs, and declare that if the period of active service were reduced to three years, then all citizens would be able to serve for that time without the peace establishment being exceeded. The Army would be more efficient, and there would be equality of service. The chief reason which induced M. Thiers to hold out for seven years' service was that he was opposed to the idea of the creation of a National Army instead of a Government Army. In his opinion, to reduce the active service period to three years would be almost equivalent to re-establishing the National Guard, recently abolished—the soldier and the citizen would be too much jumbled up together. The military authorities have another serious objection. Three years may be sufficient to form a private, but it is not sufficient to form non-commissioned officers, and hardly any French Corporals or Sergeants remain in the Service a day longer than they can help. At present the scarcity of non-commissioned officers is severely felt, but what would it be if the term of active service were to be reduced by two years? To attempt to disturb the present system just now, even before the reorganization of the Army has been completed, and with Europe in so troubled a state, is foolish and unpatriotic. But party feeling seems to prevail over every other sentiment in France, even with the enemy at the gate. It was really to be hoped that the Radicals would have been satisfied with compulsory service, at least, for a few years, and until the system had been thoroughly tested. We have before us an official report which shows the distribution of conscripts, &c., in 1874. The number of men inscribed, or who reached the age of 20 in that year, was 303,810, but of these only 95,155 found their way into the Active Army for five years' service. In the first place, 48,000 men were exempted from service in time of peace as being absolutely indispensable to their families; 30,400 were exempted owing to physical infirmities; 20,000 men were to be re-examined in a year; 4,000 men were conditionally dispensed with; 28,370 were taken for the auxiliary services, hospitals, &c., not being strong enough to take the field; and 20,800 men had already joined the Army, some as one-year volunteers. There, therefore, remained for active service 150,000; 90,000 of these were taken to serve five years in the Active Army, 55,000 to serve for one year, and 5,000 for the Marines. The only persons exempted from military service, in addition to those named above, are young men being trained up as priests, and some of the State schools; also, persons who, from their crimes, are deemed unworthy of wearing the uniform.

Those terrible torpedoes were brought under the notice of the House of Commons on Monday night by Lord Charles Beresford, and, owing to the practical manner in which he talked of the powers of these weapons, he really interested the House and made an impression. Like a true naval officer, he came forword with a motion "that no economical considerations should tie the hands of the First Lord of the Admiralty, and so prevent exhaustive experiments being carried out as to the best means of applying or resisting these terrible weapons;" but an Admiralty free to act as it thought fit, without having a very considerable check put upon it by the Treasury, is altogether too much to expect. Mr. Reed was good enough to express his opinion that Lord Charles Beresford had brought forward the matter in "a very proper manner;" and then the question followed the usual course when the Navy is concerned, and died a natural death for want of support, that is to say, in Parliamentary language, it "dropped." Still it is something that the future commander of the Thunderer should have awakened honourable members to the fact that even that mighty ship, which has been spoken of with so much pride, could be sent to the bottom by one torpedo properly applied. It is questionable whether the suggestion to provide large ships with anti-torpedo satellites, as advanced by Lord Charles Beresford, would be attended with the success which is hoped. The type of vessel capable of attaining the highest speed and of keeping the sea in all weathers, not being by any means dependent upon her necessarily limited coal-carrying capabilities, is not yet designed. And even if she were, a similar type would be brought against her, and it would merely be a struggle of like against like, and the enemy might succeed in dodging our satellites just as often as we managed to frustrate their efforts to attack our larger ships with the torpedo. Again, the large ships themselves are now being fitted to discharge the torpedo, and woe betide the satellite that tried to intercept a Whitehead. Inventors are, as a rule, rather chary of bringing their notions to the Admiralty, and we fear that the invitation of the First Lord will scarcely give any impetus to defensive inventions. Probably the Navy itself will ultimately discover the best system of saving itself from the unpleasantness of being sent head-long to "Davy Jones's locker," and already one officer, at least, has submitted an improved crinoline to be worn by a ship in the event of any unwarrantable attack being made upon her. But unhappily, the Navy is fully alive to the fact that more than one naval inventor has been painfully snubbed, although he has lived to see his ideas adopted in later days, while others who have been taken by the hand have not received such remuneration as they had a right to expect. We do not for a moment mean to imply that the officers of her Majesty's Service would keep a good thing secret rather than give their Government the benefit of it; but it must be remembered that experiments run away with a heap of money, and many a genius has been ruined in the endeavour to perfect his ideas. If more encouragement were given to those in the Service to introduce novelties, we should not have to borrow so many notions from abroad, or have to pay a high price to be let into a "secret" that was also sold to other Governments, to wit, the Whithead torpedo itself.

The French Parliamentary Committee, of which M. Thiers is President, is still engaged in taking evidence on the subject of altering the time of service in the Active Army. This matter has now become a party question in France in consequence of the active manner in which the Radicals have been agitating in favour of reducing the present term from five to three years. When this matter was first discussed, General Trochu and several officers of merit declared themselves in favour of three years' service. We remember that General Trochu urged, among other things, that in three years' time a man learns all he has to learn, and then begins to get bored with his profession, to fall off and become a bad soldier. M. Thiers, who was then President of the Republic, fought hard for seven years, and in the end a five years' term was adopted. Now, M. Laisant demands that the term of active service be reduced to three years; that all soldiers who after one year can show they have been sufficiently instructed be allowed home; that the one-year volunteer system be abolished. The War Minister, who was called before the Committee a few days ago, said that three years would be quite insufficient, more especially for the Cavalry and Artillery, and that three years' nominal service would, in reality, be only two years' effective service. General Berthaud said that in Germany it was found necessary to keep the Cavalry men four years, and by way of compensation they were dispensed with two years in the Landwehr; and, besides this, during their last year of active service they were cantonned, or quartered on the inhabitants, instead of being confined in barracks. This system he does not consider applicable to France. General Berthaud added that a man only becomes a good soldier when he has acquired military instincts and discipline. Moral qualities are indispensable, and are preferable to physical qualities. "I have seen men physically strong exceedingly weak in the hour of danger, whilst men of feeble constitution have displayed the greatest energy. Four years are absolutely necessary to develope these moral qualities in the soldier. But it is especially in what concerns non-commissioned officers that the term of three years is insufficient. A man cannot become a Sergeant before he has served two years, and it is only at the end of his third year that he is really efficient. It will be impossible to have a sufficient supply of non-commissioned officers if the period of active service be reduced. We required 31,000 non-commissioned officers, and with the three years' service it would be impossible to have more than 11,000. The law of 1874 promising places under Government to Sergeants who would serve double time had had no effect, as men are not to be caught with promises." General Berthaud declares that the country will have to return to the old system of paying down ready money for re-engagements. Another argument against the short period put forward by the War Minister was this. He said it would be exceedingly difficult to find men willing to accept the stripes with liberation from service so near. The soldier would prefer his inferior and less responsible position. "Consider, in fact," added General Berthaud, "a man must first pass four or five months as a supernumerary Corporal, doing extra duty; then he becomes Corporal, and is responsible for the details of service. As Sergeant he has to acquire fresh knowledge, and learn other duties. Under these circumstances, the soldier would prefer to remain full private, being aware that he would soon return to civil life. Already there is great difficulty in finding Sergeants, and they leave their corps just when they begin to be thoroughly acquainted with their duty. There is another inconvenience. The three years system necessitates the presence, under the flag, of three annual contingents of 150,000 men each; in all, 450,000; or, reduced by death and sickness, 430,000. To this force must be joined the permanent part of the Army, which amounts to 130,000. We should, therefore, have an Army of 560,000, whereas our military estimates only provide for 490,000, including the Gendarmerie." The War Minister objected most strongly to that part of M. Laisant's proposition concerning anticipated liberation, which would deprive the Army of its best elements, and would naturally render it more difficult than ever to procure good non-commissioned officers. In reply to a member who complained of the development given to the Cavalry, General Berthaud maintained that such development is necessary, the Cavalry being destined to render great services. The War Minister paid a high compliment to the Russian Cavalry, which made a surprising march in two days and a half from Kischeneff to Odessa; and, thanks to a new saddle, this rapid march was accomplished with hardly any loss. The War Minister also upheld the one-year volunteer system, which he considers necessary for "the recruitment of liberal professions." It is less than ever probable that M. Laisant's Bill will be accepted.

Vice-Admiral Sir Cooper Key arrived at Port Royal in his flagship, accompanied by the Encounter and Dryad, on February 19, and inspected the dockyard and hospital. The Admiral also took the opportunity of visiting the Aboukir, and made a thorough inspection and inquired into her sanitary condition. Sir Cooper Key was the guest of the Governor during a portion of his stay at Jamaica.

All anxiety as to the safety of the Thetis has been removed by her arrival at Malta in tow of the Devastation. We have not heard of the cause of the accident to her propeller, nor the date of its occurrence, but it appears strange that she should, as reported, have been short of provisions for seventeen days.

There have been no further cases of yellow fever on board the Aboukir, although the disease is rather prevalent in the island; and we regret to hear that the carpenter of the dockyard, Mr. Rogers, was in hospital when the last mail left, having been attacked by this fearful malady.

Submarine torpedo practice will be resumed at Plymouth, Portsmouth, and Sheerness this year, the probable term being from June 1 to August 31.

On Monday next Captain Sir George Nares, K.C.B., will read at a meeting of the Royal Geographical Society a paper on "The Geographical Results of the Arctic Expedition."

The sprains received by Lieutenant Lowry, of the Swiftsure, while playing at football, have, unfortunately necessitated his invaliding home.

Rumour has it that in a scheme about to be proposed for improving promotion in the Royal Marines, it is provided that Colonels Second-Commandant are to be abolished. It is to be hoped that a suggestion of this nature will not meet with approval. Many years ago the office of Second-Commandant was almost a sinecure, the officer holding it having little or nothing to do, but in the present day there is as much work cut out for him as for any other officer at head-quarters; his audit duties occupy a great part of every forenoon, added to which are those of president of boards for discharge, passing clothing, and other duties, in addition to occasional drills. The abolition of this rank would be a loss of four steps to every grade, and although the contemplated loss might be made up by the addition of an equal number of general officers, yet, taking the present stagnation into consideration, the latter might be given without the reduction of the former.

The engineering firm of Napier and Sons, on the Clyde, which has built many ships for the Navy, and also engined them, is unfortunately responsible for the miserable machinery supplied to the Opal. They are anxious to do everything in their power to put matters straight on board that vessel, and one of the foremen of the works is to be sent out to Callao to meet the Opal, and to assist in making such alterations as may be considered necessary, and new valve gear and other parts of the engines will be sent to be fitted. We believe the offer to undertake this work was voluntarily made by the firm, by which the whole of the expense connected with it will be borne, for they naturally feel that the constant allusions to the break-downs of the Opal is a matter which concerns the reputation of the constructors of the machinery. The original cost of the engines was £27,000.

The battle of the sites is not yet at an end, for Weymouth and Southampton are still flooding their Lordships with information concerning the advantages of their particular neighbourhoods above all others. Dartmouth is being ridiculed as much as possible in various ways, and so much do some of those who are writing on the subject know about it, that they confuse that charming harbour with the Moor, and speak of the College on "Dartmoor." The Isle of Wight, too, is having a final struggle for the establishment, but Dartmouth may be expected to come out of it all victorious.

The members of the Committee lately sitting to inquire into the causes of the outbreak of scurvy in the Arctic Expedition have, on the conclusion of their labours, received the thanks of the Admiralty for the attention they have given to the subject.

The new idea of entering gentlemen as Engineer officers, and giving them a better position than has hitherto been occupied by naval Engineers, seems to be stirring up some jealousy on the part of the officers of this line already in the Service. A correspondent of a contemporary, published at a naval port, asks, "What is the meaning of introducing the blue-blood element into the engineering branches?" "Surely," he says, "it cannot be hoped to secure greater practical efficiency; and if the aristocratic Engineers are to be mere walking gentlemen, pushed into the Service in order to give to it 'respectability,' and depending for their usefulness and the knowledge of their duties they may pick up from practical subordinates, then woe be to the Service which is supposed to require such tinsel, woe be to the ship or the engines of which they are supposed to have control, and woe be to the blue bloods themselves, for their plebeian associates will let them have a warm time of it." Notwithstanding these fearful threats of woes to come, there need be no fear that the "blue bloods" will not be sufficiently practical, though they may not possess "the 'orny 'and of industry." They will have gone through the practical part of the work before they are passed into the Service, and will, while afloat, be ever in the midst of that work, and will be quite capable of directing their "practical subordinates," although they may be relieved from undertaking such duties as would give them the appearance of a chimney-sweep rather than an officer.

Captains of Royal Marines holding appointments as Gunnery or Musketry Instructors are not eligible for embarkation or other regimental duties, and their places on the Captains' List are filled by as many subaltern officers who are promoted, and, in fact, added to the list of Captains; but there are three Captains—viz., an Officiating Deputy Judge-Advocate in London, an Auditor at Deal, and an Instructor in the Gymnasium, also at Deal—who are as much removed from their other regimental duties as the first-named officers, although their vacancies have never been filled up. There is also a Captain doing duty as Military Instructor at the Artillery Division. This is felt as a hardship to the Captains' List, and to the old subalterns awaiting promotion, and it would be a step in the right direction to promote others for the regimental duties from which they have been withdrawn.

The hon. and gallant member for Gravesend was as gloomy as ever on Monday night, and seems to be impressed with a horrid presentiment that the ancient prophesy that the Navy is "going to the dogs" will be fulfilled in his day. Still, the kind of criticism with which he favoured the House has its uses, and brings matters under notice that might otherwise be lost sight of; and it is only just to Captain Pim to add that there is no doubt he believes all he advances, though others are content to think that things are not so particularly blue.

It is evident that Mr. D. Jenkins, who represents Penryn, is not a man to be led away by popular notions, for, in the face of all that has been said and written about the grievances of naval Engineers, he positively suggested the reduction of the Navy Estimates by the amount provided to give them more pay and better retirement. His ground for so doing was that their pay was as good as that of the executives, that they had caused many mishaps to her Majesty's ships, and their responsibility was not so great as was supposed. No doubt Mr. Jenkins would be well received at any of the Steam Reserves.

By the death of Colonel Digby, C.B., R.M.A., a Good Service Pension of £150 per annum has become vacant. It is not improbable that it may be conferred upon Colonel Rodney, R.M.L.I., Deputy Adjutant-General.

Mr. Gorst has brought forward a remarkable grievance under which engine-room artificers suffer, and has appealed to the First Lord of the Admiralty to have it remedied. It seems that some are fat and burly, notwithstanding their grievances, and they fancy that a jacket displays too much of their well-rounded forms. Therefore a jacket is not thought to be sufficiently becoming, and they ask for something in the way of drapery to cover their ample figures. The Board of Admiralty will, undoubtedly, take this question into consideration after the touching appeal made by Mr. Gorst, and the prayer of the worthy petty officers will be granted. We might point out, however, that in the sister Service, which has the reputation of being smarter in matters of dress, the jacket is not looked upon as a grievance, but is worn both by the slim youth and the more developed senior.

The appointment of his Royal Highness the Prince of Wales as Honorary Captain in the Royal Naval Reserve will, undoubtedly, give much satisfaction to that branch of the Naval Service. Hitherto there has been no higher rank in the Reserve than that of Lieutenant, but now a senior list has been opened, and, in the event of war, any Reserve officers who may distinguish themselves will be eligible for advancement to the ranks of Honorary Commanders and Honorary Captains.

Commander William Cashman, on the Retired List, has been appointed a Naval Knight of Windsor. This officer entered the Service in 1830, became Lieutenant in 1845, and twenty years later accepted retirement and a step in rank.

Commander Lord Charles Beresford has been ordered to be temporarily placed on half pay, having completed the course of torpedo training for which he was appointed to the Vernon.

As it has been suggested that the efficiency of the 90cwt. gun might be increased by the use of a heavier charge, directions have been given for the gunnery-ship Excellent to test the question. The experiments will be carried out on board the gunboat Skylark.

The most surprising thing about the Barracouta court-martial is that, with all the particulars of the case before them, their Lordships should have been so long in coming to the conclusion that such a course was necessary for the good of the Service.

In a recent argument respecting the originality of some gunnery inventions, much stress was laid upon the introduction of the system of breech-thickening, but it is quite open to doubt whether this claim for originality stands on a firm basis, seeing that Dahlgren's "soda-water bottles" saw the light many years before the gun that has been in dispute.

A Greenwich Hospital Pension of £150 per annum has become vacant by the death of Admiral Sir Edward Belcher.

Colonel G. S. Digby, C.B., Commandant of the Royal Marine Artillery, who died on the 20th inst., after a short illness, entered the Service in August, 1842; became First Lieutenant in July, 1847; Captain, December 27, 1854; Brevet Major, November 2, 1855; Lieutenant-Colonel, March 23, 1863; Colonel, March 23, 1868; and succeeded Colonel J. W. C. Williams, A.D.C., as Commandant, May 3 of last year. Colonel Digby served with distinction in the Crimean war, where he was in command of the Royal Marine Artillery in the flotilla of mortar-boats employed against Sebastopol during its siege and fall. He was also at the bombardment and surrender of Kinburn, and was on several occasions mentioned in despatches, and received the Brevet of Major. He also served with the Royal Marine Battalion in Mexico. He had received the Crimean medal with clasps, the Knighthood of the Legion of Honour, Medjidie of the 5th Class, and the Turkish medal. He was nominated a Companion of the Order of the Bath in January, 1857.

Colonel Henry Adair becomes Commandant of the Royal Marine Artillery by the death of Colonel Digby, C.B.

The grounding of the Eclipse, which has been reported, took place when she was threading the narrow winding channel of Pitts Harbour. The vessel was creeping along most carefully at the time, and her having touched the ground is not to be attributed to any want of care in navigating the vessel.

The Colonial Office has addressed a letter to Commodore Lyons, A.D.C., conveying the thanks of that department for the prompt measures taken by him in rendering assistance to the inhabitants of the Cayman Islands when in a state of distress owing to their crops and dwellings having been destroyed by a hurricane.

It is stated that it has been decided that Rear-Admiral W. G. Luard shall relieve Vice-Admiral Sir Reginald Macdonald in the command of the East Indies Station.

Ireland has a grievance against the Admiralty in being unprovided with a training-ship for lads who might wish to take to the sea as a profession. This is about to be partially remedied by the establishment at Cork of the mercantile training-ship Munster, but a Royal ship is what seems to be desired, and if it should be decided to remove the Ganges from Falmouth, it might be worth while for the Admiralty to consider whether the experiment of sending her to Irish waters should not be tried. There is apparently a feeling that the Irish are rather debarred from entering the Navy for want of easy access to recruiting stations. Possibly the majority of the people are not aware that the Coastguard has the power of entering suitable boys and forwarding them to a port for training. When they once get on board they might certainly be as well at Plymouth as at Cork, for only when on leave of absence would they, in the majority of instances, be able to visit their friends. Yet there is a sentiment that Ireland should have its own ship, and while we do not advocate the establishment of another of these expensive training schools, we would suggest that this wish should be considered in the event of any alteration being made in the stations of the present training vessels for boys for the Royal Navy.

Rear-Admiral Phillimore arrived at Wick on Monday on a tour of inspection of the various Royal Naval Reserve batteries, and found everything in good order. Admiral Phillimore proceeded to Thurso on Tuesday.

In another column will be found an interesting tabular statement showing the future of the Engineers as regards numbers of all classes to be employed, and their full, half, and retired pay.

Commander James Alexander Gordon, whose death is reported at the age of eighty-nine years, entered the Navy in 1804 on board the Ville de Paris, bearing the flag of Hon. Wm. Cornwallis, in the Channel. He then served in the Mediterranean for four years, principally at the blockade of Toulon. He afterwards joined the Laurestinus, in which ship, having first visited the Rio de la Plata, and escorted a convoy to Halifax, he took a warm part, as Master's Mate, in the hostilities against the Americans in the Chesapeake, and was present in the attack upon Crany Island. The Laurestinus being wrecked, on the Silver Keys, off the Bahamas, on the night of Aug. 21, 1813, Mr. Gordon came home, but soon after was appointed Lieutenant of the Manly. His promotion being confirmed by commission dated May 26, 1814, in the same year, he continued to serve in the Manly until paid off in September, 1815, and had thus an opportunity of being again employed in the Chesapeake, and of accompanying the expedition to New Orleans. He became Commander on the "O" List in 1868.

Brevet Lieutenant-Colonel J. E. D. Hill, half pay, late 63rd Regiment, joins the Staff of Major-General Farren, C.B., at Barbadoes, as Assistant Military Secretary, vice Major S. Graves, 3rd Buffs, who has vacated on promotion. Colonel Hill served with the 97th Regiment in the Crimea from July 29, 1855, including the siege and fall of Sebastopol, and was one of the Lieutenants of the ladder party at the attack of the Redan on September 8, on which occasion he was wounded in the left hip, and mentioned in dispatches for "distinguished conduct" (medal with clasp and Turkish medal). He entered the Army February 13, 1855, and became Lieutenant-Colonel October 7, 1876.

By desire of Colonel North, a return has been published giving interesting particulars as to the Army Medical Department. From this, it appears that the total number of medical officers on January 1, 1868, was 1,027; by January 1, 1869, this number had risen to 1,050; in January, 1870, it was 1,038; in January, 1871, 985; in January, 1872, 986; in January, 1873, 961; in January, 1874, 938; in January, 1875, 909; in January, 1876, 885; in January, 1877, 841. The establishment fixed upon by the Estimates of 1876-77 was 907; and the number of vacancies in February 23, 1877, was 58. The establishment for 1877-78 is—administrative, 41; executive, 885; the vacancies on February 23, 1877, in executive grades only, being represented as 36.

Whether human talents flourish best under the light of freedom, or the obscurity of despotism, must be a matter of doubt. We have now in our midst a specimen of a very vigorous plant reared in the cold shade of the latter, a few years past an unknown officer in the Imperial Army of Russia, but now occupying a most prominent position, and possibly destined to direct the fortunes of an empire. We should almost fancy that in the land of Geist one must be feeling a possible pang of *eifersucht* at the appearance of this flourishing plant. However, there is balm in Gilead for all such sufferers in the recollection that everything at the best is but vanity and vexation of spirit.

The friends of Lieutenant-General C. A. Edwards, C.B., will be glad to learn that that officer is to be given the regimental Colonelcy, left vacant by the death of General J. Spink. General Edwards lately held the appointment of Inspector-General of Recruiting for five years, having vacated in August, 1873, in favour of Major-General R. C. H. Taylor, C.B., now Deputy Adjutant-General. General Edwards served with the 18th Royal Irish throughout the war in China (medal); was also present at the attack upon Canton, the taking of Amoy, Chapoo, Woo Sung, Shanghai, and Chin-Kiang-Foo, and at the concluding operations before Nankin; was employed on the Staff during the war, and afterwards appointed by Lord Gough Assistant Quartermaster-General to the force in China. He served also with the 18th Royal Irish in the Burmese war from July, 1852, to the conclusion; was at the taking of Prome, and employed on a detached command for six months, when the Provinces of Padoung and Kanghein were cleared of the enemy, after several skirmishes and severe marches by the detachments under his command. In January, 1853, he led a party on special service from Prome to Arracan, for which service the Government of India and General Godwin recorded their approbation (medal with clasp for Pegu, and Brevet of Lieutenant-Colonel). Served in the Crimea from December 30, 1854, including the siege and fall of Sebastopol (medal with clasp, C.B., Brevet of Colonel, Knight of the Legion of Honour, Third Class of the Medjidie, and Turkish medal). Commanded the brigade at Mhow at the termination of the Mutiny in 1858-59, and received the thanks of the Governor-General in Council for the promptness of measures whereby the rebels under Tantia Topee were prevented entering Kandeish. He joined the Army June 11, 1829; became Major-General, April 19, 1868; and Lieutenant-General, March 17, 1876.

Captain F. H. Dyke, 69th Regiment, has been appointed Garrison Instructor at Colchester, vice Captain L. F. B. Cary, Rifle Brigade, transferred to the Royal Military College as an Instructor. Captain Dyke, who passed from the Staff College in December last, entered the Army June 30, 1857, and became Captain May 5, 1869.

The following promotions take place in the Army, consequent upon the death of General J. Spink, Colonel of the 2nd Queen's, which occurred on the 14th instant, viz.:—Lieutenant-General Sir C. H. Doyle, K.C.M.G., Colonel of the 87th Fusiliers, to be General; Major-General T. Brooke to be Lieutenant-General; Colonel Hon. F. A. Thesiger, C.B., half pay, late 95th Regiment, commanding a brigade at Aldershot, to be Major-General; Major A. Templeman, 21st Fusiliers, to be Lieutenant-Colonel; and Captain J. H. Culme-Seymour, 82nd Regiment, to be Major.

Why should not the Infantry Brigade-Majorship at the Curragh be filled, as all similar appointments are, for five years by an officer on the Home establishment who holds a Staff College certificate? There is no station in Ireland where a Brigade-Major is more urgently required, and yet the appointment is referred to as a "temporary" one, and, because it is a temporary one, it is only given provisionally. We cannot think this arrangement desirable. It would be bad enough at any quiet station; it must be ten times worse at a tactical camp like the Curragh.

The promotion of Brigadier-General the Hon. F. A. Thesiger, C.B., leaves a Queen's Aide-de-Campship vacant. Colonel Thesiger has been now within a few days of three months the senior Colonel of the Army, no vacancy having occurred among the General officers on the General List of the Line since December 22 last.

The two years' extension of service which, as we announced last week, has been sanctioned in the case of Captain F. C. H. Clarke, Royal Artillery, Deputy-Assistant Quartermaster-General on the Staff of the Intelligence Department, has been allowed, to enable the officer to proceed with the important duty upon which he has for some time past been engaged—that of translating into English the German official account of the Franco-German war of 1870-71.

Captain C. F. Colvile, having arranged an exchange from the 2nd to the 1st Battalion of his regiment, the 11th, is allowed to retain his appointment as Brigade-Major on the Staff of the Belfast District, on the departure of the head-quarters of his battalion for India.

Captain A. C. Allinson, 1st West India Regiment, has been appointed Aide-de-Camp and Private Secretary to Surgeon-Major S. Rowe, C.M.G., Governor of Sierra Leone. Captain Allinson entered the Army April 24, 1862, and became Captain December 24, 1873.

Major-Gen. H.S.H. Prince Edward of Saxe-Weimar, C.B., left England on Monday, and proceeded to Berlin in order to convey the Queen's congratulations to the German Emperor on the eightieth anniversary of his Imperial Majesty's birthday.

Lieut.-Gen. Sir Francis Seymour, K.C.B., left London on Thursday for Darmstadt, where he will represent her Majesty at the funeral of his Grand Ducal Highness Prince Charles of Hesse.

In answer to Capt. O'Beirne, Mr. Hardy said on Monday it was not his intention in the present Session to make any proposal to the Treasury upon the subject of "the stoppages from officers' pay for the foraging of horses they are compelled to keep for the public service." His attention had not been called to the correspondence between the Treasury and the War Office in December, 1859, and January, 1860; but he could not admit that the sole reason for continuing those stoppages was the increase in the marketable value of the commissions thereby said to be occasioned.

THE EASTER VOLUNTEER REVIEW.

The Major-General Commanding the Home District has sanctioned the attendance of the undermentioned Volunteer corps at the review authorised to be held near Dunstable on Easter Monday, April 2, 1877. The force will be organized in two divisions, each of three brigades, according to the following detail:—

Head-quarter Staff.

Major-Gen. F. C. A. Stephenson, C.B.; A.A.G. and A.Q.M.G., Lieut.-Col. Blundell, Grenadier Guards; D.A.A. and Q.M.G., Capt. Hon. E. Primrose, Grenadier Guards; A.D.C.'s, Lieut. Knollys, Scots Fusilier Guards, and Capt. Hummell, 11th Middlesex R.V.

Umpire Staff.

Col. A. Lane-Fox, 48th Brigade Depot; Col. Hyde Page, 47th Brigade Depot; Col. Maunsell, C.B., 41st Brigade Depot; Col. Woolsey, R.A., Inspector of Auxiliary Artillery; Lieut.-Col. Howard Vincent, 40th Middlesex R.V.

First Division, Dunstable.

Col. Sargent, C.B., commanding; A.A.G. and A.Q.M.G., Lieut.-Col. Twynam, 15th Regiment, and Major Dalrymple, 88th Regiment; A.D.C., Capt. Drage, 52nd Light Infantry.

Hon. Artillery Company.—Four 6-pounder guns and 40 rank and file.

First Brigade.—Commander, Lieut.-Col. Fitzroy, Coldstream Guards; Brigade-Major, Capt. Hon. R. Campbell, Coldstream Guards—11th Middlesex Rifles, 326; 28th Middlesex Rifles, 400; 37th Middlesex Rifles, 384; 39th Middlesex Rifles, 380; 46th Middlesex, 243—Total, 1,733.

Second Brigade.—Commander, Col. Burnaby, Grenadier Guards; Brigade Major, Capt. Ricardo, Grenadier Guards—1st London Engineers, 200; 2nd Adm. Batn. Middlesex Rifles, 360; 7th Surrey Rifles, 266; 1st Adm. Batn. Tower Hamlets Rifles, 515—Total, 1,341.

Third Brigade.—Commander, Lieut.-Col. Davies, Grenadier Guards; Brigade Major, Hon. E. Boscawen, Coldstream Guards—1st Middlesex Rifles, 100; 4th Adm. Batn. Surrey Rifles, 197; 36th Middlesex Rifles, 500; 3rd Adm. Batn. Essex Rifles, 320; 3rd London Rifles, 334; 2nd Adm. Batn. Herts Rifles, 144; 9th Northampton Rifles, 56; 13th Surrey Rifles, 40—Total, 1,591. Total Division, 4,665.

Second Division, Stanbridge.

Col. Lord Abinger, Scots Fusilier Guards, commanding; A.A.G. and A.Q.M.G., Lieut.-Col. Gascoigne, Scots Fusilier Guards, Major Vigors, 19th Regiment; A.D.C., Sub-Lieut. Brett, Scots Fusilier Guards.

First Brigade.—Commander, Col. Fletcher, Scots Fusilier Guards, C.M.G.; Brigade-Major, Capt. Montgomery, Scots Fusilier Guards; A.D.C., Lieut. Hon. G. Vernon, Scots Fusilier Guards—2nd Middlesex Rifles, 324; 15th Middlesex Rifles, 220; 19th Middlesex Rifles, 550; 22nd Middlesex Rifles, 400; 29th Middlesex Rifles, 220; 38th Middlesex Rifles, 250—total, 1,964.

Second Brigade.—Commander, Lieut.-Col. Viscount Ranelagh; Brigade-Major, Capt. Boyle, Rifle Brigade; A.D.C., Lieut. A. Jones, 2nd Middlesex Rifles; Extra, Sub-Lieut. A. James, Royal Bucks Yeomanry—9th Middlesex Rifles, 100; 18th Middlesex Rifles, 79; 1st Tower Hamlets Rifles, 350; 33rd Lancashire Rifles, 700; 2nd Oxford Rifles, 300; 1st Adm. Batn. Herts Rifles, 258; 1st Adm. Batn. Beds. Rifles, 326—total, 2,113.

Third Brigade.—Commander, Col. Earle, C.S.I., Grenadier Guards; Brigade-Major, Capt. Savory; A.D.C., Lieut. Hon. R. Carington, Grenadier Guards—7th Adm. Batn. Middlesex Rifles, 400; 20th Middlesex Rifles, 300; 21st Middlesex Rifles and 1st London Rifles, 423; 2nd London Rifles, 250; 1st Middlesex Engineers, 13th Lancashire Rifles, 47th Lancashire Rifles, and 1st Bucks Rifles, 435; total, 1,808. Total of division, 5,885.

General Idea.

An army concentrated at Cambridge marches on Bedford to sever the direct lines of railway connecting London with the north, detaching a division to the neighbourhood of Dunstable for the protection of its left flank. This division, on approaching Dunstable, receives information that the advanced guard of an opposing force advancing from the direction of Leighton has occupied the Castle of Lottenhoe. The action commences with an attempt to dislodge it.

THE ORDER OF ST. MICHAEL AND ST. GEORGE.

The Queen has been pleased to approve the following promotions and appointments in the Order of St. Michael and St. George:—

To be Members of the Second Class or Knights Commanders—Sir Henry T. Holland, Bart., M.P., C.M.G., late Assistant Under Secretary of State in the Colonial Office; Mr. W. W. Cairns, C.M.G., Governor of South Australia; Lieut.-Col. H. F. B. Maxse, C.M.G., Governor of Heligoland; and Mr. W. Fitzherbert, C.M.G., formerly Colonial Treasurer in New Zealand, and special agent for that colony in England.

To be Members of the Third Class or Companions—Mr. C. H. Kortright, Governor of British Guiana; Lieut.-Col. W. Crossman, R.E., lately Special Commissioner to Griqualand West; Mr. H. Lushington Phillips, Puisne Judge in Natal, and lately Acting Chief Justice of Barbadoes; and Col. Mattei, Royal Malta Fencible Artillery.

It has been intimated to Gen. Sir Charles Van Straubenzee, Governor of Malta, whose period of office ends next April, that he may hold his present appointment for another year. If his health permits the General will accept the offer.—*Whitehall Review*.

We (*China Telegraph*) understand that Col. A. E. H. Anson, C.M.G., Royal Artillery, Lieut.-Governor of Penang, will act as Governor of Singapore during the absence of Col. Sir W. Jervois, K.C.M.G., C.B., in Australia, which it is expected will not exceed six months.

In answer to Mr. Seely, Mr. W. H. Smith said, on Thursday, a committee had been appointed with the view of framing a scheme for the reorganization of the War Department, so far as it might be possible to adapt the recommendations of the report of the committee to the administration of the War Department and conduce to the efficiency of the public service. A committee was also about to be appointed to inquire into the constitution of some of the branches of the Admiralty. The "Naval" Department of the Admiralty referred to by the hon. member had already been inquired into and the salaries were readjusted, and this department would not, therefore, form the subject of further inquiry.

The Army.

4th Dragoon Guards. Lieut.-Col. Gunter, lately promoted to the command from the 1st Dragoon Guards, has been twenty-four years in the Army, and the whole time in the King's Dragoon Guards, with which regiment he has seen much service in various parts of the world, including the Crimean war, India, and China war, in the latter of which he, then Capt. Gunter, was recommended for the Victoria Cross for gallantly saving the life of Capt. Luard, of Fane's Horse, when dismounted, wounded, and surrounded by Tartars at the action at Tangchow, near Pekin, on Sept. 21, 1860. Col. Gunter, on his return to England, was presented with a silver-mounted sword by Col. Luard, in grateful acknowledgment of his gallantry in saving his son's life.

5th Dragoon Guards. As was arranged some weeks ago, Capt. Bourne obtains the majority.

6th Dragoon Guards (Carabiniers). Major Fryer succeeds Col. Napier in command, Capt. Salis-Schwabe being promoted to the majority.

7th Dragoon Guards. The regimental steeplechases will take place on the Newbridge Course on the 5th proximo.

3rd Hussars. Lieut.-Col. Blundell has applied for leave from India to England, on medical certificate.

6th Dragoons. Col. the Hon. C. W. Thesiger and the officers gave a farewell ball in the Exhibition Palace, Dublin, on Tuesday night. The Duke of Connaught honoured the battalion with his presence. The ball, we are assured, was a most enjoyable one; and the attention the company received is spoken of in the very highest times. The Inniskillings will be greatly missed in Ireland, and carry with them the best wishes of the entire community of Dublin, in which city they have occupied quarters throughout the winter.

10th Hussars. Capt. Battine, adjt. of the Warwickshire Yeomanry, has applied to be brought in to the vacant troop from the Supernumerary List.

12th Lancers. The services of Lieut. Benson have been placed permanently at the disposal of the Lieut.-Governor of the North-Western Provinces of India, for employment on his Excellency's personal Staff.

18th Hussars. Lieut. and Adjt. Knox obtains the troop vacant in consequence of Capt. Hooper's retirement.

20th Hussars. The *Brighton Herald* says:—"Another instance was afforded on Tuesday evening of the liberal spirit in which the officers of the 20th view their relations to Brighton society, in the shape of a dramatic entertainment at the Brighton Theatre, the audience—a very select one—being present by special invitation. They had previously shown how well they could discharge the duties of hosts in the ball-room and the banquetting-hall; but, so far as Brighton is concerned, their appearance on the boards on Tuesday evening was a step in another direction. The result proved that they were quite qualified to take it. The *pièce de résistance* was Robertson's comedy of 'Caste.' The comedy was most efficiently supported; but the chief honours of the performance were divided between Capt. FitzGeorge (20th Hussars) and Capt. Glass (R.A.), who appeared as Capt. Hawtree and as Eccles respectively. The comedy was followed by an original burlesque, entitled 'Round the World in W'Eighty Days.' Capt. FitzGeorge was in his element as Baron Qui Va, singing and dancing with much spirit; and at the conclusion, in response to loud calls for the author, Capt. FitzGeorge appeared and bowed his acknowledgments."

Royal Artillery.

Col. C. H. Dickens, C.S.I. (late Bengal), the late Secretary in the Public Works Department, Bengal, has had a farewell dinner. A Calcutta paper says:—"Col. Dickens' career has been of the quiet, unobtrusive character which attracts little attention from the outside world, but it has created admiration and affection among those who have been so fortunate as to be brought into contact with him. He entered the Bengal Artillery so long ago as June, 1838, and has, therefore, served nearly thirty-nine years."

The Ordnance Committee, which has assembled at Calcutta under the presidency of Col. Napier Campbell, R.A., includes Lieut.-Col. Clarke, R.A., Depty. Inspr.-Gen. of Ordnance, Bombay, Major Welsh, R.A., Depty. Inspr.-Gen. of Ordnance, Bengal, Capt. Pritchard, Examiner of Ordnance Accounts, and Major W. H. Noble, R.A., for many years the scientific adviser of the War Office, who has been sent out from England to act as secretary. The Committee will consider many important questions connected with the maintenance of reserves of war material and the general duties of the Ordnance Department, and is expected to devise a uniform method of keeping accounts to be used in all Ordnance factories and arsenals throughout the country.

According to the Woolwich correspondent of the *Morning Post*, "The first movement in the break-up and distribution of the Royal Artillery Depôt establishment took place on Saturday, when C Bat. Depôt Brigade proceeded to Sheffield to be attached to the Field Brigade which is to be localized at that station. In a few days D Bat. Royal Horse Artillery will also be detached from the depôt at Woolwich and join the Royal Horse Brigade at Aldershot. One of the new depôt batteries ordered to be created has been formed out of the two divisions of the Depôt Brigade at Woolwich and Sheerness, and will shortly proceed to the Curragh in connection with one of the Dublin Brigades."

Major G. O'Connor, 8th Brig., Capts. T. B. Tyler, Riding Establishment, and A. J. Saunders, 6th Brig., and Lieut. W. T. G. Denny, 4th Brig., arrived home from India on Sunday last in H.M.S. Crocodile.

Lieut.-Col. F. W. Stubbs, 19th Brig. (late Bengal), has been transferred for duty from Barrackpore to Lucknow.

Capt. and Adjt. F. C. Nicholas, 9th Brig., and Vet.-Surg. J. B. W. Skoulding, F Brig. R.H.A., have been granted leave from India to England, on medical certificate.

Capt. F. W. M. Spring (late Bombay), Commissary of Ordnance, has been granted furlough from India to England for one year, on private affairs.

Capt. S. Murray, Superintendant of the Gunpowder Factory at Ishapore, has been appointed a Commissioner of Ordnance, 3rd Class, in Bengal, vice Capt. H. M. Mackenzie.

Capt. J. G. Pollock (late Madras) has applied for furlough from India to England.

Major J. Ford, 21st Brig. (late Madras), is about to retire on the pension of his rank.

Lieut.-Col. J. E. Cordner, 19th Brig. (late Bengal), has been assigned local rank as col. in India from Dec. 13, 1876.

The *Irish Times* announces the appointment of Lieut.-Col. H. L. Balfour, R.A., to command the Auxiliary Artillery in the Dublin District. Col. Balfour entered the Army June 20, 1849, and became lieut.-col. July 1, 1874.

Lieut.-Col. A. H. Murray, 13th Brig., has been appointed officiating depty. adjt.-gen. of Artillery in India, during the absence of Col. C. G. Arbuthnot, C.B., on nine months' leave on medical certificate.

Royal Engineers.

Capt. C. Crawford (late Bengal) has applied for leave from India to England.

1st or Royal Scots. The 1st Batn. is expected to proceed to the Curragh in June, and is likely to remain there during the ensuing winter. Lieut. Coats, 2nd Batn., a probationer, officiating wing officer 25th Bengal N.I., is to be admitted to the Bengal S.C., with effect from Dec. 18, 1875.

2nd Queen's. The colonelcy has become vacant by the death, at his residence at South Norwood Park, on the 14th inst., of Gen. John Spink, K.H. The general served with the light company of the 12th Regt. in several actions in the Travancore war, East Indies. He was severely wounded through the leg when leading a night attack against the enemy's position at St. Mary, in the Island of Bourbon. He was present also at the capture of the Isle of France, where his company, armed with rifles, formed the advance immediately on the disembarkation of the troops, and with which he was constantly engaged with the enemy during the three days' march on Port Louis. His commissions bore date as follows, viz.:—Ensign, Sept. 2, 1806; lieut., March 9, 1807; capt., Oct. 13, 1812; major, May 13, 1824; lieut.-col., May 20, 1826; col., Nov. 23, 1841; major-gen., Nov. 11, 1851; col., 2nd Queen's, May 28, 1857; lieut.-gen., Oct. 26, 1858; and gen., Jan. 12, 1865. Col. Rose, 1st Batn., has been granted an extension of leave from India to England from Dec. 31, 1876, to Oct. 8, 1877. Lieut. Adams, 1st Batn., has arrived home from India in H.M.S. Crocodile.

4th King's Own. The Kildare fox-hounds met at the mess-house of the 2nd Batn. at the Curragh on the 15th inst., when the officers entertained the master and members of the Hunt at breakfast. The meet was a large one—about 150. There was a Hunt dinner at the mess the night before.

7th Fusiliers. Capt. Beauchamp, 2nd Batn., has arrived home from India in H.M.S. Crocodile.

8th King's. Lieut. Harrison, 1st Batn., has arrived home India in H.M.S. Crocodile.

9th Regiment. The command of the 1st Batn. is about to fall vacant by the retirement of Col. Hawes. Brevet Major Roberts and Lieut. Shepherd, 2nd Batn., have arrived home from India in H.M.S. Crocodile.

11th Regiment. Lieut. Ryland, 1st Batn., is a candidate for the Indian S.C., and has been appointed to the 40th Bengal N.I., on probation.

12th Regiment. The depôts of the 1st and 2nd Batns. moved on the 16th inst. from Gravesend to Gosport, and are quartered at Forts Wallington and Nelson on Portsdown-hill, vacated by the 2nd Batn. 19th Regt.

15th Regiment. Col. Wilkinson, 2nd Batn., has been granted leave from India to England for six months, on private affairs. Paymr. (Major) Hopson, has arrived home in H.M.S. Crocodile.

17th Regiment. Lieut. Allfrey, 1st Batn., has arrived home from India in H.M.S. Crocodile.

18th Royal Irish. Lieut. Forster, 1st Batn., has arrived home from India in H.M.S. Crocodile.

19th Regiment. The 2nd Batn. has moved from the Portsdown-hill Fort to Parkhurst, I. of W., the station to which it was originally assigned. The change of station on the landing of the battalion was occasioned by the appearance of sickness on board the troopship which conveyed it from India, but this has now disappeared.

24th Regiment. Lieut. Moffat has been appointed her Majesty's Vice-Consul at Sebastopol.

25th Regiment. Lieut. Bather, 1st Batn., has been granted six months' leave from India to England, on private affairs.

33rd Regiment. Brevet Lieut.-Col. Chadwick has been assigned local rank as col. in India from Oct. 10, 1876.

39th Regiment. Lieut. Rudyerd and Lieut. and Adjt. Fenwick have been granted leave from India to England, on medical certificate.

43rd Light Infantry. Capt. Money has reached England from India in H.M.S. Crocodile.

48th Regiment. Lieut. Welchman is a candidate for the Indian S.C., and has been appointed wing officer of the 1st Hyderabad Infantry on probation. Lieut. Bennet has arrived home from India in H.M.S. Crocodile.

Royal Marines.

Capt. H. Fuller will relieve Capt. and Brevet Major Poore, R.M.A., on the 31st inst. in command of the recruiting party stationed at Derby.

51st Light Infantry. Capt. Carter and Lieut. Burnett arrived home from India on Sunday last in H.M.S. Crocodile.

54th Regiment. Lieut. Deane is a candidate for the Indian S.C., and has been appointed to the 5th Bengal N.I. on probation.

55th Regiment. H.M.S. Crocodile, with the head-quarters and service companies on board, arrived at Portsmouth on Sunday evening last from Bombay and Aden. The regiment landed on Monday and went into the new barracks, Gosport. The officers who arrived in the Crocodile were—Lieut.-Col. Hume, Majors Morgan and Rowland, Capts. Gillies, Riley, Kay, Ogden, and Cargill; Lieuts. Braddon, Pitt (adjt.), Drew, Inglis, Brind, Eyton, Money-Kyrle, and Burke; Paymr. (Major) Burke, Qrmr. Vickers, and Surgs.-Major Berkeley and Baker. During the passage from Bombay one man, one woman, and two children died.

56th Regiment. Lieut. Parker is a candidate for the Indian S.C., and has been appointed to the 41st Bengal N.I. on probation.

66th Regiment. Lieut. Hassard has passed the higher standard examination in Hindostanee. Lieut. Pigott has arrived home from India in H.M.S. Crocodile.

68th Light Infantry. Lieut. Yate is a candidate for the Indian S.C., and has been appointed to the 25th Bengal N.I. on probation.

70th Regiment. Lieut. Maturin arrived home from India in H.M.S. Crocodile on Sunday last.

72nd Highlanders. Capt. Tingcombe has arrived home from India in the Crocodile. Lieut. White has passed the lower standard examination in Hindostanee. Lieut. Spens has been granted leave from India to England for fifteen months, on private affairs. Lieut. Lendrum has been granted leave from India to England for fifteen months, on private affairs.

73rd Regiment. Capt. Hewson has been assigned local rank as major in India, with effect from June 6, 1876.

74th Highlanders. We learn from the Straits that—"The head-quarters and service companies arrived at Penang in H.M.S. Orontes on Jan. 9, after a most pleasant voyage. Orders were received for the head-quarters to disembark there in relief of the 1st Batn. 10th. The Orontes was then employed (assisted by H.M.S. Magpie) in carrying out the reliefs of the detachments of the 10th and 80th Regts. in Perak and Malacca, and arrived at Singapore on Jan. 16. The distribution of the 74th is as follows:—Head-quarters and one company at Penang Barracks, under Lieut.-Col. Jago; one company (Capt. Colville's) at Fort Cornwallis, Penang; one company (Capt. M'Laren's) at Martang, Perak River; one company (Capt. Wallace's) at Qualla Kansa, Perak River; one company (Capt. M'Alpine's) at Banda Bahru, Perak River; one company (Capt. Hamilton's) at Malacca; one company (Capt. Deare's) at Tanglin, Singapore; and one company (Lieut. Hay's) at Fort Canning, Singapore. Col. M'Leod is at Singapore, having taken over the command of the troops in the Straits Settlements and Perak on Jan. 10."

76th Regiment. Brevet Major Franklin has arrived home from India in H.M.S. Crocodile.

84th Regiment. The Horse Guards have consented to allow Capt. O'Grady Haly to continue in his appointment as aide-de-camp to Lieut.-Gen. Sir O'Grady Haly, K.C.B., in Canada, notwithstanding the length of time he has been absent from his regiment. Capt. Gore has been appointed Superintendent of Gymnasia in the Dublin, Curragh, and Belfast Districts, vice Lieut. Blaxland, 99th Regt., retired from the Service.

91st Highlanders. Capt. O'Sullivan has passed the special Army examination, and has been awarded a first class certificate.

109th Regiment. Lieut. Lay has passed the lower standard examination in Hindostanee.

Rifle Brigade. It is believed, says the *Irish Times*, that the 1st Batn. will leave the Curragh on the termination of the drill season at the end of August and pass the winter at Fermoy. Capt. Anstruther, 1st Batn., is said to have been noted for employment on the Staff of the Division to be assembled at the Curragh for drill during the summer. We regret to announce the death, which occurred on the 14th inst. at Cannes, of Capt. the Hon. J. C. Amherst, on the Half-Pay List, at the comparatively early age of thirty-two years. The deceased was the fourth son of the Earl and Countess Amherst, and entered the Army June 14, 1863; became lieut., May 29, 1867; capt., June 14, 1875; and retired upon half pay Nov. 11, 1876.

2nd West India Regiment. Lieut. Masters is about to exchange into the Royal Scots.

Medical Department. Surgs.-Major J. Tulloch, H. Sherlock, and W. Collis, and Surgs. W. F. Burnett, E. Townsend, and R. Drury are detailed for duty with troops returning home from India in H.M.S. Malabar. Surg.-Major W. J. Page has passed the lower standard examination in Hindostanee. Surgs.-Major G. White and J. Watts, and Surgs. J. C. Clery and E. H. Joynt, M.D., arrived home from India on Sunday last in H.M.S. Crocodile. The *Medical Press and Circular* holds that—"Of the many signs of Army medical decadence which it has been our painful duty to notice during the past three years, nothing has at all approached the evidence of degeneracy afforded by the last examination. According to Mr. Hardy's statement in the House of Commons, twenty-three candidates presented themselves for fifty vacancies, and according to the published results of the examination only seventeen succeeded in obtaining the minimum of marks required to qualify for admission. Thus it appears that more than one-fourth of the total number of applicants were absolutely unfit to be allowed into the Medical Department under any circumstances. This, we unhesitatingly repeat, is a proportion of unworthiness never before known since the competition system was first instituted, nearly twenty years ago, and it proves too plainly the grade of applicants to which the medical appointments have now descended. Whether, under these circumstances, Parliament will permit Mr. Hardy to continue his destructive experiment for a 'much longer trial,' remains to be seen."

THE AUXILIARY FORCES.

MILITIA.

Royal Bucks. It is decided that the regiment shall train at Aldershot this year. It will assemble on May 7. The recruits are undergoing preliminary drill in Lord Carington's park at Aylesbury.

2nd Royal Middlesex. The recruits assemble for preliminary drill at Barnet on the 9th prox., and the old hands on June 4, for training. The regiment is to train at Aldershot.

Highland Rifles. Early in February a public meeting of fish-curers and traders was held at Stornoway to protest against the period fixed for the training this year—the dates being—recruits, March 23 to June 14; trained men, June 15 to July 11. The Lews furnishes about 400 men to the Militia, and it was contended that the assembling of Militia on the above dates would seriously interfere with the prosecution of Lews early herring fishing, and prevent Militiamen taking part in the east coast herring fishing. The meeting referred to recommended that recruits be called on Feb. 11, and trained men on April 17. The meeting forwarded a memorial to the Secretary of War on the subject, and intimation has now been made that trained men will be called up on April 6, and recruits on Sept. 21.

Limerick City Artillery. The officer commanding has been authorised to continue to enrol men for his regiment as supernumeraries, with a view of ultimately increasing its number of batteries.

The Marquis of Exeter moved on Tuesday for returns showing the strength of each Militia regiment in the United Kingdom on Jan. 1, 1876, and on Jan. 1, 1877; the number of recruits obtained between those dates; the number discharged, promoted, or transferred, and the number who deserted; and the total increase or decrease in 1876.

VOLUNTEERS.

The opening parade of Volunteers for the present year was held on Saturday last, when Col. Lord Abinger, Scots Fusilier Guards, headed what is termed the "grey" brigade for the purpose of route marching. Eight Volunteer corps were invited to participate, and the parade commenced at the Mansion House, in front of which punctually at half-past 5 a guard of honour of one hundred men of the 1st Adm. Batn. Tower Hamlets Rifles was drawn up, together with its band and that of the Scots Fusilier Guards. At a quarter to 6 the guard was called to attention, and received the Lord Mayor and Lady Mayoress, together with two of her ladyship's sisters, escorted by Lord Abinger, Lieut.-Cols. Gascoigne and Astley, and Capt. Montgomery, Scots Fusilier Guards, and the City Marshal, with a salute. The order for marching off was then given. Immediately following the Staff came the Tower Hamlets Rifle Brigade. In the rear of them came the 1st Tower Hamlets Adm. Batn. The march continued along Queen Victoria-street to the Thames Embankment, at various points of which the 23rd Middlesex, 19th Middlesex, London Scottish, and Artists passed the brigade. At Whitehall-place the South Middlesex and the Queen's Westminster completed the force, the total number of all ranks present being slightly over 3,500. The line of route from this point was by Whitehall, Charing-cross, Pall-Mall, St. James's-street, and Piccadilly, to Hyde-park-corner, where the Lady Mayoress and party fell out, taking up position under the shadow of the "Iron Duke," while the brigade marched past with shouldered arms. Continuing their route down Grosvenor-place, the Volunteers marched back by the Buckingham Palace-road, past Wellington Barracks, and by Storey's-gate and Great George-street to the Embankment, the parade being dismissed at the Temple.

THE INDIAN ARMY.

5th Bengal N.I. Lieut. H. A. Deane, 54th Foot, a candidate for the Indian S.C., has been appointed wing officer on probation.

10th Bengal N.I. Major R. F. Firth, wing commander, has been granted leave from India to England for two years on private affairs.

13th Bengal N.I. We learn by private letter from Agra that the annual musketry course was delayed this year till the receipt of Sniders. Three companies have been put through, showing a vast improvement in the results on former seasons. Lieut.-Col. W. Playfair is expected to rejoin shortly. Lieut. E. H. Molesworth has been examined in the higher standard, but it is yet unknown whether he has passed or not. Lieut. H. T. Faithful, R.A., a probationer for the Bombay S.C., has recently been attached to the regiment. He is said to be a smart, promising officer. He will make a first-rate adjutant. It has been said of late that the system allowing but five years' term of command, lately inaugurated in the British Army, might with considerable benefit have been extended to the Indian. Promotion is at a dead stop; the number of field officers daily increases, and most of these are doing the work allotted to subalterns in British corps. The commanders of some native regiments have held their posts from ten to sixteen years. They are tired of the work (as well they may be), but not of the fine pay they draw, which is no wonder. Many of these forget that progress is the rule of the age, and continually refer to "their times;" cherish "great expectations" regarding brigade commands, while the juniors, who bear the burden of the day, wait, though not with the calm good-humour of Micawber, for a better state of things "to turn up."

24th Bengal N.I. Lieut. G. Wingate, officiating wing officer 36th Bengal N.I., has been appointed wing officer, vice Prichard, deceased.

25h Bengal N.I. Lieut. W. G. Yate, 68th Foot, a candidate for the Indian S.C., has been appointed officiating wing officer on probation.

32nd Bengal N.I. Lieut. C. Hogge, wing officer, has been confirmed in the appointment of adjt.

37th Bengal N.I. Capt. T. D. Madden, wing commander, has been granted leave from India to England for two years on private affairs.

40th Bengal N.I. Lieut. H. G. Ryland, 11th Foot, a candidate for the Staff Corps, has been appointed wing officer on probation.

41st Bengal N.I. Lieut. Parker, 56th Foot, a candidate for the Staff Corps, has been appointed officiating wing officer on probation.

45th Bengal N.I. Major-Gen. Sir Henry Norman presented colours to the regiment at Alipore on the 20th ultimo. Sir Henry Norman addressed the native officers and soldiers in Hindostanee as follows:—"Soldiers of the 45th Regiment,—It has been a great pleasure to me to present to your regiment to-day, at the request of your colonel, the colours which have been entrusted to your charge by her Majesty the Empress of India. Although your regiment now receives colours for the first time, those colours have inscribed on them the record of two services borne by no other regiment—'Behar' and the 'Defence of Arrah.' Your regiment did most excellent and loyal service in many parts of Behar during the troubles of 1857, and some of you now present distinguished yourselves in that service. The defence of Arrah deservedly gained for the sepoys of this regiment the highest credit, and I am happy to see here to-day the native officer who worthily commanded the detachment of the corps at that place, and to whom I shall presently give a mark of the further favour of Government. Remember that those colours are to be carried to whatever place you are ordered to proceed, and that you are to defend them, if need be, with your lives. You will, I have no doubt, follow the example of the soldiers of the regiment who behaved with distinguished bravery and loyalty in other days. Be obedient to your officers, strive to be proficient in all your duties, and especially in rifle practice; and it is quite certain that whenever employed on active service the soldiers of the 45th Regiment will win a high reputation for themselves, as well as for the Army to which they belong." Col. Basden, in reply, said:—"In the name of the regiment, I tender you our most cordial thanks for the honour you have done us this day. It is a great gratification to receive the colours from the hands of so distinguished an officer in the same Service as ourselves. The encomiums you have bestowed on the regiment, coming from one so intimately acquainted with the Native Army, its races, organisation, its strong points, and its shortcomings, we feel to be praise indeed. The good services you allude to in the past will, I am convinced, be emulated in the future when opportunity offers. Although time has necessarily thinned the ranks of very many of the brave soldiers who proved so faithful in the mutiny, their successors, coming of the same martial race, and with the achievements of their fathers ever before their eyes, emblazoned in the colours now confided to their care, will, I feel sure, when the hour arrives, by their devotion and courage, accomplish deeds worthy of being recorded beside the words—'Defence of Arrah.'" After this, at Col. Basden's request, Sir Henry Norman placed on the breast of Subadar Hokum Singh Bahadoor the decoration of the Order of British India granted to him in Jan. last in consideration of his services, which include the defence of Arrah, where he commanded the detachment of Sikh soldiers with much distinction. This old native officer was formerly in the Sikh army, and was wounded while serving against us, but he has now for many years been a loyal and brave soldier of the British Government. The ceremony was concluded by a march-past and an advance in time to the general salute.

Hyderabad Contingent. An Oomrawuttee correspondent, writing to the *Statesman*, says:—"Your readers may remember that a squadron of the 3rd Cavalry H. C., from Aurungabad, and a detachment of 200 men of the 2nd Infantry H. C., from Jaulna, under the respective commands of Capts. Fitzgerald and Kennedy, formed the escort of his Highness the Nizam (Padsha of the Deccan) to the Imperial Assemblage at Delhi. It is my pleasing duty now to announce that Brigdr.-Gen. Wright, C.B., has issued a very eulogistic and complimentary order on the 'conduct, excellent appearance, and general efficiency' of the escort, and goes on to say, 'not only on themselves, but on their regiments and on the Contingent generally.' His Excellency the Viceroy and Governor-General made a minute inspection of the detachment, and was highly pleased, and desired 'that his sentiments of gratification might be conveyed to all ranks of the force.' The commanding officers of the detachment came in for a good share of the praise. The 3rd Cavalry H. C. won the contest of the Sword *v.* Lance, and carried off the "Viceroy's Cup" in the tent-pegging contest. The Infantry won two prizes at musketry at 200 and 500 yards' range at the Delhi Assemblage. Well might Col. Dowker, commandant of the Cavalry, and Col. Adye, commandant of the Infantry, be proud of their men; or, in the words of the general, 'It must be satisfaction to them to know that the earnest efforts made by them and their officers in the training of their regiments are appreciated by the highest authority in India, and has raised the Contingent in the estimation of the Anmy.'"

1st Hyderabad Infantry. Lieut. F. D. Welchman, 48th Foot, a candidate for the Indian S.C., has been appointed wing officer on probation.

Madras Body Guard. Capt. C. W. Campbell has at his own request been permitted to resign the adjutancy.

16th Madras N.I. Lieut.-Col. W. H. White, wing officer, has applied for leave to England on medical certificate.

8th Bombay N.I. Surg.-Major T. Miller, M.D., officiating in medical charge of the 13th N.I., has been appointed to the medical charge.

12th Bombay N.I. Capt. F. L. Fagan, officiating wing subaltern, has been appointed a sub-assist. comy.-gen. 2nd class, from the 6th ult.

13th Bombay N.I. Surg. Barker, M.D., has been appointed to the medical charge, vice Surg.-Major Miller, transferred to the 8th N.I.

19th Bombay N.I. Lieut. G. E. Walter, 66th Foot, wing officer on probation, has been granted leave to Bombay for six months, to study the native languages.

22nd Bombay N.I. Lieut. A. Smith, wing officer and officiating qrmr., has been appointed qrmr.

26th Bombay N.I. Major J. C. D. S. Moray, wing officer, has been granted leave from India to England on medical certificate.

30th Bombay N.I. Lieut.-Col. W. T. Mills, wing commander, has been appointed to officiate as second in command, and Major F. Humfrey, Bombay S.C., as wing commander, in succession to Lieut.-Col. T. Bell, who has obtained furlough to Europe.

The Army Gazette.

WAR OFFICE, PALL MALL, March 23, 1877.

Chaplains' Department—Chaplain of the Third Class the Rev. J. Y. Barton, M.A., to be Chaplain of the Second Class; March 1, 1877. Chaplain of the Fourth Class the Rev. F. Sadleir, M.A., to be Chaplain of the Third Class; March 14, 1877.

ST. JAMES'S PALACE, March 17, 1877.

The Queen has been pleased to appoint Gen. the Right Hon. Sir W. T. Knollys, K.C.B., to be one of H.M.'s Gentleman Ushers Daily Waiters, in the room of Admiral Sir A. W. J. Clifford, Bart., C.B., deceased.

March 22, 1877.

The Queen has been pleased to direct that Letters Patent be passed under the Great Seal of the Most Noble Order of the Garter, to nominate, constitute, and appoint Gen. the Right Hon. Sir W. T. Knollys, K.C.B., Gentleman Usher Daily Waiter, to be Gentleman Usher of the Black Rod, in the room of Admiral Sir A. W. J. Clifford, Bart., C.B., deceased.

MARLBOROUGH HOUSE, March 22, 1877.

H.R.H. the Prince of Wales has been pleased to appoint Gen. the Right Hon. Sir W. T. Knollys, K.C.B., to be Groom of the Stole to his Royal Highness.

March 22, 1877.

H.R.H. the Prince of Wales has been pleased to appoint Major-Gen. Sir D. M. Probyn, K.C.S.I., C.B., V.C., to be Comptroller and Treasurer of the household of his Royal Highness, in the room of Gen. the Right Hon. Sir W. T. Knollys, K.C.B.

The Militia Gazette.

WAR OFFICE, March 20, 1877.

Where not otherwise specified, the following commissions and announcements bear date March 21, 1877:—

The Royal Cornwall Rangers—Qrmr. J. Murray resigns commission, and is placed on a retired allowance.

Royal Denbigh and Merioneth—Lieut. A. T. A. Sherriff to be Capt.; Charles Roger Mostyn-Owen, gent., to be Sub-Lieut.

1st Derby—Capt. and Hon. Major H. Roberts to be Major.

Hampshire Artillery—Sub-Lieut. A. R. N. Coles resigns commission.

1st Royal Lancashire—Hubert Rowland Pasley Durham, gent., to be Sub-Lieut.

5th Royal Lancashire—Lieut. W. W. Stace resigns commission; Surg. W. M. Coultate resigns commission.

6th Royal Lancashire—Sub-Lieut. E. W. Chambers, from the 3rd Royal Surrey Militia, to be Sub-Lieut.

Royal North Lincoln—Francis Edmund George Astley, gent., to be Sub-Lieut.

Royal London—Lieut.-Col. and Hon. Col. J. H. Allan resigns commission, also is permitted to retain his rank, and to continue to wear the uniform of the regiment on his retirement; Major L. G. Dundas to be Lieut.-Col.; Capt. and Hon. Major J. Britten to be Major.

5th Middlesex—Qrmr. J. Coombes resigns commission and is placed on a retired allowance, also is granted the hon. rank of Capt., and is permitted to continue to wear the uniform of the regiment on his retirement.

Royal Monmouth—Capt. and Hon. Major J. Davies to be Major; Lieut. J. M. Bannerman to be Capt.; Charles Stewart Foote, gent., to be Sub-Lieut. (Supy.).

Royal Montgomery—Peter Audley David Arthur Lovell, gent., to be Sub-Lieut. (Supy.).

2nd or East Norfolk—Henry Clarke, jun., gent., to be Sub-Lieut.

1st Somerset—Charles Edward Stuckey Lean, gent., to be Sub-Lieut. (Supy.).

2nd Somerset—Waltar Hillyar Colquhoun Long, gent., to be Sub-Lieut. (Supy.).

3rd (King's Own) Stafford—Capt. and Hon. Major R. H. Cotton resigns commission, also is permitted to retain his rank, and to continue to wear the uniform of the regiment on his retirement. Capt. A. W. Radford-Norcop resigns commission.

Suffolk Artillery—Lieut. W. B. Rennell resigns commission.

The King's Own Royal Tower Hamlets—Frederic Charles Robert La Fargue, gent., to be Sub-Lieut. (Supy.).

The Royal South Wales Borderers—J. D. Dickinson, Esq., late Lieut. 24th Foot, to be Capt.

1st Warwick—Lewis Lloyd Nicol, gent., to be Sub-Lieut.

Royal Ayr and Wigtown—Sub-Lieut. W. R. E. Dalrymple to be Lieut.; Nov. 4, 1874. Frederick Campbell, gent., to be Sub-Lieut. (Supy.).

Edinburgh Artillery—Frederick Wyllie, gent., to be Sub-Lieut.

The Highland Rifle—Capt. H. Murray resigns commission; Capt. the Hon. W. Stuart, Master of Blantyre, resigns commission.

1st Royal Lanark—Capt. and Brevet Major G. J. Hamilton, 26th Foot, to be Adjt., vice Capt. C. M. Smyth, 26th Foot, who has resigned that appointment; March 13, 1877.

Antrim—Capt. J. B. Whitla resigns commission.

Donegal—Capt. A. N. Gillespey is granted the hon. rank of Major.

Donegal Artillery—Rupert George Inglis Brady, gent., to be Sub-Lieut. (Supy.).

Royal South Down—Richard Keown-Boyd, Esq., late Lieut., Royal Navy, to be Capt.

Dublin City Artillery—Major T. P. O'Meara resigns commission, also is granted the hon. rank of Lieut.-Col., and is permitted to continue to wear the uniform of the regiment on his retirement.

South Mayo—Lieut.-Col. and Hon. Col. S. P. Lea resigns commission, also is permitted to retain his rank, and to continue to wear the uniform of the regiment on his retirement.

Queen's County—Major C. C. Abbott is granted the hon. rank of Lieut.-Col.

Waterford Artillery—Major J. R. Mulcahy is granted the hon. rank of Lieut.-Col.

YEOMANRY CAVALRY.

Royal North Devon—Frederick Haynes McCalmont, gent., to be Sub-Lieut.

Gloucestershire—Lieut. C. H. Palairet to be Capt., vice J. C. Bengough, resigned.

Oxfordshire—Lieut. A. Harcourt resigns commission. The Rev. A. Majendie to be Hon. Chaplain.

West Somerset—Lieut. C. E. J. Esdaile to be Capt.

A Parliamentary return of the amount of shipping estimated for and built in the ten years ending March, 1875, shows that the total number of tons estimated for ironclads in the Royal dockyards was 83,350, the value estimated being £4,486,107. The tonnage of the ships actually built was 75,751, of the value of £4,162,144. The tons estimated for wooden, iron, and composite ships was 88,992, and the value £3,351,560, the tons actually built being 81,604, and the value £2,925,108. During the same period the estimate for ironclads to be built by contract was 46,589 tons, the value being £2,540,156. There were actually built 42,754 tons, of the value of £2,303,493. Of wooden, iron, and composite vessels to be built by contract the estimate of tons was 31,775, and the value £1,292,598. The tons actually built were 26,696, and the value £1,065,200. It appears, therefore, that in the ten years it was proposed to build ships the aggregate tonnage of which should amount to 250,706, at a cost of £12,030,421. The tonnage of ships actually built in that period was 226,805, at a cost of £10,455,945.

The new wing of the Charing Cross Hospital was opened on Wednesday by H.R.H. the Prince of Wales, the ceremony attending which was rendered the more interesting by the unexpected presence of H.R.H. the Princess of Wales, who visited all the wards, giving particular attention to that appropriated to the children, speaking with her usual affability and gentleness to each little sufferer. The hospital is supported by voluntary contributions, and is fast extending in magnitude under the patronage of the Queen. In 1875 it afforded relief to 16,000 patients.

COLONEL BAKER'S REFORMS IN TURKEY.

The correspondent of the *Morning Post* at Constantinople writes, under date March 12:—"Col. Baker presented his preliminary report for the re-organisation of the Bashi-Bazouks to Edhem Pasha on Saturday, who is very pleased with it, and will at once submit it to the authorities entitled to be consulted. It begins by pointing out the defects in the present system, and then suggests the following measures:—The division of the whole force, into police and gendarmerie, the latter having a military organisation and the charge of the whole empire, save the large towns, which the civil police will look after. The gendarmerie will be divided into two corps—European and Asiatic—each corps into two divisions, each division into three brigades. There will be four divisional inspectors and twelve brigade inspectors, all British, as well as an inspector to each corps resident at the capital, and directly under the commander-in-chief of the force, Col. Baker. Each brigade inspector will live in his own district, composed of a group of vilayets. Yemen and the Hedjaz must necessarily be granted a separate system under Mussulman officers. A depôt of instruction will be formed at Constantinople, and all officers must qualify themselves within a given time in the Turkish language. At the schools selected officers and men will be specially trained as instructors, and then distributed over the regiments, battalions, and squadrons of the Empire. This depôt to be under British instruction. A book of regulations, of which every officer must possess a copy and know the contents, will be compiled. A reserve of one regiment of Cavalry and one of Infantry is to be formed of men chosen for good conduct. These regiments would be always ready for instant service. Christians are to be admitted in proportion to their numbers in their respective vilayets. The advantages of this plan, which reflects the highest credit upon Col. Baker, are too obvious to need comment. It will enable the central Government to extend its absolute authority over the whole Empire by means of a body of picked and disciplined men, who, under British officers, will sternly repress the crimes of both Moslems and Christians, and obviate the need of employing Circassian robbers and half-savage and revengeful Bashi-Bazouks. In fact, if the Government really allow Col. Baker *carte blanche*—as I have no doubt, from the advocacy of the Grand Vizier and the excellent Minister of the Police, who has displayed throughout the purest patriotism, it will—and peace can be assured, we shall in a comparatively short time see the Sultan's dominions freed from its worst evil—the inability of the Stamboul Government to exercise a proper surveillance over all."

INDIA.

There is no foundation for the rumour that Mysore will be made over to the Maharajah previous to the time arranged in the treaty, or previous to his attaining his eighteenth year. But the Government have just offered Col. J. L. Pearse, Madras S.C., Commissioner of Nundidroog, Col. Renton, Madras S.C., and Col. J. Puckle, Madras S.C., Deputy Commissioner, Mysore, one year's civil pay, plus the army bonus, if they will retire immediately. The Government of India desire to fill the vacancies by the appointment of natives, with a view to affording the latter the means of acquiring experience in the higher ranks of the commission before March 18, 1881, when the State will be surrendered to the Maharajah.

The *Times of India* says:—"The Punjab loses, within a very short interval, the services of three distinguished officers who have long been connected with the province, Major-Gen. Reynell G. Taylor, C.B., C.S.I., Col. R Young, R.E., and Col. C. Pollard, R.E. Thirty years ago these gallant officers assisted at the siege of Mooltan when the traitor Moolraj was so severely pounded and half blown up by Major Napier, R.E., now Lord Napier of Magdala. Gen. Taylor was then an assistant political, Cols. Pollard and Young were promising lieutenants of Engineers; the former notable for his exploits in mines and explosions, and the latter a daring leader of Irregular Engineers. Gen. Taylor's long and honourable career is not to close in India without some tribute to his public services and his private worth. A farewell dinner is announced in his honour, to be given at Lahore in March. Col. Pollard has already gone to Calcutta to take Col. Crommelin's place at a secretariat desk. Col. Young, it is understood, retires from the Service with apparently little abatement of the vigour of thirty years ago."

Simla is really to have a fairly decent Government House. Plans have been drawn up and generally approved. The design has been given to Capt. H. H. Cole, R.E., an officer who has had great experience in architectural work, both in England and India, and is supposed to be one of the best architects in the Royal Engineers. There is to be no pretension about the building, which will be a moderately good country gentleman's house in a style suited to the ground, the climate, and the available material. The site chosen is the Observatory Hill, and the 23rd Pioneers are on their way to Simla, if, indeed, they have not already arrived, to do the earthwork part of the business.

Cols. J. B. Smyly and R. Ouseley, Bengal S.C., and A. G. Davidson, J. Davidson, and J. Allardyce, Madras S.C., have applied for permission to retire from the Service on special annuities. Col. Smyly, who is employed as Deputy-Commissioner, 1st Class, in the Punjab, is to draw a pension of £365 per annum, with an additional annuity of £324 4s., payable in England, from March 31, 1877; Col. Ouseley, Assistant-Commissioner, 1st Grade, a pension of £456 6s. per annum and the capitalized value of the additional annuity, viz., £3,008, from Jan. 20, 1877; Col. A. G. Davidson, Deputy-Commissioner, Jalaum, the ordinary pension of £456 5s. and capitalized value of annuity, viz., £5,781; Col. J. Davidson, Deputy-Commissioner, Jhansie, the ordinary pension of £456 5s. and extra annuity of £417 1s.; and Col. Allardyce, Judicial Commissioner, Hyderabad Assigned Districts, the ordinary pension of £292 and capitalized value of annuity, viz., £2,735.

Col. H. Finch, Bengal Infantry, residing and drawing pay in England, has applied to retire from the Service on the special annuity.

Capt. H. J. Stock, Bombay S.C., has been appointed to officiate as Brigade-Major of the Nusseerabad Brigade of the Bombay Army during the absence on leave in England of Major J. G. E. Griffith, Bombay S.C.

Brigdr.-Gen. Biddulph's scheme for providing homes for soldiers' children in the hills continues to prosper, as judged by a comparison between the funds available and the results. This year he will be able to open two homes, one at Murree and one at Mussoorie. But the subscriptions, we are told, though coming in regularly, are not large. Meanwhile, Dr. Jameson, the civil surgeon of Mussoorie, reports that when he last inspected the home there he found "the inmates generally looking the very picture of health, and very different in every respect to the poor sickly, washed-out, listless, languid little creatures they were when they arrived at the beginning of the hot season."

The question of abolishing the brigade commands at Rawul Pindee and Sealkote is, the *Pioneer* learns, definitely abandoned. "Over a small station like the latter, one might suppose the senior officer for the time being would be fitted to rule; while in Rawul Pindee, the head-quarters of a division, with a major-general and full complement of Staff officers, the local command might well be conferred on a field officer of the station. For the abolition there is the advantage of saving half a lac of rupees per annum; against it we have the disappointment such a measure would bring to many an old soldier who had looked forward to a pleasant sinecure in his declining years."

Lieut.-Col. D. Scott, Madras S.C., Depty. Qrmr.-Gen. of the Madras Army, has arrived home from India on leave.

REVOLVERS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—I entirely approve of your suggestion, at length acted upon, of establishing a "regulation" revolver, so that officers may not run out of ammunition on service, but I desire to caution all officers against trusting to a revolver which is either "self-cocking," or requires to be cocked by the thumb. In the Crimea I saved my life, on more than one occasion, by the joint use of sword and revolver, and I would, therefore, venture to give a few hints on the subject. Most men treat their sword as of very little use, do not draw it, and carry their revolver in their right hand. When I expected a row, or was going down to one of the assaults of the "Quarries" or Redan (in all of which I was), I left my scabbard in camp, wore my revolver on the right side, and drew and used it with my left hand. Thus I was able to parry more than one bayonet thrust from the right, and to keep my revolver for the left. As regards parrying a bayonet, necessity taught me a dodge which I believe is new. I brought my elbow down on the hip and gave a sort of wrench towards the right. To fire a pistol with the left hand requires, of course, a little practice, but it is one of the few things that you can with a little practice do as well with the left as with the right. But no revolver which is either self-cocking or requires to be cocked by the thumb can, in my judgment, be depended on to save your life in a *melée*. In the first case it always throws high and wide, and in the second the exertion is too great. The only revolver that I could ever use, or would ever think of going into action with, is a revolver that in Crimean days used to be called "Tranter's Patent." It had two triggers, one below the other. With the middle-finger you pulled the lower trigger, and this action revolved the chambers and cocked the pistol. When the lower trigger was so pulled you got a good "saw handle" grip, and then a light touch of the fore-finger on the upper trigger exploded it. Trusting these hints may be useful to younger hands—I am, &c.,

VICTORIA CROSS.

March 10, 1877.

PROMOTION IN THE ROYAL MARINES.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—In connection with the proposed scheme for promotion and retirement in the Royal Marines, I wish to submit a case. Lieuts. Skipworth and Falls joined the Service as probationers on the same day. The former got a first, the latter a second class certificate at the final examination. Lieut. Skipworth is now dated Oct. 1, 1873; Lieut. Falls, July 1, 1874. Should there not be a vacancy for a lieutenant-colonel on or before Oct. 1, 1900, Skipworth will be compulsorily retired, whilst Falls has still nearly a year to veer and haul on. Is this fair? SHIP MARINE.

THE NEW MILITIA REGULATIONS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—I congratulate the Secretary for War on the new regulations he has just proposed, under which, in future, Militia officers are to be transferred to the Line—viz., that all sub-lieutenants after the year 1878 are to be allowed to compete, and not only the nominees of the lieutenant-colonel commanding the regiment. This is only fair, and will, I trust, put an end to any jobbery or favouritism on the part of the commanding officer which, under the present evil system, must and does exist. Who are those at present selected? In nine cases out of ten those who have entered a particular regiment for the express purpose of being selected by the colonel; and as every regiment has so many commissions to give away, it may happen, and, I am convinced, has happened, that a most undeserving and unfit officer has through this back door crept into the Army. Under the new system the results of the first examination will be amusing as well as instructive, for, as all sub-lieutenants will, I trust, be allowed to compete, what is to prevent all, or nearly all, the sub-lieutenants of one regiment being successful, whilst in other regiments none will be? That such an event may, and probably will happen, only proves the unfairness of the present system and the necessity for a vital change, if commissions in the Line are to be offered to Militia officers in time of peace.—I am, &c.,

EX-CENTURION.

The following appeared in the *Standard* of Tuesday:—"The statement which appeared last Thursday, that Gen. Sir William Knollys had been offered, and had accepted, the post of Black Rod was only partly true. The offer had been made, but it had not been accepted. We are now, however, able to announce that Sir William Knollys has accepted the appointment, which, of course, will entail his resignation of the post of Controller of the Household of the Prince of Wales, a post which he has filled for fifteen years. His successor at Marlborough House will be Major-Gen. Sir D. M. Probyn, C.B., K.C.S.I., V.C., Equerry to the Prince of Wales." As a mark of appreciation of the long and faithful services of Sir William Knollys as the head of the household of the Prince and Princess of Wales, his Royal Highness has been pleased to appoint him to the honorary post of Groom of the Stole to his Royal Highness.

THE COMMISSARIAT DEPARTMENT.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—It is with the greatest reluctance that I ask for a brief space to reply to your correspondent "C. de G." As he challenges the accuracy of my initiatory remarks in my former letter to you, I have no option but to give proofs of my accuracy. "C. de G." says "that if the Commissariat Department had been reduced in 1869-70-71, the reason for such reduction would have applied with equal force to other departments with establishments in the colonies." This is the basis on which the whole statement of grievances of the "old" Commissariat officers, published by you, is really constructed in almost every line. If, then, I show that this basis is erroneous, I think I may claim that my initiatory remarks referred to—viz., that the comparisons made in the statement of grievances were erroneous, both in construction and deductions—are fully substantiated. My proofs are to be found in the Appendices to Army Estimates of 1868-9, showing the establishments for each of the "old" departments at home and abroad as follows:—

COMMISSARIAT (Page 151).

	C.G.-in-C.	C.G.	D.C.G.	A.C.G.	D.A.C.G.	Total.
At Home ...	1	1	5	25	38	70
Abroad	—	1	10	38	81	130

BARRACKS (Page 158).

	1st Class B.M.	2nd Class B.M.	Other B.M.	Total.
At Home ...	12	15	7	34
Abroad	4	14	—	18

PURVEYORS (Page 166).

	P.-in-C.	P.P.	P.	D.P.	A.P.	Total.
At Home ...	1	7	12	18	16	54
Abroad	—	4	7	12	9	32

MILITARY STORE (Page 176).

	P.P.S.	S.	D.S.S.	A.S.S.	D.A.S.S.	Total.
At Home ...	3	5	11	25	72	116
Abroad	—	2	6	19	41	68

How, in the face of such facts as these figures show, can "old" Commissariat officers and "C. de G." say that, by withdrawal of troops from the colonies in 1869-70-71, supposing no amalgamation into "Control" had taken place, the other departments would have suffered reduction to the same extent as the "old" Commissariat? I leave it to impartial opinion to judge whether "C. de G.'s" initiatory remarks or mine are most to the point. But I am thankful, at any rate, that he agrees as to the wisdom of the course I suggest for the future, and I will add only a further word of appeal for unity in things essential—*e.g.*, the future efficiency of the department as a whole, and for charity in all other matters, such as the grievances of particular sections or cadres.—I am, &c.,

L'UNION FAIT LA FORCE.

Dr. Lush asked the Secretary of State for War on Monday if he would inform the House what was the average number of soldiers in hospital during the years 1875 and 1876 respectively. Mr. Hardy.—In 1875, exclusive of the Malta Royal Fencible Artillery and of black troops in the West Indies, the coast of Africa, Ceylon, and China, in a strength of 169,235 non-commissioned officers and men, 7,680—being at the rate of 45·38 per 1,000 of the strength—were constantly in hospital. If the colonial troops above mentioned are added—strength, 2,212; daily sick, 113—the proportion of those constantly in hospital will be 45·45 per 1,000. For 1876, as the annual returns from commands abroad have not yet been received, the statistics can only be given approximately, but probably very closely. Those constantly in hospital in 165,905 non-commissioned officers and men were 7,528—being at the rate of 45·37 per 1,000 men. Adding colonial troops—strength, 2,037; daily sick, 96—the proportion of those constantly sick in hospital for the year will be 45·39 per 1,000. The distribution of those constantly sick in hospital in 1875 in the various commands may be seen in the Army Medical Department Report for that year, page 1.

Viscount Templetown asked the Under Secretary for War on Tuesday whether the scheme for the linking of regiments and the Report on the Army Retirement Scheme would be brought before the House sufficiently early to admit of a full discussion of details before the close of the Session. Whatever might be their own objections, officers would more readily receive as a settlement of the question any scheme which would be approved by Parliament after a full discussion. Earl Cadogan must confess that he had some difficulty in answering the question of the noble and gallant viscount. He rather thought that the noble and gallant viscount in some manner confounded two reports. The two subjects to which he had referred were entirely different the one from the other. The one was the subject of a Report of a Royal Commission agreed to last year; the other was one which had been gone into by a Parliamentary Committee on the constitution of the Militia. The Report of the Royal Commission had been brought before the House in the only way it could have been brought before them. He laid it on the table on Aug. 7 last, and he understood that it was in the hands of their lordships on the 14th of the same month. Ever since it was issued the Secretary of State for War had been maturing and revising a scheme of promotion and retirement founded on the recommendations of the Royal Commission. The subject was difficult and intricate, involving various calculations and requiring anxious consideration. The proposals of the Secretary of State were advanced, and were still in preparation; but he could not say when the work would be completed. As soon as it was, and the scheme received the approval of the other departments interested in it, the Secretary of State would lay it before the other House of Parliament, as it would deal with matters of finance; but, as Under-Secretary, he would take the earliest opportunity of explaining it to their Lordships' House.

The officers of the Curragh gave a successful theatrical entertainment in the Gymnasium Theatre on the 14th inst., the pieces being *The Irish Post* and *The Port-Admiral*, a nautical burlesque. The principal performers were Mrs. Preston, Miss Ryan, Miss Mason; Col. Bray, 4th King's Own; Capt. Boulcott, 86th; Capt. Lawrence, 4th; Lieut. Fitzherbert, 4th; Lieut. Downman, 75th; Lieut. Elliott, 4th; and Lieut. Knox, R.A., &c. The house was crammed, and the acting was much above par. The burlesque caused great amusement, and was thoroughly successful. The dancing of Col. Bray as the British Tar and Lieut. Knox as Susan brought down the house, and the dancers were uproariously encored.

PARLIAMENT.

TORPEDOES.

On Monday Lord C. Beresford rose to call attention to the increasing power of torpedoes. He pointed out that torpedoes had quite revolutionised naval warfare. The most ingenious infernal machine ever invented was the Whitehead torpedo, to which he wished to call attention. It could be set to work with perfect accuracy in any given direction, and on exploding against a ship's side was capable of making a breach seventy-five feet in extent. He need hardly say that a vessel would shortly proceed to the bottom after that. With it three men in a small boat could sink the Inflexible. He suggested, as the only mode of defence against such a weapon, that we should provide for our ships of war fast boats as satellites to keep the torpedo boats of the enemy at a distance. He urged upon the First Lord of the Admiralty the necessity of organising a system of coast defence torpedoes, and of practising the Navy in the management of these torpedoes, instead of leaving their management entirely to the Royal Engineers. The laying down of these torpedoes in war would be seamen's work, and in the event of war the nation with the best torpedo management must win.

Mr. Reed agreed with the hon. and gallant officer that it was now time the Navy were practised in the laying-down and taking up of torpedoes.

ENGINEERS.

Mr. Goschen said it was a matter of supreme importance to the well-being of her Majesty's ships that the question of the Engineers should be dealt with in a broad and comprehensive manner. If the Government wished to attract men of higher rank they must either give them superior pay or rank. But they had not only the Engineers to consider; they had also to think of the safety of their ships; and was the authority of the Chief Engineer on board a ship so clear and well-defined as to enable him, so far as he was concerned, to prevent accidents such as had lately occurred? The problem which the Government had to solve was, on the one hand, to keep the Engineers as a practical working-class who would be up to their duties; and, on the other, to secure their proper position on board.

THE NAVY ESTIMATES.

Mr. W. Hunt, in reply to some criticisms on his previous statement on the Estimates, said that, taking the same basis for his estimated work and its fulfilment, he had stated correctly what he had done in his department. Tonnage was now reckoned according to men employed, and did not represent actual tonnage, and he had employed the number of men on shipbuilding that he determined to employ, never taking them off to execute repairs. This he believed was a course never adhered to before. His policy as to the repair of ships had been criticised. Now, nobody had been more opposed to repairing old ships or had broken up more old ships than he had. He had set his face against repairing doubtful ships. The Lord Warden, which he was told ought not to have been repaired, was a far stronger and more powerful ship than any of the Russian Fleet which entered the Mediterranean last year. The right hon. gentleman defended the repair of the Enchantress on economical grounds, and denied statements that the invincible had broken down, and that the Assistance had been damaged. When it was stated, in comparison between his administration and the former one, that he had only added four ironclad ships to the Navy, his (Mr. Hunt's) case was not fairly put. The question was, what was the state of the progress of the ironclads he found in course of construction, and what had their progress been since? He would not enter into details, but if the subject were pursued he could supply particulars that would tell in his favour. At present there were five new ironclads which would be ready for sea in the course of this year. On the question of the position of Engineers, he believed they were tolerably well satisfied with all that had been done for them. But it must be remembered that the question could not be dealt with without considering that when they first entered the Service the Engineers were not of the same social rank as the executive officers, and though this might be thought a light matter, if it were investigated it would be found to be a very serious matter. Therefore the Committee recommended that the Admiralty should endeavour to obtain for the Navy, Engineers of higher social status. It was proposed to place them in the military branch of the profession, Chief Engineers to be enabled to take the rank of commanders, Engineers of ten years' standing to rank with lieutenants, and Assistant Engineers to rank with and after sub-lieutenants.

Mr. D. Jenkins moved the reduction of the vote by £5,600, on the ground that the Engineers were already sufficiently well paid.

The motion, however, was withdrawn, and the vote was agreed to.

On the first vote of £2,684,048 for wages for seamen and Marines,

Mr. Reed regretted to see the way in which certain classes of the Navy were neglected, and pointed out the deficiencies that existed in regard to petty officers, the men who took care of the hulls of ships, and the engine-room artificers. Looking at the Estimates of last year, he found that the Government were 510 tons in the ironclads, and 551 tons in the unarmoured vessels, short of what they had promised to build; equal to an expenditure of £13,756. Coming to the present programme, he congratulated the Admiralty on having devoted a larger number of men to building, and especially to building armoured ships, than before. He would point out that the only ship of importance which it was proposed to lay down was the first armoured ship that had been laid down for three years. It was a great question for consideration, whatever might be thought of torpedoes, whether the country should allow itself to be outstripped by other European Powers in the building of first-class ships. It was reported some time ago on what he thought was good authority that the Italian Government had actually commenced a ship which was to be plated with three feet of armour, to have 150-ton guns, and to run 18 knots an hour; if that were true, had that great speed been fully considered by the Government? On the other hand, it was necessary to consider the subject of torpedoes, and he thought the solution of the ironclad question would be found in the construction of smaller, rather than of larger vessels. The Government were going to build a new Agamemnon, but he doubted whether the copying of a second-class ship was a proper response to the question of the time. There was a torpedo ram in the Estimates, and he should like to know if it was to be a large or a small one; he should object very much to the building of a large vessel which was not to carry guns. He had hoped that the Engineers were to be put into a different position, and that they were to receive from the Admiralty that recognition which was required by the altered circumstances of the time. They were now building many vessels in which engineering was to play a leading part, whether in peace or war; men-of-war were nothing now but floating machines. He had noticed that in several quarters the First Lord of the Admiralty had been subjected to no small amount of adverse criticism and some censure for the remarks which he let fall the other night with reference to the grade from which most of the Engineer officers of the Service were drawn. He (Mr. Reed) had himself received several letters complaining with more or less bitterness of the right hon. gentleman's language, but he must say that he did not believe that the First Lord intended to hurt anybody's feelings. (Hear, hear.) He believed that the right hon. gentleman intended to advert to a fact which had been pressing upon the minds of naval administrators for a long time, and that was that the whole profession of naval architects and marine engineers in the Royal Navy of this country was exclusively confined to comparatively poor lads. The scheme now proposed by the right hon. gentleman was based upon the report of the Committee, but he did not think that scheme would work. The solution of the question was, he believed, to be found in the American system. They wanted young men of gentlemanly manners and education to become naval engineers, and they should be entered as cadets in the Naval College, and as thoroughly instructed in their business as other young officers were in theirs. It was no uncommon thing for the sons of gentlemen to become marine engineers, and he had known instances where distinguished officers had gone into workshops, put on a canvas jacket, and worked at a lathe in order to learn the practical details of the profession.

Mr. Gorst was quite certain that the First Lord of the Admiralty never intended to cast any slight upon the existing members of the engineering branch of the Navy, but they, nevertheless, felt aggrieved at the observations which fell from the right hon. gentleman. They maintained that they were entitled to be considered as high a class as the medical and paymaster branches of the Service, and they appealed to the records of courts-martial during the last five years to show that their branch had been singularly free from any offence against discipline. He should be sorry if the idea of inducing the sons of gentlemen to enter on the career of naval engineers were to close that profession to the sons of the very humblest and poorest members of society who, by their ability and industry, had qualified themselves to hold a position in it.

Mr. S. Lefevre cordially approved the First Lord's proposal to increase the pay of seamen who had completed ten years' service by twopence per day. He understood that there was a difference not yet adjusted between the Treasury and the Admiralty as to the scheme to be adopted in regard to the marine officers, and as he thought it unusual that money should be asked in respect of a scheme in regard to which the Government were not yet agreed, he urged that the Vote should be withdrawn, and afterwards proposed as a supplementary estimate. In regard to Engineer officers, he contended for the importance of making their status and pay such as would attract really good men. As to the naval officers employed as superintendents of dockyards, he maintained that they could not discharge the responsibility so well as civil managers would do. It would be better to put all the civil matters in the dockyards under a civil superintendent.

After further discussion,

Mr. Samuda said that though both sides had taken credit to themselves for having built about 20,000 tons of shipping annually for several years, he thought no credit was due, as that amount only represented the waste in the Navy.

EGYPTIAN SLAVE TRADE.

On Thursday Mr. Anderson asked the Under Secretary of State for Foreign Affairs if he has observed a letter in the ARMY AND NAVY GAZETTE from Capt. W. R. Kennedy, R.N., stating that a few days after the Egyptian Government sent a ship of war down the Red Sea for the suppression of the slave trade, there was a sale of slaves in Cairo, at which some 300 women were sold; if her Majesty's Government has any information on the subject?

Mr. Bourke said.—I have seen and carefully read the paragraph referred to, and have, in consequence, sent a telegram to Cairo, requesting that inquiries should be made on the subject. No answer has yet been received, but I will communicate the answer when received.

THE NEW ARMY REGULATIONS.

On Friday, in the House of Lords, Lord Bury asked the Under Secretary for War if he would explain to the House the new regulations under which junior officers of Militia were to be allowed to enter the Army.

Earl Cadogan said that the new regulations in which the officers referred to were allowed to enter the Army were not yet in a sufficient state of forwardness, and therefore he was not able to give more than a general explanation. The present system of allowing the commanding officers to send up a certain number of subalterns for commissions in the Army, which they obtained by passing a mere standard examination, would be discontinued, and in future a competitive examination would be substituted, by which all Militia subalterns would be allowed to enter themselves for a military and not a mere regimental examination. Those who were desirous to do so would send in their names to their commanding officers, who would forward those they recommended for examination. The candidates were to be present at two regimental trainings, and they were to pass a last examination before the Civil Service Commissioners, or to produce their University certificates. Under these circumstances it was intended that the new system should not come into force until the 1st of January, 1879, in order that a number of young Militia officers desirous of obtaining commissions in the Army might be present at the regimental training. The new system would take away from the colonels of the Militia regiments some slight patronage which there was reason to believe they would be unwilling to be relieved of. The regulations would be opened as soon as possible.

Viscount Cardwell was extremely glad to hear the explanation of the noble earl. There was a dearth of officers in the Militia, and if service in the Militia was recognised as a good claim of admission for commissions in the Army, it would attract a number of young gentlemen to its ranks. The object of the scheme was to prevent the granting of commissions to one class only. He did not insist upon any particular mode of carrying it out, and he was quite willing to admit that the scheme indicated by the noble earl was a considerable improvement.

Lord Bury inquired whether it would be competent to the subalterns of any Militia regiment to go up for re-examination, and whether such examination would be held at central places.

Earl Cadogan said that the scheme was not quite matured, and when it was it would not be applied to any separate regiment, but to all Militia officers who wished to be examined —(hear, hear)—and the examination would be held at some central place, but where he could not yet say.

THE MILITIA.

On the motion of the Marquis of Exeter a return has been laid on the table of their Lordships' House showing the strength of each Militia regiment in the United Kingdom on the 1st of January, 1876, and on the 1st January, 1877; the number of recruits obtained between those dates by each regiment, and the number given by each to the Line under its different branches; the number discharged as medically unfit; those who have deserted; and those who have been promoted or transferred to other regiments; and the total increase or decrease in 1876.

COMMISSARIAT AND STORE DEPARTMENTS.

Last night, in the House of Commons, Mr. Sullivan asked the Secretary of State for War whether an unusual length of time had not elapsed since the last examination of candidates for the Commissariat and Store Department; and whether he could state the cause of such delay, and say when the next examination would be held.

Mr. Hardy said it was usual to hold examinations of candidates for the Commissariat and Store Departments when there were a number of vacancies. There were only three vacancies in the latter department, and certain inquiries were being made at present in reference to the latter.

BOY ENLISTMENT.

Colonel Kennard asked the Secretary of State for War whether it was his intention to carry out, either fully or partially, the recommendations of the Committee of Inquiry on the subject of boy enlistment for the Army, embodied in their report, which has been lately presented.

Mr. Hardy said he had under favourable consideration several of the recommendations of the Select Committee on boy enlistment in the Army.

THE NATIONAL RIFLE ASSOCIATION.

The annual meeting of Volunteers was held on Thursday, at the Royal United Service Institution, under the presidency of the Earl of Wharncliffe. The report adopted by the meeting stated that the popularity of the Wimbledon gathering was not wearing off, but increasing, as was shown by the fact that the entries—8,434—were more numerous than in 1875. The shooting was in almost every instance better than in 1875, in which year it excelled the shooting of previous years. In compliance with a wish of some Volunteers, the Council had made an application to the Secretary of State for War for the issue on loan of a sufficient number of Martin-Henry rifles to be used at Wimbledon. The application was, however, declined on the ground that, as the Volunteers were not armed with Martini-Henry rifles, it was not considered desirable to issue them merely to compete for a prize which should be shot for with rifles in use throughout the force. The financial statement noted a falling off of £50 5s. in annual subscriptions, an increase of £115 10s. in life subscriptions, and an increase of £21 17s. in subscriptions through counties. The total number of members on the books was 3,077; the donations for prizes showed an increase of £78 13s. 6d.; entrance fees had increased by £702 10s. 11d. The total receipts from all sources amounted to £21,733 5s. 3d. The vested capital of the Association now stood at £8,192 10s. 6d.

THE MOBILIZATION OF 1876.

Gen. Sir William Codrington writes to the *Times* as follows:—"Sir,—There surely must be some error in your Parliamentary Report of the answer given on the 16th inst. by the Secretary for War to Col. North's inquiry as to deductions from the Staff pay of general officers during the mobilization of 1876. The questions were clear, as they were necessarily printed in the Parliamentary Notice Paper; and Mr. Hardy is supposed to have answered that 'no such deduction had been made, the pay having been given according to the rank held.' Facts are stubborn, particularly financial facts; and if your report is correct, there is serious error somewhere. Officers were put in the Mobilization Orders of the Horse Guards War Office of June 28, 1876, as 'generals commanding' army corps, 'lieutenant-generals commanding' divisions, and 'major-generals commanding' brigades. They were again so placed with their names and full rank in the official 'Army List' of July, 1876. These are very apparent facts. Upon sending in the usual printed form for Staff pay of their rank, it was officially notified that only the Staff pay due to the next inferior rank would be allowed, and this disallowance on deduction has been made. This intended deduction or displacement to inferior rank was not made known to officers before appointment, nor is it known under what Warrant or Regulation it has been made. But I know, and others know, very practically, that the disallowance was made and still continues, for the Staff pay due to the rank as mentioned in the General Order for mobilization is still withheld."

Col. Barne asked the Secretary for War, on Thursday, whether he had any intention of altering or abolishing the numbers of any regiments of the Regular Army; and, if so, whether the House would have an opportunity of discussing that alteration before it was carried into effect. Mr. Hardy.—I have not formed any intention upon the subject at present, but if I should do so I shall, no doubt, be responsible to Parliament.

The Natal correspondent of the *Western Morning News* in his last letter mentioned a charge of murder which had been preferred by some coolies against Capt. McLeod, the Protector of Immigrants for Natal. Capt. McLeod was for fifteen years in the 42nd Highlanders, and served in the Crimea and the Indian Mutiny, and his numerous military friends in England will be glad to hear that he has been acquitted. The original charge was that of murder, but it was reduced by the Attorney-General to culpable homicide, and Capt. MacLeod was committed to take his trial at the Circuit Court. The trial terminated on Feb. 17, and throughout the colony the greatest interest was taken in the proceedings. The jury acquitted the captain, the result being received with loud applause.

HUNYADI JÁNOS.
NATURAL APERIENT WATER.

"Most palatable and agreeable."—Prof. Macnamara.
"Richest in Aperient Salts."—*Lancet.*
"Invaluable for Women and Children."—*London Medical Record.*

The ENCORE WHISKY
Is a soft, mellow, and pleasant Whisky.

The ENCORE WHISKY.
Every gallon guaranteed equally pure.

The ENCORE WHISKY
Is Sold Everywhere.

The ENCORE WHISKY,
Wholesale Depot, Three-crown Square, Borough, S.E.

The ENCORE WHISKY
Is recommended by the Medical Profession throughout the kingdom as the pure and safe alcoholic stimulant.

ST. THOMAS'S HOSPITAL,
ALBERT EMBANKMENT, S.E., 28th February, 1876.
THE THANKS of the MEDICAL PROFESSION are due to Messrs. BERNARD and CO., LEITH DISTILLERY, SCOTLAND, for producing the ENCORE WHISKY—a Spirit more Wholesome and less Irritating than any Spirit extant, being especially useful for patients suffering from Kidney Disease.
R. W. JONES, F.C.S., M.R.C.S., L.R.C.P.E.

SPECIAL NOTICE TO OFFICERS AND SPORTSMEN.
W. SPARKES HALL and CO.,
310, REGENT STREET, W.,
Bootmakers to
H.R.H. the Prince of Wales, H.R.H. the Duke of Connaught, H.R.H. Prince Christian, H.I.H. The Crown Prince of Germany, The Marquis of Lorne, &c.,
Beg to call the special attention of Officers and Sportsmen to their
PORPOISE HIDE SHOOTING BOOTS,
Which, being made of the finest selected Skins and best Workmanship, will be found not only durable, but of Great Comfort to the Wearer.
The advantage of Porpoise Leather is that it never gets hard after being wet.
Also to their
CASE FOR HUNTING BOOTS,
Which contains every requisite for the Sportsman.
The boots and trees are at the bottom, and a tray, fitted above, carries blacking, varnish, &c. (in metal bottles, with screw tops), blacking brushes, top brushes, boot-hooks, breeches-hook, boot-jack, &c.
W. SPARKES HALL & CO.,
310, REGENT STREET, LONDON.

SPECIAL NOTICE.
TO THE NOBILITY AND GENTRY.

WM. PUGH (many years coat cutter at Messrs. Poole's, Saville-row), having succeeded to the old-established first-class business of Jackson and Co., 5, CORK STREET, BOND STREET, W., solicits the patronage of the nobility and gentry.
Best trade only at fixed fair prices, and 10 per cent. allowed for prompt cash.
N.B.—All first-class tailors give credit, and it is only by the discount system noblemen and gentlemen who pay cash get the full value ready money entitles them to.
WM. PUGH (from Poole's), 5, CORK STREET, BOND STREET, W.

SCHWEITZER'S COCOATINA
Anti-Dyspeptic Cocoa or Chocolate Powder
Guaranteed Pure Soluble Cocoa, Without Sugar, Spice or any Admixture.

Specially adapted for Ships, Camps, Sportsmen, &c., being in a concentrated form, made with BOILING Water. Keeps in all climates, and palatable without milk.
Being all Cocoa, it is four times the strength of preparations mixed and therefore *weakened* with arrowroot, &c., and is in reality cheaper a Tea-spoonful to a Breakfast Cup costing less than a halfpenny.
The Faculty pronounce it "The most nutritious, perfectly digestible Beverage for Breakfast, Luncheon, or Supper," and invaluable for Invalids and Children.
Highly commended by the entire Medical Press.
In air-tight canisters at 1s. 6d., 3s., &c., by Chemists and Grocers.

Army & Navy Gazette.

LONDON, SATURDAY, MARCH 24, 1877.

After a weary waiting for weary years, a streak of dawn appeared in the darkened horizon of the Corps of Royal Marines when it was announced in the Estimates for the ensuing financial year that a certain amount had been provided which it was presumed would be devoted to removing the present dead-lock in the Captains' and Subalterns' Lists. The day was anxiously looked forward to when the First Lord of the Admiralty should lay the Estimates before the House, and satisfy the anticipations of a large body of officers by submitting a scheme by which they were to benefit; but the statement brought little or nothing to cheer the grey-haired Captains of thirty, or the struggling subalterns of eighteen years' service. Mr. Ward Hunt made an important admission, that so far back as 1874, three years ago, he was so impressed with the question of the Marine officers that he made out a scheme, which, however, had to be delayed until the Army Commission had reported. This apology for delay has on previous occasions been made to the House, but it is difficult to understand in what spirit of fairness the acceptance or rejection of the recommendation of the Army Commission could be made to bear upon the Royal Marines, inasmuch as the Corps was not represented on the Commission, nor was any evidence taken touching its requirements. The wants of the Corps should be cared for solely by the Admiralty, under whom they serve, and, if it is plainly proved and acknowledged that there are existing evils to be remedied, the remedy should be applied without reference to or waiting for the result of a Commission that was not called upon to take its interests into consideration. Having spoken of "another scheme," which it was obvious to him the Treasury would not sanction, the First Lord stated that he was anxious not to lose time by submitting it for modification by the Treasury and Admiralty separately, which would have necessitated the postponing the motion to another Session, and he, therefore, proposed to the Treasury a joint Committee, which was now sitting; and, in order not to have any mistakes as to their intentions, he had a lump sum put in the Estimate to meet it. The Committee, which consists of the Deputy Adjutant-General of the Royal Marines, Mr. Welby, C.B., of the Treasury, and Mr. James, of the Admiralty, will earn the thanks of the Corps at large if they can produce, and that quickly, a proposal that will supply the existing wants and, at the same time, be approved by the Treasury and the House. Procrastination has hitherto been the rule with all who have had any dealings with this most important question. The obstacles and difficulties have, no doubt, been great, but they should have been met boldly when there was an acknowledged and a still growing evil to be remedied, and it is to be devoutly hoped that Mr. Ward Hunt's statement, that "it would not be long before the scheme would be reported," will shortly be verified. A distinguished General officer, who, having rapidly advanced by his own abilities and exertions, has, nevertheless, been one of fortune's favourites, a few months since, in addressing a body of officers, intimated that no man had any right to complain, since advancement or otherwise rested entirely with himself. What would this gallant officer say to a seniority corps where a subaltern drags on for more than eighteen years in the junior grade losing zeal and energy, and after that period having to begin to toil up from the foot of a long list of Captains before he can dream of anything higher? Why, the officer in question was a Lieutenant-Colonel in seven and a Major-General in sixteen years, but had he been in the seniority corps of Royal Marines no amount of energy, zeal, intelligence, or distinguished service before the enemy could have lifted him above his fellows on the list, and he must have remained a neglected subaltern for a longer period than it took him to become a General officer in the more favoured branch of the Service. Truly no standing rule can or ought to be made to apply equally to regiments of the Line and to a seniority corps, and therefore any scheme that may be propounded for the relief of the Royal Marines should in no way be made dependent upon the recognition of the report of the Army Commission. The cause of the officers who are thus suffering from unprecedented stagnation has been taken up by almost every journal of the day, and has repeatedly been brought before the House of Commons by the members for Devonport and Chatham and others, and the general feeling of sympathy is so strong that the Treasury need not fear opposition in approving anything in fairness or reason that may be proposed.

The reasons which were operative last year as regarded the period of the Prince of Wales's return to England, at the time when our "spring" assumes its most forbidding aspect, and, armed with fog and east wind, tears one's life out, may be assumed to have had something to do with the excursion to the Mediterranean which his Royal Highness and the Princess of Wales are about to make this month; but it is understood that her Royal Highness has had it for some time in contemplation to pay the special visit to her brother, the King of Greece, which was postponed, or rendered impossible, in 1875. His Majesty was, it may be remembered, a guest at Marlborough House for a short time last year, but the Queen of the Hellenes was not then able to accompany him, and there is every cause for the supposition that her Royal Highness the Princess of Wales would be very much gratified in meeting the amiable consort of her brother, who has so close a relationship to the husband of her sister, and that the meeting of her Royal and Imperial Highness the Duchess of Edinburgh, and of the Duke, with the Prince and Princess of Wales, would afford a most agreeable guarantee of goodwill and friendship, which would extend their influence beyond the bounds of social intercourse.

We believe that Major-General Sir D. M. Probyn, V.C., K.C.S.I., in succeeding General Sir W. Knollys as Controller of the Prince of Wales' household, is understood not to have abandoned his career, in case of his services being needed in the field.

Captain O'Beirne, M.P., would seem to have extracted a negative of negatives in the shape of the reply from our Secretary for War, the other evening, to his inquiry respecting that very vexed subject, forage stoppages from Cavalry officers. Mr. Hardy evidently considers that it is chivalrous to bear more than our share in supporting the burden of the State. Is he sure that the Cavalry officers will coincide in this view?

We believe we are right in stating—we shall be only too grateful to be corrected—that at the recent examination of candidates for the Army Medical Department, only one-and-twenty aspirants offered themselves for the fifty vacancies, and that five of these were rejected. Ever since the days of the erring cities of the plain, a crucial pessimist test has invariably been fixed upon. We should, therefore, imagine that as regards the present system for obtaining our medical officers such has now been reached.

Considerable difference of opinion appears, from Sir William Codrington's letter to the *Times*, to exist between the War Office and the General and Staff officers who did duty with the mobilized army corps last summer. We are, generally, tolerably accurate in our calculations of receipt; yet those who in this case have been recipients have discovered a somewhat glaring error. There is certainly a shade of defence on the side of those who are instructed to give, that they never issued regulations as to the amount that would be given; but this, it is to be feared, is, after all, only a sorry subterfuge. It is difficult to understand how the Financial Secretary at the War Office, with the huge department under his direction, could have allowed his assistants to commit so lamentable a blunder. We recently called attention to the necessity of returning the financial transactions of the Army to the Commissariat Department, and we have here a striking example of the necessity for such a change.

With reference to the proposal of the Militia Committee as regards the designation of Line regiments, a distinguished General officer thinks that a very feasible and simple way of getting out of the many difficulties of the said prosposal would be to amalgamate a Militia regiment and each Line regiment in the Service, making the Militia regiment the 2nd battalion of the Line regiment for recruiting and reserve purposes. He would call the Militia the home battalion of the regiment, giving it the number and designation of the Line regiment. Of course, there would be details to be arranged, but he sees no serious difficulty in regard to these. This arrangement would be in every way preferable to that which has been suggested in the Militia Committee's Report.

The decision to decrease the Army Medical Department by twenty-one officers, and make a similar addition to the Army Hospital Corps, was, we think, a wise one, seeing how under-manned the Medical Service is. The arrangement is commendable, too, on another ground—it gives an increased number of commissions to deserving non-commissioned officers, and may be the means of attracting a few men to the ranks. A doctor should be employed only in his professional capacity, and to turn him into a storekeeper is a mistake. The store duties properly belong to the officers of the Army Hospital Corps. Though we have felt it our duty to condemn the majority of the changes carried out in the Medical Service, we are glad to be able to express our approval of this last one.

The senior subalterns of Cavalry are gradually being provided for. Since we published our list in October last, Lieutenants Cotton, 21st Hussars (1); Wynter, 16th Lancers (2); Hill, 16th Lancers (7); and Kennedy, Scots Greys (11), have been promoted in their own regiments, whilst Lieutenant Bell, 5th Lancers (4), has been given his troop in the 8th Hussars. At the present time Lieutenant Fisher, 21st Hussars, is the oldest officer doing subaltern's duty in the Cavalry of the Line; he joined the Army September 9, 1864, and exchanged as a Lieutenant from the 2nd Queen's five years ago. After him comes Lieutenant Kenyon-Stow, 19th Hussars, who entered the Army January 3, 1865, and has suffered very considerably as a consequence of the reduction of his late regiment—the Military Train; so much so that he found himself at the end of six years service a junior Cornet in the 19th Hussars. Following Lieutenant Stow come Lieutenants Loyd, 21st Hussars (who is anticipating early promotion); Fife, 5th Lancers (who exchanged from Infantry); Becher, 7th Dragoon Guards; Lloyd, 20th Hussars; Bouverie, 17th Lancers; Brown, 17th Lancers; and Hemans, 20th Hussars. By an occasional selection much has been done of late to brighten the prospects of the senior Lieutenants. Strange to say, selections have hitherto been made exclusively from the old Line Cavalry regiments, whereas three regiments with the strongest claims to the consideration of the authorities have never once been allowed to benefit. Nothing could be more gloomy than the prospects of all ranks of the 19th, 20th, and 21st Hussars, and we feel it our duty again to call the attention of the Horse Guards to the condition into which these regiments are fast drifting.

We are all well aware of Cicero's definition of the perfect letter-carrier. Our good neighbours on the other side of *la Manche* would seem, however, to be in want of a perfect letter-keeper. The account of the loss of documents from their archives has almost a legendary air about it. We can hardly imagine that prosy specifications of bricks and stone would be so eagerly sought after as they seem to have been. Their lines are better understood when written on the earth. There must be some secret diplomacy contained in these documents, possibly a Tilsit raft. If so, it is unfortunate that now, as then, the old trick has gone against its conceivers.

Mr. Roger Goldsworthy, C.M.G., has arrived home from Nevis, having in the short time he has held the Presidency established a reputation for zeal such as will ensure his rapid advancement in the Colonial Service. The people of Nevis do not seem to know how highly to speak of their ex-President, and determined, as we pointed out last week, upon the adoption of effectual means of testifying to their appreciation of his many excellent qualities. It is highly gratifying to note the success which has in almost all instances attended the policy Lord Carnarvon, since his entrance to the Colonial Office, has followed, of providing for soldiers whenever the opportunity has offered for him to do so.

Captain V. Chater, 91st Highlanders, succeeds Lieutenant A. G. Spencer, 5th Lancers, who has resigned the appointment, as Aide-de-Camp to Major-General J. Ramsay Stuart, C.B., commanding the troops in Scotland. Captain Chater entered the Army July 12, 1864, and became Captain February 12, 1872.

Captain A. R. Savile, 18th Royal Irish, Garrison Instructor at Dover, is to retain his appointment until June 15 next, and Captain H. G. MacGregor, 29th Regiment, his appointment on the Home District Staff until June 30.

Lieutenant Lord Edward Somerset, 23rd Fusiliers, has been appointed temporarily to the Staff of Major-General Somerset, C.B., at Gibraltar, as Aide-de-Camp.

Major Montgomerie, 20th Hussars, succeeds Lieutenant-Colonel Barker, 64th Regiment, appointed Assistant-Director of Military Education, as Professor of Military History at the Staff College. Major Montgomerie served throughout the suppression of the Indian mutiny, with the Guide Cavalry at the battle of Nuggufghur, and siege and capture of Delhi, and with the 1st Sikh Cavalry at the Alumbagh, under Outram, from January 16 to March 2, 1858; siege and capture of Lucknow (slightly wounded), subsequent operations in Oude, and affair of Simree (medal with two clasps). He entered the Army October 4, 1853; passed from the Staff College, December, 1865; became Brevet Major, July 5, 1872; and Major, April 30, 1873.

The impertinence of an evening contemporary in questioning the propriety of the recent selection for the Black Rod is only exceeded by its bad taste in attacking, as it has done, one of the most distinguished and popular officers in the Army, simply because it has been his good fortune to have his services acknowledged. Sir William Knollys' career has, from the first, been marked by a most ardent attachment to the duties of his profession, and if the writer of the article had only taken the trouble to have acquainted himself with the details of the General's services, he would have found that the new Black Rod is by no means the feather-bed soldier he in his ignorance imagines him. There are many reasons which render the selection of Sir William Knollys as successor to the late Sir Augustus Clifford a particularly appropriate one, and the unanimous approval of the appointment among military men is a pretty fair criterion that Sir William has claims other than those he possesses as a courtier.

The Navy.

GAZETTE.

ADMIRALTY, March 16, 1877.

Royal Naval Artillery Volunteers.—Liverpool Brigade—Sir Richard Lewis Mostyn Williams Bulkeley, Bart., to be Hon. Lieut.; March 16, 1877. The Rev. Thomas Rees Walters, B.A., to be Hon. Chaplain; March 16, 1877. Dr. Hugh Greig Hughes to be Hon. Surg.; March 16, 1877.

March 19, 1877.

The undermentioned medical officers have been promoted to the rank of Fleet Surgeon in H.M.'s Fleet, with seniority of 4th inst.:—Richard Lovell Bluett Head, Alexander Collins, M.D.

March 21, 1877.

Royal Naval Reserve—H.R.H. Albert Edward, Prince of Wales, K.G., &c., &c., &c., to be Hon. Capt.

March 22, 1877.

The undermentioned Engineers have been promoted to the rank of Chief Engineer in H.M.'s Fleet, with seniority as stated against their names:—Mr. William Broad, Feb. 6, 1877; Mr. Henry Watkins White, March 3, 1877; Mr. Edward D. Dooley, March 17, 1877.

APPOINTMENTS.

Captains—Charles M. Buckle, to the Lord Warden, vice Norman B. Bedingfield, whose period of service has expired; C. H. Simpson, to the Hector, vice Buckle.

Lieutenants—William J. Norcop, to the Devastation.

Navigating-Lieutenant—Richard G. Roe, to the Research.

Fleet Surgeon—Stephen Bowden, M.D., to the Crocodile.

ROYAL NAVAL RESERVE.

His Royal Highness the Prince of Wales has been appointed Hon. Capt. in the Royal Naval Reserve.

ALACRITY, Lieut.-Com. W. U. Moore, was nearly refitted on Jan. 22, and was to receive her new crew by the Hankow, due at Sydney about Feb. 15.

ALBATROSS, Com. E. Rice, was at Panama as senior officer in Central America at the departure of the last mail.

ALEXANDRA, Capt. R. O'B. Fitzroy, with the flag of Vice-Admiral Hornby, arrived at Malta on the afternoon of the 17th inst.

AMETHYST, Capt. A. J. Chatfield, left Coquimbo on Jan. 31 for Valparaiso, *viâ* Juan Fernandez.

ANTELOPE. Lieut.-Com. E. Wingfield, was paid off at Malta on March 16.

ASSISTANCE, Capt. F. M. Prattent, arrived at Queenstown on the 22nd inst.

AUDACIOUS, Capt. P. H. Colomb, flagship of Vice-Admiral Ryder, was at Hong Kong on Feb. 1.

BARRACOUTA, Capt. Charles E. Stevens. A court-martial assembled yesterday, under the presidency of Rear-Admiral C. Fellowes, C.B., Admiral Superintendent of Chatham Dockyard, for the trial of Capt. C. E. Stevens. There are several charges again Capt. Stevens for overbearing and scandalous conduct, preferred by the paymaster. Mr. W. Eastlake, Deputy Judge-Advocate of the Fleet at Devonport, was appointed to officiate at the trial, and Mr. G. P. Martin, R.N., barrister-at-law, Deputy Judge-Advocate at Portsmouth, was to prosecute.

BELLEROPHON, Capt. J. A. Fisher, flagship of Vice-Admiral Sir A. C. Cooper Key, was at Jamaica on Feb. 23. She left Trinidad on Feb. 9 with the Encounter, Eclipse, and Dryad, and arrived at La Guayra on Feb. 12; she left again on the 13. The Eclipse parted company on Feb. 14 for Barbados, as senior officer. The Admiral, with the other ships, arrived at Jamaica on Feb. 19, and found the Bullfinch and Pert there. He intended to leave for Bermuda on Feb. 27 in the Bellerophon, with Encounter, Dryad, and Pert, calling at Havana.

BITTERN, Com. G. J. Anstruther, was at Constantinople on March 14.

BULLFINCH, Com. R. M. Lloyd, is to remain on the Jamaica division.

CLYDE, Com. H. C. Best. The drill-ship Brilliant, tender, was inspected by Admiral Phillimore on Saturday last, and we understand he expressed himself pleased with the cleanliness of the crew and the ship, and complimented the Naval Reserve men on their general good conduct. Admiral Phillimore afterwards inspected the Coastguard men at Inverness, and was also much satisfied with his inspection of that station.

CROCODILE, Capt. P. R. Sharpe, arrived at Spithead on Sunday evening from Bombay, and came into harbour at nine o'clock on the following morning. She brought home the 55th Regt., which has been quartered in the New Barracks, Gosport.

CURLEW, Com. E. J. Church. A sad fate has overtaken a quartermaster of this vessel, named Price. When out skating he endeavoured to rescue a companion, who had fallen into a fishing-hole, but unfortunately fell in himself, and was drowned; his companion was rescued. The funeral took place on Jan. 9.

DANAE, Capt. J. C. Purvis, which was commissioned at Portsmouth on Sept. 20, arrived at Spithead on Friday, the 16th inst., from Sheerness, and proceeded in the evening for the West Coast of Africa.

DARING, Com. J. G. Hanmer, was at Panama by last accounts, and will be at Esquimalt early in April.

DEVASTATION, Capt. F. W. Richards, returned to Malta late on the 17th inst., with the Thetis in tow.

ECLIPSE, Capt. J. E. Erskine, was at Barbados on March 1; she arrived there on Feb. 28, as senior officer. She would proceed about March 8 to St. Vincent, to bring the Lieutenant-Governor to Barbados, and leave again on March 10 with the Governor-in-Chief for Tobago and Grenada, and was to be back at Barbados about March 19.

EURYDICE, Capt. Hare, will be ready for sea shortly, but has been delayed owing to it having been found necessary to make several alterations in her fittings since she came out of the hands of the contractor.

FANTOME, Com. T. M. Maquay, was at the Sandwich Islands up to the last date, Nov. 29.

HELICON, Lieut.-Com. Stopford, with the Duke and Duchess of Edinburgh on board, returned to Malta on the 18th inst. from Syracuse and Palermo.

HERCULES, Capt. Bowden-Smith, flagship of Admiral Hon. Sir J. Drummond, was at Malta on March 17.

HIBERNIA, Com. A. E. Stephens, bearing the flag of Rear-Admiral Rice, second in command in the Mediterranean, will be paid off at Malta on the 31st inst., and be re-commissioned the day following. Admiral Rice shifted his flag to this ship from the Triumph on March 7, and resumed duty as Admiral Superintendent of the yard.

HIMALAYA, Capt. E. White, will not return to England through the Suez Canal, calling at Malta and Gibraltar, but will proceed from Colombo to East London, Cape of Good Hope, with the 80th Regt., and, after carrying out some exchanges with Mauritius, will return to England with the 32nd Regt. She arrived at Trincomalee on the 21st inst., and will leave to-day for Colombo.

IMMORTALITE, Com. Gerard Noel. Capt. Hume having been invalided home, arrived at Simon's Bay on Feb. 16.

JUNO, Capt. A. J. Poland, senior officer in the Straits of Malacca. Capt. J. A. Poland left for Hong Kong in the Himalaya, on temporary leave, and Com. Anson, of the Magpie, was put in command of the Juno.

LONDON, Capt. T. B. M. Sulivan. The proprietors of the *Western Daily Mercury* have called our attention to the fact that the information respecting captures, which we inserted last week, was from the correspondent of that paper, and not from the columns of its local contemporary, the *Western Morning News*, as we erroneously stated.

MALABAR, Capt. E. Kelly, arrived at Malta on the 21st inst., and sailed on the forenoon of the 23rd for Portsmouth.

MIDGE, Capt. H. Salmond, was at Hong Kong refitting.

MONARCH, Capt. M. C. Seymour, arrived at Malta on March 7 from the Piræus.

MYRMIDON, Com. the Hon. R. Hare, was at Sandy Point, Straits of Magellan, on Feb. 6; she would probably leave that day for Rio de Janeiro and Spithead.

NARCISSUS, Capt. Lord Charles Scott, flagship of Rear-Admiral Lambert, C.B., arrived at Simon's Bay on Feb. 16. A fatal accident occurred on board on Feb. 14, an ordinary seaman, named Frederick Wilson, aged twenty years, falling off the yard to the deck whilst engaged in reefing topsails. The poor fellow's skull was severely fractured, and he died in the course of an hour. His remains were buried in the Roman Catholic Cemetery at Simon's Town on the 16th.

NASSAU, Com. R. H. Napier, having thoroughly refitted, has left Hong Kong for the Haitan Straits, to commence surveying the coast between Shanghai and Hong Kong.

NEWCASTLE, Capt. R. G. Douglas, arrived at Simon's Bay on Feb. 16.

NYMPHE, Capt. S. P. Townsend, was to be sent to West Australia, to convey the Governor to the North-West Coast.

OPAL, Capt. F. C. Robinson, left Coquimbo on Jan. 31 for Callao, touching at Iquique, as senior officer in Peru. She will visit Esquimalt after the Daring.

ORONTES, Capt. E. H. Seymour, may be expected at Portsmouth early next month, and after having defects made good will go to the Cape.

OSBORNE, Com. H. L. Pearson, arrived at Gibraltar on the 20th inst., and was to proceed the same night for Brindisi. The Prince and Princess of Wales leave Marlborough House to-day for a cruise in the Mediterranean in the Osborne, during which the Prince will visit the Duke and Duchess of Edinburgh at Malta, and the Princess will visit the King and Queen of the Hellenes at Athens. Their Royal Highnesses are expected to be absent from England about six weeks.

PEARL, Capt. L. Brine, which has been employed as commodore's ship on the Australian station, may be expected to arrive in England to pay off early in May. She has been nearly four years in commission.

PLOVER, Com. B. H. Stewart, arrived at Carthagena on Feb. 3.

RAPID, Com. E. C. Drummond, arrived at Malta on March 11 from Constantinople and the Piræus.

READY, Com. S. Grove, will be ready to pay off at Sheerness on Tuesday, the 27th inst.

REPULSE, Capt. F. W. Wilson, flagship of Rear-Admiral de Horsey, was at Coquimbo on Feb. 4. A correspondent on board writes to the *Portsmouth Times* from Coquimbo, Feb. 4:—"We have had a week's cruise, in company with the Amethyst and Opal, and, drilling together, we had, I can assure you, a very lively time of it. The Amethyst could beat us in everything but reefing topsails with the watch and making plain sail, but the Opal could not take a place at all. I have just received some glorious news. The Admiralty have telegraphed to Admiral de Horsey that he can send the Repulse home without waiting for the arrival of the Shah, and the admiral has had a notice posted that as soon as we have taken in condemned stores, and he has transferred his flag to the Amethyst, we can be off, so that in about four months you may, if all goes well, look for a big ship in your waters."

RINGDOVE, Com. U. C. Singleton, arrived at Portsmouth on the 21st inst. to pay off in Fourth Division of Reserve.

ROCKET, Lieut.-Com. C. R. Harris, was at Esquimalt up to the last date, Dec. 11.

SANDFLY, Lieut.-Com. J. Bell, has visited Port Moresby.

SAPPHIRE, Capt. E. H. Murray, remains in New Zealand.

SHAH, Capt. F. G. D. Bedford, will probably visit Esquimalt after the Opal.

SIRIUS, Capt. G. L. Sulivan, which, we stated last week, had been ordered home on account of her machinery accident, will make her way to Devonport under sail. Her present boilers were put on board at Devonport in 1875, when her machinery was thoroughly overhauled.

SPARTAN, Capt. R. E. Tracey, arrived in Bombay Harbour on Feb. 24. She left Zanzibar on Jan. 15, called at Seychelles on the 21st, left on the 27th, and reports the islands as being healthy. The Spartan called at King's Island, Maldive Islands, on Feb. 9, to institute inquiries relative to the loss of the brig Briton, in June last, but learned that nothing had been heard of her at the Maldives. The islands were healthy, but the chief, who is called "the Sultan of the Twelve Thousand Isles," was reported to be very ill. The Spartan experienced light winds and fair weather during her passage.

SWINGER, Lieut.-Com. E. A. Bolitho, was at Hong Kong refitting.

SYLVIA, Capt. B. W. Bax, had arrived at Hong Kong to refit on Feb. 1.

TAMAR, Capt. W. H. Liddell, arrived at Malta on the 16th inst., and was to proceed on the 19th for Hong Kong.

TOPAZE, Capt. A. T. Thrupp, arrived at Simon's Bay on Feb. 16.

TOURMALINE, Commodore F. W. Sullivan, C.B., was at Simon's Bay on Feb. 19.

TRIUMPH, Capt. G. H. Parkin, sailed from Malta for Devonport on the 14th inst. to pay off.

TYRIAN, Lieut. A. H. Duthie. Respecting the collision between this vessel and the schooner Vigil, of Banff, already reported, the *Scotsman* says:—"It seems that the Vigil first descried the gunboat about half-past 10 o'clock on Wednesday night. The weather at the time was somewhat rough, a good breeze blowing from N.N.W., and the schooner was on the starboard tack. Both vessels were about five miles off Aberdeen. It is stated that the lights of the schooner were burning brightly, but that the steamer came straight down upon the Vigil, as if these had not been seen. As the steamer approached, Capt. Macgregor, of the Vigil, shouted out, but no attention was paid to his cries, and shortly after the Tyrian struck the schooner on the port side. The bulwarks of the Vigil were stove in, and some of the deck planking was split, while the bowsprit of the gunboat was carried away. The rigging got entangled, and considerable damage was done to the sides of the schooner by the bumping that ensued. Eventually the vessels got separate, and the injured side of the Vigil being exposed to the sea, she began to make water fast. She then went on the port tack, and, getting the assistance of a tug, was towed into Aberdeen. When the collision occurred a large splinter of the deck planking struck the master of the schooner on the face, gashing him terribly, and rendering him insensible for a considerable time."

VALIANT, Capt. N. Salmon, V.C., was taken into Keyham Basin on Wednesday, and will have defects made good, a general refit, and bottom recoated with composition while in dock.

VALOROUS, Capt. L. F. Jones, will leave Plymouth Sound to-day for Portsmouth with supernumeraries. She was to have embarked navigating parties and stores for the Foxhound, and Forward, 4-gun screw composite-gunboats, building at Barrow-in-Furness, also for the Griffin and Falcon, 3-gun screw-composite gunvessels, building at Birkenhead, but according to present arrangements she will return to Devonport to carry out the service.

VULTURE, Com. H. H. Washington, left Malta on March 8 for the East Indies.

WIZARD, Lieut.-Com. C. Doxat, was at Zante on March 8, on her way from the Piræus to Malta.

WOLVERENE, Commodore Hoskins, was at Sydney on Jan. 22; his broad pendant was transferred from the Pearl to the Wolverene on Jan. 14, 1877.

ZEPHYR, Lieut.-Com. W. G. Le Cocq, arrived at Nassau on Feb. 6, and sent the Pert to Jamaica.

THE SARTORIUS TORPEDO RAM.

The following is given by the *Times* as a description of the vessel designed by Admiral of the Fleet Sir George Sartorius, K.C.B.:—"We may state that the monster will be of medium size, narrow as compared with its length, in order that a maximum speed may be realised, and that its tapering bow and stern may each be armed with snouts for ramming purposes. Although it will only draw about fourteen feet of water it will be deeply immersed. In midship section it will be oval, tapering at the centre downwards to a point, so that it will have somewhat the appearance of a peg-top. The deck, or, rather, the portion of the structure which will be seen above the water, will be bluntly cylindrical, but sufficiently convex to deflect an enemy's projectiles. This feature in its construction will dispense with the necessity of its being heavily armoured. We believe three inches will be the thickness of the plating, which will, however, extend in an unbroken arc from below the water line and over the weather deck, and thus afford a perfect protection to the vitals of the vessel. The sides below water will consist of iron skin only, but the space from the bilge to the keel will be filled with cement and concrete. The armour will probably consist of steel plates, the construction of which is now engaging the attention of the dockyard authorities. The new ram will carry no guns of any kind. Indeed, the whole of her offensive apparatus will be below the water level. To the enemy she will expose nothing but her convex deck and its fittings. The bow and quarters of the ship will be provided with torpedo gear upon the same principle as that of the Glatton, the former being so arranged that a slight sheer out of line will enable her to discharge her torpedoes at any enemy previous to ramming him. In addition to this, she will carry a couple of torpedo tubes amidships. The Whitehead projectiles with which she will be armed will be of an improved type, the speed of which will so far transcend that of the engines described by Lord Charles Beresford that 24 knots an hour are expected to be realized. The vessel will be designed to combine speed and invulnerability combined with great offensive power and smallness of target."

The *Portsmouth Times* says:—"With reference to the statement made by the ARMY AND NAVY GAZETTE, which we published in our Tuesday's impression, we are in a position to state that in all probability the present Controller of the Navy, Rear-Admiral William Houston Stewart, will again hoist his flag here as superintendent of this dockyard, when the time arrives next month for Sir Leopold M'Clintock to strike his flag. When Rear-Admiral Stewart has served the required time to qualify him for promotion he will return to the Admiralty, and be succeeded here either by Rear-Admiral Luard, now acting as superintendent at Malta (who will return to England shortly), Rear-Admiral Rice being about to again resume the duties at Malta, which he temporarily left when directed to go afloat as second in command of the Mediterranean Squadron, or by Rear-Admiral Foley, late captain-superintendent at Sheerness."

The Malta correspondent of the *Western Morning News* writes under date of March 9:—"Their Royal Highnesses the Duke and Duchess of Edinburgh left Malta yesterday morning in the Helicon for a cruise, visiting Palermo, &c.; they will, probably, be away about ten days. They have been living very quietly amongst us now for some months. The Duke, while with his ship, does his duty as captain in the same way as the other captains of the Fleet, goes to the dockyard to see about the requirements of the Sultan, waits upon the admiral, &c., and he is not too proud, when landing at the Marina, to take the first four-wheeler on the stand to drive up into the town. Everyone who has had intercourse with him speaks of his quiet, amiable manner; and, were it not that now and again when he is recognised and a crowd of hats are lifted, one would scarcely know we had royalty in our midst."

CAPTAIN COOK'S MONUMENT IN THE SANDWICH ISLANDS.

We have been favoured by the Secretary of the Admiralty with the following interesting memorandum respecting the monument erected to the memory of Captain Cook at Karakakoa :—

A report has been received at the Admiralty from Commander Long, of H.M.S. Fantome, giving a detailed description of the measures carried out by order of the Lords Commissioners of the Admiralty for the improvement of the site of the monument erected in Kealakekua or Karakakoa Bay, in the Island of Owhyhee, to the memory of the great circumnavigator, Captain Cook.

Rear-Admiral the Honourable Arthur Cochrane, late Commander-in-Chief on the Pacific Station, after visiting the islands in 1875, drew the attention of the Admiralty to the state of the monument, and, on his application, the Princess Likéliké (now Mrs. Cleghorn), the sister of the King of the Sandwich Islands, who, originally, presented a piece of ground as a site for the memorial, added to her former generosity by bestowing an additional plot of about half an acre for an enclosure.

At the Admiral's suggestion, the Admiralty, with the concurrence of the War Office, gave directions for twelve old 32-pounder guns, which were in store at Esquimalt, being conveyed to the Sandwich Islands, for the purpose of forming a suitable fence.

The monument is a plain obelisk of concrete, twenty-seven feet in height, erected on the shore, and close to the spot where the great seaman fell. The expense of its erection was mainly borne by English subscribers interested in the island, amongst whom were Lady Franklin, Rear-Admiral Richards, Mr. Follett Synge, &c. The seaward base of the obelisk bears the following inscription :—

IN MEMORY
of
The great Circumnavigator
CAPTAIN JAMES COOK, R.N.,
who discovered these Islands on
18TH JANUARY, 1778,
and fell near this spot on
14TH FEBRUARY, 1779.
This monument was erected in November,
1874, by some of his
FELLOW COUNTRYMEN.

Admiral Cochrane thus describes the locality and the monument :—

"The appearance of the Bay of Karakakoa (which is open to the westward) gives the impression that it had been formed by two streams of lava, which had run down from the great mountain of Kilanea into and a little above the level of the sea, forming the horns of a crescent, constituting the bay ; the background of the bay is formed by a high precipitous bluff, composed of layers of lava, stones, and mud, ejected from the volcano. In the sides of this cliff, which rises from the sea several hundred feet, are very numerous apertures, or small caves, which were constructed and used in former times as the burial places of the great chiefs of the island. When King Kamehameha I. conquered the island, he caused many of the skeletons of the chiefs to be removed to the Island of Oalin in which Honolulu is situated, entertaining, as it is supposed, some idea that the respect and veneration which was entertained by the people for the Chiefs, and for their remains, would, as he thus became their custodian, cause the population to regard him, their recent conqueror, in a more favourable light. On the north shore of this bay, where there is a very fair landing, free from surf, the spot is pointed out where the illustrious navigator was slain. The monument erected at a short distance from the beach is very modest and unpretentious."

Admiral Cochrane remarks that now that a monument has been erected, probably all foreign men-of-war and tourists from the United States who visit Honolulu, will call there, and that already an hotel—not a bad one—had been erected, and a few private houses. He describes the country and the climate, on the side of the great volcano, which slopes upwards from the Bay of Karakakoa, as being charming, and the temperature, 1,500 feet above the sea, all that could be desired. A square mass of stones marks the spot where, as tradition points out, the natives retired out of range of the cannon shot of Captain Cook's ships, to mutilate and desecrate the remains of that gallant man. He says that any ill-feeling by the natives towards the English has not been known for ages, and that a more kindly and hospitable people does not exist. The present king, Kalakaua, appears most desirous of forwarding any mark of respect in memory of the distinguished officer, as also of Capt. Vancouver, who first introduced cattle and other animals in the islands, and to whose memory his Majesty said they were all much indebted.

The guns used for the enclosure of the site were conveyed from Esquimalt to Owhyhee in H.M.S. Fantome in September last. They have been fixed in the ground vertically at intervals, and connected by a chain, thus enclosing an area of ground of about 150 feet square, in which flowers and shrubs, kindly provided by the Rev. M. Davis, of the Church of England Mission, have been planted ; also seeds of the Algaroba tree, which is most suitable for the dry and rocky soil.

Commander Long states that the appearance of the monument has been greatly improved, and that it is now quite sufficient for so disadvantageous a site. He suggests that if it should be desired to erect a better memorial, the addition of a "Captain Cook's Ward" to Honolulu Hospital would be an appropriate arrangement, and well fitted to perpetuate the memory of the distinguished discoverer of the islands, one of whose greatest cares was the health and comfort of his men.

Her Majesty's Consul-General at Honolulu states that great credit is due to Commander Long for the spirit and energy with which he carried through the undertaking, which was necessarily long and wearisome, and in which he was well seconded by the officers and men under his command.

NAVAL PRIZE MONEY.

Notice is given to the officers, seamen, and Marines, and to all persons interested therein, that the distribution of the tonnage bounty awarded for the slave dhow Mamboasa, captured on Feb. 20, 1876, by her Majesty's ship London, will commence on Tuesday, the 27th inst., in the Prize Branch of the Department of the Accountant-General of the Navy, Admiralty, New-street, Spring-gardens, S.W. The following are the shares due to an individual in the several classes :—Flag, £4 6s. 2d.; captain, £12 9s. 10d.; second class, £2 1s. 10d.; third class, £1 15s. 11d.; fourth class, £1 3s. 11d.; fifth class, 14s. 4d.; sixth class, 12s.; seventh class, 8s. 4d.; eighth class, 4s. 9d.; ninth class, 2s. 4d. Also, that the distribution of the slave bounty awarded for seven slaves, captured on March 1, 1876, by her Majesty's ship London, will commence on Tuesday, the 27th inst. The following are the shares due to an individual in the several classes :—Flag, 19s. 11d.; captain, £2 17s. 9d.; second class, 9s. 9d.; third class, 8s. 5d.; fourth class, 5s. 7d.; fifth class, 3s. 6d.; sixth class, 2s. 10d.; seventh class, 2s.; eighth class, 1s. 1d.; ninth class, 6d. Also, that the distribution of the tonnage bounty awarded for the slave dhow Chua, captured on March 12, 1876, by her Majesty's ship London, will commence on Tuesday, the 27th inst. The following are the shares due to an individual in the several classes :—Flag, £20 3s. 10d.; captain, £58 11s. 2d.; second class, £9 16s. 10d.; third class, £8 8s. 9d.; fourth class, £5 12s. 6d.; fifth class, £3 7s. 6d ; sixth class, £2 16s. 3d.; seventh class, £1 19s. 4d.; eighth class, £1 2s. 6d.; ninth class, 11s. 3d.

NAVAL ENGINEERS.

The following tabular statement gives the numbers and estimated annual cost of the present establishment of Engineer officers, as compared with the numbers and cost of the permanent establishment proposed for the future, and also the rates of pay now received by each rank of Engineer officer, and the rates proposed for the future :—

RANKS AND RATINGS.	PRESENT ESTABLISHMENT. Full Pay.		Half-Pay.	
	No.	£	No.	£
Chief Inspectors of Machinery	5	2,281	—	—
Inspectors of Machinery..............	4	1,825	1	292
Chief Engineers	143	41,010	27	4,435
Engineers and Assistant Engineers	716	119,528	*10	*985
Chief Engine-room Artificers	—	—	—	—
Engine-room Artificers	350	34,674	—	—
Total	1,218	199,318	38	5,712

1,256 £205,030

RANKS AND RATINGS.	PROPOSED ESTABLISHMENT. Full Pay.		Half-Pay.	
	No.	£	No.	£
Chief Inspectors of Machinery	5	2,920	—	—
Inspectors of Machinery..............	4	2,044	3	931
Chief Engineers	193	55,343	27	4,965
Engineers and Assistant Engineers	585	105,426	*15	*1,587
Chief Engine-room Artificers	100	12,634	—	—
Engine-room Artificers	350	37,020	—	—
Total	1,237	215,387	45	7,483

1,282 £222,870

No. 26. £17,840. Probable ultimate increase exclusive of retirements.

* Harbour Pay.

N.B.—There are no sufficient data for computing the increased charge that will be incurred on account of retirements. The number of engine-room artificers has been taken at 350, but it is possible that this number may be somewhat increased.

	FULL PAY		HALF PAY.	
	As at present. Per diem £ s. d.	As proposed. Per diem £ s. d.	As at present. Per diem £ s. d.	As proposed. Per diem £ s. d.
Chief Inspectors of Machinery... ...	1 5 0	1 12 0	0 16 0	0 18 0
Inspectors of Machinery	1 5 0	1 8 0	0 16 0	0 17 0
(The three officers holding the appointments of inspectors of machinery in the reserves to receive 3s. a day more as heretofore.)				
Chief Engineers :				
Under 5 years' service (including junior service allowed	0 12 0	0 13 0	0 6 0	0 6 6
And to count all confirmed time from the age of 20				
Under 8 ,,	0 13 0	0 14 0	0 7 0	No change

After re-engaging for a further term of 10 years—				
Above 13 years' service	0 5 9	0 6 6		

(To be eligible for the rating of Chief Engine-room Artificer on re-engaging for a second period of 10 years.)

RETIRED PAY.

Chief Inspectors and Inspectors of Machinery—Maximum to be £500 instead of £450, as at present.

Chief Engineers to be allowed to count all confirmed time from the age of 20. No Chief Engineer to receive less retired pay than he would have been entitled to as Engineer.

Engineers— To receive retired pay instead of pensions : Engineers to be retired at 45,	Qualified for promotion for each year's service : On full pay, £7 10s.	On Harbour pay, £3 15s.
	Maximum, £150.	
	Not qualified for promotion : £6 10s.	£3 5s.
	Maximum, £130.	
and		
Assistant Engineers at 40 years of age.	After three years' service, £25, and £5 0s.	£2 10s.
	Maximum, £50.	
	Under three years' service, £20 per annum.	

Chief and Engine-room Artificers to be pensioned on the same scale and under the same regulations as other chief petty officers. Maximum not to exceed £60 a year.

INSTITUTION OF NAVAL ARCHITECTS.

The session of this institution for 1877 commenced on Thursday at the Society of Arts, Lord Hampton in the chair.

Lord Hampton, after a few preliminary observations on the subjects of the papers which were about to be read, stated that he thought it his duty to touch upon the unusual number of casualties that had befallen some of our most important men-of-war during the past year. In illustration of what he meant he would allude to the explosions on board the Thunderer, the Hydra, and the Vesuvius ; and he would refer again to the cases of the Assistance and the Orontes, two troopships that had become helpless on the seas in consequence of accident to their machinery. The Bodicea was, in another case, disabled only by the breaking of a small pin. Then there was another case, that of the Thetis. They were not, he thought, as yet in possession of the exact circumstances attending the accident.

Mr. N. Barnaby, C.B., Director of Naval Construction, then proceeded to read his paper "On the Fighting Power of the Merchant Ship in Naval Warfare." Premising that no one doubted that in a naval war the steamships owned by English merchants would be of great value for the purpose of supplying stations and war fleets with stores and munitions of war, our first-class ocean-going mail steamers could, he said, maintain a speed, even when loaded, which would be unapproachable by most of the fighting ships of the enemy. He desired, however, to push the question, and ascertain the value of the merchant ship in active, offensive, and defensive warfare. He thought first-class steamships in defensive warfare might be made available for—1. Self-defence on the high seas against rovers, whether men-of-war or armed merchant ships. 2. The patrol of the highways of commerce by vessels in the employment of the Government, for the destruction or capture of rovers. 3. Clearing the offing of important harbours, at home and in the colonies, of hostile vessels, including breaking the attempted blockades of ports. 4. Convoying merchant ships. 5. Protecting harbours, naval stations, and coasts, at home and in the colonies, against violation. In offensive warfare such ships might be available for—1. The capture of trading ships belonging to the enemy, or liable to capture on his account. 2. The infliction of injury upon harbours, naval stations, and coast towns, and landing military forces on the enemy's territory. 3. Disabling or destroying the armed ships of the enemy. 4. Blockading the principal ports of the enemy to prevent the passage of merchandise inwards or outwards, and to lock up his armed ships. 5. Transporting troops, stores, and munitions of war, and keeping up communications by despatch vessels. Our mercantile steam fleet was a magnificent national possession, and needed only to be manned by trained British seamen, and to be at the service of the State ; and it would not, Mr. Barnaby believed, be the fault of the naval administration if this was not accomplished. (Cheers).

A discussion followed, and several other papers were entered upon. We regret that want of space prevents our giving a full report.

ROCKET-FLOATS.

The Rev. Mr. Ramus, inventor of the rocket-float, informs us that the Admiralty have now for the second time undertaken to consider his invention, which is simply a float (carrying a charge of explosives large enough to destroy a ship) with a rocket laid horizontally upon it and securely attached to it. When the rocket is fired, its combustion supplies the propelling force that drives the float over the water in the direction required. The chief peculiarity of the invention lies in the construction of the float, the bottom of which is formed of three or more consecutive inclined planes, which enable the float to pass evenly over the surface of the sea at a rate of speed hitherto considered impossible. The Admiralty engineer has shown that the utmost resistance which the water can offer to vessels of this construction can never, at any assigned rate of speed, exceed one-eighth of the entire weight of the vessel. And it has been further ascertained, by numerous experiments made with rocket-floats, as well as by calculations derived from experiments made with rockets on board H.M.S. Excellent some years ago, that the combustion of a rocket will supply a propulsive force prodigiously greater than is necessary for overcoming the resistance of the water to a rocket-float, so that there will always be an immense surplus force available for the acceleration of the float as long as the rocket burns. A computation has been submitted to the Admiralty by Mr. Ramus, in which he shows that a rocket-float of 50 tons can be driven over the water at a speed of 275 miles an hour, and can be propelled to a distance of nearly four miles. The rocket-float is guided in any desired course by a fixed rudder of thin metal, so that it can be projected against a ship or any other object on or near the sea with perfect precision. The cost of a 50-ton rocket-float will not exceed £1,200, and that of a 10-ton float (the most serviceable size) will be about £250 ; yet a few of these inexpensive implements, well directed, would in a few hours destroy a fleet of iron-armoured ships.

Lieut.-Col. A. W. Dashwood, formerly of the 19th Lancers and 71st Highlanders, died at Shenley Grange, Herts, on the 15th inst., in his 81st year.

SIR EDWARD BELCHER.

By the death of Admiral Sir Edward Belcher, K.C.B., which occurred on Sunday last, the Navy has lost one of its most distinguished officers of the old school. He entered the Navy in 1812 as first-class volunteer on board the Abercromby, and while in that ship was employed on the coast of France and on the north coast of Spain. From the mastheads of the squadron he made a survey of the Basque Roads in so satisfactory a manner as to gain, according to O'Byrne, the approbation of Lord Keith, Sir Harry B. Neale, Sir Pulteney Malcolm, Sir Philip Durham, Lord Amelius Beauclerk, and all the captains. While in the Bellerophon he assisted in the survey of St. John's Harbour. In January, 1815, he joined the Malta, and assisted at the surrender of Naples, and was engaged at the reduction of Gaeta. He was at the battle of Algiers, on board the Superb, and after the action was selected by Lord Exmouth to make a plan of the batteries. He obtained the rank of lieutenant in July, 1818. After leaving Algiers he was employed off the West Coast of Africa against the slave trade; and afterwards in the West Indies, where he was employed in surveying. On the return home of the Salisbury, in 1824, he volunteered to accompany Capt. Beechy in the Blossom on his scientific voyage to the Pacific, when he acted as assistant-surveyor to the expedition, and in that ship visited the frozen regions for the purpose of co-operating with the expeditions under Franklin and Parry. During that time he suffered many severe hardships, was wounded, and twice wrecked. As commander of the Etna and the Sulphur he executed some various important surveys. In the command of the latter he served at the destruction of the forts of the Bocca Tigris in company with the Nemesis, and in the operations against and capture of Canton, which were greatly facilitated by his previous surveys. For his services he was appointed captain in May, 1841, and nominated a Commander of the Bath in October following; and in 1843 received the honour of knighthood. In November, 1842, he was appointed to the Samarang, surveying-vessel, and sailed in her for Borneo. Afterwards he visited Brune, and there was offered by the Sultan the Island of Labuan, whence Sir Edward proceeded to the China Seas. On June 4, 1844, while in the Straits of Jilolo, he fell in with and was attacked by a fleet of Illanon pirates. In the conflict which ensued the pirates were defeated, but Sir Edward received a severe wound. His conduct on that occasion met with the approbation of the Board of Admiralty, and was declared "highly creditable" by Lord Palmerston; and by a court of inquiry instituted at the instance of the Dutch, was thanked for his forbearance and humanity under the provocation he had endured. He was granted a pension of £250 for his wound. He also rescued the crew of the British barque Premier, which had been wrecked, the crew falling into the hands of the natives, on the west coast of Borneo, and afterwards concluded treaties with the two Sultans concerned. At the Philippines the unprecedented privilege was conceded to him of surveying the different harbours and approaches within the forbidden limits of the batteries. Sir Edward's last appointment was to the command of the Assistance in February, 1852, and of the expedition consisting of the Resolute, Capt. Kellett; North Star (store-ship), Capt. Pullen; Intrepid, Capt. M'Clintock; and Pioneer, Capt. Sherard Osborn, which sailed in the following April for the Polar regions in search of Sir John Franklin; and of the Investigator and Enterprise, commanded by Capts. M'Clure and Collinson, which vessels had entered the Arctic Seas through the Behring Strait. In April, 1854, Sir E. Belcher found it necessary to abandon his ships, and in the following year, having returned to England, he was tried by a court-martial and acquitted for so doing. He was nominated a Knight Commander of the Order of the Bath March 13, 1867. The late Sir Edward Belcher had conferred on him in 1874 a Greenwich Hospital Pension. His commission as rear-admiral was dated Feb. 11, 1861; vice-admiral, April 2, 1866; and admiral, Oct. 20, 1872.

TORPEDO VESSELS.

On Monday morning Mr. Ward Hunt, Admiral Sir John Hay, Admiral Boyes (Director of Naval Ordnance), Com. Lord Charles Beresford, Mr. Barnaby, C.B. (Director of Naval Construction), Capt. Codrington, R.N., and Messrs. Thornycroft and Donaldson, the constructors of the new torpedo vessel Lightning, left Westminster-bridge Pier for a run down the river in the Lightning. This vessel is 84ft. in length by 10ft. 10in. beam, and is the fastest in the Navy, the mean speed attained on the preliminary runs being fully 19 knots per hour. After clearing the Pool, the speed was increased to about 14 or 15 knots, and maintained at this rate of steaming till near Long Reach, when it was proposed to try the vessel over the measured mile. The steam pressure, however, was only 105lb. to the square inch, and it took 3min. 56sec. to do the mile, being equivalent to a speed of 15¼ knots against the tide. On the return journey, with the full pressure of 120lb. steam, the mile was done in 2min. 56sec., equivalent to a speed of 20·45 knots per hour. Something, however, must be deducted on account of the tide, which was still running up, so that in all probability the mean speed, with full pressure, would be a little over 19 knots. The Lightning reached Westminster-bridge on the return journey at half-past 2 o'clock, so that, including the easy running through the Pool, the distance of about forty-five miles was done in two hours and forty minutes, being at the mean rate of sixteen statute miles, or nearly fourteen knots an hour. The machinery worked perfectly. The French Government, being satisfied with the torpedo vessels supplied by Messrs. Thornycroft last year, and of the value of such vessels, has given an order for six more. Messrs. Yarrow and Co. are also building torpedo vessels for the Dutch and Greek Governments. The speed of these vessels will be about eighteen miles an hour. The torpedo, containing 35lb. of dynamite, is to be carried at the extremity of a long steel pole projecting 30ft. in advance of the boat.

THROAT IRRITATION.—The throat and windpipe are especially liable to inflammation, causing soreness and dryness, tickling and irritation, inducing cough and affecting the voice. For these symptoms use glycerine in the form of jujubes. Glycerine, in these agreeable confections, being in proximity to the glands at the moment they are excited by the act of sucking, becomes actively healing. Sold only in 6d. and 1s. boxes (by post for 14 stamps), labelled "JAMES EPPS and Co., Homœopathic Chemists, 48, Threadneedle Street, and 170 Piccadilly, London."

TERRITORIAL REGIMENTS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Surely the man who started the idea of doing away with the time-honoured designation of our regiments by means of simple numbers must be one singularly deficient in imagination. Thirty years' military duty, chiefly regimental and on regimental Staff, convince me no more impolitic change could be made. Imagine, too, the inconvenience of having to substitute a long territorial for the present short and quickly pronounced numerical title. Just think of the loss of time involved in writing in all reports, and on parade, &c., and being forced to repeat "Nottinghamshire Regiment" instead of "45th," and again of the liability to confusion in taking up ground for review, which has to be done by seniority, from right to left. How can the numbering of regiments be dispensed with? It seems as if some evil genius, some military Puck, were at work determined to destroy the last remnant of *esprit de corps* in our regiments, and to reduce all to the same uninteresting dead level. It would appear to be forgotten that throughout Napier's noble history of the Peninsula war our regiments are referred to by the very numbers it is now proposed to abolish. To do this is, in effect, to rob such regiments of the means of identifying themselves with their individual glory. We read of Albuera that "Col. Inglis, twenty-two officers, and more than four hundred men, out of five hundred and seventy, fell (not in the West Middlesex Regiment) but in the 57th alone." While of regiments famed for equal prowess nearer the rising sun—regiments whose history is an epitome of British victory in India, from Assye to Lucknow—the 78th, landed by Wellesley in 1803, and Havelock in 1857, will, if this new idea is enforced, be henceforth called by a name unmentioned in all this brilliant record, while, at the same time, no other will be enriched through its loss. Such glory is, indeed, not transferrable, and the regiments now threatened in this fashion may well exclaim with Iago, "He that filches from me my good name robs me of that which not enriches him and makes me poor indeed." It is simply impossible that the proposition referred to can have originated with any officer who has much intimate knowledge of, or sympathy with, the feelings of our soldiers in camp or barracks. It is an idea more likely to find favour with Militia officers. I say so, not in any disrespect towards the Militia, but it is natural to suppose the localisation idea would be more prominent, while the extraordinary influence that old and honourable tradition exerts in our most famous foreign service corps would be less understood by the home-serving Militia officer. But this idea of keeping our regiments, excepting, perhaps, a very few special corps, truly local—that is to say, composed only of men from particular counties—is one not likely to be found practicable; nor in some cases, where the population is almost entirely manufacturing, would it, if practicable, be perhaps desirable. The fact of so small a proportion of the territorial designations being Irish is enough to show the idea cannot be entirely acted upon. The localisation system can be completely and most conveniently carried out in Germany, but no European Armies exist under more opposite conditions than the British and German, to say nothing of the contrast presented by the free, raw, undrilled recruit who takes Queen Victoria's shilling entirely of his own accord and the man who is forced—will he nill he—by conscription into the German Army after having been more or less drilled from infancy. We have, in the one case, an army never employed away from home, and in the other one that is for ever on duty in every quarter of the globe, and whose motto might well be that of the Royal Marines, *Per mare per terram.* It is earnestly to be hoped that before any decisive step be taken in this matter the opinion, not of mere Staff, but of experienced regimental officers, men who have lived among the soldiers, may be called for. The great Frederick was not above saying "a general ought not to be inattentive to the advice of even a subaltern officer," and after he had earned renown in war he published his "Military Instructions" to his generals, but in conclusion requested them to favour him with their criticisms, in order that he might subscribe to their opinions if they should prove sounder than his own. With all due respect, one may venture to note this redoubtable warrior's example for the high civilian authorities, who now hold the honourable sentimentality of our regiments so cheap, apparently, that they propose to deface and disnumber them.—I am, &c.,
C.

SIR,—Allow one voice at least to reply to many letters you have given insertion to against territorial regiments. So far, it is to be remembered the objectors alone to the scheme have spoken. Its advocates are silent; but, as it behoves someone of them to raise a banner to stem the crusade against what, if the whole body of regimental officers were canvassed, would be found to be regarded, if not by the majority, at least by a minority, who do their duty without letting *esprit de corps* interfere with *esprit de service* and *esprit de devoir*, as a spirit injurious to the efficiency of the Army as a whole, I therefore trust you will give insertion to this protest against the outcry that has arisen at the recommendations of the late Royal Commission. Many of that minority could tell how *esprit de corps* has carried officers of other regiments they are associated with on duty to forget subordination and discipline, without which, where is an efficient army? And is not an army made up of corps? Strongly as that minority value reasonable *esprit de corps*, they would tell you, if asked, the only cure they can see as yet proposed for the hitches, break-downs, and complications of the Brigade Depôt system, are territorial regiments. Finally, it is borne in mind the territorial regimental scheme need not—will not, I humbly venture to say—destroy *esprit de corps*, as each battalion of the new regiments will retain its honours, its traditions, and its distinctions.—I am, &c.,

AN ADVOCATE OF THE LOCALIZATION
SYSTEM IN ITS INTEGRITY.

SIR,—Let me hasten to assure "LXVIII" that he cannot look with more disgust than I do on the ridiculous new titles proposed for the regiments of the British Army. My plan was to preserve as many as possible in their integrity, as the titles I used were not mine, but were invented by a Parliamentary Committee.—I am, &c.,
XXXV.

March 22, 1877.

Another gunboat for the Chinese Maritime Customs has been launched. She is a vessel of 70 tons. Length, over all, 90ft.; beam, 15ft.; depth of hold, 5ft. She is constructed to run 11 knots an hour, and is fitted with a ram.

WAR MEDALS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—In these days, when medals (very properly too) are given to everyone who joins a successful expedition, whether he be under fire or not, it seems hard on those who, under the less generous rules prevailing in former days, find themselves undecorated, though they formed part of a victorious force, performed faithfully the duties allotted to them, but did not happen to be actually under fire. This is particularly the case with regard to the China expedition of 1860, for which no one received a medal, unless actually under fire, though those regiments detailed to garrison important places, who thus materially assisted in the expedition, often had a worse time of it than their comrades in the front. Take, for instance, the garrison of Canton, consisting of the 87th Royal Irish Fusiliers, the 3rd and 5th Bombay Native Infantry, some Royal Artillery, Engineers, and Marines. This force never even received field allowance, or any share of the prize money, while the losses in officers and men were, I believe, equal to those of any regiment in the front. The 87th marched by forced marches from Umballa to Calcutta, to proceed to to China, and though told they would be one of the first regiments to be sent to the front, they found themselves on arrival sent to garrison Canton, while the Buffs, originally detailed for that duty, proceeded to the front in their place. Surely it would not swell the Army Estimates much to give the China medal to the few regiments of that expedition who have not received it, while it would gratify many an old soldier, and place him on an equality with his luckier comrades of the Abyssinian and Ashantee wars.

ONE WHO WAS THERE.

THE DEARTH OF NON-COMMISSIONED OFFICERS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Noticing a remark on the dearth of non-commissioned officers, and the plan your correspondent suggested to remedy that defect—viz., getting the sons of farmers and well-to-do tradesmen to enter the Army as such—my belief is, the plan would never succeed. There are not many farmers' sons who would give up their homes for the Army, unless there was some chance of rising higher than the driller of raw recruits; and much less a well-to-do tradesman's son, who has been brought up for something better, and looks to being a partner in his father's business. Your correspondent goes on to say that these young men, after a certain time of probationary service, should be examined as to their fitness and capability to be non-commissioned officers, and, if not up to the standard, should be discharged from her Majesty's Service. Here would be a drawback that would keep many away. I believe with him that our Army would be much better in every respect if the middle class could be encouraged to join; but until there are better inducements offered and higher openings, there will be scarcely any of the middle class in the ranks.—I am, &c.,
TRUTH.

SIR,—Permit me to say a few words about the Army in which I am proud to be a private. I read in your paper of the 24th ult. something about enlisting men for non-commissioned officers and permitting them to wear civilian clothes, &c. Now, does any one in his sober senses believe that such a proceeding would benefit the Service? I am inclined to think quite the opposite, and have not the slightest doubt but the greater number of the readers of your paper will agree with me.—I am, &c.,
HOLD THE FORT.

March 4, 1877.

ARMY EXPENSES.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—In these competitive examination days, when so many sons of poor clergymen, poor officers, and widow ladies, who carry off the coveted reward by dilligent study, and enter the Army for the Army's good, there are many expenses the young sub should be released from, especially those who gain commissions for the West India regiments. When my son was sent to Chatham he was attached to the most popular and expensive regiment, which he felt as a great honour. Having only his pay to live upon, he was obliged to practice the strictest economy, drinking water at mess, never entering the billiard-room, kept from the card-table, and did not smoke. Yet his mess expenses were more than his pay. And the same while he was at Manchester. Although at Chatham for only three months, he had to find his man-servant a new suit of clothes, from hat to boots, and a new suit for his man at Manchester, independent of their monthly pay. Another expense might be saved the young sub destined for foreign service—the furnishing of his room, the moving of which presses very heavily upon his scanty means, to say nothing of discomfort. Should he have to hire what is barely requisite for the short time he is stationed either at Chatham or Manchester, those who supply such things make him pay pretty heavily for the accommodation. I send you a bill for small articles his servants required, which the young sub had to pay, being about three times as much as they cost:—Bucket, 3s.; carpet broom, 8s.; slop-pail, 4s.; black lead brushes, 1s.; candlesticks, 3s.; citol (?), 3d.; washing book, 6d., &c. Again, I think it is hard for a young sub to have to pay a share of the champagne, wines, &c., consumed on guest nights when he is only attached for a few weeks. For instance, my son had put down in his monthly mess bill £1 8s. for wine when he had only four glasses of sherry during the time. By all means let the young sub pay his share of the ordinary mess, but not compel him to pay the same as if he belonged to the regiment, and had the same privilege of inviting friends on the guest nights. These small items may appear trivial to those who have private incomes or rich parents, but to the poor sub, if they were abolished, would save him much anxiety and pain, and would be a very small item in the Army Estimates.—I am, &c.,

A CONSTANT READER.

H.R.H. the Field-Marshal Commander-in-Chief directs that until further orders the examination of sub-lieutenants shall be conducted in all respects in the manner prescribed for non-commissioned officers—viz, in the field, *viva voce*, and by written questions summarizing the result of the latter, as prescribed in para. 53, section 4, Queen's Regulations.

FURNISH ON THE NEW HIRE SYSTEM.—The "New Hire System" is quite distinct from anything yet attempted. Houses furnished throughout. 20 Wholesale Houses to select goods from. "An excellent idea."—"Army and Navy Gazette." Prospectus, with Press opinions, post-free. General Furnishing Company—Offices. 9, Southampton-street, Strand.

THEATRES.

OLYMPIC.—So many years have elapsed since it was a stock piece with Mr. Charles Kean that, to the bulk of present playgoers, "The Wife's Secret," by G. W. Lovell, is practically a new play; and its revival at the theatre presided over by Mr. Henry Neville has proved exceedingly welcome. Though people are generally suspicious of subjecting themselves to blank-verse plays of five acts length—other than those by Seakespeare—no fear need be entertained of the present. While built on the Elizabethan model, it is powerfully and brightly written; the author has a good story to tell, which he tells so well that the interest of the last act is quite as great to the end as that of any of the other four. The period chosen is just after the abortive attempt upon Salisbury, when Cromwell had firmly established himself as Protector, and was disposed to show scant mercy to his enemies, past or present. The chief offender in the Salisbury affair, it happens, was one Lord Arden, whose sister, Eveleen, is happily wedded to Sir Walter Amyott, a Puritan gentleman. As a fugitive, Arden seeks his sister's roof at a time when her husband is hourly expected. She shelters him, and swears on oath that she will not humiliate him by informing his enemy that he is an inmate of the house. Sir Walter's suspicions are aroused by an Iago-like unjust steward, and his own eyes witness what he cannot but take as positive evidence of his wife's faithlessness. He taxes her with perfidy, but she is bound by her oath. He then protects her supposed lover, and determines to leave her for ever, showing a magnificent devotion, which places the whole of the play far above the rank and file of such modern productions. Just as matters approach an almost tragical ending, an accident reveals to him the truth of the case, and all ends happily, even to the prospect of a pardon for the Cavalier brother, who has been the cause of all the mischief. Though the piece is written in blank verse of a high order, it must not be supposed for a moment that it is of a ponderous nature. There is a capital underplot relating to the courtship of a coxcombical page, and a Royalist waiting-woman who has turned Puritan for the nonce, both very amusing creations. The steward, too, is a study replete with a certain kind of humour. Altogether "The Wife's Secret" is a far better play than we get now-a-days, and it seems a pity that its revival is for such a short period. The acting is well worthy of the work. Mr. Neville as Sir Walter gives a fine picture of the brave, trusting, and chivalrous gentleman, forced by circumstances to doubt his wife, but ready at any moment to snatch at a straw which will prove her innocent. The acting of Miss Bella Pateman as Lady Eveleen is also worthy of every praise. She is graceful, animated, and interesting in the earlier scenes, and when the complications crowd upon her, and she is unable to use the one word which would clear them all off in a moment, the impersonation becomes as finely intense as anything seen for many a day. This lady cannot fail to make her mark upon the London stage. Mr. R. Pateman may be congratulated on his careful and effective rendering of the steward, Jabez Sneed, and Mr. Avondale for his admirable reading of the lines that fall to the lot of Lord Arden. But two of the most attractive characters in the piece are the page and the waiting-woman already mentioned. As Robert, the page, Miss Patty Chapman plays with real comedy spirit, and proves herself the thorough artist she should be, considering her training. As for Miss Camille Dubois, her rendering of Maud, the mendacious maid, is simply exquisite. This clever young actress has caught the character as it is, and reflects the time as exactly as if she had just stept out of a picture of the period,

AQUARIUM.—Stage adaptations of the works of Charles Dickens are proverbially unsatisfactory, and "Great Expectations," by Mr. W. S. Gilbert, is no exception to the rule; but it has in it strong interest and powerful situations, and is not so blameworthy as some of its companions on the ground of making action subservient to the development of one or two favoured characters. When produced at the Court some years ago it had a fair amount of success, which we hope will be repeated at the Aquarium. A satisfactory company has been engaged for its representation, including many well-known favourites. Miss Maggie Brennan plays Pip very well, and with all her known capacity for assuming the male garb; Mr. W. Belford resumes his part of Orlick with great effect; the convict Magwitch is exceedingly well played by Mr. E. F. Edgar; Mr. F. Dewar makes a good piece of character out of Mr. Jaggers; and Mr. James Fawn is remarkably funny as Joe Gargery. It must be recorded, also, that one of the best bits in the piece is the Biddy of Miss Julia Roselle. The piece is well put upon the stage.

DRURY-LANE.—During the week "The Corsican Brothers" has been played in conjunction with "Haska." As it is succeeded this evening by "The Colleen Bawn," it does not call for comment just now; but it may be recorded that a grand ballet took the place of the masquerade at the French Opera, and that Mdlle. Bossi made a hit as the principal dancer. Mr. H. Sinclair represented the Brothers; Mr. Howard Russell, Chateau Renaud; and Miss Murielle Emelie, Lesparre.

BREVET MAJORS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Something ought really to be done to help on the unfortunate brevet majors. At present it takes about nine years for an officer to pass from junior to senior of his rank as brevet major. But if this is so now, what will it be in a few years' time, when the whole of the officers of the two Ordnance Corps reach the head of the list. It will be too late to try to mend matters then if they are not taken notice of before. But perhaps matters will mend themselves when Parliament has voted the money which is necessary for providing a scheme of retirement.—I am, &c.,

ONE OF THEM.

A general opinion having been expressed that prior to Archdeacon Wright leaving England for British Columbia, his long and valuable services in connection with the Portsmouth Garrison, his readiness at all times to assist in any useful work, and especially his untiring energy in promoting the restoration of the Royal Garrison Church, the "*Domus Dei*," should receive some recognition, it is proposed to present him with a memento of his connection with this garrison and borough. Subscriptions may be made payable to Mr. R. W. Ford, Hon. Sec., 31, St. Thomas's street, Portsmouth.

BIRTHS.

HAMILTON.—March 22, at Avon Cliffe, Stratford-on-Avon, the wife of Major Hamilton, late 60th Royal Rifles, of a son.

CRESSWELL.—March 19, at Harehope, Northumberland, the wife of Oswin Baker Cresswell, Esq., of a daughter.

MARRIAGE.

HAMOND.—STEWART.—March 22, at the Parish Church, Stoke Dameral, by the Rev. E. Polwhele, M.A., Rector of Pillaton, Cornwall, assisted by the Rev. Hector de Courcèlles, Curate, Robert N. Hamond, Lieutenant commanding H.M.B. Squirrel, eldest son of R. N. Hamond, Esq., of Fakenham, Norfolk, to Janetta, widow of Charles Stewart, Esq., late Royal Artillery, and youngest daughter of Admiral John Jerns Tucker, Trematon Castle, Saltash, Cornwall.

THEATRE ROYAL DRURY LANE.—Sole Lessee and Manager, Mr. F. B. CHATTERTON.—On Monday and during the week the performances will commence at 7 with the Operetta Bouffe of TEN OF 'EM. Newmarket Breeches and Leggings.

WILLIAM NICHOLLS, 21, TICHBORNE STREET, REGENT CIRCUS, PICCADILLY.

MEMORIAL IN HONOUR OF LORD NAPIER OF MAGDALA.—By a public meeting in Calcutta, 16th March, 1876, a Committee was constituted under the presidency of Sir Richard Temple to collect funds for the erection of a fitting Memorial of Lord Napier of Magdala, for which they require about £5,000. About £2,500 has already been raised in India, and an Auxiliary Committee (named below) has been formed in London to collect subscriptions in this country.

Subscriptions are now invited, and it is requested that they may be paid into the bank of Messrs. Coutts and Co., Strand, or to the Honorary Secretary, Captain R. Trimen, late 36th Royal Sussex, Junior Army and Navy Club, who will give any further information.

LONDON COMMITTEE.

OLDRIDGE'S BALM OF COLUMBIA
(ESTABLISHED 50 YEARS)
The best and only certain remedy ever discovered for preserving, strengthening, beautifying, or restoring the
HAIR, WHISKERS, OR MOUSTACHES,
And preventing them turning grey.
Price 3s. 6d., 6s., and 11s.
C. & A. OLDRIDGE,
22, WELLINGTON STREET, STRAND, LONDON, W.C.,
AND ALL CHEMISTS AND PERFUMERS.

For children it is invaluable, as it forms the basis of a magnificent head of hair, prevents baldness in mature age, and obviates the use of dyes and poisonous restoratives.

THE TOURNAMENT CLUB.—This Club has been formed, under distinguished patronage, for the revival of Chivalric Sports by a number of ladies, noblemen, and gentlemen.

Meetings will be held from time to time in the Club grounds, which will be situated within easy driving distance of London, where Tilting at the Ring, Tournaments, and Falconry will form the chief features; and prizes will be awarded by a "Queen of Beauty" who will preside.

No person who is not a member of the Club will be permitted to take an active part in any of the sports; but each member may introduce a friend to witness the tournaments, &c.

Garden parties, afternoon dances, and other amusements will also be given to the members of the Club; and another house will be established in town, situated in close proximity to the Park, where tea will be supplied to the ladies in the drawing-room from three to half-past six o'clock during the season.

The whole of the affairs of the Club will be managed by a committee appointed for the purpose, who will also arrange the dates of the meetings.

The annual subscription is fixed at ten guineas; and no entrance fee will be charged for the present.

A list of the patrons and patronesses of the Club will shortly be published.

Foreigners of rank and distinction will be eligible as honorary members, and will be elected by ballot.

Gentlemen who wish to join are requested to write to the Hon. Secretary of the Tournament Club, 7, Albany Court Yard, Piccadilly, for the forms of application. Ladies are also requested to forward their names either to one of the members of the "Ladies' Committee," or to the Hon. Secretary direct, who will submit the names of the Committee for approval.

The following ladies are among those who form the "Ladies' Committee":—

Lady Diana Huddleston, 43, Ennismore Gardens, S.W.
Lady Florence Dixie, Melton Mowbray.
Mrs Henry Oppenheim, 17, Park Lane, W.
Madame de Murietta, 11, Kensington Palace Gardens, W.
Mrs. Frank Morrison, 8, Cromwell Houses, S.W.
Mrs. Herbert Stepney, Hill Street House, Rutland Gate, S.W.

ROYAL ARTILLERY AND ROYAL, ENGINEER CLUB,

3, PALL MALL EAST.

Abroad	1	1
Entrance Fee	5	5

JUNIOR NAVAL AND MILITARY CLUB, PALL MALL.

PATRONS.

Field-Marshal H.R.H. the Prince of Wales, &c.
Captain H.R.H. the Duke of Edinburgh, R.N., &c.
Field-Marshal H.R.H. the Duke of Cambridge, &c.
President—Admiral Hon. Sir Henry Keppel, G.C.B., &c.
Vice-President—Lieut.-General Sir Alfred H. Horsford, G.C.B., &c.

The entrance fee to this Club is, for the present, 10 guineas. Annual subscription, 8 guineas. Officers who are or have been in Army, Navy, Militia, or Yeomanry are eligible for election.

C. H. J. COLLINGS, Secretary.
Feb. 21st, 1877.

NAVAL AND MILITARY CLUB, 94, Piccadilly.—Members are informed that for the ensuing months they have been elected honorary members of the following Clubs by the courtesy of their several committees, viz., East India United Service, Oriental, Raleigh, Junior Naval and Military, Junior Army and Navy, Verulam, Buckingham, Wanderers, Hanover Square.

ROYAL MILITARY ASYLUM, Chelsea.—Required, a non-commissioned officer discharged, or about to be discharged, from the service, without family, who possesses a certificate of qualification as gymnastic instructor, to fill the appointment of Sergeant Gymnastic-Instructor at the above Institution. Applications, either personally or by letter, to be made to the Commandant.

UNITED MILITARY AND NAVAL CLUB.—Offices, with use of dining and writing-room, 17, St. James's Place, S.W.—For officers who hold or have held her Majesty's commission in the Army, Navy, Royal Marines, Militia, Yeomanry, and other Auxiliary Forces. No entrance fee at present. Subscriptions—Town members, 4 guineas; country (including camps), 3 guineas; abroad, 1 guinea. For prospectus, &c., apply to the Secretary.

BAUMGARTEN'S INVIGORATIVE NERVINE ESSENCE. A most powerful nutritive cordial, which restores to their normal condition all the secretions on the integrity of which perfect health depends.

Report by Dr. Hassall—"Having analysed the preparation to which Messrs. Baumgarten and Co. have given the name of 'Invigorative Nervine Essence,' I am of opinion that it is a combination well calculated, from its containing, among other ingredients, Pepsine and Phosphate of Soda, to prove most serviceable to the debilitated, the nervous, and the dyspeptic."

Price 8s. per bottle, or four quantities in one, 22s. Carriage free on receipt of remittance. Sole agents, BRANT and CO, 283, Strand, London, W.C.

NOTICE.—If the BAY GELDING left at Mr. Marshall's, "The Railway Tavern," Uxbridge, Middlesex, in 1874, be not taken away and all expenses paid by Captain Evans, of the Royal Elthorn Militia, whose address is at present unknown, on or before the 31st inst., the same will be sold to defray expenses.

NURSE.—An English nurse who has made the passage to India several times, and never suffers from sea sickness, will be available to accompany a family going out to Bombay some time in April. Terms, passage to Bombay. Apply to Mess Sergeant, Officers' Mess, Eastney Barracks, Portsmouth.

CHLORODYNE.—FREEMAN'S is the original and only true.—Lord Chancellor Selborne, Lord Justice James, and Lord Justice Mellish decided in favour of R. Freeman and against J. C. Browne and J. T. Davenport; see "Times" of July 24, 1873. Thousands of medical practitioners testify that there is no substitute for it in the treatment and cure of asthma, bronchitis, coughs, and other chest affections, neuralgia, fevers, cholera, dysentery, spasms, and all nerve pains. Bottles 1s. 1½d., 2s. 9d., 4s. 6d., 11s., and 20s. Sold by patent medicine dealers in all parts of the world. See that "Freeman's Original Chlorodyne" is engraved on the Government stamp.

THE STAFFORD HOUSE COMMITTEE for the RELIEF of SUFFERING among the TURKISH SOLDIERS.—Chairman, the Duke of SUTHERLAND, K.G.—Communications to be addressed to T. Gibson Bowles, Esq., Hon. Sec., 2, Harriet Street, Lowndes Square, S.W.

Subscriptions will be received by Major-General Sir Henry Green, Hon. Treasurer, Stafford House, S.W.; by Messrs. Drummond and Co., Charing Cross; Messrs. Smith, Payne, and Co., 1, Lombard Street; Messrs. Barnetts, Hoares, and Co., 62, Lombard Street; and by Messrs. H. S. King and Co., 45, Pall Mall, and will be acknowledged in the published list.

The Right Hon. the Lord Mayor has undertaken to receive subscriptions for the fund, which may be paid to him at the Mansion House.

Contributions are especially invited of blankets, warm jerseys, warm underclothing, and hospital linen, which will be received at Taylor's Depository, Pimlico, and should be labelled "For Relief of Suffering Turkish Soldiers."

INDIA OFFICE, 12th March, 1877.

INDIAN MEDICAL SERVICE.—Notice is Hereby Given that an examination of candidates for nineteen appointments as Surgeon in her Majesty's Indian Medical Service will be held in London in August, 1877.

Copies of the Regulations for the Examination, together with information regarding Pay and Retiring Allowances of Indian Medical Officers, may be obtained on application at the Military Department, India Office, London, S.W.

A further notice will be issued when the exact date of examination has been fixed.

ALLEN JOHNSON, Colonel,
Military Secretary.

CIVIL SERVICE EXAMINATIONS.

FURNISH YOUR HOUSE or APARTMENTS THROUGHOUT on MOEDER'S HIRE SYSTEM. The original, best, and most liberal. Cash prices; no extra charge for *time* given. Large useful stock to select from. Illustrated price Catalogue, with terms, post free. 248, 249, and 250, Tottenham Court Road. Established 1862.

TO CAPITALISTS.—Investors, sufficiently substantial, with a good bank reference, can secure five per cent. by simply guaranteeing £1,000, without paying any money, or ten per cent. for cash. The amounts are amply secured by debentures. £15,000 have been privately subscribed. Direct "Par pari refero," May's Advertising Offices, 160, Piccadilly.

NAVAL CADETSHIPS, &c.

"EASTMAN'S" ROYAL NAVAL ACADEMY, BURGOYNE HOUSE, SOUTHSEA.

Principal, since 1860, G. EASTCOTT SPICKERNELL.

At the last two Naval Cadet Examinations pupils took the *First* Place. More than 1,000 pupils have entered her Majesty's Service.

The House is situated close to and directly facing the sea. Pupils have good Bathing and Boating, under careful superintendence.

Pupils are received from Nine years of age and upwards. To make the School specially adapted for Junior Pupils intended for the Royal Navy and the Public Schools, Senior Pupils are not now received.

NAVAL CADETS, ASSISTANT CLERKS, HOPE HOUSE, SOMERSET-PLACE, SOUTHSEA.

Principal—Mr. T. H. VICKERY.

In addition to the general course of study pursued at this long-established School, pupils are specially prepared for the examination required for the above.

At the competitive examination in November, 1875, and at the recent examination in June, of candidates for Assistant Clerkships, all the pupils sent up from this Establishment were successful.

BOURNEMOUTH.—Overton Hall.—The Rev. LOVELL J. PROCTER, M.A., assisted by five highly qualified English and Foreign Masters, receives a select number of boys for preparation either for the public Schools or Royal Navy. A few taken for more advanced tuition. Spacious school premises, with three acres of grounds, prettily situated near the sea. Particulars and prospectuses on application.

TRURO SCHOOL. Founded A.D. 1549.—Special preparation of a limited number for Woolwich, the Line, Navy, and Cooper's Hill. Five experienced and energetic resident masters in mathematics and geometrical drawing, the classics, and English, French, science, and German; besides visiting masters in drawing and English composition.

MALVERN COLLEGE.

The SECOND TERM will begin on MONDAY, May 7th.

EDUCATION IN GERMANY.—A Prussian officer, whose pupils have all done well in the Competitive Army Examinations, has vacancies after Easter. For terms and references apply C. M., Treacher's Library, Brighton.

PARIS.—French HOME offered, in a Clergyman's family, to young gentlemen, for acquiring the French language. Address M. Pasteur Lalot, Military Chaplain, 265, Boulevard Pereire.

NAVAL CADETS' EXAMINATIONS.—A RETIRED NAVAL INSTRUCTOR can receive a few YOUNG GENTLEMEN into his house to prepare them for the above examinations. Terms and prospectus sent on application. References to Admirals and Captains with whom the instructor has served have been kindly granted. Address A. B. C., care of Willing, jun., Advertising Offices, 301, Strand, W.C.

ROYAL SCHOOL for DAUGHTERS of OFFICERS of the ARMY.

The Daughters of all Officers in her Majesty's Army, inclusive of the Royal Marines, on full or half-pay, or who may have died in the Service, are eligible.

The ages of admission are from ten to fifteen.

The next ELECTION will take place on June 20, 1877.

Pupils elected by votes of Subscribers pay only £12 per annum.

With a view to afford the advantages of a good education to the daughters of officers of competent means at a moderate cost, and at the same time to aid the primary object of the Institution, a limited number of pupils are admitted on payment of £80 a year, which includes all extras. The new form of application can be obtained at the office.

Each Donation of £5 5s. entitles to one Life Vote.

Each Annual Subscription of 10s. 6d. entitles to one Vote at all elections during the current year.

Further contributions to meet the current expenses are earnestly solicited by the Committee.

By Order,
G. W. FORSTER, Secretary.
22 Cockspur Street, London.

DINNEFORD'S FLUID MAGNESIA.

The best remedy for ACIDITY of the STOMACH, HEARTBURN, HEADACHE, GOUT, and INDIGESTION; and the safest aperient for delicate constitutions, ladies, children, and infants.

DINNEFORD & Co.,
172, New Bond Street, London, and all Chemists.

WILLS' BEST BIRD'S-EYE.

This Tobacco is now put up in
ONE OUNCE PACKETS

in addition to the other sizes, the Label being a reduced fac-simile of that used for the Two-Ounce Packets.

W. D. & H. O. WILLS, Holborn Viaduct, London, E.C., and Bristol.

RUPTURES (BY ROYAL LETTERS PATENT)

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 medical gentlemen to be the most effective invention for the curative treatment of hernia. The use of a steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body, two inches below the hips, being sent to the manufacturer,

MR. WHITE, 228, PICCADILLY, LONDON.

Price of a single truss, 16s., 21s., 26s. 6d., and 31s. 6d.; post free. Double ditto, 31s. 6d., 42s., and 52s. 6d.; post free. An umbilical ditto, 42s. and 52s. 6d.; post free. Post-Office Orders to be made payable to JOHN WHITE, Post Office, Piccadilly. Every description of RIDING BELTS, ELASTIC STOCKINGS to draw on, and ELASTIC SILK SUSPENDERS, on new and improved principles.

JOHN WHITE, Manufacturer, 228, Piccadilly London,

ESTABLISHED 1864.

TIMEWELL,

SPECIAL TAILOR & MILITARY OUTFITTER TO GENTLEMEN WHO REQUIRE NO CREDIT

8, SACKVILLE STREET,
PICCADILLY, LONDON, W.

A large private trade of highest class and character, yielding to its patrons the full advantages of their position.

E. LAZENBY and SON'S PICKLES, Sauces, and Condiments—E. Lazenby & Son, sole proprietors of the celebrated receipts and manufacturers of the pickles, sauces, and condiments so long and favourably distinguished by their name, beg to remind the public that every article prepared by them is guaranteed as entirely unadulterated.—92, Wigmore Street, Cavendish Square (late 6, Edward's Street, Portman Square), and 18, Trinity Street, London, S.E.

HARVEY'S SAUCE.—CAUTION.—The admirers of this celebrated sauce are particularly requested to observe that each bottle prepared by E. LAZENBY and SON bears the label used so many years, signed, "Elizabeth Lazenby.

In consequence of Spurious Imitations of

LEA and PERRINS' SAUCE, which are calculated to deceive the Public, LEA and PERRINS have adopted A NEW LABEL, bearing their Signature—

LEA AND PERRINS,
which signature is placed on every bottle of
WORCESTERSHIRE SAUCE,

and without which none is genuine.

Sold Wholesale by the Proprietors, Worcester, Crosse and Blackwell, London; and Export Oilmen generally.

Retail, by dealers in Sauces throughout the World.

COCKS' READING SAUCE

Is the best and most economical Sauce ever manufactured for
FISH, ENRICHING SOUPS, GRAVIES, &c.
It only requires a trial to convince the purchaser of its excellence.

CAUTION.—The genuine is protected by Trade Mark, viz., CHARLES COCKS' Signature on a white ground across the Reading Arms.

LIEBIG COMPANY'S EXTRACT OF MEAT.

Finest Meat-Flavouring Stock for Soups, Made-Dishes, and Sauces. Caution.—Genuine ONLY with facsimile of Baron Liebig's signature across Label.

FALKNER'S "REAL MALT" WHISKEY.

The same as supplied to the principal Clubs and Regimental Messes. Has been esteemed in Ireland for the last century as the FINEST IRISH WHISKEY procurable, being pure as distilled, and refined by age only.

LONDON, 40, CHARING CROSS.
DUBLIN, 83, GRAFTON STREET.

KINAHAN'S LL WHISKY.

KINAHAN & Co. finding that, through the recommendation of the Medical Profession, the demand for their CELEBRATED OLD LL WHISKY for purely medicinal purposes is very great, submit with pleasure the following ANALYSIS by DR. HASSALL:—

"I have very carefully and fully analysed Samples of this well-known and popular Whisky. The samples were soft and mellow to the taste, aromatic and ethereal to the smell. The Whisky must be pronounced to be pure, well-matured, and of very excellent quality. The medical Profession may feel full confidence in the purity and quality of this Whisky." 20, GT. TITCHFIELD ST., LONDON, W.

SWISS CHAMPAGNE.—LOUIS MAULER'S SWISS CHAMPAGNE de Cortail lod, Neuchatel, so well known to travellers in Switzerland, may be obtained of Messrs. BELL and HUGHES, Wine Merchants, 38, Fenchurch Street, agents in England for the sale of this excellent champagne. Price, 42s. the dozen quarts; 46s. per twenty-four pints net. All other wines at equally moderate prices.

LANE'S PRIVATE HOTEL (Nos. 1, 2, and 3, ST. ALBAN'S PLACE, CHARLES STREET, St. James's, S.W.), for Officers in the Army and Navy, Members of Clubs, and others. Most eligibly situated in the immediate vicinity of the principal Club Houses. Gentlemen requiring sleeping accommodation only, are respectfully informed every attention will be paid to their comfort and convenience. A trustworthy porter in attendance all night.

LEFT OFF CLOTHES, Old Uniforms, Epaulettes, Books, Jewellery, Miscellaneous Property, &c., PURCHASED in any quantity or condition.

MR. J. NORTON,
5, WYCH STREET, STRAND
(Two doors from Olympic Theatre), and
2, Station-terrace, Croydon.

Continues giving the highest price in the trade for the above. The utmost value remitted by Post-office order the same day for all Parcels forwarded

All letters punctually attended to.

Ladies waited on by Mrs. N.

N.B.—Mr. Norton has always on hand a large stock of present Regulation Uniforms, Patrol Jackets, Great Coats, &c., equal to new, at very low prices.

TO OFFICERS OF HER MAJESTY'S SERVICE.—LEWIS MOSES, of 464, New Oxford Street, the largest and most liberal buyer of officers' uniforms, ladies' and gentlemen's left-off clothes, &c., has on hand a large stock of the above. Parties waited on. Established 1798. Cash remittances for country parcels by return.

GARDEN and SON, 200, PICCADILLY, EAST INDIA and GENERAL AGENTS, MANUFACTURERS of ACCOUTREMENTS, SADDLERY, HARNESS, &c., beg to notify that any commissions entrusted to them will be executed to the entire satisfaction of their correspondents.

Furlough Pay, Pensions, &c., drawn and remitted. Passages secured; Baggage collected, shipped and cleared. Insurances effected.

ST. LAWRENCE-ON-SEA, NEAR RAMSGATE.

THE "GRANVILLE" HOTEL.

THE "GRANVILLE" PRIVATE SPECIAL EXPRESS TRAINS to ST. LAWRENCE-ON SEA, near Ramsgate, in 1 hour and 40 minutes. Departures every Friday, from Charing Cross at 3.45, and Cannon Street at 3.55 p.m. (See bills.)

THE "GRANVILLE" HOTEL.
The "Morning Post" says:—"Nowhere in England can a series of baths such as that at the 'Granville' be seen."

THE "GRANVILLE" HOTEL.
The "Globe" says:—"As a residential hotel during winter, the 'Granville' is second to none."

THE "GRANVILLE" HOTEL.
The "Saturday Review" says:—"The scenery, the air, the accommodation for visitors were described as of the most perfect kind; and we could not help wondering how it was that this place, which had been in existence in a quiet way for several years, had suddenly, like Byron, gone to bed and awoke famous."

THE "GRANVILLE" HOTEL.
"Land and Water" says:—"The 'Granville' Hotel is likely to become a popular winter resort, not only for invalids, but also for those seeking a few days' relaxation from work."

THE "GRANVILLE" HOTEL.
"Mayfair" says:—"The proprietor of the hotel, which has carried the name of St. Lawrence-on-Sea to the utmost ends of the earth, has energetically and judiciously lavished a fortune, first in making the 'Granville' Hotel one of the most charming seaside residences in the Kingdom, and next in bringing the fact under the notice of the public."

COLT'S NEW GOVERNMENT ARMY REVOLVER,

after a severe competitive trial by the U. S. Ordnance Department in 1873 and 1876, has been exclusively adopted by the United States Government, and the whole of the United States Cavalry is now armed with them. It is now made to take the English Government Boxer cartridge. Length of barrel 5½ and 7½ inches.

In the trial of 1869, advertised by another maker, the Colt's pistol used was a muzzle-loader adapted to the use of metallic cartridges, which pistol has not been made or sold after that year.

COLT'S NEW 41-CAL. FIVE-SHOT DERINGER REVOLVER,
Weight 12 ozs.

COLT'S NEW 38-CAL. POLICE REVOLVER,

THE DIRECTORS of the BRIGHTON LIVERY STABLES COMPANY, Limited, give notice that Prospectuses inviting application for the portion of unallotted Shares may be obtained from he Secretary at the Offices of the Company, to whom an early application should be made.

A. J. BODDINGTON, Secretary.
17 Prince Albert Street, Brighton.

HOLLOWAY'S PILLS are adapted to all the medical wants and necessities of a family, and they can be confidently recommended as a domestic remedy for the ailments of all classes and conditions of people. Young and old, men and women, parents and children, may take this medicine with a certainty of deriving benefit from its use, when disorder or disease is making them miserable. Holloway's Pills are wrapped in concise, clearly expressed, and easily intelligible instructions for the sick, and a e unrivalled for their purifying, regulating, aperient, and strengthening properties. They remove indigestion, palpitation, and headache, and are especially serviceable in complaints peculiar to females. Each box of Pills is wrapped up in printed instructions for the guidance of invalids.

A CORRECT IMPRESSION

Prevails among the public that Silks are generally dearer, and that they cannot now be bought at former prices; but this idea will be removed, as far as MESSRS. JAY'S transactions are concerned, by an inspection and comparison of the under-mentioned BLACK SILKS, which are:—

3s. 9d.	per yard	... ...	worth 5s. 3d.
4s. 6d.	"	... ...	worth 5s. 9d.
5s. 3d.	"	... ...	worth 6s. 9d.
5s. 9d.	"	... ...	worth 8s. 3d.
6s. 9d.	"	... ...	worth 9s. 6d.

FOREIGN VELVETS, from 4s. 6d. per yard.

MESSRS. JAY, having had consigned to them before the rise in the price of Silk, a very large stock of these elegant Dress Materials, they are enabled to sell Black Foreign Velvets at 4s. 6d., 5s. 6d., 6s. 6d., and 7s. 6d. per yard. Patterns free.

NORFOL IRON WORKS, NORWICH.

DR. J. COLLIS BROWNE'S

CHLORODYNE.

THE ORIGINAL AND ONLY GENUINE,

Which is admitted by the Profession to be the most wonderful and valuable remedy ever discovered.

CHLORODYNE is the best remedy known for Coughs, Consumption, Bronchitis, Asthma.
CHLORODYNE effectually checks and arrests those too often fatal diseases—Diphtheria, Fever Croup, and Ague.
CHLORODYNE acts like a charm in Diarrhœa, and is the only specific in Cholera and Dysentery
CHLORODYNE effectually cuts short all attacks of Epilepsy, Hysteria, Palpitation, and Spasms.
CHLORODYNE is the only palliative in Neuralgia, Rheumatism, Gout Cancer, Toothache, &c.

From Lord FRANCIS CONYNGHAM, Mount Charles, Dec. 11, 1868.

Lord Francis Conyngham, who this time last year bought some of Dr. J. Collis Browne's Chlorodyne from Mr. Davenport, and has found it a most wonderful medicine, will be glad to have half-a-dozen bottles sent at once to the above address.

⁂ Earl Russell communicated to the College of Physicians that he had received a despatch from her Majesty's Consul at Manilla, to the effect that Cholera has been raging fearfully, and that the ONLY remedy of any service was CHLORODYNE.—See *Lancet*, Dec. 31, 1864.

CAUTION.—BEWARE of PIRACY and IMITATIONS.

CAUTION.—Vice-Chancellor Sir W. Page Wood stated that Dr. J. COLLIS BROWNE was, undoubtedly the INVENTOR of CHLORODYNE; that the story of the Defendant, Freeman, was deliberately untrue, which, he regretted to say, had been sworn to.—See *Times*, 13th July, 1864.

Sold in Bottles, at 1s. 1½d., 2s. 9d., and 4s. 6d. None is genuine without the words "Dr. J. COLLIS BROWNE'S CHLORODYNE" on the Government stamp. Overwhelming Medical Testimony accompanies each bottle.

MAJOR CREASE'S PATENT SELF-REGULATING, CLEANABLE

CHARCOAL FILTER

Has been universally adopted in the Royal Navy, East Indian and English Transport Services; the German, Russian, American, and Austro-Hungarian Navies;

ALSO BY

HER MAJESTY'S WAR DEPARTMENT,
For BARRACKS, HOSPITALS, CAMPS, &c., &c.

And for which Patents have been granted by the Governments of Great Britain, the United States of America, Italy, France, and Canada to Major Crease, Sole Patentee of the Self-regulating, Cleanable Filter.

The designs are of three classes—

1.—For dwelling rooms and halls. To suit different styles of furniture three types have been employed—the Classic, the Japanese, and the Mediæval. None of these forms have been before employed for Filters.
2.—Those of simpler and cheaper designs for kitchen use.
3.—Filters of galvanized iron, either to fix to mains or cisterns, which, being capable of being made of any size, can supply pure water in sufficient quantities for the largest hospital or hotel.

The Filters, being made of special sizes, all their parts are interchangeable.

Full particulars can be obtained on application to

The objects of this Society are to reproduce valuable copyright engravings, to cultivate a taste for the fine arts, to displace coarsely-executed pictures and engravings, and to supply the public with first-class works of art at 1s. 3d. each.

The Society has at its disposal over 50 valuable plates, executed by the most eminent engravers, and has selected therefrom the following eight as the publications for the year 1877:

1. THE STAG AT BAY, after Sir E. Landseer, R.A.
2. THE GOOD SHEPHERD, after Dobson, R.A. (now being issued).
3. THE SPORTSMAN, after Rudaux.
4. THE ANGLER, after Rudaux (ready April, 1877).
5. CHRIST AND ST. JOHN; THE KISS OF JUDAS, after Ary Scheffer (pair).
6. THE LITTLE BRETON SHEPHERD, after Girardet (ready July, 1877).
7. ROMEO AND JULIET, after Jalabert.
8. RED RIDING HOOD, after Lejeune (ready October, 1877).

These beautiful works of art will be supplied to ladies and gentlemen becoming either Fellows or Subscribers of the National Art Society upon the following conditions:—

Fellows (F.N.A.S.) subscribing one guinea annually will receive one free copy of each of the foregoing publications, executed in a superior manner, and a certificate of fellowship, together with 32 vouchers for the purchase of extra copies for friends, at 1s. 3d. each copy.

Fellows (F.N.A.S) subscribing half-a-guinea annually will receive one free copy of each publication and a certificate of fellowship, together with 16 vouchers for the purchase of extra copies for friends at 1s 3d each copy.

Subscribers of 5s annually will receive 16 vouchers entitling them to purchase copies of the publications at 1s 3d each copy.

Names of intending Fellows and Subscribers must be sent in immediately in order to secure this fine collection of works of art, which are admirably suited for framing, and will decorate many a home.

All applications must be addressed to MITFORD B. BURNET, Esq., Secretary National Art Society, 30 and 31, Paternoster Row, London, E.C.

IMPORTANT NOTICE TO THE READERS AND SUBSCRIBERS OF THIS NEWSPAPER.

In order that the public may have an opportunity of judging of the superiority of the publications of the National Art Society, it has been determined to offer, by coupons found below, the following three pictures. They will be found FAR SUPERIOR to any yet offered, and will decorate many a home.

All applications for Fellowship and Subscriptions to the Society should be made within a few days of the receipt of these sample pictures.

The "STAG AT BAY," after Landseer, R.A.

(17½ inches by 27 inches).

The "GOOD SHEPHERD," after Dobson, R.A.

(17½ inches by 30 inches).

The "SHEPHERD OF JERUSALEM," after Morris.

(17½ inches by 30 inches).

These celebrated pictures are well known as some of the most successful productions of the modern school of art, and appeal to every one's taste. The copies are executed in the best manner, and no expense has or will be spared by this Society so long as they excel in their publications and give continued satisfaction, as they have hitherto succeeded in doing. A brief description of each subject will suffice.

"THE STAG AT BAY," by Landseer, is one of that lamented artist's most beautiful conceptions. After a hard chase, the noble animal finds himself at last at bay—his life at stake. As befits his race, he is about to end his days in a wild and lonely loch. Two hounds have succeeded in outstripping him, one of whom has ventured too far, and paid the penalty with life; the other wisely awaits his opportunity, while the noble stag stands boldly in the water, determined courageously to end his career. The work is full of life, and beautifully delineated. It is 17½ by 27 inches, and will be sent to every person who forwards the Coupon found below, together with 2s. P.O.O. or 26 stamps, or to any one applying without Coupon for 2s. 6d. P.O.O., post free.

"THE GOOD SHEPHERD," by Dobson, is one of that celebrated artist's most successful productions, and has been secured by the Directors of the Society at a very considerable outlay. The picture being the same size and shape as "The Shepherd of Jerusalem," which has given such universal satisfaction, forms a most suitable companion to it, and will please every one. Little description is necessary for so important a work. Our blessed Lord is beautifully depicted carrying a lamb in His bosom, clearly illustrating the well-known passage, "I am the Good Shepherd, and know My sheep, and am known of Mine." The price of the artist's proofs of this engraving was eight guineas, ordinary prints two guineas. This picture will be sent to every one forwarding the Coupon found below for 2s. P.O.O. or 26 stamps, or to any one applying without Coupon for 2s. 6d. post free. This picture must not be confused with Murillo's "Good Shepherd" recently given by the International Engraving Society.

"The SHEPHERD OF JERUSALEM."—A few copies of this lovely allegorical picture may still be had. A Coupon will be found below, which will be redeemed if accompanied by P.O.O. for 1s. 6d or 20 stamps. If no Coupon be sent, the price will be 2s. 6d., post free.

The foregoing prices cover cost of copyrights, case, transmission, and other charges, and copies are guaranteed to arrive safely.

The Directors beg those resident in London to call at the Offices of the Society (Town Department, No. 30, Paternoster Row), to inspect the pictures and compare them with those of any other Art Union and Society. Their future publications may also be seen, and every information obtained; while those not wishing their copies to pass through the post can obtain (on personal application) copies with wide margin.

Cut out one or all of these Coupons, and forward them to the National Art Society, 30 and 31, Paternoster Row, London, E.C.

"ARMY AND NAVY GAZETTE."

VOUCHER No. 1.

The National Art Society hereby agrees to redeem this Certificate by forwarding free to any address in Great Britain or Ireland, on receipt of P.O.O. for 2s., or 26 stamps, ONE COPY of

THE STAG AT BAY,

After LANDSEER, 17½ in. by 27 in.

All Certificates must be cut out and sent to the
National Art Society,
30 & 31, Paternoster Row,
London, E.C.

This Certificate is not available, and will not be redeemed after April 20, 1877, except to those resident abroad, to whom only it will be redeemed if sent within three months of date.

"ARMY AND NAVY GAZETTE."

VOUCHER No. 2.

The National Art Society hereby agrees to redeem this Certificate by forwarding free to any address in Great Britain or Ireland, on receipt of P.O.O. for 2s, or 26 stamps, ONE COPY of

THE GOOD SHEPHERD.

After DOBSON, 17½ in. by 30 in.

All Certificates must be cut out and sent to the
National Art Society,
30 & 31, Paternoster Row,
London, E C.

This Certificate is not available, and will not be redeemed after April 20, 1877, except to those resident abroad, to whom only it will be redeemed if sent within three months of date.

"ARMY AND NAVY GAZETTE."

VOUCHER No. 3.

The National Art Society hereby agrees to redeem this Certificate by forwarding free to any address in Great Britain or Ireland, on receipt of P.O.O. for 1s. 6d., or 20 stamps, ONE COPY of

THE SHEPHERD OF JERUSALEM.

After MORRIS, 17½ in. by 30 in.

All Certificates must be cut out and sent to the
National Art Society
30 and 31, Paternoster Row,
London, E.C.

This Certificate is not available, and will not be redeemed after April 20, 1877, except to those resident abroad, to whom only it will be redeemed if sent within three months of date.

N.B.—By forwarding at the same time all the above Coupons, together with a P.O.O. for 5s., or 66 stamps, one copy of each picture will be sent. If no Coupons are sent a P.O.O. for 7s. 6d. must accompany the order.

All Post Office Orders should be made payable at the Chief Office, London, to Mr. Lindsay Fremont.

A little time is necessary for the due execution of orders, but should any application remain unanswered after ten days' interval, a post-card should be sent to the Secretary in case of miscarriage through the post.

IMPORTANT NOTICE.—Since the public issue of "THE SHEPHERD OF JERUSALEM," the Managing Directors find it necessary to intimate that the Publications which have been recently issued by several new Associations and Art Unions do not emanate in any way from this Society.

NOTE THESE INSTRUCTIONS.—All Coupons must be sent in on or before April 10, 1877. The Certificate or Coupon must in all cases be sent, otherwise persons might eap the benefits intended for the readers of this paper. Each copy will be sent securely packed. Only one copy can be sent for each Coupon, *and the Certificate will not again be printed in this Paper*; hence the advisability of at once cutting it out and sending it for redemption, as each will be attended to in rotation as received.

Applications of every description must be sent direct to 30 & 31, Paternoster Row, E.C.

THE PICTURES ARE WELL WORTH HANDSOME FRAMES, AND WILL DECORATE MANY A HOME.

PLEASE NOTE THIS.—The above are the Only Three Publications yet issued to the Public by the NATIONAL ART SOCIETY.

Printed by JAMES MELDRUM and Published by EDWARD O'BRIEN PALMER for the Proprietors, at the Office, No. 16, Wellington Street, Strand.—SATURDAY, March 24, 1877.

☞ *It is particularly requested that applications for copies of the* Army and Navy Gazette, *and Advertisements, shall* not *be sent to the Editor, but to* Mr. Richard James Wood, AT THE OFFICE, 16, WELLINGTON STREET, STRAND, W.C., *to whom all business communications shall be addressed and remittances made payable.*

The subscription to the paper is 7s. per quarter, or 28s. per annum payable in advance, *inclusive of postage to any part of the United Kingdom; to India, £1 10s. 4d. per annum;* viâ *Brindisi, £1 14s. 8d.*

THE Prussian Infantry have lately received a new edition of their Regulation Drill Book, and we are indebted to Colonel Newdigate for the admirable *résumé* of it which has recently been published in the *Journal* of the Royal United Service Institution. At a time when a committee of General Officers is endeavouring to solve the problem as to the best formation for British troops to advance to the attack, and when our own Field Exercise is said to be also undergoing another of its frequent revisions, a careful perusal of Colonel Newdigate's article cannot fail to be found highly interesting. Our own Infantry drill has of late years been so simplified that it is to be hoped many disturbing changes may be found to be unnecessary, and that changes for the sake of change will not be permitted. Whilst, however, the German Field Exercise appears to be filled with practical hints and advice, gained by dearly-bought experience in the field, our own Drill Book is singularly bald in this respect, and savours more of the parade-ground than of the field of battle, and it is perhaps in this direction susceptible of some improvement. It is, however, throughout the *spirit* rather than the *letter* of the instruction that is insisted on by our neighbours. The company-column formation is still, it seems, adhered to, although the authorities at Berlin are fully alive to the many disadvantages of this order of attack, and superior officers are expressly desired to guard against letting their troops get out of hand, and the partition of a battalion into smaller divisions than are absolutely necessary is strongly deprecated; but the system is probably found suitable to their peculiar instincts and training, or so much importance would not have been attached to it. We know, however, from the carefully-compiled accounts of Prussian experiences in the late war and the war of 1866 that this order of formation under the stress of fire often led to dire confusion, and one has only to recall to mind one or two special instances which illustrate this to be tempted to believe that the Prussians were often victorious in spite of their tactics. In the attack of the 35th Regiment on Vionville it is reported that company columns which started on the right were at the close of the action found on the extreme left, and some of those from the left crossed to the extreme right of the position, while of the four columns which attacked the centre of the position one diverged to Flavigny on the right, another to the village of Vionville on the left, leaving the other two, as a very natural consequence, to be utterly overpowered and crushed in their advance. Again, in the passage of the 26th Regiment through the Bois de Givodeau, at the battle of Beaumont, we have another marked instance of the divergence of company columns and the various parts of the company columns from the true direction and the resulting disorder, while at the storming of the Rotter-Berg, at the battle of Spicheren, we find it reported that thirty-two company columns belonging to three different army corps, and of five different regiments of four various brigades, were all mixed up together in utter confusion. The company-column system, however, undoubtedly affords many opportunities for the dexterous and independent leadership of the company officers; but we must look beyond their tactics to find the secret of the Prussian successes, which were more often due to singular good fortune, to superior strategy, and to a great preponderance of numbers, and, above all, to the intelligence of the officers and the careful and very practical training received by all ranks, and the scope given by their regulations for the exercise of individual judgment and discretion. From the instances we have cited and many others which could be quoted it is apparent that the great range and the remarkable precision of modern fire-arms must occasion more or less irregularity and confusion in the front attacking line, and the aim of all tacticians should be to develope a system which will diminish this liability to a minimum, and which will afford a remedy with due celerity. Our Oakhampton experiments illustrated the terrible power of field guns on Infantry even in loose order; and although the conditions of the experiments could not possibly be quite similar to those which would occur on actual service, still the fact that seventy-one men out of a hundred were disabled by a battery in four minutes at a range of 1,000 yards is sufficiently appalling, while at 600 yards in two minutes ninety-eight out of one hundred and fifty were placed *hors de combat;* and these numbers do not represent the whole of the loss inflicted by the guns, for the dummies representing the supports in rear were also severely handled. These, however, were only fifty yards in rear of the front line; and, moreover, we must remember that the gunners were not disturbed or incommoded by the "ping" of rifle bullets or the crash of bursting shells. In the Prussian Drill Book some stress is laid on the ability of companies to manœuvre without confusion in the dark, and could battles be fought at night much of the power of modern fire-arms would undoubtedly disappear, and, as of old, cold steel wielded by strong arms and stout hearts would secure the victory; but it is almost impossible to believe that much success can be achieved in this direction. In a recent article we suggested, in the absence of a better one, the advantages of the very simple expedient of advancing to the attack from line in four successive ranks at intervals of one or two hundred yards, according to the nature of the ground, the lines in rear in wooded or broken ground following in file, if not exposed to heavy fire, and this principle or some modification of it seems to be the one most likely in the long run to prevent the ugly gaps the divergence of company columns is apt to occasion, and to preserve what is so important—the cohesion and continuity of the line.

A recent case of harsh treatment, by the police, of two boys serving on board the Duke of Wellington, has been brought under our notice by a correspondent, and we trust that some measures may be adopted to prevent the possibility of any recurrence of such an incident. It appears that the boys were on leave from Saturday to Monday, and were making their way to Southampton to spend the time with their friends, when they were apprehended by the police at a country station, and were locked up on suspicion of being absent without leave because they had no passes. One of the relatives of the lads was sent for, and produced a letter in which it was stated that they intended visiting Southampton for their leave. But the police officer was not to be persuaded, and the unfortunate lads spent the night in the station. That was bad enough, but worse remained, for on the following morning these unoffending lads were handcuffed and taken through the town to appear before the Mayor, who at once dismissed them and allowed them to go to their friends. Leave-breaking is unhappily so common an offence that it is not surprising the police in the neighbourhood of our seaports should keep a sharp look-out for stragglers, for whose apprehension there may be some reward offered. But it is inexcusable that any police officer should have the power, on his own responsibility, to detain anyone in her Majesty's Service after having proof offered them on the part of their relations, and after having ascertained their identity. That is inexcusable blundering, but it was something worse than pig-headed officiousness that caused the indignity of being handcuffed to be put upon these lads. We hope that an enquiry into this matter may be ordered, and that the offending constable may at least receive a caution. And in order that mistakes of this nature may not again arise, we would strongly recommend the issue of passes at all times when those on leave intend to quit the immediate neighbourhood of the port at which their ships are stationed. While leave-breaking remains so general an offence as at present, it would be unwise to remove from the civil power the right of apprehending stragglers, but we are bound to admit that this is a case in which the wearing of her Majesty's uniform most certainly had its drawbacks. The issue of the Uniform Circular has been supported in these columns, and we trust that when the annoyance felt by the men at what they consider an interference with their liberties has passed away, they will see that by observing the rule of appearing in uniform they have raised the tone of the Service throughout, and have removed every tinge of that suspicion with which they state the blue shirt is now looked upon. But, meanwhile, the Admiralty must not fail to do its utmost to protect our blue-jackets from any indignities or annoyances, and it is to be hoped that the case to which we have alluded will not be allowed to pass unnoticed.

There has been so much false sentiment and misapprehension about the late Gunner Charlton, that to give a brief description of his case is but to perform an act of justice to the authorities. Charlton was evidently a man of bad character, for during his little more than twelve years' service his name had been sixteen times entered in the Regimental Defaulters' Book, and he had been four times tried by court-martial. On December 10, 1874, he was tried by court-martial for insubordination, and sentenced to 104 days' imprisonment. While in Millbank he complained of debility, and was, in consequence, attended to and sent to light work, instead of shot drill. He made no complaint whatever of his feet. On March 18, at 7 a.m., he was handed over to a conducting non-commissioned officer to be taken back to his battery. He started without breakfast, but was given sixpence with which to provide one. The day was bitterly cold and Charlton had no great-coat, but the non-commissioned officer in charge of him lent him his own. On arriving at Exeter his feet were found to be in a very bad state—frost-bitten, in fact. He was taken into hospital. After a time he was transferred to the Herbert Hospital at Woolwich, and remained there till November 21, 1876. On that day he was discharged, having lost almost all of one foot and most of the toes of the other. Up to that time he was retained in the Service, and received the same treatment as any other soldier. On discharge he received as hospital clearances and compensation for clothing upwards of £20. As long as he was in the Service no steps could, according to the rules, be taken about his pension, but, on December 4, the War Office recommended the Treasury to sanction a special pension of a shilling a-day. The sanction was given on December 30, but on the 31st of that month Charlton was found in the streets of Woolwich in a destitute state, and was taken to the workhouse hospital, where he expired the following day. It is believed that his decease was caused by indulgence in drink; certainly want had nothing to do with it The only remarks which suggest themselves are:—

First, the system of medical inspection at Millbank could not have been very good, or the state of Charlton's feet—they appear to have been bad whilst in prison—would have been discovered; second, in inclement weather every prisoner should, on discharge, be provided with a great-coat; third, the delay with regard to his pension was greater both in the War Office and the Treasury than was necessary. This delay, however, in his case, caused him no inconvenience, and neither directly nor indirectly brought about his death.

The extraordinary manner in which the troopship Simoom has been sent backwards and forwards in carrying out some reliefs in the West Indies would lead one to suppose that those who draw up the sailing orders have a most imperfect knowledge of geography, or consider time and expenditure of fuel of no importance. From Port Royal she was ordered to Belize to effect the relief of the troops there, and then returned to Port Royal and embarked a small detachment of the 35th Regiment to remain in charge of Nassau while the West India regiments were being exchanged on the West Coast of Africa. Had it occurred to the officials responsible for the issue of her instructions that it was quite possible to save a double journey by sending the Nassau detachment in the Simoom when she sailed for Belize, she would then have been able to go from that place straight to Nassau instead of running back again for a mere handful of men.

Commander Edwin Lipscombe has been selected by the Admiralty for advancement to the "1816 List," in the vacancy caused by the death of Commander Gordon. Commander Lipscombe obtained his commission as Lieutenant in May, 1826, and was placed upon the Retired List with the rank of Commander in July, 1864. He entered the Navy in 1806, and served at the reduction of the towns of Omago, Dignano, and Fiume, as also saw much boat service in the capture and destruction of the enemy's vessels.

Commander Pearson Johnstone, who has this week been promoted out of the Ganges, training-ship, entered the Service in 1856, and was promoted to Lieutenant in 1859, and in that rank has served six and a-half years in a sea-going ship. The First Lord of the Admiralty, in the exercise of his discretion, has preferred Commander Johnstone before some thirty who were senior to him, and while yet on the right side of thirty-five years of age he happily finds himself on the Commanders' List with a fair chance of reaching the top of the professional ladder.

A correspondent, writing from Massowah last month, remarks that there was no war news there. A raid had been made by Abyssinians against some villages, but there had been nothing like a battle between the Egyptians and Abyssinians.

In consequence of the favourable reports received from the Fawn of the working of the spare rudder designed by Rear-Admiral Sir E. Commerell, V.C., K.C.B., the Admiralty has directed one to be fitted to the corvette Garnet, now building at Chatham.

Navigating-Lieutenant Percy James, who is in command of the turret-ships Magdala and Abyssinia, is to be congratulated on the line he has adopted in endeavouring to raise Volunteers for working the guns in these ships should the defence of Bombay become necessary. Instead of asking for naval Volunteers, he suggests Marine Artillery Volunteers, and he will probably find a larger percentage ready to enrol themselves under these circumstances than if he had followed the home model. It is not every man who is equal to assume the *rôle* of the sailor, and many who would gladly become Marine Gunners hesitate to adopt the rig of a Blue-Jacket while feeling what thorough landsmen they are. But for this, we believe the numbers of the Royal Naval Artillery Volunteers would be much larger than they are at present.

Lord Lonsdale has received the appointment of Vice-Admiral for the counties of Westmoreland and Cumberland. The number of Vice-Admirals of the coast of Great Britain is now five. Ireland possesses two, and the provinces of Munster and Connaught are vacant.

Although the Director of Admiralty Contracts is away on sick leave, yet his visit to the Mediterranean will be connected with a very fair amount of work, for in conjunction with Rear-Admiral Rice, Mr. Rowsell will thoroughly inquire into the working of the clerical staff of Malta Dockyard, and will endeavour to reduce the amount of labour. In fact, the alterations lately introduced at the home ports, on the recommendation of the committee which was appointed to reform the clerical staffs of the yards, and of which Mr. Rowsell was a member, will, as far as practicable, be carried out at Malta. On the last occasion of Mr. Rowsell's visiting Malta on leave, he devoted much time and labour to examining into the steps it would be necessary to take to ensure the victualling arrangements of the island and fleet being put in working order for a given time, in the event of war. It is also stated by the Malta correspondent of the *Standard* that Mr. Rowsell is to act as commissioner to inquire into the possibility of abolishing the Bread Tax at Malta, by which some £50,000 per annum is raised.

Lieutenants H. E. O'Neill and L. M. Matthews, of the London, and Richard Batt, coxswain of the launch of that ship, have been acquainted by the senior officer at Zanzibar that the Admiralty has been pleased to note with satisfaction their zeal and ability in connection with the capture of slavers on the East Coast of Africa.

Rear-Admiral Sir Leopold M'Clintock will haul down his flag as Admiral-Superintendent at Portsmouth on April 29.

Vice-Admiral Seymour, C.B., in command of the Channel Squadron, gave a dinner on board the Minotaur, at Cadiz, on the 23rd inst., in honour of King Alphonso. A return banquet was given the day following by his Majesty to the officers of the British squadron at the Carraca Arsenal.

We desire to call particular attention to an admirable suggestion respecting the employment of naval officers in dockyards, made in a letter headed "Naval Half Pay."

Deputy Inspector-General of Hospitals and Fleets Peter Suther, M.D., who died on the 21st inst., obtained his commission as Surgeon in the Royal Navy in September, 1805, and the following month served in the Swiftsure in the ever-memorable battle of Trafalgar. In 1809 he was in the Eurydice at the reduction of Martinique. He served variously at home and abroad until May, 1841, when he was appointed to Woolwich Dockyard, where he remained until appointed, in April, 1849, to be Staff-Surgeon at Chatham Dockyard, which post he held until promoted to the rank of Deputy-Inspector of Hospitals and Fleets, July 25, 1855. He was the last survivor of the ninety-eight medical officers who were present at the battle of Trafalgar. By Dr. Suther's death a Greenwich Hospital Pension of £50 a-year for retired Naval Surgeons is placed at the disposal of the First Lord of the Admiralty.

It is not improbable that the Naval Store Depôt which has been maintained for years past at Rio de Janeiro will be transferred to Monte Video.

Orders have been given for a court-martial to assemble at Hong Kong for the trial of Commander Sir William Wiseman, of the Lapwing, which recently narrowly escaped loss at Chefoo. The Lapwing was to leave Shanghai for Hong Kong about February 12.

The constructors of the engines of a ship which was much wanted as a relief on a distant station, but was delayed week after week by the difficulties experienced in making the engines work smoothly, have, we hear, found that the defects they were called upon to make good cost so much in labour and material that a remarkably small margin of profit remains. Under these circumstances, they appealed to the Admiralty for some consideration, but as there is a slight difference of opinion as to which side is the more entitled to put forward a claim, there is little prospect of the engineering firm meeting with assistance from the Admiralty.

Acting Sub-Lieutenants A. T. Carter, R. G. Noel, J. R. Childs, A. R. Beck, P. W. Bush, H. T. F. White, F. H. Biddulph, and H. M. V. Hughes, have been confirmed in their rank, having completed their examinations at the Royal Naval College.

It has been directed that in future the racers of broadside guns shall have distinguishing marks to facilitate laying when preparing for ramming.

Lieutenant Digby, in command of the Jackal, has, we hear, received from the Admiralty an expression of their Lordships' satisfaction at the manner in which he carried out the difficult duty of communicating with St. Kilda and taking off a shipwrecked crew.

The Channel Squadron was under orders to leave Cadiz for England on Tuesday last.

The die for the Arctic medal is completed and medals have been struck and will shortly be distributed to those who served in the late expedition.

The Good Service Pension of £150 a-year for Marine officers, vacant by the death on the 19th inst. of Colonel G. S. Digby, C.B., R.M.A., has been conferred on Colonel Robert Boyle, C.B., R.M.L.I.

It appears that the Thetis was only provisioned for what was considered a sufficient number of days for her to reach Malta, and the unshipping of the screw and meeting with head winds so delayed her that provisions ran short. It has been stated that the officers and crew were compelled to go on quarter allowance for seventeen days, but we hear from Malta that they were on half allowance for ten days.

The proprietor of what he is pleased to call "The Grand National Amphitheatre," may be a very enterprising showman, but he goes rather too far when he advertises that "Dr. Cameron, the celebrated African traveller, will, for the first time in England, enter the dens of lions and tigers, delineating 'the hunt,' 'the fight,' and 'the death' in the forest jungles." There is but one celebrated African traveller of the name of Cameron, and the audacity of the owner of this show in using the name of an officer and a gentleman to gull the public, is unequalled. As might have been anticipated, the performing "Dr. Cameron" hails from the States.

Mr. Henwood, the Naval Architect who has had a long-standing difference of opinion with the Admiralty as to the value of certain designs for ships of war, intends to proceed against Mr. Childers for libel, owing to some remarks he made when First Lord of the Admiralty.

The Detached Squadron was under orders to leave the Cape on March 8 for England, calling at Madeira.

We regret to hear that the condition of Staff Captain Braddon, Assistant Master Attendant at Portsmouth, causes considerable uneasiness amongst his friends. The attack from which he is suffering occurred when he was bringing the Victoria and Albert down the harbour, and, finding the task a difficult one, on account of several vessels being in his way, he became anxious. This brought on faintness, which next day developed into paralysis.

The following officers have vacated or are vacating their appointments on the personal Staff of General officers:—Brevet Major H. Kerr, 7th Fusiliers, Aide-de-Camp to Lieutenant-General Lord Mark Kerr, C.B., in India; Captains J. E. P. Jervoise, 3rd Hussars, Military Secretary to the Governor of Bombay; G. Woollcombe, Royal Artillery, Aide-de-Camp to the Inspector-General of Royal Artillery; H. M. Jackson, Royal Artillery, Aide-de-Camp to the Governor of Bermuda; W. L. B. Coulson, 25th Regiment, Aide-de-Camp to Major-General Macdonnell in India; J. G. B. Stopford, 32nd Regiment, Aide-de-Camp to the Governor of the Cape of Good Hope; and K. R. B. Wodehouse, 62nd Regiment; and M. Fawkes, 89th Regiment, Aides-de-Camp to the Governor of Bombay; and Lieutenants A. C. Spencer, 5th Lancers, Aide-de-Camp to Major-General Stuart, C.B., at Edinburgh; H. Paget, 7th Hussars, Aide-de-Camp to Major-General Sir E. H. Greathed, K.C.B., at Colchester; W. P. Thackwell, 73rd Regiment, Aide-de-Camp to the Governor of Ceylon; W. J. Smyth, Rifle Brigade, Aide-de-Camp to Lieutenant-General H. Smyth, C.B., at Devonport; and C. E. Parke, Rifle Brigade, Aide-de-Camp to Major-General W. Parke, C.B., at Dover.

Major-General A. T. Phillpotts, C.B., whose appointment was some weeks ago announced, will enter upon his duties as Inspector-General of Artillery on Monday next, vice Lieutenant-General Sir J. W. Fitzmayer, K.C.B. General Phillpotts will have for his Aide-de-Camp Captain E. H. Toogood, Royal Horse Artillery.

We have good reason for believing that many of the restrictions as to the acceptance of Staff appointments out of India by officers of regiments serving in that country are to be withdrawn.

From all accounts the recommendations of the recent Yeomanry Committee are not being attended with the most satisfactory results, for we hear of a falling-off in numbers, whilst there is no perceptible advance in the matter of efficiency. The decision with regard to the West Essex regiment is said to be directly attributable to the recommendation the Committee saw fit to make with regard to the Artillerymen, which many regiments, the West Essex included, had attached. It certainly seems a pity that these men were not encouraged to continue their connection with their regiments. But is the Committee responsible for the curt phraseology of the official correspondence? We are inclined to exonerate it ourselves. However, let the blame rest where it may, there is a feeling of dissatisfaction, not so much at the decision as at the high-handed manner in which somebody—we do not profess to know who—adopted when promulgating the official dictum. We stand a chance of being deprived of the services of a regiment, but this loss may be considered as having been requited if a lesson has been learnt. Officers and men of the Yeomanry, like those of the Volunteers, give both time and money in their country's interest, and they naturally expect to be shown a little consideration. The more disagreeable the nature of correspondence, the greater should be the care exercised in the wording, and the War Office would, perhaps, do well by bearing this in mind.

Colonel W. Bellairs, unattached, will succeed Colonel G. Dean-Pitt, C.B., as Deputy-Adjutant and Quartermaster-General at the Cape of Good Hope. Colonel Bellairs was present with the Second Division throughout the Eastern campaign of 1854-56, from the landing in Turkey to the evacuation of the Crimea, including the battle of Alma (as Adjutant of the 49th Regiment) and Inkerman (when he led into action a detached wing of the 49th Regiment), siege and fall of Sebastopol, affair of October 26, attack of the Quarries June 7, and of the Redan June 18 and September 8 (mentioned in dispatches for distinguished conduct); appointed Deputy-

Assistant Quartermaster-General in December, 1854, and Assistant Quartermaster-General to the 2nd Division at the close of the campaign (medal with three clasps, Brevet of Major, Knight of the Legion of Honour, 5th Class of the Medjidie, and Turkish medal). He was appointed Ensign May 8, 1846, and became Colonel August 22, 1873.

Deputy Surgeon-General T. Fraser, M.D., Surgeon-Major on the Half-Pay List, has been appointed to succeed Dr. Andrew Maclean as Surgeon on the Staff of the Royal Military College. Dr. Fraser served with the 10th Hussars in the Crimean campaign from April 17 to August 30, 1855, including the capture of Tchorgaun, battle of Tchernaya, and siege of Sebastopol (medal with clasp and Turkish medal). He entered the Army December 16, 1845; became Surgeon-Major, December 16, 1865; and retired upon half pay with the higher honorary rank July 29, 1874.

General W. F. Forster, we are sorry to say, is seriously ill. The report that Major-General Foster is suffering has evidently arisen from a confusion of names.

Lieutenant the Hon. C. D. Home, Rifle Brigade, joins the Staff of Major-General the Hon. L. Smyth, C.B., at Devonport, as Aide-de-Camp. He entered the Army June 12, 1869, and became Lieutenant October 28, 1871.

DEATH OF FIELD-MARSHAL FITZGERALD.

The death is announced at Tours of Field-Marshal Sir John Forster Fitzgerald, G.C.B., colonel of the 18th Royal Irish, at the age of ninety-one years. Sir John Fitzgerald was the son of Edward Fitzgerald, Esq., M.P., of Carrigoran, and was born in 1786. On Oct. 27, 1793, when only seven years old, he obtained a commission as ensign in an independent company of Foot. On Jan. 31, 1794, he was promoted to a lieutenancy, and on May 9 in the same year was promoted to a half-pay captaincy in the old 79th Regt., not the 79th Highlanders, which had been reduced in 1783. On Oct. 31, 1800, he was brought on to full pay as captain of the 46th Regt. According to Hart's "Army List" he joined that regiment for duty in the following year, when, though only fifteen, he had already been a titular captain seven years. The establishment of the 46th having been reduced in 1802, Capt. Fitzgerald was again placed on half pay, but on July 9, 1803, he was appointed to the New Brunswick Fencibles, and on Sept. 25 became brevet major when only seventeen years old, being an instance of rapid promotion, we fancy, quite without parallel. On Nov. 9, 1809, he was transferred to the 60th Royal Americans, now the 60th Rifles, and joined that corps in the Peninsula. He was present at the siege of Badajos, and the battles of Salamanca, Vittoria, and the Pyrenees, together with many minor affairs. During part of the war he commanded a light battalion, and was at the battle of the Pyrenees in the command of a brigade. He was taken prisoner by the French, as far as we can ascertain, at or after the battle of the Pyrenees, but subsequently exchanged. He received the gold cross for his services. On Feb. 5, 1824, he was promoted to a lieutenant-colonelcy in the 20th Foot, having received the brevet of col. in 1819. In 1830 he became a major-gen., and in 1841 a lieut.-gen., having in the interval commanded a division in the Bombay Presidency. In 1854 he became a full general. In 1850 he obtained the colonelcy of the 18th Royal Irish, and in 1862 was created G.C.B. Sir John Fitzgerald married first, in 1805, Mary, daughter of Mr. Hazen, Esq. She died in 1848; secondly, in 1850, Jean, daughter of Hon. Donald Ogilvy. She died in 1863. He sat as M.P. for Clare in the Liberal interest from 1852 to 57. By the order of the Minister of War the military honours paid to French officers of his rank were rendered to his remains, and the whole of the garrison escorted the body to the grave. The French papers express the hope that this proof of courtesy and good fellowship will be appreciated in England.

The *Times* furnishes the following account of the obsequies:—"The funeral of the Field-Marshal was solemnized at Tours on the 27th inst. On Monday last orders from Paris were received at Tours by the military authorities there, instructing them to give the English Marshal a military funeral. Accordingly, on the day of the Marshal's interment the large French garrison stationed at Tours turned out to pay the last honours to the deceased soldier. The English residents were unanimous in their desire to unite in honouring their compatriot. The entire arrangements were ably superintended by Col. MacAdam, and the result was a most imposing spectacle. At eleven a.m. precisely the procession left the Marshal's house in the Rue de Sebastopol. Gen. de Boerio was in command of the forces. The way was led by the 66th Foot; next came a company of Chasseurs à Cheval; then followed the pall, which was borne by Gen. de Grammont, two French colonels, and Col. Elphinstone and Lieut. Macleod in their English uniforms. A brother of the deceased was chief mourner, and after him came nearly all the English residents at Tours, among whom were the Rev. C. Dowman, Rev. Mr. Kirby, Col. MacAdam, and Mr. Neilson Nicholson. A large number of French officers followed, while the 13th Chasseurs à Pieds and 3rd Dragoons formed the rear. The way was lined by the 32nd Infantry. The procession moved slowly along the densely-crowded streets to the church St. Etienne, where, as Sir J. F. FitzGerald had become a recent convert to the Catholic faith, the chief burial mass was performed by the curé. The large church was filled with spectators, and a military band assisted in the mass. The services lasted about an hour, when the procession, being re-formed, proceeded to the cemetery of St. Symphorien, where, in foreign soil, and with no official recognition from his own land, Field-Marshal Sir. J. F. Fitzgerald was laid after having served his country for eighty years."

His Excellency Kuo, the Chinese Ambassador, recognizing the international character of the Seaman's Hospital (late Dreadnought), Greenwich, has intimated the intention of the Chinese Government to subscribe £20 annually to the charity.

The Army.

Royal Horse Guards. The regiment is to move from Regent's Park to St. John's Wood Barracks.

1st Life Guards are to move from St. John's Wood to Windsor.

2nd Life Guards. The regiment moves from Windsor to Albany-street Barracks.

2nd Dragoon Guards, from Cahir, relieve the 5th Dragoon Guards at Ballincollig.

5th Dragoon Guards. On removal from Ballincollig the regiment proceeds to Newbridge, where it will spend next winter.

6th Dragoon Guards (Carabiniers). On proceeding to India next winter, the *Times* says, the regiment will, in all likelihood, be quartered at Muttra, taking the place of the 10th Hussars.

7th Dragoon Guards will be moved to Dublin from Newbridge for the winter.

1st (Royal) Dragoons are under orders to proceed at once to Aldershot, and will take over the quarters of the 5th Lancers. The troop, vacant by the retirement of Capt. Maunsell, will be filled by selection from the General List of the Cavalry.

3rd Hussars. The *Times of India* is sorry to learn that the cause of Col. Blundell's departure for England is severe illness, brought on by exposure while at the Imperial Assemblage at Delhi. Col. Blundell is expected to arrive at Portsmouth in H.M.S. Malabar, due on Monday.

4th Hussars. Major Chaine has sailed for India to rejoin head-quarters from leave.

5th Lancers leave Aldershot about the 9th proximo for Ipswich and Norwich, to relieve the Royal Dragoons. Head-quarters and six troops will be quartered at Norwich and two at Ipswich.

6th Dragoons are under orders of readiness to move from Dublin to Edinburgh.

7th Hussars are ordered to proceed to Ireland from Edinburgh, exchanging relief with the Inniskilling Dragoons.

9th Lancers. Lieut. M'Innes acts as adjt. during the absence of Lieut. the Hon. E. Vesey, on leave in England.

10th Hussars. It is reported that the regiment will leave Muttra next winter for Umballa. Lieut.-Col. Lord Ralph Kerr has been granted leave from India to England for fifteen months, and Lieut. and Adjt. the Hon. C. C. W. Cavendish for six months, on private affairs. The report that Capt. Battine has expressed a desire to take up duty with head-quarters is, we believe, unfounded.

11th Hussars. Brevet Major Balfe has been granted an extension of leave from India to remain in England from June 17 next to Feb. 17, 1878.

16th Lancers. Lieut. and Adjt. Barker is on passage home from India in H.M.S. Malabar.

17th Lancers. Lieut. the Hon. J. Pleydell-Bouverie obtains the vacant troop.

19th Hussars. The greatest regret is expressed by all ranks at the approaching retirement of Col. Jenkins, who has commanded the regiment since its formation in Jan., 1862, and has brought it up to the highest state of efficiency. No better Cavalry officer is to be found in the Service, nor is there one who can be said to be more deservedly respected. The *Irish Times* says:—"The report that Capt. Percy Barrow, 19th Hussars, from the Staff at the Curragh, is likely to obtain transfer to Aldershot in a similar capacity will doubtless be the keynote for the usual outburst of indignation among those officers who are graduates from the Staff College. The fact is, Capt. Barrow is one of the smartest and best officers in the Cavalry Service; and it reflects great credit upon the authorities at the Horse Guards that they have not allowed such a man to escape their notice."

21st Hussars. It is understood that Brevet Major Biddle will shortly retire, as will also Brevet Lieut.-Col. Lane. Col. M'Leod, too, will vacate the command before long.

Royal Artillery.

It is under consideration, the *Standard* hears, to remove the Royal Horse Artillery's mounted band to Aldershot, in consequence of the dissolution of the Depôt Brigade, and there seems to be some uncertainty with respect to the disposal of the other well-known bands of the Royal Artillery, which are commanded respectively by Mr. Smyth and Mr. Lawson. All the bands, however, have been disconnected from the depôt and attached to the coast brigade for two years past, so that there is no present ground for disturbing them, and it is believed that, like the officers' mess, they will remain at Woolwich and continue to make the garrison the head-quarters of the Royal Artillery.

In accordance with the new battery system of Indian reliefs, A and B Bats. of the new C Brig. (formerly A and B of the E Brig.) Royal Horse Artillery will proceed to India in the autumn, probably relieving F and G Bats. of the C Brig. (late A and B of the F Brig). This will diminish the number of field batteries for Indian service by two for the autumn of 1877, the batteries of Majors Hannen and Anderson (formerly F and G of the 24th Brig.) being probably the two lucky ones which will obtain a year's reprieve from foreign service.

Lieut. R. W. O'Grady has been appointed Assist.-Supt. of Factories in Madras, vice Capt. A. N. Pearse, appointed adjt, of the School of Gunnery, Shoeburyness.

Lieut.-Col. J. Ford (late Madras), Capt. A. N. Pearse, and Vet.-Surg. B. W. Skoulding, F Brig. R.H.A., are expected home from India in H.M.S. Malabar.

The retirement of the following officers will shortly take place, they having accepted the vacant pension of £600 a-year, viz.:—Cols. J. Desborough, C.B., G. Shaw, C.B., H. A. Smyth, and Brevet Col. J. E. Thring.

We hear that a detachment of Artillery is about to be sent from Dublin to Carlow to make room for the depôt of the D Brig. R.H.A., about to move from Woolwich to Portobello Barracks, under the localization arrangement.

Lieut. H. H. Costobadie has sailed for India to join C Brig. R.H.A., on transfer from D Brig.

Lieut.-Col. J. F. Raper, 21st Brig., and Major E. C. W. Raynsford, C Brig. (late Bengal), have applied for leave from India to England, on medical certificate.

Col. C. H. Dickens, C.S.I. (late Bengal), has been granted leave from India to England for one year and nine months, on private affairs.

Col. C. G. Arbuthnot, C.B., Depty. Adjt.-Gen. of Royal Artillery in India, has been granted leave to England.

Lieut. J. M. Alves, F Brig. R.H.A., has been assigned local rank as capt. in India from Dec. 23, 1876.

The *Standard* understands that a Royal Warrant will shortly appear laying down rules for the retirement of officers of the Coast Brigade.

Royal Engineers.

Major D. H. Trail, R.E., Examiner Public Works Accounts, Punjab, has, the Lahore paper tells us, been transferred in a similar capacity to the Central Provinces. His successor is Col. Davison, who, on being relieved at Bombay by Major Westmorland, comes up here. His charge, however, will not be a permanent one, as Col. Davison has only to put in five months' service to entitle him to retire, when, in all probability, there will be another shuffling of the cards, which may result on the return of Major Westmorland to this province.

Grenadier Guards. Capt. Lord Burghley is retiring.

Scots Fusilier Guards. The sergeants' mess of the 1st Batn. has been honoured during the past week by receiving from her Majesty two portraits, one of the Queen and the other of the late Prince Consort, who was for many years colonel of the regiment. The pictures are in massive gilt frames, each surmounted by an Imperial crown. A correspondent says:—"It is hardly possible to express the intense feeling of gratification and pride felt by all ranks in the battalion in being thus signally honoured by her Most Gracious Majesty, which it is believed is intended to mark her high approbation of the battalion at her inspection at Windsor on Feb. 12, 1876."

1st or Royal Scots. Paymr. (Capt.) Elliot, 2nd Batn., was to have taken passage home from India in H.M.S. Malabar, due at Portsmouth on Monday.

3rd Buffs. The following letter has been addressed to both battalions:—"Dec. 18, 1876.—Sir,—Having had the honour to submit to his Royal Highness the Field-Marshal Commanding-in-Chief your letter of Nov. 13 last with its enclosures, containing an account of the wreck, off Paternoster Point, of the hired transport St. Lawrence with the 2nd Batn. 3rd Foot on board, I have it in command to desire that you will be pleased to convey to Col. Pearson and the officers and men of the battalion, and to the several details of other corps under his command, the expression of his Royal Highness's approval of their exemplary conduct on the occasion in question, affording, as it does, a further instance of the advantages of discipline, steadiness, and obedience to orders under what are, perhaps, the most trying circumstances in which it is possible for soldiers to be placed. The order and regularity with which first the women and children, and afterwards the troops, with provisions, arms, and baggage, and such portions of the military stores as it was possible to save from the wreck, and ultimately re-embarked in vessels that had been sent to the relief of the sinking ship, were most creditable to all concerned, and the energy and endurance displayed by Capt. Wylde, who was despatched on a ride of over sixty miles with intelligence of the disaster to the authorities at Cape Town, are deserving of the highest commendation. The thanks of the Field-Marshal Commanding-in-Chief are also due to Commodore Sir W. Hewitt and the officers and men of H.M.S. Active and Spartan, who so promptly, and with so much personal kindness and consideration, lent their assistance to the troops, and his Royal Highness has directed that his appreciation of their valuable services should be communicated to them through the Lords Commissioners of the Admiralty. I am to add that it is a matter of great satisfaction to his Royal Highness to learn from Col. Pearson's report, as forwarded by you, that the battalion under his command, notwithstanding the hardships and risks to which it has been exposed, is in a perfectly fit state to proceed to its intended destination within your command. You will be so good as to furnish Col. Pearson with a copy of this letter, and direct him, after reading it at the head of his battalion, to cause it to be entered in the record of its service.—I have, &c., C. H. Ellice, Adjutant-General." Sub-Lieut. Hind, 1st Batn., has been granted leave from India to England on medical certificate, and is expected to arrive in H.M.S. Malabar. Surg.-Major Collis, 1st Batn., having vacated his appointment as medical officer, is expected home from India in H.M.S. Malabar.

4th King's Own. Lieut. De la Rue, 1st Batn., has left England for Gibraltar to rejoin head-quarters.

5th Fusiliers. Capt. Hackett, 1st Batn., is employed on famine duties in India. Capt. Vincent is on passage home from India in H.M.S. Malabar.

6th Regiment. It is with regret we learn that telegraphic information has reached England from India announcing the death of Major W. J. M. Crawfurd, 1st Batn. Major Crawfurd served with the 79th Highlanders in the Crimea from Aug. 16, 1855, including the siege and fall of Sebastopol (medal with clasp and Turkish medal). Also in the Indian campaign of 1858-59, including the siege and capture of Lucknow, attack on the fort of Rooyea, action of Allygunge, capture of Bareilly, relief of Shahjehanpore, capture of the fort at Bunnia, pursuit to the left bank of the Goomtee, destruction of Fort Mohumdee, taking of Rampore Kussia, occupation of Sultanpore, passages of the Goomtee and Gogra, and subsequent operations to the Raptee (medal with clasp). He entered the Army Aug. 25, 1854; became lieut., Feb. 9, 1855; capt., Oct. 23, 1860; and major, Oct. 1, 1870. He exchanged to the 6th from the 24th Foot Dec. 1, 1875, and was on the point of proceeding to England on leave on medical certificate. The *Civil and Military Gazette* of Lahore says:—"Our coming Lieut.-Governor has not yet, we hear, nominated his personal Staff, but it will be a matter of regret to many to learn that Capt. Morton, Sir Henry Davies's popular private secretary and A.D.C., returns to regimental duty with his corps, the 6th Royal Regiment. During his tenure of office Capt. Morton has upheld the character, which he had in his regiment, of being an officer of great ability and judgment, a staunch friend, and a thorough 'good fellow.' His loss will be much felt at Lahore, and he leaves this station with kindly wishes for his future from all."

8th King's. Lieut.-Col. Drew remains with and Major Whitting joins the 2nd Batn. on promotion. Sub-Lieut. Porter, 1st Batn., has qualified for promotion.

11th Regiment. The head-quarters and service companies of the 1st Batn. may be looked for at Portsmouth daily now in H.M.S. Malabar from India. The officers expected home in the Malabar are Col. Roe, Major Corrie, Capts. Halliday, Toller, Hare, and Meredith; Lieuts. Smith, Reid (adjt.), Thompson, Stawell, Murray, Bullock, Ryland, Batson, Carden, and D'Oyly; Sub-Lieut. Fairbrother; and Surg.-Major Tulloch, M.D. The battalion will be stationed at Devonport. Lieut.-Col. Osborn joins the 2nd from the 1st Batn., Major Birch remains with the 1st Batn., Major Smyth remains with the 2nd Batn., Capt. Smith remains with the 1st Batn., and Capt. Astley joins the 2nd Batn., on promotion.

12th Regiment. Lieut. Cautley, 2nd Batn., has passed the lower standard examination in Hindostanee.

15th Regiment. Lieut.-Col. Wilkinson, 2nd Batn., has been granted leave from India to England for six months, on private affairs.

17th Regiment. Sub-Lieut. Whitby, 1st Batn., has qualified for promotion.

18th Royal Irish. Lieut. and Adjt. Lawrence, 1st Batn., has been granted leave from India to England, on medical certificate, and is expected to arrive, as is also Lieut. Forster, in H.M.S. Malabar.

20th Regiment. Major Clarkson, 2nd Batn., has been appointed commandant of the School of Instruction for Officers of the Auxiliary Forces at Aldershot, vice Lieut.-Col. Drew, who resigns on assuming command of the 2nd Batn. 8th.

21st Fusiliers. Capt. Hewett, 1st Batn., has been assigned local rank as major in India from Aug. 4, 1875.

22nd Regiment. The 1st Batn. has arrived at Cork from Fleetwood, and relieved the 77th, having been conveyed in H.M.S. Assistance.

25th Regiment. Lieut. Bather, 1st Batn., is expected home from India in H.M.S. Malabar.

33rd Regiment. Lieut.-Col. Fanshawe is about to retire from the Service, and will shortly arrive home from India to arrange with the Army Purchase Commission as to terms. Capt. Bally is on passage home in H.M.S. Malabar.

37th Regiment. A correspondent writes to us pointing out the inconvenience the sergeants are put to owing to their having no mess accommodation at Winchester, the sergeants' mess in the barracks there having, on the departure of the 3rd Batn. 60th Rifles, been set apart for the use of the Brigade Depôt.

39th Regiment. Lieut. and Adjt. Fenwick and Lieut. Rudyerd are expected home from India in H.M.S. Malabar.

40th Regiment. Capt. Mansergh has received orders to proceed home from India forthwith to join the depôt. Lieut. Georges has passed the lower standard examination in Hindostanee. Sub-Lieut. Purchas has been granted leave to England, on medical certificate, and is expected to have taken passage in H.M.S. Malabar. Capt. Morphy is looked for in the same transport.

44th Regiment. Capt. Bald has been granted leave from India to England, on medical certificate.

45th Regiment. Lieut. Krupp has been granted leave from India to England for fifteen months, on private affairs, and is on passage in H.M.S. Malabar.

48th Regiment. Capt. Powlett has been granted leave from India to England for fifteen months, on private affairs.

Royal Marines.

Capt. St. John rejoined his head-quarters on the 26th inst., from leave in Holland.

Qrmr. Halling has been transferred from Plymouth head-quarters to the depôt at Walmer, to succeed the late Mr. Woon.

Capt. E. O. B. Gray has also been detached for duty at the depôt.

A series of fortnightly readings, which have been held throughout the winter at the Royal Marines Barracks, Plymouth, were brought to a close on Monday evening last. These entertainments were held in the large lecture-room, and consisted of readings, recitations, and instrumental and vocal music. The ladies of the corps, officers, non-commissioned officers, and men all lent their aid to swell the programme; and it is a satisfaction to record that the room was invariably full of the rank and file, their wives, and families, an undeniable proof that the amusements provided answered their desired end.

The funeral of the late Col. George Stephen Digby, C.B., Commandant of the Royal Marine Artillery, took place at the Portsmouth Cemetery on Friday. The *cortége* left the deceased officer's late quarters in the following order:—A guard and firing party of 400 men in six companies, under the command of Lieut.-Col. H. W. Mawbey; the bands of the Royal Marine Artillery, the Royal Marine Light Infantry, the 21st (Royal North British Fusiliers), and the 49th Regiments; the corpse, borne on a gun-carriage drawn by six white horses, the coffin being covered with the Union Jack, and upon it resting the cocked hat, sword and belt, and the medals of the deceased, the deceased's groom leading the charger with the boots reversed. Col. H. Adair, the Second Commandant; Capt. Robert Woollcombe, Staff officer; 100 gunners of the Royal Marine Artillery; the non-commissioned officers of the Royal Marine Artillery; the Staff non-commissioned officers of the Corps; the whole of the officers of the Corps at head-quarters, together with many from long distances officers from the various regiments and corps in the garrison; the rear of the procession being brought up by a number of naval officers, including the Commander-in-Chief, Admiral George Elliot; and Rear-Admiral Sir Francis L. M'Clintock. Lieut.-Gen. Schomberg, C.B. (formerly commandant of the Corps), Col. Jolliffe, Col. Macnamara, Gen. Langley, and Col. C. W. Adair, C.B., A.D.C., were among the Marine officers present. Col. Rodney, the Depty. Adjt.-Gen., and Col. Sir Francis Festing, K.C.M.G., C.B., the Assist. Adjt.-Gen. of the Marine Forces, were unavoidably absent. The coffin was borne from the entrance to the cemetery to the chapel and the grave by non-commissioned officers of the Corps, the pall being borne by Lieut.-Col. Cox, Col. Richards, Capt. Herbert, R.N., Col. C. Adair, Col. Wombwell, Capt. Arthur (H.M.S. Vernon), Capt. Herbert (H.M.S. Excellent), Capt. Waddilove (Steam Reserve), and Col. Petrie.

Capt. G. M. Shewell has been appointed instr. of musketry at the Portsmouth Division in place of Major G. Mairis, whose period of Staff service has expired.

Col. Kennedy, Capt. Pritchard, and Capt. Heseltine have been appointed to make an official investigation and report upon deficiencies in the accounts of the Plymouth Divisional Friendly Society.

53rd Regiment. Col. Dalzell is about to retire upon full pay.

56th Regiment. Major Clutterbuck is retiring upon full-pay pension.

59th Regiment. Lieut. Stoyte is expected to be a passenger from India in H.M.S. Malabar, due at Portsmouth on Monday.

60th Rifles. Lieut.-Col. Montgomery, 2nd Batn., has been granted leave from India to England, on medical certificate, and, with Capts. Charley and Chalmer, is expected home in H.M.S. Malabar. Lieut. Davies obtains Capt. Johnstone's company. The services of Lieut. Okeden, 2nd Batn., have been placed at the disposal of the Lieut.-Governor of Bengal for employment on his Honour's personal Staff from the date on which he quitted his appointment on the personal Staff of the Lieut.-Governor of the North-Western Provinces.

62nd Regiment. Major Hay is expected to arrive home from India next week in H.M.S. Malabar.

63rd Regiment. Capt. Day is expected home from India in H.M.S. Malabar. Surg.-Major Robotham has been appointed to the charge of the Kussowlie Convalescent Depôt, with effect from the 1st inst.

65th Regiment. Lieut. and Adjt. Hamilton has been granted leave from India to England, on medical certificate, and is expected to arrive in H.M.S. Malabar, in which Lieut. Coleman will also, no doubt, be a passenger. Surg.-Major Sherlock is likewise expected to be a passenger in the Malabar, he having vacated his appointment as medical officer.

71st Highlanders. Lieut. Craigie has sailed for Gibraltar, to join head-quarters.

72nd Highlanders. Lieuts. Spens and Lendrum are expected to arrive home from India in H.M.S. Malabar.

74th Highlanders. Lieut. Templer and Sub-Lieut. Edwards have sailed for Penang, to join on appointment.

77th Regiment has arrived at Newry from Cork, and relieved the 94th, having been conveyed in H.M.S. Assistance.

78th Highlanders. It is expected that Lieut. Sargent will be given the vacant company.

87th Fusiliers. It is believed, says the *Irish Times*, that a major will be ordered from Bermuda to Galway for duty with the 68th Brigade Depôt, in anticipation of the return home of the regiment.

88th Connaught Rangers. It is arranged that the head-quarters and service companies shall sail for the Cape of Good Hope on May 12 in H.M.S. Orontes. Head-quarters and six companies go to the Cape, one to Simon's Bay, and one to St. Helena.

89th Princess Victoria's. Major-Gen. Gore, commanding the British Burmah Division, inspected the regiment at Thayetmyo on Jan. 19, 20, and 22. The barracks and the various institutions were visited, and found to be in every way satisfactory. At the conclusion of the inspection the major-gen. addressed Col. Penton, speaking in laudable terms of everything he had seen, and promising to make a favourable report. The following regimental order was subsequently published:—"The commanding officer has much pleasure in announcing to the officers, non-commissioned officers, and men of the regiment that the major-general commanding the division expressed himself this morning highly pleased with the efficiency and appearance of the battalion, and also with its steadiness under arms." Lieut. Vipan is expected home in H.M.S. Malabar.

92nd Highlanders. Lieut. Gilpin-Brown has been granted leave from India to England to appear before a medical board, and, with Lieut. Forbes, is expected to have taken passage in H.M.S. Malabar.

94th Regiment has left Newry for Fleetwood, having embarked at Belfast in H.M.S. Assistance. Lieut. Spooner accompanies Major-Gen. Sir Richard Kelly, K.C.B., from Cork to Colchester as aide-de-camp.

98th Regiment. Major Scheberras is named at Malta for the command of the Royal Malta Fencible Artillery, which is about to fall vacant.

102nd Fusiliers. Sub-Lieut. Way has sailed for Gibraltar to join on appointment.

109th Regiment. Lieut. Murphy has been granted leave from India to England for six months, on urgent private affairs, and is on passage in H.M.S. Malabar.

Rifle Brigade. We regret to learn of an accident which occurred a few days ago to Capt. Chamberlain, 3rd Batn. The *Kentish Express* states that he "was riding on horseback between the huts at Shorncliffe when a line, stretched across the thoroughfare by a soldier's wife for the purpose of drying clothes, caught him across his throat and threw him to the ground. He was picked up insensible, and at once conveyed on a stretcher to his quarters by some Guardsmen. The injuries he had sustained were found to be of a very serious nature. Capt. Chamberlain had only just commenced acting as brigade-major."

1st West India Regiment. It is with much regret we have to record the death, in the prime of life, of Lieut.-Col. Strachan. The deceased officer died at Upper Norwood, on the 23rd inst., of pneumonia, consequent on six weeks' illness of African fever, aged forty-three. Col. Strachan returned home from the Gold Coast on April 16, 1875. Having served there for fourteen months, his health suffered so much that he got an extension of leave after the six months allowed to him, but the fatal disease had such hold of him that, in spite of the best care and advice, he succumbed, another victim to the deadly effects of the African climate. Col. Strachan entered the Army as ensign Feb. 14, 1852; became lieut., Feb. 25, 1853; capt., March 4, 1862; major, Dec. 23, 1871; and lieut.-col., April 15, 1874. He was highly respected and beloved by officers and men, and his remains (interred in St. Peter's Churchyard, Croydon) were followed by all the officers of his regiment at present on leave, Col. Johnston being the chief mourner. Capt. Marshall's retirement is to occasion no promotion, Capt. Pollard being taken on to the establishment from the Supernumerary List.

Royal Malta Fencible Artillery. The correspondent of the *Standard* at Malta learns that Cols. Mattei, C.M.G., and Gatt are about to retire upon pension, and that Major Scheberras, 98th Regt., will be offered the vacant command.

Medical Department. Surgs.-Major J. Tulloch, M.D., W. Collis, H. Sherlock, and M. L. White, and Surgs. E. Townsend, R. Drury, and W. A. Duke are expected to arrive home from India in H.M.S. Malabar. Surg.-Major W. C. Roe is in readiness to embark for the Mauritius. Surg. N. Wade embarks early in June for the West Indies.

THE AUXILIARY FORCES.

MILITIA.

Essex Rifles. Lieut. F. W. Parr has been appointed instr. of musketry to the regiment.

West Kent. Owing to the prevalence of small-pox throughout the districts from which the men are obtained, it has, we understand, been very wisely decided not to assemble the regiment for training this year.

Royal North Down Rifles. Mr. L. Orme, late of the 100th Begt., has been recommended for one of the vacant companies.

Leitrim Rifles. Capt. and Adjt. Phibbs, Sligo Rifles, has received orders to proceed to Carrick-on-Shannon to-day to take up the duties of adjt.

Royal Limerick Artillery. In accordance with instructions received from H.R.H. the Field-Marshal Commanding-in-Chief, the bronze medal of the Royal Humane Society was lately presented at a full-dress parade of the troops at Winchester to Capt. Sir Claude de Crespigny, Bart., for saving a man from drowning under the following circumstances:—Sir Claude was in charge of the regimental bathing parade at Tarbert, Co. Kerry, when it was reported to him that a man was drowning, having been caught by the severe current known as Tarbert Race. He was being carried away by it, and was about 300 yards from the shore, and very much exhausted, when the gallant officer at once swam out, and supported him until a boat from the Coast-guard station, about a quarter of a mile off (which had been launched, but unfortunately filled), could reach him. Col. Newdegate, commanding the Rifle Depôt at Winchester, who presented the medal, spoke in the highest terms of this instance of personal bravery.

Royal Longford Rifles. Lieut. Dopping has been recommended for the vacant company.

Queen's County. Lieut. Taylor and Sub-Lieut. Jacob do duty with the recruits during preliminary drill.

There is to be no School of Instruction for officers of the Auxiliary Forces (Infantry) at Aldershot next month.

The *Whitehall Review* hears that "the War Office has refused to approve of the appointment of a captain of the Royal Marine Light Infantry whose name was recently submitted for a vacant Militia adjutancy. The military authorities have no objection to Marine officers being appointed to adjutancies of Volunteer corps, but, owing to the localization system, they consider it undesirable to allow the soldier-sailors to take up duty with regiments of Militia, as their presence might, it is thought, have the effect of loosening the connection which, under the present Brigade Depôt system, ought to exist between Regulars and Auxiliaries."

YEOMANRY.

Royal 1st Devon. The regiment is ordered to assemble this year at Exmouth on May 23, and will be inspected on the 29th, and dismissed on the 30th.

Royal North Devon. The regiment is to assemble at Barnstaple on May 10, will be inspected on the 16th, and dismissed on the 17th.

North Somerset. Orders are issued for the regiment to assemble at Bath on Sept. 15. It is to be inspected on the 21st, and dismissed on the 22nd.

West Somerset. The regiment will assemble at Taunton on June 2, is to be inspected on the 8th, and dismissed on June 9.

The following officers join the School of Instruction at Aldershot next month, viz.:—Capt. FitzGerald, Lieuts. Small and Pratt, Sub-Lieuts. Harter (to join on the 15th prox.), James, Theobald, Lord, and Salting, Royal Bucks; Sub-Lieut. Knowles, Duke of Lancaster's Own; Lieut. Roch, Pembroke; Sub-Lieuts. Darby and Baldock, Shropshire; Lieut. Lindow, Westmoreland and Cumberland; Lieut. Watson-Taylor and Sub-Lieut. Brudenell-Bruce, Royal Wilts; Sub-Lieuts. Vavasour, Greenwood, and Lawson, Yorkshire Hussars; and Lieut. Rawson and Sub-Lieuts. Charlesworth and Wheatley, 2nd West York.

THE INDIAN ARMY.

5th Bengal Cavalry. Col. W. J. P. Barlow has returned to India from furlough in Europe, and resumed duty as commandant.

9th Bengal Cavalry. Capt. A. P. Palmer, squadron officer, has qualified for promotion as substantive major.

14th Bengal Cavalry. Lieut.-Col. L. H. Williams, commandant, has arrived home from India.

15th Bengal Cavalry. Lieut. F. R. Ditmas, squadron subaltern, has applied for furlough to England on medical certificate, and is expected home in H.M.S. Malabar, looked for daily at Portsmouth.

17th Bengal Cavalry. Major T. J. Watson, second in command, has qualified for promotion as lieut.-col. Lieut. E. W. Chalmers has returned to India and resumed duty as squadron officer.

18th Bengal Cavalry. Capt. E. S. Neave has returned to India and resumed duty as squadron commander from furlough in Europe.

19th Bengal N.I. Lieut. D. E. Gouldsbury, wing officer, has been granted furlough to Europe for two years on private affairs.

29th Bengal N.I. Capt. E. Beddy, wing officer, has qualified for promotion as substantive major.

30th Bengal N.I. Lieut.-Col. T. Bell, second in command, has been granted furlough to England for eighteen months.

38th Bengal N.I. Surg. W. M. Courtney, in medical charge, has passed the higher standard examination in Hindostanee.

2nd Punjab Cavalry. Capt. E. B. Bishop has returned to India and resumed duty as squadron officer.

4th Punjab Cavalry. Capt. T. Shepherd, squadron officer, has arrived home from India on leave.

3rd Punjab Infantry. Lieut. H. F. V. Gaitskell, qrmr., has arrived home from India.

4th Punjab Infantry. Lieut. E. Lloyd has passed the Government examination in Persian.

4th Hyderabad Cavalry. Major A. A. Johnson, commandant, has been granted leave from India to England on medical certificate.

1st Sikh Infantry. Capt. A. G. Ross has returned to India and resumed duty as wing commander.

4th Madras Light Cavalry. Vet.-Surg. J. H. Cox has been granted leave to England for six months on urgent private affairs.

4th Madras N.I. Surg. M. E. Murphy, M.D., has been granted leave to England for one year and eight months.

16th Madras N.I. Lieut.-Col. W. H. White, wing officer, has been granted furlough to England for eighteen months on medical certificate.

34th Madras N.I. Capt. Q. S. A. Jamieson, wing officer, has been granted leave to England for fifteen months.

1st Central India Horse. Lieut. H. A. Vincent, squadron officer, has been granted furlough to England for one year.

9th Bombay N.I. Lieut.-Col. G. W. Anson, second in command, has been granted leave from India to England for one year and 295 days.

14th Bombay N.I. Capt. F. A. Davidson has resumed duty as wing officer on return to India from furlough.

17th Bombay N.I. Col. J. Pogson, commandant, has been granted five months' leave of absence in India on private affairs.

24th Bombay N.I., under the command of Col. Henderson, was to have reached Mehidpore a few days ago, *en route* from the Delhi Assemblage, relieving the wing of the 25th N.I., which returns to head-quarters at Mhow.

The Army Gazette.

WAR OFFICE, PALL MALL, March 27, 1877.

Where not otherwise specified, the following commissions and announcements bear date March 28, 1877:—

5th Dragoon Guards—Capt. J. D. Bourne to be Major, vice M. P. Blake, retired on half pay; March 17, 1877. Lieut. R. W. Kearsley to be Capt., vice J. D. Bourne; March 17, 1877.

29th Foot—Lieut. C. de F. Green retires from the Service, receiving the value of an Ensigncy.

47th Foot—Qrmr.-Sergt. J. A. Furlong to be Qrmr., vice M. Carey, retired on temporary half pay.

60th Foot—Capt. P. A. J. H. Johnstone retires from the Service, receiving the value of his commission.

65th Foot—Lieut. S. D. Crookenden to be Capt., vice C. A. Fillingham, deceased; Jan. 2, 1877.

76th Foot—Capt. and Brevet Major W. Franklin, from the Supy. List, to be Capt., vice B. Simner, retired; March 17, 1877.

77th Foot—Sub-Lieut. F. D. Lumley to be Lieut.; March 10, 1875. Sub-Lieut. B. Sapte to be Lieut.; March 10, 1875.

78th Foot—Capt. D. Hay retires from the Service, receiving the value of his commission.

87th Foot—Lieut. A. P. Johnson resigns commission.

90th Foot—Lieut. S. J. Stevens to be Capt., vice F. R. Harvey, retired; March 7, 1877.

100th Foot—Sub-Lieut. F. J. Kempster to be Lieut.; March 10, 1876.

102nd Foot—Lieut. C. Grant, from the 2nd West India Regt., to be Lieut., vice L. A. Wainright, who exchanges.

103rd Foot—Lieut. H. F. Heathcote to be Capt., vice the Hon. H. M. Hobart, retired on a pension; Jan. 17, 1877.

1st West India Regiment—Capt. G. J. Marshall retires from the Service, receiving the value of his commission.

2nd West India Regiment—Lieut. L. A. Wainright, from the 102nd Foot, to be Lieut., vice C. Grant, who exchanges.

Staff—Major-Gen. A. T. Phillpotts, Royal Artillery, to be Inspr.-Gen. of Artillery, vice Major-Gen. Sir J. W. Fitzmayer, K.C.B., whose term of holding that appointment expires; April 1, 1877.

Medical Department—Surg.-Major R. E. Heath, M.D., retires upon temporary half pay; Feb. 12, 1877. Surg. T. E. Carroll resigns commission.

BREVET.

Major J. Ford, Royal (late Madras) Artillery, retired full pay, to have the hon. rank of Lieut.-Col.; Jan. 29, 1877.

Paymr. and Hon. Capt. J. C. Mansergh, Royal Artillery, to have the hon. rank of Major; Feb. 25, 1877.

The undermentioned promotions to take place in H.M.'s Indian Military Forces, consequent on the death, on Feb. 7, 1877, of Gen. W. N. T. Smee, Bombay Infantry, and of Lieut.-Gen. W. R. A. Freeman, Madras Infantry:—Lieut.-Gen. E. Messiter, Madras Infantry, to be Gen.; Feb. 8, 1877. Major-Gen. C. Prior, Bengal Infantry, to be Lieut.-Gen.; Feb. 8, 1877.

To be Major-Gens. in the East Indies—Col. S. B. Faddy, Bengal Infantry, Feb. 8, 1877; and Col. R. A. Doria, Madras Infantry, Feb. 8, 1877.

The following promotions to be made in succession to Lieut.-Gen. Sir John Fordyce, K.C.B., Col.-Com. Royal (late Bengal) Artillery, who died on Feb. 26, 1877, viz.:—Major-Gen. J. Abbott, C.B., Royal (late Bengal) Artillery, to be Lieut.-Gen.; Feb. 27, 1877. Col. C. B. Fuller, Royal (late Bombay) Artillery, to be Major-Gen., with antedate of Nov. 9, 1868, such antedate not to carry back pay prior to Feb. 27, 1877. Major H. G. Browne, V.C., half pay, late 100th Foot, to be Lieut.-Col.; Feb. 27, 1877. Capt. J. Stanley, 47th Foot, to be Major; Feb. 27, 1877.

MEMORANDUM.

Capt. George Erskine Callander, late Royal Artillery, retired upon an annuity, has been permitted to commute his retired allowance; Dec. 20, 1872.

INDIA OFFICE, March 26, 1877.

Her Majesty has been pleased to approve of the following promotions amongst the officers of the Staff Corps and of her Majesty's Indian Military Forces made by the Governments in India:—

BREVET.

To be Majors—Capt. (Local Major in Persia) C. Grant, Bombay Cavalry; Jan. 4, 1877. Capt. H. A. Shakespear, Bengal Cavalry, in succession to Major-General F. Maitland, Bengal Infantry, deceased; Aug. 4, 1876. Capt. H. M. Buller, Bengal Cavalry, in succession to Major-Gen. L. S. Hough, Bombay S.C., deceased; Nov. 24, 1876.

BENGAL STAFF CORPS.

Substantive Promotions.

To be Lieut.-Cols.—Majors C. T. Hitchens, Jan. 7, 1877; H. Fellowes, Jan. 11, 1877; C. P. Hunter, Jan. 20, 1877; J. Gillespie, Jan. 20, 1877; (Brevet Lieut.-Col.) J. P. Sherriff, Jan. 20, 1877; A. H. Bramley, Jan. 20, 1877; W. Phaire, Jan. 20, 1877; L. H. P. de H. Larpent, Jan. 20, 1877; F. M. Armstrong, Jan. 20, 1877; and A. E. Campbell, Jan. 20, 1877.

To be Majors—Capts. R. H. de Montmorency, Jan. 4, 1877; A. Battye, Jan. 6, 1877; T. Dayrell, Jan. 6, 1877; G. L. K. Hewett, Jan. 20, 1877; (Brevet Major) W. Tweedie, Jan. 20, 1877; G. C. Gregory, Jan. 20, 1877; and F. F. J. Toke, Jan. 22, 1877.

To be Capts.—Lieuts. G. H. C. Dyce, Dec. 30, 1876; A. K. Abbott, Dec. 30, 1876; and S. D. Turnbull, Jan. 3, 1877.

MADRAS STAFF CORPS.

To be Lieut.-Cols.—Majors W. Peyton, Dec. 9, 1876; J. A. Ellis, Dec. 10, 1876; H. E. Mottet, Dec. 20, 1876; and G. N. Stephens, Dec. 20, 1876.

To be Majors—Capts. E. W. Shaw, Dec. 12, 1876; R. G. Jenkins, Dec. 13, 1876; G. S. Heath, Dec. 13, 1876; C. L. Highmoor, Dec. 13, 1876; J. B. Taylor, Dec. 13, 1876; T. O. Underwood, Dec. 13, 1876; J. A. Richmond, Dec. 13, 1876; C. A. Porteous, Dec. 13, 1876; C. J. O. Chambers, Dec. 20, 1876; and S. E. R. Butler, Dec. 20, 1876.

MADRAS ARMY.

Cavalry.

Late 2nd Light Cavalry—Major (Brevet Lieut.-Col.) W. J. Morris to be Lieut.-Col.; Nov. 30, 1876. Capt. (Brevet Lieut.-Col.) R. St. J. Prendergast to be Major; Nov. 30, 1876.

Late 4th Light Cavalry—Capt. (Brevet Major) C. S. Steward to be Major; Nov. 30, 1876.

BOMBAY STAFF CORPS.

To be Lieut.-Cols.—Majors J. H. Castel, Jan. 20, 1877; W. T. Mills, Jan. 20, 1877; L. H. Sibthorpe, Jan. 20, 1877.

To be Major—Capt. H. N. Reeves; Jan. 4, 1877.

The name of the undermentioned officer should be as follows, and not as stated in the *London Gazette* named:—*London Gazette*, Sept. 15, 1876—Major Charles Chester Sargeaunt, not Sargeannt.

The undermentioned officer, whose promotion to the rank of Major in the Bombay Staff Corps appeared in the *London Gazette* of Feb. 16, 1877, should have been described as Capt. and Brevet Major Arthur Mark Shewell.

The Militia Gazette.

WAR OFFICE, March 27, 1877.

The Queen has been graciously pleased to approve of the conversion of the undermentioned Militia regiments as follows:—The Royal Anglesey, from Light Infantry into Engineers; the Royal Cardigan, from Rifles into Artillery; the Royal Monmouth, from Light Infantry into Engineers; the Sligo, from Rifles into Artillery; and the Wicklow, from Rifles into Artillery. These changes to take effect from April 1, 1877.

INDIA.

Allen's Indian Mail says:—"Col. Tudor Lavie, late Madras Artillery, who died suddenly on March 11 at the age of 70, entered the Madras Artillery in 1823. For many years he served on the Staff of the Madras Army, and was at one time Secretary to the Military Board. In 1858 he did good service with the Sagar Field Division, under the late Sir G. Whitlock, assuming temporarily the command of the Artillery when the late Major-General W. H. Miller was severely wounded at the battle of Banda, in April of the same year. In 1859 he retired on his pension with the rank of colonel."

It is announced in the *Gazette of India* that her Majesty's Indian Good Service Pension has been conferred upon Col. J. E. Mayne, Madras S.C., late judge advocate.-gen. (since retired), from June 15, 1876. Col. Mayne commanded a regiment and subsequently a brigade of Cavalry in the Turkish Contingent, during the war with Russia, and has received the Order of the Medjidie; served as depty.-assist. qrmr.-gen. in the Kurnool Moveable Column, and as deputy judge-advocate in the Saugor Field Division; was engaged in Central India in suppression of the Mutiny under Major-Gen. Sir G. C. Whitlock, K.C.B.; was present at the affairs of Sheegunge and Kobraie, battle of Banda, and storming the heights of Punwaree (Turkish medal, medal and clasp for Central India). His commissions are dated as follows:—Cornet, Jan. 24, 1839; lieut., Feb. 20, 1844; capt., Nov. 1, 1849; brevet major, June 6, 1856; major, Feb. 18, 1861; brevet lieut.-col., July 2, 1862; lieut.-col., Jan. 24, 1865; brevet col., Jan. 24, 1870. Appointments—Qrmr. and interpreter, 8th Light Cavalry, March 1, 1845; adjt., 8th Light Cavalry, July 19, 1849; depty.-assist. qrmr.-gen., Kurnool, July 22, 1857; depty. judge advocate-gen., Nov. 27, 1857; depty. judge advocate-gen., Centre Division, Dec. 4, 1857; judge advocate-gen., March 17, 1873.

The *Madras Athenæum* records the death of Capt. P. Codd, Paymr. of Military Pensioners, on Feb. 28, at his residence, Pursewaulkum, from small-pox. He was highly respected by all who knew him, and the pensioners have lost a truly good officer. Capt. Codd was connected with many of the charitable institutions of Madras, and he always took a lively interest in their welfare. His remains were interred in St. Mary's Cemetery with the usual military honours.

It was stated the other day that Lieut.-Col. A. T. Moore, V.C., Bombay S.C., would probably succeed to the command of a Cavalry regiment on his return from England. With reference to this, the *Times of India* says:—"We happened to know that, previous to his leaving Bombay, Col. Moore had been suffering for some time from the effects of an accident, which, it was feared, would prevent his resuming the active duties of a Cavalry officer. We shall rejoice, however, to hear that he has so far recovered as to be able to enter again on the duties of a profession of which he was once so bright an ornament. Should this be so, it may fairly be concluded that the appointment of Cotton Inspector-in-Chief, which the gallant officer has hitherto held, will be abolished."

Col. Drayson, R.A., and Major Sandford, R.E., recommend the addition of heavy rifled guns to the armament of Fort William, Calcutta.

Lieut.-Col. W. H. Mason, Bombay S.C., cantonment magistrate of Belgaum, is said to intend retiring from the Service in April next.

The death is announced of Lieut.-Col. J. Webster, late of the 78th Highlanders, a Military Knight of Windsor, on the Royal Foundation, which occurred on Sunday night at his residence, the Upper Ward, Windsor Castle. Col. Webster went through the Indian Mutiny, and also served in Canada. He was awarded two medals and clasps. He served forty years, and was in the seventy-sixth year of his age. He was elected a Military Knight four years ago. His death causes a vacancy in the Lower Foundation.

As a compliment to the military of the Woolwich district, a ball was given on the 22nd inst. to the Staff sergeants and sergeants of the various regiments in garrison by the townspeople, at the new assembly-rooms attached to the skating rink at Shooter's-hill. In the course of the proceedings a letter was read which had been sent to one of the hon. secretaries by Mr. W. E. Gladstone, who expressed thanks for an invitation, and said, "Every one must view with pleasure a celebration which will tend to draw closer the ties of mutual respect and goodwill between the military and the civil inhabitants. I have myself witnessed with pleasure, abroad as well as at home, the disposition of our Army to cultivate the best relations of this kind, and I am glad that the people of Woolwich are on their side exhibiting in so marked a manner the same disposition.—I remain, sir, your most faithful servant, W. E. Gladstone."

VOLUNTEER ADJUTANTS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—The thanks of all adjutants of Volunteers are due to you for having brought to notice the non-fulfilment of Mr. Hardy's promise of last year, which you pointed out in your issue of March 17. It is indeed a very singular anomaly that a captain, on taking up a post involving considerable extra trouble, and one of some anxiety and great responsibility, should at once have his pay cut down from 11s. 7d. to 10s. per diem, and it is surprising that these appointments are at all sought after, involving, as they undoubtedly do, in other respects, a very considerable loss. The paltry allowance of twopence per week in lieu of medical attendance will, at the end of each year, in most cases, leave a large margin of loss, whilst the loss on forage, lodging, and servants' allowances (which are framed on a most antiquated scale, and are quite inadequate) has been estimated very reasonably in your columns at not less than £100 per annum. Still, with all this staring them in the face, there are plenty of applicants, and the supply is equal to the demand. This is, however, no justification for making a hard bargain with those wishing, for private reasons, to take a stationary post, unless the same rule is applied to all Staff appointments; but until adjutants and quartermaster-generals and their deputies and assistants, and brigade-majors, &c., have their pay curtailed, and serve at a less rate than that of their regimental rank, it can hardly be right to begin with Volunteer adjutants, and to reduce their pay by 1s. 7d. per diem.—I am, &c.,

EX-ADJUTANT.

TURNPIKE TOLLS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—In your last issue you allude to a trial relative to turnpike tolls, and wish some information on the subject of an officer's liability. In the case in question the gate keeper was convicted by the magistrates, and fined. This conviction was appealed against by the lessee, and the magistrate's conviction was quashed by the Exchequer Division of the Court of Queen's Bench, and costs given against the officer, the respondent. It was proved that he was on duty and in uniform; his horse, also, that he was driving was going to the place of parade, but it was argued that the carriage was not belonging to her Majesty, nor employed in her service under the provisions of this (the Mutiny) Act, and, on the appeal being tried, it was, I believe, on these grounds that the conviction was quashed. Under these circumstances no officer travelling on duty in any carriage can pass through any turnpike without paying toll, unless the carriage has been impressed by order of a magistrate; and, as no one ever resorts to that measure, I think the wording of the Mutiny Act creates a false impression as to officers being entitled to pass through toll free.—I am, &c.,

F. O.

March 20, 1877.

"THE FURLOUGH RULES."

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—With reference to the following item, which appeared in your issue of Feb. 10 last—"It has been notified at the India Office that all officers who are entitled to an adjustment of their furlough pay at the rate of 2s. per rupee, and are now in India, should make application to the Government of their respective presidencies for the issue of the same to their agents in this country should they desire the amount to be paid here"—I should be very much obliged if any of your readers would kindly inform me what officers are entitled to this adjustment, and whether the order, which I have not seen, carries retrospective effect? I came home on the furlough rules of 1868, which guaranteed me my half Indian pay "converted at the exchange of 2s. for the rupee;" but during my two years' furlough I was paid first at the rate of 1s. 11d., and afterwards at the rate of 1s. 10d., whilst Government, in their deductions from my pay on account of the orphan fund, charged me at the rate of 2s. a rupee. Is it possible that they are going to redress this grievance, or that they have done so? And is this redress only to have effect from this year, or does it have retrospective effect? If so, what?—I am, &c.,

A READEROF YOUR GAZETTE.

THE COMMISSARIAT.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—"Dum Spiro Spero's" suggestion in your last number is an excellent one. May I add yet another—namely, let the age for retirement in the upper ranks be reduced from sixty to fifty-five years, assimilating it to that laid down for the junior grades. This would give a few steps, and reduce the formidable array of supernumeraries which now bars the way to promotion.—I am, &c.,

A FOSSILATED ASSISTANT-COMMISSARY.

March 21, 1877.

In answer to Mr O'Neill, Mr. Hardy said, on Monday, he should be unable to lay on the table any report as to the qualifications of Antrim and Downpatrick as depot centres, as there were none which were not purely departmental.

According to the *Times*, the Cavalry regiments in Ireland will probably be stationed as follows after the Curragh season:—The Queen's Bays, at Ballincollig; 3rd Dragoon Guards, at Cahir; 4th Dragoon Guards, at Longford; 5th Dragoon Guards, at Newbridge; 7th Dragoon Guards and 7th Hussars, in Dublin Garrison; and 19th Hussars, at Dundalk.

The Cairo correspondent of the *Cologne Gazette* states that the commander of the Egyptian squadron which is to cruise in the Red Sea will be Federigo Pasha, Morrice Bey (Com. Morrice, R.N.) being second in command. M'Killop Pasha, who was originally to have commanded the squadron, is still indisposed. The correspondent quoted doubts if the despatch of the squadron is prompted by pure anti-slavery sentiments. An Italian expedition, under Capt. Martini, is shortly to land at Sela, and the Egyptian authorities are said to apprehend that the reception given by the Governor of Sela and the natives of his district to the Italian explorers will be far from friendly, and that there may be open hostilities, and a necessity for Italian reprisals. The governor is known to be hostile to the Italian expedition, and he has been confirmed, as is asserted, in this feeling by the opposition previously raised to the expedition by the Khedive himself. It is mainly with a view to prevent a collision that the Egyptian squadron is said to have been despatched.

REVIEWS.

Dispatches and Correspondence of Field-Marshal the Duke of Wellington, K.G. (John Murray.)

(SECOND NOTICE.)

In the autumn of 1829 the Eastern Question had become still further complicated, and the aspect of affairs was gloomy in the extreme. In a dispatch to the Earl of Aberdeen, under date August 10, 1829, the Duke of Wellington calls attention to the fact that the affair of Greece had been taken up to prevent the war between Russia and the Porte, which English interference had since occasioned, and also the establishment in Greece of an exclusive Russian influence, which had been created there under French as well as Russian protection, and under circumstances likely to occasion "discontent, revolutionary notions, and possibly insurrection against British authority in the Ionian Islands." Having thus reviewed the position of affairs, and pointed out that the only chance of terminating the war in Turkey was by concessions on the part of the Porte of territory, the demand for which was inconsistent with the promises and engagements made by the Emperor to all Europe, and injurious to the interests of England, the Duke thus states his opinion as to the course that ought to be adopted:—

> There is very little use in making complaints upon any subject unless one is prepared to strike a blow. But I think that it would be desirable that you should make Lord Heytesbury sensible of this state of things, and point out to him to what object he ought to direct his attention in the discussions with Count Nesselrode, viz.: first, the necessity of the contracting parties to the Treaty forcing Capo d'Istria to attend to the advice given to him by the Conference; and, secondly, that he should call the attention of the Emperor's Government to the revolutionary conduct of Capo d'Istria. We are not one of those Governments that need be afraid of modern revolutionary doctrines or actions. We have resisted both successfully against means much more powerful than can be now brought against us. The Emperor of Russia's Government must judge whether it is fitting that such a system should be acted upon anywhere under their protection and with their assistance.

Within a few days after we find a most important "memorandum" on the "state of affairs in the East." In it the Duke points out that Count Bernstoff, in his communications with the Austrian Minister at Berlin, had made the same complaints of the coldness and want of exertion of the English Government to prevail upon the Porte to make peace which Baron Bülow made to Lord Aberdeen; moreover, that it was admitted that the Porte might reasonably entertain doubts of the sincerity of the wishes of the Emperor of Russia for peace, or even of the expediency of complying with his Imperial Majesty's terms, and that England was called upon to remove those doubts, and convince the Ottoman Porte that she would give no assistance to enable her to resist the invasion of her territories by the Emperor of Russia. Before considering these propositions, the Duke proceeded to point out on what ground the English Government had stood since first informed that the Emperor of Russia intended fo make war upon the Porte. In the first place, England declined to engage in or sanction hostilities which she thought unnecessary, and not only foresaw, but foretold the risk incurred of overthrowing an empire and disturbing the peace of Europe. The result of a contest so unequal was never doubted, more particularly as two of the Powers interested in the conservation of the Porte as a Power in Europe were engaged in a treaty with the Emperor for the settlement of Greece; but it was equally clear that the Russian Emperor was about to destroy the work nearly accomplished by seven years of the joint care, anxiety, and negotiations of all the Powers of Europe, including his own august predecessor and brother. The consequences of the invasion of the Ottoman Empire were foretold in the dispatch addressed by the Earl of Dudley to Prince Lieven on March 7, 1828:—

> The Ottoman Empire is not a country like some of those whose example we could cite within our own times, which, after having been invaded, resume their domestic tranquillity and their political existence upon the retreat of the invaders. Once broken up, its capital taken, and its provinces in rebellion, the recomposition of it as an independent State would be a work scarcely within the reach of human integrity or human skill. A new order of things must arise in those countries of which it now consists. What that order would be it is vain to conjecture, but we may venture to foretell that a final adjustment would not take place till after a series of troubles and disasters, for which the greatest benefits that could be supposed to arise from it could not for many years afford a sufficient compensation.

The following is the reply of Count Nesselrode to the paper which contained the extract above quoted:—

> Ni la chute de ce Gouvernement, ni des conquêtes n'éntrent dans nos vues, parce qu'elles nous seraient plus nuisibles qu'utiles. Au reste quand même malgré nos intentions et nos efforts, les decrets de la Divine Providence nous auraient prédestinés a etre temoins du dernier jour de l'Empire Ottoman, les idées de sa majesté quant aux agrandissements de la Russie seraient encore les memes. L'Empereur ne reculerait pas les bornes de son territoire, et ne demanderait a ses allies que cette absence d'ambition et de pensées exclusives dont il donnerait le premier l'example:

The duty which was now sought to be cast upon England was that of removing the doubts of the Porte as to the sincerity of Russia's wish for peace. The Duke thus expresses himself in reference to this:—

> The difficulty of this question has always consisted in its having been made a personal one. We are told that the Emperor of Russia is a highly honourable individual. He says that he wishes for peace, and we must not only give credit to his assertions, but we must urge the Porte to give credit to them. I put the honour of the individual out of the question, and I look at the case only as it relates to the powerful monarch of a great empire. When such an one wishes for peace, and is desirous that other Powers should make known his wishes to his enemy, he explains himself to them frankly, and he commits no act which can render the negotiation of a treaty of peace more difficult. Let us view the conduct of the Emperor of Russia, and see how far it will bear this test. In his Imperial Majesty's manifesto, at the commencement of the war, he declared that he desired and should demand no increase of territory, that he should require from the Porte compensation for the losses in commerce of his subjects, and for the expenses of the war, the due execution of the treaties with Russia, particularly the Treaty of Akermann, and security for their due execution in future.

The Duke then points out how completely Russia failed in giving any explanation of the meaning of her demands, and proceeds to criticise the acts of the Emperor, concluding his dispatch with the following observations:—

> But we are told that, notwithstanding all this, his Imperial Majesty intends to make peace—a peace which the Porte can accept, preserving its independent situation and power in Europe—that the King of Prussia is convinced that that is his Imperial Majesty's intention, and we are called upon to assure the Porte that the Sultan can expect no assistance from us, and that he ought to accept peace upon the terms offered to him. Such a demand is in itself an insinuation against us. We do wish the Porte to make peace, because it is obvious that she is incapable of carrying on war, because her destruction would entail on Europe fresh misfortunes, and because the unfortunate policy of former years has deprived her of the assistance she ought to have expected in the circumstances in which she is placed. We are, besides, engaged in a treaty with the Emperor of Russia, the objects of which have not yet been accomplished. But before we can take a more active part in any negotiations for peace, we must know the objects of the peace and the terms, and the situation in which it will leave the parties.

The period which caused such anxiety to the Government, in reference to the Eastern Question, proved a critical one as regarded affairs in Ireland. Agitation, trifled with till it assumed alarming proportions, at length caused little less than consternation in England. The concessions which had been made by Government were received in a spirit far different from that by which they were dictated. It was felt that hostility to the British Government and separation from England formed the real motives which prompted agitation, and that, consequently, it was time to cease the temporizing and vacillation which had worked so much mischief, and to adopt "stern and expansive measures, in order to prevent the attainment of those objects." We gather from the dispatches that passed at this period that the Duke felt convinced that it was imperative to preserve tranquillity and obedience to the law by the aid of stipendiary magistrates and soldiers, if it could not be accomplished by the gentry of the country and the police. In perusing this volume, the reader cannot fail to be struck by the calm and masterly manner in which the Duke dealt with questions of supreme difficulty, and also by the striking similarity which exists between the Eastern Question of that period and of this. The difficulties on the part of England as regards the Porte are nearly the same now as then. The integrity of the Ottoman Empire is as jealously protected, the impossibility of obtaining any but verbal guarantees from the Porte as painfully experienced, while the mystery which in 1829 enshrouded Russia's policy is as dark now as then, nothwithstanding the utterances of the Czar, and the frank bearing of General Ignatieff. The reader will also be struck by the remarkably consistent policy of the Duke throughout the various phases of the Eastern Question, and by the facility with which, in moments of peculiar difficulty, he fathomed the diplomacy of Russia, and unmasked her true intentions.

Juliet's Guardian. By Mrs. H. Lovett Cameron. (Chatto and Windus, London.)

This is a remarkably well and pleasantly written novel, possessing the advantage of having a moral, a very good one, that if you cannot marry the one you love you had better not marry at all. The plot hangs upon a misunderstanding between Juliet and her Guardian, which ends in her marrying the wrong man; but the author has kindly made her a widow in fair time to remedy this mistake. Many of the scenes in these volumes are exceptionally well drawn, and the author shows a capability of a deep study of human nature, and it must be confessed that some of the pet weaknesses of society are rather plainly shown up. There is at no time any lack of incident, and the interest is admirably sustained to the last line.

THE TURKISH NAVY.

The following particulars of the naval strength of Turkey have been gathered from a paper on "The Present Condition of the Turkish Navy," read before the Imperial Society of Arts at St. Petersburg, and reproduced in the *Russki Invalid* of January 29 (February 10), 1877:—The different types of ships are arranged according to the chronological order in which they were built. 1. The first Turkish ironclads constructed were ordinary frigates covered with iron plating; the plating is thickest about the water-line, and varies from 3½ to 5½ inches of iron on 9 inches of wooden planking. (Targets of similar construction have been pierced by Russian 9-inch guns at a distance of 3½ versts—about 2½ miles.) The plating is continued below the water-line—at the bows 4 feet, amidships 5¼ feet, and at the stern 5 feet. (The Russian foot is 13·75 inches, English measure). Of the above type the Turks have four ships, Aziz, Akhanie, Osman, and Mahmoud. Their tonnage is 6,400 tons, they draw 25 feet of water, and have a speed of 12 knots. The armament of this class of ships consists of sixteen guns—viz., fourteen 7-inch Armstrong guns on the main deck, and two 9-inch guns on the upper deck. The weak part in these ironclads is that the rudder and screw are much exposed, and the decks have only a thickness of 3½ inches of wooden planking. 2. The second class of ironclads consists of turreted monitors, each armed with five guns, two 9-inch guns in each turret, and a 40-pounder Armstrong in the bows. These ships have the disadvantage that they cannot fire ahead with their heavy guns, and at the stern they have a poop which is unarmoured. They have two screws; their tonnage is 2,500 tons; they draw 18ft. of water; speed, 12 knots. Of this class there are two, Khafzi Rukhman, and Latfi Jalil. 3. There is one ship of this class, Asan Taphik. She has a belt of armour extending from 5ft. above the water-line to 4ft. below it. She is otherwise unarmoured, excepting for about one-third her length, which is plated, and forms a central battery; her plating is from 6 to 8 inches in thickness, the thickness at the bulkheads being 4 inches; her tonnage is 4,687 tons. She draws 21ft. of water, has a single screw, and attains a speed of 13 knots. She carries eight 9-inch guns, six broadside, two in turrets. 4. The fourth class comprises two vessels, Asair Shefket, and Mizami Shefket, which differ from the last in size, their tonnage being 2,046 tons, their plating round the water-line is 6 inches thick, and they carry four 7-inch broadside guns, and a 9-inch pivot gun; they draw 16½ feet of water. 5. The Tjlalie is similar to the two above described, but differs in her armament. She carries four broadside guns (two 9-inch and two 7-inch) and a 7-inch pivot gun. 6. The sixth class of ships, like the above described, have a central battery; the construction of the battery in these ships, moreover, admits of the guns being fired ahead and astern. Of this type there are two ironclads—Marie Zipher and Avni Allah—of 2,400 tons each, armed with four 9-inch guns. They draw 16½ feet of water; speed, 12 knots. 7. The Mukadem Khair and Futka Buland are similar to the above, but cannot fire ahead or astern. Their plating round the water-line is from 6 inches to 9 inches thick; their tonnage, 2,760 tons; they draw 17½ feet of water; speed, 13 knots. 8. Of the eighth class of vessel there are two, named Messida and Memdukh; the first arrived in Constantinople in December, 1875, the latter last December. In these ships the central battery is 152 feet in length, the thickness of the belt of armour round the water-line is, amidships, 12 inches,* at the bows 7 inches, at the stern 5 inches. They carry twelve 10-inch and three 7-inch guns. The tonnage of these ironclads is 9,140 tons. There are few ironclads in the world of greater power. England possesses five, Alexandra, Devastation, Dreadnought, Inflexible, Thunderer; the Italian Government one, the Duilio; the Russians one, the Peter the Great. The French and German Governments possess no such powerful ships. In these ships the plating is continued below the water-line, in the centre 5½ feet, at the stem 3¼ feet, at the stern 2¾ feet. These ships draw 26 feet of water, and their speed is 13 knots an hour. There is now building at Constantinople a ship of similar type to the above, but of smaller dimensions, her tonnage being 7,000 instead of 9,140 tons, and her plating somewhat thinner. 9. This last class of sea-going ironclads consists of two armoured corvette rams, each of 4,717 tons, carrying four 25-ton 11 or 12-inch guns, and drawing 19½ft. of water, with a speed of 13 knots. 10. The Danube flotilla constitutes the tenth class of ironclads in the Turkish Navy. There are four different types of ships in this flotilla. (*a.*) Five of them are of ancient construction. Each carries two guns, either 68-pounder smooth-bores or 7-inch 4½-ton Armstrong guns. The guns are placed in a central square or octagonal iron-plated battery. The armour of these ships is 3 inches of iron plating on 14 inches of timber. Their speed is 9 knots; they draw 6½ft. of water. (*b.*) The second class is a two-turreted monitor. In each turret there are two 4½-ton Armstrong guns. The turrets are plated with 4 inches of iron, and the ship has belt of the same thickness continued to from 1 to 3 feet below the water-line. There are three of these monitors. They draw 10 feet of water; speed, 10 knots. c. Of this type there are two vessels; they are single-turreted monitors (the author expresses himself uncertain whether these and the three ships before described have arrived in the Danube) carrying one 7-inch 4½-ton gun; they draw 5½ feet of water; the plating is continued below the water-line at the bows and amidships 1 1-3 feet, at the stern 2-3 foot. They have two screws much exposed. *d.* There remain two ironclads, Khizer and Lenfi. These are monitors built at Constantinople; the details of their construction are not known. In the Turkish Navy there are altogether 31 ironclads, 19 of which are sea-going vessels, and 12 constructed for service on the Dauube.

---

* Can be pierced by the Russian 12-inch guns at a distance of one mile.

MILITIA TRAINING, 1877.

The Militia of Great Britain will assemble for preliminary drill and training as stated below:—

THE GATLING GUN.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—In the ARMY AND NAVY GAZETTE of the 10th ult. I saw a brief notice of the new mitrailleuse of my invention, in which it is stated that the gun "will fire 300 rounds per minute." It fires from 800 to 1,000 shots per minute quite easily, and if you will make this statement in your valuable journal I shall feel under great obligations to you.—Yours, &c., R. J. GATLING, Inventor of the Gatling Gun.

Hartford, Conn., U.S.A., March 10, 1877.

The sum of £30 per annum, the *Irish Times* states, is in future to be paid to Mr. Debenham Robinson, of the War Office, for his services in compiling and editing the War Office List.

Lord Eustace Cecil, M.P., says the *Whitehall Review*, is expected to resume duty as Surveyor-General of the Ordnance at the War Office after the Easter recess. He is gradually recovering from the effects of his severe illness.

A correspondent of the *Standard* recently communicated to that paper some interesting facts concerning the sobriquets of several regiments. It would prove very interesting to our readers if he or any one else would enlighten us as to the origin of the nickname "Holy Boys" borne by the 9th Regt. Indeed, at the present moment, when the individuality of all single battalion regiments is threatened, any facts about their titles and traditions would be acceptable.

The defences of the Thames, says the *Standard*, are to be strengthened by two additional 38-ton guns (making four in all) at the fortifications on Coalhouse Point, and it is probable that the armament of the companion work on the other side of the river at Cliff Creek will be similarly strengthened. The Magog barge left the Royal Arsenal on Wednesday with the second pair of heavy guns for Coalhouse Point.

The *Times* states that "since Capt. Lord Burghley, Grenadier Guards, is about to retire from the Army, he will be succeeded as aide-de-camp on the personal Staff of Lieut.-Gen. Sir Hastings Doyle, commanding the Southern Military District, by Lieut. the Duke of Montrose, 5th Lancers. Although Lieut.-Gen. Doyle becomes a full general by the death of Gen. John Spink, it is not expected that he will vacate the command at Portsmouth until the end of the year."

William Tegg and Co. will shortly publish a work entitled "Meetings and Greetings: the Salutations, Obeisances, and Courtesies of Nations, with Notes on Titles, Dignities, &c." By William Tegg, Editor of "Hone's Three Trials," "The Last Act," &c.

The *Standard* hears that "the siege operations which are to take place at Chatham in July will be on a larger scale than has ever been known at that garrison before. Some hundreds of non-commissioned officers and men of the Royal Engineers are now employed in the construction of mines, redoubts, galleries, parallels, trenches, ditches, &c., and very shortly large forces of the Infantry will also be set to work to assist. Not only at Chatham are the works in preparation, but also at Upnor, Chattenden, &c., and the day will be what is termed by the military a 'grand day.' All the Engineer Volunteers of the metropolis will take part in the display, besides those from other places, and several thousand troops. The works are being carried on under the direction of Major Maquay, the chief instructor in field fortifications at the School of Military Engineering."

The writer of "Garrison Gossip" in the *Irish Times* says:—"Even his most ardent admirers never expected to have found Sir Henry de Bathe establishing the reputation he has done for himself during the time he has held the command at Manchester. The whole arrangements of the Manchester district since it has had Sir Henry de Bathe at its head have simply been perfection. Sir Henry, I see, is not unlikely to obtain an extension of his term of command for twelve months. Such a privilege is well deserved, for men of the stamp of Gen. de Bathe are worthy of all encouragement."

The Fine Art Union has been established to supply engravings of a superior character from the pictures of celebrated artists considerably under the price originally charged. The Manager states that in most cases the plates will be found to be nearly new, whilst none will be from plates old enough to render the engravings in the least indistinct. Full particulars of the Fine Art Union will be found in our advertising columns.

APOLLINARIS.

The Queen of Table Waters."—British Medical Journal.

Incomparable for mixing with Wines and Spirits."—H. Vizetelly, "Wines of the World."

re wholesome and refreshing than Soda Water."—C. Macnamara, F.R.C.S., Westminster Hospital.

"The Vogue in the Clubs."—The World.

Wholesale Depot, Three-crown Square, Borough, S.E.

The ENCORE WHISKY
Is recommended by the Medical Profession throughout the kingdom as the pure and safe alcoholic stimulant.

ST. THOMAS'S HOSPITAL,
ALBERT EMBANKMENT, S.E., 28th February, 1876.
THE THANKS of the MEDICAL PROFESSION are due to Messrs. BERNARD and CO., LEITH DISTILLERY, SCOTLAND, for producing the ENCORE WHISKY—a Spirit more Wholesome and less Irritating than any Spirit extant, being especially useful for patients suffering from Kidney Disease.
R. W. JONES, F.C.S., M.R.C.S., L.R.C.P.E.

SPECIAL NOTICE TO OFFICERS AND SPORTSMEN.
W. SPARKES HALL and CO.,
310, REGENT STREET, W.,
Bootmakers to
H.R.H. the Prince of Wales, H.R.H. the Duke of Connaught, H.R.H. Prince Christian, H.I.H. The Crown Prince of Germany, The Marquis of Lorne, &c.,
Beg to call the special attention of Officers and Sportsmen to their
PORPOISE HIDE SHOOTING BOOTS,
Which, being made of the finest selected Skins and best Workmanship, will be found not only durable, but of Great Comfort to the Wearer.
The advantage of Porpoise Leather is that it never gets hard after being wet.
Also to their
CASE FOR HUNTING BOOTS,
Which contains every requisite for the Sportsman.
The boots and trees are at the bottom, and a tray, fitted above, carries blacking, varnish, &c. (in metal bottles, with screw tops), blacking brushes, top brushes, boot-hooks, breeches-hook, boot-jack, &c.
W. SPARKES HALL & CO.,
310, REGENT STREET, LONDON.

SPECIAL NOTICE.
TO THE NOBILITY AND GENTRY.

WM. PUGH (many years coat cutter at Messrs. Poole's, Savillerow), having succeeded to the old-established first-class business of Jackson and Co., 5, CORK STREET, BOND STREET, W., solicits the patronage of the nobility and gentry.
Best trade only at fixed fair prices, and 10 per cent. allowed for prompt cash.
N.B.—All first-class tailors give credit, and it is only by the discount system noblemen and gentlemen who pay cash get the full value ready money entitles them to.
WM. PUGH (from Poole's), 5, CORK STREET, BOND STREET, W.

SCHWEITZER'S COCOATINA
Anti-Dyspeptic Cocoa or Chocolate Powder
Guaranteed Pure Soluble Cocoa, Without Sugar, Spice or any Admixture.

Specially adapted for Ships, Camps, Sportsmen, &c., being in a concentrated form, made with BOILING Water. Keeps in all climates, and palatable without milk.
Being all Cocoa, it is four times the strength of preparations mixed and therefore *weakened* with arrowroot, &c., and is in reality cheaper a Tea-spoonful to a Breakfast Cup costing less than a halfpenny.
The Faculty pronounce it "The most nutritious, perfectly digestible Beverage for Breakfast, Luncheon, or Supper," and invaluable for Invalids and Children.
Highly commended by the entire Medical Press.
In air-tight canisters at 1s. 6d., 3s., &c., by Chemists and Grocers.

Army & Navy Gazette.

LONDON, SATURDAY, MARCH 31, 1877.

In the late discussion on naval disasters, which are so frequently attributed to executive mismanagement, no remedy is recommended, except that of improving the position of the Engineers, a somewhat general one, and liable to the same reverses as at present. That the naval Engineers are invaluable is universally admitted in the Service, and the tone of letters lately written and arguments recently advanced are not calculated to promote good feeling between the branches, whilst that the duties of each are and must remain distinct is palpable. The naval Service has, undoubtedly, been completely changed in the last few years as regards the complication of machinery on board of a man-of-war, and the first consideration is, of course, to get the greatest value out of the floating machine called a ship. By the system of appointments existing in the Navy, officers are appointed to ships of any and every type, no two of which can be handled in the same manner, and, consequently, they frequently go to strange work. This difficulty was not felt in the old sailing days of the Navy; but, to give perfect knowledge of their ship and its appliances to naval officers of the present day, it is almost necessary that a system should be adopted, as far as possible, of keeping officers to a similar class if not in the same vessel. Take, for example, one of our modern men-of-war, such as the Inflexible or the Alexandra, with her thirty-five engines, by which the officers on joining are said to have been so overwhelmed. By having such a parent-ship, officers might be appointed to her on joining the Service, with the understanding that they would always belong to her, and seamanship and general experience could be retained by occasional service in wooden cruisers. The various officers could be appointed by roster for their term of foreign service without changing the present system beyond always having men to serve in the same ironclad. Officers would then go on active service in a ship with the resources of which they were familiar, and, probably, less complication would arise than when strange officers join a strange ship. As regards the strictures on the handling of ships under steam, there are a sufficient number of gunboats unemployed to form a mosquito squadron, under the command of an able man, to instruct officers thoroughly in steam tactics, and, at the same time, give valuable instruction in the engines to executives who have few practical opportunities of studying these subjects. Great expense is incurred at the Naval College at Greenwich for the theoretical instruction of officers; but most men will admit that, for giving confidence and readiness in any evolution, theory cannot compare with an infinitely smaller amount of practice. For this, opportunities at present but seldom occur for junior officers except when with a squadron, on which occasion the ship is probably conned by the Captain, and but small experience is gained by the other officers as to the actual precautions necessary in each evolution, such as could be readily learnt in the school-squadron of gunboats.

We have excellent authority for stating that a disposition is shown to abandon those portions of the recommendations of the recent Royal Commission on Promotion and Retirement which render officers promoted to companies since the abolition of purchase liable to be compulsorily retired on the completion of twenty years' service; further, that the idea of interfering with those in the next senior rank does not meet with unanimous approval.

Pending the promulgation of the Royal Warrant, which is being anxiously anticipated by so many officers, it is doubtful whether the Horse Guards will take any steps for compulsorily retiring regimental Lieutenant-Colonels who complete their tenure of command under the five years rule. This is but fair.

The proposal of the Militia Committee to amalgamate existing regiments continues greatly to excite all ranks of the Army, more especially in the national regiments. It is difficult to conceive how any soldier could possibly favour the idea of sweeping away by one stroke of the pen time-honoured titles such as Royal Welch Fusiliers, 42nd Royal Highlanders, Inniskillings, Royal Scots, &c., besides the numerous distinguishing marks which are handed down as evidence of gallant acts successfully performed in most cases against overpowering odds. Discipline, we all know, is of first importance in an Army; but *esprit de corps* is an equally valuable incentive to that heroism for which the British soldier has ever been renowned. This is fostered in the memory of past deeds of daring, of honours won on the battle-field, and proudly recorded on the colours; or cherished badges, which bring the performances of a past generation of soldiers prominently before the newly-joined recruits. It is earnestly to be hoped that the confounding of the individuality of corps will not be carried into effect; that regiments will be allowed to remain as at present designated, and not blended and mixed up as suggested by a committee the members of which do not seem to have realised how sensitive officers and men are of the honourable character of the titles of the corps with which they are connected, and interference with which, they feel, would have the effect of lowering their regiments not only in their own estimation, but in that, too, of the public.

The demise, on the 24th inst., of Field-Marshal Sir John Fitzgerald makes Lieutenant-General L. A. During the "father" of the British Army. This officer appears to have joined the York Hussars September 24, 1794, with local and temporary rank, which it would seem was not confirmed until November 25, 1795. General Sir Duncan M'Gregor and General H. Thompson, of the Madras Infantry, who joined in 1800, are the two next senior officers, though, very probably, Lieutenant David Scott, late 7th Royal Veteran Battalion, who is the sole survivor of Abercrombie's army in Egypt, has served longer than either of these officers. Sir Duncan MacGregor was born March 16, 1787, being son of Mr. John MacGregor, senior Captain of the "Royal Clan Alpin Fencibles," in which regiment Sir Duncan received a commission in 1799. He became Ensign in the 72nd Regiment July 12, 1800, Lieutenant in 1801, Captain in the 78th Highlanders 1804, Major in 1813, and, as Major in the 31st Regiment, was wrecked in the Kent (East Indiaman), March 1, 1825, Lieutenant-Colonel May 26, 1825, and Colonel June 28, 1838, and Major-General November 11, 1851. The General, who resides at Blackheath, is still in possession of all his faculties, reads the papers daily, writes beautifully (without spectacles), and takes deep interest in military, political, and social questions, but especially in the more important things of religion and philanthropy.

Lieutenant R. B. Lane, Rifle Brigade, has been appointed Aide-de-Camp to Major-General Lord A. G. Russell, at Dover. He entered the Army February 1, 1867, and became Lieutenant October 4, 1871.

Lieutenant-Colonel W. N. Waller, R.A., is to assume command of the Auxiliary Artillery in the Home and Woolwich Districts from Monday next, vice Colonel O'Brien Wolseley, R.A., who vacates after five and a half years' service, much to the regret of those with whom he has been associated. Colonel Waller served in India in 1857-58, and was present in the actions of Secundra, Chanda, and Sultanpore, siege and capture of Lucknow, relief of Azimghur, and capture of Jugdespore (three times mentioned in dispatches, medal with clasp). He entered the Army June 19, 1850, and became Lieutenant-Colonel April 1, 1875.

A correspondent has called our attention to the want of a uniform cloak in the Navy, to be worn over epaulettes, it being impossible to get inside the present uniform great coat when in full dress. A cloak would also be much more suitable for boat work or watch-keeping in wet weather, and we trust the Admiralty may sanction the introduction of so useful a garment.

Captain W. Maloney, half pay, late Quartermaster of a Depôt Battalion, fills the vacancy in the Royal Foundation of Military Knights of Windsor created by the death, on Sunday last, of Lieutenant-Colonel Joseph Webster.

The reply of Mr. Hardy to Sir H. Havelock's enquiry, with regard to the officers of the Commissariat and Transport Department, was the most negative of negatives. Mr. Hardy acknowledges the existence of grievances and much dissatisfaction, but declines the assistance of a committee of General officers. We regret that so undue an advantage of official position has been thus so openly asserted, for it will only add to the cause of grievance, and render bad worse. What the Commissariat officers say is perfectly right: they ought not to be left to the mercy of a body of War Office clerks, who lack that experience which is necessary for the settlement of so important a question—one which only soldiers of experience can be considered qualified to discuss.

A novel jaune tint has been introduced for "Service" envelopes. Are we to consider this as acknowledging the prevailing fashionable colour, and has the happy inventor been o'ershadowed with a tinge of glory by advancement? We believe we are correct in stating that the idealist who introduced half-sheets of official paper was considerably glorified for his idea.

Mr. Hardy was lately interrogated about the employment of soldiers belonging to the Dover garrison in the harvest field. He replied that only six men were so employed, that the labourers were fully employed, and that there was no strike or dispute between the labourers and farmers. The secretary of a labourers' association, or some such body, has written to the *Standard* stating that the labourers of the neighbourhood were much aggrieved and complaining bitterly of the employment of soldiers on such work. Matters have come to a pretty pass when the farmers are to suffer loss, and soldiers are to be prevented from earning a few shillings because Hodge would rather keep in his own hands more than he can do, or, at all events, is willing to do, on reasonable terms. To bring down whole brigades of soldiers to oust the labourers would be unjust; but we cannot see why well-behaved soldiers, if they can be spared from their military duties, should not be allowed individually to make their own bargains with the farmers. To refuse such permission would be to place the farmers at the mercy of an ignorant and greedy class, far too dangerously powerful as it is, and also wantonly to curtail the individual liberty of the soldier. The latter certainly wants harvest money as much as Hodge, and should be permitted to earn it.

Consequent upon the reorganization about to be carried out in the Royal Artillery, promotion will be provided for two Captains to Majorities, as there is to be an increase of two batteries upon the present establishment.

Captain W. T. Dooner, 108th Regiment, has relieved Captain G. J. Gilbard, 71st Highlanders, in his duties as Brigade-Major at Gibraltar, on appointment.

Captain B. M. Dawes, 100th Regiment, left England on Thursday for Malta, to join the Staff of that garrison as Deputy Assistant-Adjutant and Quartermaster-General.

It will occasion no small satisfaction to officers to learn that the War Office has it in contemplation to carry out that portion of the Report of the Royal Commission on Promotion and Retirement which suggests the propriety of all officers absent from their regiments on Staff employ being placed on the Supernumerary List, as is now done in the case of Captains acting as Deputy-Assistant Adjutant-Generals for Musketry and Garrison Instructors.

The appointment of Deputy-Assistant Adjutant-General for Musketry at Aldershot will shortly be vacant, as the present very energetic holder, Captain R. T. Thompson, is obtaining promotion in his regiment, the 56th. It is reported that Captain A. Moberly, Royal Scots, Captain-Instructor at the School of Musketry, is likely to be selected to fill the vacancy.

No direct promotion will be caused in the Army in consequence of the death of Field-Marshal Sir John FitzGerald, but it is reasonable to suppose that there will be a distribution of bâtons on the approaching anniversary of her Majesty's birthday, as the Army is now virtually without a Field-Marshal—it has no officer holding the rank who has had it conferred upon him simply as a reward for service. To put forward any names would be to mislead, but officers in possession of the claims of Generals Sir William Rowan and Sir Richard England, the former a survivor both of the Peninsula and Waterloo, could scarcely be overlooked, whilst General Sir William Codrington has very much to recommend him.

It is so long since a Guardsman was last provided for, that the Colonelcy which Sir John FitzGerald's death has rendered disposable might fairly be reserved for one of those representatives of the Brigade who are still only drawing unattached pay. Lieutenant-General W. M. Wood, who stands next after Lieutenant-General Edwards, named for General Spink's vacancy, is an ex-Guardsman; so that the present would seem a fitting opportunity for rewarding a former wearer of the bearskin.

Lieutenant-General H. Smyth, C.B., hands over the command at Devonport; Major-General W. Parke, C.B., that at Dover; and Major-General Sir Edward Greathed, K.C.B., that at Colchester, on Monday. The relieving officers (as we lately announced) are:—Major-Generals Hon. L. Smyth, C.B., at Devonport; Lord A. G. Russell, at Dover; Sir R. D. Kelly, K.C.B. (transferred from Cork), at Colchester; and H. Hamilton, C.B., at Cork.

Major R. J. C. Marter, King's Dragoon Guards, vacates his appointment as Deputy-Assistant Adjutant-General at Aldershot on Monday, on promotion, and proceeds to join his regiment, from which he has been absent since April 1, 1872. On the same day Captain C. F. Clery, 32nd Light Infantry, is to join the Adjutant-General's Staff at Aldershot, being relieved as Deputy Assistant-Adjutant and Quartermaster-General at Irish head-quarters by Captain C. L. Harvey, 71st Highlanders, who in turn is relieved at Cork by Captain E. J. Lugard, 4th King's Own Regiment.

The name of Colonel H. H. Morant, commanding the Brigade Depôt at Chester, is to be placed on the establishment of paid Aides-de-Camp to the Queen, vice Colonel the Hon. F. A. Thesiger, C.B., who is obtaining promotion as a General officer.

We learn from Aldershot that officers commanding brigades and corps at that station have received instructions to exercise the troops in minor tactical operations, whenever the opportunity offers for them to do so, up to May 15, so that all officers may acquire a knowledge of the tactical handling of small bodies of men of their own arm, and field officers of the three arms combined. Up to the 15th proximo the exercises are to be confined to training officers and men in their own arm of the Service, and from that date to May 15 every Tuesday and Thursday will be set apart for operations to be participated in by the three arms combined.

The Navy.

GAZETTE.

Admiralty, March 24, 1877.

The following promotions have been made:—Lieut. Pearson Campbell Johnstone to be Com. in H.M.'s Fleet, with seniority of March 23, 1877. Staff Surg. Peter Mitchell Roe, R.N., to be Fleet Surg. in H.M.'s Fleet, with seniority of March 16, 1877.

March 27, 1877.

The following promotion has been made:—Sub-Lieut. R. L. G. Noel to be Lieut. in H.M.'s Fleet, with seniority of March 23, 1877.

APPOINTMENTS.

Lieutenants—Arthur Phillpotts, to the Ganges; W. S. King, G. B. Bedford, R. K. M. Alpine, H. K. L. Phillips, H. C. Bigge, F. L. Campbell, J. F. Bedford, J. E. Gregory, and John Casement, to the Excellent, for short course, to date April 3.

Fleet-Surgeon—W. J. Baird, M.D., to the Hector.

Surgeon—W. M. Rae, to the Bellerophon.

Engineer—Peter Robertson, to the Pembroke, additional.

Assistant-Engineers (First Class)—Joseph Organ, to the Pembroke, additional; J. J. E. Moon, to the Duncan.

Coastguard Appointment.

William Lott, chief officer, to the Endymion, for the Hornsea Station.

Active, Capt. Sir William N. W. Hewett, K.C.B., V.C., arrived at Portsmouth on Wednesday afternoon from the West Coast of Africa and the Cape of Good Hope to pay off. She was commissioned at Portsmouth on Oct. 2, 1873.

Alacrity, Lieut.-Com. W. U. Moore, was paid off at Sydney on Dec. 31, 1876, and recommissioned on Jan. 1, 1877.

Alexandra, Capt. R. O'B. Fitzroy, bearing the flag of Vice-Admiral G. T. P. Hornby, entered the grand harbour of Valetta on the 17th inst., under the usual salute. Mr. F. W. Rowsell, Director of Navy Contracts, and Mr. Godfrey went to Malta in the Alexandra.

Antelope, Lieut.-Com. E. Wingfield, was paid off at Malta on March 16, and recommissioned the following day.

Assistance, Capt. Prattent, arrived at Carrickfergus on the 26th inst., at six p.m., and was to leave Belfast on the 28th for Liverpool with the 94th Regiment.

Barracouta, Capt. Charles E. Stevens. A court-martial assembled on Wednesday on board the Duncan at Sheerness for the trial of Capt. Charles E. Stevens, of the Barracouta. The Court consists of Rear-Admiral Fellowes, C.B.; Capts. Thomas Brandeth, Edward Hardinge, John C. Soady, and St. George D'A. Irvine. Mr. George P. Martin, R.N., barrister-at-law, acted as prosecutor. The prisoner was represented by Capt. G. H. Blake, R.M.L.I., barrister-at-law. There were eight charges, the first being that he did obtain from the paymaster of the Barracouta, Mr. Allen Fitzroy Gain, the sum of £30 from the public chest in a clandestine or irregular manner. The other serious charges referred to conduct towards the paymaster of a tyrannical, ungentlemanly, and unofficer-like character and injurious to Mr. Gain's health, and that on the 16th of June, 1876, the prisoner made application to the commodore for a court-martial on Mr. Gain on several charges, well knowing those charges to be false and vexatious. The charges were most voluminous, giving particulars and dates extending over a period ranging from Dec. 7, 1874, to the present date. Previous to the commencement of the first charge, Capt. Stevens, through his friend, desired that the fullest investigation should be made into his conduct. Several of his material witnesses were absent in Australia. He was anxious that these witnesses should be called, to throw the greatest possible light upon the charges; but, inasmuch as he feared it would be detrimental to the interests of the public service, and also would cause great delay to the Court in waiting for their arrival from Australia, he would withdraw their names. Mr. Gain said he was paymaster of the Barracouta. He joined her on Dec. 7, 1874. During the first few months he was on very good terms with Captain Stevens with reference to the execution of his duties. He was in the habit of paying small bills and accounts for the captain at his request, and at the end of the month stopping the amount out of the pay of the captain. The first matter which required a quarter-deck reference relative to his duties was a complaint made by two of the seamen with reference to their naval savings-bank account. On June 7, 1875, Capt. Stevens requested him to advance £50 from the public chest, as he had been refused, on application to Com. Goodenough, an advance of £100 to provide for the messing of the Governor of Fiji and Staff. This application he, Mr. Gain, refused, stating that he could not take it out of the chest. The captain said he must have it next day. The captain went into his cabin, and stated that he must have at least £30. Mr. Gain said he could not give it without the captain's order and receipt. The captain's order and receipt having been given, the £30 was taken from the public chest, the captain saying there was no need to enter this in the monthly cash account. Capt. Stevens added that he was about to receive an advance of £60, authorized by Com. Goodenough, and that repayment should then be made. On Thursday the greater part of the day was occupied in inquiring further into the manner in which this sum of £30 was procured by Capt. Stevens. The second charge was then gone into, to the effect that on June 16, 1876, Capt. Stevens brought a charge for the trial of Mr. Gain, paymaster, for conduct unbecoming the character of an officer, in setting before his captain a certificate of balance which was at variance with the truth, whereas Capt. Stevens well knew Mr. Gain was not guilty of the offence. Mr. G. P. Martin produced the letter to Commodore Hoskins asking for the court-martial, and after some further evidence was given the inquiry was adjourned. There are a large number of witnesses, and it is presumed that the trial will last some time.

Conflict, Lieut.-Com. J. G. Musters, paid off at Sydney on Dec. 31, but had not recommissioned up to Feb. 9.

Devastation, Capt. F. W. Richards, towed the Thetis into Malta on March 17.

Diamond, Capt. G. S. Bosanquet, left Zanzibar on Jan. 11 for the West Coast of Madagascar and the Mozambique.

Egeria, Com. A. L. Douglas, went out of Hong Kong harbour for target practice on February 2, and returned in the evening.

Fawn, Com. Wharton, was at Massowah on February 6, and was to be employed on the survey of the Massowah channels, and other hydrographic work, in the Red Sea, till the end of April, when she will proceed to Aden, and will afterwards be employed on surveying duties on the East Coast of Africa.

Fly, Com. J. Bruce, left Hong Kong on Febrnary 3 for Foochow to relieve the Hornet, ordered to Hong Kong to pay off.

Flying Fish, Com. H. F. Crohan, left Zanzibar on Jan. 23 for the Comorro Islands.

Hector, Capt. C. H. Simpson, arrived at Cowes on the 27th inst., to do duty as guardship.

Helicon, Lieut.-Com. Stopford, returned to Malta from Sicily on March 18. She was paid off and recommissioned on the 20th.

Hercules, Capt. Bowden-Smith, flagship of Admiral Hon. Sir J. Drummond, was at Malta on March 20. She was to leave for Spithead on March 24.

Himalaya, Capt. E. White, arrived at Colombo on the 25th inst., and was to leave again on the 26th for Mauritius and East London.

Industry, Staff-Com. Dyer, has been again taken into Keyham basin, as it is intended she shall take about thirty supernumeraries on board for passage to the West Coast of Africa, for which purpose some extra fittings will be required, and this will detain her some little time longer.

Lynx, Com. F. M. Ommanney, is expected at Zanzibar about Feb. 7 from Majunga.

Malabar, Capt. Kelly, while passing through the Bitter Lake met with a machinery accident. The rod of the circulating pump became detached from the cylinder, and the engineers were obliged to work all night to make good the defect. She started again at nine o'clock on the morning of the 15th, and is due at Portsmouth to-night.

Minotaur, Capt. Lord W. Kerr, flagship of Vice-Admiral Beauchamp Seymour, was at Cadiz on March 22. The squadron would probably leave for England about the 27th inst. King Alphonso visited the Minotaur on the 24th inst., at Cadiz, where he witnessed some artillery practice and clearing the decks for action. His Majesty afterwards presided at a banquet at the Carraca Arsenal, where covers were laid for 80 Spanish and English naval officers. In proposing a toast he referred to his sojourn in London, and expressed a hope that harmony would continue to prevail between England and Spain. Mr. Layard, the British Minister, also delivered a speech, in which he mentioned the fact that the British and Spanish armies had fought together for the principle of national independence. Admiral Seymour spoke in eulogistic terms of King Alphonso, and the impression his Majesty had made on the English sailors. The day previously Admiral Seymour entertained the King on board the Minotaur; covers were laid for 22 persons, want of space preventing a larger party. Admiral Seymour proposed "The Health of his Majesty." The King replied in English, and proposed a toast "To her Majesty Queen Victoria and the Prosperity of the English Nation," of whom, he said, he retained a very agreeable recollection.

Myrmidon, Com. the Hon. R. Hare, arrived at Rio de Janeiro on March 4, was coaling, and would leave at once for Spithead.

Narcissus, Capt. Lord Charles Scott, flagship of Rear-Admiral Lambert, C.B., was in Simon's Bay on Feb. 26. The ships of the squadron were refitting and giving leave, and would probably leave for England on March 8.

Nymphe, Capt. S. P. Townsend, sailed from Sydney on Jan. 25 for King George's Sound and Fremantle, W.A.

Orontes, Capt. E. Seymour, arrived at Port Louis, Mauritius, on Feb. 16; she would not carry out reliefs there, but would proceed shortly after Feb. 19 to Natal with detachment of the 80th Regiment.

Pearl, Capt. L. Brine, arrived at Auckland on Jan. 30, all well, and was to leave on Feb. 1 for Spithead, *viâ* Cape Horn.

Philomel, Com. Henry H. Boys, was at Zanzibar on Jan. 28.

Raleigh, Capt. G. Tryon, C.B., sailed from Malta on March 15 for Salonica, to relieve the Swiftsure, and send her to Malta.

Ready, Com. S. Grove, paid off at Sheerness on the 27th inst.

Renard, Lieut.-Com. H. J. Pugh, was in New Zealand, according to the latest accounts, and would cruise amongst the Pacific Islands on the close of the hurricane season.

Ringdove, Com. U. C. Singleton, will pay off at Portsmouth on April 4, after having been employed on the China station upwards of eight years, having been commissioned at Portsmouth in October, 1868, and recommissioned at Hong Kong on February 1, 1873. During the last commission she sailed upwards of 38,000 miles, having been for the most part engaged in river service. She was recommissioned with a ship's company of eighty-eight, of whom only forty-four came back, the remainder having been invalided home, discharged, or deserted. The first summer, 1873, was spent up the Yang-tse-Kiang, during which time the thermometer in the shade never fell below 98 deg. In the interval Hang Chow was flooded by the river, the whole town being submerged, with the exception of the houses. At Christmas she sailed to Japan, where she remained a year, proceeding to Russian Tartary in the summer on a cruise with the Iron Duke, Midge, and other ships. She was present at Nagasaki during the Naga rebellion, the crew being kept in readiness to land on the approach of the rebels, the Governor having resolved to defend the place until the last. At the end of 1874 she returned to China, and rendered good service during the typhoon which occurred at Hong Kong on May 31, 1875, at which place she was stationed the whole of the summer. In November the ship was ordered to Singapore, and took part in the Perak Expedition, under Major-Gen. Colborne. She arrived in the Perak River on November 21, and left on the 7th of the following March, the crew being in the meantime stationed on shore for a month. Com. Singleton conveyed the Sultan Ismail and the regalia of Perak down from Penang to Singapore, after his capture, and delivered him over to the Maharajah of Johore. The next seven months were spent in the Straits of Malacca, and she returned to Hong Kong in June, 1876, Lieut. Kenyon Slaney dying during the passage. After three months on the Amoy station, the Ringdove left for home on December 19, encountering very stormy weather in the Mediterranean.

Sapphire, Capt. E. H. Murray, was to leave Auckland on Feb. 4 to cruise.

Sappho, Com. Noel N. S. Digby, was at Sydney on Feb. 9, and was to be freed from quarantine on Feb. 12. There had been no fresh case of small-pox since Jan. 19; the cases had been of the mildest type.

Sealark, Lieut. F. H. Haygarth, arrived at Plymouth on the 26th inst. from Gibraltar.

Serapis, Capt. Davidson, left Bombay on the forenoon of the 27th inst.

Simoom, Capt. R. G. Pasley, arrived at Jamaica on the 27th inst., all well.

Sylvia, Capt. B. W. Bax, went into dock at Hong Kong on February 7.

Tamar, Capt. W. H. Liddell, arrived at Malta on March 16, and left for Hong Kong on the 19th.

Thetis, Capt. T. Le Hunte Ward. The following are the details of the disablement of the Thetis:—Soon after leaving Port Said she encountered very heavy weather, and while steaming head to wind her engines suddenly began racing round. They were promptly stopped, and then it was found that her screw had slipped completely down. Fortunately, it was caught by the framework, but when docked at Malta everyone was astonished that it had not been altogether lost. It was also discovered that she had lost a large portion of her keel and the lower part of the rudder, when she recently grounded on the East African Coast.

Tourmaline, Commodore F. W. Sullivan, C.B., was in Simon's Bay on Feb. 26. He proposed to leave about April 17, after arrival of mail, which left England on March 23 for the West Coast of Africa. Letters should be sent to Cape Coast Castle after the latter date.

Undaunted, Capt. H. W. Brent, flagship of Vice-Admiral Sir R. Macdonald, was at Bombay on March 5.

Valorous, Capt. L. Jones, is ordered to embark navigating parties for the Griffin and Falcon at Birkenhead, and also for the Foxhound and Forward at Barrow-in-Furness; and after having conveyed navigating parties to those places, she is to return in company with those vessels to Devonport.

Vestal, Com. H. Hand, has been on a round of visits to the Red Sea ports, and was expected at Massowah at the end of February.

Victoria and Albert, Capt. Thompson, has been placed in dock at Portsmouth for survey and preparation for service.

Wolverene, Commodore Hoskins, was at Sydney on Feb. 9, and was to be out of quarantine on Feb. 12.

Wye, Staff-Com. W. W. Vine, sailed from Malta on March 20 for Portsmouth, with the paid off crews of the Helicon and Antelope. She arrived at Gibraltar on the 27th inst.

INSTITUTION OF NAVAL ARCHITECTS.

On Friday, the 23rd inst., the second sitting of the Conference of Naval Architects was held in the library of the Society of Arts, John-street, Adelphi, Lord Hampton, G.C.B., D.C.L., the president, presiding.

A paper was read by Mr. W. Froude on "Experiments upon the effect produced on the wave-making resistance of ships by length of parallel middle body."

Mr. Samuda, M.P., said he went for a trip in the little torpedo ship the Lightning, which is 83ft. long, and travels at a speed of 18 knots an hour, with a small draft of water, and propelled by a screw at the end of the rudder. When they were going at 13 knots there was a gigantic wave hanging at her stern, and which threatened to come over the deck of the vessel, but when they had got to the speed of 18 knots an hour the wave completely left them. He had built vessels which when they went 18 knots an hour had a wave following them which never left them, but rather increased as the speed increased. The Germans had built a fast torpedo ship, which was 250ft. long, 2,000 horse-power, and with a very small draft of water, to go at 17 knots an hour, the cost being £10,000. But she would go at a speed of 19 knots, which was to be accounted for by the fact that attention had been paid in her construction to the wave-resisting power.

Mr. Denny, of Newcastle, gave an instance of the effect of the power of the wave resistance in a steamship which was built by a friend of his, who experimented at great length, and found that no matter how much extra propelling power was exercised, she would not go faster than a certain rate, and the cause of this was found to be that the paddle-wheel was in the hole of the vessel, and, owing to the action of the waves, could not go any faster.

Mr. Reed, M.P., pointed out that the Tiethan, to which Mr. Samuda had referred, was a sea-going ship, whereas the Lightning was but a boat. The latter was a high-flying boat, which was only built for going, whereas the other had to take ground and resist ground, sometimes to carry large quantities of provisions and a large amount of rigging. Therefore, it was a fallacy to compare the two.

The *Civil Service Review* has heard with regret that the condition of certain portions of the main building of the Admiralty, Whitehall, is even worse than it had been originally believed. At least one gentleman is absent from blood poisoning brought on by the unhealthy state of the room in which his official work is performed. Grave rumours reach us, too, says the *Review*, as to the health of the Audit Office, Somerset House. We hear that one of the members of the staff of that department is at the present time laid up with typhoid fever, contracted in the discharge of his official duties; that others have been or are suffering from ulcerated sore throats; that strong representations have been made regarding the drainage of a portion of the building in which the department is located; and that to the evils incident to defective drainage may possibly have to be added those arising from the proximity of a school of anatomy in King's College, regarding which some discoveries, unpleasant, at any rate, to the Audit Office staff, were made a few months ago. Is it too much to ask the Government to order a thorough overhaul of the sanitary arrangements of all the buildings in which civil servants have to work?

Epps's Cocoa—Grateful and Comforting.—"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected cocoa, Mr. Epps has provided our breakfast tables with a delicately flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—*Civil Service Gazette.* Made Simply with Boiling Water or Milk.—Sold only in Packets labelled—"James Epps & Co., Homœopathic Chemists, London."

STATIONS OF HER MAJESTY'S SHIPS IN COMMISSION.

With the Dates and Ports of Commission.

(Corrected to the same date as the official "Navy List," which will be published April 1.)

ABOUKIR, 23, screw receiving-ship, Commodore Algernon McLennan Lyons, Jamaica. Recommissioned at Jamaica July 1, 1870.

Achilles, 16, screw armour-plated ship, Captain Sholto Douglas, Coast-guard ship, Rockferry. Commissioned at Devonport April 1, 1875.

Active, 10, iron screw-corvette, Capt. Sir W. N. Hewett, V.C., K.C.B., Portsmouth. Commissioned at Portsmouth Oct. 2, 1875. (Paying off.)

Alacrity, schooner, tender to Pearl, Lieut.-Com. W. U. Moore, Australia. Recommissioned at Sydney Jan. 1. 1877.

Albatross, 4, composite screw-sloop, Com. Ernest Rice, Pacific. Commissioned at Chatham Feb. 14, 1874.

Alberta, paddle yacht, Staff-Capt. David N. Welch, tender to Royal Yacht, Portsmouth.

Alexandra, 12, double-screw armour-plated ship, Capt. R. O'B. FitzRoy, Mediterranean. Commissioned at Chatham Jan. 2, 1877.

Amethyst, 14, screw-corvette, Capt. A. J. Chatfield, Pacific. Temporary flagship of Rear-Admiral De Horsey. Commissioned at Devonport July 1, 1873.

Antelope, 2, iron paddle-vessel, Lieut.-Com. E. Wingfield, Mediterranean. Recommissioned at Malta March 17, 1877.

Arab, 4, composite screw gunvessel, Com. F. S. Broughton, East Indies. Commissioned at Devonport July 2, 1875.

Argus, 5, paddle-sloop, Com. E. J. Jermain, North America and West Indies. To be recommissioned.

Asia, 4, guardship of Reserve, Capt. C. L. Waddilove, flagship of Rear-Admiral Sir F. L. M'Clintock, Portsmouth. Recommissioned at Portsmouth April 1, 1876.

Assistance, 2, iron screw troop-ship, Capt. Prattent, particular service. Commissioned at Portsmouth Dec. 1, 1875.

Audacious, 14, double screw, armour-plated ship, Capt. Colomb, flagship of Vice-Admiral A. P. Ryder, China. Commissioned at Chatham Sept. 1, 1874.

Aurora, 28, screw-frigate, Capt. H. D. Grant, C.B., Coast-guard ship, Greenock. Commissioned at Devonport May 8, 1874.

Avon, 4, double-screw composite gunvessel, Com. L. C. Keppel, West Coast of Africa. Commissioned at Portsmouth June 1, 1876.

Barracouta, 5, paddle-sloop, Capt. C. E. Stevens. Commissioned at Sheerness March 10, 1873. Sheerness (paying off).

Beacon, 4, double-screw composite gun-vessel, Com. H. Dunlop, South-East Coast of America. Commissioned at Chatham July 8, 1873.

Beagle, schooner, Lieut.-Com. C. Caffin, Australia. Recommissioned at Sydney Jan. 11, 1876.

Bellerophon, 15, armour-plated screw-ship, Capt. J. A. Fisher, flagship of Vice-Admiral Sir A. Cooper Key, K.C.B., North America and West Indies. Recommissioned at Halifax Sept. 27, 1876.

Bittern, 3, double-screw gun-vessel, Com. G. J. Anstruther, Mediterranean. Commissioned at Devonport July 4, 1871.

Black Prince, 28, armour-plated iron screw-ship, Capt. T. Lethbridge, Channel Squadron. Commissioned at Devonport July 29, 1875. (Ordered home).

Boscawen, 16, training-ship, Com. R. G. Kinahan, Portland. Recommissioned at Portsmouth Jan. 1, 1873.

Boxer, 4, double-screw composite gun-vessel, Com. Arthur Alington, Cape and West Coast of Africa. Commissioned at Chatham Dec. 11, 1876.

Brilliant, 8, training-ship for Naval Reserve, Inverness, tender to the Clyde.

Britannia, training-ship for Naval Cadets, Capt. W. Graham, Dartmouth. Recommissioned April 1, 1876.

Britomart, 2, gunboat, Lieut.-Com. J. Sulivan, Devonport.

Bullfinch, 3, double-screw gunvessel, Com. R. M. Lloyd, North America and West Indies. Commissioned at Sheerness July 13, 1874.

Cambridge, 29, gunnery-ship, Capt. the Hon. W. J. Ward, Devonport Recommissioned April 1, 1876.

Castor, 13, Naval Reserve drill-ship, Com. E. Pilkington, North Shields. Recommissioned Jan. 1, 1873.

Challenger, 8, screw-corvette, Capt. E. Hardinge, A.D.C., temporary flag-ship of Rear-Admiral Augustus Phillimore, Coast-guard ship, Harwich. (Will be relieved by Penelope.)

Charybdis, 17, screw-corvette, Capt. T. E. Smith, China. To be recommissioned.

Cherub, 2, screw gunboat, Lieut.-Com. F. R. Kemp, tender to Coast-guard ship, Harwich.

Clyde, 15, Naval Reserve drill-ship, Com. H. C. Best, Aberdeen. Recommissioned Jan. 1, 1873.

Cockatrice, 1, screw-gunboat, Com. A. J. W. Musgrave, Mediterranean. Recommissioned at Malta March 14, 1876.

Conflict, schooner, Lieut.-Com. J. G. Musters, Australia. To be recommissioned at Sydney.

Contest, 4, composite gunboat, Lieut.-Com. G. W. Allen, Cape of Good Hope and West Coast of Africa. Will shortly join N. American Squadron. Commissioned at Devonport April 22, 1875.

Coquette, 4, screw composite gunboat, Lieut.-Com. E. Shirley, Mediterranean Recommissioned at Malta Feb. 1, 1875.

Cracker, 4, double-screw composite gun-vessel, Commander C. H. Hawkins, South-East Coast of America. Commissioned at Portsmouth June 10, 1873.

Crocodile, 3, Indian troopship, Capt. P. R. Sharpe, Portsmouth. Recommissioned at Portsmouth Aug. 5, 1876.

Cromer, 2, screw-gunboat, Lieut. V. E Von Donop, tender to Achilles, Birkenhead.

Cruiser, 4, sailing-sloop, Com. John Hext, Mediterranean. Recommissioned at Malta March 14, 1876.

Curlew, 3, double-screw gun-vessel, Com. E. J. Church, China. Recommissioned at Hong Kong Dec. 1, 1874.

Cygnet, 4, screw composite gunboat, Lieut.-Com. R. F. Hammick, Cape of Good Hope and West Coast of Africa. Commissioned at Devonport July 8, 1875.

Dædalus, 13, Naval Reserve drill-ship, Com. W. H. St. Clair, Bristol. Recommissioned Jan. 1, 1873.

Danae, 12, screw-corvette, Capt. J. C. Purvis. West Coast of Africa. Commissioned at Portsmouth Sept. 20, 1876.

Daphne, 5, screw-sloop, Com. G. B. Evans. Recommissioned at Zanzibar April 1, 1875.

Dapper, 2, screw-gunboat, Lieut.-Com. T. E. Miller, tender to Britannia, Dartmouth.

Daring, 4, composite screw-sloop, Com. J. G. J. Hanmer, Pacific Commissioned at Chatham Sept. 29, 1874.

Dasher, 2, paddle-vessel, Com. A. F. FitzGeorge, Channel Islands. Recommissioned at Portsmouth April 1, 1876.

Defence, 16, iron screw-ship, armour-plated, Capt. R. P. Cator, Channel Squadron. Commissioned at Devonport Feb. 25, 1876. (Ordered home).

Devastation, 4, armour-plated turret-ship, Capt. F. W. Richards, Mediterranean. Commissioned at Portsmouth Jan. 9, 1873.

Diamond, 14, screw-corvette, Capt. G. S. Bosanquet, East Indies. Commissioned at Sheerness July 13, 1875.

Dryad, 9, screw-sloop, Com. J. E. Stokes, North America and West Indies. Commissioned at Devonport Aug. 13, 1874.

Duke of Wellington, 25, screw-ship, Capt. Hon. W. C. Carpenter, flagship of Admiral George Elliot, Portsmouth. Recommissioned Jan. 1, 1874.

Duncan, 31, screw-ship, Captain St. G. D'Arcy-Irvine, flagship of Vice-Admiral Henry Chads, Sheerness. Commissioned at Sheerness April 1, 1873.

Durham, 17, Naval Reserve drill-ship, Commander W. Howorth, Sunderland. Recommissioned Jan. 1, 1873.

Eagle, 12, Naval Reserve drill-ship, Com. A. F. M. Meyer, Liverpool. Recommissioned Jan. 1, 1873.

Eclipse, 12, screw-corvette, Capt. J. E. Erskine, North America and West Indies. Commissioned at Sheerness Nov. 19, 1873.

Egeria, 4, composite screw-sloop, Com. A. L. Douglas, China. Commissioned at Devonport Nov. 2, 1874.

Elfin, paddle yacht, tender to Victoria and Albert, Staff-Com. A. Balliston, Portsmouth.

Enchantress, 1, paddle yacht, Staff-Com. E. H. Hills, tender to Asia, Portsmouth.

Encounter, 14, screw-corvette, Capt. R. Bradshaw, North America and West Indies. Commissioned at Sheerness Aug. 21, 1873.

Endymion, 22, screw-frigate, Captain J. Moresby, Coast-guard, Hull. Commissioned at Sheerness Oct. 1, 1875.

Euphrates, 3, Indian troopship, Capt. W. H. Cuming, Portsmouth Recommissioned at Portsmouth July 1, 1876.

Eurydice, training-ship for seamen, Capt. M. Hare. Commissioned at Portsmouth Feb. 7, 1877.

Excellent, 13, gunnery-ship, Capt. F. A. Herbert, Portsmouth. Recommissioned April 1, 1876.

Express, 4, screw composite gunboat, Lieut.-Com. Hon. A. C. Littleton, Gibraltar. Commissioned at Devonport Aug. 10, 1875.

Fantôme, 4, composite screw-sloop, Com. T. M. Maquay, Pacific. Commissioned at Devonport Dec. 5, 1873.

Fawn, 4, screw-sloop, Com. W. J. L. Wharton, surveying vessel, East Coast of Africa. Commissioned at Chatham June 1, 1876.

Fervent, 2, screw-gunboat, Lieut. F. G. Dundas, tender to Dædalus, Bristol.

Fire Queen, iron paddle-vessel, Staff-Com. T. Pounds, tender to Duke of Wellington, Portsmouth.

Fisgard, 22, stationary ship, Staff-Com. W. H. Sharp, Greenwich. Recommissioned Nov. 2, 1869.

Flirt, 4, double-screw composite gun-vessel, Lieut. A. O'Rorke, tender to Aurora, Greenock.

Flora, 12, store ship, Com. H. J. F. Campbell, Cape of Good Hope. Recommissioned at the Cape Oct. 22, 1872.

Fly, 4, double-screw composite gun-vessel, Com. John Bruce, China. Commissioned at Devonport June 25, 1874.

Flying Fish, 4, composite screw-sloop, Com. H. F. Crohan, East Indies. Commissioned at Chatham June 18, 1874.

Foam, 4 screw composite gunboat, Lieut.-Com. R. W. Hope, South-East Coast of America. Commissioned at Sheerness May 20, 1874.

Fox, 2 screw store-ship, Staff-Com. J. G. Dathan, particular service. Recommissioned at Devonport April 1, 1876.

Frolic, 4, double-screw composite gun-vessel, Com. A. E. Dupuis, China. Recommissioned at Hong Kong April 20, 1876.

Ganges, 19, training-ship, Com. R. L. Byng, Falmouth. Recommissioned April 1, 1876.

Goshawk, 4, composite gunboat, Lieut. A. T. Bagge, tender to Revenge, Queenstown.

Growler, 4, double-screw composite gun-vessel, Com. Chas. E. Wilcox. Recommissioned at Hong Kong Feb. 17, 1877.

Hart, 4, double-screw composite gun-vessel, Com. Hon. H. N. Hood, China. Recommissioned at Malta Feb. 12, 1874.

Hector, 18, screw armour-plated ship, Capt. C. H. Simpson, Coast-guard, Southampton Water. Commissioned at Portsmouth June 4, 1875.

Helicon, 2, paddle despatch-vessel, Lieut.-Com. R. W. Stopford, Mediterranean. Recommissioned at Malta March 20, 1877.

Hercules, 14, armour-plated iron screw-ship, Capt. N. Bowden-Smith, flagship of Admiral the Hon. Sir J. Drummond, K.C.B., Mediterranean. Commissioned at Portsmouth April 1, 1875. (Ordered home).

Hibernia, 12, receiving-ship, Com. H. E. Stephens, flagship of Rear-Admiral Rice, Malta. Recommissioned at Malta April 1, 1877.

Himalaya, 3, iron-screw troop-ship, Capt. E. White, particular service. Commissioned at Devonport Oct. 22, 1874.

Hornet, 4, double screw gun-vessel. Com. H. N. Hippisley, China. To be recommissioned at Hong Kong.

Hotspur, 3, iron armour-plated ram, Capt. T. M. Jones, Mediterranean. Commissioned at Devonport June 3, 1876.

Immortalité, 28, screw-frigate, Captain   Detached Squadron. (Ordered home.)

Implacable, 16, training-ship, Com. C. S. Cardale, Devonport. Recommissioned at Devonport Jan. 1, 1873.

Impregnable, 22, training-ship, Capt. W. H. Edye, Devonport. Recommissioned April 1, 1876.

Indus, guardship of Reserve, Capt. C. Curme, flagship of Rear-Admiral Willes, C.B., Devonport. Commissioned April 1, 1876.

Industry, 2, screw iron store-vessel, Staff Com. Richard C. Dyer, Devonport. Commissioned at Devonport March 14, 1877.

Iron Duke, 14, armour-plated, double-screw ship, Capt. Rowley, Coast-guard ship, Kingstown. Commissioned at Devonport, Oct. 1, 1875.

Jackal, 2, iron paddle vessel, Lieut.-Com. H. A. Digby, West Coast of Scotland. Commissioned at Devonport May 23, 1876.

Juno, 8, screw-corvette, Capt. Poland, China. Commissioned at Sheerness Nov. 4, 1875.

Jumna, 3, iron-screw troop-ship, Capt. John D'Arcy, Portsmouth. Recommissioned at Portsmouth July 1, 1876.

Kestrel, 4, double-screw composite gun-vessel, Com. C. B. Theobald, China. Recommissioned at Hong Kong April 20, 1876.

Lapwing, 3, double-screw gun-vessel, Com. Sir W. Wiseman, China. Commissioned at Devonport Sept 15, 1874.

Liberty, 8, sailing-brig, Lieut. C. Johnstone, Devonport. Commissioned at Devonport Oct. 13, 1875.

Lily, 3, composite screw gun-vessel, Com. B. E. Cochrane, China. Commissioned at Devonport Aug 3, 1875.

Lion, 12, screw-ship, Lieut. E. H. Clarke, tender to Implacable, Devonport.

London, 2, screw-ship, Capt. T. B. M. Sulivan, Zanzibar. Recommissioned April 25, 1876.

Lord Warden, 18, screw armour-plated ship, Capt. Charles M. Buckle, Coast-guard ship, Queensferry. Commissioned at Portsmouth Dec. 21, 1876.

Lynx, 4, composite gun-vessel, Com. F. M. Ommanney, East Indies. Commissioned at Devonport June 9, 1875.

Magpie, 3, double-screw gun-vessel, Com. C. V. Anson, China. Commissioned at Devonport July 3, 1876.

Malabar, 3, Indian troopship, Capt. E. Kelly, Portsmouth. Recommissioned at Portsmouth July 1, 1876.

Mallard, 4, screw composite gunboat, Lieut.-Com. A. W. Warry, Cape of Good Hope and West Coast of Africa. Commissioned at Devonport March 7, 1873.

Martin, 10, sloop, Lieut. E. Hicks, Portsmouth. Commissioned at Portsmouth Oct. 18, 1875.

Midge, 4, double-screw composite gun-vessel, Com. H. Salmond, China. To be recommissioned at Hong Kong.

Minotaur, 17, armour-plated iron screw ship, Capt. Lord Walter Kerr, flagship of Vice-Admiral F. B. Seymour, C.B., Channel Squadron. Commissioned at Portsmouth Aug. 6, 1875. (Ordered home.)

Modeste, 14, screw-corvette, Capt. A. Buller, C.B., China. To be recommissioned.

Monarch, 7, armour-plated screw turret-ship, Capt. M. Culme-Seymour, Mediterranean. Commissioned at Portsmouth June 10, 1874.

Moorhen, 4, screw composite gunboat, Lieut.-Com. J. Hope, China. Commissioned at Devonport Feb. 10, 1876.

Mosquito, 4, composite screw gunboat, Lieut.-Com. R. H. Paul, China. Recommissioned at Hong Kong April 20, 1876.

Myrmidon, 4, screw gun-vessel, Com. the Hon. R. Hare, Pacific. Commissioned at Sheerness Oct. 24, 1872. (Ordered home.)

Nankin, 28, stationary ship, Capt. R. V. Hamilton, Pembroke. Recommissioned April 1, 1876.

Narcissus, 28, screw-frigate, Capt. Lord Charles Scott, flagship of Rear-Admiral Rowley Lambert, C.B., Detached Squadron. Commissioned at Devonport Oct. 9, 1872. (Ordered home.)

Nassau, 4, screw surveying-vessel, Com. R. H. Napier, China. To be re-commissioned.

Nereus, 2, store ship, Staff-Com. J. R. Petch, Coquimbo. Recommissioned at Valparaiso April 1, 1868.

Netley, 2, screw-gunboat, Lieut. J. L. Heane, tender to Favourite, Queensferry, N.B.

Newcastle, 31, screw-frigate, Capt. R. G. Douglas, Detached Squadron. Commissioned at Sheerness Sept. 21, 1874. (Ordered home.)

Nymphe, 9, screw-sloop, Capt. S. P. Townsend, Australia. Commissioned at Sheerness Jan. 5, 1875.

Opal, 14, screw-corvette, Capt. F. C Robinson, Pacific. Commissioned at Sheerness Jan. 10, 1876.

Orontes, 2, iron screw troopship, Capt. E. H. Seymour, particular service. Commissioned at Portsmouth Feb. 7, 1876.

Orwell, 2, gunboat, Lieut.-Com. R. H. L. Cornwall, Coast of Ireland. Recommissioned at Devonport Feb. 23, 1876.

Osborne, Royal paddle-yacht, Com. H. L. Pearson, Mediterranean. Commissioned at Portsmouth June 12, 1874.

Pallas, 8, screw-corvette, Capt. H. H. Beamish, Mediterranean. Recommissioned at Malta Dec. 8, 1875.

Pearl, 17, screw-corvette, Captain L. Brine, Australia. Commissioned at Portsmouth May 22, 1873. (Ordered home.)

Pembroke, 1, screw block-ship, Capt. J. C. Soady, flagship of Rear-Admiral Fellowes, C.B., Chatham. Recommissioned at Sheerness April 1, 1877.

Pert, 4, double-screw composite gun-vessel, Com. H. C. Aitchison North America and West Indies. Commissioned at Devonport July 1, 1875.

Pheasant, 2, screw gunboat, Lieut. T. Suckling, tender to Endymion, Hull.

Philomel, 3, double-screw gun-vessel, Com. H. H. Boys, East Indies. Commissioned at Sheerness Aug. 22, 1873.

Pigmy, 2, paddle-vessel, Staff-Com. Hewlett, tender to Duke of Wellington, Portsmouth.

Pioneer, 6, composite paddle-vessel, Lieut.-Com. E. Hotham, Cape of Good Hope and West Coast of Africa. Commissioned at Sheerness July 3, 1876.

Plover, 3, double-screw gun-vessel, Com. H. B. Stewart, North America and West Indies. Commissioned at Portsmouth June 1, 1876.

Porcupine, 1, paddle surveying-vessel, Staff-Capt. J. Parsons, tender to Fisgard.

President, 10, Naval Reserve drill-ship, Com. L. B. Solly, West India Docks. Recommissioned Jan. 1, 1873.

Raleigh, 22, iron screw-frigate, Capt. G. Tryon, C.B., Mediterranean. Commissioned at Chatham Jan. 13, 1874.

Rapid, 3, screw-sloop, Com. E. C. Drummond, Mediterranean. Recommissioned at Malta Feb. 1, 1875.

Renard, schooner, Lieut.-Com. H. J. Pugh, Australia. Recommissioned at Sydney Sept. 11, 1875.

Repulse, 12, screw armour-plated ship, Capt. F. W. Wilson, Pacific. Commissioned at Portsmouth July 9, 1872. (Ordered home.)

Research, 4, armoured screw-sloop, Capt. Earle, Mediterranean. Recommissioned at Malta Aug. 17, 1875.

Resistance, 16, screw armour-plated ship, Capt. C. W. Hope, Channel Squadron. Commissioned at Devonport July 9, 1873. (Ordered home.)

Revenge, 28, screw-ship, Capt. H. R. Wratislaw, flagship of Rear-Admiral Hillyar, C.B., Queenstown. Recommissioned July 1, 1876.

Rifleman, 4, double-screw composite gun-vessel, Com. F. S. Clayton, East Indies. Recommissioned at Bombay April 14, 1876.

Ringdove, 3, double-screw gun-vessel, Com. U. C. Singleton, Portsmouth. Recommissioned at Hong Kong Feb. 1, 1873. (Paying-off.)

Rocket, 4, composite screw gun-vessel, Lieut. Com. C. R. Harris, Pacific. Commissioned at Sheerness Sept. 9, 1874.

Rover, 18, iron screw-corvette, Capt. T. Barnardiston, North America and West Indies. Commissioned at Chatham Dec. 14 1875.

Royal Adelaide, 13, Capt. J. O. Hopkins, flagship of Admiral Sir T. Symonds, K.C.B., Devonport. Recommissioned Jan. 1, 1877.

Rupert, 4, double-screw iron-clad ram, Capt. W. J. Hunt Grubbe, C.B., Mediterranean. Commissioned at Chatham May 25, 1876.

Salamis, 2, paddle despatch-vessel, Com. F. W. Egerton, Channel Squadron. Commissioned at Devonport Aug. 29, 1876.

Sandfly, schooner, Lieut.-Com. J. J. Bell, Australia. Recommissioned at Sydney Jan, 11, 1876.

Sapphire, 14, screw-corvette, Capt. E. H. Murray, Australia. Commissioned at Devonport Aug. 9, 1875.

Sappho, 4, composite screw-sloop, Com. N. S. F. Digby, Australia. Commissioned at Chatham Aug. 26, 1874.

Seaflower, 8, brig, Lieut. R. H. Eyre, Portsmouth. Commissioned at Portsmouth Oct. 13, 1875.

Seagull, 3, double-screw gun-vessel, Com. M. Heron, Cape and West Coast of Africa. Commissioned Jan. 9, 1877.

Sealark, 8, brig, Lieut. F. H. Haygarth, Devonport. Commissioned at Devonport Oct. 13, 1875.

Serapis, 3, Indian troopship, Capt. G. D. Davidson, Portsmouth. Commissioned at Portsmouth Oct. 2, 1876.

Shah, 26, iron screw-frigate, Capt F. G. D. Bedford, Pacific. Commissioned at Portsmouth Aug. 14, 1876.

Sheldrake, 4, screw composite gunboat, Lieut.-Com. J. B. Haye, China. Commissioned at Devonport Dec. 16, 1875.

Simoom, 2, iron-screw troopship, Capt. R. G. S. Pasley, particular service. Commissioned at Devonport May 5, 1873.

Sirius, 12, screw-corvette, Capt. G. L. Sulivan, Cape of Good Hope and West Coast of Africa. Commissioned at Devonport Sept. 6, 1875. (Ordered home.)

Spartan, 12, screw-corvette, Capt. R. E. Tracey, East Indies. Commissioned at Sheerness June 15, 1876.

Spiteful, 6, paddle-sloop, Com. A. T Fowlett, West Coast of Africa. Commissioned at Portsmouth July 31, 1873. (Ordered home.)

Sprightly, paddle-vessel, Nav.-Lieut. W. J. Tregidgo, tender to Duke of Wellington, Portsmouth.

Squirrel, 8, sloop, Lieut. R N. Hamond, Devonport. Commissioned at Devonport Oct. 13, 1875.

St. Vincent, 22, training-ship for boys, Commander A. T. Brooke, Portsmouth Recommissioned April 1, 1876.

Sultan, 12, iron screw armour-plated ship, Captain H.R.H. the Duke of Edinburgh, K.G., Mediterranean. Recommissioned Feb. 25, 1876.

Supply, 2, iron screw-storeship, Staff-Com. Frank Inglis, Cape of Good Hope and West Coast of Africa. Commissioned at Chatham Dec. 16, 1873. (Ordered home.)

Swiftsure, 14, armour-plated screw-ship, Capt. J. K. E. Baird, Mediterranean. Recommissioned at Devonport April 18, 1875.

Swinger, 4, composite gunboat, Lieut.-Com. O. P. Tudor, China. Recommissioned at Hong Kong Feb. 17, 1877.

Sylvia, 3, screw surveying-vessel, Capt. B. W. Bax, China. To be recommissioned.

Tamar, 2, iron screw troopship, Capt. W. H. Liddell, particular service. Commissioned at Devonport Oct. 3, 1876.

Teazer, 4, double-screw composite gun-vessel, Com. C. Wodehouse, East Indies. Commissioned at Sheerness Oct. 7, 1875.

Terror, 8, screw armour-plated floating battery, Captain L. E. H. Somerset, Bermuda. Recommissioned Jan. 1, 1877.

Thetis, 14, screw-corvette, Capt. T. Le H. Ward, East Indies. Commissioned at Devonport Feb. 1, 1873, (Ordered home).

Thistle, 4, double-screw composite gun-vessel, Com. E. B. Pusey, China. Recommissioned at Hong Kong Dec. 1, 1874.

Topaze, 28, screw-frigate, Captain A. Thrupp, Detached Squadron. Commissioned at Devonport Oct. 9, 1872. (Ordered home.)

Torch, 5, screw gun-vessel, Com. R. H. Hamond, Mediterranean, Commissioned at Sheerness Jan. 5, 1871.

Tourmaline, 12, screw-corvette, Commodore F. W. Sullivan, C.B., Cape of Good Hope and West Coast of Africa. Commissioned at Sheerness Oct. 25, 1876.

Trincomalee, 15, Naval Reserve drill-ship, Com. A. J. V. Collins, Southampton. Recommissioned Jan. 1, 1873.

Triumph, 14, iron screw-ship, armour-plated, Capt. Parkin, Mediterranean. Commissioned at Devonport Nov. 12, 1873. (Ordered home.)

Tyrian, screw-gunboat, Lieut. A. H. Duthie, tender to Favorite, Queensferry.

Undaunted, 31, screw frigate, Capt. H. W. Brent, flagship of Vice-Admiral Macdonald, K.C.S.I., East Indies. Commissioned at Sheerness March 2, 1875.

Unicorn, 10, drill-ship for the Naval Reserve, Com. W. E. S. Brome Dundee. Recommissioned Jan. 1, 1874.

Valiant, 18, screw armour-plated ship, Captain N. Salmon, V.C., Coast-guard, River Shannon. Recommissioned April 1, 1876.

Valorous, 6, paddle-frigate, Capt. L. F. Jones, particular service. Commissioned at Devonport Feb. 26, 1875.

Vernon, torpedo school-ship, Capt. W. Arthur, Portsmouth. Commissioned April 26, 1876.

Vestal, 9, screw-sloop, Com. H. Hand, East Indies. Commissioned at Portsmouth July 14, 1875.

Vesuvius, double-screw torpedo-vessel, Capt Singer, Portsmouth tender to Vernon.

Victoria and Albert, 2, Royal paddle-yacht, Capt. Frank J. Thomson Portsmouth. Recommissioned Jan. 1, 1870.

Victory, 26, tender to Duke of Wellington, Portsmouth.

Victor Emanuel, 2, screw receiving-ship, Commodore G. Watson, Hong Kong. Recommissioned Dec. 1, 1874.

Vigilant, 2, paddle despatch-vessel, Lieut.-Com. H. C. Ryder, China. Commissioned at Portsmouth Sept. 1, 1874.

Vivid, paddle-vessel, Staff-Com. Edwin Wise, tender to Royal Adelaide, Devonport.

Volage, 18, screw corvette, Capt. Henry Fairfax, South-East Coast of America. Commissioned at Portsmouth July 6, 1874.

Vulture, 3, double-screw gun-vessel, Com. H. Washington, East Indies. Commissioned at Sheerness Dec. 28, 1876.

Warrior, 32, armour-plated iron screw-ship, Captain W. H. Whyte, Coast-guard service, Portland. Commissioned at Portsmouth April 1, 1875.

Wildfire, paddle-vessel, Staff-Com. R. L. Cleveland, tender to Duncan, Sheerness.
Wizard, 2, screw-gunboat, Lieut.-Com. C. Doxat, Mediterranean. Recommissioned Malta Feb. 1, 1875.
Wolverene, 17, screw-corvette, Commodore Hoskins, Australia. Commissioned at Sheerness Aug. 1, 1876.
Wye, iron screw storeship, Staff-Com. W. W. Vine, particular service, Commissioned at Chatham April 15, 1875.

Zephyr, 4, composite gunboat, Lieut.-Com. W. G. Le Cocq, North America and West Indies. Recommissioned at Halifax Sept. 27, 1876.

THE ARCTIC EXPEDITION.

Capt. Sir G. S. Nares, R.N., K.C.B., read a paper to a large audience at a meeting of the Royal Geographcal Society, held in the Theatre of the University of London on Monday evening, on the subject of the "Navigation of Smith's Sound as a Route towards the Pole." Sir Rutherford Alcock, C.B., the president, briefly introduced the subject matter of the meeting, and in doing so expressed regret at the loss the Society had sustained in the death of Admiral Sir E. Belcher, who had been associated with several of the first explorations of the Arctic Circle. Sir George Nares, who was warmly received, opened his paper by mentioning the several expeditions which had set out from England and America from 1852 to the present day, and the result of those explorations he described in detail, especially that of 1875, under his own command, remarking that sledge parties had made explorations over the whole of the shore as far as the expedition had reached, but they were unable to get any great distance across the ice away from the land. Whilst describing the route of the expedition from its entrance into Smith's Sound and the scarcity of life increasing as it proceeded to the high northern latitudes, he described the action of the currents upon the ice, a matter of the deepest interest to Arctic explorers. When the Polaris was in Robson's Channel in 1871-72 the ice was no doubt open, but because it was open at that time it did not follow that the ice in the Polar seas was open, but he would not be prepared to say that the ice there always remained unbroken as late as it did last season—the end of July. After touching upon the different classes of animal life met with by his expedition, he referred to the American expedition, remarking that great difficulty would be found in advancing much nearer the Pole than had already been attained, unless, indeed, the coast of Greenland, contrary to all expectation, was found to run northward beyond latitude 83 deg. 20 min. Admiral Colinson said that in order to navigate northward of Smith's Sound it was necessary to stick to the land, a fact which had been strongly proved by the late expedition. As to the motion of the ice, he agreed that it was a matter which must necessarily be studied if any further explorations were made. Admiral Richards had every reason to believe that the land ended at a considerable distance beyond the most northern point touched by the Polaris. He believed that Smith's Sound was closed as a route to the Pole, and he knew of no other route by which the Pole could be reached, although he did not say that there could not be another, but by sledge travelling he did not believe the Pole would ever be reached. After a few remarks from Admiral Ommaney, Capt. Fielding, the naturalist to the expedition, briefly described the animal life met with, and its diminution as the expedition proceeded northwards, and the absence of musk oxen he attributed to the fact of the stock having been exterminated by the Polaris expedition. Sir Henry Rawlinson said that he had always taken great interest in Arctic research, and believed that if any further progress were made towards the Pole it must be in the line of Spitzbergen, and at the same time he gave Sir George Nares credit for having made a *bonâ fide* geographical discovery. Sir Alexander Milne said that he was one of the Lords of the Admiralty at the time of the fitting out of the expedition, and he was bound to admit that it was sent with the object and the hope that the Pole would be reached. The idea was that the coast of Greenland trended northward, but when they came to encounter the great sea of frozen ice, and it was felt impossible to drag the sledges over the hammocky ice, it was found impossible to reach it from that point. He agreed that for Sir George Nares to have remained in Robson Channel would have been unwise, and that he had done the best thing in returning to England. There was no doubt that when the sledging expeditions were out under Com. Markham they knew they were a "forlorn hope." What had been gained was a very considerable contribution to our geographical knowledge. At the close of the discussion votes of thanks were accorded to Capt. Sir George Nares and the President.

The following remarks on Volunteer Marine Artillery for the defence of Bombay have been addressed to the *Bombay Gazette* by Nav.-Lieut. James, R.N. :—"It is well known that the defences of Bombay are very far from perfect. The present strength of garrison Artillery is not sufficient to work its own guns, so that, in the event of any sudden emergency, the two most powerful batteries in India—viz., the two turret-ships Abyssinia and Magdala, the first and most important line of defence for Bombay, would be perfectly useless, and might by chance be made most disastrous to the port by falling into an enemy's hands for want of qualified crews. And it is never known how soon these ships may be required. It is therefore proposed to raise a "Volunteer Marine Artillery" for one turret-ship, who would take and hold any who neared Bombay with any hostile intentions. Government, having been applied to for their permission, are pleased to call for "a muster roll of members, together with a report as to the conditions under which members are willing to perform the duty of Volunteers." Should the proposal to raise "a Volunteer Marine Artillery" for a turret-ship meet with the approval of the gentlemen of Bombay—and they will respond to the call by sending in their names and addresses to the undersigned—arrangements will be made for a general meeting for the purpose of drawing up the necessary details for the development of the scheme, such as conditions, appointing officers, uniform, and accoutrements, &c. The turret-ships are each armed with four 10-inch 18-ton M.L.R. in two turrets. The gun drill is very simple and easy, and the gunners of the ships are qualified instructors. From 80 to 100 Volunteers would be required for one turret-ship."

FURNISH ON THE NEW HIRE SYSTEM.—The "New Hire System" is quite distinct from anything yet attempted. Houses furnished throughout. 20 Wholesale Houses to select goods from. "An excellent idea."—"Army and Navy Gazette." Prospectus, with Press opinions, post-free. General Furnishing Company—Offices, 9, Southampton-street, Strand.

FIRST APPOINTMENTS TO THE ROYAL MARINES.

ARTILLERY.

The following revised regulations for admission to the Royal Marine Artillery have been issued by the Admiralty :—

1. Admission to the Royal Marine Artillery as probationary lieutenants will be granted to the successful candidates in order of merit (according to the number of vacancies) at the open competitive examination for admission to the Royal Military Academy at Woolwich. The examinations will be conducted by the Civil Service Commissioners, and will be held twice a year, namely, in July and December.

Candidates who have received permission from the Horse Guards to attend the examination, and who are desirous of obtaining an appointment in the Royal Marine Artillery, should send in their names to the Secretary of the Admiralty, to whom all inquiries on the subject should be addressed.

2. The limlits of age will be from sixteen to eighteen, the candidates being required to be within those limits on the 1st day of the Jan. next following for the winter examination, and on the 1st of July for the summer examination. They must be 5ft. 5in. in height.

3. The successful candidates will be appointed lieutenants an probation. They will proceed to the Royal Naval College, Greenwich, on Oct. 1, and after the Easter vacation.

4. Two examinations of probationary lieutenants will be held in each year at the Royal Naval College, Greenwich. Those who pass a satisfactory examination at the end of the first session after entry will remain at the College for another session, at the end of which they will be again examined, and, if they pass satisfactorily, will receive commissions in the Royal Marine Artillery, in order of merit, bearing date from the time they received their probationary appointments.

5. Probationary lieutenants who do not pass a satisfactory examination at the end of the first session after entry will be finally excluded from the Royal Marines. Those who, after passing the first examination, finally fail to qualify for the Royal Marine Artillery, may receive commissions in the Royal Marine Light Infantry, bearing the same date as the Infantry officers who passed the Army examination at the same time, but be posted below them.

6. Artillery officers will be posted on the list of their corps in the order in which they pass their final examination at Greenwich.

7. Officers of the Royal Marine Artillery on probation will receive 5s. 3d. a-day. Those who are permitted to remain after the first session will be allowed 1s. 6d. a-day mess allowance, until the expiration of their period of study at Greenwich.

8. Officers, on passing out, will be attached to H.M.S. Excellent, for a course of gunnery and torpedo instruction, on the conclusion of which they will join head-quarters, and be instructed in their drill and military duties for service ashore and afloat.

9. Each successful candidate, at the examination for entry, must deposit the sum of £80 with the Accountant-General of the Navy before he can be appointed lieutenant on probation for the Royal Marine Artillery, to provide for his equipment at the Royal Navy College, and on joining his division.

10. The uniform of officers on probation will be blue patrol-jacket, blue working-jacket, blue mess-jacket, and scarlet waistcoat, *undress* trowsers, sword, sword-belt, and forage-cap.

LIGHT INFANTRY.

1. Admissions to the Royal Marine Light Infantry will be granted to the successful candidates, in order of merit (according to the number of vacancies), at the open competitive examinations for admission to the Royal Military College at Sandhurst.

The examinations will be conducted by the Civil Service Commissioners, and will take place twice a year, in the months of July and December.

Candidates who have received permission from the Horse Guards to attend the examination, and who are desirous of obtaining an appointment in the Royal Marine Light Infantry, should send in their names to the Secretary to the Admiralty, to whom all inquiries on the subject should be addressed.

Age, &c.

2. The limits of age for candidates for admission by competition will be from seventeen to twenty; for students of the Universities, who shall have passed the Interim Examination, from seventeen to twenty-one; for graduates of the Universities who shall have passed the examination for the degree of B.A. or M.A., from seventeen to twenty-two; and for lieutenants from the Militia, who are eligible for commissions in the Army as lieutenants, and are recommended by the Horse Guards, from nineteen to twenty-two. They must be 5ft. 5in. in height.

3. Candidates must be within the prescribed limits of age on the following dates :—Candidates for admission by competition, on Jan. 1 next following the winter examination, and on July 1 for the midsummer examination. Lieutenants from the Militia on May 1 of the year in which they are recommended for a commission.

4. The successful candidates will be appointed lieutenants in the Royal Marine Light Infantry, and will be posted on the list of their corps in the order in which they passed their examination. They will join their respective divisions at once, and be instructed in their drill and military duties for service ashore and afloat. They will also undergo a course of garrison or military instruction.

5. Each successful candidate at the examination for entry must deposit the sum of £80 with the Accountant-General of the Navy before he can be appointed lieutenant in the Royal Marine Light Infantry, to provide for his equipment on joining his division.

We learn authoritatively, says the *Western Morning News*, that the superior certificates gained by assistant-engineers, who pass through a course of study at the Royal Naval College, after the termination of their training in the dockyards as engineer students, will, in future, reckon in all respects as time served as assistant-engineers, and accelerated promotion will be given to those engineers who have very specially distinguished themselves in their studies at the Royal Naval School of Architecture and at the Royal Naval College. The relative ranks and certain grades of engineering will also be altered.

ADMIRALTY CIRCULAR.

The following Circular (Fleet Circular No. 4 M., March 12, 1877) respecting the interchange of visits between officers of British and foreign men-of-war has been issued by the Admiralty :—

My Lords Commissioners of the Admiralty having had their attention called to the desirability of issuing instructions with regard to the interchange of visits between officers of her Majesty's ships and those of such men-of-war as they may from time to time fall in with, and their Lordships having communicated, through the Foreign Office, with the various maritime Powers on the subject, are pleased to direct that the following procedure, in which the maritime Powers generally concur, shall for the future be observed in all ports, whether British or foreign, by the commanding officers of her Majesty's ships and vessels. Preliminary visit:—The flag or other officer in command of one or more ships of war in port, whatever may be his rank, will, upon the arrival of any ship or ships of war of another nationality, send an officer to such arriving ship, or in case of a fleet or squadron, to the ship of the officer in chief command of it, to offer the customary courtesies. The captain of the ship to which this visit is paid will send an officer to return it. Official visit:—Within twenty-four hours of the arrival, the flag or other officer in command of the arriving ship or ships, will visit the officer in chief command of the fleet, or squadron, or single ship of war, as the case may be, of another nationality present at the port, if he be his equal in grade, and the visit will be returned within twenty-four hours of being paid. In the case of officers of different grades, the inferior will pay the first visit, the same limits of time being observed as to the visit and its return. The grades are :—Admiral, vice-admiral, rear-admiral, commodore, captain, commander, lieutenant, or other commanding officer. Officers of superior rank will return calls as follows :—All flag officers, including commodores, will return the visits of captains and those grades superior to captains. They will send their flag captains or commanders to return the visits of commanders, lieutenants, and other officers in command. Captains and officers of a lower grade will return the call of commanders and officers of inferior rank in command. In the case of a fleet or squadron arriving or being in port, and after the interchange of visits between the senior officers shall have taken place, the captain or other officers in command of the several ships of war arriving will call upon the captains or other officers in command of the ships of war in port, who will return the visits. Her Majesty's officers may expect that perfect reciprocity will be observed in similar circumstances by foreign naval officers in respect to these visits.—By command of their Lordships,

ROBERT HALL.

TELESCOPES WANTED.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Most naval men are now familiar with the sight of the Mission cutters and boats of the Missions to Seamen, 11, Buckingham-street, Strand, London, which are stationed in thirteen roadsteads and twenty-three harbours at home and abroad; and some officers, who are not likely to go afloat again, might be willing to give their telescopes to the Missions for the use of the chaplains and Scripture-readers working afloat. Would you, then, allow me to say that good telescopes would be very serviceable, and might be sent to yours, &c.,

WILLIAM DAWSON, Commander, R.N.

Missions to Seamen, 11, Buckingham-street,
Strand, London, W.C.

NAVAL HALF PAY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—The present Admiralty have shown a great desire to increase in every way the efficiency of the Service. They have, moreover, shown such breadth and liberality of view in some of their later acts that I am in hopes that one of the most crying evils of the day may shortly be dealt with in a comprehensive manner. I allude to the subject of "half pay" on the Captains', Commanders', and Lieutenants' Lists, "the evils of which," as was well said by a distinguished officer the other day, "it is impossible to estimate." The arguments in favour of finding continuous service for officers have been so often and so ably stated in your columns that it is unnecessary to repeat them here; one of the complaints so frequently urged against naval officers is their unfitness to superintend work in the dockyards or Steam Reserve. The subject was debated a few days ago in Parliament, and the Navy had much the best of it; still, no one will, I suppose, assert that naval officers are as fit for such work as they might be had they acquired earlier in their career some knowledge of the subject they are called upon to learn and superintend at one and the same time. The wonder is, not that they are not always equal to the work, but that, under such disadvantages, the duties are, on the whole, so efficiently performed. To remedy this state of things I would suggest that a certain number of officers should be employed in the dockyards under the Admiral-Superintendent. There is an ample and daily increasing field for their usefulness, and, apart from the saving of much physical drudgery to the over-worked superintendent, it would add immensely to the knowledge, and, therefore, ulterior usefulness, of the officer so employed. We should then have a trained and tried body of officers from whom to select the future superintendents. The appointment of officers to ships for some time before they are commissioned was a step in the right direction, but it requires expansion, and should be the universal rule for all ships commissioned in England. In the end it will be found the truest economy. The whole subject is one well worthy the consideration of the Government. It is only a strong Government that could carry out such a reform. If taken in hand difficulties will vanish, and one of the greatest drawbacks to the Service will have been removed—viz., a period of enforced idleness in the prime of life.—I am, &c.,

March 26, 1877. ONE OF THE UNWILLING IDLERS.

The Commander-in-Chief on the China station has been informed by the Admiralty that, when absolutely necessary, a limited number of Chinese may be employed as stokers on board ships engaged at the more distant parts of the station.—*Standard.*

Mr. J. Wylde, of the Strand, Charing-cross, and the Royal Exchange, has published an excellent map of the country around Dunstable, which is to be the scene of the Volunteer Review on Easter Monday.

THEATRES.

ADELPHI.—It is now some ten years since a drama called *True to the Core* was produced at the Surrey Theatre. It was written by Mr. A. B. Selous, an unknown author, and had won the prize annually given for a nautical play under the provisions of the eccentric will of the late T. P. Cooke. Afterwards it was transferred to the Princess's, and has finally found a resting-place on the time-honoured boards of the Adelphi, where it has met with a reception so favourable that a lengthened run may be expected. The piece is exactly suited to the traditions of the theatre; it is full of incident and heroism, of deep-laid plots and dangers by flood and field, all leading to a happy termination. The action takes place in the reign of Queen Elizabeth, at the stirring period of the Spanish Armada. The great people of the time rub shoulders with each other upon the stage; the Queen herself takes part in the plot; as also do Drake and Raleigh, Frobisher, and Walsingham. But the main interest centres in Martin Truegold, an honest Devonshire pilot, and his pretty wife Mabel, who become by a singular succession of accidents the means of saving their country. All the scenes developing the story are effective, and a remarkably sensational situation is made by a wreck on the rock of Eddystone, where the prime movers are exposed to imminent death by the rising of the tide. This is exceedingly well represented at the Adelphi, both by scene-painter and actors, and forms a highly exciting spectacle. The cast is exceptionally good. Mr. S. Emery appears as the rough old pilot, originally sustained by Mr. Creswick, and adds another to his already extensive list of deserved successes. He is ably seconded by Miss Rachel Sanger, who plays the young wife with the utmost delicacy and skill. This young actress has a happy knack of ingratiating herself with her audience, and seems to have become at a bound a great favourite with the patrons of the Adelphi. The other characters find able representatives among the members of the company, Miss Edith Stuart playing remarkably well as a gipsy, and Messrs. H. Sinclair, J. G. Shaw, H. Vaughan, H. Ferraud, and A. H. Warren winning golden opinions by their efforts in the service of the play. The famous children's pantomime, *Goody Two Shoes*, is now played as an introduction to the chief piece of the evening, and the combination renders the present programme at the Adelphi as attractive as it is unique.

DRURY LANE.—It was undoubtedly a plucky thing of Mr. Chatterton to run such a failure as *Haska* beyond the first week; but he has done it, and in a courageous spirit, which cannot be too highly commended. His course of proceeding has been to place the disastrous work at the top of the bill, and support it by revival after revival of well-known pieces. During the week the *Colleen Bawn* has been given in a highly effective fashion by the company just engaged in its representation at the Adelphi, the only change of note being that the part of Danny Mann is now sustained by Mr. Edmund Falconer instead of Mr. Shiel Barry. As Mr. Falconer played the part in the original cast, there is a certain attractiveness in the substitution which may make up for any histrionic deterioration. The piece has been well received, and the great sensation scene of the Water Cave has caused as much excitement and applause as ever.

SURREY.—At the close of the run of his exceedingly successful pantomime, Mr. W. Holland took a benefit on the afternoon and evening of Monday, when a most attractive programme was put forward. He had the assistance of the artists of the Princess's, Strand, and other theatres, besides many speciality performers, including Mr. F. Maccabe. But the joke of all was that the irrepressible "People's Caterer" appeared as clown in the comic scenes of the Christmas piece. Mr. Holland is by no means the worst clown we ever saw, and he is certainly the most substantial. It was worth a visit to the Surrey, if only to see him get through a trap. His spade dance was a real success, and in a novel kind of hornpipe he was greatly admired; but this feat must be seen to be appreciated, as the only description which can be given of it is that it takes place in a chair.

ST. GEORGE'S THEATRE.—The present programme has proved so highly attractive, that two extra morning representations of Mr. and Mrs. Reed's popular entertainment are advertised for Easter Monday and Tuesday next, when *Two Foster Brothers* and *A Night Surprise* will be repeated. Mr. Corney Grain offers a new edition of his very amusing *Five o'Clock Tea*.

M. Rivière, the popular conductor, has entered into an arrangement with the Directors of the Royal Aquarium, Westminster, to give a series of Saturday evening concerts, on a grand scale, commencing April 21.

THE BARRACOUTA AT SAMOA.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Can you tell me why the dispatches from Capt. C. E. Stevens, of H.M.S. Barracouta, relating to the skirmish between some of his ship's company and the natives of the Samoan Islands, were never published, and whether any inquiry is likely to take place concerning the loss of life, &c., which took place on March 13, 1876?—Yours, &c.,

A FRIEND OF ONE WHO LOST HIS LIFE IN THE SKIRMISH.

Portsmouth,
March 26, 1877.

[It was not a matter to be proud of, and there are probably good reasons, politically, for not ordering an inquiry.—ED. A. & N. G.]

BIRTHS.

GARDINER.—March 23, at Brecon, South Wales, the wife of Surgeon-Major W. A. Gardiner of a son.

KERR.—March 23, at 58, Cromwell Road, Lady Amabel Kerr of a son.

DEATH.

STRACHAN.—March 23, at Anerley, S.E., Lieut.-Col. W. H. P. F. Strachan, 1st West India Regt., aged 42 years.

ROYAL ITALIAN OPERA, COVENT-GARDEN.—Opening Night of the Season.—The nobility, gentry, subscribers, and the public are respectfully informed that the OPERA SEASON of 1877 will COMMENCE on Tuesday next, April 3, on which occasion will be performed Verdi's opera, UN BALLO IN MASCHERA. Amelia, Mdlle. D'Angeri; Ulrica, Madame Schalchi; Oscar, Mdlle. Bianchi; Renato, Signor Graziani; Angri, Signor Capponi; Armando, Signor Scolari; Silvano, Signor Raguer; Il Giudice, Signor Rossi; Un Servo, Signor Manfredi; and Il Ducca, Signor Pavani. Conductor, Signor Vianesi.

The Incidental Divertissement will be supported by Mdlle. Girod and the Corps de Ballet.

Previous to the opera the National Anthem, God Save the Queen, will be sung.

Boxes, stalls, tickets, and prospectuses may be had at the Box-office, under the portico of the Theatre, and at the principal Musicsellers' and Librarians'.

THEATRE ROYAL DRURY LANE.—Sole Lessee and Manager, Mr. F. B. CHATTERTON.—On Monday and during the week the performances will commence at 7 with the Operetta Bouffe of TEN OF 'EM. At 7.30, the romantic drama entitled HASKA. To conclude with the popular Irish drama of THE COLLEEN BAWN. Prices from 6d. to £4 4s. Doors open at 6.30, commence at 7. Box office open from 10 till 5 daily.

ROYAL POLYTECHNIC. — New Programme.—Ye WONDERFULLE TALE OF WHYTTYNGTON AND HYS CATTE. By Tifkins Thudd, Esq.; given by Mr. Seymour Smith.—HOUSEHOLD SCIENCE. A popular lecture, with interesting experiments, by Prof. Gardner.—BUDS AND LEAVES: a Spring Lecture. By Mr. J. L. King.—THE COMPOSITION OF LIGHT, with Illustrations. By Mr. J. L. King.—THE SEANCE, new edition. By the Polytechnic Medium.—Master Taylor, the premier Plate-Dancer and Artificial Clairvoyant.—Madame Hickson's COSTUME RECITALS, &c., &c. Admission to the whole, 1s.; schools and children under 10, 6d.; reserved stalls, 2s. 6d. Open from 12 till 5 and 7 till 10.

W. F. Donkin, Esq., M.A., F.C.S., Lecturer in Chemistry at the University Museum.
Alexander Macdonald, Esq., Ruskin Teacher of Drawing in the University of Oxford.
Dr. Hamann, Taylorian Teacher of German in the University of Oxford.
Mons. A. F. P. Manier, Teacher of French.
Archibald Maclaren, Esq. (Gymnastics).

PHYSICIAN.
Richard Fernandez Freeborn, Esq., M.D., F.R.C.P.

THIS COLLEGE is intended:—
(1.) To provide the best possible Education for the Sons of Officers.
(2.) To train and prepare Candidates (whether Sons of Officers or not) for Commissions in the Military Service.
(3.) To enable its Senoir Pupils to enter as Unattached University Students, and to take degrees.

Two Scholarships, of £30 and £20 per annum respectively for two years, have been placed at the disposal of the Board of Management by a gentleman interested in the success of the College.

The competition for these Scholarships will take place on the 10th of April, 1877, and is open to Sons of Officers and all who are preparing for the Military Service, whether sons of officers or not.

Candidates must be between the ages of 13 and 15.

The subjects of the examination will be such as are included in an ordinary public school education.

Copies of the Prospectus may be obtained from the Bankers, Messrs. Cox and Co., Craig's Court, London, S.W.; from Mr. Henry Naidley, the Secretary of the Company, 35, Lincoln's Inn Fields, W.C.; or from the Governor, Military College, Cowley, Oxford, who will supply information as to the admission of Students and the competition for Scholarships.

ACCIDENTS BY FLOOD AND FIELD.
ACCIDENTS OF ALL KINDS
May be provided against by a Policy of the
RAILWAY PASSENGERS' ASSURANCE COMPANY,
HON. A. KINNAIRD, M.P., Chairman.
SUBSCRIBED CAPITAL, £1,000,000.
ANNUAL INCOME, £205,000.

MEMORIAL to the late Captain W. C. CLAYTON, 9th Queen's Royal Lancers.—A Committee, with Major-General Sir A. Little, K.C.B., as President, has been formed with a view of promoting some memorial to the memory of the late Captain W. Clayton Clayton, 9th Lancers, who died at Delhi, in India, from the effects of an accident while playing polo on the 25th December, 1876. The Committee are unable to give any definite idea of the form the memorial may take, as it must depend materially upon the amount of the subscriptions. A list of subscriptions already received, and any further information, can be obtained on application to the Hon. Sec., Captain Robert Barton, Coldstream Guards, 4, Cleveland Square, St. James's, S.W., and subscriptions may be paid either to him or to Messrs. Cox and Co., Craig's Court, who have consented to act as Treasurers.

THE WANDERERS' CLUB, PALL MALL.

The subscription of members joining from this date will extend to May 1, 1878.

The *entrance fee* remains at present at ten guineas. The annual subscription is—Town members, eight guineas; country members, four guineas.

At a Meeting of the Committee, held on the 20th November, *Lord Brougham and Vaux* in the Chair, the Report stated that since the issue of the Annual Report in May last, 160 New Members had joined the Club, and that the total strength is as follows:—

Town Members	426
Country Members	663
Officers on Foreign Service	104
Members Resident Abroad	109
	1,302

The Club has increased to this date to 1,410 members.

For Book of Rules and further particulars apply to Major T. P. KENNAN, Secretary.

Pall Mall, 1877.

JUNIOR NAVAL AND MILITARY CLUB, PALL MALL.

PATRONS.

Field-Marshal H.R.H. the Prince of Wales, &c.
Captain H.R.H. the Duke of Edinburgh, R.N., &c.
Field-Marshal H.R.H. the Duke of Cambridge, &c.
President—Admiral Hon. Sir Henry Keppel, G.C.B., &c.
Vice-President—Lieut.-General Sir Alfred H. Horsford, G.C.B., &c.

The entrance fee to this Club is, *for the present*, 10 guineas. Annual subscription, 8 guineas. Officers who are or have been in Army, Navy, Militia, or Yeomanry are eligible for election.

C. H. J. COLLINGS, Secretary.

Feb. 21st, 1877.

NAVAL AND MILITARY CLUB, 94, Piccadilly.—Members are informed that for the ensuing months they have been elected honorary members of the following Clubs by the courtesy of their several committees, viz., East India United Service, Oriental, Raleigh, Junior Naval and Military, Junior Army and Navy, Verulam, Buckingham, Wanderers, Hanover Square.

ROYAL MILITARY ASYLUM, Chelsea.—Required, a non-commissioned officer discharged, or about to be discharged, from the service, without family, who possesses a certificate of qualification as gymnastic instructor, to fill the appointment of Sergeant Gymnastic-Instructor at the above Institution. Applications, either personally or by letter, to be made to the Commandant,

---

THE STAFFORD HOUSE COMMITTEE for the RELIEF of SUFFERING among the TURKISH SOLDIERS.—Chairman, the Duke of SUTHERLAND, K.G.—Communications to be addressed to T. Gibson Bowles, Esq., Hon. Sec., 2, Harriet Street, Lowndes Square, S.W.

Subscriptions will be received by Major-General Sir Henry Green, Hon. Treasurer, Stafford House, S.W.; by Messrs. Drummond and Co., Charing Cross; Messrs. Smith, Payne, and Co., 1, Lombard Street; Messrs. Barnetts, Hoares, and Co., 62, Lombard Street; and by Messrs. H. S. King and Co., 45, Pall Mall, and will be acknowledged in the published list.

The Right Hon. the Lord Mayor has undertaken to receive subscriptions for the fund, which may be paid to him at the Mansion House.

Contributions are especially invited of blankets, warm jerseys, warm underclothing, and hospital linen, which will be received at Taylor's Depository, Pimlico, and should be labelled "For Relief of Suffering Turkish Soldiers."

BAUMGARTEN'S INVIGORATIVE NERVINE ESSENCE. A most powerful nutritive cordial, which restores to their normal condition all the secretions on the integrity of which perfect health depends.

Report by Dr. Hassall—"Having analysed the preparation to which Messrs. Baumgarten and Co. have given the name of 'Invigorative Nervine Essence,' I am of opinion that it is a combination well calculated, from its containing, among other ingredients, Pepsine and Phosphate of Soda, to prove most serviceable to the debilitated, the nervous, and the dyspeptic."

Price 8s. per bottle, or four quantities in one, 22s. Carriage free on receipt of remittance. Sole agents, BRANT and CO, 283, Strand, London, W.C.

NAVAL CADETSHIPS, &c.

"EASTMAN'S" ROYAL NAVAL ACADEMY,
BURGOYNE HOUSE, SOUTHSEA.
Principal, since 1860, G. EASTCOTT SPICKERNELL.

At the last two Naval Cadet Examinations pupils took the *First* Place. More than 1,000 pupils have entered her Majesty's Service.

The House is situated close to and directly facing the sea. Pupils have good Bathing and Boating, under careful superintendence.

Pupils are received from Nine years of age and upwards. To make the School specially adapted for Junior Pupils intended for the Royal Navy and the Public Schools, Senior Pupils are not now received.

NAVAL CADETS, ASSISTANT CLERKS, HOPE HOUSE, SOMERSET-PLACE, SOUTHSEA.

Principal—Mr. T. H. VICKERY.

In addition to the general course of study pursued at this long-established School, pupils are specially prepared for the examination required for the above.

At the competitive examination in November, 1875, and at the recent examination in June, of candidates for Assistant Clerkships, all the pupils sent up from this Establishment were successful.

BOURNEMOUTH.—Overton Hall.—The Rev. LOVELL J. PROCTER, M.A., assisted by five highly qualified English and Foreign Masters, receives a select number of boys for preparation either for the public Schools or Royal Navy. A few taken for more advanced tuition. Spacious school premises, with three acres of grounds, prettily situated near the sea. Particulars and prospectuses on application.

MALVERN COLLEGE.

The SECOND TERM will begin on MONDAY, May 7th.

UNITED SERVICES PROPRIETARY COLLEGE (Limited), Westward Ho! On the North Devon coast.—The above school now numbers nearly 200 boys. Sons of officers, naval or military, have the advantage of lower terms. For prospectus, curriculum, list of pupils, &c., apply to the Head Master or Secretary, Westward Ho! N. Devon. The next term begins May 3rd.

EDUCATION IN GERMANY.—A Prussian officer, whose pupils have all done well in the Competitive Army Examinations, has vacancies after Easter. For terms and references apply C. M., Treacher's Library, Brighton.

PARIS.—French HOME offered, in a Clergyman's family, to young gentlemen, for acquiring the French language. Address M. Pasteur Lalot, Military Chaplain, 265, Boulevard Pereire.

NAVAL CADETS' EXAMINATIONS.— A RETIRED NAVAL INSTRUCTOR can receive a few YOUNG GENTLEMEN into his house to prepare them for the above examinations. Terms and prospectus sent on application. References to Admirals and Captains with whom the instructor has served have been kindly granted. Address A. B. C., care of Willing, jun., Advertising Offices, 301, Strand, W.C.

CANTON de VAUD.—GENTLEMEN preparing for the Army or Navy, Universities, or Commercial life, can be RECEIVED into the family of an Oxford graduate on moderate terms, and can attend classes at a large college. Good boating; frequent walking excursions.—Apply, by letter, to "D. C. L., Oxon," care of Messrs. Dawson and Sons, 121, Cannon Street, London.

LITTLE ST. JOHN'S, Hurstpierpoint, in connection with St. Nicolas College, Lancing, and St. John's College, Hurstpierpoint, is established with the sanction and under the inspection of the Provost and Fellows of St. Nicolas College, for the *EDUCATION of LITTLE BOYS, from six* years of age, preparatory to their entering either of the above or other public schools. For particulars apply to the Lady Principal, Little St. John's, Ditchling, Hurstpierpoint, Sussex. *Boys are prepared* to pass the examination for Naval Cadets.

SCHOOL SHIP CONWAY, Liverpool.— Established for training Young Gentlemen with a view to their becoming officers in the Mercantile Marine. Terms, 50 guineas per annum, including uniform and all other extras. The sons of officers in the Navy and Mercantile Marine Service Association are received at the reduced rate of 40 guineas. *Quarter days*, when pupils can be admitted—February 1st, April 10th, August 1st, October 10th. Apply to Capt. E. B. H. Franklin, R.N., Rock Ferry, Birkenhead.

A DEVONSHIRE CLERGYMAN, farming his own estate, prepares pupils for Woolwich, the Universities, and Public Schools. A Professor of French and German attends daily. Unusual advantages for delicate boys. Terms, eighty guineas per annum. Address, M. A., Post Office, Ottery St. Mary.

RUPTURES (BY ROYAL LETTERS PATENT)

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 medical gentlemen to be the most effective invention for the curative treatment of hernia. The use of a steel spring, so often hurtful in its effects, is here avoided, a soft bandage being *worn* round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body, two inches below the hips, being sent to the manufacturer,

MR. WHITE, 228, PICCADILLY, LONDON.

Price of a single truss, 16s., 21s., 26s. 6d., and 31s. 6d.; post free. Double ditto, 31s. 6d., 42s., and 52s. 6d.; post free. An umbilical ditto, 42s. and 52s. 6d.; post free. Post-Office Orders to be made payable to JOHN WHITE, Post Office, Piccadilly. Every description of RIDING BELTS, ELASTIC STOCKINGS to draw on, and ELASTIC SILK SUSPENDERS, on new and improved principles.

JOHN WHITE, Manufacturer, 228, Piccadilly London.

ST. LAWRENCE-ON-SEA, NEAR RAMSGATE.

THE "GRANVILLE" HOTEL.

THE "GRANVILLE" PRIVATE SPECIAL EXPRESS TRAINS to ST. LAWRENCE-ON SEA, near Ramsgate, in 1 hour and 40 minutes. Departures every Friday, from Charing Cross at 3.45, and Cannon Street at 3.55 p.m. (See bills.)

THE "GRANVILLE" HOTEL. The "Morning Post" says:—"Nowhere in England can a series of baths such as that at the 'Granville' be seen."

THE "GRANVILLE" HOTEL. The "Globe" says:—"As a residential hotel during winter, the 'Granville' is second to none."

THE "GRANVILLE" HOTEL. The "Saturday Review" says:—"The scenery, the air, the accommodation for visitors were described as of the most perfect kind; and we could not help wondering how it was that this place, which had been in existence in a quiet way for several years, had suddenly, like Byron, gone to bed and awoke famous."

THE "GRANVILLE" HOTEL. "Land and Water" says:—"The 'Granville' Hotel is likely to become a popular winter resort, not only for invalids, but also for those seeking a few days' relaxation from work."

THE "GRANVILLE" HOTEL. "Mayfair" says:—"The proprietor of the hotel, which has carried the name of St. Lawrence-on-Sea to the utmost ends of the earth, has energetically and judiciously lavished a fortune, first in making the 'Granville' Hotel one of the most charming seaside residences in the Kingdom, and next in bringing the fact under the notice of the public."

A. J. BODDINGTON, Secretary.
17 Prince Albert Street, Brighton.

HOLLOWAY'S OINTMENT and PILLS.—Fear not.—Though surrounded by circumstances disadvantageous to health, these remedies, properly applied, will cut short fevers, influenza, inflammation, diphtheria, and a host of other complaints always lurking about to seize on the weak, forlorn, or unwary. The superiority of Holloway's Medicines over others for subduing disease has been so widely and fully proved that it is only necessary to ask the afflicted to give them a trial, and if the instructions folded round them be followed, no disappointment will ever ensue, nor dangerous consequences result. In hoarseness and ulcerated sore throat the Ointment should frequently be rubbed on the neck and upper part of the chest; it will arrest the increasing inflammation, allay disquietude, and gradually cure.

Established for upwards of half a century on the Credit System, but now conducted exclusively for Ready-Money Payment and supplying

UNIFORMS AND MUFTI

Of precisely the same high-class quality as heretofore
AT GREATLY REDUCED PRICES.

ESTIMATES ON APPLICATION.

MAJOR CREASE'S PATENT SELF-REGULATING, CLEANABLE
CHARCOAL FILTER
Has been universally adopted in the
Royal Navy, East Indian and English Transport Services; the German, Russian, American, and Austro-Hungarian Navies;
ALSO BY
HER MAJESTY'S WAR DEPARTMENT,
For BARRACKS, HOSPITALS, CAMPS, &c., &c.
And for which Patents have been granted by the *Governments of Great Britain*, the United States of America, Italy, France, and Canada to Major Crease, Sole Patentee of the Self-regulating, Cleanable Filter.

The designs are of three classes—
1.—For dwelling rooms and halls. To suit different styles of furniture three types have been employed—the Classic, the Japanese, and the Mediæval. None of these forms have been before employed for Filters.
2.—Those of simpler and cheaper designs for kitchen use.
3.—Filters of galvanized iron, either to fix to mains or cisterns, which, being capable of being made of any size, can supply pure water in sufficient quantities for the largest hospital or hotel.
The Filters, being made of special sizes, all their parts are interchangeable.

Full particulars can be obtained on application to
MESSRS. GARDNER AND SONS,
Sole Manufacturers of the Land Filters,
453 & 454, STRAND; and 3 & 4, DUNCANNON STREET, LONDON.

OVERLAND ROUTE and SUEZ CANAL. Under Contract for the conveyance of the Mails to the Mediterranean, India, China, Japan, and Australia. The Peninsular and Oriental Steam Navigation Company dispatch their Steamers from Southampton, *via* the Suez Canal, every Thursday; from Venice every Friday; and from Brindisi, with the Overland Mails, every Monday.

Offices—122, Leadenhall-street, E.C., and
25, Cockspur-street, S.W.

HALL LINE.—STEAM from LIVERPOOL to BOMBAY, via SUEZ CANAL.—Average passage, 26 days, including all detentions. Sail punctually as advertised.

Passengers booked at through rate from London, via Genoa, Naples, and Alexandria (Rubathino Line), joining the "Hall" steamer at Suez. Full particulars on application.

The magnificent fast steamship BRANKSOME HALL, 2,100 tons, 300 horse-power nominal, sailing April 10. This steamer has been specially adapted for the East India trade. Her saloons and state-rooms are spacious and well-ventilated, and the accommodation is unsurpassed. Only first class passengers taken. Fare from Liverpool, 45 guineas, Surgeon and stewardess carried.

Succeeding steamers:—
City of Baltimore .... 30th April.
Childwall Hall .... 15th May.
Trentham Hall .... 30th May.

For passage apply in London to Henry S. King and Co., 65, Cornhill, and 45A, Pall Mall; or for freight and passage to ALEXANDER and RADCLIFFE, 8B, Liverpoo and London Chambers, Exchange, Liverpool.

H. PEAT,
SADDLER AND HARNESS MAKER,
14, OLD BOND-STREET,
HAS REMOVED TO 173, PICCADILLY.
Opposite Burlington Arcade

HORSES.—GENTLEMEN PROFESSIONALLY ASSISTED in the SELECTION of HORSES. Examined as to soundness. Tattersall's and other sales attended by WILLIAM SEWELL, M.R.C.V.S., 53, Elizabeth Street, Eaton Square, S.W.

SPECIAL NOTICE

TO OFFICERS IN HER MAJESTY'S ARMY, NAVY, AND AUXILIARY FORCES.

THE FINE ART UNION.

GRAND PRIZE ENGRAVINGS.

All Subscribers to the Army and Navy Gazette will be entitled to One Pair of Engravings from the celebrated Pictures by R. Ansdell, Esq., R.A., viz.:—

"THE ENGLISH GAMEKEEPER,"

AND

"THE SCOTCH GAMEKEEPER,"

Engraved in the best style by F. Stackpool. Size of Plates, 40 by 27.

These Engravings were Originally Published at Four Guineas, and are now Issued to Subscribers of this Journal for FIVE SHILLINGS EACH.

"THE ENGLISH GAMEKEEPER."

In this picture, Ansdell, the well-known R.A., presents us with the real type of an English Gamekeeper. In the midst of a stretch of land, possessing all the characteristics of an excellent retreat for all kinds of game, is seen the dark shadowed figure of the Gamekeeper, who is wonderfully relieved by the lighter portions of the attendant hounds, and the snowy plumage of the dead game.

The entire subject is handled in a manner that could only be expected from true genius, and is destined to give the greatest satisfaction to all subscribers.

"THERE IS NO PLACE LIKE HOME."

FROM THE CELEBRATED PICTURE

Painted by Sir EDWIN LANDSEER.

This picture was suggested to the artist's mind by the poet who sang "Home, Sweet Home," and who, curiously enough, was himself homeless. The "home" of the picture is an old barrel converted, by the removal of a portion of its head, into a kennel. The expression of the sentiment that gives the title to the picture is a dog, who, having strayed from home, and "learned by suffering what is taught in song," has returned. The chiara obscura of this lovely engraving is perfection. It has been remarked that this greatest of all animal painters, Sir Edwin Landseer, threw more than human expression into the faces of his animals, and this is eminently true, as may be seen by the merest glance at "There is no place like home." The purchasers of this picture will, for a mere trifling sum, possess one of the most artistic and natural representations of dog life that has yet left the hands of the engraver. It is replete with interest, being executed by an engraver who fully understood the master whose roduction he undertook to reproduce.

"THE SCOTCH GAMEKEEPER."

This is the companion picture to "The English Gamekeeper," and like it an effort of true genius.

The scene is a Scotch Moorland, in the foreground of which the Scotch Gamekeeper occupies the central position. Totally different from his English confrere, he is every inch a Scotchman; and while waiting for his master is toying with one of the two hounds in attendance. The Dead Game—the splendidly-formed dogs—and the amount of character thrown into the face of the Gamekeeper, make the whole a grand study.

Both plates are engraved by F. Stackpool, which is sufficient to prove that full justice has been done to a truly marvellous conception.

"THE LION DOG FROM MALTA."

FROM THE CELEBRATED PICTURE

Painted by Sir EDWIN LANDSEER.

To say a word in praise of Landseer is like painting the lily or gilding fine gold. "The Lion Dog from Malta" represents the last of a grand race of dogs now extinct. With true artistic perception, Sir Edwin, as a sort of foil, has introduced a miniature toy dog by its side, which has the effect, by contrast, of heightening the nobility of a truly noble animal. Like his inimitable lions at the base of Nelson's Column, the features of the dog exhibit strength in repose. A mouse in the foreground, under the shelter of some drawing instruments, is stealthily seeking a meal in some scattered fragments left by the artist or the dainty little pet. This picture will be preferred by many to several of his larger pictures, grand as they may be, for every lover of dumb animals will see something in it to wonder at and admire

ON Tuesday next the House of Commons will practically be asked to redress an act of injustice inflicted on a British officer. That officer was the famous Lord Cochrane, celebrated alike for skill and daring in his profession, for inventive genius, for the oppression of which he was the victim, and for the courage with which he bore "the stings and arrows of outrageous fortune." Dying, he bequeathed as a sacred legacy to his grandson the task of obtaining a completion of the redress which had been given him. The present Lord Cochrane, as soon as he was of age, set about carrying into execution his grandfather's wishes, and, at length, presented a petition to the Queen. Parliament will now be asked to refer this petition to a Select Committee; and we happen to know that not only the senior officers of the deceased hero's own profession, but, also, members of both political parties, are anxious that the fair fame of the country should be cleared from the stain which must disfigure it so long as any of the wrongs inflicted on Lord Cochrane remain unredressed. The petition lies before us. It is a simple but pathetic document, asking for justice with calmness and moderation, but with earnestness. The first of the chain of events to which it refers took place three-quarters of a century ago. We shall, therefore, briefly recapitulate the facts of the case. The late Earl of Dundonald, better known as Lord Cochrane, was one of the most brilliant Captains in the great war with France. His exploits were notable for their combined audacity and success and the skill with which they were executed. We should fill this paper were we to attempt to give a sketch of all of them, and shall, therefore, only touch on the most prominent. In command of a brig, the Speedy, he, with a crew of fifty-four men, captured, by boarding, after a fierce engagement, the Spanish frigate El Gamo, "whose tonnage"—to quote from the petition—"was four times that of the British vessel, whose crew was six times as numerous, and the weight of whose armament was seven times as great." In the action "the number of the enemy killed exceeded the total number of the British crew; the loss on Lord Dundonald's ship consisted only of four men killed and seventeen wounded." During the time he commanded this brig he took or destroyed vessels of war mounting an aggregate of 122 guns, he retook nine vessels, and, in conjunction with other ships, captured eleven privateers, gunboats, and merchantmen. Indeed, he inspired such terror, that Napoleon christened him "le Loup de Mer." In the Pallas, of 32 guns, he performed many brilliant exploits. On one occasion the boats of his frigate cut out a French guardship moored on the Garonne, though supported by two other men-of-war. During the absence of the boats with all the crew, save forty, he attacked two French corvettes, of 22 guns each, and a large French frigate, all of which he drove on shore. In the Impérieuse, of 44 guns, he so harassed the north-eastern coast of Spain and the southern coast of France that he greatly impeded military operations. Landing at Rosas, he defended the fort of Trinidad, considered untenable, for a whole month against a large French force. His greatest feat was, however, the attack of the French Fleet in Basque Roads with fire and explosive vessels. The idea was his own, and he was entrusted with its execution. The result included the destruction of five large French ships. Indeed, had Lord Gambier properly supported him, the whole French Fleet would have been destroyed. To commemorate this exploit of the British Fleet, a special medal was struck, and Lord Dundonald was honoured with the dignity of the Order of the Bath, an honour only once before conferred on an officer under the rank of Admiral. His complaint that Lord Gambier had shown want of energy on this occasion, together with Lord Cochrane's active endeavours as a member of Parliament to introduce some reforms in the Navy, made him many enemies, and in 1814 they contrived to bring about his conviction in a court of law of the offence of conspiring to affect the price of funds by means of a false report. The evidence against him was weak in the extreme, and it was soon almost universally admitted that he was entirely innocent. He was, however, found guilty, sentenced to imprisonment, a fine, degradation from the Order of the Bath, and to stand in the pillory. The latter penalty his foes dared not, in the face of public opinion, enforce. He was, however, expelled the Navy. Instead of being crushed by these unmerited calamities, he entered on a new career, and in the service first of Chili, and afterwards of Brazil, performed exploits not inferior in brilliancy to those which had already won him an honoured place in history. At length, in 1832, the Government of the day admitted his innocence, and the Crown restored him to that position in the Navy which he would have occupied had he never been expelled from it. Reparation, however, only came by degrees. It was not till 1847 that he was restored to the Order of the Bath and gazetted a Knight Grand Cross. In 1848 he was appointed to the command of the North American Station, and in 1854 his Royal Highness the late Prince Consort, whose noble nature sympathised with that of the persecuted hero, personally requested him to accept the office of one of the Honorary Brethren of the Trinity House. In 1860, soon after his death, her Majesty ordered that his banner should be replaced in Henry VII.'s Chapel. But one measure of reparation remained to publicly and distinctly mark the fact of his complete innocence of the crime imputed to him. This reparation was the grant of pay for the eighteen years during which he was banished from the "Navy List." Shortly before his death, Lord Dundonald wrote—"Sir Robert Wilson claimed his back pay as a right, consequent on his unjust deprivation, and obtained it. I have unceasingly done the same, not from the pecuniary value of the amount due, but from the consideration that its being withheld still operates as a stigma on my character and family, which is inconsistent with my restoration to the Service. My efforts have hitherto been without success." In his will he bequeathed the amount in question to his grandson, the present petitioner, and he now seeks, by obtaining it, the completion of the reparation to his grandfather for the unjust accusation and treatment, by which that noble sailor's life was blasted. We cannot believe that he will seek in vain. There is a precedent in the case of Sir Robert Wilson. That Lord Dundonald was unjustly treated is now denied by no one. His fame is as clear as day; it can scarcely have been made clearer; but the fame of the nation will remain stained until it be officially and emphatically recognised that a cruel wrong was inflicted on one whose exploits so richly illustrated the national history.

After a Session of about three months the French Chambers have gone on their holidays, having only voted three measures of general interest, one of which, that relating to requisitions, concerns the Army. It was hoped that new laws respecting the Staff and promotion would have been presented; but both these measures, essential to complete the reorganization of the Army, hang fire. We may observe, *en passant*, that no indiscreet questions respecting Eastern affairs have been put in the French Chambers, though France is much interested in contesting Russia's pretensions to exercise a protectorate over Christians in the East and in preventing our old Crimean adversary from finding his way to the Mediterranean. The First Napoleon, in order to gain the alliance of Alexander, made some concessions in the East which he tried to elude and which he always regretted, and he had hardly consented to the occupation of Moldavia and Wallachia before he made overtures to the Porte to drive the Russians out of the principalities *vi et armis*. On the subject of the Bill on requisitions, it is objected in France that the measure is very imperfect, for it only refers to piping times of peace, whereas it would be well to make the Administration depend on its own resources during the Autumn Manœuvres without having recourse to exceptional measures. It is asked why the country should be put to the annoyance and expense of requisitions during peace when the Administration could provide for all the wants of the troops at a cheaper rate and without difficulty? Perhaps the authorities, after the experience of the German war, consider that home requisitions should be practised. We find Colonel Martin, who is much given to military criticism since he retired from the Service, remarking—"During the last war, on our own territory, in the richest country in the world, there, where our enemies found the means of living in clover, we saw our armies, thanks to our detestable Administration, dying of hunger and in want of everything. Requisition—this forgotten tradition of our great wars—is evidently one of the means which ought to be employed to prevent the recurrence of such a lamentable state of affairs." It seems to us that something more is required than the authorization to take—it is the will to give. If the French troops could not live on their own territory during the last war it was not owing to a proper law concerning requisitions, but because the peasantry, as a rule, preferred to sell to the enemy rather than give to their fellow countrymen. The Germans had only to offer a fair price to be well served, as was proved by the trial of a number of rich farmers from the Rambouillet district who passed before a court-martial at Versailles, after the war, on the charge of having accepted contracts from the invader. Colonel Martin would like to see a law dealing with requisitions in time of war, and in the enemy's country, being probably impressed with the fact that such a system is essential to the discipline of an invading army. More than one French writer has dwelt on the demoralizing effect of allowing troops to plunder at will, and numerous examples of the insubordination thus generated are cited. Fortunately, perhaps, for us this was the case with Massena's army in front of the lines of Torres Vedras. It was a part of Napoleon's system that war should support itself, and his armies had to subsist as they could in the field. The inveitable consequence was that on the approach of French troops the inhabitants fled, carrying everything they could with them, and that the wretches who remained had to be tortured to make them reveal where they had hidden their supplies. It was a common trick for the French marauders to hang a Spanish peasant first red and then blue. When red he was taken down, and, if he consented to speak, further strangulation was not proceeded with. Count Miot de Melito in his memoirs gives a most terrible account of the scenes he witnessed at Burgos and elsewhere. At Burgos all the houses were pillaged, the streets strewn with dead, dying, and broken furniture; a whole quarter was on fire, and the Chartreuse and principal convents were plundered, and the tombs were violated. These painful scenes lasted a fortnight, and a great change was operated in the *morale* of the French troops. The resolution taken by the inhabitants to abandon their homes rendered it impossible to organize a regular service for the subsistence of the army. So writes the Count. But what inducements were offered to the Spaniards to remain in their towns and villages? Napoleon himself was at Burgos when it was sacked like a place which had been taken by storm, and saw the ill-consequences of his system. His brother, King Joseph, was constantly imploring him to pay the army in Spain, and he as constantly refused, and hence arose a great relaxation of discipline amongst the troops, who thought more of loot than glory. We certainly find that after his Majesty's visit to Spain, and when he was attacking Austria, he issued an "order concerning the subsistence of his troops in the States of the Confederation occupied by the French armies." This order, dated May, 1809, commenced thus:—"The Emperor, wishing to determine in a precise manner the supplies due to his troops *(sic)*, so that the burgomasters and other agents may furnish them in a regular manner; wishing also to make known to the soldiers what they have a right to demand, and to the inhabitants what they must supply, in order to avoid refusals or exaggerated demands, whence spring mutual complaints, orders, 1st, that the troops be nourished at their quarters after the ancient custom established in Germany, the officer at the table of the host. The sub-officers shall receive, independently of their rations of bread—at breakfast, soup and brandy; at dinner, soup, ten ounces of meat, vegetables, and half a pot of beer or wine; at supper, vegetables and half a pot of beer or wine. The soldier's ration is, therefore, composed of twenty-four ounces of ammunition bread, four ounces of bread for soup, sixteen ounces of meat, two ounces of rice or four ounces of dried vegetables, the sixth of a pint of brandy, and a pint of beer or a bottle of wine. Art. 2. General officers will see this *régime* strictly attended to. Art. 3. The inhabitants will furnish provisions of good quality." Then follow rules and regulations concerning forage and other matters, all carefully elucidated.

It is the province of a professional journal to modulate those fitful gusts of public opinion which, by unduly pressing on particular portions of the great naval machine, tend to upset its equilibrium altogether. The popular impression is generally founded on some sound basis, and it is well to take advantage of the favouring breeze while it lasts, but unless it can be made to harmonise with the traditions and general character of the naval Service it will eventually do more harm than good to the objects of its solicitude. It has recently been discovered that our ships are complex masses of machinery, and the natural conclusion is arrived at that the responsibility of our Engineers has been proportionately increased, and we have no fault to find with the general conclusion, as expressed by Mr. Reed, that "the class of naval Engineers should be raised to a level corresponding to the greatness of their present trust and to the weight of their enlarged responsibilities." So far we are all agreed, and Mr. Hunt has shown by his appointment of a Committee to consider the whole subject, and by his promise to adopt a considerable portion at least of their suggestions, that he is fully alive to the necessity for making such improvements in the status and remuneration of the Engineers of the Navy as may be required. The question is therefore, not whether any change should be made to their advantage and that of the naval Service, but what its amount should be, and whether the proposals of the Committee and the promised reforms of Mr. Hunt are at all sufficient to remedy the evils complained of. Mr. Reed at once answers "not content," and from the comparison which he has made between the pay and position of Admirals and those of the Engineers, we see clearly that nothing will satisfy him but perfect equality between his "protégés" and the executives. On the face of it such a demand is absurd unless it includes the much larger question of whether it is possible to give real as well as nominal executive rank to Engineer officers, causing them to qualify not only as Engineers, but as seamen, navigators, and gunners, and in fact to merge them with the executives in the higher ranks. That some such solution as this may be possible in the far-distant future we do not deny, but at present it is certainly beyond the pale of practical legislation. There is sound sense in the First Lord's remark to the Committee of the House of Commons, that "he thought that it would be possible at some future time to place them (the Engineers) among the military officers, but in matters of this kind it was necessary to proceed by stages." For the present it must be admitted that the Engineers bear much the same relationship to the builders of the ship and machinery and the naval executive that the man who loads and cleans a fowling-piece bears to the maker of the gun and the sportsman who directs it. This is not, we admit, a flattering way of putting the position of the Engineer on board ship, but it is, we submit, a fairly accurate illustration of the part which he plays, though, undoubtedly, as the machine which it is his duty to prepare for service becomes more complicated, so his functions are of a higher nature and require better remuneration. Turning now to the "stages" which appear to be foreseen as probably likely to follow, are the endeavours now being made to improve the position of the Engineers steps in the right direction? In fact, is the evil recognised, or are we groping in the dark, merely filling up a hole here and there so as to stop agitation? On this we may, we think, rest satisfied, for both in the Committee's report and in Mr. Hunt's speeches, we see much stress laid on what the First Lord called "an endeavour to attract to the engineering profession for the Navy persons belonging to a higher social stratum." It is all very well to sneer at this as an attempt to introduce "blue blood" into the engineering branches of the Navy, but we are inclined to think that the First Lord's proposal scarcely goes far enough, and it is remarkable that Mr. Reed proposes that "young men of gentlemanly manners and education" should be trained for the position of naval Engineers in a cadets' college. Such an education can scarcely be expected to be entirely gratuitous, and we may assume, therefore, that Mr. Reed is no advocate for what we may call the charity argument in the complaint that poor parents will in future be precluded from training their sons for naval Engineers entirely at the expense of the State. We do not think that the part is equal to the whole, and we cannot agree to making our present Engineers equal in position and independent of the executives. The assumption of an *imperium in imperio*, the engine-room independent of the quarter-deck, is a most mischievous one, tending directly to the decay of discipline and the decrease of the proper responsibility of the Captain. Those who suppose that the Chief Engineer of an ironclad can keep his complement of stokers entirely to himself, are clearly ignorant of the amount of mutual dependence between the engine-room and deck hands, and they would probably be surprised to hear the number of men of the seamen class who are called upon to assist in the stoke-hole and coal bunkers when one of our highly-powered men-of-war is steaming at full speed, or, on the other hand, the amount of work done by the stokers and Engineers about the ship which is not directly connected with the engines or engine-room. While, therefore, with a lively recollection of the result of the legislation which has taken place on the grievances of the navigating officers, of the Medical Department, and of other classes, which have from time to time been brought before Parliament, we deprecate any great leap in advance for the Engineers, for which neither they themselves nor the Service are prepared, we trust that the liberal proposals of the Committee may be generally adopted by the Admiralty; and, thus, that a decided advance may be made towards improving the engineering branch of the Navy. The increase in the number of Chief Engineers is a good proposal, and we are glad to hear that it is to be adopted. It is, however, essential that the flow of promotion should be kept up in future, and, above all, that encouragement should be given to special zeal and efficiency by greater scope of selection than has heretofore been the rule. At present the promotion of Engineers is made purely by seniority, and those recently promoted to the rank of Chief Engineer had been thirteen years in the junior grade. There is one more point of the highest importance, and that is, that Captains and others in command of her Majesty's ships should have an intelligent appreciation of the work required of the Engineers, and that they should by personal and direct communication with the Chief Engineer show the interest which they take in all that pertains to his department. This, we fear, is not always the case, and that it should not be so can only be attributed to the half-pay system which has truly been called the "great plague spot" of the Navy. Captains who have long been rusting on half pay can scarcely be as sympathetic and appreciative of the Chief Engineers' difficulties as they should be. The present executive officers must become better Engineers, whilst the Engineers must enlarge their sphere of vision so as to embrace not only the management of the machinery in their charge, but the whole naval profession in all its branches, and thus qualify themselves for further advancement in rank and responsibility. From this point of view we are disposed to advocate the Committee's proposal to make the Engineers executive officers "among those who would not on any occasion succeed to command," with the clear idea that in the distant future this practical anomaly would lead to eventual amalgamation with the executives in the higher branches of the Service.

When the British taxpayer reads in his daily paper that some British Admiral has been entertaining a King to dinner, and that the flagship has been the scene of great hospitality, does it ever occur to him that these displays cost money, and that the sum which is allowed to the officer in command—say of the Channel Squadron—would be utterly inadequate to meet them? We suppose not. But it is true, nevertheless, and especially is it true of the misnamed Channel Squadron, which has the privilege of cruising off the most expensive stations, so that no officer can hope to escape from his term of service without paying largely for the privilege of flying his flag. The banquet to the King of Spain, which was only one of the entertainments to great personages given by Rear-Admiral Beauchamp Seymour, was very gratifying, no doubt. It was a very pleasant thing to see a King of Spain on board a British man-of-war as the Admiral's guest, but it is also a very fine thing that the country has officers who are able to maintain its credit at their own expense.

We do not think that a gallant officer like Commodore Hewett will be disposed to admit that it was "good fortune" to be called upon to bombard, burn, and destroy the wigwams of savages on the Coast of Africa, but the Active, under his orders, has very well justified her name. There have been, however, many vessels which have done as much without the honours of a leading article at the end of her cruise.

The Chinese Government has been expending so much upon gunboats of the *Alpha class that it* has been decided to cut down the training corvette Yang-woo, the command of which was given to Captain Percy Luxmoore, C.B. This certainly seems rather like putting economy in practice in the wrong direction, unless it is thought that they have already learnt enough, and are now able to take care of themselves. Captain Luxmoore has, we believe, returned to England.

We regret to hear by the last mail from the West Indies that Mr. Rogers, Carpenter of the Dockyard at Port Royal, whose illness we mentioned on March 24, has fallen a victim to the climate, and has died of yellow fever. This case is not, however, to be traced to the Aboukir, for although Mr. Rogers was borne on the books of that ship, he had never lived on board.

A special Order in Council has been approved by her Majesty relaxing Clause 8, Section 1, of the Retirement Scheme of February, 1870, so far as it relates to Rear-Admiral Houston Stewart. This officer will, therefore, be promoted and no longer remain at the head of the Rear-Admirals' List while his juniors temporarily pass over his head, as three have already done. There has undoubtedly been a feeling, which has found expression in the House, that it is undesirable to have frequent changes in so important an office as that of Controller of the Navy. This view being also entertained by the Admiralty, it was acknowledged to be for the good of the Service that Admiral Stewart should retain his appointment for a further period. It is, therefore, but right that the clause which prevented his advancement to a higher rank while holding that office should be relaxed. Admiral Stewart will now take his proper position on the Vice-Admirals' List—namely, next in seniority to Admiral Coote.

Commander Lord Ramsay will join the Britannia on Friday next. The appointment has been vacant since December last.

By an Order in Council, bearing date February 7, 1877, her Majesty has been pleased to direct that in future her naval and Marine Aides-de-Camp shall draw their half pay in addition to the emoluments of office; and, further, that naval officers filling the post of a Lord Commissioner of the Admiralty, a Secretary to the Admiralty, Controller of the Navy, or Director of Naval Ordnance, shall receive naval half pay in addition to the salary attached to such office. Also, an officer of the Navy or Marines in naval employment in the Colonies may receive his naval or Marine half pay in addition to the salary he may draw for the special duties he may be performing on behalf of the colony, and as though he held no such appointment of profit. And Naval Instructors, who may be in Holy Orders, but who have not been appointed

Chaplains in the Navy, will be entitled to receive half pay. This will make a welcome addition to the income of the officials and officers concerned, while it is but a simple act of justice that the regulations as to naval half pay should be assimilated, as far as practicable, with those in force in the Army, which has hitherto had the advantage in this respect.

It is said that the Rev. E. A. Daubeny, whose death is just reported, was the last surviving officer who took part in the Battle of Copenhagen.

His Royal Highness the Prince of Wales continues to make good progress towards recovery, and intends to start in the course of a week for Villafranca, where he will embark on board the Sultan for a cruise with his Royal Highness the Duke of Edinburgh.

At a meeting of the French Geographical Society on Wednesday, the President announced that the principal gold medal of the Society had been awarded to Commander Cameron, C.B., in recognition of his services in the cause of geographical science.

It has recently been stated, with reference to the breaking up of the Star and Gannet, that the shipbreakers were able to earn more while demolishing the Star than when employed upon the Gannet, owing partly to the fact that the latter vessel was built in a Royal yard, and taking her to pieces was very tough work compared with the Star, which was built by contract. An inference is thus drawn that contract work is not so strongly put together as that executed in her Majesty's dockyards, and this suggests two questions; first, do contractors undertake to build ships for the Navy equally substantial in every respect as if those vessels had been constructed in the Government yards; and, secondly, is there sufficient Admiralty supervision over the ships while in course of construction on the slips of the contractors. This is a matter requiring attention, and it would be a wise and judicious expenditure of money to appoint a Government official to every private yard where a ship of war is being built, to supervise every stage of her construction.

An inquiry has been ordered into the causes of the collision between the Triumph and the Benjamin Whitworth, as the necessity for running the collier down is not apparent to their Lordships at Whitehall.

The division, as ordered, of the Detached Squadron, on arrival in the Channel, two of the ships going to Portsmouth and two to Plymouth, has been countermanded, and all will now proceed to the latter port to await further orders.

The Sub-Director of Naval Engineering at Castellamare is on a foreign tour, and will visit the different dockyards at our home ports and such ships as he may be desirous of inspecting.

Nearly two years having passed over the head of Rear-Admiral John Corbett, C.B., since he attained Flag rank, and some who are his juniors on the List having, meanwhile, hoisted their flags, the Service will, doubtless, be pleased to find Admiral Corbett once more afloat as Commander-in-Chief in the East Indies. He has temporarily hoisted his flag on board the Fisgard.

Lieutenant W. S. Goodridge, of the Daphne, having passed the necessary examination in Hindostanee before the civil and military examiners at Bombay, has received the appointment of Interpreter in the East Indies Squadron.

If any member of Parliament will call for a return of the death-rate and invaliding amongst the engine-room staff of the Pioneer during the few months she has been employed on the West Coast of Africa, he will awaken the Admiralty to the inadvisability of retaining such a vessel on such a station. It is true she was specially designed for service on the West Coast, but that goes for nothing. The heat in her engine-room and stoke-hole is reported to be simply killing.

Sir George Nares has received the permission of the Admiralty to publish a narrative of the late Arctic Expedition, at his own expense.

An officer in her Majesty's Service, writing to us from Vallejo, California, gives some interesting particulars relative to the movements of the Russian squadron in those waters. There are in the harbour, lying off the United States' Navy yard, on Mare Island, some twenty-eight miles north of San Francisco, six Russian men-of-war, three being wooden corvettes, each with a crew of 250 to 300 men, armed with six-inch breech-loading rifled cannon, 40-pounders, boat-guns, mitrailleurs, and Harvey's torpedoes, three small sloops with their iron casing, and crews of 80 to 150 men. All six are steam-vessels, and four other ships are expected shortly from Japan. The sailors are strong, active, and under good discipline. The fleet have been there for two months, and our correspondent states that the officers speak openly of their intention to attack Vancouver's Island in case of a rupture with Great Britain, and the people of Victoria are anxious on this account. No doubt the officer commanding the Pacific Squadron will be able to give a good account of an enemy in those waters either with his own command or assisted by ships from China. Our correspondent adds:—"Here there is a constant round of festivities in honour of the Russians; and their fleet on the Atlantic coast have been sumptuously entertained at Norfolk, Virginia, and elsewhere. They are now, I believe, in Charleston, out of reach of the Turks. The reasons assigned for the apparent close friendship between the Russians and Americans are:—(1.) The sympathy evinced by the Russians to the American Government during the late civil war. (2.) The two nations are so far apart, and so different from each other, that there is no danger of conflicting interests."

The date for the completion of the Lapwing having been delayed, Admiral Ryder will not await her arrival at Hong Kong, but will proceed to Nagasaki, where arrangements will be made to assemble a court-martial, to inquire into the causes of her recent grounding.

It having been reported to the Admiralty that the late Chief Engineer of the Tourmaline was driven into a most excitable state and ultimately lost his reason and committed suicide through the anxiety he suffered in consequence of the defective state of the new machinery of the ship, their Lordships have decided to award a special pension to the widow of the unfortunate officer.

Lieutenant Sir Baldwin Walker, Bart., of the Diamond, has requested that he may be superseded and placed upon half pay.

A special pension of £150 per annum has been granted to the widow of the late Dr. Mackay, Deputy Inspector-General of Hospitals and Fleets, it being considered that this is a case in which death may be attributed to exposure to unhealthy influences whilst engaged in the execution of duty.

The Foreign Office has been pleased to express to Captain Sir William Hewett, K.C.B., V.C., its entire satisfaction at the course pursued by him in relation to the King of Dahomey.

Navigating-Lieutenant Fenn, whose invaliding from the West Coast of Africa was noticed by us in October last, has been obliged to retire, the effects of nearly three years on that unhealthy station having entirely incapacitated him for further active service. We feel sure that many of his old naval friends will hear with regret that such a step has become necessary.

In the "Navy List" for the present month the names of the Roman Catholic Chaplains at Portsmouth and Plymouth have been introduced for the first time.

Surprise will doubtless be felt at the retirement of Captain Norman Bedingfield immediately on going on half pay, for his position on the List would have ensured his attaining flag rank in the course of another year, and his age would not have interfered with his career, for he had at least another seven years before him. A Good Service Pension of £150 was conferred upon Captain Bedingfield in October last.

Mr. E. J. Reed has, this week, occupied another column of small type of the *Times* with a letter on the Engineer question. He declares that the Admiralty scheme for the improvement of the position of officers of this class "fails utterly to meet any requirement in the case," and that if something is not done he will have to deal with the question "more at length."

The Naval Pension of £50 a-year, vacant by the death of Commander Lewis, has been awarded to Commander William Bailey.

The names of the following officers have been removed from the "List" of the Navy since January 20, 1877:—Sub-Lieutenants—Poynings H. Molyneux and Robert H. Walpole (act) (resigned). Navigating Sub-Lieutenants—Henry Grey (resigned); Eland H. H. Mossom (resigned); and Howard B. Turner (unfit). Naval Cadets—Philip B. Affleck (unable to pass out of H.M.S. Britannia); Armine W. Pearse (withdrawn); and John E. Lloyd (withdrawn) Engineers—William H. Sedgwick and John Forrest (pensioned). Assistant-Engineer 1st Class—William J. Mullinger (resigned). Probationary Lieutenant Royal Marine Artillery—Reginald Henry MacMahon (misconduct). The discharge of Mr. Horace Armytage, Acting Sub-Lieutenant, and the resignation of Mr. Richard G. Callaway, Engineer, have been cancelled. The death of Staff-Commander Richard E. Pym was erroneously reported in the last quarterly "Navy List," instead of that of the Commander of the same name. In the "Navy List" for March the name of Surgeon George J. Gray was erroneously inserted in the Obituary; he was placed on the Retired List.

It is to be hoped the Horse Guards will not carry out its idea of removing regiments like the 2nd Battalion 2nd, 2nd Battalion 8th, 2nd Battalion 13th, 1st Battalion 19th, and 100th, proceeding on foreign service next winter, from Aldershot. There can be no possible argument in favour of the regiments being disturbed. Aldershot is, undoubtedly, the station beyond all others at which a regiment should pass the last few months of its home service, and to move it for the simple sake of change is only to thrust upon officers and men an unnecessary expense at a time when this should be, as far as possible, saved. It is changes of station such as these said to be in contemplation which have more to do than anything else in rendering the Army unpopular. We by no means advocate permanent localization, or any system approaching permanent localization, for an Army recruited, as ours is, by men of different nationalities, and from whom such varied services are expected. There is, however, reason in everything, and the knocking about of battalions at the very time when commanding officers most require to be left quietly to mature their arrangements for embarkation would find favour in no Army but our own.

The reputed Armada guns which have been recently placed among other naval trophies in Windsor Castle have not escaped the critical notice of Artillery experts, who deny that iron guns were in use at sea at that period. Indeed, before the arrival of these relics at Windsor so much doubt was thrown on their origin that opinion inclined towards the belief that they did not belong to any ship in the Spanish Armada. There is every reason to suppose that no vessel in that fleet was wrecked on the east coast of Scotland, and that the legend which describes the wreck of the Santa Catarina on the rocks of Aberdeenshire, near the inlet now called St. Katherine's Bay, owes its origin to the desire to account for the name. Still these guns, with others, were found at the bottom of the sea in St. Katherine's Bay, and the question is how they got there.

There is little chance of Lieutenant-General Sir Arthur Cunynghame being relieved in his command at the Cape of Good Hope until April 1878, notwithstanding the reports which have been in circulation. Sir Arthur may be looked for in England next spring, by which time he will doubtless have succeeded to the higher rank which will disqualify him from retaining his appointment.

The War Office wants seven or eight Yeomanry Adjutants, but cannot find any officers willing to accept the appointment, though it has been on the look-out for twelve months and more. The appointments offered are worth 7s. a-day!—less than half the pay of a Cavalry Captain—whilst the allowance for forage will not keep a horse and groom three days a week. No wonder, then, that the employment should be unpopular.

The late struggle against Art. 31 of the Admiralty Circular of December last, which rendered the service regulations with regard to the wearing of uniform imperative, has to all appearance been nipped in the bud, and therefore little more need be said about it. But it is curious to note that a grievance exactly opposite in nature appears to exist in some departments of the American Navy. A correspondent of *The Army and Navy Journal* (New York) complains that landsmen and others when on shipboard persist in wearing clothes the exact counterpart of those allotted to appointed petty officers, even to the "five navy buttons on the right breast." This Yankee man-of-wars-man is evidently proud of the Service to which he belongs, and he exhibits a spirit which is worthy of imitation in the old country.—*Iron.*

A Parliamentary return has been issued showing the number of training-ships in English waters and the number of boys on board each ship. From this it appears that at Devonport the Impregnable has 1,110 boys on board, of whom 330 belong to the first class and 780 to the second class. On board the Implacable (and Lion, tender) are 1,091 boys, 321 being first class and 770 second. At Portsmouth, on board the St. Vincent, there are 803 boys, 253 being first class and 550 second class. At Portland the Boscawen has 604 boys, of whom 101 belong to the first class and 503 to the second. The only other vessel in the list is the Ganges, stationed at Falmouth, and having 519 boys on board, 204 belonging to the first class and 315 to the second. The total number of boys is 4,127, of whom 1,209 are first class and 2,918 second. The return is made on the motion of Mr. Richard Power.

At a recent meeting at the Memorial Hall, Farringdon street, at which Admiral Hamilton presided, Miss Weston spoke of the crowds of seamen who thronged the Sailors' Rest at Devonport, and said that so great were the numbers that it had become necessary to enlarge their borders, and they must have another £6,000. She quite dreaded the home-coming of the Channel Fleet, for the men would besiege the "Rest," and it would not be possible to provide accommodation for half the number. She added that in all parts of the world the blue-jackets took kindly to total abstinence. Out of about 240 vessels of war teetotalism had adherents on board of 190. A register was kept of them in each ship, and they were faithful and noble workers, of whom she was proud. The literature circulated among them was greatly prized, and the adoption of total abstinence has been followed by the establishment of several Bible classes. There ought, Miss Weston pleaded, to be a Sailors' Rest at every foreign station. This would not only improve the morals, but also preserve the health of the men, and the Government and the country would reap the benefit as well as the sailors' children and wives. A sailor named Pickles then gave his experience. He said that he had administered over 1,200 pledges, and had lost only nine of that number.

The new lasso equipment having been issued for the use of the Cavalry regiments at home, the whole of the duty non-commissioned officers and six men per troop are to be instructed in its use, and should a man become ineffective, by promotion or otherwise, for this duty, he is to be replaced by another man. The lasso is to be carried by the horses, which have been trained to the use of it.

The Army.

3rd Dragoon Guards. Capt. Stevenson is about to retire.

6th Dragoon Guards. The *Whitehall Review* says:—"Throughout the Cavalry, and, in fact, throughout the Army generally, much regret is felt at the retirement of Col. Napier from the command of the Carabiniers. Col. Napier was fortunate in obtaining command of his regiment before he had been thirteen years in the Service. This advancement was exceptionally rapid; but the condition in which the 6th Dragoon Guards have always been under his command is convincing proof of his capacity. He hands the regiment over in the highest state both of discipline and efficiency; in fact, the very pattern of what a British Cavalry regiment should be."

3rd Hussars. The sentence of the court-martial held last month at Mhow has found Private Chinnock guilty of killing his wife, and he is to be hung under orders of the officer commanding the station.

12th Lancers. From Secunderabad we learn that the regiment, recently arrived from England, is enjoying excellent health. It will be recollected that early in February there were a few cases of cholera in the regiment, contracted, doubtless, by reckless inattention to eating and drinking shown by the men on the way up-country, but which were nevertheless magnified into a violent epidemic by the ignorant zeal of the local medical authorities. Since that time there have been three or four cases of small-pox, all of the mildest possible type. The sick, when the mail left the station, had been reduced to a minimum.

13th Hussars. Capt. Gifford has been appointed station Staff officer of the Dalhousie Convalescent Depôt.

15th Hussars. The death is announced of Capt. D. Ricardo, late of the regiment. The deceased entered the Army May 13, 1859; became lieut., July 3, 1860; capt., June 23, 1863; and retired by sale of his commission three years ago.

ROYAL ARTILLERY.

The Government of India have addressed the following complimentary letter to Col. C. H. Dickens, C.S.I., late Bengal:—"I am commanded to inform you that the Governor-General in Council cannot allow you to vacate the office which you have so long filled, of Secretary to Government in the Public Works Department, without expressing to you his Lordship's appreciation of the very able and important services you have rendered to the State. 2. As far back as 1851, in the discharge of your duties as an executive Engineer, you had attracted the attention of the supreme Government. This led to your being selected as Assistant-Secretary to the Military Board, where, on the organization of the Department with which you have ever since been connected, the whole labour of codifying the regulations for the guidance of its officers fell upon you. That labour was rendered all the more heavy, not only because the code had to be evolved from a heterogeneous agglomeration of isolated orders, but also because the constant issue of new regulations, as the Department gradually became developed, involved eventually an almost complete reconstruction of the work. 3. But whilst this code was in progress you also disposed of the heavy arrears of the Military Board; and when, on the abolition of that body, the departmental accounts of the several Governments and Administrations in India required reorganization, the task was entrusted to you, and the reforms were carried into effect by you in a manner which elicited from Lord Canning the encomium: 'I wish that every officer, high and low, were actuated by the temper and true public spirit shown in Capt. Dickens's remarks.' (May, 1860.) 4. Since those words were written the extension of public works in India, more especially the development of the railway system, both by the agency of the State and by private enterprise, has added largely to your responsibilities; and in accepting them, your devotion to the duties which they involved has been no less conspicuous than the exercise of judgment in their administration, as liberal as it was cautious and as comprehensive as it was sound. 5. The periodical forecast of expenditure on projects for the construction of the great reproductive works of India, in order to secure their continuity of economic execution till completion, is a measure which owes its conception to your experience, and which would of itself alone have been sufficient evidence of your administrative capacity. 6. But it is not only in this capacity that you have distinguished yourself; for it was with you that the Behar irrigation scheme originated, and it was by you that the details of that project were perfected; your report on the re-organisation of the Survey Department, and the formation and training by you, during the trying epoch of the Indian mutiny, of a battery of volunteer Artillery, show how varied have been the fields in which you have successfully laboured. 7. The Governor-General in Council commands me to convey to you this record of his Lordship's appreciation of your official career, and to express also the regret with which the Government of India views the cessation of your connection with the public service."

Instead of coming home, as arranged, in her Majesty's ship Tamar, the head-quarters and batteries of the 2nd Brig. are to return from Ceylon and Hong Kong in a hired transport. Their arrival will consequently be considerably delayed.

Surg.-Major R. A. Chapple, 9th Brig., has applied for leave to England, on medical certificate.

The following movements of vet.-surgs. have been ordered in India, viz.:—J. Burton, B Brig. R.H.A., from Umballa to Meerut; A. E. Queripel, B Brig. R.H.A., from Meerut to Umballa; S. Gillespie, B Brig. R.H.A., from Meerut to Cawnport, for duty with F Bat. 19th Brig.; J. Mills, B Brig. R.H.A., from Umballa to Allahabad, for duty with E Bat. 11th Brig.

Lieut. A. J. Dunnage, 11th Brig., has been granted leave from India to England for fifteen months, on private affairs.

The *Irish Times* hears that "Lieut-Gen. Sir Burke Cuppage is in such a state of health as to cause serious apprehension to his friends."

The expected order for the reorganization of the regiment has been issued. It sets forth that for the better administration and relief of the Artillery service it will be on the 1st of July next divided into three brigades of Horse Artillery, six brigades of Field Artillery, five brigades of Garrison Artillery, and one brigade of Coast Artillery. The head-quarters of these brigades, except the Coast Brigade, will be permanently located in the several districts at home as follows:—Royal Horse Artillery—A Brig., Woolwich; B Brig., Dublin; C Brig., Aldershot. Field Artillery—1st Brig., Woolwich; 2nd, Sheffield, 3rd, Newbridge; 4th, Leith Fort; 5th, Woolwich; 6th, Colchester. Garrison Artillery—7th Brig., Portsmouth; 8th, Devonport; 9th, Dover; 10th, Cork; 11th, Sheerness. The Duke of Cambridge remarks that "in assigning to each brigade a permanent head-quarters it is to be distinctly understood that Woolwich, for so many years the seat of all the scientific and professional institutions of the corps, is still to be looked upon as the head-quarters of the whole regiment, and its great centre of instructions." It is also ordered that the depot brigade be broken up, and a depot battery attached to the head-quarters of each brigade, to train recruits, furnish drafts, &c. The foreign reliefs of both lieutenant-colonels and batteries will be carried out by roster of the three branches of the Services—horse, field, and garrison—and not by whole brigades as at present. The Staff of the brigades in India and the colonies will be abolished, and the local duties performed by other arrangements. The following is a general outline of the new system:—The Artillery in each military district at home will be under the command of a regimental colonel, who will also have the administrative command of the brigade whose head-quarters are in his district; in Ireland the Artillery in each district will be under a regimental colonel. As the whole of the batteries of a brigade will in no case be serving in the same district as its head-quarters, it is ordered that all the batteries of any branch or brigade in the same military district will be under the command of the senior Artillery officer in the district. Various regulations are made for facilitating correspondence and simplifying returns, and all demands for clothing, pay, &c., are to be forwarded direct from officers commanding batteries. The promotion of non-commissioned officers is to be made in each battery up to the rank of corporal, and throughout the batteries of the same branch serving in the district to the rank of sergeant or battery Staff-sergeant. For the superior positions of sergeant-major and quartermaster-sergeant at head-quarters the promotion to be given amongst the battery Staff-sergeants at home and abroad. Employed men are to be taken fairly from amongst all the batteries in the district, and not especially from those at head-quarters. Provision is made for recruiting, not only at head-quarters, but at other stations occupied by batteries, and for posting them according to the requirements of the Service. The riding establishment will be stationed at the head-quarters of the regiment as heretofore, and its superintendent will conduct the general instruction of the regiment in equitation. Non-commissioned officers from out-stations will be periodically trained as rough-riders. The remount establishment will also be located at Woolwich, under the inspector and purchaser of horses, assisted by a captain. Non-commissioned officers and men permanently connected with the garrison at Woolwich, including the bands of the regiment, will belong to the district Staff. The head-quarters of the district Staff at Woolwich will be placed under a lieutenant-colonel, and attached to the Coast Brigade. The order, which is a lengthy one, deals with many other details of the re-organisation scheme, and defers other points for future treatment.

ROYAL ENGINEERS.

The following changes have occurred:—Col. Sir W. T. Jervois, K.C.M.G., from Singapore to Australia, on special duty; Brevet Col. A. C. Fisher, C.B., from Malta on sick leave. Lieut.-Cols. C. E. Cumberland, at Aldershot, ordered to Malta; and E. L. Bland, from Bermuda on leave. Major E. R. James, ordered home from Malta; Brevet Lieut.-Col. P. H. Scratchley, from Woolwich to Australia, on special duty; Majors R. Grant, at Aldershot, ordered to Malta; and F. B. Mainguy, at Cork, ordered to Portsmouth. Capt. J. Hill, from leave to Europe to Deyra Doon. Lieuts. W. H. Rathborne, at Calcutta, to be capt.; H. F. Kirkwood, from Southampton to Edinburgh; F. V. Corbett, from leave to Europe to Etwah; J. L. Macpherson, from Allyghur to Europe on leave; J. S. Nicholson, from Agra to Europe on leave; F. R. de Wolski, from Calcutta to Roorkee; R. F. Moore, from Amritsur to Meean Meer; A. T. Preston, from Gibraltar to Chatham; W. St. G. Ord, from Bermuda to England on sick leave; W. G. Du Boulay, from Ceylon to England on sick leave; M. K. Brady, from Halifax, N.S., to Europe on leave; G. F. Mann, from Singapore to Ceylon; L. Darwin, ordered home to Malta; R. Thompson, at Bedford, ordered to Malta; G. F. Wilson, from leave to Europe to Calcutta; S. Grant, from Delhi to Roorkee; H. E. McCallum, from Singapore to Hong Kong; B. Poulter, from Bangalore to Tanjore; W. S. Godsal, from Hong Kong on sick leave; A. C. Foley, from Roorkee to Sone Circle; C. R. Hoskyn, from Mooltan to Sukkur; E. C. Spilsbury, from Poona to Ahmednuggur; E. H. Bethell, from Liverpool to Chester; M. H. Sankey, from the War Office to Manchester; A. H. Kenney, from Central India to Jubbulpore; and J. Clarke, from leave to Edinburgh. Late Bengal.—Col. Crofton, from Calcutta, and Brevet Col. C. T. Stewart, from Dinapore to Europe on leave; Lieut.-Col. W. Hitchens, from Calcutta to Meerut; Majors R. C. Pemberton, from leave to Europe to Calcutta; D. Ward, from Meerut to Rawul Pindee; H. F. Blair, from Calcutta to Chakrata; and I. P. Westmorland, from leave to Europe to Calcutta. Capts. R. V. Riddell, from leave to Europe to Deyra Doon; E. G. Clayton, from Dublin to Cork; J. Dundas, V.C., from Simla to Europe on leave; M. A. Alves, from Sialkot to Europe on leave; F. F. Cotton, from Ferozepore to Europe on leave; and G. F. Marshall, from Cawnpore to Calcutta. Late Madras.—Col. F. J. Moberly from Tinnevelly to Chingleput; Lieut.-Col. H. L. Prendergast from Bangalore to North Arcot; and Major P. Montgomerie from Madras to Salem. Late Bombay.—Lieut.-Col. J. Le Mesurier from Kurrachee to Europe on leave; Majors C. T. Haig promoted to lieut.-col., and from Guzerat to Poona; T. F. Dowden from leave to Europe to Bombay; Capts. A. Seton, at Poona, to be major, vice Haig; H. Doveton from Saharampore to Allahabad; and E. D. Twemlow from Oodgaum to Kolhapur.

The 19th Comp., commanded by Capt. W. St. G. Burke, employed on the Ordnance Survey, has removed from Edinburgh to Southampton.

Capt. G. T. Plunkett has succeeded Capt. E. G. Clayton in command of the 37th Comp., at Chatham.

The 23rd Comp. is about to be made a torpedo company, and it has consequently been transferred to the barrack-ship Hood, moored in the Medway, and which is used as a submarine mining school. This makes the 4th company now specially devoted to torpedo service, the other companies being the 4th, 28th, and 33rd.

The Instructorship in Photography at the School of Military Engineering, Chatham, has become vacant, Capt. W. D. W. Abney having completed his five years' service. Lieut. L. Darwin has been appointed Instr. in Photography at the School of Military Engineering, Chatham, in the place of Capt. Abney. Lieut. Darwin is at present stationed at Malta, but he has been ordered home. Capt. Abney has been appointed Inspr. of Schools in connection with the South Kensington Science and Art Department.

Grenadier Guards. Lieut.-Col. L. G. Phillips, will, for the seventh time, command the National Rifle Association Camp at Wimbledon this year.

4th King's Own. The 2nd Batn. will, the *Irish Times* understands, take over the Ship-street, not the Royal, Barracks on removal to Dublin from the Curragh.

6th Regiment. Lieut. Stratford, 1st Batn., has been relieved in his appointment as station Staff officer of the Dalhousie Convalescent Depôt.

8th King's. Major Cochrane, 1st Batn., has been appointed commandant of the Kussowlie Convalescent Depôt, vice Major Corrie, 11th Regiment, proceeded to England.

9th Regiment. Capt. Burton, 2nd Batn., has been appointed station Staff officer of the Murree Convalescent Depôt, vice Capt. Greatwood, 70th Regt., whose term has expired.

14th Regiment. Lieut. Molesworth, 1st Batn., has passed the higher standard examination in Hindostanee.

17th Regiment. Sub-Lieut. Stuart, 1st Batn., has qualified for promotion.

33rd Regiment. Lieut. Curran is recommended for the adjutancy, vice Lieut. Conor, resigned.

34th Regiment. Lieut. Marriott has passed the higher standard examination in Hindostanee.

35th Regiment. A correspondent writes:—"Having seen in your issue of Jan. 6 an astonishing score made by a man of the 49th Regt., during the annual course—viz., ten rounds at 600 yards, 38 points—I beg to forward you one made by Sergt. W. H. Currie, 35th Regt., at Trinidad, W.I., during the annual course (Feb., 1877):—1st class, ten rounds, 700 yards, 4, 4, 4, 4, 4, 3, 3, 4, 4, 3; total, 37 out of a possible 40. This is the seventh time since 1869 he has proved himself a marksman, having been the regimental shot in that year, and once his company's shot."

39th Regiment. Brevet Lieut.-Col. Chichester has been relieved in his appointment as commandant of the Nynee Tal Convalescent Depôt, and has assumed command of the regiment. A correspondent writes:—"Serving in the hottest quarter in India, I chanced to see in your issue of Feb. 3, under the heading of '61st Regiment,' a complaint of dearth of promotion illustrated by the fact that the twelve senior subalterns had an average of eleven and a-half years' service, or a total of 135 years. He who complains may comfort himself with this assurance, that the corps he speaks of is fortunate compared to some others. Even in my regiment (also a single battalion) the twelve seniors average eleven years and ten months, or a total of 142 years. In the distribution of honours at Delhi we, who founded the empire, were forgotten and passed over, though present on the occasion of the proclamation. Still we are 'Primus in Indis.'"

43rd Light Infantry. Lieut. F. H. Plowden is to be appointed instr. of musketry, vice Lieut. French, promoted.

44th Regiment. Lieut.-Col. Preston has been assigned local rank as col. in India, with effect from Feb. 27, 1877.

ROYAL MARINES.

Qrmr.-Sergt. F. Butler, R.M.L.I., has been promoted qrmr., vice Woon, deceased. Qrmr. Butler is appointed to the Plymouth Division, vice Halling, transferred to the depôt, Walmer.

51st Light Infantry. Brevet Lieut.-Col. Acton has been granted leave from India to England for fifteen months, on private affairs.

53rd Regiment will, the *Irish Times* says, be moved to England during the summer. It is believed that it will be concentrated at the Curragh previous to embarkation. Lieut.-Col. H.R.H. the Duke of Connaught presented new colours to the regiment at Birr on Thursday.

60th Rifles. Capt. Farmer, 4th Batn., has been granted an extension of leave from India to England from Aug. 25 to Nov. 24 next, on private affairs. Sub-Lieut. Lord F. FitzGerald, 2nd Batn., has qualified for promotion.

66th Regiment. Qrmr. Jones has applied for leave from India to England, on medical certificate.

70th Regiment. Capt. Greatwood's term of service as station Staff officer of the Murree Convalescent Depôt has expired, and he has been relieved by Capt. Burton, 9th Foot.

72nd Highlanders. Capt. Guinness has been appointed appointed station Staff officer of the Landour Convalescent Depôt.

80th Regiment. We regret to learn of the serious illness of Col. Smith.

81st Regiment. Major Browne has been appointed commandant of the Nynee Tal Convalescent Depôt.

85th Light Infantry. Lieut. Spens is under orders of readiness to return home to join the depôt.

87th Fusiliers. Capt. England has received orders to join head-quarters at Bermuda as soon as passage can be provided for him.

88th Connaught Rangers. H.M.S. Orontes is expected to arrive at Kingstown on May 11 to take on board the head-quarters and service companies for conveyance to the Cape of Good Hope. The *Irish Times* states that the departure of the regiment for the Cape of Good Hope is not to interfere with the appointment Brevet Major Dalrymple holds on the Staff at Manchester. Lieut. Jeffreys competes at the July examination for admission to the Staff College.

89th Princess Victoria's. Lieut. A. G. H. Hayne, a probationer, wing officer 15th Madras N.I., is about to be admitted to the Madras S.C., with effect from Nov. 12, 1875.

92nd Highlanders. Lieut. Cunningham has been appointed adjt., and Lieut. Gordon paymr. and qrmr., to the wing at Benares.

96th Regiment. Brevet Major Wright is retiring.

Rifle Brigade. Lieut.-Col. Newdigate, 4th Batn., has been granted an extension of leave to remain in England from India from July 31 to Oct. 31, on private affairs.

2nd West India Regiment. A rifle match took place at Cape Sierra Leone on Feb. 27 between five officers of the 1st and a like number of the 2nd West India Regt.; distances, 200, 500, and 600 yards, seven shots at each range. Subjoined is the score, by which it will be seen that the 2nd West obtained the victory by three points only:—1st W.I. Regt.—Lieut. Gray, 53; Sub-Lieuts. Spratt, 38; Bosworth, 31; Lowry, 43; and Bor, 48; total, 213. 2nd W.I. Regt.—Lieuts. Filliter, 44; Trist, 28; Kerans, 65; Godwin-Austen, 45; and Henley, 34; total, 216. Lieut. Kerans has been appointed acting instr. of musketry during the absence of Lieut. Patchett on sick leave.

Royal Malta Fencible Artillery. Her Majesty, on the recommendation of Lord Carnarvon and the Secretary of State for War, has conferred the Order of St. Michael and St. George upon Col. Antonio Mattei, in recognition of his long and faithful service with the regiment, extending over a period of close upon fifty years. Col. Mattei is about to retire upon the full-pay pension of his rank.

Ordnance Store Department. Commy. C. W. Elphinstone-Holloway has been appointed to the Ordnance Staff at Ceylon, and has just left England to take up his duties.

Medical Department. Surgs.-Major J. Tullock, S. Fuller, and H. T. Paterson, and Surgs. R. de la Corbett, J. Riddle, J. G. Williamson, and W. G. Grant are expected to do duty with troops proceeding home from India in H.M.S. Jumna.

Veterinary Department. Vet.-Surg. H. Thomson, Staff, doing duty with E Bat. 11th Brig. R.A., has been appointed to Muttra, for duty with the 10th Hussars.

THE AUXILIARY FORCES.

MILITIA.

Hampshire Artillery will occupy quarters in Gosport Barracks during the training.

Norfolk Rifles. The regiment is this year to go under canvas during its training.

1st Stafford. Col. Chambers contemplates retirement, and will shortly vacate command, to the general regret of the regiment, to all ranks of which he has endeared himself.

Edinburgh Artillery. The recruits enrolled since last training assembled on Monday at Edinburgh for preliminary drill. The officers on duty are:—Capt. and Adjt. Boneton; Capt. Greig, instr. of gunnery; Sub-Lieuts. Aytoun, Dakyns, Dick, MacDougall, and Wyllie, and Surg. Dycer. The regiment assembles on the 28th prox. for training.

Carlow Rifles. Capt. Butler has handed in his resignation of his commission.

Kildare Rifles. Lieut.-Col. the Marquis of Drogheda is about to retire from the command.

Louth Rifles. Capt. Caddell, 89th Foot, has been selected for the adjutancy, vice Capt. French, 94th Foot, resigned.

Leitrim Rifles. Capt. Trench, 2nd Queen's, has received instructions to remain for the present at Carrick-on-Shannon as acting adjt.

YEOMANRY.

Royal Bucks. The E troop paraded, dismounted, on Tuesday last for squad drill under Capt. Poynter, and were the same evening entertained at dinner at the Swan Hotel, Newport Pagnel, by Lieut. Harter. The band of the regiment was in attendance, and played during dinner, after which the usual toasts were given. The remainder of the evening was enlivened by several songs capitally sung by members of the troop.

VOLUNTEERS.

The Easter Monday Review in the neighbourhood of Dunstable passed off most successfully. The weather was fine throughout. The operations commenced about noon, Totternhoe Castle being bombarded by the guns of the Hon. Artillery Company, which were supported by the brigade under Col. FitzRoy. The 3rd Brigade occupied Totternhoe village, and the 2nd Brigade were in reserve. A fight took place for the possession of Totternhoe village, while on the right flank Col. Sargent's brigade had to retreat before Lord Ranelagh and Col. Earle's. Ultimately victory rested with the forces under Lord Abinger, who approached from the direction of Leighton, and occupied the castle. An unsuccessful attempt was made to dislodge the invaders, who, after a sharp contest, drove back the defending force towards Dunstable. After the fight the combined armies assembled and marched past. The Volunteers acquitted themselves creditably, but the ground was very heavy. Fifteen thousand men were under arms.

The annual spring muster and march-out of the City Volunteers is fixed for the 21st inst. The troops will assemble at Finsbury-square and march to Hyde Park.

A brigade field-day has been fixed to be held under Col. De Horsey, Grenadier Guards, on the 12th prox., in which the following troops will take part:—The 1st London, Civil Service, Custom House, and Post Office Rifles. On the same day the Grey Brigade, under Lord Abinger, will be brigaded in Hyde Park.

THE INDIAN ARMY.

5th Bengal Cavalry. Capt. M. Armstrong, squadron officer, continues to officiate as adjt. on promotion.

7th Bengal Cavalry. Major T. C. Graham, second in command, has arrived home from India on furlough.

11th Bengal Cavalry. Surg. R. Power has been appointed to the medical charge.

16th Bengal Cavalry. Surg.-Major J. E. Tuson, M.D., in medical charge, has been granted leave to England for one year on private affairs.

5th Bengal N.I. Lieut. G. S. Eyre has been appointed station Staff officer at Bhagalpore.

10th Bengal N.I. Capt. C. W. J. Hingston, wing officer, has been appointed qrmr., vice Capt. D. C. Hennessy, who has vacated on the expiration of his five years' tenure.

19th Bengal N.I. Lieut. D. E. Gouldsbury, adjt., has arrived home from India on leave.

39th Bengal N.I. Col. G. W. Fraser, commandant, has been granted leave to England for two years on private affairs.

45th Bengal N.I. The following has been addressed to *Allen's Indian Mail* by Col. Rattray:—"In your issue of March 26 you have inserted an article upon the presentation of colours to the 45th B.I. (Rattray's Sikhs). I am sure you will permit me, whose name is so much mixed up with that regiment, to point out a small error that you have inserted. You state, 'This regiment, formerly known as Rattray's Sikhs, did excellent service in Behar during the Mutiny.' You should have left out the word 'formerly,' and then the sentence would have been correct. If you will kindly refer to the 'Indian Army List,' issued by Messrs. W. H. Allen and Co., and look to the 45th N.I., you will find the regiment bears the title of 'Rattray's Sikhs,' but this is not inserted quite correctly. I enclose extracts from Government orders, dated 'Military Department, April 16, 1864,' which will show you that in the 'Army List' 'Rattray's Sikhs' should be inserted after the words 1st Bengal Police Battalion as well as after the words 45th Regiment of N.I. (Rattray's Sikhs). You are quite right in saying that 'for loyal courage and heroic endurance few deeds of that time can compare with the famous defence of Boyle's house at Arrah.' After this famous defence, however, much remained to be done before 'all Behar' was saved, as will be proved to you if you will be good enough to read two letters I enclose, numbered respectively 662, to the Secretary to the Government of Bengal from the Commissioner of Patna, and No. 1,940, in reply, from Secretary to the Government of Bengal. All honour is due to the Subadar Hokam Singh, by whose example and loyalty the Sikhs under him remained loyal, and I am delighted that at last he has earned his reward, which I years ago unsuccessfully attempted to obtain for him. But in adjusting this well-earned and just claim, I must not forget the claims of many others who, both Europeans and Sikhs, showed equal loyalty and heroism. For this reason I think you should publish this letter and those I enclose, for the satisfaction of those who, under me, at a most critical period, nobly did their duty to the State, and whose services have almost been unacknowledged.—I remain, dear sir, yours faithfully, T. Rattray, Col., late Commandant Rattray's Sikhs.—*Grosvenor Lodge, Sherborne, March 28.*" Capt. R. J. Waller, wing officer, has been granted leave to England for two years on private affairs. Capt. C. L. Woodruffe, qrmr., has been granted an extension of leave from India for six months.

1st Hyderabad Infantry. Lieut.-Col. A. C. Lilly, commandant, is about to return to India from European furlough.

2nd Hyderabad Infantry. Capt. H. F. H. Sewell, second in command, has applied for furlough to Europe.

4th Madras Light Cavalry. Brevet Major J. M. C. Galloway has been appointed commandant from March 1, 1876, vice Col. J. M. Macgregor, succeeded to colonel's allowances; and Lieut. C. H. Simpson, adjt., from Feb. 10, 1877, vice Capt. C. W. Campbell, resigned.

3rd Madras N.I. Major J. Lidderdale, wing officer, has arrived home from India on furlough.

8th Madras N.I. Capt. R. W. Hesketh, wing subaltern, has applied for furlough to Europe.

26th Madras N.I. Major T. Obbard, wing commander, has been granted two years' furlough to England.

33rd Madras N.I. Capt. H. E. D. Bayley, wing officer and adjt., has been granted furlough to England for one year and eight months.

35th Madras N.I. Major R. Griffith, wing commander, has been granted leave to sea for three months on private affairs.

2nd Bombay N.I. Lieut. J. S. King, wing officer, has been appointed to officiate as superintendent of Army schools in Bombay, vice Major Jacobs, proceeding on furlough to Europe.

5th Bombay N.I. Col. F. Roome, commandant, has arrived home from India on furlough.

10th Bombay N.I. Lieut.-Col. T. W. W. Pierce, second in command, resumed duty on the 7th ult. from European furlough.

21st Bombay N.I. Sub-Lieut. A. E. Leslie, 66th Foot, attached on probation, has passed the lower standard examination in Hindostanee.

The Army Gazette.

WAR OFFICE, PALL MALL, April 3, 1877.

Memorandum.

The Queen has been graciously pleased to approve of the following alterations being made in the style and title of the 2nd (Royal North British) Dragoons (Scots Greys), the Scots Fusilier Guards, and the 21st (Royal North British Fusiliers), and of those corps being in future styled respectively—The 2nd Dragoons (Royal Scots Greys), the Scots Guards, and the 21st (Royal Scots Fusiliers).

2nd Foot—Lieut.-Gen. C. A. Edwards, C.B., to be Col., in succession to Gen. J. Spink, deceased; March 15, 1877.

6th Dragoon Guards—Major J. Fryer to be Lieut.-Col., vice Brevet Col. E. Napier, retired on half pay; March 17, 1877. Capt. G. Salis-Schwabe to be Major, vice J. Fryer; March 17, 1877. Lieut. J. Moore to be Capt., vice G. Salis-Schwabe; March 17, 1877.

18th Hussars—Lieut. R. Knox to be Capt., vice F. C. Hooper, retired; March 17, 1877.

Coldstream Guards—Lieut. V. J. Dawson to be Instr. of Musketry, vice Lieut. and Capt. R. Pole-Carew, who resigns that appointment; Feb. 24, 1877.

3rd Foot—Sub-Lieut. J. W. Hind to be Lieut.; Feb. 28, 1874.

8th Foot—Sub-Lieut. P. Schletter to be Lieut.; June 13, 1876.

10th Foot—Sub-Lieut. G. Brennan to be Lieut.; Feb. 26, 1876.

11th Foot—Lieut. R. S. I. O'Brien to be Capt., vice V. Williams, deceased; March 10, 1877.

15th Foot—Lieut. D. Broughton to be Capt., vice J. H. H. Ruxton, retired; March 17, 1877.

20th Foot—Sub-Lieut. H. W. Scott to be Lieut.; Feb. 11, 1876.

50th Foot—Lieut. C. M. Churchill to be Capt., vice W. H. Barker, made Supy. on being appointed Adjt. West Kent Militia; Feb. 6, 1877.

69th Foot—Capt. A. B. Tulloch, from the Supy. List, to be Capt., vice F. H. Dyke, made Supy. on being appointed a Garrison Instr.; April 4, 1877.

80th Foot—Sub-Lieut. A. B. Horsbrugh to be Lieut.; Feb. 28, 1874. Sub-Lieut. W. Moore to be Lieut.; dated April 15, 1874, but his commission as Lieut. in the Army to bear date Feb. 28, 1874.

91st Foot—Sub-Lieut. G. L. J. Goff to be Lieut.; March 10, 1875. Sub-Lieut. G. D. Collings to be Lieut.; Feb. 28, 1876.

102nd Foot—Lieut. C. R. Kerr to be Capt., vice Brevet Major S. H. Bruce, retired; March 17, 1877.

106th Foot—Lieut. J. J. Mallandaine to be Capt., vice H. Bailey, retired; March 17, 1877.

Staff—Major and Brevet Col. W. Bellairs, half pay, Unattached, to be Depty.-Adjt. and Qrmr.-Gen. at the Cape of Good Hope, vice Major and Brevet Col. G. Dean-Pitt, C.B., half pay, late 80th Foot, whose period of service on the Staff is about to expire; May 10, 1877.

Commissariat and Transport Department—The undermentioned Sub Assist.-Comy's. to be Assist.-Comy's., dated April 1, 1877, viz.:—W. Dunne, K. Arnold, M. J. Godfery, J. S. Nevell, J. A. Boyd, E. Gaussen, H. A. L. Harvest, J. Nethersole, F. S. Christian-Hare, H. G. Rice, and E. I. Pocock.

Ordnance Store Department—The following Sub Assist.-Comy's. to be Assist.-Comy's., dated April 1, 1877, viz.:—J. Stoneman, G. H. Jessop, A. F. R. Creagh, G. T. Colebrook, J. Rogers, and S. H. Lynn.

Medical Department—Surg.-Major A. Thomson, M.D., retires upon temporary half pay; March 1, 1877.

BREVET.

The hon. rank of Capt. conferred on Lieut. and Depty.-Comy. H. Telfer, Warrant Officer, Bengal Establishment, to be dated Aug. 2, 1876, and not May 2, 1876, as stated in the *Gazette* of Nov. 10, 1876.

The surname of the Depty. Assist.-Comy., Bombay Establishment, on whom the hon. rank of Lieut. was conferred in the *Gazette* of Nov. 10, 1876, is Forde, and not Ford, as therein stated.

The undermentioned officers of her Majesty's Indian military forces have been granted a step of hon. rank on retirement, dated April 4, 1877:—Lieut.-Col. and Brevet Col. J. C. Wood, Bengal S.C., to be Major-Gen.; Surg.-Major J. L. Paul, Madras Army, to be Depty. Surg.-Gen.

Memorandum.

Staff Assist.-Surg. W. White, half pay, has been permitted to commute his retired allowance; March 5, 1877.

WAR OFFICE, PALL-MALL, April 6, 1877.

Royal Engineers—Col. Sir A. H. Freeling, Bart., retires upon full pay; April 7, 1877. Lieut.-Col. and Brevet Col. Sir A. Clarke, K.C.M.G., C.B., to be Col., vice Sir A. H. Freeling; April 7, 1877. Lieut.-Col. W. J. Stuart, from Supy. List, to be Lieut.-Col., vice Brevet Col. Sir A. Clarke; April 7, 1877. The temporary commissions as Lieuts. of the following officers to be made permanent, and antedated to Feb. 12, 1874, such antedate not to carry back pay, viz.:—J. Clarke and J. G. Lutyens.

BREVET.

Col. Sir A. H. Freeling, Bart., Royal Engineers, to have the honorary rank of Major-Gen. upon retirement on full pay.

INDIA OFFICE, April 5, 1877.

Her Majesty has been pleased to approve of the transfer to the Half-Pay List of the Bengal Staff Corps of the undermentioned officer, viz.:—Capt. T. J. Baynes; March 27, 1877. And that the date of the transfer to the Half-Pay List of the Bengal Staff Corps of Capt. E. E. Gibson, notified in the *London Gazette* of Sept. 29, 1876, be altered from Aug. 22, 1876, to Sept. 12, 1876.

The Militia Gazette.

WAR OFFICE, April 3, 1877.

Where not otherwise specified, the following commissions and announcements bear date April 4, 1877:—

Artillery.

Devon—Capt. W. H. Beadon is granted the hon. rank of Major.

Royal Glamorgan—Edward Windsor Richards, gent., to be Sub-Lieut. (Supy.).

Hampshire—Calvert Hay Stanley Clarke, gent., to be Sub-Lieut. (Supy.).

Royal Lancashire—Capt. S. M. H. Le Marchant resigns commission.

Royal Sussex—Arthur Cuthbert Jeddere-Fisher, gent., to be Sub-Lieut. (Supy.).

1st or South Tipperary—Sub-Lieut. B. F. Going resigns commission.

Infantry.

Royal Bucks—Hercules Robert Langrishe, gent., to be Sub-Lieut.

Royal Denbigh and Merioneth—Surg. O. Richards, M.D., resigns commission.

1st Derby—Lieut.-Col. A. Mosley is granted the hon. rank of Col.

1st Durham—Capt. E. R. C. Pechell, 106th Foot, to be Adjt.; March 14, 1877.

The Essex Rifles—Sub-Lieut. D. C. W. Lysons to be Lieut., Feb. 23, 1876, with date in the General Militia Service of July 15, 1874.

Hampshire—Capt. G. H. G. Hamond-Græme resigns commission.

1st Royal Lancashire—Capt. H. L. Lutwyche resigns commission.

3rd Royal Lancashire—Leith Bonhôte, gent., to be Sub-Lieut.

5th Royal Lancashire — Capt. E. Parker resigns commission.

Royal South Lincoln—Lieut. L. C. Salkeld, from the Royal Westmoreland Militia, to be Lieut (Supy.), vice C. A. Bramble, who exchanges.

1st Royal Surrey—Major G. H. Cazalet resigns commission, also is permitted to retain his rank, and to continue to wear the uniform of the regiment on his retirement.

Royal Westmoreland—Lieut. C. A. Bramble, from the Royal South Lincoln Militia, to be Lieut. (Supy.), vice L. C. Salkeld, who exchanges.

3rd West York—Sub-Lieut. T. S. Walker resigns commission.

The Highland Light Infantry—The Christian names of Major Macdonald are John Andrew, and not John only, as stated in the *Gazette* of Feb. 10, 1874.

The Highland Rifles—Lieut. A. N. Fletcher resigns commission.

1st Royal Lanark—Capt. W. J. O. Giles, from the Royal Dublin City Militia, to be Capt.

Renfrew—Julian Oswald, gent., to be Sub-Lieut.

Royal Dublin City—Capt. C. L. H. Deering resigns commission.

Fermanagh—Sub-Lieut. R. H. Fowler resigns commission.

Galway—Sir Charles John Burke, Bart., to be Sub-Lieut. (Supy.).

Londonderry—Qrmr. T. Lecky resigns commission, and is placed on a retired allowance.

Wicklow—The name of the gentleman whose appointment as Lieut. (Supy.) was notified in the *London Gazette* of March 14, 1873, is Heighington, not Heighinton, as therein stated. Lieut. W. Heighington to be Capt.

YEOMANRY CAVALRY.

Buckinghamshire—The Christian names of Major Morgan are George Manners, and not George only, as stated in the *London Gazette* of March 2, 1877.

Derbyshire—Capt. P. P. Mosley to be Major, vice T. P. Evans, promoted.

Essex—Capt. F. Edenborough to be Major; Dec. 29, 1876.

Nottinghamshire (Southern Nottinghamshire)—Sub-Lieut. W. Arkwright resigns commission.

Staffordshire—Thomas Henry Adkins, gent., to be Sub-Lieut.

Suffolk—Lieut. J. G. W. Poley resigns commission.

Memorandum.

The Queen has been graciously pleased to approve of the services of the officers, non-commissioned officers, and men of the Essex Yeomanry Cavalry being dispensed with, this regiment having failed to enrol a sufficient number of men to entitle it to be borne on the strength of the Yeomanry establishment; March 31, 1877.

Late Essex Yeomanry Cavalry—Lieut.-Col. T. D. Carter and Major F. Edenborough are permitted to retain their rank, and to continue to wear the uniform of the regiment.

WAR OFFICE, April 7, 1877.

Where not otherwise specified, the following commissions and announcements bear date April 8, 1877:—

Artillery.

Royal Cardigan—Capt. H. C. Fryer resigns commission.

Devon—Major J. C. New resigns commission, also is granted the honorary rank of Lieut.-Col., and is permitted to continue to wear the uniform of the regiment on his retirement.

Haddington, Berwick, Linlithgow, and Peebles—Sub-Lieut. F. D. C. S. Kennedy resigns commission.

Hants, Isle of Wight—Harry George Adams-Connor, gent., to be Sub-Lieut. (Supy.)

Sligo—Sub-Lieut. H. R. L. Holden, from the Prince of Wales' Royal Regiment of Longford Rifles Militia, to be Sub-Lieut. (Supy.).

Engineers.

Royal Anglesey—Sub-Lieut. W. M. Menzies resigns commission. Capt. A. J. Hepper, Royal Engineers, to be Adjt.; April 1, 1877.

Royal Monmouth—Lieut.-Col. J. S. Payne is granted the hon. rank of Col. Capt. Sir A. W. Mackworth, Bart., Royal Engineers, to be Adjt.; April 1, 1877.

Infantry.

2nd or South Devon—The Hon. Walter Yarde Buller to be Sub-Lieut. (Supy.)

Dorset—The Hon. Arnold Allan Cecil Keppel to be Sub-Lieut.

Royal South Gloucester—William Alexander Baring Bingham, gent., to be Sub-Lieut. (Supy.); March 26, 1877.

6th Royal Lancashire—Qrmr. L. L. Reade resigns commission, and is placed on a retired allowance; April 1, 1877.

2nd Royal Middlesex—Lieut. J. J. H. Hamilton and Sub-Lieut. C. J. R. Scudamore resign their commissions.

3rd Stafford—Lieuts. C. W. Lyon and W. R. P. Jervis to be Capts.

The Royal South Wales Borderers—Major C. B. Lewis resigns commission.

1st Warwick—Henry Dolben, gent., to be Sub-Lieut.

2nd Warwick—Sub-Lieut. C. H. Jenkins resigns commission.

Worcester—Sub-Lieut. J. A. Buchan resigns commission.

Dublin County—Sub-Lieut. J. L. C. Acton to be Lieut.; Feb. 22, 1875.

Galway—Lieut. J. D'Arcy resigns commission, also is permitted to retain his rank, and to continue to wear the uniform of the regiment on his retirement.

Kildare—Sub-Lieut. C. de la P. B. Croker resigns commission.

Leitrim—Capt. and Adjt. G. Phibbs, 87th Foot, from the Sligo Militia, to be Adjt.; April 1, 1877.

YEOMANRY CAVALRY.

Berks—Capt. R. Eykyn resigns commission. Henry John Andrews Eyre, gent., to be Sub-Lieut.

Montgomeryshire—Capt. W. H. Adams resigns commission, also is permitted to retain his rank, and to continue to wear the uniform of the regiment on his retirement.

Northumberland—Henry George, Lord Eslington, to be Lieut.-Col., vice B. Burrell, resigned.

Oxfordshire—Robert Snow Bolton Davis, gent., to be Sub.-Lieut. (Supy.); Capt. and Adjt. J. B. Hayes, 12th Lancers, resigns commission.

West Somerset—Lieut. A. F. Bernard to be Capt.

2nd West York—Sub-Lieut. A. H. Charlesworth resigns commission.

The *Sydney Morning Herald* says:—"We are informed by the Hon. Colonial Secretary that a cipher message has been received by his Excellency the Governor from Lord Carnarvon, stating that Cols. Laffan and Scratchley, R.E., have been selected, in compliance with the wish of the colonies, expressed through his Excellency, to arrange for the military defence of the Australian colonies. A part of the message, it appears, was undecipherable, and it is not clear whether we are to be visited by one or both of these officers. Colonel Laffan was sent out on a special mission in Ceylon in 1865, while Sir Hercules Robinson was there, to arrange the military establishment and defences of that colony."

The *Irish Times* points out that "there now remain only two supernumerary majors in the late purchase Cavalry to be absorbed—Major Ide A. Clarke, 4th Hussars, and E. A. Gore, 3rd Hussars. When purchase was abolished at the end of 1871 the number was nineteen."

TACTICAL INSTRUCTION.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—Since the delivery of Col. Brackenbury's excellent lecture on "Tactical Instruction," questions to the following effect were put by a commanding officer of a battalion:—"I agree fully with what Col. Brackenbury advocates as regards tactical instruction carried out by the regimental officers; but what are we to teach, and how are we to teach it?" These questions are very natural, and they occur to every instructor at the commencement of his career as a teacher. Answers to them are imperatively required, as, unless given, the matters on which instruction is most needed may, perhaps, be omitted from the programme, and others included which are comparatively unimportant. It is also essential, for the sake of economy of time and labour, that the modes in which the instruction is conveyed shall be such as experience has shown to be effective. Until, however, both a syllabus and a system of instruction shall be furnished to the Service "by authority," we must seek for the desired information from armies which are actually engaged in the practical work of instruction in modern tactics. I would, therefore, bring to the notice of your readers a French work just published, and entitled "Instruction Pratique de la Compagnie d'Infanterie sur le Service en Campagne et les Operations au Combat pour celle à donner au soldat, à l'esconade, à la section, &c., par un Officier Superieur du 4me Corps. Paris: Dumaine, 30, Rue et Passage Dauphine." It is intended to supplement in detail the official "Instruction Pratique sur le Service de l'Infanterie en Campagne," of which Colonel Brackenbury spoke in deservedly high praise. The "Officier Superieur" endeavours, and I think successfully, to systematise the instruction, and to teach teachers how to teach. That portion of the book which deals with signals may, however, be with advantage put out of consideration. There is no lack of officers in Line regiments who, receiving from their colonel a statement of time at disposal for out-door work, could easily prepare for the forthcoming drill-season a skeleton syllabus, with illustrative projects to be worked out on the ground near the station. This should be accompanied with a detailed account of the system of instruction to be followed. It is difficult to lay too much stress on the necessity that exists for officers learning how to teach before they attempt to give instruction. Col. Brackenbury judiciously avoided all reference to this "breakers ahead" of tactical instruction; but it seems to me just as well to recognise the existence of the difficulty (one like all others made only to be overcome), and thus to avoid the reaction due to disgust, arising from first failures. Practical tactics, as a subject of instruction, is like all other subjects, and experience is necessary to enable a man to teach it. Moreover, it is not everyone who has the knack of conveying instruction. A certain amount of long-suffering, self-repression, and patience is also required for those who have to gauge and fill up the startling depths of human ignorance and stupidity. I hope, therefore, that I shall not be deemed presumptuous if, as an old teacher, I offer a few hints to those commanding officers who purpose carrying out the instruction of their non-commissioned officers and men. 1. The amount of instruction to be given should not be too extensive, or too ambitious in design. 2. The instruction must be thorough, extending to the most minute details. Superficial knowledge is carefully to be avoided. 3. Each officer must know exactly what he is expected to teach, and be instructed beforehand how to give the instruction. 4. The number of men told off to each officer must be small, so that every individual may be thoroughly and equally well taught, and his shortcomings be detected. It is well to bear in mind that the strength of an outpost chain, like that of all other chains, depends on the strength of its weakest link. 5. The thorough teaching of a few men at first facilitates the subsequent instruction of the remainder, as the instructor receives no inconsiderable amount of aid from those who have already mastered the subject. In commencing this great work of tactical instruction, it is desirable not to expect too much at first. Unless the officers and soldiers of Continental armies are utterly dull and stupid, it would seem that the whole professional life of a military man is one of study and instruction; and, therefore, the British nation, which regards with such alarming indifference the suspension of manœuvres, supposed among Continental armies to be as of vital importance, will doubtless accept with equanimity the fact that it must be some years before she can possess an armed force of thoroughly trained soldiers. We must, however, do the best with the means at our disposal, and the existence at the end of next drill season of even a small number of "efficients" will be a matter of rejoicing, and a presage of future and accelerated progress.—I am, &c.,

LONSDALE A. HALE, Major R.E.
Instr. Military History, S.M.E.

March 20, 1877.

PARLIAMENT.

Army Promotion.

In the House of Commons on Thursday Mr. Owen Lewis asked the Secretary for War if it was his intention to introduce the Army Promotion and Retirement Scheme by Royal Warrant or not, and if it was true that majors and captains who obtained their present rank before the abolition of purchase would not be liable to compulsory retirement under its provisions.

Mr. Hardy hoped the hon. gentleman would not think it discourteous if he declined to answer his question until he had an opportunity of making a statement to the House upon the whole subject involved in the question.

Outbreak of Scurvy on Board the Alert and Discovery.

Capt. Pim asked the First Lord of the Admiralty when the report on this subject would be laid on the table of the House.

Mr. Algernon Egerton, in the absence of the First Lord of the Admiralty, was understood to say that he had not yet received the report of the medical officers on the subject, and that he could not, therefore, lay it at present on the table.

The Militia and Brigade Depot System.

Sir Alexander Gordon asked the Financial Secretary to the War Office when the index and digest of evidence taken before the Committee which sat last Session on the above system would be delivered to members.

Mr. L. Stanley said that there had been some delay in consequence of the gentleman to whom the work had been referred having been occupied in certain important calculations. It was not, however, a necessary part of the report of the Committee, and he thought it would be in the hands of hon. members in about three weeks or a month's time.

INDIA.

We (*Englishman*) are glad to hear that Major-Gen. Sir Henry Norman is not to be allowed to leave India without some practical demonstration of the esteem and liking which are generally felt for him both in his public and his private capacity. What form the demonstration should take is still uncertain; but the matter has been taken up very heartily by his many friends. On March 1, Lord Lytton entertained Sir Henry and Lady Norman at dinner. Fifty or sixty guests were invited to do honour to the occasion. After the toast of "The Queen and Empress" his Excellency rose and said:—Ladies and Gentlemen—I have invited you here this evening to join me in doing honour to an eminent man, who will soon be leaving India, after a long series of public services to this empire and to its Government, carrying with him a varied accumulation of administrative experience, the benefits of which are probably most needed and best appreciated by those who, like myself, are so soon to lose them. Something of sadness will, no doubt, be long felt when we, his colleagues, miss from our council board the voice we have so often consulted, and when from you, his friends, the face and form so long familiar to the homes they have gladdened shall have passed away. But to night, ladies and gentlemen, let us only rejoice that the soldier-statesman, from whom we shall soon be parted, is no worn-out veteran retiring to a rest which he is no longer able to enjoy, but that he leaves us in the prime and fulness of his matured powers, with many years, in the course of nature, still before him, either for renewed service in the field, should the interests of his country call him to it, or for that dignified private leisure which, in all probability, few public men, even in the midst of their greatest triumphs, have not ardently sighed to attain. After eulogising Sir Henry's varied services in the council and in the field, with special reference to the siege of Delhi, which "saved, and I trust saved for ever, the British power in India," Lord Lytton concluded thus:—Ladies and gentlemen, I am confident that whatever be the field, whether of labour or of repose, for which he will so soon leave us, those rare qualities will be no less gratefully appreciated by all who may have the happiness of being associated with Sir Henry Norman in public or in private life. Certain I am that to both and each of them he carries with him the cordial and affectionate good-wishes of those he leaves behind him in India. On their behalf, ladies and gentlemen, I now request you to fill your glasses and to join me in drinking, with full honours, long life, health, and prosperity to Sir Henry Norman and to Lady Norman. The toast was drunk with much enthusiasm, after which Sir H. Norman made a suitable and feeling reply.

Allen's Indian Mail is glad to learn that the military authorities at Peshawur have asked the Commander-in-Chief to sanction a measure by which the health of the British troops at that station might be very greatly improved. They propose that in September of each year, before the setting in of the fever and cholera seasons, the regiments should be marched out to the Yusufzai plain, north of Nowshera, and remain there under canvas until the middle of November. The Yusufzai country is open and comparatively dry, with little or no irrigation, and therefore no sickness to speak of. The scheme has been sent back for elaboration in details, and there is said to be every hope of its receiving a fair trial during the autumn of the present year.

Col. Drayson, R.A., who was lately head of a committee for considering certain improvements in the fort at Allahabad, has since been engaged on similar duty at Calcutta. Major Sandford, R.E., has been working with him. The *Pioneer* understands that among the recommendations these officers will make will be one which has once already been put forward by Sir W. Jervois—the addition of a few heavy rifled guns to the fort's armament. "Field Artillery in India is now, we believe, in a fairly satisfactory condition, but the guns in position in most of the strong places require to be replaced by weapons of a less antiquated design."

Major-Gen. Sir Edwin B. Johnson, K.C.B., Royal Artillery, who succeeds Major-Gen. Sir Henry Norman as Military Member of the Council of the Governor-General, accompanied by his brother, Col. C. C. Johnson, Bengal S.C., Depty. Qrmr.-Gen. of the Indian Army, arrived out from England by the overland mail on the 8th ult.

Lieut.-Gen. Lord Mark Kerr, C.B., and Major-Gen. A. Macdonnell, C.B., are expected home from India in the course of a few days, on vacating their divisional commands.

A Chief Instructorship of Garrison Instruction in Bengal has fallen vacant, Major W. H. Richards having handed over his duties on the departure of his regiment, the 55th, for England.

Col. A. Howlett, C.B., Madras S.C., is permitted to reside and draw pay in England.

Col. J. Fendall, Bengal S.C., is about to retire from the Service on a pension of £156 5s. per annum, with an addition of £373 18s.

Lieut.-Gen. F. R. E. Rowcroft, Bengal Infantry, died at Holcombe, Dawlish, on the 22nd ultimo, aged seventy-four years. Gen. Rowcroft commanded the Sarun and Goruckpore Field Force with the Naval Brigade of H.M.S. Pearl in the Goruckpore District during the Indian mutiny campaign of 1857-58 as brigadier from Jan. 1, 1858, including the successful actions at Sohunpore, Phoolpore (capturing three guns), Amorah, near Fyzabad, March 5, 1858 (capturing eight guns), near Amorah, April 17 and 25, on the Raptee, Nov. 26 and Dec. 3, and at Toolsepore (capturing two guns), (medal and C.B.). He entered the Army May 26, 1819; became lieut., Sept. 14, 1821; capt., Aug. 7, 1829; major, May 26, 1843; lieut.-col., Nov. 14, 1849; col., Nov. 28, 1854; major-gen., Jan. 1, 1862; and lieut.-gen., June 25, 1870.

Letters from Whydah up to the 7th ult. state that the blockade of the coast of Dahomey was strictly maintained, and the French admiral had made a protest against the English war vessels commencing hostilities. The escape of one of Messrs. Swanzy's agents from Abomey was reported. He succeeded in crossing the lagoons, and reached Quittah after having suffered great privations. It was feared that the King would make reprisals on the remaining prisoners, four in number, who are of French nationality. From Monrovia it was reported that the Liberian difficulties were at an end, an amicable settlement having been arrived at.

STATIONS OF THE BRITISH ARMY.

[Where two places are mentioned, the last-named is that at which the depôt is stationed.]

Corrected up to April 7.

	Year in which the corps last went on or returned from foreign service.	*Foreign Station to or from which it last changed.*
1st Life Guards—St. John's Wood	1816	France
2nd—Windsor	1816	France

COLONIAL CORPS.

1st WestIndia Regt.—West Indies
2nd—Sierra Leone
Malta Fencibles—Malta

ARMY SERVICE CORPS

Head-quarters—109, Victoria-street, Westminster.

The Cork papers announce the election for the fourth time of Major-General E. Roche as chairman of the Midleton Board of Guardians. The magistrates and elected guardians were unanimous, and the gallant general took the chair amidst loud applause.

The following letter has been addressed from Headquarters:—"Horse Guards, March 28, 1877.—Sir,—Referring to general instructions regarding canteens in Section 3 of 1873, I have the honour, by direction of the Field-Marshal Commanding-in-Chief, to acquaint you that sergeants should not be allowed to drink at the canteen, as they have their own mess, where they can obtain refreshments, and allowing them to drink at the canteen can only result in lowering their position among the men; but, of course, they can deal at the canteen for any supplies they may require. I have to add that detachments must be treated exceptionally, and in places where there is no sergeants' mess sergeants might be permitted to obtain liquor at the canteen; but, in such cases, care should be taken to have a room set apart for them, if possible. However, they should, at all events, be separated from the men wherever they have the use of the same room.—I am, &c., D. R. GREAVES, Depty. Adjt.-Gen."

We are requested to remind officers and sergeants who propose competing in the Inter-Regimental Rifle Matches of the current year that the entries should be made by the 15th instant.

The following officers arrived at Portsmouth on Monday in H.M.S. Malabar from India, viz.:—Lieut.-Col. Blundell, 3rd Hussars; Lieut. Barker, 16th Lancers; Lieut.-Col. Ford, Capt. Pearse, and Vet.-Surg. Skoulding, Royal Artillery; Pymr. (Capt.) Elliott, 1st; Sub-Lieut. Hind, 3rd; Capt. Vincent, 5th; Lieuts. Lawrence and Forster, 18th; Lieut. Bather, 25th; Capt. Bally, 33rd; Lieuts. Rudyard and Fenwick, 39th; Capt. Murphy and Sub-Lieut. Purchas, 40th; Lieut. Thrupp, 45th; Lieut. Stoyte, 59th; Lieut.-Col. Montgomery, Capts. Charley and Chalmer, 60th; Major Hay, 62nd; Capt. Day, 63rd; Lieuts. Hamilton and Coleman, 65th; Lieuts. Lendrum and Spens, 72nd; Capt. Vipan, 89th; Lieuts. Forbes and Gilpin-Brown, 92nd; Lieut. Murphy, 109th; Surgs.-Major Sherlock, Collis, and White; Surgs. Drury, Duke, and Burnett, A.M.D. Also the following wives of officers:—Mesdames Blundell, Sherlock, Collis, Ford, White, Bally, Murphy, Skoulding, Pearse, Thrupp, Lawrence, Hamilton, and families.

The death is announced of Lieut.-Gen. H. W. Whitfeild as having occurred at 13, Snargate-street, Dover, on the 30th ultimo. The deceased entered the Army Feb. 13, 1828; became lieut., Oct. 28, 1831; capt., April 15, 1842; major, Feb. 14, 1853; lieut.-col., Feb. 3, 1854; col., Nov. 28, 1854; major-gen., Aug. 13, 1868; and lieut.-gen., Oct. 6, 1876. The funeral took place on Wednesday, and was of a private character, the military authorities having refused to grant military honours on the ground that deceased was not in active service at the time of his death. Col. Wise and Qrmr. Kelly, of the 2nd West India Regiment, Capt. Burn, 18th Hussars, formerly aide-de-camp to Gen. Whitfeild, and a few other officers acted as pall-bearers.

HUNYADI JÁNOS.

ROYAL CAMBRIDGE ASYLUM FOR SOLDIERS WIDOWS, KINGSTON, SURREY.
OFFICE: 40, Charing Cross, S.W.

This Asylum was opened in February, 1854, to provide a home for the widows of non-commissioned officers and privates of the Army.

There are 57 widows in the Asylum.

Each widow has a furnished room, and receives six shillings weekly, besides a monthly allowance of two shillings and sixpence for coals.

The funded income of the charity yields only £556, with an additional £50 from the Princess Mary's Fund for Nurses, to meet an estimated expenditure of £2,100 per annum.

An annual subscription of half-a-guinea, or a donation of five guineas, entitles to one vote at each election, with the right of nominating a candidate.

A regiment can purchase a vote in perpetuity by paying five guineas. J. A. STEWART, Colonel, Secretary.
Office, 40, Charing Cross, S.W.

GAIETY RESTAURANT, STRAND.

NEW GRILL ROOM. Largest in London. Dinners à la Carte.
GRAND HALL FOR PUBLIC DINNERS.

Army & Navy Gazette.

LONDON, SATURDAY, APRIL 7, 1877.

An action *may be* fought between Infantry and Infantry unassisted by any other arm. Let us admit the fact. But, then, if it be possible, it is in the highest degree improbable. Indeed, it is not to be conceived that a force of 10,000 men, supposed to represent regular troops, in divisions and brigades, could be engaged in warfare without any Artillery or any Cavalry. Infantry and Artillery may be engaged with Infantry and Artillery without any Cavalry element, or Cavalry and guns may encounter a force similarly constituted; but now-a-days such an encounter as was represented by the forces employed at Dunstable on Easter Monday may be pronounced quite out of the range of likelihood. Now, consider what that means. It is simply this—that if the battalions engaged on that occasion were exposed to the action of an arm which they had not taken into account, the very practice they had might be worse—much worse than useless. The presence of a brigade of Cavalry, or of a couple of batteries, would have rendered all Lord Abinger's tactics and Lord Ranelagh's manœuvres quite impossible. Are the Volunteers to blame? Surely not. Of the Volunteers, officers and men, there is nothing to be said but what is very much to their credit. Who committed the tactical faults which "military correspondents" have described—the want of adequate reserves, the gaps between brigades and battalions, the dispersion over too much frontage, and the like? Certainly it was not the Volunteers. Therefore, it comes to this, that the military authorities, who neglect to treat the Volunteers as integral parts of "the Army," are to blame because they have not done anything to correct the mischief inherent in the composition of a Volunteer force left to its own devices. It is now some years since a death-blow was given to the Easter Monday Review by the plain, out-spoken, if somewhat rough criticism of the veteran officer, now no more, who directed one of the great gatherings, and yet the authorities have done but little to develope what is so good in the force, and to weld it into the body of "the one harmonious whole." Let the War Office turn its attention to the real good that is to be got out of the men who could go through such discomfort as was endured by the representative body of them which displayed such excellent qualities at Dunstable, and the result will be a vast increase of efficiency in the national Army and a most satisfactory result for the public outlay on the Volunteers. It should not be impossible next year, at all events, to make arrangements for manœuvres in which the local forces, Regulars and Militia, with fair contingents of horse and guns, should be employed in work which would be a preparation for active service.

Those who are acquainted with the secret, or rather with the inner, life of the Court of Berlin, are well aware that there is really no regard or affection between the Emperor and Prince Bismarck on either one side or the other. With the usual weakness of successful Kings, the conqueror of Koniggrätz and Sedan thinks that his Chancellor has had too much credit for what he has done, and that his glory is diminished by the lustre of his Minister's fame. In one word, the Kaiser is jealous of the Chancellor. The latter has from time to time not hesitated to speak of his august master in a manner which is not consistent with respect, or even duty, and has been known to dwell in the most open way on the obstinate resistance he encountered to the policy which has achieved such immense results.

There is no foundation for the statement in *Mayfair* that to "Lord Elcho, Sir Charles Russell, and Colonel Lloyd Lindsay belongs the honour of having led off the round of groans which saluted Sir George Campbell." The assertion that "the demonstration had been carefully rehearsed at the Carlton"—unless it be intended as a specimen of "the fun of the Fair"—needs no further notice than the remark that Lord Elcho has not been inside the Carlton for a long time, and that such a rehearsal never took place inside or outside the Club.

The Berlin correspondent of our contemporary and neighbour—the *Morning Post*—in making some remarks upon the retirement of Major-General Walker from the post he has occupied so long and so efficiently as Military *Attaché* to the British Embassy at the North German Court, states that it is probable that no successor will be appointed, owing to the attitude of the authorities, and that the resignation of General Walker may be attributed to the course which has been pursued towards him. We feel great difficulty in accepting these statements as absolutely true. It is very hard to believe that General Walker—so long a *persona grata* to the Crown Prince, so intimate with many, if not all, of the great chiefs of the German Army, the object of such favour on the part of the Emperor himself—should have been exposed by the smaller people in office to slight or restrictions in the discharge of his duties, although there is reason to fear that the offensive spirit which great military success is apt to engender has grown with the growth and strengthened with the strength, if not with the "simple, honest Germans," certainly of the Brandenburghers. But one would think that a word from Kaiser or Prince would put an end to any conduct of that sort. It must be remembered that General Walker's term has been extended, and that, notwithstanding his connection with Prussia, and the family reasons which might induce him to remain in Berlin, he is a British officer. But we cannot easily credit the statement that the Government of Germany, which is, after all, in such matters purely military, and in the hands of the Emperor, should manifest such a narrow and unfriendly spirit as to prevent the Government of this country seeking to fill the vacant post. Our readers will remember that some time ago we devoted a portion of our space to a consideration of the whole question of the status of Military *Attachés*, and we have seen no reason to change the opinions therein expressed, that under present conditions they are of very little use—that their presence in unfriendly States is regarded with suspicion, and may be made the means of offence and irritation, and that in war time they are placed in a position which is practically untenable. It is very certain that if this Government does not see its way to employing a Military *Attaché* at the Court of the greatest military Power in Europe, it will not be easy to justify the maintenance of such an officer in other quarters.

In every case where it can be conveniently arranged, Line regiments are to pass, during their tour of home service, a year or so in or near the counties with which they are associated under the localization system, the connection between them and the districts from which their recruits are principally drawn thus being rendered more real. The advantages which will result from this very excellent arrangement are incalculable.

We are sorry to learn of a case of the grossest insubordination on the part of a man of an Infantry regiment towards his commanding officer, one who has never earned for himself the character of being either arbitrary or unjust in his dealings with subordinates. Happily, the charge preferred against the prisoner has not assumed any more serious form than that of "insubordination."

It is little more than a year since Sir Jung Bahadoor was "showing the way" to the Prince of Wales in the wild hunts of Nepal. He seemed then a man of iron, and talked of his approaching visit to England as a certainty. But it is believed that he never quite got over the effect of his severe accident at Bombay the year before, which prevented his departure for Europe, and he suffered from slight indisposition once or twice during the Prince's excursion in the Terai, as we learn from Mr. Russell's book. He was an abstemious man, except in two respects, and he was naturally of an extraordinary robust constitution; but it was surely a crucial test of his powers to plunge into an icy cold river ere daybreak in the month of February, and to come out all shivering and dripping to say his prayers? He was over sixty years of age, and one can only wonder at the spectacle of a man so sagacious doing such a foolhardy thing in the exercise of what he esteemed his religion. The fact that, with all the boasted facilities of communication, we only learn from a native paper of the manner of his death more than five weeks after it occurred close to our frontiers, shows how "remote" Nepal really is from India. The story of the *suttee* of the three wives of the deceased is sufficiently ghastly, and becomes all the more painful when it is remembered that when they received the Prince of Wales in their camp whilst he was in the Terai, and sent a valuable present to her Royal Highness the Princess of Wales, their agreeable looks, pleasant manners, and dignified behaviour were said to have produced a most favourable impression on the Royal visitor and his suite. The native paper does not state which of Sir Jung Bahadoor's many sons set fire to the altar on which they perished; but if it were Bubbur Jung who applied the torch he may not have been a matricide, as it is believed he was the son of a younger wife. Runodeep Sing, who appears to have succeeded to the position held by his brother, which was virtually the absolute government of Nepal, is not supposed to possess much of the ability—but, perhaps, he has all the resolution—of the late Prime Minister. He is a squat, ill-built, odd-looking little man, with splay feet and calmuck face; but he is said to be brave and to possess the confidence of the troops. There have been some absurd remarks in the English papers about the anarchy and assassinations in Nepal. The fact is that for thirty years there has been complete internal tranquillity, and external troubles were confined to a war with Thibet, which had a successful termination, and the great expedition into Oudh in aid of our forces in 1858, led by Sir Jung Bahadoor in person. What may happen now it is impossible to foretell. The Maharajah is a simple "fakir," who is entirely given up to the other world, and the Maharanee is, or was till lately, a kind of exile in Benares. If our authorities take this opportunity of pressing on the Government of Nepal the necessity of a survey, or of relaxing present restrictions on free intercourse, they may no doubt create disturbances of no ordinary magnitude and importance. "Let sleeping dogs lie." On February 25 Sir Jung Bahadoor died peacefully, saying his prayers, in Nepal. That day twelvemonth he was directing one of the maddest hunts ever seen, with the Prince of Wales at his side, and riding like the demon huntsman full of life, energy, vigour, and excitement.

Major H. Bond, Royal Artillery, has been appointed Assistant-Superintendent of the Royal Small Arms Factory at Enfield, vice Lieutenant-Colonel C. F. Cockburn, whose period of service has expired. Major Bond, who recently obtained the Advanced Class certificate, entered the Army April 7, 1856, and became Major January 16, 1875.

Lieutenant-General C. A. Edwards, for whose appointment to the 2nd Queen's we prepared our readers a fortnight since, is to join his old regiment, the 18th Royal Irish, vice the late Field-Marshal Sir J. F. FitzGerald.

The following promotions take place in the Army consequent upon the death of Lieutenant-General F. Rowcroft, Bengal Infantry, which occurred on the 22nd ultimo—viz., Colonel B. Harrison, commanding the Brigade Depôt at Bradford, to be Major-General; Major R. Law, unattached Staff Officer of Pensioners at Plymouth, to be Lieutenant-Colonel; and Captain R. Blount, 20th Regiment, to be Major.

On vacating his appointment as Aide-de-Camp to Lieutenant-General Sir J. W. Fitzmayer, Captain E. Woollcombe, Royal Artillery, has been selected to succeed Major F. Downes, R.A., whose period of service has expired as Instructor in Gunnery at the School of Gunnery, Shoeburyness.

Captain W. F. de H. Curtis, R.A., has been appointed Inspector of Warlike Stores at Hong Kong, vice Lieutenant W. P. Kelly, R.A., returning to England.

The promotions in the Army resulting from the death of Lieutenant-General H. W. Whitfeild, which occurred on the 30th ultimo, will be as follows, viz.:—Major-General H. D. White, C.B., Colonel of the Inniskilling Dragoons, to be Lieutenant-General; Colonel E. D. W. Lowe, C.B., half pay, late 86th Regiment, to be Major-General; Major E. St. J. Griffiths, half pay, late 19th Regiment, to be Lieutenant-Colonel; and Captain W. C. Wolseley, 6th Regiment, to be Major.

There are two Rewards for Distinguished Service vacant, one in consequence of the appointment of Lieutenant-General Edwards to the Colonelcy of the 2nd Queen's; a second by the death of Lieutenant-General H. W. Whitfeild.

Can it be true that the Colonial Office refuses to grant pay for a Military Secretary to the Governor of the Cape of Good Hope? Sir Bartle Frere, when he left England the other day, was anxious that such an officer should have accompanied him, but the question of expense prevented his wish being gratified. It is too bad that this should be so. One would have imagined that at a time when the state of affairs in Southern Africa is such as to have necessitated a strengthening of the military establishments the idea of providing a qualified military adviser for the newly-appointed Governor would have met with favour, not disfavour, at the Colonial Office.

So soon as the question of future retirement is decided upon, steps are not unlikely to be taken for providing promotion for the senior officers of regiments the Lieutenant-Colonels of which have for lengthened periods retained their commands. We are assured that the grievance of the officers of the regiments referred to as to the stagnation which has so long existed is admitted; but in the present unsettled state of affairs it is considered that it would be unjust to interfere with those who have purchased their positions, and are known to be waiting on in the expectation that the terms now offered them may be improved.

Is it not a strange thing that the Governor and Commander-in-Chief of an important fortress like Gibraltar should be without a Military Secretary? Lord Napier of Magdala has been fulfilling the duties of Governor of Gibraltar since October last, and the Assistant Military Secretaryship on his Staff is still vacant. Meanwhile there are hundreds of field officers passing their time in idleness who cast longing eyes on an appointment which would enable them to qualify for promotion.

REVIEW.

Blackwood's Magazine.

The April number of *Blackwood* opens with an article on "The French Army in 1877," which will be read with exceptional interest. Commentaries on the same subject have been already published in this magazine by the author of the paper now under notice, and have achieved for him a strong belief in the *bonâ fides* of his statements. He found the ruinous errors which existed in 1870 unredeemed in 1875, and he did not shrink from exposing them. He still considers that it will be to the advantage of France that the subject should be continued—that knowledge of the realities of her military position should not be confined to special students, and that her cause will be best forwarded by openly scrutinizing her situation. Hence the origin of this paper. The present situation of France points to two unmistakable conclusions—First, that she cannot attack Germany. Second, that, if invaded, she can now most certainly defend herself; nay, more, that even though the will of Germany may be to endanger France, the *rôle* of conqueror will be too difficult a one to attain. In order to demonstrate the truth of these propositions, the writer in *Blackwood* resumes the thread of his previous inquiries, and takes under consideration the progress made by France since 1875. In his opinion, "signal success has been made since 1875. More vigour has been thrown into the management. In many directions energy has been substituted for routine. Force has gone on steadily accumulating, and though defects of system and of management are still terribly numerous, though a large variety of points are still open to just criticism, the organization is so advanced, the general improvement is so real, that it now may be said, at last, that France has indisputably an army." It may appear to some that these are bold conclusions to arrive at, and that they should be received with caution; but it must be remembered that when a different order of things prevailed it was denounced without hesitation. Moreover, the causes of this amelioration are distinctly pointed out. "Abundance of money is the foremost of them all. France has been able to pay for what she needed. The steady, zealous action of the regimental officers is as manifestly the second source of her strength; and next may be classed successively the influences of opinion, of time, of experience, and of accumulated labour." Having referred with rather doubtful praise to the new War Minister, General Berthaut, the author of "Des Marches et des Combats," our attention is called to the old deficiencies which still exist in the War Office, the gravest by far being "The Intendance," which, notwithstanding legislation, is still "the marrowless institution which we saw hobbling through its work in 1870; it still fondly clings to its immemorial feebleness and to its hereditary defects. Even at the last autumn manœuvres, where every movement was exactly known beforehand, it seems to have felt that it would have been a disgrace to it to do its work properly; so, to keep up its traditions, the troops were left occasionally without food." We thus see that the author of this paper deals with no unsparing hand when exposing the evils that still exist in the French Army. It is, therefore, with greater confidence that we follow him where he feels justified in pointing out in what other directions "the march ahead has been prodigious." First, the system of tactics has been entirely changed, and in no army in the world is the substitution of open order for close formations likely to produce better results. Again, the new "Règlement des Manœuvres" is so thoroughly fitted to the temperament of the French soldier that it is not impossible, if it had been in force on August 14 and 16, 1870, the battles of Borney and Rèzonville would have been victories for France. Here follow more abundant proofs of the "prodigious march ahead." "The *matériel* is at last almost entirely reconstituted. The fortresses and the entrenched camps, which have been established to defend the open frontier, are nearly finished; some of them, indeed, are already armed, stored, and victualled for a siege. The more essential of the new forts around Paris are terminated, armed, and even garrisoned. To do all this, one hundred and sixty millions sterling have been laid out upon the Army in the five years between 1872 and 1876. Ninety millions thereof have gone in ordinary annual expenditure, and seventy millions for special outlay on *matériel* and defences. The result is that France has now reached a point at which she can, at last, begin, if necessary, to use the instrument she has created." The next point that comes under consideration is how France could use that instrument in case she needed it? In other words, how could she manage the mobilization of her forces? For mobilization alone can prove the precise nature of the work done since 1871, can realize the value of that work, and supply a searching test of the military institutions of the country. The question that at once arises is whether or not there would be a collapse similar to that of 1870, or whether the present organization of France is at length sufficiently developed to render such an apprehension needless? In seeking a reply to these questions, the author examines the rules which determine the conditions under which a mobilization would now be conducted. The most important of these are the laws of March and November, 1875, which provide that the French Army may be called out *en masse* by the simple and expeditious process of "publication par voie d'affiches sur la voie publique sans attendre la notification individuelle." So simple is this plan, so expeditious is its nature, so practical and intelligent, that it has been already copied from France by Germany, and, no doubt, will be adopted throughout Europe as the plan *par excellence* for all future mobilizations. Having pointed out the difficulties which arise from the obscurity of the laws determining the conditions under which a mobilization should now be conducted, and having suggested certain improvements, the author proceeds to discuss the practical working out of the process itself—a discussion interesting in the extreme, but one which, from want of space, we can only refer to the attention of our readers. In concluding this exceedingly able article the writer points out that France has sought, and failed to find, an ally since 1871, but that still she has one, not a nation, nor a monarch, but simply distance. If France attacked Germany she would lose by distance; so would she profit by it if herself attacked. Hence comes the author's first conclusion, that France cannot attack Germany. As to the second—namely, can France, if attacked, defend herself?—evidence of the affirmative is abundant. If another "scare" burst out to-morrow, it would find her, at last, in a situation to effiaciously protect herself. She would no longer talk of withdrawing her useless soldiers behind the Loire, and of leaving the invader to overrun an undefended country. If Germany again proclaimed the wish to crush up France for good before she is fit to fight, France would this time look her calmly in the face, and would say to her, in the consciousness of sufficient strength—"It is too late!"

NAVAL OBITUARY.

During the past quarter the deaths of the following officers have been officially reported to the Admiralty:—

Flag-Officers—Admiral of the Fleet—Sir Fairfax Moresby, G.C.B. Admirals—on Reserved List—Henry Gossett and Charles H. Swinburne. On Retired List—Sir Augustus W. Clifford, Bart., C.B., and Sir Edward Belcher, K.C.B. Rear-Admiral—on Retired List—John L. R. Stoll. Captains—Radulphus B. Oldfield, C.B., and Hugh Campbell. On Retired List—George F. Day, C.B., V.C., Richard Edwards, William J. Scudamore, Henry W. Corneck, and John E. Davis. Commander—Thomas Hooper. On Reserved and Retired Lists—John W. James, Vincent Williams, Arthur Salwey, Cottrell B. Powell, Richard E. Pym, John Hall, James A. Gordon, Isaac Burch (a), Francis R. Dashwood, Joseph Grote, Edmund Pope, Henry Oakeley, Harry Smith, Augustus F. I. Bowen, Arthur Kennedy, St. Leger Aldworth, Charles Knighton (b), Charles W. Jones, and Charles Bawden. Lieutenants—Robert C. Jolliffe, Edmund B. Wallace, and James B. Fellowes. Staff Commander—on Reserved List—Joshua Whiting. Navigating Sub-Lieutenant—William F. Barry. Midshipmen—Charles M. H. Oakeley and Watkin H. Wingfield. Chief Engineers—George Mills and Herbert Pitt. On Retired List—William G. Barr. Chaplain—on Retired List—Richard R. Bloxham. Deputy Inspectors-General of Hospitals and Fleets—Alexander E. Mackay, M.D. On Retired List—Charles R. Brien, M.D. Staff-Surgeons—Benjamin H. M‘Curdy. On Retired List—William A. B. Webster and Maurice T. West, M.D. Surgeons—Matthew Reed, M.B., and Lewis Edwardes, M.B. Paymaster—Robert Bone. Assistant-Paymasters—Thomas W. S. Browne and John H. Brimacombe. On Retired List—Charles E. Tremaine. Engineers—Richard G. Foster and George J. James.

OFFICERS OF ROYAL MARINES.

Lieutenant-General—on Retired List—Sir Samuel R. Wesley, K.C.B. Colonel—George S. Digby, C.B. Captains—Edwin F. Thompson. On Retired List—James Nicholas and Henry T. M. Cooper. Lieutenants—on Retired List—Francis F. Heavens. Quartermaster—John Woon.

NAVAL OFFICERS' UNIFORM.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I was glad to notice in your last issue that you advocated the introduction of some sort of uniform cloak for officers, instead of the present pattern thick frock coat, which it is altogether impossible to wear when in epaulettes. It is no great stretch to state that the Navy is really without a great coat worthy of the name, for the thick frock coat, which is the warmest and most ample garment allowed, does not afford much protection to the legs. Mackintoshes are not recognized as a part of one's uniform, though they are permitted to be worn, and I hope the Admiralty will be good enough to add a regulation cloak and abolish the undress tail coat we are now obliged to have.—Yours, &c.,

FULL DRESS.

The Prince of Wales has sent a subscription of £50 to the funds of the Seamen's Hospital Society (late Dreadnought), Greenwich.

The estimate for Greenwich Hospital and School for the year 1877-78 states that the sum required will be £142,385, a decrease of £3,367 compared with the previous year. The sum required for Greenwich Hospital is £6,690; for pensions and gratuities, £114,692; for Greenwich Hospital School, £20,733.

The Aylesbury Dairy Company has been steadily increasing in popularity since its formation, now over ten years since, and is now supplying milk and dairy produce from upwards of sixty farms in the counties of Bucks, Berks, Oxford, Wilts, Herts, Gloucester, and Somerset. These farms supply the company with 21,318 gallons of milk, the produce of about 1,500 cows. Over 9,000 gallons of this milk finds its way to London, mostly to private houses, of which the company supplies nearly 4,000. From the London headquarters of the company, in Bayswater, each of these houses is visited twice daily, and some three times, whence it follows that the company's servants make some 60,000 visits a week. Every can of milk is examined and tested on arrival, and a sample is drawn and its quality recorded before it is issued to the public. An extensive building is being erected for the storage of butter, cheese, &c. A branch office has been opened at 13, Lowndes-street, Belgrave-square, W.

The Navy.

◆

GAZETTE.

ADMIRALTY, March 27, 1877.

The Rev. William Oxland, B.A., has been appointed Chaplain in H.M.'s Fleet, with seniority of March 19, 1877.

March 28.

Royal Marines—The undermentioned promotions, dated March 20, 1877, have taken place in the Royal Marine Artillery, viz.:—Col. and Second Commandant Henry Adair to be Col.-Commandant, vice Digby, deceased; Lieut.-Col. and Brevet Col. Henry Way Mawbey to be Col. and Second Commandant, vice Adair; Capt. and Brevet Major John Poore to be Lieut.-Col., vice Mawbey; Lieut. William Campbell to be Capt., vice Poore.

March 29.

The undermentioned medical officers have been promoted to be Depty. Inspr.-Gen. of Hospitals and Fleets in H.M.'s Fleet, with the seniority stated against their names:—John Traill Urquhart Bremner, M.D., March 6, 1877; Thomas Colan, M.D., March 11, 1877.

March 31.

The following promotion has this day been made:—Lieut. Albert Baldwin Jenkings to be Com. in H.M.'s Fleet.

April 2.

In accordance with the provisions of H.M.'s Order in Council of Feb. 22, 1870, Capt. Norman Bernard Bedingfeld has been placed on the Retired List from the 31st ult. Nav.-Lieut. Theodore G. Fenn has been placed on the Retired List of his rank from the 30th ult.

April 3.

Royal Marines—The undermentioned promotion has taken place in the Royal Marine Light Infantry, viz.:—Qrmr.-Sergt. Francis Butler to be Qrmr., vice Woon, deceased; March 9, 1877.

April 4.

Nav.-Lieut. G. J. Hirtzel has been promoted to the rank of Staff Com. in H.M.'s Fleet, with seniority of Feb. 22, 1877.

APPOINTMENTS.

Rear-Admiral John Corbett, C.B., to be commander-in-chief in the East Indies, vice Macdonald, promoted.

Commanders—Lord Ramsay, to the Britannia; Robert H. Harris, to the Argus, when recommissioned.

Lieutenants—Harry N. Lowe, to the Boscawen; Hugh R. Evans, to the Bullfinch; S. B. Roupell, to the Duncan; Reginald A. Brook, to the Liberty, in command, vice Johnstone, whose period of service has expired; Everard E. Maxwell, Charles G. Michaelson, and Henry Belham, to be reappointed to the Argus, when recommissioned; John H. Rainier, to the Excellent as senior Staff officer; Arthur Barrow, to the Excellent, as junior Staff officer; and George H. C. Stapleton, to the Endymion.

Sub-Lieutenants—Henry E. Kellett, to the Argus; and Paul W. Bush, to the Squirrel.

Naval Cadets—Amherst Pearson and Charles H. Umfreville, to the Minotaur.

Deputy-Inspectors of Hospitals—Ahmuty Irwin, C.B., to Haslar Hospital; and Charles M‘Shane, to Jamaica Hospital.

Engineers—John Muir, to the Wolverene, additional; Albert Martell, to the Pembroke, additional.

ACTIVE, Capt. Sir William Hewett, K.C.B., V.C., went into Portsmouth Harbour on Saturday for the purpose of paying off all standing, which will probably take place on Thursday next. This ship was commissioned by Capt. Hewett on Oct. 2, 1873, for the purpose of relieving Com. Commerell on the Cape and West African Station, and left Portsmouth on the 18th. Cape Coast Castle was reached on Nov. 14, the passage having been made in the short space of twenty days. The first detachment of the Naval Brigade, consisting of Sub-Lieut. Maltby and twenty blue-jackets, and Lieut. Crosbie, with thirty Marines, landed on Nov. 29, and proceeded up country, under the command of Lieut. Noel. They were joined on Jan. 2, 1874, by the remainder of the brigade, consisting of 287 blue-jackets and forty-six Marines, and commanded by the late Capt. Blake, of the Druid. On account of the good service which had been rendered by the Naval Brigade previous to the landing of the troops, the honour was conferred upon them of first crossing the Prah into the enemy's country. At Amoaful the brigade was placed half on each flank, with the 42nd Regt. in the centre, the rear being brought up by the Rifle Brigade. During the skirmishing Sub-Lieut. Münday, of the Active, was wounded, and subsequently died. Lieut. M‘Leod and Sub-Lieuts. Rawson and Maltby were also wounded during the engagement. A seaman of the ship was killed, and three days afterwards J. M‘Donald, R.M.A., and Lieut. Crosbie were wounded at Ordahsu. The Naval Brigade then returned to their several ships, and, out of the 128 men who left the Active, only twenty-seven returned, the whole of the remainder having been invalided. On March 5 the ship shaped a course for Ascension, where the invalids were discharged into hospital at Green Mountain. After visiting St. Helena it was intended to proceed to the Cape, but the Commodore found it necessary to return in May to Cape Coast Castle for the purpose of settling a dispute which had arisen with respect to the occupation of a portion of the Protectorate by the Awoonah tribe. It was at first thought that force would have to be used, and the Active's men were landed in company with some Gold Coast troops, but the difficulty was eventually settled by a grand palaver at Quitta. On March 1 Com. Hewett went in the Echo through the lagoons from Lagos to Porto Novo to interview the King with reference to the question of human sacrifices; and having arrived at Bonny on the 8th, the Commodore presented King George with a silver cup, and Oko Jumbo and Jaja with swords, for having provided a contingent of native troops during the Ashantee war. The remainder of the month was spent in palavers with the chiefs at Puerto de Lenha, with reference to the piracy of the Geraldine and the murder of four men belonging to her. On Aug. 12 she sailed for the rendezvous, which she reached on the 25th. She found the Encounter awaiting her, and the two at once proceeded up the Congo and anchored off Shark's Point, where they were joined by the Spiteful, Merlin, and Foam. A great number of villages were destroyed, the Commodore being satisfied that the moral effect produced on the savages by three gunboats appearing in creeks which had hitherto been believed to be impenetrable to men-of-war, and the unexpected attack made upon them in their remotest habitations, would prevent the repetition of outrages in the future. On June 21 she sailed for Cape Coast Castle, accomplishing the journey of 2,650 miles in ten days, and at once proceeded to Whydah on learning that two French ships of war had gone thither to protest against the blockade of Dahomey. As the ship was on her way to Lagos, on the 15th she communicated with the steamship Victoria in consequence of her making a signal. The Niger agents and others came on board in great alarm, represented that 150 British subjects were shut up in the Niger, and requested assistance from the Commodore. Having arrived at the Brass, the Commodore and some officers proceeded over the bar and held a palaver relative to recent events in the Niger at Mr. Hall's factory. All the Brass chiefs attended, and confessed to being on very unfriendly terms with the merchants, who were trading directly with the oil markets instead of through them. At the same time they denied having fired upon the steamer. On the 27th the Niger expedition, consisting of the Sultan of Sockotoo, flying the Commodore's broad pennant, with the Cygnet and Ariel, proceeded over the bar, Lieuts. Rickman and Scott being left in charge of the corvette. The expedition returned on the 11th, Mr. Shipley having in the meantime been killed, and Messrs. Nesham, Lang, Gibson, Thomas, and Casement, besides a number of the Active's men, wounded. Seven days later fever showed itself, and a temporary hospital was rigged on the poop. On the 25th there were over thirty cases of fever on board. The Active left Cape Coast Castle on Feb. 8, and arrived at Freetown on March 4. Madeira was reached on March 15, and some heavy weather was experienced during the run to Spithead. The Active has lost during the commission one officer and three men killed, one officer and thirteen men from fever, one man drowned, and seventeen officers and 136 men invalided. During the same time two of his first lieuts. have been promoted to the rank of commander, and fifteen sub-lieuts. to the rank of lieut. In referring to the commission of the Active in a leading article the *Times* remarks that—"The unadorned narrative of the career of this ship offers a good example of the work which English ships and English sailors are daily called upon to do, and are daily found ready to do, in all parts of the world."

Amethyst, Capt. A. J. Chatfield, temporary flagship of Rear-Admiral de Horsey, was at Valapariso on Feb. 17, where she arrived on Feb. 12, and the Admiral shifted his flag to her on Feb. 15.

Argus, Com. E. J. Jermain, was at Bermuda on March 6, preparing for recommission. The Wye will leave England about April 14 for Bermuda, with fresh officers and crew for the Argus.

Assistance, Capt. Prattent, embarked Artillery at Liverpool, and left Morpeth Dock on the 4th inst.; the weather being thick she anchored in the river, and was to leave for Kingstown on Thursday.

Audacious, Capt. P. H. Colomb, flagship of Vice-Admiral Ryder, was at Hong Kong on Feb. 15. The Admiral intended to leave Hong Kong about March 13, and the Lapwing would join him at Nagasaki, where a court-martial on her grounding will probably be held.

Avon, Com. C. Keppel. The following are the particulars of the late skirmish with natives in the Congo:—On Dec. 27 the English steamer Ethiopia arrived at Loanda, where the Avon was, bringing the captain and crew of the American schooner Joseph Nickerson, whom they picked up at Banana Creek, a Dutch settlement on the Congo, opposite Sharks' Point. According to the captain's declaration, his ship got on shore on Sharks' Point while endeavouring to enter the Congo, and when he laid out anchors to get her off the natives came down and cut the hawsers. He then sent the crew in a boat over to Banana to the Dutch for assistance, but while they were away the natives forced him out of the vessel and plundered her of everything. When, three hours after, the Dutch came with one hundred armed blacks in a small steamer, they found the schooner plundered of nearly everything, and quantities of copper stripped off her. In the scrimmage that ensued two of the natives were drowned; and the Dutch, finding it impossible to save her, set her on fire, and took away the captain and crew, and sent them on to Loanda in the next steamer. On Dec. 28 the Avon started for the Congo, and arrived at Sharks' Point on the 30th. A palaver with the native chiefs, and a demand that the things taken from the schooner should be given up, were without effect, so that Com. Keppel determined on giving them a lesson. On Jan. 2, having obtained the assistance of two friendly natives, who acted as guides, an armed party of forty men, six officers, and four guides went away in four boats, starting at 4 a.m. On landing, the men proceeded in skirmishing order, and fired as they went. However, no serious opposition was met with, and two villages were burned. On re-embarking the natives fired some shots, but a rapid fire from the boats was kept up on this part of the bush. The Avon's boats then went higher up the creek, burnt and destroyed three other villages, fired some rockets into others, and then retreated down the creek. It was only from sixty to seventy yards wide for over a mile, and thickly fringed with mangrove bushes. The boats got back to the ship at 12.30 p.m., no one having sustained any injury. Quantities of the plundered goods have since been returned by the natives.

Barracouta, Capt. C. E. Stevens. The court-martial on Capt. Stevens was resumed on Saturday for a short time. Mr. Gain, the paymaster, was again examined, and said the diving voucher was taken away by the prisoner because it had a notation upon it that a gun had been lost through the captain's fault. The savings voucher was also detained because Capt. Stevens said that the witness had endeavoured to obtain his signature to a false document, and that he should detain the latter voucher till the commodore's opinion was taken upon it. The defendant did desire him to substitute copies of the vouchers in the account, but that would have been an irregular proceeding. After some farther details the third charge was gone into, viz., "For that the prisoner did, on May 22, 1876, when applying for a court-martial on Mr. Gain, omit and leave out a full and satisfactory explanation furnished by the paymaster as to why slops were not issued on his receiving issue notes." Mr. Gain said he wrote full explanations why the issue was delayed, owing to some men's absence and to the high price of clothing in Auckland. The prisoner appeared to be satisfied, and witness was unaware of having preferred a charge against him until they were in the presence of the commodore at Sydney. Mr. Gain was under arrest from June 3 to July 10, when he was released by order of the commodore. On Monday Lieut. Maxwell, after detailing the quantity of spirits which he ordered to be sent to the Sapphire, said the paymaster came on board and objected to such a large amount being sent, as no allowance had been made for leakage, &c. If any one was to blame it was witness, for not complying with the signal. The prisoner came on board three hours afterwards, and could, if such had been his intention, have sent the full quantity that evening, which he did not do. The prisoner knew witness was acting commanding officer when the signal was made, and expressed no dissatisfaction at his proceedings. He asked if Mr. Gain had been told of the signal, and when informed in the affirmative said, "That's enough," and placed Mr. Gain under arrest. Witness made no remonstrance to the captain for this act because, though he considered himself solely responsible, yet the captain appeared to consider Mr. Gain to blame. On Tuesday evidence was given in support of the fourth charge, that the said Capt. Charles Edward Stevens did, on June 16, 1876, commit an act to the prejudice of good order and naval discipline, in that he did on the said day bring a charge for the trial by court-martial of Mr. Gain, paymaster of the ship, for not having obeyed the order by signal to supply H.M.S. Sapphire with 125 gallons of spirits, whereas he, the said Capt. Stevens, well knew that the said order by signal was made to the commanding officer, who took upon himself not to send the whole quantity of spirits out of the ship, as he believed a mistake had been state in the order given. Mr. Gain and Navigating-Lieut. Wonham next gave evidence on the fifth charge, that Capt. Stevens, on July 15, 1876, at thirty-five minutes past 5 o'clock p.m., called upon the paymaster "to report to him before 12 o'clock at night the number and contents of all casks, cases, and bags, &c., that could not be stowed below, and to state their cubic measurement, and why they could not be stowed below, and twelve other different orders, the aforesaid orders being vexatious and harassing, and calculated to impede the paymaster in the proper performance of his duties, and did, moreover, injure his health, whereby he was at times incapacitated from performing them." On Wednesday another charge was concluded. There are thirteen counts in this charge, and they are to the effect that "the prisoner did, from about July 15, 1876, to the end of that year, give a number of orders to Mr. Gain, which properly belonged to other officers of the ship, both equal in rank to Mr. Gain and below his rank, the orders being vexatious and harassing, and calculated to impede the paymaster in the proper performance of his duties, and did, moreover, injure his health, whereby he was at times incapacitated from performing them." A press copy of each of the orders was produced by Mr. Gain, who stated in his evidence that he knew of no reason why they were given to him to carry out, but was under the impression at the time, and was now, that they were given him in order to harass and worry him and prevent him from carrying out his duties in a proper manner. He also stated that on one occasion he complained to Capt. Stevens that these several orders were worrying him so much that he did not know what he was about. He did not think Capt. Stevens made any reply to his remarks, but remembered that he smiled, as if he were pleased. In cross-examination by the prisoner, Mr. Gain said he did not remember any other cause existing at the time whereby his health was injured and his nerves impaired. On Thursday the seventh charge was concluded, and also the eighth, which is as follows: "That Charles Edward Stevens, captain of her Majesty's ship Barracouta, then being subject to the Naval Discipline Act, 1866, did, between Aug. 11, 1876, and Oct. 29, 1876, negligently perform the duty imposed on him in the same period when Mr. Allen Fitzroy Gain, paymaster of the said ship, was on the sick list; that the said Capt. Stevens was informed by Mr. Edward Brereton Broster, staff-surgeon, that the said A. F. Gain would in all probability not be able to resume his duty, and the said Capt. Stevens did not take proper and efficient steps to secure that the duties appertaining to paymaster should be efficiently carried out by the assistant-paymaster during the sickness of the said A. F. Gain." The evidence on this charge having been taken, Mr. Martin announced that the case for the prosecution was closed. The prisoner then applied to be allowed until two o'clock on Monday afternoon to prepare his defence, and the request was granted by the Court.

Beacon, Com. H. Dunlop, visited Buenos Ayres and Colonia during February, and was at Monte Video on March 2.

Bellerophon, Capt. J. A. Fisher, flagship of Vice-Admiral Sir A. C. Cooper Key, was at Havana on March 6. He left Port Royal on Feb. 27 with the Encounter, Dryad, and Pert, arrived at Havana on March 5, and intended to sail on March 6 for Bermuda.

Black Prince, Capt. T. B. Lethbridge, of the Channel Squadron, arrived in Plymouth Sound on Tuesday evening, and exchanged salutes with the flagship.

Boxer, Com. A. H. Alington, arrived at Madeira on March 26, on her way to Cape Coast Castle.

Bullfinch, Com. R. M. Lloyd, would leave Jamaica on March 12 for the Cayman Islands.

Cracker, Lieut.-Com. C. H. Hawkins, visited Buenos Ayres and Colonia during February, and was at Monte Video on March 2.

Cygnet, Lieut.-Com. R. F. Hammick, sailed on March 2 for Appi Vista; to relieve the Mallard.

Danae, Capt. J. C. Purvis, arrived in Funchal Roads on March 26, from Spithead; she would leave after completing and refitting.

Daring, Com. J. G. Hanmer, arrived at Corinto on Feb. 12. The *Official Gazette* of Nicaragua, of Feb. 17, says:—"Her commander expressed his intention to remain three or four days before continuing his trip along the coast, visiting the different ports up to Acapulco. On the night of the 14th he telegraphed to the Minister of Foreign Relations at Leon that it was his intention to visit Managua on the 15th, and that he wished to pay his respects to the President of the Republic, if it would be convenient for the President to receive him. The President, after welcoming Capt. Hanmer, said he would take great pleasure in receiving him. The visit was paid on the 16th. The commander of the Daring expressed himself much pleased to meet the President, and said that, having received orders to touch along the coast, and knowing that for some time past no representative of Great Britain had visited Nicaragua, he called at Corinto in order to visit the capital and present his respects to the chief of the Republic. The President acknowledged this delicate compliment, and expressed a wish that the commander would remain some time in the capital, and thus afford an opportunity to show him some attention. The latter expressed his regret at not being able, on account of want of time, to accept any invitation. The visit was most cordial, and in the evening the military band, by order of the President, serenaded the commander of the Daring at his residence."

Defence, Capt. R. P. Cator, arrived at Plymouth on Tuesday, and has gone into harbour to refit.

Eclipse, Capt. J. E. Erskine, was at Barbados on March 6.

Enchantress has been commissioned as a separate command, and is no longer to be a tender to the Asia. Staff Com. Hills continues in command.

Foam, Lieut.-Com. R. W. Hope, if not required at Monte Video, will meet the Volage at Nuevo Gulf in April with mails.

Fly, Com. J. Bruce, has been sent to Wên-Chow, to enable the Hornet to go to Hong Kong.

Growler, Com. C. E. Wilcox, was paid off at Hong Kong on Feb. 17, and recommissioned on the following day.

Hercules, Capt. Bowden - Smith, flagship of Admiral Hon. Sir J. Drummond, arrived at Gibraltar on the afternoon of March 31, and left on April 3 for Portsmouth.

Himalaya, Capt. E. White, arrived at Hong Kong on Feb. 14, with new crews for Hornet, Growler, Midge, and Swinger.

Hornet, Com. H. N. Hippisley, was paid off at Hong Kong on Feb. 17, and recommissioned on the following day.

Jumna, Capt. J. D'Arcy, arrived at Malta on the 3rd inst., and left again the same day for Spithead.

Kestrel, Com. C. B. Theobald, would leave Hankow about Feb. 4 for Ichang.

Malabar, Capt. E. Kelly, arrived at Portsmouth on Monday. She was detained a day in the Suez Canal from an accident to her circulating pumps. It was arranged that the Malabar should bring home the 11th Regt. from Bengal to Plymouth, but their embarkation was postponed in consequence of the breaking out of measles among the men. She brought home 543 invalids, 104 time-expired men, and eleven insane persons for Netley, 101 invalids belonging to the Royal Artillery for Woolwich, 49 details for various stations, 95 women, and 202 children. The following naval officers took passage to England:—From Malta—Lieut. W. E. Darwall, Coquette; Staff Surg. Fletcher, Wizard; Sub-Lieut. Cumming, Undaunted. From Bombay—Lieut. Somerset, Spartan.

Mallard, Lieut.-Com. Warry, was off Whydah on Feb. 13, making good some slight defects.

Minotaur, Capt. Lord W. Kerr, flagship of Rear-Admiral Beauchamp Seymour, commanding the Channel Squadron, having parted company with the Black Prince, Resistance, and Defence off Cape Ushant on Tuesday, arrived and anchored at Spithead on Wednesday morning under the usual salutes. Besides having defects made good, the Minotaur will be fitted with torpedo gear, and a torpedo room and magazine.

Midge, Capt. H. Salmond, was paid off at Hong Kong on Feb. 17, and recommissioned on the following day.

Narcissus, Capt. Lord Charles Scott, flagship of Rear-Admiral Lambert, C.B., was at Simon's Bay on March 5, and left on March 8 for Devonport.

Opal, Capt. F. C. Robinson, was at Iquique on Feb. 12.

Orontes, Capt. E. H. Seymour, left East London on March 5 for Port d'Urban, but had not reached Simon's Bay, being detained off Port Natal, where she arrived on March 6. A considerable stir has been raised at Mauritius by the alleged defiance of quarantine law by Capt. Seymour. The *Mauritius Commercial Gazette* says:—"Notwithstanding Capt. Seymour was informed by Pilot Ledger that he could not bring his vessel into harbour before receiving pratique, he persisted in doing so. The very improper conduct of Capt. Seymour is the more inexcusable since he was aware that he had on board two cases of measles. We trust that not a man of the three companies of the 80th Regt. brought here by the Orontes will be permitted to land until the vessel shall have been kept in strict quarantine. We trust, also, that a report of Capt. Seymour's off-hand and unfeeling proceedings will be duly forwarded to the Lords of the Admiralty, so that he may be taught that officers commanding her Majesty's ships are equally as bound to refrain from infringing the laws of the countries at which they may call as are the smallest and meanest of masters of vessels belonging to the mercantile marine." A meeting of the Quarantine Committee has also been held, and the following recommendations were made:—"That his Excellency the Governor be moved to bring to the notice of the Admiralty that the captain commanding the Orontes, although warned by the pilot not to enter the harbour of Port Louis until pratique had been given, did, nevertheless, steam right into the said harbour and cause his vessel to be moored at the Admiralty moorings, there being at the time two cases of contagious disease on board, a disease which has already caused a great loss of life in this colony. And that the Governor be pleased to move the Admiralty to issue orders to officers commanding her Majesty's ships to give ready and willing obedience to the quarantine laws, which have been approved by her Majesty. That instructions be issued enjoining the removal of the Orontes from the harbour to the quarantine anchorage, and that the vessel do remain at the said anchorage until ready to continue her voyage."

Pioneer, Lieut.-Com. E. Hotham, has been recalled from Sierra Leone.

Plover, Com. H. B. Stewart, was at Carthagena by last accounts.

Repulse, Capt. F. W. Wilson, was inspected on Feb. 8 at Coquimbo. Admiral de Horsey left on Feb. 9, and arrived in her at Valparaiso the following day. The Repulse sailed for Spithead, calling at Rio de Janeiro on Feb. 15. She arrived at Rio de Janeiro on the 3rd inst. on her way to England.

Resistance, Capt. C. W. Hope, arrived in Plymouth Sound on Tuesday evening. When off Cape Ushant she parted company from the Minotaur under full speed for Devonport, making her six hours' full-speed trial on the run.

Ringdove, Com. U. C. Singleton, paid off at Portsmouth on Thursday.

Rover, Capt. T. Barnardiston, was at Bermuda refitting and having boilers repaired on March 6.

Seagull, Com. Maxwell Heron, arrived at St. Vincent, Cape de Verde, on March 9. She reached Funchal on Feb. 23, and left on the 28th. She had light winds for nearly the whole passage to this place, and no trade winds at all. The vessel sails and steams very well. She was to leave for the

Gambia on the arrival of the mail from England expected on March 20.

Sealark, Lieut. F. H. Haygarth, was taken into dock at Devonport on Tuesday for the purpose of being surveyed in respect of certain defects reported by the officers. Mr. Seccombe, examiner of dockyard work, from the Admiralty, is at Devonport to investigate the matter.

Shah, Capt. F. G. D. Bedford, arrived at Valparaiso on April 1 from Monte Video, which she left on March 10, all well.

Simoom, Capt. R. G. Pasley, was at St. Vincent, Cape de Verde, on March 10; she arrived there on March 9 from Sierra Leone to take a northern route to the West Indies, and had completed coal; she would sail on the 10th for Barbados.

Sirius, Capt. G. L. Sulivan, was off Little Poppo on Feb. 19; she left Whydah on Feb. 7, arrived at Lagos on Feb. 8. The Governor and his Staff embarked there on Feb. 12, and arrived at Whydah in the Sirius on Feb. 13; left the same day for the westward, and anchored off Little Poppo on Feb. 14, with machinery broken down. She was to return to Whydah, and is ordered home under sail. She remained at Whynah up to March 5.

Supply, Staff Com. F. Inglis, left Whydah on March 5 for Cape Coast Castle, Ascension, and England.

Swiftsure, Capt. J. K. Baird. The Constantinople correspondent of the *Standard* mentions the following act of gallantry in saving life by officers of this ship:—"I learn the following particulars from a private letter which I have received from Salonica. While H.M.S. Swiftsure was entering the Gulf of Salonica, an able-bodied seaman, named George Robinson, who was at work on the flying boom, missed his footing and fell into the sea. The ship was going 7 knots an hour, and there was a heavy sea, and it was bitterly cold. The man could not swim, and, moreover, he was struck by the ship and sank in an almost unconscious state. Sub-Lieuts. Polwhele and M'Kinstry, on hearing the cry of 'man overboard,' jumped into the water with their clothes and shoes on. Lieut. Polwhele dived for Robinson, and succeeded in bringing him to the surface, but would not have been able to support him if M'Kinstry had not come to his assistance. Shortly afterwards the rescuers and the rescued, who was still insensible, were picked up by the lifeboat. Robinson was under treatment by the doctors for twenty-five minutes before animation could be restored. He has since then suffered from congestion of the lungs, but is now convalescent. The gallant conduct of the two officers has made them very popular in Salonica."

Swinger, Lieut.-Com. Oswald Tudor, was paid off at Hong Kong on Feb. 17, and recommissioned on the following day.

Tamar, Capt. W. H. Liddell, arrived at Aden on April 1 and was to sail on the 4th.

Thetis, Capt. T. Le Hunte Ward, docked at Malta on the 19th inst., will probably not leave Malta for some time. Her crew have been turned over to the Hibernia, where they will remain until the Thetis is ready for them.

Tourmaline, Commodore F. W. Sullivan, C.B., was in Simon's Bay on March 12.

Triumph, Capt. G. H. Parkin, arrived in Plymouth Sound early on Sunday morning, having been in collision in the Channel at 10.30 p.m. the previous night with the Benjamin Whitworth, bound from Shields, with coals, for Genoa. The merchant steamer, through some misunderstanding, got across the bows of the man-of-war, and was run into by the latter abreast of the engine-room, and has her plates on the side on which she was struck dented in, and the opposite side slightly bulged outwards. It is also asserted that one of her beams has been started, but the exact damage will not be known until the coal is discharged from her bunkers. The Triumph is uninjured. She has been ordered to proceed to Portsmouth to pay off, although commissioned at Devonport in March, 1873. Her ammunition was being got out preparatory to proceeding into harbour to dismantle, in accordance with Admiralty instructions for her to pay off at Devonport, but a telegram was received directing the vessel to proceed immediately to Portsmouth to be paid off, and she took the discharged ammunition on board again. No reason is assigned for this decision of the Admiralty, the Triumph being a "Devonport ship," and the greater number of her officers and crew belonging to that neighbourhood. She arrived at Spithead yesterday morning, and will pay off at Portsmouth.

Valorous, Capt. L. F. Jones, which arrived at Rockferry, on Sunday with supernumeraries for the new gunboats that she is to convoy to Devonport, was during the evening in rather a dangerous situation, as having anchored too closely to the Achilles, when the vessels swung they came into collision. Fortunately the Valorous was moving out of the danger before the paddle-wheel struck the Achilles, and the only damage done was to the head davits. She left on the 3rd for Barrow.

Vernon, Capt. W. Arthur. The first course of torpedo instruction for the season commenced on Wednesday. The second will begin on July 4. Officers desirous of attending should make application to the Secretary of the Admiralty.

Vesuvius, Capt. Morgan Singer, is undergoing various alterations at Portsmouth to fit her for the 14-inch Whithead torpedo. When completed she will be taken into the large repairing basin, where a series of experiments will be prosecuted with the object of ascertaining the efficacy of wire netting as a protection against fish torpedoes.

Victoria and Albert, Capt. Thomson, which is undergoing her annual refit at Portsmouth, is ordered to be ready for sea by the end of June.

Volage, Capt. H. Fairfax, was at Monte Video on March 2. She left Colonia on Feb. 18. The Shah was just in sight, and on her arrival the Volage would leave for the Falkland Islands and Patagonia. Capt. Fairfax expects to be back at Monte Video by the middle of May.

Wye, Staff-Com. W. W. Vine, arrived at Devonport on Monday morning from Malta with the crews of the Helicon and Antelope, and after discharging those belonging to Devonport, and receiving supernumeraries for the eastward, left for Deptford, where she arrived on Thursday.

Zephyr, Lieut.-Com. W. G. Le Cocq, was at Nassau by last accounts.

Throat Irritation.—The throat and windpipe are especially liable to inflammation, causing soreness and dryness, tickling and irritation, inducing cough and affecting the voice. For these symptoms use glycerine in the form of jujubes. Glycerine, in these agreeable confections, being in proximity to the glands at the moment they are excited by the act of sucking, becomes actively healing. Sold only in 6d. and 1s. boxes (by post for 14 stamps), labelled "James Epps and Co., Homœopathic Chemists, 48, Threadneedle Street, and 170 Piccadilly, London."

THE GROWTH OF THE NAVY IN 1876-77.

The following complete list of ships, of all classes, launched during the financial year, which was brought to a close on Saturday last, will, says the *Standard*, on comparison with the statement of vessels removed from the "Navy List" in the same period, prove how far the additions have been in excess of the waste, and will to some extent enable readers to understand why it has been possible to reduce the Estimates for 1877-78. The year was opened by the launch of the 12-gun composite corvette Turquoise, from Earle's yard at Hull. She is a vessel of 1,864 tons, with engines of 2,100-horse power, and cost about £90,000. Then followed the monster iron armour-plated turret-ship Inflexible, which was launched at Portsmouth on April 27. She will carry four 80-ton guns in her two turrets, is of 11,406 tons' displacement, with engines of 8,000-horse power, and cost for hull and engines alone £522,000. The weight of the armour she carries is over 3,000 tons. In May another powerful vessel, the Temeraire, was launched at Chatham. She is an iron armour-plated broadside ship, and will carry four 25-ton and four 18-ton guns; her tonnage is 8,412 tons, horse-power 7,000, and cost of hull and engines £380,000. The weight of armour she carries is nearly 2,100 tons. In August four vessels were added to the Fleet, viz., the composite corvettes Ruby and Emerald, 12 guns, 1,864 tons, and 2,100-horse power, costing about £90,000 each; the composite sloop Osprey, 6 guns, 1,124 tons, and 900-horse power, costing about £60,000; and the iron gunboat Medina, 3 guns, 363 tons, and 310-horse power, costing £10,250. In October six ships were launched—viz., the screw corvette Bacchante, 16 guns, 3,932 tons, and 5,250-horse power, costing £211,000; and the iron gunboats Sabrina, Medway, Spey, Tees, and Tay, of 363 tons, 3 guns, and 310-horse power, costing £10,250 each. Then followed the iron armour-plated ships Nelson and Northampton, carrying 12 guns each, of 7,323 tons, and engines of 6,000 horse-power, and costing about £350,000 each. The weight of their armour is 1,500 tons. In December three 3-gun composite vessels of 774 tons and 750 horse-power were launched—viz., the Condor, Flamingo, and Griffin, costing about £33,000 each; since which time there have been launched the Euryalus, corvette, of 16 guns, 3,932 tons, and 5,250 horse-power, costing £211,000; the Iris, armed steel dispatch-vessel of 10 guns, 3,735 tons, and 7,000 horse-power, costing about £185,000; the composite gun-vessel Falcon, of 3 guns, 774 tons, and 750 horse-power, costing some £35,000; the composite gunboats Firm, Forester, Foxhound, and Forward, of 4 guns, 455 tons, and 360 horse-power, costing about £20,000 each; the torpedo-launch Lightning, costing about £6,000; and three torpedo mooring steamers and one torpedo lighter, costing altogether about £18,000. There are also due at this date from the hands of the contractors two composite gunboats and three river service gunboats. But, leaving them out of the calculation, the actual additions to the Fleet consist of no fewer than 29 vessels of various classes, representing a tonnage of 58,000 tons and an expenditure of £2,839,000. During the same period the removals from the strength of the Navy have been—the Octavia, frigate, of 3,832 tons; Racer, sailing-sloop, of 708 tons; Black Eagle, paddle-yacht, 540 tons; Lyra, sloop, 675 tons; Severn, frigate, of 3,485 tons; Virago, paddle frigate, of 1,590 tons; Speedwell, gun-vessel, 570 tons; Reindeer, screw sloop, of 1,365 tons; Pigeon, gunboat, of 330 tons; Barrosa and Scout, corvettes, of 2,431 and 2,187 tons respectively; Star, gun-vessel, 877 tons; Adventure, iron troopship, of 2,510 tons; and the sloops Shearwater and Gannet, of 913 and 861 tons respectively. The removal of ineffective vessels has thus amounted to some 22,000 tons, against the 58,000 tons of new ships which have been sent afloat during 1876-77, thus giving a gain on the side of efficiency to the amount of 36,000 tons, of which 34,464 tons are armour-plated ships.

THE BRITANNIA.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—I have appealed, but without success, to the sense of justice of one of your contemporaries, for space to say a few words in answer to an article published in its issue of March 24, headed "Tone of the Britannia Cadets," and charging a witness in a late inquiry with falsehood. I venture to ask you to allow me a place in your columns. The gentleman on whose account a court of inquiry was held on board the Britannia in February last is the parent of a lad whom he was required to withdraw from the ship in consequence of unfavourable reports in study and unfitness for the Service, as proved by the result of the half-yearly examination. The charges on account of which the inquiry was held were sifted by one of the admirals of the station during an exhaustive examination of the cadets, instructors, and officers of the ship, extending over three days. Of the two specific charges, one was disproved by reference to the register of punishments, and the other from absence of evidence. Moreover, the young gentleman himself had solemnly declared to the captain and one of his officers that the act of which he accused a messmate had never taken place. *Habemus confitentem reum.* With regard to general charges, the admiral examined not only the whole class of little boys, but the captains (prefects or preceptors, as they would be called at public schools), during which examination Capt. Graham, all executive officers who could possibly be supposed to intimidate cadets, and all those accused were excluded. He satisfied himself that nothing that deserves the name of bullying exists among the cadets. No one, I suppose, expects that a number of boys of the age of the cadets will not play tricks upon each other? The admiral, however, did not restrict himself to the evidence of the boys. He examined the first and second lieutenants and the naval instructors of the ship, and finally sent for the cadet sergeant-major, who, up to the time of the young gentleman's withdrawal, had been in constant attendance at all routine duties of cadets, and who, from long service with them, knew intimately their ways and customs. The admiral examined this functionary, because his business was not only to know what fell under his observation, but also to make himself acquainted with everything that went on. It ought to be added that the gentleman at whose instance the court was granted himself offered to drop the matter if another chance of passing the examination could be allowed his son. I should not dream of troubling your readers with these remarks but that in reality the article I allude to forms a charge, not only against a number of boys too young to understand it, but also against naval officers of the highest honour, who are precluded by the rules of the Service from replying to what I hope you will forgive my calling a grave and unmerited attack on their youngsters and on themselves. The instructor, whose remarks were there quoted, had not served in the Britannia for several years. Capt. Graham, on taking the command of the ship, had reason to consider that bullying had existed among the cadets; this he immediately brought to the notice of the Admiralty, and severe measures were adopted for its repression. What may or may not be the best method of training the cadets, whether on board the Britannia or in a school on shore, is a question into which it is no business of mine to enter.—I am, &c.,

A Relative of one of the Accused.

THE VANGUARD.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—Having read in the *Globe*, of this city, a communication (no doubt copied from an English paper) relating to the raising of the wreck of H.M.S. Vanguard, I beg leave to state that I am highly astonished at learning that our naval authorities are under the necessity of offering a large premium to any outsider who may successfully accomplish what they themselves consider an utter impossibility; that is, the raising of said wreck. Having served nine years in her Majesty's Navy, and been discharged with a petty officer's rating, I would wish to make a few remarks on the subject, if you will kindly permit them to occupy a space in your valuable paper. I am, to a certain extent, ignorant as to the position of the wreck at present, her length, beam, and depth of hold, and also as to how much sand has accumulated around her, so your many readers must excuse me if I err, knowing I am not to blame. However, we will suppose her lying on her starboard side, with her lower masts in; in that case I would have the ends of a 15 or 17-inch cable made fast to each lower masthead, the other ends passed up and given to a separate man-of-war; then pass down three pieces of steel wire on the port side of the wreck, one abreast the fore-rigging, one on the fore side main rigging, and the other abreast the mizzen rigging, those ends passed down having an eye-splice in them. They could be passed, as far as possible, from port to starboard, under her bottom. Meanwhile, the vessels would have their several hawsers all ready on board, and they could all steam ahead off the Vanguard's port beam, and, no doubt, they would cant her over to her port side, which would bring the ends of the wire from the port side within easy reach of the divers from the starboard side; if so, then pass down three more pieces similar to those on the port side, shackle the two eye-splices together, and then heave away. If she is lying on her port side, then the opposite to the foregoing suggestions would conduce to the same end. We will now take it for granted she is on an even keel. I consider it no impossibility to raise her on account of not being able to pass the wires under her bottom. The method of proceeding in such a case would be as follows:—I would have six pontoons constructed according to my own views, and placed immediately over the vessel, three on each side, and in the same position as the wires, namely, one abreast the fore rigging, one on the fore side of the main rigging, and the other abreast the mizzen rigging, the wires to be shackled to a span, which could be made by passing chains through her chain-plates, or else by putting stout pieces of oak across her ports, making a strop of chain, and then shackle the wire to the strop, or if the diver could pass his wire through one of the ports, and out on the other side, and then pass the end to the pontoon. If her bowsprit be cut away, I would place a pontoon (that is, if required through weakness at other points), as it were, direct across her bows, and thus make use of her two hawse-pipes. The pontoon I am about to suggest to the Admiralty will be so constructed that after the Vanguard is once lifted, say ten feet, and taken then into shallow water, which height I could raise her by my method, I would have my pontoon 15ft. deep, 50ft. beam, 150ft. in length. I could sink them to within 2ft. or 1½ft. of the water's edge, and then lifting the Vanguard, 10ft., 5ft. hold would still remain, and the wires once under her bottom there would be no more bother, but heave right up, as high as I wanted her—say her upper decks above water, place steam-pumps on board, fix her bottom, and tow her to a dry dock. By inserting the foregoing remarks, you will confer a favour on—Yours, &c.,

Frederick Hill,
Ex-Capt. Maintop, Barracouta, 1870.

P.S.—I am at present holding the position of guard at the Central Prison, Toronto, Ont.

Toronto, March 21, 1877.

A Blue-book of nearly 500 pages has just been published, and contains the official journals and proceedings of the Arctic expedition under the command of Capt. Sir George Nares. Besides the reports of Sir G. Nares and Capt. Stephenson, there are the journals of the commanders of the various travelling and sledge parties, with charts and maps showing the course taken, and rough sketches illustrating various points of interest. The *British Medical Journal* says:—"We notice with great pleasure that the promotion of Dr. Colan as Deputy-Inspector-General of Hospitals is gazetted. Dr. Colan's services as senior medical officer of the recent Arctic expedition were of the most severe character, uniting extreme fatigue and mental anxiety owing to the severe outbreak of scurvy in addition to the necessary hardships of an Arctic expedition. His duties were performed in an exemplary manner, and the result of the recent inquiry has amply exonerated him from any responsibility in respect to the sufferings of the sledge-parties from scurvy, since the lime-juice was omitted in the face of his personal remonstrance, as well as in defiance of the original written instructions of Sir A. Armstrong. The delay in promoting Dr. Colan has been misinterpreted; it was not due to any want of recognition of his services, but, as we explained at the time, to the fact that there was no vacancy in the rank to which his promotion must be made."

The enlargement of the powder-chamber of the 81-ton gun will be completed in about three weeks, when it will be taken to Shoeburyness for further trial against the armour-plates. The four 81-ton guns for the Inflexible are in an advanced state, and one of them is expected to be ready for proof at the butts by the time the rechambering of the experimental gun is completed.

Furnish on the New Hire System.—The "New Hire System" is quite distinct from anything yet attempted. Houses furnished throughout 20 Wholesale Houses to select goods from. "An excellent idea. —"Army and Navy Gazette." Prospectus, with Press opinions, post-free. General Furnishing Company — Offices, 9, Southampton-street, Strand.

THE LATE MILITARY TRAIN.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Will you permit me to supply an omission in your article of the 3rd instant, when stating the position and grievances of the late Military Train officers, who were transferred, on their own application, to the late Control Department, viz., the immediate step in rank accorded to them all, with one or two exceptions, and placing them senior to officers in other departments who, in some instances, were nine or ten years their seniors in relative rank, and who did not obtain promotion for four or five years after. The emoluments of the Military Train officers who were thus promoted (contrary to the terms of the Royal Warrant, which laid down that Military Train officers would receive the same rank in their new Deparment) were in nearly every instance almost doubled. This, by some, would have been considered a fair equivalent for the grievances of which they complain, and was, I believe, generally considered so at the time. A reference to the Military Train, Purveyors', and Military Store Departments, in "Army List" for Jan., 1870, will verify my assertion.—Yours, &c,

Feb. 6, 1877. SCEPTIC.

SPRING DRILLS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Defects in our military system are frequently pointed out in your columns. It cannot, then, be unimportant to point out and condemn the waste of precious time, caused by that absurd anachronism yclept spring drill. Whether spring drill was ever worth the time that has been spent on it may be fairly questioned; but in these short service days, when so much has to be learnt in so short a time, it seems, indeed, fatuity to compel the trained soldier to waste nearly one-eighth of his entire service in learning how to pivot on his heels or perform the goose-step with the precision of an automaton. Surely enough time is spent in the now semi-obsolete close-order drill of the barrack square to steady soldiers. Is it also necessary to spend absolutely more time in spring drill, which only disgusts the men, than in that most important part of modern war, teaching the soldier how to fight in extended order; in fact, what the Germans truly term, "battle discipline?" Our Infantry is, indeed, thoroughly trained in all that is requisite to march to a battle-field; whether it is equally proficient in what has to be done on the battle-field is, I am afraid, a more doubtful question. "Tempora mutantur, sed nos non mutamur in illis."—Yours, &c.,

March 22, 1877. YONETNOFF.

ROYAL NAVAL COLLEGE.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—If anyone is rash enough to still believe that wasteful expenditure exists in the Navy, let him visit the Royal Naval College during the Easter vacation, and then, perhaps, he will realize the fact that there is, at least, one certain high official into whose soul the spirit of economy has entered. The gallant President, whose name will long be associated with the College, has decreed that during vacation the ante-room shall not be lighted, the gas shall be lit in the mess-room only over such part of a table as may be in use, in the billiard-room over one table only, and not at all in the passages or corridors. And yet nearly forty officers remain during their leave at the College, and are treated like this to reduce the gas bill by a few shillings! But might not their Lordships transfer such economical ideas and their owner to a sphere of more extended usefulness.—I am, &c.,

LUCUS A NON LUCENDO.

(Opposite the County Fire Office.)
BEDFORD CORD HUNTING BREECHES.
BUCKSKIN LEATHER HUNTING BREECHES.
LEATHER SHOOTING JACKETS and RIDING PANTALOONS.
Newmarket Breeches and Leggings.

WILLIAM NICHOLLS, 21, TICHBORNE STREET, REGENT CIRCUS, PICCADILLY.

H.M. TROOPSHIPS, PORTSMOUTH DOCKYARD

OFFICERS' BAGGAGE cleared through Customs, Warehoused, Shipped or Forwarded, by CURTISS and SONS, Railway and Shipping Agents, 88 to 94, Broad Street, Portsmouth.

Letters and telegrams for passengers promptly delivered free of charge.

CURTISS and SONS' rates for Warehousing or removing Furniture, &c., are exceedingly low.

OFFICERS' BAGGAGE, &c.—Officers are respectfully informed that Baggage, Luggage, and all kinds of Personal Property are stored at most moderate charges at the

STORE WAREHOUSES, BAKER STREET BAZAAR, W.

The warehouses having been built expressly for the safe keeping of goods, are peculiarly convenient, and are kept warm at an even temperature during the winter. Removals effected.

Separate lock-up rooms for large or small quantities.

JOHN HANES, Manager.

Store Warehouses Baker Street Bazaar, W.

CHLORODYNE. — FREEMAN'S is the original and only true.—Lord Chancellor Selborne, Lord Justice James, and Lord Justice Mellish decided in favour of R. Freeman and against J. C. Browne and J. T. Davenport; see "Times" of July 24, 1873. Thousands of medical practitioners testify that there is no substitute for it in the treatment and cure of asthma, bronchitis, coughs, and other chest affections, neuralgia, fevers, cholera, dysentery, spasms, and all nerve pains. Bottles 1s. 1½d., 2s. 9d., 4s. 6d., 11s., and 20s. Sold by patent medicine dealers in all parts of the world. See that "Freeman's Original Chlorodyne" is engraved on the Government stamp.

THE STAFFORD HOUSE COMMITTEE for the RELIEF of SUFFERING among the TURKISH SOLDIERS.—Chairman, the Duke of SUTHERLAND, K.G.—Communications to be addressed to T. Gibson Bowles, Esq., Hon. Sec., 2, Harriet Street, Lowndes Square, S.W.

Subscriptions will be received by Major-General Sir Henry Green, Hon. Treasurer, Stafford House, S.W.; by Messrs. Drummond and Co., Charing Cross; Messrs. Smith, Payne, and Co., 1, Lombard Street; Messrs. Barnetts, Hoares, and Co., 62, Lombard Street; and by Messrs. H. S. King and Co., 45, Pall Mall, and will be acknowledged in the published list.

The Right Hon. the Lord Mayor has undertaken to receive subscriptions for the fund, which may be paid to him at the Mansion House.

Contributions are especially invited of blankets, warm jerseys, warm underclothing, and hospital linen, which will be received at Taylor's Depository, Pimlico, and should be labelled "For Relief of Suffering Turkish Soldiers."

ROYAL SCHOOL FOR DAUGHTERS OF OFFICERS OF THE ARMY.

The daughters of all officers in her Majesty's Army, inclusive of the Royal Marines, on full or half pay, or who may have died in the service, are eligible. The ages of admission are from ten to fifteen.

The next election will take place on June 20, 1877.

Pupils elected by votes of subscribers pay only £12 per annum.

With a view to afford the advantages of a good education to the daughters of officers of competent means at a moderate cost, and at the same time to aid the primary object of the Institution, a limited number of pupils are admitted on payment of £80 a-year, which includes all extras. The new form of application can be obtained at the office.

Each donation of £5 5s. entitles to one life vote. Each annual subscription of 10s. 6d. entitles to one vote at all elections during the current year.

Further contributions to meet the current expenses are earnestly solicited by the Committee.

By order,
G. W. FORSTER, Secretary.
No. 22, Cockspur Street, London.

WILLS' BEST BIRD'S-EYE.

This Tobacco is now put up in
ONE OUNCE PACKETS
in addition to the other sizes, the Label being a reduced fac-simile of that used for the Two-Ounce Packets.

W. D. & H. O. WILLS, Holborn Viaduct, London, E.C., and Bristol.

HAMBURGER, ROGERS, AND CO., GOLD AND SILVER LACE MANUFACTURERS by Appointment to her Majesty the Queen, and to H.R.H. the Prince of Wales. MILITARY CLOTHIERS, CAP, HELMET, SHABRACQUE, and CAVALRY ACCOUTREMENT MANUFACTURERS, with every description of UNIFORM, and Appointments for the Army and Navy, Yeomanry, Militia, &c., 30, KING STREET, COVENT GARDEN, LONDON. W.C

RUPTURES (BY ROYAL LETTERS PATENT)

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 medical gentlemen to be the most effective invention for the curative treatment of hernia. The use of a steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body, two inches below the hips, being sent to the manufacturer,

MR. WHITE, 228, PICCADILLY, LONDON.

Price of a single truss, 16s., 21s., 26s. 6d., and 31s. 6d.; post free. Double ditto, 31s. 6d., 42s., and 52s. 6d.; post free. An umbilical ditto, 42s. and 52s. 6d.; post free. Post-Office Orders to be made payable to JOHN WHITE, Post Office, Piccadilly. Every description of RIDING BELTS, ELASTIC STOCKINGS to draw on, and ELASTIC SILK SUSPENDERS, on new and improved principles.

JOHN WHITE, Manufacturer, 228, Piccadilly London,

"EASTMAN'S" ROYAL NAVAL ACADEMY, BURGOYNE HOUSE, SOUTHSEA.

Principal, since 1860, G. EASTCOTT SPICKERNELL.

At the last two Naval Cadet Examinations pupils took the *First* Place. More than 1,000 pupils have entered her Majesty's Service.

The House is situated close to and directly facing the sea. Pupils have good Bathing and Boating, under careful superintendence.

Pupils are received from Nine years of age and upwards. To make the School specially adapted for Junior Pupils intended for the Royal Navy and the Public Schools, Senior Pupils are not now received.

NAVAL CADETS, ASSISTANT CLERKS, HOPE HOUSE, SOMERSET-PLACE, SOUTHSEA.

Principal—Mr. T. H. VICKERY.

In addition to the general course of study pursued at this long-established School, pupils are specially prepared for the examination required for the above.

At the competitive examination in November, 1875, and at the recent examination in June, of candidates for Assistant Clerkships, all the pupils sent up from this Establishment were successful.

MALVERN COLLEGE.

The SECOND TERM will begin on MONDAY, May 7th.

UNITED SERVICES PROPRIETARY COLLEGE (Limited), Westward Ho! On the North Devon coast.—The above school now numbers nearly 200 boys. Sons of officers, naval or military, have the advantage of lower terms. For prospectus, curriculum, list of pupils, &c., apply to the Head Master or Secretary, Westward Ho! N. Devon. The next term begins May 3rd.

PARIS.—French HOME offered, in a Clergyman's family, to young gentlemen, for acquiring the French language. Address M. Pasteur Lalot, Military Chaplain, 265, Boulevard Pereire.

NAVAL CADETS' EXAMINATIONS.—A RETIRED NAVAL INSTRUCTOR can receive a few YOUNG GENTLEMEN into his house to prepare them for the above examinations. Terms and prospectus sent on application. References to Admirals and Captains with whom the instructor has served have been kindly granted. Address A. B. C., care of Willing, jun., Advertising Offices, 301, Strand, W.C.

LITTLE ST. JOHN'S, Hurstpierpoint, in connection with St. Nicolas College, Lancing, and St. John's College, Hurstpierpoint, is established with the sanction and under the inspection of the Provost and Fellows of St. Nicolas College, for the EDUCATION of LITTLE BOYS, from six years of age, preparatory to their entering either of the above or other public schools. For particulars apply to the Lady Principal, Little St. John's, Ditchling, Hurstpierpoint, Sussex. Boys are prepared to pass the examination for Naval Cadets.

SCHOOL SHIP CONWAY, Liverpool.—Established for training Young Gentlemen with a view to their becoming officers in the Mercantile Marine. Terms, 50 guineas per annum, including uniform and all other extras. The sons of officers in the Navy and Mercantile Marine Service Association are received at the reduced rate of 40 guineas. Quarter days, when pupils can be admitted—February 1st, April 10th, August 1st, October 10th. Apply to Capt. E. B. H. Franklin, R.N., Rock Ferry, Birkenhead.

WELLINGTON COLLEGE.—DURAND SCHOLARSHIP.—There will be an election in June to a Scholarship on this Foundation. It is of the annual value of about £80, and is open only to boys between the ages of 12 and 14 who are sons of an officer who was in the service of the late H. E. I. Company, or of an officer in H. M. Army, who has served in the India Staff Corps or in any way attached himself permanently to the military service of her Majesty in the East Indies. For particulars apply to Rev. the Bursar, Wellington College, Wokingham.

ESTABLISHED 1864.

TIMEWELL,

SPECIAL TAILOR & MILITARY OUTFITTER TO GENTLEMEN WHO REQUIRE NO CREDIT
8, SACKVILLE STREET,
PICCADILLY, LONDON, W.

A large private trade of highest class and character, yielding to its patrons the full advantages of their position.

E. LAZENBY and SON'S PICKLES, Sauces, and Condiments.—E. Lazenby & Son, sole proprietors of the celebrated receipts and manufacturers of the pickles, sauces, and condiments so long and favourably distinguished by their name, beg to remind the public that every article prepared by them is guaranteed as entirely unadulterated.—92, Wigmore Street, Cavendish Square (late 6, Edward's Street, Portman Square), and 18, Trinity Street, London, S.E.

HARVEY'S SAUCE.—CAUTION.—The admirers of this celebrated sauce are particularly requested to observe that each bottle prepared by E. LAZENBY and SON bears the label used so many years, signed, "*Elizabeth Lazenby.*"

In consequence of Spurious Imitations of

LEA and PERRINS' SAUCE, which are calculated to deceive the Public, LEA and PERRINS have adopted A NEW LABEL, bearing their Signature—

LEA AND PERRINS,
which signature is placed on every bottle of
WORCESTERSHIRE SAUCE,
and without which none is genuine.

Sold Wholesale by the Proprietors, Worcester, Crosse and Blackwell, London; and Export Oilmen generally.

Retail, by dealers in Sauces throughout the World.

COCKS' READING SAUCE

Is the best and most economical Sauce ever manufactured for
FISH, ENRICHING SOUPS, GRAVIES, &c.
It only requires a trial to convince the purchaser of its excellence.

CAUTION.—The genuine is protected by Trade Mark, viz., CHARLES COCKS' Signature on a white ground across the Reading Arms.

LIEBIG COMPANY'S EXTRACT OF MEAT.
Finest Meat-Flavouring Stock for Soups, Made-Dishes, and Sauces. Caution.—Genuine ONLY with facsimile of Baron Liebig's signature across Label.

FALKNER'S "REAL MALT" WHISKEY.

The same as supplied to the principal Clubs and Regimental Messes. Has been esteemed in Ireland for the last century as the FINEST IRISH WHISKEY procurable, being pure as distilled, and refined by age only.

LONDON, 40, CHARING CROSS.
DUBLIN, 83, GRAFTON STREET.

KINAHAN'S LL WHISKY.

KINAHAN & Co. finding that, through the recommendation of the Medical Profession, the demand for their CELEBRATED OLD LL WHISKY for purely medicinal purposes is very great, submit with pleasure the following ANALYSIS by DR. HASSALL:—

"I have very carefully and fully analysed Samples of this well-known and popular Whisky. The samples were soft and mellow to the taste, aromatic and ethereal to the smell. The Whisky must be pronounced to be pure, well-matured, and of very excellent quality. The medical Profession may feel full confidence in the purity and quality of this Whisky." 20, GT. TITCHFIELD ST., LONDON, W

SCHWEPPE'S MALVERN SELTZER.
SCHWEPPE'S SODA WATER.
SCHWEPPE'S LEMONADE.
SCHWEPPE'S POTASS WATER.

Consumers are particularly requested to ask for SCHWEPPE'S, and observe Trade Mark on Labels (a Fountain), as many imitations are offered to the Public.—To be obtained from the leading Chemists, Wine Merchants, and Grocers.

LANE'S PRIVATE HOTEL (Nos. 1, 2, and 3, ST. ALBAN'S PLACE, CHARLES STREET, St. James's, S.W.), for Officers in the Army and Navy, Members of Clubs, and others. Most eligibly situated in the immediate vicinity of the principal Club Houses. Gentlemen requiring sleeping accommodation only, are respectfully informed every attention will be paid to their comfort and convenience. A trustworthy porter in attendance all night.

LEFT OFF CLOTHES, Old Uniforms, Epaulettes, Books, Jewellery, Miscellaneous Property, &c., PURCHASED in any quantity or condition.

MR. J. NORTON,
5, WYCH STREET, STRAND
(Two doors from Olympic Theatre), and
2, Station-terrace, Croydon.

Continues giving the highest price in the trade for the above. The utmost value remitted by Post-office order the same day for all Parcels forwarded.

All letters punctually attended to.

Ladies waited on by Mrs. N.

N.B.—Mr. Norton has always on hand a large stock of present Regulation Uniforms, Patrol Jackets, Great Coats, &c., equal to new, at very low prices.

TO OFFICERS OF HER MAJESTY'S SERVICE.—LEWIS MOSES, of 464, New Oxford Street, the largest and most liberal buyer of officers' uniforms, ladies' and gentlemen's left-off clothes, &c., has on hand a large stock of the above. Parties waited on. Established 1798. Cash remittances for country parcels by return.

ARMY EXAMINATIONS.—Gentlemen preparing for the Staff College, Woolwich Academy, Cadetships, Aides-de-Camp, &c., are respectfully informed that Professor J. Poirand, 49, Sydney Street, Brompton, S.W., has a few hours disengaged of which candidates may avail themselves. Subjects—French, Geometrical Drawing, Perspective, and Surveying (theoretical and practical).

ST. LAWRENCE-ON-SEA, NEAR RAMSGATE.

THE "GRANVILLE" HOTEL.

THE "GRANVILLE" PRIVATE SPECIAL EXPRESS TRAINS to ST. LAWRENCE-ON SEA, near Ramsgate, in 1 hour and 40 minutes. Departures every Friday, from Charing Cross at 3.45, and Cannon Street at 3.55 p.m. (See bills.)

THE "GRANVILLE" HOTEL. The "Morning Post" says:—"Nowhere in England can a series of baths such as that at the 'Granville' be seen."

THE "GRANVILLE" HOTEL. The "Globe" says:—"As a residential hotel during winter, the 'Granville' is second to none."

THE "GRANVILLE" HOTEL. The "Saturday Review" says:—"The scenery, the air, the accommodation for visitors were described as of the most perfect kind; and we could not help wondering how it was that this place, which had been in existence in a quiet way for several years, had suddenly, like Byron, gone to bed and awoke famous."

THE "GRANVILLE" HOTEL. "Land and Water" says:—"The 'Granville' Hotel is likely to become a popular winter resort, not only for invalids, but also for those seeking a few days' relaxation from work."

THE "GRANVILLE" HOTEL. "Mayfair" says:—"The proprietor of the hotel, which has carried the name of St. Lawrence-on-Sea to the utmost ends of the earth, has energetically and judiciously lavished a fortune, first in making the 'Granville' Hotel one of the most charming seaside residences in the Kingdom, and next in bringing the fact under the notice of the public."

17 Prince Albert Street, Brighton.

HOLLOWAY'S PILLS.—Look to your Health.—Any abrupt change in the weather always causes much disordered action in the human body. It is a matter of primary importance to rectify every irregularity without delay, which it is in the power of every one to do by taking Holloway's Pills. These Pills are the best preventives of indigestion, and the mildest aperients ever prescribed. They purify and cool the blood, and equalise the circulation through the system, even to the minutest vessel of the skin. They act admirably on the liver and kidneys. By these salutary effects many ailments are averted, and more serious illness prevented. Persons subject to bilious attacks, gout, rheumatism, and rheumatic gout, will be benefited by this treatment.

A CORRECT IMPRESSION

Prevails among the public that Silks are generally dearer, and that they cannot now be bought at former prices; but this idea will be removed, as far as MESSRS. JAY'S transactions are concerned, by an inspection and comparison of the undermentioned BLACK SILKS, which are:—

3s. 9d. per yard ... ... worth 5s. 3d.
4s. 6d. " ... ... worth 5s. 9d.
5s. 3d. " ... ... worth 6s. 9d.
5s. 9d. " ... ... worth 8s. 3d.
6s. 9d. " ... ... worth 9s. 6d.

FOREIGN VELVETS, from 4s. 6d. per yard.

MESSRS. JAY, having had consigned to them before the rise in the price of Silk, a very large stock of these elegant Dress Materials, they are enabled to sell Black Foreign Velvets at 4s. 6d., 5s. 6d., 6s. 6d., and 7s. 6d. per yard. Patterns free.

NORFOLK IRON WORKS, NORWICH.

DR. J. COLLIS BROWNE'S

CHLORODYNE.

THE ORIGINAL AND ONLY GENUINE,

Which is admitted by the Profession to be the most wonderful and valuable remedy ever discovered.

CHLORODYNE is the best remedy known for Coughs, Consumption, Bronchitis, Asthma.
CHLORODYNE effectually checks and arrests those too often fatal diseases—Diphtheria, Fever Croup, and Ague.
CHLORODYNE acts like a charm in Diarrhœa, and is the only specific in Cholera and Dysentery
CHLORODYNE effectually cuts short all attacks of Epilepsy, Hysteria, Palpitation, and Spasms.
CHLORODYNE is the only palliative in Neuralgia, Rheumatism, Gout Cancer, Toothache, &c.

From Lord FRANCIS CONYNGHAM, Mount Charles, Dec. 11, 1868.

Lord Francis Conyngham, who this time last year bought some of Dr. J. Collis Browne's Chlorodyne from Mr. Davenport, and has found it a most wonderful medicine, will be glad to have half-a-dozen bottles sent at once to the above address.

⁂ Earl Russell communicated to the College of Physicians that he had received a despatch from her Majesty's Consul at Manilla, to the effect that Cholera has been raging fearfully, and that the ONLY remedy of any service was CHLORODYNE.—See *Lancet*, Dec. 31, 1864.

CAUTION.—BEWARE of PIRACY and IMITATIONS.

CAUTION.—Vice-Chancellor Sir W. Page Wood stated that Dr. J. COLLIS BROWNE was, undoubtedly the INVENTOR of CHLORODYNE; that the story of the Defendant, Freeman, was deliberately untrue, which, he regretted to say, had been sworn to.—See *Times*, 13th July, 1864.

Sold in Bottles, at 1s. 1½d., 2s. 9d., and 4s. 6d. None is genuine without the words "Dr. J. COLLIS BROWNE'S CHLORODYNE" on the Government stamp. Overwhelming Medical Testimony accompanies each bottle.

MAJOR CREASE'S PATENT SELF-REGULATING, CLEANABLE

CHARCOAL FILTER

Has been universally adopted in the Royal Navy, East Indian and English Transport Services; the German, Russian, American, and Austro-Hungarian Navies;
ALSO BY
HER MAJESTY'S WAR DEPARTMENT,
For BARRACKS, HOSPITALS, CAMPS, &c., &c.
And for which Patents have been granted by the Governments of Great Britain, the United States of America, Italy, France, and Canada to Major Crease, Sole Patentee of the Self-regulating, Cleanable Filter.

The designs are of three classes—
1.—For dwelling rooms and halls. To suit different styles of furniture three types have been employed—the Classic, the Japanese, and the Mediæval. None of these forms have been before employed for Filters.
2.—Those of simpler and cheaper designs for kitchen use.
3.—Filters of galvanized iron, either to fix to mains or cisterns, which, being capable of being made of any size, can supply pure water in sufficient quantities for the largest hospital or hotel.
The Filters, being made of special sizes, all their parts are interchangeable.

Full particulars can be obtained on application to
MESSRS. GARDNER AND SONS,
Sole Manufacturers of the Land Filters,
453 & 454, STRAND; and 3 & 4, DUNCANNON STREET, LONDON.

BELGRAVIA BRANCH—13, LOWNDES STREET, BELGRAVE SQUARE, S.W.

THE AYLESBURY DAIRY COMPANY

WAS FORMED 10 years since with the object of supplying the public with

PURE MILK obtained from

WELL-MANAGED Farms known to be in

GOOD Sanitary Order.

THIS object has been accomplished on a continually enlarging scale with uninterrupted success.

THE Company has now become by far the

LARGEST Supplier of Milk in the Metropolis.

EVERY precaution is and has been adopted, not only to secure the purity of the Milk supply, but also its absolute

SAFETY from taint, to which the peculiar nature of Milk renders it liable, and to which it is frequently exposed under ill-regulated management, whether at the farm or on the premises of the London vendor.

THE Directors believe that the success in carrying out

PERFECT sanitary arrangements has been mainly instrumental in raising the company to its present position. They are prepared to supply

MILK in any part of the Western, South-Western, and most parts of the North-Western Districts of London.

BUTTER.—Butter, from Pure Cream, is made daily in the Company's Dairy. Customers may see it churned.

THE BOARD OF MANAGEMENT

IN INVITING householders to become customers of the company are desirous that they should

INSPECT the Premises, and examine for themselves the systematic and careful precautions which are adopted in the conduct of the business.

IN order to give further assurance to the public of the determination of the company to uphold the position it has attained, the directors have secured the assistance of Mr. Ernest Hart, whose authority in sanitary matters is very generally recognised; and the medical and sanitary inspection of the farms and cattle from which the supply of milk is obtained are under Mr. Hart's immediate control and supervision. Mr. Hart's reports are at all times open to the inspection of the customers of the company.

THE Present Premises in London consist of the chief depôt in St. Petersburgh-place, Bayswater, covering nearly half an acre of ground, specially constructed about six years since, and built and arranged on the most approved sanitary principle, and a range of lofty, well-ventilated sheds, with accommodation for a large number of cows in Portobello-road, Notting-hill.

THE Premises of the Company at St. Petersburgh-place may be inspected at any time, but they will best repay a visit between twelve o'clock and 1.30 p.m., when the details of the management and the extent of the operations can be best appreciated. The sheds are also open to inspection, but by order only, which may be obtained at the chief office.

THE Belgrava Office is at 13, Lowndes-street, Belgrave-square, S.W.

THE AYLESBURY DAIRY COMPANY is receiving Milk and all other Dairy Produce from more than 60 selected farms in the counties of Bucks, Berks, Oxon, Wilts, Herts, Gloucester, and Somerset.

DISCLOSURES made during the last few years with respect to the

CONVEYANCE of DISEASE by means of Milk, have initiated a system of inspection, examination, and analysis, by skilled and responsible persons, to which they desire to call attention, and by which they feel that the company is in a position to give every possible assurance of

SAFETY to their CUSTOMERS.

DAIRY PROVISION DEPARTMENT.

SINCE the formation of the AYLESBURY DAIRY COMPANY constant inquiries have been received from customers for

BUTTER and other DAIRY PRODUCE, but until recently the company has not been able to supply anything but milk and cream.

A FEW months ago, however, increase of business rendered the establishment of country depôts necessary, and this has led to

CHEESE and Butter Making and Pig Feeding, on a large scale; and the company is now in a position to supply all descriptions of Dairy Produce, Butter, Cheese, at but little over wholesale prices.

OPINIONS OF THE PRESS.

FROM the SANITARY RECORD, Jan. 27, 1877.—"It is certainly surprising, and might seem incredible, except for the almost immovable apathy of average minds in respect to dangers not vividly present to their imagination, to observe how large an accumulation there is now of officially reported epidemics of fevers due to the spread of infection by polluted milk; and yet how insensible are the heads of families and the public generally to the necessity for precautions against this insidious source of disease. The list of local epidemics distinctly traced to milk is already too long for the memory; there are the outbreaks of Penrith, of Islington, of Marylebone, of Moseley, of Glasgow, of Jarrow, of South Kensington, and now of Burnley, besides half a dozen others of which we remember at the moment more or less faintly the details. These are the proved cases. In how many more this source of diffusion of infectious disease has escaped attention cannot even vaguely be guessed. Mr. Lyon Playfair and Mr. Sclater-Booth have spoken of the subject as one of pressing importance to the public health, and nevertheless the milk-consumer remains at this moment as unprotected and as careless of his own protection as ever. One great company in London takes well-devised and organised means to protect its milk from the farm to the kitchen, and to ensure its purity. Their example only makes, however, the contrast the stronger in respect to the dangerous conditions under which the milk supply of London lies in the hands of the uninspected small dealer and private retailer, and increases the surprise that the public do not more intelligently appreciate their own risk, and embrace the means of safety which such an organisation offers. The attention of the Government to the dangers of the ordinary milk supply of towns has been long since promised by the President of the Local Government Board, but meantime the remedy lies in the hands of the consumer, who should insist everywhere that a system such as that of the Aylesbury Dairy Company be universally followed."

NORTH WILTS HERALD, June 3, 1876.—"That this is pretty well the largest dairy in the world may, we think, be gathered from the following figures, the result of one week's working: Fifty farms supplied 21,318 gallons of milk, the produce of about 1,500 cows; over 9,000 gallons of this milk were distributed in London, mostly to private houses, of which the company supply nearly 4,000. As each of these houses is visited twice daily, and some three times, it follows that the company's servants make some 60,000 visits a week, each visit requiring a separate entry in the books. The remainder of the milk sent to London was disposed of wholesale, a branch of the business lately entered upon. The milk retained in the country at the Swindon factory and the dairy at Bourton, about 12,000 gallons, was converted into cream, butter, and cheese, and pigs fed with some of the whey. Of cream, some 400 quarts went to London, more than 800lb. of butter and over five tons of cheese were made, and 60 fat hogs, of 10 to 12 score each, were sent away to be converted into bacon, hams, lard, &c."

THE "BRITISH MEDICAL JOURNAL" says: "At a recent visit which we paid to the premises of the

AYLESBURY DAIRY COMPANY, we were pleased to find a vast and well-ordered establishment, in which all the resources of capital are directed to the supply of milk daily over a large part of London. The construction of the buildings, stables, and the cooling-rooms, is admirable. The travelling cans of the company have received the prize medal of the Society of Arts. Everything is done in military order, a great many of the employés being old soldiers.

PURE MILK is a MATTER so CLOSELY connected with the public health that we take pleasure in doing whatever we can to encourage it."

THE "LANCET" says: "We have recently paid a visit to the establishment of the Aylesbury Dairy Company and minutely inspected the premises. We were not only much pleased with the completeness of the arrangements, but surprised at their extent, and their suitability for the great object in view. —viz., the supply of

PURE and UNADULTERATED MILK derived from some of the best pastures in the country to the western district of the metropolis. Nothing can be more marked than the contrast between it and the little

DIRTY and CONFINED ROOMS so often found in obscure streets and places, and which are misnamed 'dairies.' We took the opportunity of examining also into the quality of the milk supply, and we found this a very full average; but the public should be cautioned not to base their opinion of the quality of any milk supply upon the amount of cream contained in any given sample, since this constituent of milk is naturally and normally liable to very great variation. In conclusion, we feel assured that the

AYLESBURY DAIRY COMPANY will secure a large measure of that success and prosperity to which we consider, from the enterprise and intelligence displayed, they are so fairly entitled."

THE MORNING POST says: "The whole system of milk supply requires, and in certain hands it is undergoing, a complete change. The lead in this change has been for some years taken by the Aylesbury Dairy Company (Limited), an association of gentlemen assisted by the supervision and advice of eminent medical and sanitary authorities, and having ample capital to enable them to avail themselves of all modern appliances and improvements in the way of buildings, &c."

THE

AYLESBURY DAIRY COMPANY, LIMITED.

The COMPANY HAVE NOT ANY BRANCH OFFICE in the N.W. DISTRICT, but the CARTS VISIT all parts of the W., S.W., and most parts of the N.W. Districts, two and three times daily, and are now delivering Milk to more than 4,000 private families. By arrangements lately completed they are in a position to supply an increased number of customers with Pure Milk from carefully-selected farms and from their own cows in London. A Special Service for delivery of Dairy Provisions is provided, as under no circumstances can they be sent out in the Milk Vans. All Orders should be Forwarded the day previous to that on which the Goods are required, and, as the quantity of Butter will at times be Limited, Orders will be Executed in the order in which they are received. Orders should be sent by Letter or Post-Card, and not given verbally to the Drivers of the Company's Carts, and should be Addressed to MR. HENRY WHELAN, Secretary, at the Company's Head Office, ST. PETERSBURGH PLACE, BAYSWATER; or at their Branch Office, 13, LOWNDES STREET, S.W.

Printed by JAMES MELDRUM and Published by EDWARD O'BRIEN PALMER for the Proprietors, at the Office, No 16, Wellington Street, Strand.—SATURDAY, April 7, 1877.

☞ *It is particularly requested that applications for copies of the* Army and Navy Gazette, *and Advertisements, shall* not *be sent to the Editor, but to* Mr. Richard James Wood, AT THE OFFICE, 16, WELLINGTON STREET, STRAND, W.C., *to whom all business communications shall be addressed and remittances made payable.*

The subscription to the paper is 7s. *per quarter, or* 28s. *per annum* payable in advance, *inclusive of postage to any part of the United Kingdom; to India,* £1 10s. 4d. *per annum;* viâ *Brindisi,* £1 14s. 8d.

IN the Circular of January 30, 1873, establishing the Royal Naval College at Greenwich, it is stated that my Lords intend "that it shall be so organized as to provide for the education of naval officers of all ranks above that of Midshipman in all branches of theoretical and scientific study bearing upon their profession;" and as the House of Commons and the public, with the ardent zeal of new converts, are pressing the point of the necessity which exists for the huge masses of machinery of which a modern ironclad is composed, being competently handled, it becomes a pertinent question to ask how far the Naval College has fulfilled its mission? The first thing that strikes us is, that in connecting the College with the recent agitation to which we have referred we have said something new, for although to us it would appear as "wasteful and ridiculous excess" to point to the obvious relationship between them, it does not appear to have occurred to naval critics either inside or outside the House of Commons. Has Mr. Goschen so entirely forgotten the objects which he had in view in founding the College at Greenwich, and is the temptation to reduce everything to a class grievance so great, that it is impossible to get members to take a large view of the real necessities of the case? We do not agree with the author of "Ginx's Baby" in his intended opposition to the increased grant for the Engineers, but he deserves credit for seeing that to which others are apparently blind—namely, that it is of little use to endeavour to improve the pay and position of the engineering staff if those to whom they are, and must be, subordinate, fail to appreciate their labours. Whether the blame lies with the Admiralty or with the conservative traditions of the Service itself may be disputed, but it can scarcely be denied that in every endeavour that has been made to improve the scientific knowledge of naval officers, it has always been attempted to introduce it from below by the instruction of junior or subordinate officers, while little encouragement has been given to their superiors to avail themselves of the means placed at their disposal, and still less reward has been held out to those who have actually shown superior attainments. It is, of course, easier to deal with the more plastic nature incident to youth; but while we do not advocate the attempt to make all naval officers scientific adepts when such accomplishments are apparently discouraged in the seniors, the attempt to make the juniors study is rather a cart-before-the-horse experiment, and it is not surprising that the advance is not as rapid as we could wish. We pride ourselves on being a practical race, and there are not wanting good officers of the present day who, although "rude of speech," like Othello, are as well fitted for command as he was; but, in default of that best of all teachers, experience in actual service and warfare, we must be content to study our subject theoretically, and we need scarcely refer to German experience to show that study in the closet can be effectively made use of in the field. Whilst, then, we have no fault to find with Mr. Hunt's statement that he took "particular pains" to select as "officers of the great ironclads those who had shown great ability in managing ships of less value," we could have wished that he would have given more direct encouragement to those officers who, at some expense and inconvenience to themselves, join the torpedo classes or the College at Greenwich. Plainly stated, the fact is, no officer for a moment imagines that any exertions he makes to keep up with the times render him the least more likely to be placed in command, while there is actually a notion that such studies are not too favourably viewed at the Admiralty. It used to be an old joke that when an officer had passed in steam he was sure to be placed in command of a brig; but we ought to have advanced beyond that point in these days. To those who may yet think that it is either *infra dig.* or useless for officers of rank to go to school again, we would call attention to the fact that the famous Lord Cochrane studied at the University at Edinburgh as a Post-Captain. We have no space to refer fully to the admirable report of Admiral Fanshawe on the working of the Royal Naval College, but it shows that he at least, as the President, is anxious that good work should be done there, and he gives, on the whole, a satisfactory account for the year ending October, 1876. The lectures are first-rate, the instructors are good, the discipline has been well maintained, and the Gunnery-Lieutenants, the Acting Sub-Lieutenants, the Marine officers, the Engineer and Shipwright students, for all of whom there are special obligatory courses, have evidently worked hard. If, however, we turn to the half-pays, the result is not so satisfactory; and although, during the session reported upon, four Captains, four Commanders, ninety-three Lieutenants, and eight Navigating-Lieutenants had studied at the College, only one Captain, twenty-two Lieutenants, and one Navigating-Lieutenant had so far profited by the instruction afforded them as to obtain honorary certificates. We find, too, by the April "Navy List," that the number of half-pays studying at the present time shows only two Captains, four Commanders, and twenty-five Lieutenants. Turning, again, to the Circular before referred to, we find it stating that "twenty-five Captains and Commanders may be admitted as students, while the number of Lieutenants is to be at the discretion of the Admiralty," and it is stated that my Lords "are particularly anxious" that young Lieutenants should study there; yet the "Navy List" shows 175 Lieutenants on half pay, only twenty-five of whom are at the College. It is evident that, with reference to the scientific education of officers above the rank of Sub-Lieutenant, the College is not doing what was expected of it when it was orginally founded on its present basis. It would be, in our opinion, most detrimental to lower the standard of requirements, and the remedy is, therefore, to be found in offering greater encouragement to the senior officers to prosecute the "scientific studies bearing on their profession." This can be done in two ways, either by increasing the direct inducements to study by placing officers on full pay, or by rewarding them with good appointments on the completion of their course, and thus paying by results. Whichever course may be adopted, it is most important that, for once, an attempt should be made to impress the Service with the necessity for scientific attainments through the seniors. We would further suggest that the practical steam course should be revived at Portsmouth, and that some naval executives should be induced to qualify as instructors in some of the numerous scientific branches bearing on their profession. So long as the naval officers at the College and in the Brittannia are solely employed for purposes of discipline, it is lost labour to endeavour to impress the necessity for scientific education on the rising generation.

A very interesting article on Army Reform, founded upon the recommendations of Mr. F. Stanley's committee, the Report of which was submitted to Parliament this year, appears in the April number of *Macmillan.* That the recommendations of that committee were carried out very imperfectly, if at all, renders, in the writer's opinion, those who were responsible for the neglect deserving of the gravest censure. An army is an instrument for purposes of war, and it is the duty of the Minister who is charged with the administration to see that it is in all respects as perfect as care and energy can render it. It was, however, impossible for Lord Cardwell, thorough "reformer" as he was, to carry out the great changes he contemplated in the Army. "He laid the foundations of a great structure, but not only has it never been built, but the foundations which he laid, in some instances, have been used for purposes altogether different from those for which the master mason intended them." The evidence laid before Mr. Stanley's committee shows that important reforms were approved of by Parliament, that regulations were framed to give effect to those reforms, but that these, though published in General Orders by the Commander-in-Chief, have never been carried out. A certain system, based upon a minute drawn up by the Commander-in-Chief, was strongly recommended by a committee of officers serving on the head-quarters Staff of the Army. Lord Cardwell consequently found it necessary to apply to Parliament for £3,500,000 to build barracks. This amount was granted without a murmur, it being understood that a thorough reorganization of the Army would be effected, and the system of localization which had been discussed and met with approval in Parliament fully carried out. The building of the barracks was certainly commenced, but no steps were taken to develop the new military system. The author of the paper in *Macmillan* does not disguise his sentiments when referring to this subject. He boldly states:—"The military authorities hated, and in every way endeavoured to discredit it, only too glad to find occasionally little difficulties cropping up here and there in the working of those parts of it that had previously been set in motion, and sparing no pains to pronounce it a failure, instead of honestly endeavouring to smooth those difficulties away and to give a fair trial to a system that had received in so unanimous a way the approval of Parliament, and which all sections of the Press had praised so highly." These are hard words, and we do not know who are the military authorities referred to. Eventually a committee was appointed to inquire into Lord Cardwell's localization system. In their report were embodied several recommendations, but whether they are to be adopted or not still remains doubtful. The writer in *Macmillan* proceeds to meet the objections raised to Lord Cardwell's localization system. First, he refers to the proposal to substitute historical or territorial titles for regiments in place of the numbers now attached to them in the "Army List." The objections to this, the writer maintains, are futile, seeing how very few corps pride themselves upon their numerical designations. The proposed linking of battalions affects 83 of the 110 regiments of the Army. The idea of regimental individuality has acquired great strength in the Service; but yet it is observed that when an officer exchanges from one regiment to another for his own convenience he generally transfers his feelings of affection from his old to his new corps. The author admits that the marriage between regiments already carried out under the linking system of the Localization Scheme is distasteful to the regiments concerned:—

> We frankly acknowledge that this union between regiments is distasteful to them, but, feeling it to be absolutely necessary for the good of England, we hope and trust it may be carried out; and having the most unbounded confidence in the patriotism, good feeling, and intelligence of all ranks in our Service, we know that if told so by those at the head of our Army, the position would be accepted without a murmur. Let the public once and for all banish from their mind any

> apprehension of difficulties arising from opposition on the part of our regimental officers to this proposed organization if it be accepted in good faith by our military leaders. They are our fuglemen, to them we look for guidance, and such is the peculiar constitution of our Army at this moment, that if it be allowed to get abroad amongst us that these or any other changes that the nation may have set its heart upon have been forced upon our military authorities against their will, no effective reform can or need be looked for. Every officer, from the colonel to the sub-lieutenant, knows full well that were the Commander-in-Chief to inform the Army to-morrow, by means of a General Order, that these or any other still more sweeping changes were necessary in the interests of the nation, they would be cordially concurred in by all ranks, and all would at once put their shoulders to the wheel to aid in giving effect to them. We have too high an opinion of our officers, and we know them too well to think otherwise for a moment.

We approve of the spirit in which this article is written, if we cannot agree with all its conclusions or coincide with its author in his concluding remarks—"Let us earnestly hope that these recommendations may be carried out forthwith; for, until they are, our Army cannot be given the expansiveness required to convert it into an effective instrument for purposes of war"—because we have yet to be convinced that these changes will improve the Army as a force in the field in war time.

On March 3rd, under the heading "Floating Houses," we offered some objections to the selection of the Urgent for duty as receiving-ship at Port Royal, both on account of her unsuitability, as an iron ship, for lying moored in such a harbour, and on the ground of expense. Since then we have received some letters on the subject, in all of which it is agreed that a wooden ship would be far better adapted for Jamaica than an iron one which will become little better than an oven, and others hold with us that quarters on shore would be by far the best, and least costly, arrangement that could be devised. One officer who has seen considerable service at Port Royal urges us to advocate by all means the establishment of shore quarters. All that would seem to be required is residence for the Commodore's Secretary; the navigating officer who has charge of he surveys, moorings, and buoys; the Chief Engineer who attends to the factory, and about twelve men who are permanently employed in the factory and steam launches. This being so, the necessity for sending a large ship to Port Royal, simply to lie and swelter under the broiling sun, is far from apparent, for if it became advisable to clear out any ship on that division temporarily, quarters could be found for her crew in the lofts in the yard without putting officers or men to any very great inconvenience. As a fact, such a contingency is remote indeed, and the emptiness of the receiving-ship, as regards supernumeraries waiting disposal, is sufficient proof that she exists more from custom than because she is absolutely required. Yet such a vessel, with her complement of nearly one hundred and fifty officers and men needlessly exposed to a climate which is the reverse of good, and running the risk of that dire disease yellow fever, costs a few thousands annually in stores and keeping in repair. It would be far better and more to the purpose if a powerful despatch-vessel or tug were stationed at Port Royal instead of a floating hulk. This would not call for many additional hands, and the navigating officer could take command when her services were required. She could also fly the Commodore's pendant. The idea of substituting shore quarters for a floating house evidently commends itself to many who have served on the station, and we think it would be well if the Admiralty would call upon the Commodore to report on the feasibility of this scheme before giving the Urgent her sailing orders. The fact that she has been prepared for service as a receiving-ship at Port Royal should not be allowed to influence her ultimate disposal, for she will be of far greater service at home and will save the outlay of preparing some other hulk to take the place of one of our present harbour ships.

If the Admiralty continue to make the Tagus as much the head-quarters of the Channel Squadron as hitherto, our officers will have opportunities of making a better acquaintance with our American cousins, as it is reported that the United States' Government has decided to transfer to Lisbon their naval station, which is at present at Nice.

The statement that the late Rev. E. A. Daubeny was the last surviving officer present at the battle of Copenhagen, April 2, 1801, to which we alluded last week, proves to be incorrect. Admiral Philip Westphal, now living at Ryde, was Master's Mate of the Blanche at this memorable engagement, and was made a Lieutenant three days afterwards. Admiral Westphal entered the Navy in December, 1794; became Captain, July 22, 1830; Rear-Admiral, September 27, 1855; Vice-Admiral, October 4, 1862; and attained his present rank on April 2, 1866. Captain George Hilton, who entered the Navy three months after Admiral Westphal, was also present. He was Second Lieutenant on board the Orion when the fleet was in Danish waters, and was appointed by Admiral Gambier to command the Pearl at the battle of Copenhagen.

The appointment of Dr. Bremner to Haslar Hospital is for temporary service, awaiting the arrival of Deputy Inspector-General Irwin, C.B., who has been transferred from Jamaica Hospital.

The Board of Trade has received a report, from a merchant vessel, of the discovery of a shoal lying some 200 miles off the coast of Brazil.

It is the intention of the Admiralty to issue instructions for the periodical testing of boilers of all ships in commission by water pressure, as an additional precaution against the possibility of accident.

General Alexander Anderson, C.B., the senior officer on the Active List of the Royal Marines, will be retired by age in the course of next month, and will give a step throughout the Light Infantry. Colonel Penrose, C.B., Commandant of the Plymouth Division, will be advanced to the rank of Major-General, and a Colonel's Good Service Pension of £150 per annum will thus become vacant.

It is generally understood that officers attending the Torpedo Class at Portsmouth will find every accommodation provided for them at the College, much in the same way as if they were quartered at an hotel. But the official who arranged the "accommodation" unfortunately drew the line at bedding, towels, &c., of which the officers' quarters are destitute. Surely a little more liberality might be shown in this direction, seeing how temporarily those attending the classes are quartered at the College, and how inconvenient it is to have to travel about with a quantity of bed-room furniture.

Admiral the Hon. Sir James Drummond, K.C.B., has completed three months beyond the usual term of service before hauling down his flag as Commander-in-Chief in the Mediterranean, a circumstance owing principally to the delays in the sailing of the Alexandra. An extra week's leave is to be granted to the men of the Hercules.

One of the advantages connected with the acceptance of the "new" regulations as to naval retirement, instead of adhering to the "former," is that time served on committees counts for increase of full pay in the case of those who accepted the terms offered by the Order in Council of February, 1870, whereas that privilege is withheld from those still serving under the former system. This fact has just been brought home to an officer who has been doing a fair amount of committee work, and had hoped that he was thereby serving towards an increase of full pay.

We are informed that the exact cost of floating off the Lapwing at Chefoo amounted to £542, and by the ready resource of those who suggested the sand-bag breakwater this sum saved a vessel which was at one time believed to be hopelessly lost, and would have cost £35,000 at least to replace. Of course, neither officers nor crew will receive any salvage for saving their own ship, but the energy shown will doubtless have its weight at the coming court-martial at Nagasaki.

A fortnight since we called attention to the seemingly erratic manner in which the Simoom had been ordered from pillar to post in effecting some reliefs in the West Indies, being made to travel over the same ground twice with a consequent unnecessary expenditure of fuel. Now we hear from the Orontes that she has been also the victim of some mismanagement with regard to the disembarkation of a portion of the 80th Regiment at Natal. No instructions having been received by the military authorities at that place, provision was not made for the reception and disposal of the troops, and after considerable delay the Orontes was put to the expense of making a double journey. Such bungles in time of peace do not reflect credit upon the department concerned.

We understand that a ship on the China Station is about to pay a visit to the Russian naval establishment at Petropaulovski.

There will be a competitive examination at Chatham Dockyard in May for the entry of Engineer students. The new regulations respecting the entry of students, recently suggested by Mr. Ward Hunt, will come into force at this entry.

Mr. Peter Taylor is, doubtless, actuated by the best motives in bringing forward his annual motion for the total abolition of corporal punishment in the Navy, and everyone in the Service so far goes with him as to sincerely wish such a course might be adopted with entire security. As a fact, the punishment is never inflicted except in most serious cases, proof of which is given in the circumstance that, in the course of a whole year, no more than fourteen seamen and Marines were flogged, although 35,000 were afloat during that period. There are cases in which the adoption of extreme measures are absolutely needful, and although there are now few commanding officers who do not abhor the use of the "cat," it is felt advisable to keep that punishment in reserve. One of the most recent instances in which it has been applied was in the case of a young seaman who violently assaulted and drew his knife upon his superior officer, and a court-martial sentenced him to receive thirty-six lashes and to be dismissed the Service. Surely this was deserved, and it should not be forgotten that violent assaults by civilians are punishable by flogging.

The pension of £50 which was awarded to Lieutenant George S. Smith, R.N., for one year, on account of impairment of eyesight, through injury received on duty, has been ordered to be continued for life.

There seems to be a very considerable decrease taking place in the number of unemployed naval officers of all grades, for, taking the list as it now stands, as compared with its position a year ago, it appears that the number of officers on half pay has been diminished by nearly fifty, while the Reserved List shows a decrease of some fifteen, and no fewer than fifty retired officers have disappeared. This is rather a rapid rate of absorption.

It is reported that when Major Barlow found himself in the hands of the Egyptians he appealed to the commanding officer of a British man-of-war to demand his release from surveillance, but the appeal had not the desired effect. As a rule, naval officers are always ready to come forward in defence of British interests, and, therefore, we are inclined to believe that the complexion affairs wore in this instance made it prudent not to assert the right of the Briton to do as he liked in countries other than his own.

A correspondent informs us that the night before the departure of an ironclad from her station, homeward bound, a large number of officers from the Fleet and foreign Services of two nationalities were invited on board for the purpose of bidding farewell, but this intention was abruptly frustrated owing to an order from the captain to the ward-room that all gun-room officers, commissioned or otherwise, were to turn in at once, and all strangers, including English and foreign officers, were ordered out of the ship. This occurred shortly after 10 p.m., and as the vessel was not going to sea until the next forenoon, it was thought that a little extra leisure might have been accorded on such an occasion.

Commander Colin Dundas has arrived in England from the Eclipse, on promotion.

The Cochrane Claim, which we advocated last week, was brought before the House on Tuesday, and the motion for an inquiry into the case was carried as we anticipated. It was beyond doubt that the feeling of Parliament was entirely in favour of the injustice being redressed, and we can only suppose that it was officially considered a matter of duty that the Chancellor of the Exchequer should offer some half-hearted opposition on some technicality which had been brought before him by red-tapeists who could not find a precedent. But, for the credit of the country, such a case as this is better without a precedent.

We made some extracts last week from a report of the proceedings of the Orontes, given in the *Mauritius Commercial Gazette*, and also quoted the recommendations made on the same subject at the meeting of the Quarantine Committee. From a letter we have received this week, and inserted elsewhere, it will be seen that the proceedings of the Orontes bear a very different construction to that put upon them by the journal and officials alluded to above, and not only do the people of Mauritius seem to have made much ado about nothing, but also to have shown hot haste in doing it.

It is with regret that we have to record the death of Commander Henry Sewell, who entered the Royal Naval Academy in September, 1803, and embarked in 1807 as Midshipman on board the Africaine, 38, Captain Richard Raggett. In that frigate he accompanied the expedition to Copenhagen, witnessed the surrender of Madeira, brought home a General, whose life he had saved when attacked by a Portuguese mob after the Convention of Cintra, and conveyed the future King of the French to Malta. After serving in the Theseus and Poictiers (the former employed in the attack upon Walcheren), he again joined the Africaine and sailed for the East Indies. On his passage out he took part in a very gallant although unsuccessful attempt made, September 11, 1810, by two boats under Lieutenant George Forder, to capture a schooner near the Isle of France, on which occasion the British sustained a loss of two men killed and sixteen, including himself, severely wounded. Three days subsequently to this event the Africaine came to close action with the French frigates Iphigénie and Astrée, carrying between them 86 guns and 618 men, and after a brave but unequal contest of two hours and a half, in which she endured a loss of forty-nine men killed and 114 (including her Captain mortally) wounded, and occasioned the enemy one of ten killed and thirty-five wounded, was compelled to strike her colours. Being, however, retaken a few hours afterwards, Mr. Sewell continued to serve in her under the flag of Vice-Admiral Albemarle Bertie until the following October. He attained the rank of Lieutenant December 10 in the same year; returned in 1811 to England, and between 1812 and 1815 was employed on the Home and Brazilian stations. In March, 1835, he was given charge of a station in the Coast Guard, which he held for many years, and in 1840 was presented with a gold medal from the Royal National Shipwreck Institution for having saved the lives of the crew from a wreck. He became a Commander on the "1816" List in 1862.

Captain Frank T. Thomson has arrived home from the Bellerophon, and assumed command of the Royal yacht Victoria and Albert on Tuesday.

We regret to hear that Dr. William Smith, Fleet Surgeon of the Unicorn, died on Sunday last.

Another small-type column of the *Times* is filled with correspondence on the Naval Engineer Question, the writer on this occasion being a Civil Engineer, who is "authorized" to act as a mouthpiece for his "brethren in the Service." There is little new in what he advances, being principally content with playing the part of echo to Mr. Reed's ideas. He naturally drops into some errors, and comes forward with complaints against imaginary grievances, one of which is the position of the name of the Chief Engineer in the list of officers serving in a ship, as originally advanced by Mr. Reed. If officers' names were placed according to relative rank and seniority, it would result in a hopeless jumble, Commanders, Medical, Marine, and Navigating Officers, Paymasters, Chief Engineers, and Lieutenants being generally mixed. But from the tone of the claims now set forward, it appears as though nothing will satisfy the class but to rank immediately after the Captain and to retire as G.C.B.'s. This is rather high flying.

His friends have been gratified by the appearance of Vice-Admiral Beauchamp Seymour in London in perfect health this week.

The United States' Squadron in European waters is ordered, as we learn from New York yesterday, to make rendezvous at Nice, and then to repair to Constantinople "to protect American interests." This is very odd. It is not to be denied that there are Americans in Constantinople—for there may be "citizens and citizenesses" there—even among "Cook's Tourists;" but, surely, if the Fleets of Great Britain are content to watch over British interests at Constantinople from Smyrna and Malta, our good cousins can do all their watching over far less interests from Nice. If it be war between Russia and Turkey, the appearance of a neutral squadron off the Golden Horn may be objected to, especially at a time when the Fleet of one of the belligerent Powers is anchored *en potence* in a port of the neutral State which is sending its flag into such a murky atmosphere.

Brevet Lieutenant-Colonel T. D. Baker, C.B., 18th Royal Irish, Assistant Adjutant-General at head-quarters, has been selected to fill the vacancy among the Queen's Aides-de-Camp caused by the promotion of Brigadier-General the Hon. F. A. Thesiger, C.B. Colonel Baker served with the 18th Royal Irish in the Crimea from December 20, 1854, including the siege and fall of Sebastopol—mentioned in despatches, and awarded the Sardinian medal for gallantry displayed at the attack of the Cemetery and suburbs of Sebastopol, January 18, 1855 (medal with clasp, Sardinian and Turkish medals). Served in India during the Mutiny in 1857 with the Field Force under Colonel Beatson. Served in New Zealand during the Waikato and Wanganui campaigns of 1864-66, first as Deputy-Assistant Adjutant-General, and subsequently as Assistant Adjutant-General; was present at the action at Rangiawhia as Acting Assistant Military Secretary to Lieutenant-General Sir Duncan Cameron (mentioned in despatches, Brevet of Major); was Staff officer to the force under Major-General Carey at the attack and capture of Orakaw—mentioned in despatches for "gallantry and untiring energy and zeal evinced" (medal). Accompanied Sir Garnet Wolseley to the Gold Coast in September, 1873, and served throughout the Ashantee war as Assistant-Adjutant and Quartermaster-General (several times mentioned in despatches, Brevet of Lieutenant-Colonel, C.B., medal with clasp). He entered the Army August 18, 1854; became Captain, October 26, 1858; Brevet Major, March 21, 1865; Major, November 12, 1873; and Brevet Lieutenant-Colonel, April 1, 1874.

The brigade command of the Bengal Army vacant in consequence of the promotion of Colonel W. Payn, C.B., 72nd Highlanders, to the establishment of General officers, is to be filled by Brevet Colonel J. E. Michell, C.B., Royal Horse Artillery. Colonel Michell served in the Eastern campaign of 1854, and up to May, 1855, including the battles of Alma and Balaklava and siege of Sebastopol (medal with three clasps, Brevet of Major, Sardinian and Turkish medals, and 5th Class of the Medjidie). Served in the Indian campaign of 1857-58, including the storm and capture of Meangunge, siege and capture of Lucknow, and commanded the Royal Horse Artillery at the affair of Tigree, relief of Azimghur, action near Azimutghur, operations in the jungle, and capture of Judgespore, attack and capture of Tirout (four times mentioned in despatches, Brevet of Lieutenant-Colonel, medal with clasp, and C.B.). He entered the Army December 16, 1846; became Brevet Lieutenant-Colonel, April 26, 1859; Brevet Colonel, April 26, 1867; and Lieutenant-Colonel, September 3, 1870.

Brevet Major C. W. Robinson, Rifle Brigade, has been appointed to succeed Captain H. M. Moorsom, Royal Artillery, as Deputy Assistant-Adjutant and Quartermaster-General at Irish head-quarters. Major Robinson served with the 2nd Battalion Rifle Brigade in the Indian mutiny (medal); served throughout the second phase of the Ashantee war from December 12, 1873, as Brigade-Major to the European Brigade (mentioned in despatches, Brevet of Major, and medal with clasp). He entered the Army November 27, 1857; became Captain, May 7, 1870; Brevet Major, April, 1874; and passed from the Staff College in December, 1865.

Captain A. Collins, 57th Regiment, has been appointed temporary Aide-de-Camp to Sir J. R. Langden, K.C.M.G., Governor of the Island of Ceylon.

We would call attention to the retention since the abolition of purchase of a regulation by which an officer who has paid for two or more commissions, and may have done duty for five years and upwards in India, is called upon on retirement not only to defray the expenses of his own passage home, but has also to suffer the reduction of £95 from the amount to which he would otherwise be entitled to meet the expenses of his successor's passage. Ultimately the sum of £65 18s. 6d., the full cost of passage by P. and O. Company's steamer, is charged to the retiring officer's account, although in all probability his successor may not be appointed for months after he is gazetted out. On the other hand, officers who have not purchased are allowed to retire immediately after first appointment and arrival in India without being subject to any such reductions. This arrangement is, to say the least of it, inconsistent, and can on no grounds be defended. Officers are sent to foreign stations for the country's good, and they are entitled to more considerate treatment. It is little hardships such as this which press so heavily upon poor men in the Service.

In moving the supplementary Army Estimates, Mr. Hardy referred to an item representing an extensive purchase of cloth for Army purposes. The right honourable gentleman stated that it had been considered advisable to make a large purchase of cloth, the terms being most advantageous for acquisition, cloth at the time being at a low figure. Has cloth descended in price since, or was, in the purchase, the element of public competition made available? True economy is an unquestionable benefit, but it is to be feared that in our official dealings this fact is occasionally overlooked. We are aware of a block of very handsome barracks standing on a piece of ground offered for sale by the owner, some time since, for a most moderate figure. This offer, however, was declined, a rent of one thousand per annum now being paid instead. Possibly what may be supposed to have been a parlous purchase of cloth by one Government is considered a set-off against extravagance in land on the part of another.

The French War Minister has already decided upon the Autumn Manœuvres, and it is only to be hoped that the French Army will not be called upon to undertake any more serious operations than those at present contemplated. Orders have been sent to the 2nd Army Corps, head-quarters Amiens, that the 4th Division and 5th and 6th Brigades of Infantry are to be exercised separately. The 5th Army Corps, under General Bataille, Orleans, will turn out and manœuvre for a fortnight. The 6th Corps, under General Douai, Chalons-sur-Marne, has orders to send two brigades of Infantry to the Camp of Chalons for six weeks. Two divisions of the 10th Army Corps, General Cambriels, Rennes, will manœuvre separately for twelve days; and it will be the same with two divisions of the 11th Corps, General Espivent, Nantes. The 12th Corps, General de Lartigne, Limoges; the 13th Corps, General Picard, Clermont; and the 15th Corps, General Lallemand, Marseilles, will manœuvre for a fortnight. And two divisions of the 18th Corps, General de Grimandet, will also take the field for a similar period. The Reservists will join their different corps at this period, and will go through a course of ball practice before manœuvring. It may be added that General Berthaud has decided that the troops when out shall be cantonned, and the men will consequently be burdened neither with the "tente-abri" nor the demi-blanket, against which incumbrances so many military writers in France have long been protesting.

The War Office ought to decide one way or another. The "Army List" represents numerous instances in which Militia and Yeomanry officers are holding commissions in the Volunteers. Yet, whenever a Militiaman applies to be allowed to accept a Volunteer commission, or even to retain one he already possesses, he is informed that the system of dual appointments cannot on any pretence whatever be recognised. And yet it is pretty evident that it is recognised, for the case of Colonel Penton, of the 3rd Middlesex Militia and Sussex Rifle Volunteers, needs only to be quoted in proof of this. If the privilege is granted at all, it ought not to be limited to a favoured few. Far from the system of dual commissions being prejudicial, it is one which the War Office ought to do all in its power to encourage, for it must have one very beneficial effect—*i.e.*, it must naturally tend to produce a friendly understanding between the several Services. In the case of Militia officers, it would seem most desirable that they should keep themselves in practice during the non-training period, and this they would be able to do if they were allowed to accept Volunteer commissions, as many of them would at once do were the War Office only to take a proper view of the matter, and study the welfare of the respective Services. The argument that, in case of invasion, an officer could not be in two places at one time, is about as absurd a one as it would be possible to conceive, as in such a contingency there would be no end of men ready to fill his place for him either in the ranks of the Militia, the Yeomanry, or the Volunteers.

The Brigade-Majorship of Cavalry at Aldershot vacant by the promotion of Captain Salis-Schwabe, 6th Carabiniers, has been given to Captain R. T. Maillard, 16th Lancers, late Adjutant of the Cavalry Depôt, Canterbury. Captain Maillard entered the Service March 12, 1861, and became Captain November 26, 1868.

Commenting on the recent order for the formation of army corps in the Russian Army, the *Russki Invalid* says:—"The order of February 19 last, directing the formation of eight army corps, allotting to them divisions of Infantry and Cavalry, and appointing their commanders, is merely a working out of the plan for the organization of our Army, which was decided on in 1873, when the necessity was perceived of organizing and strengthening our forces and means of defence, to place them on a level with the requirements of modern warfare and the armaments of other first class European Powers. In the year 1875 the Guard Corps was formed, and last autumn six corps (7th, 8th, 9th, 10th, 11th, and 12th) were organized to form the Southern Army. The formation of the Grenadier and eight other army corps has now been decided on. The following is the composition of the different corps:—Grenadier Corps, 1st, 2nd, and 3rd Grenadier Divisions, 14th Cavalry Division; 1st Army Corps, 22nd, 24th, and 37th Infantry Divisions, 1st Cavalry Division; 2nd Army Corps, 25th, 26th, and 27th Infantry Divisions, 2nd Cavalry Division; 3rd Army Corps, 28th and 29th Infantry Divisions, 3rd Cavalry Division; 4th Army Corps, 16th and 30th Infantry Divisions, 4th Cavalry Division; 5th Army Corps, 7th and 8th Infantry Divisions, 5th Cavalry Division; 6th Army Corps, 4th, 6th, and 10th Infantry Divisions, 6th Cavalry Division; 7th Army Corps, 15th and 36th Infantry Divisions, 7th Cavalry Division; 8th Army Corps, 9th and 14th Infantry Divisions, 8th Cavalry Division; 9th Army Corps, 5th and 31st Infantry Divisions, 9th Cavalry Division; 10th Army Corps, 13th and 34th Infantry Divisions, 10th Cavalry Division; 11th Army Corps, 11th and 32nd Infantry Divisions, 11th Cavalry Division; 12th Army Corps, 12th and 33rd Infantry Divisions, 12th Cavalry Division; 13th Army Corps, 1st and 35th Infantry Divisions, 13th Cavalry Division; 14th Army Corps, 17th and 18th Infantry Divisions, Don Cossack Cavalry Division." Including the Guard Corps, which has three Infantry and two Cavalry divisions, there are in the Russian Army sixteen army corps. The Grenadier corps and three army corps (1st, 2nd, and 6th) have three divisions each, the remaining corps two divisions. In all, there are thirty-seven Infantry divisions, sixteen Cavalry divisions, and one division of Don Cossack Cavalry organized into army corps. Eleven divisions of Infantry (eight of which belong to the Army of the Caucasus) and the Caucasus Cavalry Division are not included in any army corps.

The duties of Paymaster to the Royal Military and Staff Colleges at Sandhurst have been transferred to Control Paymaster Ball, Horse Guards, from the 1st instant.

An improved rifle on the Martini-Henry system has lately been submitted to the War Office. The rifle—the invention of Lieutenant-Colonel R. C. Henchy, R.A., and Dr. Thayer—has been so constructed at the breech that the whole of the weaknesses rendering the weapon now in use of such questionable serviceability are remedied, whilst it is claimed for it that its accuracy is increased by the introduction of the remodelled mechanism.

According to our Paris contemporary, *L'Avenir Militaire*, the officers' conferences, which have been generally introduced into the French Army, do not meet with much success. This is the way in which they are described. One fine day the Colonel selects a Captain to give a lecture on military history. The Lieutenants and Sub-Lieutenants complain that they are over-worked, what with calls, inspections, and drill, and that they have no time to study in their quarters. The Captains express their opinion more moderately, as they mess at the same table with the lecturer, who is asked "not to keep them long," and reminded that brevity is a very soldier-like quality, &c. When the day of the conference arrives, the unfortunate lecturer feels that he is about to bore the thirty or forty officers, with long faces, whom he sees seated in front of him, and before the end of half an hour he brings his remarks to an end. Neither in France nor in Italy have these conferences proved attractive, and in the latter country a new system appears to have been adopted, which has the advantage of fixing the attention of the officers and keeping up their interest. The Italians have adopted map conferences, at which each person present plays an active part, which is first of all carefully studied. The following representation recently took place in the 54th Regiment. The subject given out for study was the battle of Custozza of 1866, which was to be developed in accordance with the recent report published by the Permanent Staff. The map employed was coloured in various tints by an officer of the regiment, and the officers being all united, the command of the Italian divisions was given to the Captains, that of the Austrian divisions to the Lieutenants. A Field officer then explained, by way of introduction, the reason why the Italian Army had been divided into two masses: 1st, between the Adda and the Po, 2nd, on the lower Po; why the Austrian Army had established itself in the Adige; and then the motives which induced the Italian General to march towards the Mincio in order to gain the Adige. The study of the battle of Custozza appears to have occupied six conferences, each of which lasted from two to three hours. The following were the subjects given out:—1st. Passage of the Mincio by the Italians up to the moment when the Austrian Cavalry attacked that of Prince Humbert on the morning of the 24th. 2nd. Commencement of the battle. First manœuvres of the Divisions Cerale, Sirtori, and Brignone. Resistance offered to the Cavalry in front of Villafranca. 3rd. Continuation of the manœuvres of the Divisions Cerale, Sirtori, and Brignone up to the moment of their retreat in Valleggo and Pazzuolo. 4th. Movements and combats of the Divisions Govone and Cugia. 5th. Movements and combats of the Reserve of the 1st Corps and of the Division Pianell; retreat of the Divisions Govone and Cugia. 6th. End of the battle; retreat on the right of the Mincio. General meeting—discussion of the battle. Here we have the Italians endeavouring to learn a lesson from defeat. The *Avenir Militaire* thinks highly of this system, which keeps all the officers on the *quivive*, and "which has none of the dryness nor dogmatic pretension of the game of war," and we shall probably soon hear of its introduction into the French Service. *In another column* our contemporary expresses its satisfaction at seeing the officers of the Territorial Army evincing a great readiness to take advantage of every opportunity to learn their duty. It says that the officers of the force in question attend the practical conferences of the Regular Army, regardless of personal inconvenience, and are evidently intent on justifying their nomination.

"They manage these things—*better*," wrote Sterne—we shall say—*differently*—"in France." It is curious that with the prehensile property of our Parliament the details of military administration should have escaped their clutches, and that the French War Office should be in such matters much more under the influence of legislation. Take, for example, the question of the Staff of the Army and its organization and attributes. With us the General Order and the Circular are potential for the arrangement of that subject. In France a *projet de loi* is laid before the Parliament. On the 20th March last there accordingly was such a document brought in, which is tersely described as "Nouveau projet mêmes idees," although for the last six years the matter has been under consideration by numberless "Commissions"—or, as we would call them, "Committees"—of the National Assembly and of the Senate. The anxiety of the country and of the Army shows that there is much the same opinion entertained of the deficiency of the French Staff as there was felt in this country after the winter of 1854 respecting the system—or want of it—which was accepted in the English Army. We think that an efficient, well-organized Staff is a very important element of military administration; but to tell the whole truth, and to speak with the courage of our convictions, we do not think any Staff *per se* will ensure success, or even contribute to success very materially. If the whole body of officers be not moderately skilful and intelligent, and if the Army be not well constituted, no excellence in the Staff can do more than mitigate the evil consequences of such misfortunes. There is an undue importance assigned to the share of the General Staff in the operations of war. It is needless to say that in the old days there was no such thing as a Staff—no idea of what it meant, even—and that it is only within the last century and a-half that the notion of appointing officers to general duties in the field, in connection with the persons of the officers in command, became at all familiar to us. At the present time the Army with the smallest Staff is certainly the largest and most efficient in the world, and especially is it weak in the officers assigned to the *personnel* of Generals in command. The state of the German Staff has attracted the attention of military writers in France, where there is an enormous Staff, our own (especially in India) being perhaps next in magnitude as compared with the effective force; but, in point of fact, the condition and composition of the Staff of an Army depend very much on the special condition of each country, and on the constitution of the particular Army, and there can be no general relation established between the proportions of Staff officers to effective strength. In one case the Staff may be an indispensable assistant to feeble steps and a broken constitution—in another it may be merely as a useful adjunct to a vigorous walker. The French *projet*, of course, commences with a definition—it would not be French otherwise—of what the service of the Staff should be. "It has for its object to assist the command of the Army, to transmit orders, and to follow the execution of them." But what, asks the *Avenir Militaire*, does it mean "to follow the execution of orders?" If orders be not executed properly, what can a Staff officer do? He has no right to interfere in the execution, he may give advice to the officers charged with it; and that is not only delicate, but may lead to very disagreeable results. Is he to take account of the defects of the General? No! That seems a sterile function for present use, and it seems that to "follow" the execution of an order without authority and precise attributes is to chase the wind. The *Avenir Militaire*—properly, as we think—argues against the propriety of attaching any responsibility to officers placed in such a position—even "correlative"—and the idea of expecting them to act of their own initiative without at all lessening the responsibility of the General or controlling his action. The fact is that when we come to define in words the exact duties of any body of men, it is easy to pick holes in the definition, and to challenge its universal applicability. The difficulties which are encountered by the French authorities are just as great in this country, only we will not see them, and, fortunately for us, circumstances do not force the consideration of them upon us. There is at the present moment a large number of officers who practically belong to a Staff Corps which does not exist, and who may be sent to regimental duty, for which they are quite unfit.

RECRUIT DRILL

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—While thoroughly agreeing with the letter of your correspondent "Yonetoff," in your paper of the 7th inst., in which he condemns the waste of time in spring drills in teaching trained soldiers the goose-step, allow me further to invite attention to the sickening waste of time in the mounted branches of the Service, where may be seen captains, of perhaps eighteen years' service, bumping round a manége, under the instruction of perhaps a rough-rider of two or three years' service. This constantly occurs in the Artillery, and the sight is, to say the least of it, not an edifying one. If, after fifteen years, an officer is unable to ride sufficiently well to perform his military duties, in Heaven's name let him be relegated to service in a dismounted branch; but where can be the object of instructing a man forty years of age how to ride according to the same system by which recruits who have never seen a horse are taught?—I am, &c.,

SEMPER EGO.

The *Morning Post* states that the chambering of the experimental 80-ton gun is completed, and on Monday the weapon will be again shipped on board the Mogul and taken once more to Shoeburyness for a second trial against the 32-in. iron target.

The following farewell address was presented to Mr. Roger Goldsworthy, C.M.G., on his handing over his appointment as President of the Island of Nevis:—"Sir,—Upon this the eve of your Honour's departure from amongst us we approach you with mingled feelings of congratulation and deep regret—congratulation on the mark of favour which your Sovereign has shown in appointing you to fill the responsible post of Colonial Secretary of Western Australia, and regret that our island is so soon to be deprived of a President so energetic, and who has by the example of untiring zeal and industry reanimated and energised the public spirit and diffused vigour and strength throughout every department of the public service. When your Honour arrived here in May last the island bore the appearance of sad neglect and indifference; lukewarmness, and apathy were apparent in almost every department of the public service. Under your fostering care the Infirmary has been made a creditable institution, a lighthouse has been erected, and the town of Charlestown particularly bears the marks of cleanliness and improvement heretofore unknown. Your Honour has the satisfaction of knowing that confidence in the Government has, in a great measure, been restored by the honest, upright, and manly course observed by you in your conduct generally, and that the interest and concern manifested by you in everything that was calculated to benefit the island have won for you the esteem and respect of the whole community. We feel that in losing your Honour, we are losing one whose chief object was the improvement and advancement of the best interests of the island, and under whose guidance and supervision we could reasonably have expected from the Governor, whose representative you are, real and substantial reforms and benefits. Feeling thus, it is but natural that we should express the wish that it had been possible for your Honour to reside longer amongst us. We bid your Honour farewell. May you be long spared in the bosom of your family, and continue to enjoy the favour of your Sovereign, and every good and perfect gift that a kind Providence can bestow.—We are your Honour's faithful servants, WALTER MAYNARD, member of the Executive Council; H. S. MAYNARD, member of the Executive Council and Assembly; ED. MAYNARD, member of the Assembly; MORDAUNT PEMBERTON, Q.C.; E. J. HUGGINS, and others."

The Army.

4TH DRAGOON GUARDS. The closing meet of the season of the regimental harriers took place on the 4th inst. Dundalk Barracks was the point of assembly, as it had also been on the opening day, and on both occasions the reputation of the 4th for genial hospitality was maintained. Notwithstanding the threatening aspect of the weather, a considerable number of the local lovers of sport were in attendance, as it was known that a well-earned compliment would be paid on that day to the popular and efficient master, Major Shaw-Hellier. After breakfast a cup was presented to Major Hellier in recognition of his uniform kindness. The cup is of massive silver, the interior being gilt and the outside richly chased in fern pattern. On one side are engraved the heraldic arms of the Shaw-Hellier family, with the motto "Pro Republica semper." On the opposite side was engraved the following inscription:—"Presented to Major T. B. Shaw-Hellier, Master 4th Royal Irish Dragoon Guards' Harriers, by his hunting friends of Dundalk and neighbourhood, in appreciation of many excellent days' sport he showed, 1877." The cup was fitted to a handsomely carved ebony stand, the height being about 18 inches. Major Hellier having acknowledged the gift, the company were soon in the saddle.

5TH DRAGOON GUARDS. The regimental steeplechases came off at Cork on the 5th inst., the 5th Dragoon Guards' Challenge Cup, value 100 sovs., being won by Capt. Jee's Chief Baron (owner); the 5th Dragoon Guards' Subalterns' Cup by Lieut. Bower's Freshman (Capt. Jee); the Red Coat Steeplechase by Mr. Haren's Fortress: the Farmers' Race by Mr. Flynn's Kilmagnar; and the 5th Dragoon Guards' Sweepstakes by Capt. Kearsley's Confederate (owner).

7TH DRAGOON GUARDS. The regimental steeplechases came off on the 5th inst. with the following results:—Regimental Challenge Cup—Lieut. Maher's b g Agitator (owner), 1; Military Maiden Race—Lieut. Burke's ch m Jane (owner), 1; Hunter's Stakes—Capt. Lyte's g g Mainsail (owner), 1; Farmers' Maiden Plate—Mr. T. Hemingway's b g Gamecock, 1; Chargers' Race—Lieut. Maher's b g Agitator, 1.

1ST (ROYAL) DRAGOONS. The regiment left Norwich and Ipswich on Tuesday, *en route* to Aldershot. Lieut. and Adjt. Perkin, 20th Hussars, obtains the troop vacant by the retirement of Capt. Maunsell.

3RD HUSSARS. Lieut. Matthews has been recommended for the adjutancy, vice Lieut. Berkeley, promoted. Lieut. Fuller has been permitted to withdraw his application for transfer to the Indian Staff Corps.

5TH LANCERS. The regiment is on the march from Aldershot to Norwich and Ipswich.

10TH HUSSARS. Capts. Bulkeley and St. Quintin, and Lieut. Wood act as a committee of paymastership, Lieut. Wood performing the duties on the responsibility of the committee. Capt. Combe is understood to be on passage home from India in H.M.S. Jumna.

11TH HUSSARS. Capt. Grissell is expected home from India in H.M.S. Jumna.

21ST HUSSARS. The report as to the probable retirement of Col. M'Leod is not likely to be confirmed.

ROYAL ARTILLERY.

Major M. M. FitzGerald (late Bengal), and Lieut. W. Martin, B Brig. R.H.A., have been granted leave from India on medical certificate, and with Col. R. C. Romer, 8th Brig., are expected home in H.M.S. Jumna.

Lieut.-Col. T. E. Hughes, 1st Brig. (late Bengal), has been granted leave from India to England from Feb. 7 to Aug. 6, on medical certificate.

Capt. H. W. J. Hubback, 2nd Brig., has been selected for the adjutancy of the Sligo Artillery Militia.

Major M. H. Steinman, 2nd Brig. (late Madras), has been granted leave from India to England from Feb. 12 to May 11 on medical certificate.

Col. J. A. Angelo, 3rd Brig., has been transferred for duty from Delhi to Meerut.

Capt. T. Walker, B Brig., R.H.A. (late Bombay), had an awkward accident on duty at Meean Meer last month, when his horse fell in such a manner as almost to crush him. It was feared at first that grave internal injuries had been sustained, but Drs. Hogg and Keir had reported that he was progressing favourably.

ROYAL ENGINEERS.

The following notice has been received from the Colonial Office:—"At the request of the Australian Colonies her Majesty's Government have selected Col. Sir W. Jervois, R.C.M.G., R.E., Governor of the Straits Settlements, and Lieut.-Col. Scratchley, R.E., to advise the respective Colonial Governments on a scheme of defence for the chief Australian ports. Col. Scratchley has already left England, and will join Sir W. Jervois at Sydney."

Lieut. W. Pitt has been granted leave from India to England for fifteen months, on private affairs, and is expected home in H.M.S. Jumna.

A telegram has been received from Calcutta announcing the death there on Sunday last of Capt. K. C. Pye, Assistant-Director of State Railways in India. Capt. Pye entered the Army Dec. 19, 1860; became capt., Aug. 25, 1873; and served as assist. field-engineer with the Dooar Field Force in 1865, and commanded the 7th Comp. of Sappers and Miners at the recapture of Dewangiri on April 2 of that year.

Lieut.-Col. E. B. Bland has assumed the duties of commanding R.E. in the Western District, temporarily, pending the appointment of a successor to Sir Henry Freeling, Bart.

SCOTS GUARDS. The many friends of Col. the Hon. C. W. White will hear with much sorrow that the latest news received from Malta of the state of his health was of a very unfavourable nature. Prayers were offered up on his behalf at St. Peter's, Eaton-square, last Sunday.

1ST OR ROYAL SCOTS. The 1st Batn., says the *Irish Times*, is to be moved to the Curragh for the summer drills, and will pass the winter there.

2ND QUEEN'S. Lieut. Cust, 1st Batn., has been granted leave from India to England for six months, on private affairs.

6TH REGIMENT. Lieut. and Adjt. Ball, 1st Batn., has been granted leave from India to England for six months, on private affairs. Lieut. O'Beirne, 1st Batn., is expected home from India in H.M.S. Jumna.

7th Fusiliers. Sub-Lieut. Chapman, 2nd Batn., has been appointed to the 23rd Bombay N.I. for duty as a probationer for the Indian S.C.

8th King's. Lieut. Wade, 1st Batn., has been granted leave from India to England for six months, on private affairs.

9th Regiment. Lieut. Shuckburgh, 2nd Batn., has been granted leave from India to England for six months, on urgent private affairs.

11th Regiment. Major-Gen. J. Singleton, lieut.-col. on the Retired Full-Pay List, died at St. Leonard's-on-Sea on the 13th inst. The deceased officer entered the Army June 17, 1826; became lieut., Dec. 31, 1827; capt., Feb. 15, 1859; major, June 27, 1845; lieut.-col., June 20, 1854; col., Oct. 26, 1858; and hon. major-gen., Feb. 21, 1860.

14th Regiment. The 2nd Batn., at Belfast, will move to the Curragh about the middle of May.

15th Regiment. Capt. Layard, 2nd Batn., has been assigned local rank as major in India from July 8, 1876.

16th Regiment. Capt. Vernon and Lieuts. Power and Riddell, 2nd Batn., are employed in connection with the famine relief operations in India.

17th Regiment. Capt. Dunning, Lieut. Nares, and Sub-Lieuts. Mayne, Justice, Carleton, Gordon, and Roberts, 2nd Batn., have passed the lower standard examination in Hindostanee. Capt. Edwards and Lieut. Clarke, 1st Batn., have been granted leave from India to England, on medical certificate. Lieut. Field, 1st Batn., is a candidate for the Staff College.

18th Royal Irish. Lieut. Spyer acts as adjt. to the 1st Batn. during the absence in England of Lieut. Lawrence.

20th Regiment. Capt. Birch, Lieut. Allen, and seventy-five rank and file are in readiness to embark for Nova Scotia to join the 1st Batn.

21st Fusiliers. Lieut. Braine, a probationer, wing officer 13th Madras N.I., is about to be admitted to the Indian S.C., with effect from Feb. 15, 1876.

22nd Regiment. Sub-Lieut. Hughes, 2nd Batn., has been appointed to the 13th Bombay N.I. for duty as a probationer for the Indian S.C.

23rd Fusiliers. Col. Prevost, 1st Batn., has been appointed commandant of the Militia School of Instruction at Dublin.

33rd Regiment. Lieut. Conor is on passage home from India in H.M.S. Jumna.

39th Regiment. Capt. Wynen has been appointed station Staff officer at Jhansai.

40th Regiment. Brevet Major Armstrong has been granted an extension of leave to remain in England until Oct. 15, on urgent private affairs. Capt. Mansergh is expected home from India in the course of a few days in H.M.S. Jumna.

41st Regiment. Lieuts. Huyshe and Quirk are candidates for the Staff College.

44th Regiment. Lieut.-Col. Hand has been granted leave from India to England for seven months, on private affairs. Lieut. Thompson is employed in famine relief duties in India.

Royal Marines.

Major-Gen. the Hon. Leicester Smyth, C.B., commanding the Western District, inspected the Plymouth Division of Royal Marines on their parade on the 12th inst. The battalion mustered stronger than for many years past, and made a good and satisfactory appearance.

At the adjourned inquest held on Tuesday on the body of Colr.-Sergt. John Jones, who died suddenly under suspicious circumstances at Browndown Camp, evidence was given showing that deceased had died from a dose of strong corrosive and irritant poison, and that the contents of the stomach had been sent to Dr. Stevenson, Guy's Hospital, London, for analysis. Two witnesses swore that the note found in deceased's tunic, saying how his life was in jeopardy, and that he did not know what to do, was not in his handwriting. The inquiry was adjourned for the evidence of Dr. Stevenson and experts in handwriting.

53rd Regiment. H.R.H. the Duke of Connaught presented new colours to the regiment at Birr on the 5th inst. The ceremony commenced about 3 o'clock, and occupied about an hour. The consecration was conducted by the Very Rev. Pakenham Walshe, Dean of Cashel, assisted by the Rev. Mr. Chester, chaplain to the garrison. His Royal Highness, in making the presentation, said:—" Col. Dalzell, officers, non-commissioned officers, and men of the 53rd Regiment,—It is with the greatest pleasure that I present you with these, your new colours, to replace those you have so honourably borne for the last twenty-five years. I feel that in doing so I am handing them over to those who will know how to honour them and how to protect them. It is now 125 years since your regiment was first formed, and during that period you have served in nearly every part of the world, and in many places have taken your full share in the battles whose names are inscribed on your colours. The 53rd Regiment has won a name for itself of which you are justly proud, and which has added lustre to the British arms. I rejoice to know there are still officers serving with the regiment who assisted at the last presentation of colours. I refer particularly to Col. Dalzell, to Col. Fendall, and to your quartermaster; and I am especially glad to have been enabled to take this opportunity of presenting you with your new colours while you are still under the command of one whose name has been so long and so honourably associated with the regiment." Col. Dalzell, in reply, said:—" Your Royal Highness,—The impressive ceremony in which we are now engaged, and the words spoken by your Royal Highness, must go straight to the heart of every 53rd man. This day, on which you have presented us with our new colours, will ever be deemed a red-letter day in the annals of the regiment. Your allusion to its brilliant career is highly gratifying, and will tend to produce in us all a deeper love of our noble profession. We accept these colours from your Royal Highness to hold in sacred trust for your illustrious mother, her Most Gracious Majesty the Queen, in the full and proud assurance that, whenever or wherever the 53rd are called upon to serve, their reputation earned in Flanders, in the Peninsula, in British North America, and in the East and West Indies, will be emulated and sustained, and these, our banners, borne as stoutly and as valiantly as in bygone days. On behalf of the officers, non-commissioned officers, and men of the 53rd Regiment, I tender our sincere and grateful thanks to your Royal Highness for the great honour you have this day conferred on us." The officers afterwards entertained his Royal Highness and a large party of friends, but were prevented giving a ball in the evening owing to the want of accommodation.

62nd Regiment. Lieut. Denniss has leave to Calcutta from March 15 to Sept. 5, to study the native languages.

65th Regiment. Lieut. Whitaker acts as adjt. during the absence of Lieut. Hamilton, on leave in England. Lieut. Gerrard has passed the lower standard examination in Hindostanee.

66th Regiment. Qrmr. Jones is on passage home from India in H.M.S. Jumna.

68th Light Infantry. Sub-Lieut. Goad has passed the lower standard examination in Hindostanee.

81st Regiment. Capt. Bevan is expected home from India in H.M.S. Jumna.

80th Regiment. The *Irish Times* says:—"The inhabitants of the Mauritius are in a dilemma. H.M.S. Orontes sailed into harbour, having on board the 80th Regt. and some cases of measles among the crew. When the inhabitants heard that the ship had measles on board they held meetings, protested against the landing of any of the crew, and finally ordered the Orontes into quarantine. With an eye to business and profit, however, they requested that the troops should be landed immediately, and the captain of the Orontes has caused great offence by simply asking them to explain how it was possible to land the soldiers without incurring the risk of introducing the measles. He has not received an answer yet."

85th Light Infantry. Capts. Grant and Atkinson are *en route* from India in H.M.S. Jumna. Lieut. Ives is to be appointed instr. of musketry.

90th Light Infantry. A riot took place between some soldiers of the regiment and civilians at Limerick on Sunday, in consequence of the civilians believing the soldiers stole the chalice from the Roman Catholic church. Several were severely wounded, and twenty soldiers were arrested. With reference to this, Mr. Hardy, in reply to a question put by Mr. Butt, stated on Tuesday that on Monday night he had received a telegram from Lieut.-Col. Palmer stating that on the previous night a disturbance had taken place, but all was then quiet, that no one had been seriously hurt, and that the soldiers were confined to barracks. A telegram was sent to the commander-in-chief of the forces in Ireland, and he replied that on the night of the 8th a disturbance took place, but no military report had been received, and that the disturbance had not been renewed. That morning another communication had been received from the commander of the forces, in which he stated that there had been no renewal of the disturbance since the 8th, and that the regiment was confined to barracks. Mr. Butt asked if an inquiry had been made into the circumstances which led to the disturbance. Mr. Hardy said he should receive an account of the whole transaction, and he should then be prepared to answer any question.

93rd Highlanders, about to be moved to the Curragh, will, it is believed, remain there throughout the winter.

103rd Fusiliers. Sergt.-Major Sheldon has been appointed garrison sergt.-major at Devonport from the 11th inst.

108th Regiment. Sub-Lieut. Gibbings is on passage home from India in H.M.S. Jumna.

Medical Department. Dr. Playfair asked the Secretary of State for War on Monday when paragraph 25 of the British Medical Department Code (India)—viz., "In order to be qualified for holding an administrative appointment in this country (India) it is required that an executive medical officer should have served as a surgeon for three years with an European regiment in India"—was made general in its application, and whether there were any medical administrative officers now holding appointments who had not complied with the condition of paragraph 25. Mr. Hardy said—It was not made general until the issue of the Warrant of 1876, but it must have been perfectly well known throughout the department, because in 1867 it was necessary to pass over sixty or seventy officers to obtain the requisite number for India who had the qualifying service. With regard to the second part of the question, there are medical administrative officers now holding appointments who have not complied with the condition of paragraph 25, for the necessities of India having been supplied, some of the officers who were then passed over, as above stated, were promoted to administrative rank at home and in the colonies. The effect of this was really unfair, as it gave some men long tropical service and others an undue amount of home service, and so interfered with the roster; and, therefore, last year I considered it advisable, with the concurrence of his Royal Highness, to establish one system for promotion, viz., by selection, one of the elements of which was the necessity of having three years' Indian service. This does not in the least set aside the conditions of paragraph 16 of the Royal Warrant of 1876, which lays down ability and merit as qualifications for promotion, as opposed to seniority, but not as excluding other grounds for non-selection, such as ill-health, inability to perform tropical service, &c. Surg.-Gen. T. Crawford has reported his arrival from India, and assumed duty as P.M.O. in Ireland. Surg.-Major G. H. Davidge and Surg. C. F. Richards, M.D., have been granted leave from India to England on medical certificate.

THE AUXILIARY FORCES.

MILITIA.

3rd West York. Capt. Raikes is in command of the recruits assembled at Doncaster for preliminary drill.

Sligo Artillery. Capt. H. W. J. Hubback, R.A., has been selected for the vacant adjutancy.

VOLUNTEERS.

Honourable Artillery Company. The officers and members of the Light Cavalry troop gave a most enjoyable dance at head-quarters, Finsbury, on the night of the 6th inst., a large party attending. Dancing was kept up until sunrise, when the company separated, after having been most hospitably entertained.

In reply to Capt. O'Beirne, Mr. Hardy stated on Thursday that the regulation made in 1871 limiting the command of a regiment to a period of five years was not held in abeyance. The intention was to adhere to it; and in one instance it had been enforced by the removal of one commanding officer] and the appointment of his successor.

THE INDIAN ARMY.

3rd Bengal Cavalry. Lieut. C. M. FitzGerald, 11th Regt., a probationer for the Staff Corps, has been transferred from the 6th N.I. as squadron officer.

5th Bengal Cavalry. Major R. B. Graham, squadron commander, has been granted furlough to Europe for six months on urgent private affairs.

7th Bengal Cavalry. Brevet Major T. C. Graham, squadron commander, has been granted furlough to Europe for two years on private affairs.

12th Bengal Cavalry. Col. P. S. Yorke, squadron commander, has been granted furlough to Europe for one year on private affairs. Brevet Lieut.-Col. H. H. Gough, V.C., C.B., has returned to India from European furlough and resumed command.

17th Bengal Cavalry. Major G. H. W. Hoggan, squadron commander, has been appointed commandant of Fort Abazai, vice Lieut.-Col. A. Callander, proceeding on furlough to Europe.

1st Bengal N.I. Capt. G. R. Grylis retains the appointment of qrmr. on completing his five years' tenure of the appointment.

9th Bengal N.I. Capt. R. A. Price, wing officer, has been granted furlough to Europe for one year on private affairs.

10th Bengal N.I. Surg. W. Duncan, M.B., in medical charge, has been granted furlough to Europe for one year on private affairs.

12th Bengal N.I. Lieut. M. I. Gibbs, 73rd Foot, attached to 7th N.I., has been appointed officiating wing officer of the 12th on probation, as a candidate for the Staff Corps.

13th Bengal N.I. Lieut.-Col. W. Playfair has returned to India from European furlough, and resumed duty as wing commander.

14th Bengal N.I. Major R. A. Wauchope, on furlough, wing commander 42nd N.I., has been appointed wing commander and second in command, vice Woodgate, deceased. Capt. W. Campbell, late 71st N.I., officiating wing subaltern, is noted for promotion to a brevet majority from the 4th ult.

16th Bengal N.I. Capt. J. M. Tulloch, attached, has arrived home from India on furlough. Capt. A. B. Clure retains the adjutancy on completion of the five years for which he was appointed.

18th Bengal N.I. Surg.-Major J. A. C. Hutchinson, M.D., in medical charge, has been appointed a depty. surg.-geon with temporary rank in India, vice Depty. Surg.-Gen. J. N. Tresidder, proceeding on furlough to Europe.

32nd Bengal N.I. Col. W. D. Morgan has returned to India from European furlough, and resumed command.

36th Bengal N.I. Lieut. E. M. Nedham, 62nd Foot, officiating wing officer 11th N.I., is transferred to the regiment in the same capacity, vice Wingate, transferred to the 24th N.I.

39th Bengal N.I. Capt. H. O. Cumberlege, officiating wing officer, has been appointed station Staff officer at Benares, vice Capt. Holmes, appointed to officiate as brigade-major.

42nd Bengal N.I. Major A. D. Butler, Staff Corps, has been appointed wing commander, vice Wauchope, appointed to the 14th N.I.

1st Goorkhas. The officers of the regiment—the famous corps which defended the women in the flagstaff tower during the mutiny at Delhi—have just forwarded a superbly embossed Kurkurree knife, the weapon of the regiment, as a present to the Prince of Wales. The regiment was granted permission to use his Royal Highness's title during the tour of the Prince in India. Lieut.-Col. P. Story, wing commander, has been granted furlough to England for two years on private affairs. Surg.-Major F. Carter has resumed medical charge on return to India from European furlough.

3rd Goorkhas. Major G. C. Gregory, wing commander, has been granted furlough to Europe for one year and four months on private affairs.

4th Punjab Infantry. Lieut.-Col. H. P. Close, commandant, has been granted furlough to Europe for two years, from the 3rd inst.

5th Punjab Infantry. Capt. C. M'K. Hall, wing commander, has resumed duty with the regiment on the termination of his furlough to Europe.

4th Sikh Infantry. Capt. L. C. de L. Daniell, wing subaltern, is about to be promoted to a majority.

4th Hyderabad Cavalry. Major A. A. Johnson, commandant, has arrived home from India on furlough. Capt. R. J. O. FitzGerald, squadron commander 3rd Cavalry, has been appointed to officiate as commandant of the 4th during the absence of Major A. A. Johnson in England.

2nd Hyderabad Infantry. Capt. H. F. H. Sewell, second in command, has been granted furlough to England for eighteen months on medical certificate. Surg. A. Adams has been confirmed in medical charge, vice Surg. C. Little.

5th Hyderabad Infantry. Lieut. A. C. Le Quesne, adjt., has passed the higher proficiency examination in Persian.

1st Madras Light Cavalry. Brevet Major A. D. Parsons, squadron commander, has been granted furlough to England for one year and four months on private affairs.

4th Madras Light Cavalry. Major F. M. Alexander is employed in famine relief duties in India.

14th Madras N.I. Capt. A. W. Foord, wing officer and adjt., has been granted two years' furlough to England.

38th Madras N.I. Capt. K. F. Stevenson, wing officer and qrmr., has been granted leave to England for two years.

2nd Sind Horse. Major J. F. Forbes, commandant, has been granted two years' furlough to Europe on medical certificate.

3rd Bombay N.I. Lieut. W. S. Birdwood has leave to Bombay for six months to study the native languages.

4th Bombay N.I. Capt. W. Marshall, having completed five years as wing officer, has been reappointed from Aug. 11, 1876.

6th Bombay N.I. Lieut. A. J. P. Nuthall, wing subaltern, has been granted a first class certificate from the School of Musketry, Hythe.

7th Bombay N.I. Capt. W. H. Yates, qrmr., has qualified for promotion to a substantive majority, and his name will appear in an early *Gazette*.

13th Bombay N.I. Sub-Lieut. N. L. B. Hughes, 22nd Foot, a candidate for the Staff Corps, has been appointed to the regiment on probation.

23rd Bombay N.I. Sub-Lieut. F. R. H. Chapman, 7th

Foot, a candidate for the Staff Corps, has been appointed to the regiment on probation.

24th Bombay N.I. Lieut. W. H. Lyster, officiating adjt., has been appointed station Staff officer at Mehidpore.

28th Bombay N.I. Lieut.-Col. S. J. Thorp, second in command, has qualified for promotion as brevet col., with effect from the 3rd ult.

The Army Gazette.

WAR OFFICE, PALL MALL, April 10, 1877.

2nd Foot—Lieut.-Gen. H. Smyth, C.B., to be Col., vice Lieut.-Gen. C. A. Edwards, C.B., transferred to the 18th Foot; March 25, 1877.

18th Foot—Lieut.-Gen. C. A. Edwards, C.B., from the 2nd Foot, to be Col., vice Field-Marshal Sir J. F. Fitzgerald, G.C.B., deceased; March 25, 1877.

TERRITORIAL REGIMENTS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—The recommendation of the "committee assembled to inquire into the working of the Brigade Depot system," suggesting the territorial organization of the Army, has brought before the public a question not only of the deepest interest to the Army, but also of vital importance to the nation at large. There can be no doubt that the continual state of transition through which the Army has been passing for the last six years must be most detrimental to its efficiency, and it is essential either that the organization of our military forces should revert to the regimental system, or that the recommendations of the committee should be carried out in their integrity, and the connection of each regiment, with its county, established thoroughly with as little delay as possible. The objection so emphatically expressed by H.R.H. the Duke of Cambridge to the amalgamating into one of each pair of the linked regiments, from the 26th to the 109th, is doubtless shared by a large majority of both officers and men in the Service. Though the 43rd and 52nd are the regiments most frequently quoted as instances in which the suppression of the numerical title would be a great hardship, there are many others who are equally proud of their numbers. It was pre-eminently during the Peninsula war that the glory of the British Army was in its zenith, and it was in this war and at Waterloo where those corps which are proudest of their numerical title won most of their honours. I might mention here, casually, the 28th, 42nd, 71st, and 53rd; and be it remembered that the greater part of the changes in the numbers of the regiments mentioned by the committee took place prior to this period. 1798 is the latest date mentioned at which any important changes were made. As to the nine regiments transferred from the Indian Army, the three senior would naturally attach most value to the local titles under which all their Indian honours were won. I feel sure that, if it were possible to take the opinion of the Army at large, the above statement would be found correct. I believe that *esprit de corps* forms the most important element in the British Army; it will ever be found to make up in a great measure for what it lacks in organization, and the Government may well pause before they upset a system so eminently favourable to the maintenance of one of the greatest of military virtues. On the other hand, the question arises, is it possible to substitute for the present regimental organization one better suited to the requirements of the day without doing violence to that *esprit de corps* which we so highly prize in the Army? Certainly the solution has not been found in the establishment of Brigade Depots as they now exist. I have no hesitation in affirming that the term localization, as connected with the existing arrangement, is a complete misnomer. There is at present no real connection between the linked regiments and the counties which were assigned to them when the Brigade Depot system was first introduced, and there is little if any sympathy between the linked battalions themselves. There must be something to attract recruits to any particular regiment, and that something does not exist at the depots as now constituted, which, as a rule, consist of a few old soldiers just putting in their time for discharge and raw recruits going through their drill. There is nothing to identify the county with the regiment. I will venture to say that in most counties hardly any of the gentry, or the classes to which we look for our recruits, know what regiments belong to their county; for, after a man has once enlisted, I believe his relatives care little what corps he joins. If the regimental system is to be abolished, it is essential that something equally good should take its place. This, I believe, to be possible if the regiments were thoroughly identified with the county; but in order to effect this the regiment must be looked upon as one of the institutions of the county, not only by the working classes, but by the nobility and gentry, from whom the working classes take their cue. Gentlemen's sons aspiring to commissions should be allowed to enter the Army under the understanding that they must join the county regiment. On completion of their Army service the men of the county regiment, instead of passing into the Army Reserve, should complete their service in the county Militia, each regiment of which would then have a good leaven of old soldiers—in other words, the Army Reserve and the Militia should be amalgamated. The Militia battalion should wear the same uniform as the Line battalion, and young Militia officers qualifying for commissions in the Army should be appointed to the Line battalions of their counties. The pick of the recruits enlisted in each Sub-District should be given to the county regiments. The Brigade Depot should be kept up to its full strength, and the home battalion of the linked regiments should, during its home service, be kept within its Sub-District, except when required for Autumn Manœuvres, or for a tour of duty in the large garrisons; and whenever the home battalion is removed from its district, the Brigade Depot should be made up to the strength of the old four-company depots. The colonel commanding the Sub-District should be the colonel of both the linked regiments. This would give colonels of regiments some real employment; the present system of appointing an old general to the colonelcy of a regiment with which he has nothing to do is simply absurd. During their training the Militia battalions should be brigaded with their Line battalions, all under the command of the colonel of the Sub-District, who would have as his brigade-major the adjutant of the Brigade Depot, a captain of one of the county regiments, who should be a Staff College man. It is only by the adoption of some such system as the above that the association of regiments with their counties can be effectually carried out. If such a plan is not feasible, the regimental system which has so long existed should not be interfered with, and the present Brigade Depots should be simply looked upon as recruiting depots for the Army generally.

A Field Officer who has Served Eighteen
Months at a Brigade Depot.

Sir,—The Report of the Committee on Brigade Depots and the Localization of the Army has caused the greatest astonishment and dismay throughout the Army. It is scarcely credible that any six officers of the Army could be found who would deliberately advocate the destruction of the English regiments. The other five members of the committee were Militia officers, whose opinion on such an important military question is of no importance or value, as they would naturally pull down the Army to raise the Militia force to some sort of equality with the Line. Mischief enough has been done already in this direction without perceptibly improving the Militia. The military members have been carefully scanned, and, for various reasons unnecessary to mention, they do not command the confidence of the Service. It is to be hoped that the proposal for the further destruction of her Majesty's regiments of the Line will be opposed, tooth and nail, by the Commander-in-Chief and every person who values the well-being of our Army. I would suggest that Mr. Hardy, before any action, should refer the proposals of Mr. Stanley's committee to a board of selected officers of regiments of Infantry and Cavalry of the Line, to be assembled, not in London, but at Aldershot. The board should consist of picked officers of the ranks of lieutenant-colonels commanding regiments, and majors, fifteen in number, with a practical general, such as General Parke, at the head of the board. The board should not have any members on it who were members of Parliament, and who wish to make names for themselves by impracticable and revolutionary proposals. The regiments of the Line are moving cities, with grand historical names and traditions, who consider it no honour whatever to be attached to or bear the names of manufacturing and highly-interesting counties. For recruiting purposes, the Brigade Depot system has signally failed in most cases. So-called Lancashire and Yorkshire regiments are being turned into Irish regiments, the recruits raised in Lancashire being nearly all Irish. The Brigade Depots require to be reorganized, as the ten officers at the depot are eating their heads off with nothing to do. One thing is certain, the Army has been unsuccessfully tinkered enough already. Doing away with the grand old historical and fighting numbers of the regiments, and trying to knock two old regiments into one, with the miserable title of the "Royal Lancashire Fusiliers," or the "Royal Flintshire Light Infantry," will put the finishing touch to the British Army and *esprit de corps*. The title "Royal" has been given as a mark of distinction. Now it is proposed to call us all Royal, like the "Royal Bungay Grenadiers," or the "Royal Sussex Coldcatchers." We trust, in the interests of the Army and the country, this will never come to pass.—I am, &c.,

Soldier Born.

Sir,—In your number of March 24 you mention that "a distinguished general officer thinks that a very feasible and simple way of getting out of the many difficulties would be to amalgamate a Militia regiment and each Line regiment in the Service, making the Militia regiment the second battalion of the Line regiment for recruiting and reserve services." With reference to this, may I be permitted to state that in a letter which appeared in your journal in Feb., 1869, on the organization of the Militia, I suggested that all Line regiments should take as their reserve or second battalions their county Militia regiments. My exact words were, if you will kindly refer to my letter, "Every Militia regiment should become the reserve battalion of some Line regiment; for instance, the 3rd Buffs (the East Kent) would take as its reserve the East Kent Militia; the 5th (Northumberland Fusiliers) would take the Northumberland Militia; while the 60th Rifles and the Rifle Brigade would have as their reserve battalions the Rifle Militia regiments; the Scotch regiments would take the Scotch Militia, the Irish Line regiments the Irish Militia, and so on throughout the whole Line, whilst the Militia Artillery would become the reserve of the Royal Artillery. In this way there would be an intimate connection between the Army and the Militia, and men after having served so many years in the Line regiments might commute a certain period of the remainder of their time by doing duty in the reserve battalion, being still liable for active service in case of war." I think, sir, you will see that my suggestion is much the same as that of the distinguished general, and feel flattered that my opinion should coincide with his, more especially as, although I have devoted a great part of my time and talents to advocating improvement in the organization, &c. of the Militia (many of my suggestions having been adopted by the War Office), yet, at the same time, I was reported by my temporary commanding officer, a city business man, who knew nothing whatever of me, as "not having acquired a sufficient knowledge of my duty," and, in consequence, threw up my commission in disgust.—I am, &c.,

Ex-Centurion.

INDIA.

Col. M. Hunter, Bengal S.C., doing general duty at Meerut, has been appointed to Delhi, at which station he will be in command.

Col. A. R. E. Hutchinson, Bengal S.C., Political Agent at Gwalior, is said to intend retiring almost immediately. Col. J. Watson, V.C., C.B., Bombay S.C., is spoken of as his successor.

The *Deccan Herald* hears that subscriptions are being collected in camp for the purpose of giving a public entertainment to Lieut.-Gen. Lord Mark Kerr, C.B., previous to his departure for England.

A letter from Upper Scinde states that Major Sandeman was expected at Jacobabad from Calcutta. A squadron of the 1st Scinde Horse and two guns of Mountain Battery were ordered to accompany Major Sandeman to Mekran, to settle, it is said, certain disputes between Azeed Khan and his Highness the Khan of Khelat. Sir Lewis Pelly is considered to have made an utter *fiasco* in the Cabul negotiations, and to have much injured his chance of employment in important charges.

MINOR TACTICS.

Capt. William Shaw's method of studying this subject with the aid of modelled ground is attracting a good deal of notice at Aldershot. A few days since Sir T. Steele assembled all the general, field, and Staff officers of the division, some seventy in number, to hear an explanation of the system from Capt. Shaw. The general opinion seemed to be that the method possesses great advantages over any system of instruction with maps alone. Capt. William Shaw has since given an explanatory lecture to the remaining officers of the division, a large number attending, notwithstanding the day being very wet. Col. Harman, A.A.G., presided. Capt. Shaw said:—"Your presence here to-day, gentlemen, is an earnest of your interest in the subject of minor tactics. Many of you have, therefore, read Col. Brackenbury's lecture, given some weeks back at the United Service Institution, on the value of systematic tactical study for all ranks of the Army. That lecture has left but little more to be urged in favour of the introduction of a recognised system. In putting forward, therefore, any remarks of my own on the subject, I feel somewhat in the position of a junior counsel whose senior has exhausted his eloquence in saying all that most materially bears upon the case. Like the junior, however, I may still be usefully employed in supplementing the details of those general principles which my chief has laid down in the abstract, and in connecting and clenching the links of the chain which a stronger hand has forged. When one bears in mind, then, how much attention is paid to technical instruction in other branches of military science, and that a knowledge of musketry and general exercises is exacted as a matter of course, it appears somewhat surprising that the key to utilising this knowledge—the means of turning it to account at the right moment—should have been comparatively neglected. There seems long to have been an impression in our Service that tactics formed a study for general and Staff officers only, whereas it is, as Col. Brackenbury has so forcibly shown, a necessary qualification for every troop leader. It is very important that we should train our soldiers to be good marksmen, and to answer to the word of command with rapidity and precision; but the best shot in the Army is of no avail if not brought within reach of the object he is to fire at, and the most complete drill will not win a battle if time and opportunity be neglected. A great change has come over the spirit of the Army of late in this respect. Some twenty-five years ago it would have been considered something like presumption in the captain of a company to consider such knowledge as a part of his business. Tactics, as well as strategy, was then thought to be beyond the province of a regimental officer, and necessary only for the higher commanders. But it is now generally admitted that that all-important unit the company cannot be too complete within itself, and that the leader of the company cannot be better employed than in practically instructing those under his command in the principles and details of elementary tactics, upon which the success of military operations so materially depends. There are no doubt very many company leaders of the Army who could and would, if desired, teach minor tactics to their following; but, on the other hand, there are many who, from no fault of their own, have been debarred all chance of either theory or practice in sufficient detail. The former would like to be able to work and be guided by some recognised system of instruction; the latter, in order to qualify for instructors, would like first themselves to study and learn. I believe I am therefore quite warranted in saying that the time has now arrived, so far as can be judged, when there is certainly no apparent unwillingness to study, and that so far from any attempt being made to force the practice of this art upon any one, the present movement is rather an endeavour to meet a demand than to create one—an answer to a call—the result, in fact, of a general wish clearly expressed by many of our brother officers. That this wish for opportunities of studying the details of minor tactics is a genuine one and very universal, and one that I may say has grown more and more during the last few years, I have myself been much in the way of knowing. Since 1873 upwards of 600 officers, the minority only being of junior rank, have either studied with me some branch of military science, or consulted me on their own private work. I have thus had opportunities of ascertaining the views of a large number of officers on this important point. It was no doubt a knowledge of this feeling, so creditable to the officers of the Army, that induced Col. Brackenbury to bring to the notice of the general commanding at Aldershot a system introduced by one of his Staff of studying elementary tactics with the aid of modelled ground. Sir Thomas Steele has given his cordial encouragement to the undertaking, and has approved of the method being inaugurated at an auspicious time, when it is hoped it will chime in and work with tactical exercises in the field, for I cannot too emphatically point out that the contemplated course of instruction or study is not intended to take the place of practical exercises, but to facilitate and lead up to them." (Explanation of the model and manner of working it were given three weeks ago in this journal. The *modus operandi* for illustrations remains to be explained.) "Col. Von Verdy du Vernois, in his excellent 'Studies in Troop Leading,' tells us that a leader should be educated in the faculty of forming clear and prudent resolutions, in the talent of imparting these resolutions to others, and in that of enabling him to direct those under him to carry out his intentions. He is also of opinion that although the formation of the character of the individual student must be left to practice, yet the formation of military judgment can be perfectly well attained theoretically. He considers that the best method of effecting this is to produce a variety of situations by a continual exercise in specified cases, to teach the nature of war in them, and thus to form the above-mentioned qualities by forcing the student to make actual resolutions and actual dispositions in each case. Studies such as these, recommended by Col. Von Verdy, to be worked out with maps, I propose to work out with the aid of modelled ground." Capt. Shaw then proceeded to show the method of working out exercises on the model. Commencing with a small reconnoitring patrol of Infantry, a rear-guard making a stand at the passage of a river against a strong advanced guard, formed of the three arms, was then shown and the study worked out in detail. Much interest was taken in the mode of moving the models of troops on the board by means of magnetism. At the conclusion of the lecture Col. Harman announced that the general-commanding had approved of voluntary classes being formed of officers desirous of going through a course, under Capt.

William Shaw's guidance, in the elements of minor tactics. The invitation has been since taken up so warmly that nearly 100 officers of the division have sent in their names as desirous of joining Capt. Shaw's classes and attending his lectures on minor tactics.

INFANTRY TACTICS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—As you kindly inserted, a short time ago, a letter from me on "Infantry Tactics," I venture to trouble you with another on the same subject, in the belief that the more it is ventilated the better. It appears to me that a great part of the disapproval which the present regulation system of attack has met with is founded upon a misconception of the method in which an attack will be carried out under modern conditions, and of the way in which the attack formation is to be employed. The idea that seems to be present to the minds of many of those who object to the system is that many battalions will be formed up in line at the same time in attacking formation, and that the whole will move off together, the skirmishers being evenly distributed along the whole front. That then, as casualties take place, the vacancies in the shooting line will be filled up by men sent forward from the bodies in rear to double up with those already in front, and that this process will continually be carried on until, at the decisive moment, the line will consist of a confused mixture of men of different companies and battalions without coherence, and entirely out of hand. This idea I believe to be incorrect. My notion of the way in which an attack will be carried on is as follows:—After reconnoitring the enemy's position, the general-in-chief will decide as to the way in which he will attack, and how he will distribute his divisions. Then he will give his orders to the generals of divisions in this manner: "The —th division will attack such-and-such a portion of the enemy's position; the —th and —th divisions will attack on either side, and sufficient connection must be kept up with them to prevent the enemy from penetrating through the interval;" or, if a flank attack be intended, the order would run, "The —th division will endeavour to turn the enemy's flank, keeping up, at the same time, its connection with the —th division, which is to advance on its inward flank." On receiving these orders the divisional general would give his orders to his brigadiers, keeping what troops he thought fit in reserve, and pointing out the objects to be sought for by the brigades in first line. Then the brigadiers would make arrangements for their brigades. A brigadier having a certain object before him would possibly keep one battalion in reserve and send two forward to attack. Thus, instead of a long line of many battalions all formed simultaneously and advancing together, there would be separate units of two battalions each in first line, acting, to a certain extent, independently, but according to a general pre-arranged plan. It is for the generals of various grades to see that their advances and successive reinforcements are so timed as to preserve unity of action. But even the two battalions of a brigade need not necessarily assume the attacking formation exactly simultaneously. The principle should be observed of keeping troops in compact formation as long as possible, for facility of manœuvring. The battalions will therefore advance as long as they do not suffer heavily in the formation most suited for getting over the country. Each battalion commander will use his own discretion when to change his formation. When necessary he will gradually assume attacking formation, viz., that called the "flank formation," keeping back a half-battalion and sending forward two companies to form the shooting line, and two in support; the companies in support and the half-battalion in reserve following the shooting line at fitting distances in whatever formation may be most suitable under the changing conditions of fire and ground. The companies forming the shooting line may send out at first half their strength as skirmishers; but very soon, if they meet with resistance, the remainder of the company will have to be extended also, and the sending out of the first half of the company and its reinforcement should be carried on in such a manner as to keep the men as far as possible in their familiar places in the ranks. This may be done by sending out the front rank first, and then doubling the rear rank in with them; or, if a sub-division is sent out first, the second sub-division should come up on the flank of the first, which should be rallied to a flank for the purpose of giving room. As the action gets hotter, experience tends to show that the shooting line will not be weakened equally throughout by casualties, but that the men will gather into little knots with gaps between them. Officers and non-commissioned officers should regulate this tendency by making themselves the centres of these knots, and by re-collecting them into their companies. If this be done, confusion will be avoided as far as possible, and the commanders of companies and larger bodies in rear will find their opportunities for bringing up their men in coherent bodies, over which they keep their control, while the fighting line is still kept up to its full strength. The same sort of operation will extend itself to the rear, field officers sending on companies of their battalions where required, brigadiers battalions, and superior officers larger bodies of troops, so that the action is continually fed, while the highest officers keep the general control of the action in their hands by using their reserves at the points which present themselves as decisive. If this be a true picture of the way in which an attack should be carried out, it would appear that our present regulations are not far wrong, but only require to be practised more under the conditions of a battle-field than under those of a parade-ground. (The so-called "Line Formation" of the regulations appears to be too weak for a serious attack, but might be used by battalions intended to carry on a demonstrative or delaying action.) I should be very glad if my remarks should provoke an expression of agreement, or the reverse, from those more practically acquainted with Infantry manœuvres than your obedient servant, E. CLAYTON, Capt. R.A.

Royal Military Academy, Woolwich,
March 12, 1877.

The Admiralty have awarded a gratuity of £50 to the widow of the fisherman who was accidentally shot off the Isle of Wight some time since on being overhauled by a Coast-guard cruiser. It will be remembered that the fishing boat was hailed, but continued on her course, and was naturally believed to be running a cargo of smuggled goods, and a shot was then fired to bring her to.—*Standard.*

FINES FOR DRUNKENNESS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—"The positive absence of crime, and not its screened existence, is the criterion of a well-established discipline." (Queen's Regulations, section VI., par. 1). As a constant subscriber to your paper for the past fourteen years, I claim the privilege of obtaining through the columns of the ARMY AND NAVY GAZETTE an opinion upon the following facts:—The 77th Article of War reads thus, as regards the crime of drunkenness in the Army—"If any soldier shall be drunk, whether on duty or not on duty, his commanding officer may, with or without any other lawful punishment, award him to pay a fine not exceeding ten shillings," &c. The Queen's Regulation reads as follows:—"The crime of drunkenness in the Army will be dealt with by commanding officers under the 77th Article of War by the infliction of summary fines, &c. The fines are progressive in amount on the repetition of acts of drunkenness, but are subject to reduction in proportion to the length of time elapsing between the offences," &c. Here follows a scale of fines. (See page 120, section 6, par. 15, Queen's Regulations). Now, sir, my difficulty is this—I have always believed, and during my tour of service have always seen carried out, as a regimental system, "that the scale of fines is obligatory on commanding officers, and that if a soldier commits the crime of drunkenness he is necessarily subjected to the punishments ordered in the above paragraph of the Queen's Regulations. What was my astonishment at finding that at least one regiment exists in which the commanding officer arrogates to himself the power of awarding fines or otherwise, and deems it discretionary with himself whether a fine be levied or not for the crime of drunkenness! As far as I can make out, this opinion is formed on the idea that the 77th Article of War gives this discretionary power to commanding officers, and it is to elicit the opinion of others on this subject that I venture to trespass on your space. For myself, I am satisfied that the infliction of fines is obligatory; and, sir, were it otherwise, what a hardship upon the recruit is the want of knowledge upon this point. A man at present may enlist in one regiment and lose his good-conduct badges after years of hard work for a few acts of drunkenness; another may keep these badges, although a drunkard, simply because his commanding officers are unwilling to deprive him of them. Some short time back I was quite astonished at the number of men with good-conduct badges which a certain regiment had, but my astonishment ceased when I found that the punishments for drunkenness were considered optional by the commanding officer, and that to save a badge seven days to barracks for an offence of drunkenness, fineable under the scale, was a very common occurrence, the commanding officer merely remarking, "I'll give you a chance, I won't take away your badge." Which, sir, is correct, the optional or the compulsory fine? If the former, it should be more generally made known amongst the Army. If the latter, then the good-conduct badges worn in some regiments may actually become the test of careful topering, and the "Returns of Fines for Drunkenness" in these regiments is only so much waste paper. The British public is as ignorant of the state of some regiments as regards the crime of drunkenness as it is possible to conceive, for the official returns from those regiments in which fines are optional do not, in the least, indicate their true condition, and the looker-on is gulled by a show of good-conduct badges and a screened existence of crime. That two regiments in her Majesty's Service should deal with the offence of drunkenness in exactly opposite ways, and each commanding officer have it in his power to quote an authority for his view of the case, seems to me an injustice to the soldier, and requires immediate rectification.—I am, &c.,

C. I.

REVIEW ORDER IN 1779.

[These draft regulations are obtained from the papers left by an officer of the Adjutant-General's Department.]

A regiment when assembled for a review is to be formed three deep, with an inverval of six inches between the files, and of six paces, or twelve feet, between the ranks.

Q. Whether it would not be better to allow a small interval between the heels.

A. Yes. To be inserted in the position of a soldier.

The ten pioneers to be drawn up in three ranks upon the right of the whole, with their left file at the distance of six paces from the right of the light company. Four pioneers to be in the front rank, three in the centre, and three in the rear.

Q. Whether it would not appear better for the tenth pioneer to be on the right of the rear rank, to cover the corporal, and to have that file completed by the right-hand man of the centre rank. When the battalion marches off its ground, and the corporal takes his post in the front of the pioneers, the tenth pioneer can easily and imperceptibly move up into the corporal's place, and the right-hand man of the centre rank incline at the same time nimbly to his left, to cover his former leader; or, he may stand fast, and the right-hand man of the rear rank step briskly to the right to cover him, and thereby keep the outside file complete.

A. Yes.

A corporal to be posted on the right of the front rank of pioneers, with his firelock rested over the left arm, or advanced by his side.

The light company formed three deep, with its left file twenty paces distant from the right file of the grenadier company. The grenadier company three deep, with its left file (an interval of twenty paces will be required between the grenadiers and battalion to make room for the Staff officers, the colonel, and the line of officers behind him, at the head of the first grand division, when the regiment wheels to the right by grand divisions) twenty paces from the right file of the battalion.

The other eight companies to be posted in the following order, with an interval of one pace, or two feet, between each:—First, upon the right, the colonel's company. Upon its left: second, the major's company; third, the second captain's company; fourth, the fourth captain's company; fifth, the fifth captain's company; sixth, the third captain's company; seventh, the first captain's company; eighth, the lieutenant-colonel's company. The colonel is to be advanced eight paces in front of the reserve, the lieutenant-colonel two paces behind him, and a little to his left; the major is to take post on the right, between the pioneers and the right of the light company, and the adjutant on the left of the battalion, both on horseback with drawn swords, and dressing with the front rank of the regiment, and the first captain eight paces in the rear of the reserve. All the other officers are to be posted with their respective companies and dressed in a straight line with the colours at four paces distance from the front rank, the grenadier and light company officers with their fusils over the left arm. The sergeants of these two companies to carry their fusils over the left arm, or advanced against their body. The battalion officers, with their espontons ordered at arm's length from their right sides, the flat of the spear to the front; the thumb upwards, and of an equal height with the shoulder. All the captains or commanding officers of companies, excepting the officer commanding the left company of the battalion, are to cover the second file on the right of their respective companies, their lieutenants the second file on the left of them, and their second lieutenants or ensigns a centre file. In the absence of a captain, the lieutenant is to take his post, and the ensign the lieutenant's. The captain or officer commanding the left company of the battalion is to cover the second file on the left of it. The ensigns carrying the colours are to be in the same line with the other officers in front of the reserve, the King's colour on the right, the Union on the left. The Staff officers are to be posted opposite to the interval between the grenadier company and the right of the battalion, dressing in the same line with the officers—the chaplain on the right, the quartermaster on the left, the surgeon on the left of the chaplain, the surgeon's mate on the left of the surgeon. The sergeant-major is to be in the rear of the reserve, two paces behind the line of sergeants. The sergeants are to be in the rear of their companies, dressed in an exact line from right to left of the regiment, at the distance of four paces from the rear rank and covering files in the same manner as above directed for the officers, their halberds to be ordered at arm's length, with the hatchet side of the spear outwards. The drummers and fifers of the grenadier and light company are to be on the right of their respective companies in a single rank and dressed with the front rank. The drum-major and drummers belonging to the right wing of the battalion are to be also in a single rank on the right of it, between the grenadiers and the right-hand company. Those of the left wing are to be on the left of it in a single rank, and the whole to be dressed with the front rank of the regiment. The musicians to be in one rank between the line of officers and the front rank of the reserve.

The reserve is usually composed of six files, but as the loss of their fire appears to be unnecessary—Ques.: Whether four sergeants (two posted in the front and two in the rear rank), with the ensigns carrying the colours in the centre, would not do as well?

In this disposition, and with bayonets fixed, the regiment is to wait the arrival of the reviewing general, who is to be received with the honours due to his rank.

FOREIGN MILITARY.

The list of German fortresses to be enlarged or strengthened in the course of the summer includes Ulm, Ingolstadt, Cologne, Coblentz, Mayence, Rastatt, Königsberg, Thorn, and Posen. Moreover, the coast fortifications at Friedrichsort and Wilhelmshaven are to be likewise enlarged. The principal works contemplated appear to be those at Ulm and Ingolstadt. Little remains to be done at Coblentz and Mayence. The new fortifications at Cologne are to be completed by 1879.

The entire German Cavalry, with the exception of the Cuirassiers, are now armed with the new Mauser carbine of 1871. It is not yet decided if the Cuirassiers are to receive the new weapon.

The *Cologne Gazette* says Melik Mirza has been appointed Commander-in-Chief of the Persian corps of observation. The head-quarters are at Choi. On the Persian General Staff thirty-six European officers are employed. Russian merchants embark arms and munitions for the Persian Army in a port of the Caspian Sea.

Col. T. L. Smith, C.B., formerly lieut. and adjt. of the old 95th (now Rifle Brigade), and late Principal Barrackmaster at Aldershot, died on the 6th inst., aged eighty-five. Col. Smith joined the Army in 1808, and was present, under Sir John Moore, in the following engagements:—Calcavellas, Nogales, Constantina, Belanzos, Elburgos, Lugo, and Corunna. In 1810 he was present with the forces under command of the Duke of Wellington at the taking of Gallegos, at Burguillo, and the Coa. In the latter of these actions he was dangerously wounded. In 1812 he took part in the siege and storm of Ciudad Rodrigo; in the siege and storm of Badajoz; at Castrejon, Salamanca, and in the capture of Madrid. In 1813 he took part in the affairs of San Millan, Vittoria, Echalar, the first attack on Vera, on Aug. 31, and second attack on the same place on Oct. 7, at Nivelle, Arcangues, and at Nive. In 1814 he was present at the engagements of Orthes, Tarbes, and Toulouse, and the following year at Waterloo. For these services he held the Peninsular medal with ten clasps and the Waterloo medal. Col. Smith was appointed barrackmaster at Rutland, Donegal, in Feb., 1824, and after having been promoted in the department successively to Roscrea, Galway, Birr, and Chatham, was selected in 1854 to organize the barrack branch at the new station at Aldershot, where he served until 1869, when he retired on the break-up of the barrack department, and was nominated a C.B. by Sir John Packington, now Lord Hampton, Secretary of State for War, in recognition of his services, having thus actually served his Queen and country almost uninterruptedly for sixty-one years. Col. Smith had a large family, of whom only three survive him; he lost six sons in the Service, five of whom died abroad while serving on full pay in the Army, and one in the Navy. He was interred at Aldershot on the 10th inst. in the family vault in the military cemetery, the funeral being attended, besides relatives, by a very large number of residents and old members of the deceased officer's department. The body was removed from the Aldershot station on a carriage drawn by Army Service Corps' horses, a funeral party of that corps accompanying it to the Iron Church, South Camp, and thence to the cemetery. The shop windows were closed as the procession passed through the town, and the great number of people attending the funeral testified to the respect in which the memory of Col. Smith and his family are still held at the station where he served so long. Two brothers of the deceased fought with him at Waterloo—viz., the late Lieut.-Gen. Sir Harry Smith, Bart., G.C.B., and the late Lieut.-Col. Charles Smith, who for several years commanded the Cambridge Militia.

Army & Navy Gazette.

LONDON, SATURDAY, APRIL 14, 1877.

The recent speech of M. Thiers in Paris is well worthy the study of all interested in the general efficiency of their Army, no matter of what nationality they may be. As one of the oldest statesmen of the day, and who has seen in his own country the result of various changes in the organization of the French Army for half a century, none can be more capable of offering an opinion on the subject. He condemns a shortened period of service, and says "the longer the term of service the better the soldier;" that "to have soldiers properly trained it was necessary to have good non commissioned officers, and these could not be procured at a day's notice. Raw youths were no good unless they were incorporated with men having long experience of warfare. There was only one way of turning a man into a soldier—to keep him a long time with the colours." If these arguments apply to the French Army, they will equally apply to the British; and is there one British officer of twenty or thirty years' service whose experience will not bear out this theory? It is true that, although we have reduced the period of compulsory service from twenty-one to one-half of that number of years, we have not yet reached the extraordinary limited service of the French soldier, nor is it desirable that we should reach it. On the contrary, it is the opinion of many that the old term of twenty-one years was of far more value to the country and more beneficial to the soldier. Two reasons guided the ruling powers when they legislated for the shorter period of service—first, the saving of money in reducing the number of pensions; and, secondly, the prospect of mixing among the population a reserve force of men trained to arms. Now, with regard to the first of these, any economy that impairs the efficiency of the Army at large must necessarily be a false one; and then arrives the question, does the diminution of limited service impair its efficiency? That this is so there can be no shadow of a doubt, for many a commanding officer has been alive to the fact that, in the words of M. Thiers, "raw youths were no good unless they were incorporated with men having long experience in warfare." Take a regiment as it stood before the Crimean war, and three-fourths of its strength would be old soldiers from eight years up to twenty-one; but a regiment of the present day, in consequence of the discharges at the expiration of a comparatively short period, would, in most cases, muster one-half of its strength from five to six years downwards. Again, "the longer the term of service the better the soldier." Yes, in every sense. The greater number of defaulters and the greater number of general bad characters are among the younger men. As a rule, young men will sow their wild oats, which, in some instances, have not all been exhausted before the limited period of service expires, and so the regiment loses the benefit of the man's riper experience; but if he has a longer period to look forward to, with the prospect of good-conduct badges and ultimate pension, he will have more inducement to mend his ways, and will the sooner become a respectable, trustworthy, and steady man, fit to guide and advise the younger soldier. Another and more important argument is the superior value of old soldiers over recruits on active service. The veteran is trained physically and morally for an endurance which a much younger man finds it hard to go through; and sickness, hospital invaliding, and death are far more rife, by a large percentage, among men under five or six years' service than among those above it. It is all very well for the British taxpayer to look upon the Army as an incubus, and forget that it is the protecting power that enables him to be one of those gentlemen who live at home at ease without his nervous system being agitated by the fear of the advent of a foreign foe; but the said taxpayer may press his arguments too far, and, in striving so to reduce the period of service as to deprive the soldier of all prospect of ultimate pension, may so destroy efficiency as to render the Army but half the value it should be. What says Marshal Von Molke, as quoted by M. Thiers—"He would rather have a good army of two hundred thousand men than a bad one of four hundred thousand." Now as to the second reason for the present period of short service—viz., that of diffusing a number of men trained to arms throughout the country—this want has been supplied for years by the popularity of the Volunteers, and there are thousands of men through the length and breadth of the land who have learnt their drill, how to handle a rifle, and how to hit a bull's-eye through the training they received while in the Volunteers. In addition to these, there are the Volunteers still enrolled, as well as the corps of Army pensioners. Where, then, can be the necessity of impairing the value of an Army by limiting its service to too short a period? To quote again from Marshal Von Moltke, M. Thiers, in his speech, reports him to have stated that "if Prussia could possibly extend the term of military service, she would do so to-morrow." It is true that the period served by our soldiers is not so short as that of either France or Germany, but it is still a question whether ten or twelve years is not too short, and the time will come when the advisability will be seriously considered of reverting to the old system of attestation for twenty-one years.

The abuse of power has met with severe and just condemnation at the hands of the court-martial which has been engaged on the trial of the Barracouta's late Captain. Had there been any reasonable excuse for the conduct of the prisoner, there can be no doubt that it would have been allowed to weigh well in his favour. It was fully expected that he would at least have been dismissed his ship, never again to be employed; but the court saw no good cause for exercising such leniency, anxious as it must have been to avoid a scandal, but by its sentence has removed the name of Captain Charles E. Stevens from the list of officers of the Navy. This sentence has proved to the Navy at large, were such proof required, that oppression is no longer countenanced. Time was when a non-executive officer in Mr. Gain's position would have suffered without remedy, for the Captain of a ship of war was the indisputable lord of all he surveyed, and woe to the man who questioned his actions. Was any subordinate sufficiently daring to bring any such charge of oppression or injustice against his commanding officer, scarcely any amount of evidence would satisfy the minds of a court of bygone days that their compeer was guilty; some justification would have presented itself; or some plea as to discipline would have been urged. "The King can do no wrong" was a proverb and a household word cherished and upheld by the autocrats of earlier years; but the recent court-martial has proved that we live in a more enlightened age. Now it is generally admitted that the Captain of a ship of war should consider those under his command as men of like feelings with himself, and the officers should learn to feel confidence in their commanding officer as their friend and supporter, and not look upon him as a man of different mould to themselves, ready to act on the slightest suspicion of provocation as an oppressor. To bear and forbear and to act with suavity and consideration is not inadmissible with the necessary discipline of a ship; and where Christian charity is thus made a practical rule, Captain, officers, and men part after a long commission with feelings of regret at separation, a lasting remembrance of good-fellowship, and lifelong friendships established. In the difference between the first and last portions of the commission of the Barracouta we have a remarkable instance of this, for happy as she was under the command of Captain Fremantle, she pays off under a cloud, and her late commanding officer has paid the penalty of his irregularities and overbearing conduct.

Our readers may have remarked that for some months past we have expressed no opinion and offered no remarks on "*the* great Question." It has been called "The Eastern Question," but it directly affects all the world, if we except China, Japan, and South America, and such places which come in later under its influence. The reason for our silence was simple. Having all along, without a moment's doubt or indecision, expressed the conviction that "war" between Russia and Turkey was inevitable, it seemed to us useless to go on "lucubrating" from week to week about the effect of conferences, interviews, missions, dispatches, and circulars, which we regarded as mere "buffers" improvised by well-intentioned, evil-minded, or neutral diplomacies to stave the coming shock.

> Like feather bed 'twixt leaguered wall
> And heavy brunt of cannon ball.

The ground on which that conviction was based was solid enough, as it seems. An ignorant and arrogant presumption, encouraged by those who should have known better, led public men, journalists, and the public in this country to suppose that there was no such thing as a Turkish nationality. The Turks were spoken of as a mere horde encamped in Europe, and subsisting on "brag," plunder, and the forbearance of Christian States, which was the result of mutual jealousies. Even now, in the face of the most outspoken positive expressions of the national will of the Turks, who are proving they are as much a nation as any people well can be, we read of their possible reliance on others and of their moral cowardice. We shall see what we shall see. It is probable that the scenes of the campaign will not be laid in countries where the possible belligerents are seen just now to be most busy and most *en evidence.*

The statement made by the Secretary of State for War on Thursday night, if correctly reported, makes it clear that the five years' rule will be enforced, and that the officers now in command of regiments who have obtained that command since the new system was inaugurated must all go when their time is up. But does it not seem as if the rule was not applied so as to leave no doubt in the minds of those affected by it?

Mr. G. H. Hoste, of the Admiralty, gave a lecture at the Royal United Service Institution yesterday on "The Further Development of the Volunteer Force," which we purpose to examine next week.

Count Seckendorff has arrived in London from Berlin charged with letters from the Imperial Crown Prince and Princess, and will remain in town for a few days.

The Duke of Cambridge had a long conference with the War Office and Horse Guards' authorities on Tuesday, previous to his departure for a brief sojourn at Brighton, and it is understood that the scheme of promotion and retirement of officers was then discussed, and finally settled by a kind of general council. Mr. Hardy may be expected, therefore, to make some statement on the subject in a short time—at all events, before the Whitsuntide recess.

The vulgar appetite for gossip and for "revelations" of domestic life leads the organs which purvey for the gratification of that taste into the most scandalous outrages on good feeling and good taste. What can be more offensive to an officer and to a young lady, who may have a mere bowing acquaintance, or who may have danced together half-a-dozen times in the course of a season, than to see their names in the tattle column of one of these papers, with the announcement that a marriage has been arranged between them, coupled with a number of imaginary details? This last week there was an utterly unfounded statement respecting the marriage of a gallant officer of a regiment of Household Cavalry with a lady of noble family, which caused great pain to all concerned. And yet there is no redress. The indignant and injured gentleman applies to the Editor, who expresses his great regret, assures him that the paragraph was inserted on the best authority, and then puts in a notice that Captain A and Miss B are not to be married, as if it were not of the least consequence whether he was right or wrong in his invasion on the sanctity of private life. There are papers which specially devote a portion of their space to systematic intrusions on people in their own houses, and who parade poor "Buggins at home" before the public, sometimes with Buggins' sanction, but oftener by the aid of a moral burglary. The fault, however, lies at the door of those who encourage such writing and who patronize the journals, which are becoming the pests of society. "His lordship cried thrice, 'Jerningham! Bring me my garters!' Mr. Mildew parts his hair with a leaden comb, and always uses carbolic soap," and so on, the most vapid, rubbishy account of furniture and dress and external appearances, served up in a huge dish of rancid "butter," or soused with vinegar for the palates of the readers of such trash, who seem to think they can get into good society by rubbing elbows with the chroniclers of the conversation of the *valetaille.*

It seems to us that Mr. Stanley was guilty of an inadvertence when he spoke of the Army as having been animated at one time by a sort of "trades union jealousy" against the Militia. The phrase was offensive, and although Mr. Stanley qualified it to a certain extent by using the words "which was once thought," it was plain enough from the outset that he was of opinion that the officers of the Army were at some time or other jealous of the pretensions of the officers of the Militia, which we do not believe was ever the case so long as the officers of the Militia did not pretend to be more than they were, and to the best of our belief they never at any time claimed to be more—or less—than officers of the Militia. The officers of the Active Army will, however, always feel a very proper sense of their own identity, and cannot be expected to surrender the expectation of being treated as the actual men of service whose claims to consideration are positive, and not prospective. The tendency of recent legislation is to give greater weight to the status of the Militia, and there is now in that force a very large proportion of most active, intelligent, and valuable officers, between whom and the officers of the Army there can be no jealousy of any sort.

It is a coincidence worth noting, perhaps, that Mr. Layard, who is now going out, rather late in the day, to Constantinople, in an Extraordinary capacity, was just this time twenty-three years ago setting out for the East as an observer and travelling gentleman, in which capacity he witnessed the landing in the Crimea some months later, and wrote his account of the Alma from the maintop of the Agamemnon to the *Times.*

In our remarks some weeks ago upon Captain Wilkinson Shaw's system of instruction in the minor tactics by the aid of modelled ground on a large scale, we expressed the opinion that it was rather from the want of opportunity than of will that troop leaders did not, as Colonel Brackenbury considers they should do, make this important branch of military science the foundation of company drill and exercises. We are not a little gratified to learn how well justified we were in the opinion we had formed upon the subject. In the beginning of this month Captain Shaw gave a lecture at Aldershot, in the course of which he stated that the Major-General commanding had approved of his forming a voluntary class for instruction in his system, and within two or three days nearly one hundred regimental officers of the division had sent in their names as volunteer students. A class of forty was accordingly formed at once, and a second class is now in course of formation. This is certainly most creditable to all concerned—to the General, who has cordially encouraged the movement, who attends the lectures himself, and who assembled eighty Brigadiers and Field officers to meet at the lecture-room and make themselves acquainted with the system; to the company officers, who have shown their anxiety to study a subject which was formerly considered a branch of knowledge beyond their province; and to the able and energetic Staff officer who has thus voluntarily undertaken these labours in addition to the arduous duties imposed upon a Garrison Instructor in a large station like Aldershot.

The statement that Captain Salis-Schwabe is to succeed Major-General Walker as Military *Attaché* at Berlin is about as correct as the story that Sir Alfred Horsford has been writing magazine articles on Army Reform. It must be gratifying to the latter distinguished officer to know that his literary efforts have met with the approbation of the gentleman who wrote the paragraph.

Can anything be done to get the question of wearing collars in uniform reconsidered? There can be no doubt that wearing a coat-collar in contact with the skin is a most unclean habit, yet it has to be done day after day by officers, because they cannot help themselves. There are two favoured Line regiments in which the officers are allowed to wear collars in uniform. Why this is granted to those two, and not all, it is hard to say, but such is the case. Could not the matter be compromised by an official intimation that collars might be worn in uniform provided they were not higher than the collar of the coat? The state of a coat-collar after it has been worn a limited period without a linen collar inside may be judged by wearing a linen collar in uniform for only one week. If the authorities could be induced to try this experiment, they might be led to modify the hard-and-fast rule that no collar of any kind is to be worn in uniform.

Lieutenant J. H. Ewart, 78th Highlanders, has been appointed Aide-de-Camp to Major-General H. Hamilton, C.B., commanding the Cork District. He entered the Service August 8, 1868.

The vacant Horse Artillery jackets have been reserved for Colonel the Hon. D. M'D. Fraser, C.B., who is posted to A, and the Hon. E. T. Gage, C.B., who joins the C Brigade.

Captain O. R. Middleton, 4th King's Own Royal Regiment, has been appointed Brigade-Major of Infantry at the Curragh Camp, vice Captain R. O. De Montmorency, 83rd Regiment, appointed Instructor in Military Surveying at the Royal Military College. Captain Middleton joined the Service June 19, 1857, and became Captain June 15, 1866.

A third Distinguished Service Reward is vacant, consequent upon the appointment of Lieutenant-General H. Smyth, C.B., to the Colonelcy of the 2nd Queen's Royal Regiment.

REVIEWS.

The New Quarterly Magazine.

The present number of the *New Quarterly* contains some papers that will well repay perusal. "The Idea of Comedy and of the Uses of the Comic Spirit" is excellently illustrated by George Meredith. In his opinion, good comedies are such rare productions that it would not occupy long to run over the English list. And why? Because a society of cultivated men and women is required wherein ideas are current and the perceptions quick, in order that the comic poet may be supplied with matter and an audience. "The idealistic conception of comedy gives breadth and opportunities of daring to the comic genius, and helps to solve the difficulties it creates. How, for example, shall an audience be assured that an evident and monstrous dupe is actually deceived without being an absolute fool? In C. Tartuffe the note of high comedy strikes when Orgon, on his return home, hears of his idol's excellent appetite. "Le pauvre homme!" he exclaims. He is told that the wife of his bosom is unwell. "Et Tartuffe?" he asks, impatient to hear him spoken of, his mind suffused with the thought of Tartuffe, crazy with tenderness, and again he croons "Le pauvre homme!" Mr. John Latouche furnishes a paper on "Tourists in Portugal," which will especially recommend itself to agriculturists. Mrs. Trollope's story, "Mrs. Jack," is pleasant reading.

The Kettle of Fish.

Among the numerous periodicals which monthly or quarterly cater for the reading public may be found an unpretending little journal rejoicing in the curious title *The Kettle of Fish.* It is a quarterly magazine, written by amateurs, and published for subscribers only. Although, generally speaking, amateur writing is regarded coldly, it can be justly said that this case should prove one of the exceptions. "Miss Churchill" is a tale of more than ordinary merit, and "Lynne" is a good companion for it. There may be a little too much poetry in the journal to suit the prosaic taste of the present age, but, taken altogether, we may express our opinion, and in poetry too, that—

The "Kettle of Fish"
Is a savoury dish.

Home Gymnastics. (Hamilton, Adams, and Co., Paternoster-row.)

In these days of pedestrianism and bicycling and rowing, any work on gymnastics will attract attention. This little work, which is a translation from the German, deals with the subject in reference to its value and importance for the health in general; while the writer, himself a foreigner, gives his own experience of the great benefits that may be derived from the practice of home gymnastics. The book is well illustrated, and quite deserving of attention.

Exploits of Lord Cochrane. By Major W. W. Knollys, 93rd Highlanders. (London: Dean and Son.)

This forms Part II. of a series appropriately entitled "The Deeds of Daring Library." No surer means can be found of engendering a martial spirit among the youth of the country than by putting into their hands truthful and judiciously compiled accounts of the gallantry of those who in byegone years have upheld the honour of British arms, and Major Knollys deserves thanks for the very commendable course he has adopted to encourage recruiting both for the Army and Navy. The volumes he is publishing will do far more than any number of official handbills setting forth the advantages of the Army and Navy to promote the interests of the two Services, and this cheap and well-got-up series should find a place in every naval and military library.

A Grammar of the Baloochee Language. By Major E. Mockler. (Henry King and Co.)

Those who are interested in the study of the Baloochee (as the author calls it) language will, no doubt, derive considerable assistance from Major Mockler's Grammar, which has evidently been compiled with considerable care. The language, is that which is spoken by all the tribes, with one exception, inhabiting the tract of country marked Beloochistan on the maps. The author applies himself to considering whether any marked peculiarities, in pronunciation, idiom, or the use of particular words, are to be met with in different parts of the country, also in what parts it is most purely spoken. Although the difficulties of mastering such a language must be many, Major Mockler's work will, no doubt, assist the student in acquiring a fair knowledge of it.

A meeting of the Governors of the Drummond Institution was held recently, when the following subscriptions were acknowledged:—106th Light Infantry (canteen fund), £5 5s.; 45th Brigade Depot (do.), £5 5s.; 2nd Batn. 21st, £10; Gen. Sir Wm. Codrington, £10; James Gibson, Esq., Q.C., £2; 99th Regt. (canteen fund), £5 5s.; Col. and Mrs. Dunne, £1 1s.; Lieut.-Col. Johnson, Brigade-Major, Dublin, £2; Miss Digby, £1. There are at present forty-eight girls in the institution.

FURNISH ON THE NEW HIRE SYSTEM.—The "New Hire System" is quite distinct from anything yet attempted. Houses furnished throughout 20 Wholesale Houses to select goods from. "An excellent idea. —"Army and Navy Gazette." Prospectus, with Press opinions, post-free. General Furnishing Company — Offices, 9, Southampton-street, Strand.

The Navy.

GAZETTE.

ADMIRALTY, April 9, 1877.

In accordance with the provisions of H.M.'s Order in Council of Feb. 5, 1872, Sub-Lieut. Frederick Alexander has been this day placed on the Retired List of his rank.

April 10.

The announcement of the promotion of Mr. William Broad to the rank of Chief Engineer in her Majesty's Fleet, as notified in the *Gazette* of the 23rd ult., is an error.

April 11.

In accordance with the provisions of H.M.'s Order in Council of Feb. 22, 1870, Chief Engineer R. C. Reynolds has been placed on the Retired List of his rank from the 5th inst.

APPOINTMENTS.

Captains—Edward H. Howard, to the Black Prince, vice T. B. Lethbridge, whose period of service has expired; Charles R. F. Boxer, to the Active, when recommissioned.

Commanders—John B. Warren, to the Swallow, when commissioned; Alexander Tupman, to the Elk, when commissioned; and Herbert Dolphin, to the Unicorn, vice William E. S. Brome, whose period of service has expired; the Hon. H. H. A'Court, to the Osprey, when commissioned.

Staff-Commander—Frank Inglis, to the Duke of Wellington, as supernumerary, for duty at Portland.

Lieutenants—Robert W. Cragie, Charles E. Reynard, William C. Forrest, and Henry N. Alleyne, to the Active; W. H. M. Daniell and Henry P. Routh, to the Swallow; John L. Marx, to the Resistance; Thomas Holmes, to be Flag-Lieutenant to Rear-Admiral Corbett, C.B.; S. H. Thompson, to the Revenge; George Worth, to the Royal Adelaide; and Richard P. Humpage, to the Elk.

Navigating-Lieutenants—W. H. Hatton, to the Active; H. Baynham, to the Swallow; E. H. Richards, to the Elk; Alfred S. D. Ridder, to the Indus, additional for the Flamingo.

Sub-Lieutenants—S. B. Hesketh, to the Dryad; A. R. Beck, to the Wizard; H. T. F. White and F. E. J. Tottenham (for navigating duties), to the Active; H. M. Vaughan-Hughes, to the Spartan; J. R. Childs, to the Mallard; R. E. Berkeley, to the Black Prince; A. B. G. Grenfell, to the Aboukir (for surveying duties); F. H. Biddulph, to the Osprey.

Navigating Sub-Lieutenants—Henry C. Mills, to the Defence; F. Lancelot, to the Moorhen.

Deputy-Inspector of Hospitals and Fleets—Dr. John T. U. Bremner to Haslar Hospital for temporary service.

Surgeons—T. J. Preston, to the Cambridge; David B. Bookey, to the London; Thomas D. Popham, to the Victor Emmanuel; John D. Henwood, to the Minotaur; Penrose Barcroft, to the Resistance; and Henry Beaumont, to the London.

Paymaster—S. W. Parker, to the Active.

Assistant-Paymasters—W. B. Jennis, to the Elk, in charge, to date April 18; Edward Richmond, to the Swallow, in charge, to date April 18.

Engineer—Edward R. Vine, to the Pembroke, additional.

Assistant-Engineer (First Class)—Oscar G. Egan, to the Penelope.

Clerk—Alfred Bourchier, to the Crocodile.

ACHILLES, Capt. Sholto Douglas. The *Hampshire Telegraph* says:—"The Achilles seems to have been getting into trouble lately, for after breaking away from her moorings and falling foul of the training-ship Conway, she nearly made the Valorous wear an altered appearance by swinging round upon her; but in this case, if anyone made a mistake, it was the Valorous, which took up her quarters too close to the lengthy Achilles. The repairs to the three ships named, for they are all somewhat damaged by their rubbing together, will cost a few hundreds."

ACTIVE, Capt. Sir William Hewett, K.C.B., V.C., was paid off on Thursday at Portsmouth, all standing. She is placed in the First-Class Steam Reserve, ready for being recommissioned by Capt. Boxer.

ALEXANDRA, Capt. R. O'B. FitzRoy, bearing the flag of Vice-Admiral G. T. P. Hornby, was at Malta on April 6.

AMETHYST, Capt. A. J. Chatfield, temporary flagship of Rear-Admiral de Horsey, was at Valparaiso on March 3.

PALBATROSS, Com. E. Rice, had relieved the Daring at Panama.

ANTELOPE, Lieut.-Com. E. Wingfield, has received orders to take on board Mr. Layard, who will embark at Marseilles on Monday next for Constantinople.

ARAB, Com. F. S. Broughton, arrived at Trincomalee on March 10 from Rangoon.

ASSISTANCE, Capt. Prattent, left Portsmouth on Thursday evening for Queenstown to embark a regiment from Limerick.

BARRACOUTA, Capt. C. E. Stevens. The court-martial upon Capt. Stevens resumed its sittings at Sheerness on Monday afternoon, after an adjournment for the purpose of allowing the prisoner to prepare his defence. This defence was read by Capt. Blake, as the prisoner's "friend." In it Capt. Stevens said the evidence disclosed much for which he felt the deepest regret, but he hoped to undo any unfavourable impression produced on the minds of the court and to convince the court that, however unwise and harsh his conduct and bearing might have been, he was not guilty of the malicious and cruel conduct charged against him. Though he was the prisoner, Paymr. Gain was also virtually upon his trial, and his honour and his future were perhaps equally at stake with his own. The prisoner went on to maintain that he was not, as had been represented, the cruel persecutor of a sick man; that the evidence was consistent with the fact that he had no knowledge of Mr. Gain's health; and that the doctor never made known to him, directly or indirectly, that Mr. Gain was suffering from his treatment, but, on the contrary, had assigned quite another cause for Mr. Gain's illness—dyspepsia. Prisoner now admitted that he was altogether wrong in supposing that Mr. Gain was an unnecessarily long time on the sick list, and he now deeply regretted that he had not this knowledge at the period of Mr. Gain's illness. But he accused Mr. Gain of being dilatory, litigious, and negligent in discharging his duties as paymaster, and said he should produce ample evidence on this point, and should also show on Mr. Gain's part "a morbid, litigious spirit" towards him before any of the harsh treatment alleged against him. Prisoner then went minutely through the evidence, endeavouring to show that, on the whole, the orders he had given were justified by the circumstances. In conclusion, Capt. Stevens said that what he asked from the court was not mercy or sympathy, but simple justice. He believed that had it been known at the court of inquiry that he was not aware of the pitiable condition of Mr. Gain he would have been spared the pain and ignominy of being tried upon these dreadful charges, which had been all the more painful to him because he felt that he was not guilty of them. He then proceeded to answer the charges brought against him. With regard to the first charge, he unquestionably gave the order for the £30, but he did not direct it not to be entered in the cash account because the commodore refused his application for an advance for the entertainment of the Governor of Fiji. That he should have money for the purpose required was wholly in accordance with the Admiralty instructions, and was to further the carrying out of precise orders from his senior officer. He had no reason whatever to be clandestine in the matter. The second, third, and fourth charges arose out of seven charges preferred by him against Mr. Gain, which charges he submitted with Mr. Gain's letter of explanation to Commodore Hoskins, who called upon Mr. Gain for a further explanation and then referred the matter to the Admiralty, who directed an inquiry to be held on the Barracouta's arrival at Portsmouth. Except when he was under examination he was not present at the inquiry; had he been present all the time he felt convinced that he would not have been subjected to the terrible ordeal he was going through. It was true that he submitted the charges against Mr. Gain, with his own comments, but he also, at the same time, submitted Mr. Gain's statement. The statement he placed before the commodore was not a mere *ex parte* one, and this alone, he contended, showed that the malice and falseness which were the substance of the three charges against him did not exist. He did not when preferring the charges know them to be false. He could now see that it would have been wiser for him not to have charged Mr. Gain with endeavouring to obtain his signature to a false document, but, at the time, he had fully believed that Mr. Gain did intend to do so. Respecting the third charge, he submitted that there was not one tittle of evidence against him. He submitted that he had shown conclusively that his conduct was not such as was set out in the third charge. As to the fourth charge, he did not know that Lieut. Maxwell took upon himself the responsibility of supplying the Sapphire with rum. With respect to the other charges, he gave all the orders, considering that circumstances justified them. With regard to the memos., he contended that those which were put forth for his condemnation were evidence of his justification, and he requested the court to examine them, as he believed that they would show the painstaking way in which he did his duty, and required the work of the ship to be done. And now he earnestly asked them to pay the greatest attention whilst he went into the entry in the log as to the loss of arms, which entry Lieut. MacLeod refused to sign. Lieut. Wonham's evidence might remain in the minds of the court, as it certainly would in the minds of the public from the reports in the papers, that he ordered a false entry to be made in the log as to the loss of arms to cover his detaining carbines in his own possession. He had protested against this evidence being taken, as it was not relevant to any of the charges. The first principle of the law of evidence—by which courts-martial as all other English courts of justice were bound—was that evidence should be confined to the points at issue. The grounds for this principle were obvious—it arose from the very object of courts in receiving evidence which was to discover the truth as to the question of facts involved in the charges before them. All testimony should be rejected that was foreign to the charges. This rule, it had been laid down, could not be too strongly insisted on at courts-martial, and deviations from it, besides being illegal, might tend to prejudice and mislead. He would show now in his case an unjust prejudice had been done. If the prosecution believed that there was even a *primâ facie* case against him for such despicable conduct as appropriating arms and trying to screen the theft by ordering a false entry to be made in the log—if there was any evidence against him as to such conduct—it should have been made a charge against him. As it was not a charge against him, any evidence as to the matter was illegal and cruelly unfair. He could only excuse the prosecutor bringing the log entry before the court on the ground that he really believed that he (prisoner) was guilty of the malicious falseness and cruel persecution charged against him, and that this being so he could not make him blacker, even if he managed to get evidence tending to show that he was also a thief who would try to screen his theft by making an accomplice of the log. He felt strongly on the matter, because of the injustice and illegality that had been done him in not having the charge distinctly preferred against him, although evidence had been heard relating to it, and not from any doubt of being able to show that there was nothing whatever blameable in his doings with regard to the entry in the log. The carbines were in his possession, but they were not the arms referred to in the entry; they were carbines he was taking from the American Consul at Apia, Samoa, to his colleague at Auckland. He had the correspondence and receipts, and would do his utmost to have the matter properly sifted, so as to show that there was no shadow of ground for any imputation against him as to it. He would beg them to endeavour to remove from their minds the impression the evidence as to the log entry must have made upon them—made so unjustly as well as illegally. It seemed to have been thought that such evidence might be received to enable them to judge of the credibility of a witness, but except Mr. Gain, who, as he must show, was not fully trustworthy, he had not questioned the credibility of a single witness, and Mr. Gain had nothing to say or do in this matter. He confidently hoped that they would not allow their judgment to be biassed by this illegal evidence; but how was he to remove the grievous injury done him by its publication to the world? He said broadly that he accepted the facts given in evidence, except Mr. Gain's, although he did not accept the inference that might be drawn from those facts. On Tuesday Mr. J. D. Courcey, clerk in the Accountant-General's Department, produced a number of letters referring to various accounts. He certainly did not consider the irregularities in the transmission of cash documents from the Barracouta had been more than from any other ships of the fleet generally. Mr. Herbert Edward Rudge, assistant-paymaster of the Barracouta, said that when prisoner sent for Mr. Gain for documents or other information he always asked his questions quietly, and Mr. Gain often answered hastily and unsatisfactorily. Witness did his work in the captain's cabin, which was his office, although he had an office provided. Prisoner's general tone to Mr. Gain was severe. Mr. Gain's manner was always a source of irritation to prisoner. Witness had complied with the instructions which directed him to assist the paymaster in all his duties, and he did not wish to modify that statement. Had said at the court of inquiry that Mr. Gain's general manner to prisoner was respectful, but did not remember adding that prisoner's manner was irritating. He assisted to draw up the charges against Mr. Gain as far as putting the leading headings. Witness acquiesced in three of them being framed under the 28th section of the Discipline Act, which meant dismissal from the Service, with or without disgrace, if he were found guilty. On Wednesday the Court sat at 10 a.m. and deliberated until 4 p.m., when the court was re-opened and the witnesses called in. The Deputy Judge-Advocate, Mr. Eastlake, then read the charges, and said that, having heard the evidence in support of the said charges, and also that which the prisoner had offered on his behalf, the court were of opinion that each of the eight was proven, and the sentence of the court was that the prisoner be dismissed her Majesty's Service. The court desired to express disapprobation of the manner in which Mr. Rudge, the assistant-paymaster, a witness for the defence, had given his evidence, and considered it was untruthful, and was intended to mislead the court. The Barracouta will be paid off to-day.

Britannia, Capt. W. Graham. We regret to hear that Mr. William Read, naval-instructor of this ship, died suddenly on Monday last.

Bullfinch, Com. R. M. Lloyd, returned to Port Royal on March 22, from the Cayman Islands.

Conflict, Lieut.-Com. J. G. Musters. The Hankow arrived on Feb. 13 with the new crew of the Conflict, and she was recommissioned on Feb. 13.

Coquette, Lieut.-Com. E. Shirley, left Malta on April 4 for the Coast of Syria, to relieve the Torch, calling at Candia.

Cruiser, Com. J. Hext, left Malta on March 28; and left Syracuse on April 2 for Corfu.

Daring, Com. J. G. Hanmer, had left for Realijo, and would afterwards proceed, calling at some Mexican ports to Esquimalt, where she should arrive by April 1.

Devastation, Capt. F. W. Richards, was in harbour at Malta on April 6.

Eclipse, Capt. G. E. Erskine, was at Antigua on March 25.

Euphrates, Capt. W. H. Cuming, left Bombay on the afternoon of the 12th inst.

Fantome, Com. T. M. Maquay, was at Honolulu on Jan. 1.

Fox, Staff-Com. J. G. Dathan, will be delayed longer than was anticipated at Devonport for the purpose of having a cabin fitted for the use of the engine-room artificers.

Helicon, Lieut.-Com. R. W. Stopford, which had received orders to proceed to Marseilles to convey Mr. Layard to Constantinople, had scarcely got out of Malta, says the *Western Daily Mercury*, when a stoker discovered smoke arising from the neighbourhood of her keelson. It having been found impossible to extinguish the fire, the ship was immediately put back into port, and thence into dry dock. Water was copiously pumped into her, and after a considerable amount of smouldering, the fire was got under. On an examination it was found that her keelson had been on fire. The Antelope, Lieut.-Com. J. C. Burnell, was therefore substituted for the Helicon, and on Monday was at Marseilles to embark Mr. Layard and suite. The damage to the Helicon is said to be trifling. The Helicon will be ready to leave Malta about May 7.

Hercules, Capt. Bowden-Smith, flagship of Admiral the Hon. Sir J. Drummond, K.C.B., late Commander-in-Chief of the fleet in the Mediterranean, arrived at Spithead on Tuesday afternoon, and exchanged the customary salutes with the Duke of Wellington. Admiral Elliot went to Spithead in his yacht, and Sir James Drummond returned with him, and, landing at the dockyard, proceeded to the Admiralty House, remaining for the night as his guest. The Hercules will be ready to pay off on the 30th inst.

Himalaya, Capt. E. White, is expected to arrive at Devonport during the last week of May.

Hotspur, Capt. T. M. Jones, sailed on March 29 for Tripoli and Bengazi, &c., and will return to Malta by April 12.

Indus, Capt. C. Curme, flagship of Rear-Admiral Willes. The Admiralty has directed Capt. Curme to proceed to the Clyde for the purpose of making arrangements for the fittings, cabin accommodation, &c., of the Northampton and Nelson.

Industry, Staff Com. Dyer, has received orders to proceed to Portsmouth to take in stores for Ascension and supernumeraries for the West Coast of Africa. She left Portland for Portsmouth yesterday.

Jackal, Lieut.-Com. H. A. Digby, was to leave Rothesay at noon on the 11th for Devonport.

Jumna, Capt. J. D'Arcy, arrived at Plymouth on the 13th inst., at 5.45 a.m.

Modeste, Capt. A. Buller, C.B., has been ordered to Kagosima for information, and to afford protection, if necessary, to the few Europeans fulfilling engagements there.

Opal, Capt. F. C. Robinson, was at Callao on March 14.

Osborne, Com. H. L. Pearson. H.R.H. the Princess of Wales arrived at Brindisi on Sunday evening and embarked in the Orborne, which left at midnight for Athens, where she arrived the day following.

Pallas, Capt. H. H. Beamish, was at Smyrna on April. 6.

Plover, Com. H. B. Stewart, returned to Port Royal on March 20 from the Spanish Main.

Rapid, Com. E. C. Drummond, sailed on March 24 for Constantinople, she would send the Bittern to Malta to refit.

Raleigh, Capt. G. Tryon, C.B., was at Salonica on April 6.

Research, Capt. H. Earle, was at the Piræus on April 6.

Resistance, Capt. C. W. Hope, was taken into the South Basin, at Keyham, on Tuesday, to be docked, to have defects made good.

Rifleman, Com. F. S. Clayton, was doing duty as senior officer's ship in the Persian Gulf up to March 19.

Rocket, Lieut-Com. C. R. Harris. A telegram from New York on Saturday states that according to the accounts brought by the Rocket of the circumstances attending the loss of the American steamer George Wright and the murder of her crew, a boat load of people, the survivors from the wreck of the vessel, were massacred for their money while asleep by some Kimgut Indians, who were guiding them to Fort Rupert. Four of the Rocket's crew, who were landed at the Indian village, demanded the surrender of the four men who committed the murder. The Indians showing fight, the sailors made a dash, secured two of the murderers, and brought them off to the gunboat under fire. Lieut. Harris, commanding the Rocket, gave the Indians time to surrender the others, but they did not keep faith, and fled from the place.

Rupert, Capt. H. J. Grubbe, C.B., will probably be ready to leave Malta by the end of April.

Salamis, Com. F. W. Egerton, has had her orders for the Mediterranean countermanded.

Sappho, Com. Noel N. S. Digby, was released from quarantine on Feb. 12, and was to be sent to Auckland, after inspection, with supernumeraries for the Sapphire; she will then cruise to Samoa and among the South Pacific Islands.

Serapis, Capt. G. D. Davidson, arrived at Suez on the 11th inst.

Spartan, Capt. R. E. Tracey, was at Bombay on March 19.

Swallow, which will be commissioned by Com. John B. Warren for service on the South-East coast of America, had her machinery tried on the measured mile on Friday last week, under the superintendence of Capt. Waddilove and the officers of the Portsmouth Steam Reserve. During her detention at Portsmouth the Swallow has undergone so thorough an overhaul that she has been all but rebuilt. Her machinery at the trial worked very satisfactorily. The nominal power of the engines is 160 horses, and the power indicated was 421·42 by the starboard, and 413·79 by the port, making the highly satisfactory total of 835·21 horses. The speed realised was 10½ knots. The half-boiler runs gave a speed of 8·530 knots per hour.

Swiftsure, Capt. J. K. Baird, returned to Malta on March 29, and would be ready for sea at the end of April.

Sultan, Capt. H.R.H. the Duke of Edinburgh, with her Royal and Imperial Highness the Duchess of Edinburgh on board, left Malta on Monday morning for Villafranca. The Antelope, with the suite of her Royal Highness, accompanied the Sultan. A Royal salute was fired as the Sultan left the harbour.

Thetis, Capt. T. Le Hunte Ward, will leave Malta for England about April 26. A correspondent, writing to the *Times*, under date, Malta, April 3, says:—"Permit me to correct the numerous erroneous accounts which have appeared in the newspapers relating to the accident to her Majesty's ship Thetis by a very brief statement of facts. The ship left Port Said on Feb. 21, having on board three weeks' provisions. On the night of Feb. 28, about half-way between Port Said and Malta, her screw broke down, and the remaining part of the voyage had to be performed under sail against westerly winds, which prevail at this season. On March 5, as a measure of precaution rather than from necessity, we purchased supplies equivalent to about three days' provisions from a passing steamer. On the 14th, in consequence of the unusually slow progress which the ship was making, the crew were placed on a reduced allowance of provisions, and this was continued till the 17th, when we fell in with her Majesty's ship Devastation, by whom we were towed into Malta on the evening of the same day."

Torch, Com. R. H. Hamond, will come to Malta from the Coast of Syria.

Tourmaline, Commodore F. W. Sullivan, C.B. A letter from this ship, dated Simon's Bay, March 11, which has appeared in the *Times*, gives a lamentable account of the vessel. The writer says:—"Before leaving Sheerness we had a hot bearing at the trial trip, and the dockyard people having put in a little white metal where it had run, we started for Portsmouth. We had to anchor off Deal, partly through bad weather and partly because the bearing again got hot. Even now it is impossible to keep it thoroughly cool. Then the receiving tank, the only place whence we can get water to feed the boilers, except from the donkey, burst, so that we were compelled to use salt water. After leaving Portsmouth we got into very bad weather. The result was that the water could not be kept in the boilers, and the engines stopped all at once in consequence of the priming. When we succeeded in starting her again she only made a few revolutions, when bang went the trunk on the after cylinder. The spare one was shipped while the vessel was rolling to such an extent in the bay that it was as much as one could do to keep his feet. The work was finished by 8 o'clock in the morning, but the vacuum went down to seventeen, where it remained in spite of all our efforts. The condenser doors having been taken off, we found that about seven or eight hundred tubes had been driven right out to the doors, and more than a thousand an inch out. The engineers were engaged five days, watch and watch, in putting the worst of them right. Well, the low-pressure engine had never done its work at all, the high-pressure engine having performed the whole of the duty out; and during the whole of this time we were burning six, seven, and occasionally even nine pounds of coal per indicated horse-power. Then, again, the eccentric rods are only 22in. long by 3in. broad, and they have to drive such heavy slides—the low-pressure one weighs 1 ton 16 cwt.—that it wears away the liners, which are ⅛in. thick, in about twenty-four hours' steaming. We have had to put in six spare ones, four of which were made out of boiler tubes. There was very little of them left when we got in here. There was also a difficulty with the piston. The engineer put some new springs into the low-pressure piston, thinking that might do some good, but the morning after they were put in the engines could not be turned, and the springs had to be taken out again. Besides other defects which it is not worth while saying anything about, the propeller has been a great source of anxiety to us all. We have been four hours in endeavouring to get it up, and as to lowering it, we could never depend upon its going down without having to move the engines backwards and forwards about a dozen times. The shaft always works forward, so that we had to slack the thrust-bearing block bolts and screw up the set bolts to bring the shaft back every time we got under way, as it interfered with the lowering of the propeller. Ever since the ship was commissioned the T head of the propeller was too long, so that it sticks every time that we raise or lower it. When the ship has a list to either side it is impossible to get it down at all. Such a ship was never before sent to sea in such a state. There is a separate engine and a helical pump on board, and as the upright spindle had never been packed and the bush had only a plain pin half-way in the casting and half in the bush, and as it, moreover, turned round with the spindle, there were no means of lubricating it, and the noise which it made was terrible. The only way in which we could stop it was by opening the exhaust into the condensers, and the oil used to go up to it in that fashion; but, on account of the tubes leaking, the water got back into the helical engine and nearly stopped it, and, of course, destroyed the vacuum. We have had the most part of our machinery on shore at the dockyards. We have had to put new lines on the bottom of the guide blocks, as they were worn ¼ of an inch, and the piston-rod glands would not go on. On taking off the cylinder covers to turn up the piston, the support was found to be cracked. It had, therefore, to be unshipped, and a spare one introduced. You will have heard that our chief engineer cut his throat on Jan. 27 and died on Feb. 2, after having the wounds sown up at Simon's Bay. The noise of the eccentrics disturbed his rest, and he often thought that something was going wrong. We leave for a cruise up the coast on April 17, which will probably last about three months, after which we shall remain here for the rest of the year." With reference to the above, Messrs. Hawthorn have written to the *Times*, as the manufacturers of the machinery, as follows:—"Your correspondent describes a series of incidents connected with the working of the machinery during the voyage from Sheerness to the Cape station in such a manner as shows clearly to those acquainted with the subject that he is not an engineer, and has only a very imperfect knowledge, if, indeed, he has any, of the matters on which he presumes to write. As regards ourselves, as the constructors of the machinery, it is sufficient to refer to the two years' hard work in commission of her Majesty's ships Diamond and Sapphire, the machinery of both of which ships was made by us, and has worked throughout most satisfactorily, and is identical in power, design, and construction with that of the Tourmaline; and also to the very satisfactory trials (recorded at the time in your journal) and the examinations after the trials of the engines of that vessel before the ship left England on her commission. We may venture to remark that but for the lamentable death of Mr. Pitt, the chief engineer—an occurrence which, from our long and intimate personal acquaintance with him during his superintendence of the construction of the machinery of his vessel, and our great respect and esteem for him we deeply regret—we believe nothing would have been heard of this matter."

Triumph, Capt. G. H. Parkin, has been inspected at Portsmouth by Admiral George Elliot, Commander-in-Chief. She will be ready to pay off on Thursday, 26th inst.

Undaunted, Capt. H. W. Brent, flagship of Vice-Admiral Sir R. Macdonald, K.C.S.I., was at Bombay on March 19.

Valorous, Capt. L. F. Jones. The Royal Society has published the reports on the biology and physics of the cruise of this ship in the Arctic Seas. It will be remembered that when the Admiralty determined to send H.M.S. Valorous to Greenland as a storeship to the Arctic Expedition of 1875, Dr. Gwyn Jeffreys volunteered his services as naturalist, and secured the services of Mr. H. P. Carpenter as assistant. The latter took special charge of the physical observations, which are here reported on by his father, Dr. W. B. Carpenter, while Mr. Gwyn Jeffreys treats of the biological results. The Valorous collections contain no less than 339 species of marine animals, of which 126 had not previously been recorded from Davis Straits, and both the biological and physical results will be of special value as a connecting-link between the observations of the Challenger and those of the Alert and Discovery.

Vernon, Capt. W. Arthur. The following officers have joined the Senior Torpedo Class on board:—Capts. the Hon. V. Montagu, J. G. Mead, C. J. Vidal, E. J. Pollard, C. E. Buckle, H. B. Woolcombe, R. P. Dennistoun, G. R. Hope, C. G. S. Knowles, C. E. Foot, R. Carter, the Hon. E. R. Fremantle, C. C. Rising, and F. Stirling; Commanders R. S. Hunt, J. H. Bainbridge, J. Brown, J. S. Eaton, H. H. Edwards, F. Rougemont, the Hon. H. H. A'Court, R. Evans, T. P. W. Nesham, and J. W. Brackenbury; Lieuts. A. M. Cawston, H. G. Giles, H. N. Alleyne, W. H. Annesley, W. Farr, S. W. Thompson, H. G. Bird, J. P. P. Coote, R. C. Gorst, and A. W. S. Douglas.

Vestal, Com. H. Hand, was at Jeddah, according to latest advices.

Wolverene, Commodore Hoskins, has been released from quarantine, the infected seamen having recovered. The neighbourhood in which the first death from small-pox occurred, and which had been quarantined, has also been released. After the Wolverene was refitted the commodore intended to leave Sydney for a cruise.

Wye, Staff-Com. W. W. Vine. The London correspondent of the *Hampshire Telegraph* says:—"Some of your readers will doubtless remember that the Wye was fortunate in being able to render some assistance to a trading-vessel in distress about nine months ago. The owners, or those supposed to be interested in the ship and her cargo, have not marked their appreciation of the services thus rendered, and I am glad to find that the Admiralty have informed Staff-Com. Vine that he is at liberty to prosecute his claim for salvage. It is to be hoped that the Court will award something substantial for the trouble to which the Wye has been put."

Zephyr, Lieut.-Com. W. G. Le Cocq, was at Nassau on Feb. 24.

The Iris, 10, double-screw steel despatch vessel, was launched at Pembroke on Thursday. She is in length between perpendiculars 300ft., breadth 46ft., draught of water forward 17ft. 6in., aft 22ft., 3,693 tons displacement, nominal horse power 7,000, estimated speed per hour 17½ knots, or 14 at half power. She will carry 500 tons of coal, eight 64-pounder side guns, and two 64-pounder revolving guns, and has a complement of 250 officers and men. Her spars, rigging, boats, and stores are to be provided at Devonport, but she will be sent to Portsmouth to complete for sea. Her sister ship, the Mercury, also building at Pembroke, is to be advanced 52-100 tons this year.

Epps's Cocoa—Grateful and Comforting.—"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected cocoa, Mr. Epps has provided our breakfast tables with a delicately flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—*Civil Service Gazette.* Made Simply with Boiling Water or Milk.—Sold only in Packets labelled—"James Epps & Co., Homœopathic Chemists, London."

ADMIRALTY CIRCULAR.

The following Fleet Circular, No. 7, of March 20, granting increased pay to certain classes of artificers of the Navy, has been issued by the Admiralty:—

Her Majesty having, by an Order in Council, sanctioned an increase in the pay of the undermentioned artificers, and the establishment of a new class of skilled shipwright artificers (workers in iron and wood) for employment in iron ships, my Lords Commissioners of the Admiralty are pleased to issue the following regulations:—

1.—Increased Pay of Artificers.

	Continuous Service.		Non-Continuous Service.	
	From	To	From	To
	s. d.	s. d.	s. d.	s. d.
Caulkers	2 9 a-day	3 0 a-day	2 6 a-day	2 9 a-day
Caulkers' Mates ...	2 3 "	2 6 "	2 0 "	2 3 "
Carpenters' Crew	1 11 "	2 4 "	1 8 "	2 1 "
Coopers	2 6 "	3 0 "	2 3 "	2 9 "
Armourers	2 8 "	3 0 "	2 5 "	2 9 "
Armourers' Crew	1 8 "	2 4 "	1 5 "	2 1 "
Coopers' Crew......	1 8 "	2 4 "	1 5 "	2 1 "

2.—New Class of Skilled Shipwright Artificers for Iron Ships.—Pay.

	Continuous Service.	Non-Continuous Ser.	Rating.
	s. d.	s. d.	
3rd Class ...	4 0 a-day	3 9 a-day	Shipwright (skilled).
2nd Class ...	4 6 "	4 3 "	Carpenters' Mate (skilled).
1st Class ...	4 9 "	4 6 "	Chief Carpenters' Mate (skilled)

Men must provide their own tools, and no tool money will be allowed.

3.—Qualifications.

3rd Class.—Must be able to work in iron and wood, and pass at one of the dockyards, *i.e.*, Sheerness, Chatham, Portsmouth, or Devonport.

2nd Class.—Must be able to work in iron and wood, and pass the requisite examination.

1st Class.—Must be able to work in iron and wood, and pass an examination equivalent to that for carpenter.

4.—Entry.

All men from the shore must enter in the 3rd Class, and non-continuous service men must enter for four years certain. Chief carpenters' mates at present in the Service will be eligible for the 1st Class provided they can work in wood and iron and have passed for carpenter. Carpenters' mates at present in the Service will be eligible for the 2nd Class, and shipwrights' and carpenters' crew will be eligible for the 3rd Class, if they can pass the qualifying examination in wood and iron.

5.—Advancement.

Men in the 3rd Class will be eligible for promotion to the 2nd after one year's service, provided they pass the requisite examination and there are vacancies; and men in the 2nd Class will be eligible for promotion to the 1st Class after one year's service in the 2nd Class if they have passed an examination equivalent to that for a carpenter and there are vacancies.

6.—Uniform.

3rd Class.—Jacket, long, blue cloth; waistcoat, blue, single-breasted; trowsers, blue or white, according to the time of year; cap, plain blue cloth, with a leather peak. 2nd Class.—The same, with the addition of a 1st Class petty officer's badge. 1st Class.—The same, with the addition of a chief petty officer's badge, but with gilt buttons on the jacket and waistcoat, patterns of which will be kept at the ports.

7.—Pensions.

These skilled artificers will be allowed to remain in the Service until they reach the age of fifty, if physically fit, but will not be allowed to draw any pension whilst serving.

8. These regulations will take effect on April 1, 1877.

By command of their Lordships,

Robert Hall.

IMPERIAL NAVAL VOLUNTEERS.

This corps, originated by Nav.-Lieut. Percy James, has now been formed at Bombay. At a meeting, held on board the turret-ship Abyssinia, the report of the committee appointed to draw up the conditions under which the Volunteers would serve, and a code of rules, was read and unanimously approved of. A very judicious code of rules and regulations for the guidance of the Volunteers were made by the committee, in which disobedience, continued absence from drill, and other derelictions from duty are all provided for. Volunteers guilty of offences unbecoming the character of a member of that body are liable to courts-martial and having their names sent in to Government if struck off the roll. The punishment of a Volunteer can only be upon the unanimous vote of two-thirds of the whole corps, all of whom subscribed to the following conditions under which they agreed to perform their duties:—1. We, the Imperial Naval Volunteers of Bombay, are willing to perform the following duties:—2. To fight in one of the Indian Government turret-ships for the protection of Bombay. 3. That we willingly place ourselves under the immediate orders of the officers selected by us, and cheerfully obey their orders to the best of our abilities. 4. We will do our best to attend punctually, once a week, the drills, practice, or exercises, except prevented by sickness or other unforeseen circumstances. 5. That we will be ready to obey the call of Government in any emergency that may arise; and will cheerfully obey the orders of any superior officer whom Government may be pleased to appoint over us, during any such emergency. 6. That we will obey the rules and regulations drawn up for our guidance. 7. And we will be ready and willing to fight for our Queen and Empress, and risk our lives for our country's sake. 8. We expect Government to assist and encourage us—1st. By allowing us to assume the title of the Imperial Naval Volunteers of Bombay. 2nd. By allowing us the use of a turret-ship three days in the week for drill or practice. 3rd. By allowing us the services of a qualified instructor. 4th. Granting us the use of cutlasses, rifles, revolvers, single sticks, ammunition, and targets for drill and practice. 5th. Boats to convey us to and from the ship. 6th. And a small allowance for stationery and printing.

A correspondent of the *Hampshire Telegraph* states that another lieutenant has disappeared from the list of those studying at the Royal Naval College, and was told that the reason given for requesting him to remove himself was that he had been guilty of some "impropriety" in the mode of answering the questions set before him.

NAVAL ENGINEERS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—With that spirit of fair play journalists generally accord to both sides of a question, will you permit me to point out the fallacies contained in the article under this title in the Army and Navy Gazette of April 7, showing that, no doubt though written *bonâ fide*, it carries on the face of it the marks of being written by one completely ignorant, at first hand, of an engineer's duties, and of the knowledge required of him in 1877. I could enter into a long disquisition disproving the fitness of the simile of an engineer bearing much the same relationship to the builders of the ship and machinery and the naval executive that the man who cleans and loads a fowling-piece bears to the maker of the gun and the sportsman who directs it. But to save time and space, I will take up the simile on its own ground and disprove it. First, The "man who loads," &c., is not of necessity a gunmaker; if the lock blows off his master tells him to take it to the gunmakers. Now, here is the point where your simile fails. The naval engineer is the gunmaker; he has (according to his rank) to know how the typical "gun" is made. As far as one pair of hands goes, he is supposed and required to be able to make it, that the workmen in the shop can only do that one for one. He must understand how to remedy all accidents that occur to the "gun," as far as the means carried on board ship extend, and they are pretty extensive in large ships now-a-days. Not only that, but he must even be capable of planning substitutions, to enable the "gun" to shoot without the sportsman leaving the moors; in other words, sending the ship to a dockyard. In fact, he has to have all the knowledge that would or ought to enable him to design a pair of engines, if he had the factory to make them. So much for the head. As to the hands of the "gun maker," they are at work in one way or other always. Where is the "loader and cleaner" that does the following—Can design a gun, can make with his own hands the working parts, can give a correct description of the various kinds of powder used, can draw up a report of various trials of "guns"—in fact, do anything about it, if he has only means. I don't think such a man would be found dancing after a sportsman at a trifle a-day. Well, if you turn to the knowledge required, to be found in the "Navy List" or circulars, or, far better, to be learnt in a general visit through numbers of ships in the fleet, you will see the fallacy of putting the present naval engineers in the position of "the man," &c. Were we merely what is technically known as "drivers," your simile might approach the truth, though even then from the extent of work it would be unjust. Now for the *imperium in imperio.* After twenty-two and a-half years in the Navy, I have retired from it solely because of the existence of the system your "leader" advocates. It is just that very system of having the stokers here one day and there another that breaks (or tends to break) your engines down. To enter into details would be useless, as a real practical engineer knows all about it, and an "outsider," even a deck lieutenant, knows practically nothing, far less the general public. If you desire testimony, read the *Engineer* of Jan. 26, 1877. As I have by me, in writing, the events of twenty-two years in my own experience of this accursed system, and the dangers likely to arise to public property on the one hand, and the gross injustice it inflicts on the chief engineer or engineer in charge on the other, I am not disposed to alter my opinion on the point of "letting the chief engineer have his own men to do his own work" for the entire Board of Admiralty. As to executives working our engines, see the result in the American Navy. They tried it for three years, and gave it up. I have spoken on this matter to American engineers and our own merchant engineers in the largest steam companies, and their opinion is that it would be ludicrous only for the serious results that might fall on the chief engineer. It is the gross injustice of making the man answerable to two masters who care not for each other. All naval engineers know what I am talking about. I have left a situation of £350 a-year and good prospects owing to it, if that is any proof of my sincerity. Lastly, for once a "deck-hand" helps a stoker the reverse is the case a hundred times. The "deck" man is paid extra on these occasions, but not the stoker. And when we do get deck hands they are generally "boys" or inefficients on deck. I merely sketch out these subjects so as to give the detail proofs. The Editor must give me the use of his paper, all to myself, for two months. I am open to prove all I say if any editor will print it.—I am, &c.,

Charles James Inches,
Retired Chief Engineer.

[Mr. Inches may be surprised to hear that the article in question was written by an officer of longer and more recent experience than himself, but not an engineer.—Ed. A. and N. G.]

The Admiralty have ordered a searching investigation to be made into the circumstances attending the accident which occurred to the rudder of the Téméraire, ironclad ship, on the occasion of the attempt made to fix the rudder on the vessel in dock at Chatham. From circumstances which have since transpired it is believed the rope—which was a new one and used for the purpose the first time—was maliciously cut by some unscrupulous person. The rudder has been repaired and the damage it sustained made good previously to its being fitted.

At a meeting of the Society of Engineers, on Monday evening, a paper on the "Priming of Steam Boilers," by Mr. Major, was read. The author first drew attention to the great uncertainty which prevailed as to the cause of priming. The case of the Serapis was mentioned, the speed of which ship, through priming, was reduced from 13 to 9 knots. The author then stated what he thought was the cause—viz, the friction of steam globules against impurities floating in the water. To overcome that, lubrication was needed. Tallow and oils had been beneficial for that purpose, but, unfortunately, had produced graver evils. Having tried many lubricants, the author found the purest rectified petroleum a perfect remedy, and he enumerated the advantages gained. He explained his mode of application by reference to drawings, and stated the satisfactory results. He mentioned two cases of collapsing of flues in consequence of thick coatings caused by fatty and other particles carried over from the surface-condenser, and preventing the access of the water to the internal parts of the boiler. He considered that this collapsing of flues caused the disappearance of many steamers, which were never heard of again. He pointed out, in conclusion, that the use of rectified petroleum would not give rise to such accidents.

THE RUSSIAN NAVY.

It is stated that the Grand Duke Constantine will take command of the Russian squadron in the Mediterranean this summer, and will hoist his flag on board the Prince Pocharski, a broadside ship, with an iron hull, plated with four and a-half inches of armour, and carrying sixteen guns. For some years past she has been laid up at Cronstadt on account of defective boilers, but every endeavour is being made to get her ready for sea by June. Increased activity is being shown in pushing forward the Peter the Great and other vessels in an incomplete state; but they cannot be ready for service before the end of the summer. An enquiry into the condition of the Navy has also been ordered.

The following is a list of Russian ironclads, taken from Von Schnehen's "Land und See Macht Russlands," published this year:—

Baltic Fleet.

	Guns.	Tonnage.
Peter the Great	4	9,665
Frigates.		
Sebastopol	28	6,275
Petropolowski	34	6,040
Prince Pocharski	16	4,505
Three-turreted Frigates.		
Admiral Lasarew	7	3,461
Admiral Greig	3	3,461
Two-turreted Frigates.		
Admiral Tschitschagow......................	3	3,492
Admiral Spindow	3	3,492
Single-turreted Frigates.		
Minin	10	5,740
Duke of Edinburgh	6	4,510
General Admiral	6	4,510
Batteries.		
Perwenetz	18	3,277
Nietronjmenja	19	3,340
Kremli..	23	3,412
Single-turreted Monitors.		
Ten—each	2	1,565
Gunboats.		
Three—each	4	1,881
Black Sea Fleet.		
Popowskis.		
Novgorod..	2	2,491
Vice-Admiral Popow	2	3,550

H.M.S. ORONTES.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—In your impression of the 7th inst. I have observed with regret an extract from a Mauritius paper reflecting on the character and alleged "improper" conduct of Captain Seymour, of the Orontes, on the occasion of his visit to that island in February last. As a personal friend of the gallant officer, I know him to be incapable of "off-hand or unfeeling proceedings," and, therefore, beg to lay before you the facts of the case. The Orontes was off Port Louis, Mauritius, early on the morning of the 16th of February, and at daylight steamed slowly towards the harbour, no one in the shape of a health officer making his appearance until the ship was in the Narrows, when it would have been dangerous to turn her head out. At this juncture a pilot hailed, to say that "he could not come on board until the ship had pratique." Soon afterwards another official came alongside and told the captain he could not enter without pratique; but the entrance being only some 200 yards wide, and the Orontes being 400 feet in length, there was nothing for it but to make for the buoy in the harbour, after which, the ship, having been placed in quarantine, she steamed out to the outer anchorage—not a man having had any communication with the shore during the short time she was at the buoy. I trust that this explanation will tend to remove any false impression that may have got abroad relative to Captain Seymour's proceedings on the occasion in question.—I am, &c.,

Fair Play.

The mistake which arose at Devonport Dockyard as to the instructions given for the ventilation of certain compartments of several ships in the Reserve is said (the *Western Morning News* states) to be partly attributable to the bulkheads not being plainly distinguished in the orders. To obviate the possibility of any similar occurrence in future it has been recommended that all watertight bulkheads shall henceforth have a distinguishing letter, which will also be marked on the plans of the ship at the Admiralty. Thus there will be no cause to fear a repetition of the blunder which rendered a number of ships easily sinkable.

A weekly paper is responsible for the following statement:—"The following appeared in the papers of a midshipman undergoing examination at Portsmouth for his sub-lieutenancy:—'Q. Demonstrate the resistance developed by a galvonometer when connected with a Daniell cell.—A. The dimensions of this most remarkable state-prison have not been handed down to posterity. It is, however, generally supposed to have been 40ft. by 30ft. by 20ft., and filled with lions. How the lions got there will probably never be explained. It is one of those things no person can understand, and is a remarkable proof both of the courage and the scientific knowledge of these heathens. The lions are now dead. So are the folk who put them there. *Sic transit gloria mundi.*' The student was plucked—which seems to me hard lines."

Committees are being formed in most of the large towns of the Netherlands with the object of "fitting out a suitable vessel for Nova Zembia and other stations of interest in the Arctic Regions." The avowed aim of the expedition is not the discovery of the Pole, but the erection of some unpretentious granite monuments to the memory of the glorious discoveries of the earlier Dutch navigators. About the end of the seventeenth century, "in the name and on behalf of the honourable Council of the renowned City of Amsterdam," Willem Barends set out on his third voyage, which ended in the explorer's wintering on Nova Zambla, whence he never returned. It is, above all, the memory of this Barends which the Dutch are about to honour. The costs of the expedition are to be defrayed by voluntary subscriptions, and the vessel will, in all probability, be commanded by a Dutch lieutenant who has taken part in three Arctic expeditions under the British flag.

The pictures and drawings by the late Robert Landells will be sold by Messrs. Puttick and Simpson on Friday, the 20th inst. They comprise many sketches taken on the spot, of the principal events in the European campaigns of the last twenty years.

PARLIAMENT.

CHIEF ENGINEERS.

On Monday in reply to Mr. Gorst, Mr. A. F. Egerton expressed regret that indisposition prevented the First Lord of the Admiralty from being present, and said that in the scheme for the promotion and retirement of naval engineers the provision by which all confirmed time from twenty years of age was to be counted would only in that rank apply to all chief engineers who had completed eleven years' service in that rank.

FLOGGING IN THE NAVY.

On Tuesday, Mr. P. Taylor called attention to the punishment of flogging in the Navy, especially in time of peace. The influence of public opinion had abolished it in the Army, and no evil result had ensued, and it was generally supposed that flogging was also abolished in the Navy. He complained that the limitation of the punishment to the offence of mutiny was so wide and general that it would include the most frivolous offences, so that practically any commander could inflict it summarily. He contended that the punishment was needless, that it had a most injurious effect on the character of the Service, and especially affected the voluntary entries of merchant seamen and others into the Naval Reserve. It was also grossly liable to abuse. He moved: "That, in the opinion of this House, the time has now arrived when the punishment of flogging in the Royal Navy should be altogether abolished."

Mr. A. Egerton opposed the motion, pointing out that flogging was not literally abolished in the Army, and under certain circumstances officers in command could inflict it summarily. He believed that it was now very rarely resorted to, but it would not be desirable to take away the punishment altogether.

The House divided; majority against the motion, 42.

THE CASE OF LORD COCHRANE.

Sir R. Anstruther moved for a select committee to inquire into and report upon the petition of Lord Cochrane, praying her Majesty to be graciously pleased to complete the gracious act of Royal justice which restored the late Lord Dundonald to his rank and honours. He reviewed at length the circumstances connected with the trial of Lord Dundonald, and complained of the bias shown by Lord Ellenborough and the severity of the sentence. The fine was paid by a penny subscription at the time, so strong was the feeling in his favour, and in 1832 Lord Dundonald was restored to his position in the Navy. He then referred to the official letter of Admiral Hall in 1874, as an acknowledgment of the justice of the prayer of the petition, and claimed the full restoration of the back pay of Lord Dundonald whilst he was deprived of his rank.

Mr. Walpole seconded the motion. The case was an unprecedented one, but it was desirable to do away with every trace of the political rancour with which this distinguished officer had been treated.

The Chancellor of the Exchequer said that he deeply sympathised with the object of the motion, but he wished to point out to the House the difficulties of acceding to it. He was most anxious to meet the wishes of those who supported the motion on both sides of the House. He yielded to none in his admiration of the distinguished services of Lord Dundonald, and in respect for the filial affection which had led his representative to bring the case before the House; but there were features in it which should induce the House to pause before they acceded to the motion. In many respects it would create a precedent of a very dangerous and inconvenient character. In the first place there was the interference with the Royal prerogative, which had already been graciously used in this case; and the House would be constituting itself a court of review. As a matter of principle, pay was never given to an officer who had not discharged any service. The case of Sir R. Wilson was not in point. The committee could only establish more clearly the facts, which no one now disputed, and the Government was quite willing to grant any papers which would more clearly do so. He, therefore, hoped that the motion would not be pressed. It was not desirable to revive the political feelings with which this case had been mixed up, for it would be subjecting those who voted against the motion to a painful ordeal, and a misconstruction of their reasons for doing so.

Dr. Playfair pointed out that both Parliament and the Government had admitted the injustice of the sentence and reversed it. They were not asked to interfere with the Royal prerogative, but to complete an act of justice which affected only the Treasury.

Admiral Egerton regretted the determination of the Government, and Mr. Butt and Sir G. Bowyer supported the motion.

Sir R. Anstruther said, from the feeling of the House, it was clear he could carry the motion; but he agreed that it was one on which it was not desirable to go to a division. He would willingly withdraw it if the Government would undertake, after the papers were produced, to take action by moving an address to the Crown.

The House was cleared for a division, but the Government did not call for one, and the motion was agreed to.

COURT-MARTIAL ON CAPT. STEVENS.

Mr. Pulston gave notice last night that on an early day he would move that the report of the proceedings of the court-martial on Capt. Stevens, of the Barracouta, be laid upon the table of the House.

THE COMMAND TO REGIMENTS.

General Shute gave notice that he would on Tuesday next ask the Secretary for War, in reference to his reply to the hon. member for Leitrim, to the effect that it was intended to adhere to the regulation limiting the command to regiments to a period of five years, whether he intended also shortly to carry out a similar regulation limiting Staff commands to Staff appointments to fixed periods.

TRANSIT OF VENUS.

Mr. Childers gave notice that he would, on Thursday next, ask the First Lord of the Admiralty when the result of the observations of the transit of Venus and the report of the expedition might be expected to be laid before Parliament.

ARMY COMMISSIONS FROM THE MILITIA.

Sir Joseph Bailey asked the Secretary for War whether it is intended, when the new competitive system came into operation on Jan. 1, 1878, to extend the age for superannuation in the case of candidates for Army commissions from the Militia.

Mr. Hardy said that the new system would not come into operation until Jan. 1, 1879. He hoped regulations would shortly be published dealing with the question of age and other questions relating to the subject referred to by the hon. gentleman.

RECRUITING FOR THE GUARDS.

Mr. Arthur Moore moved for returns of the actual total expenses connected with the recruiting of the Brigade of Guards for the last three years, including travelling expenses, pay, and allowances to the non-commissioned officers and men employed in the Service, showing the number of commissioned officers and men absent from their regiments during each year, distinguishing ranks, periods of absence, and amount of pay and allowances, and showing the number of recruits raised by them in each year, distinguishing the gross number of said recruits and those finally approved. Ordered.

ARMY MEDICAL DEPARTMENT.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Although doubtless you have been inundated with correspondence on the above subject after your excellent article of Jan. 27 last, I shall be obliged if you will give this letter a place in your paper, as I think it briefly represents all the requirements that should be given to attract good men under the altered conditions of the Service. Formerly a man studied for the Army Medical Service and was content with small pay, because he had an easy life and good social position in a regiment. Now he has anything but an easy life—no position, yet still the small pay—compared with civil life. If Government considers for certain reasons it is advisable to keep the Medical Service as a distinct unified department, by all means let it do so; but let every just cause of complaint be removed, and some other attraction be substituted for the loss of regimental appointments; and if, after all this has been done, good men do not come forward in sufficient numbers, then let the scheme be candidly pronounced a failure, and a radical change of system be introduced. It is certain good men will never enter the Service in numbers so long as those in it are dissatisfied to the extent they are with their position and treatment. The changes required are, briefly, these:—1. Abolition of the short service plan of 1876 Warrant. 2. Restitution of forage to all of field officer rank. 3. Allow exchanges, as in other branches of the Service. 4. A fair amount of general and sick leave. 5. Adequate allowance to compensate for the loss of regimental servants, as the 1s. a-day allowed to all ranks is quite absurd. In the Royal Engineers subalterns and captains receive 1s. 6d. a-day, field officers 3s.; but this, even, is admitted to be insufficient. A "servant's company" or two, attached to the Army Hospital Corps, might be an advantage. 6. Increased retirement. 7. Increased pay in the upper ranks. Without this there could not be increased retirement; besides, little or nothing has been done for the seniors lately—but much for the juniors—even to calling them surgeon-majors at twelve years' Service. 8. Definition of the different ranks, such as assistant-surgeon under six years, surgeon at six years, senior surgeon at twelve years, surgeon-major at twenty years.—I remain, Sir, your obedient servant, SURGEON-MAJOR.

India, March 6, 1877.

BRIGADE DEPOT ESTABLISHMENTS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—The question has been raised by a civil contemporary whether there is any necessity for sending such a large number of officers to "rust" at the brigade depôts for periods of two years, as the present arrangement provides for. No doubt it is a matter that might fairly be taken into consideration, and very probably would be if you could afford space to bring it forward in your influential military paper. That the officers have little or nothing to do, and that they are particularly rusty when they rejoin their regiment, is a fact beyond dispute; and it surely would seem sufficient just to call attention to the extreme disproportion which exists between the number of officers considered ample for a battalion and the quantity allotted to a brigade depôt, to ensure some alteration being carried out at once. A battalion with an establishment of 820 non-commissioned officers and men has one lieutenant-colonel, one major, and twenty-five other officers. A brigade depôt with an establishment of one hundred non-commissioned officers and men has one lieutenant-colonel, one major, and nine officers. Thus, if the depôt proportion were to be adopted throughout, the battalion should have at least eighty-eight officers. Doubtless, the depôts sometimes exceed the one hundred rank and file, but the recruits are usually sent off very early in their career to be drilled with the home battalion, and the brigade depôts have not—as the old depôt battalions had—even that duty to perform. But on what principle a battalion of 820 and a depôt of one hundred men are allotted an equal number of field officers is what "no fellow really can understand!" and it would seem most undesirable, too, even if some officers must "rust" at the depôt, that one of them should be the field officer, who might at any moment be promoted to the command of a battalion.—I am, &c., Z.

March 26, 1877.

The cost of the Army Purchase Commission for the year is £500,000. Compensation for sale of commissions is estimated at £474,380, being £16,620 less than the estimated and supplementary estimate for last year, and compensation to the Royal (late Indian) Artillery and Engineers, £20,000. An item of £2,400 for Gentlemen-at-Arms on retiring appears in the estimate for the first time. The total shows a net decrease for the year of £14,190.

The Berlin correspondent of the *Morning Post* writes:—"Major-Gen. Beauchamp Walker, who had been military plenipotentiary for thirteen years at the Court of Berlin, left here on Wednesday for Italy, from whence he will later on betake himself to England. The departure of the general, who, previous to leaving Berlin, was most graciously received by the Emperor and the Crown Prince, calls forth universal regret." With reference to the general's withdrawal, Mr. Hayter asked the Secretary of State for War on Monday whether it was the intention of her Majesty's Government to withdraw our Military Attaché to the Embassy at Berlin; and, if so, whether he could state the circumstances which had induced the Government to adopt that course. Mr. Hardy said: In reply to the question of the hon. gentleman, I have to inform him that we have not withdrawn our Military Attaché from the Embassy at Berlin. Gen. Walker has resigned the office he has held with so much distinction, but the Government have not come to the decision not to fill it up.

THE CURRAGH.

The camp is beginning to wake up again, and to be enlivened with the presence of troops. Detachments from various regiments are continually arriving for musketry practice, and the sharp crack of the Martini-Henry, and the "ping" of its bullet, may be heard all day at the ranges. The new system of conducting rifle practice is a marked improvement, and is, moreover, a great saving of time—and temper. Spring weather seems to have fairly set in, and it is very refreshing to see the green leaves on trees and hedges again. The golden yellow of the gorse bushes, for which the Curragh is celebrated, is really lovely to look upon. It is expected that a very large force will assemble here during the summer, and rumour fixes the number at 18,000 of all arms. The Militia will form a prominent part of this number, as eleven regiments will probably train here. A great addition has been made to the camp lately by the arrival of a depot battery of Artillery from Woolwich. They are stationed in A Lines, a portion of the Army Service Corps having been removed to make room. It is a great change from a busy and fine place like Woolwich to an isolated camp like the Curragh, but soldiers must take the rough with the smooth. The Cavalry are practising with the lasso, so some amusing scenes will probably be witnessed during the manœuvres. It will be rather fun to see a battery run away with by a troop of Cavalry. The 7th Dragoon Guards held their steeplechases at Newbridge a few days ago, and, notwithstanding the wretched weather, numbers of people were present. The officers displayed their usual hospitality, and, judging from the flow of people into their refreshment tents, the gallant Dragoons must be indeed popular. A few nights since the dramatic troop of the 75th Regt. gave an admirable theatrical entertainment. The acting was really excellent, and the dresses unexceptionable. This regiment has done a great deal to relieve the monotony of winter camp life. A great treat is in store for us all. The 4th Regt., assisted by two or three officers of other regiments, are to perform that very pretty piece yclept *Caste.* Judging from the cast, I have no hesitation in promising a great success. The 4th and 86th Regts. will leave the camp in a few weeks, the former proceeding to Beggar's Bush Barracks, and the latter to Richmond Barracks. The 86th are, according to present arrangements, to go to Aldershot in August. Great anxiety, mixed with some curiosity, is evinced by many officers here with regard to the coming (?) Royal Warrant on Promotion and Retirement. Mr. Hardy may well thank their patience, for patience in this case is more than a virtue, it is heavenly. If H.R.H. the Commander-in-Chief resigns, the Army will go into mourning. He spoke true words when he said the officers would do anything he asked them. An old gentleman—Bartolo—is much concerned at a report to the effect that the military would have no tents at Punchestown this year. The "venerable" need not be afraid. I daresay we shall have the pleasure of seeing his rubicund visage buried in a flagon of the sparkling "fiz." We have had a little extra excitement lately in the breaking out of two fires—one a block of officers' kitchens in G square, the other a Control office. The latter is credited to Ignatieff's secret emissaries, as, in case the Turks will not demobilize, he wishes to hamper our movements, and evidently regards the Control Department as a dangerous element in our Army organization.

FROM MILITIA TO LINE.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Mr. Hardy proposes that after the year 1878 Militia nominations, as they are given at present, are to cease, and that the lieutenants of Militia generally are to be allowed to compete for a certain number of commissions. This appears to be an admirable plan with regard to young men who may join the Militia after the date of this announcement; but I can hardly think that Mr. Hardy can be aware that there are a certain number of young gentlemen now serving in the Militia who have been promised by their commanding officers nominations in '79 and '80. These young gentlemen never would have joined the Militia except as a means of entering the Army, and now that they have incurred the great expense of uniform, regimental subscriptions, &c., it seems rather hard that they should be told that they cannot be nominated, but that they may be allowed to compete. It may be said that commanding officers had no right to make these promises, but I maintain that after Lord Cardwell's announcement that after serving at two trainings lieutenants of Militia would be eligible to be nominated to commissions in the Army, and that these were to be given in the proportion of one commission a-year to every Militia regiment of ten companies, they were quite justified in saying to young men that if they joined their regiments, conducted themselves properly, and did their duty well, they would be nominated in certain years. Without a distinct promise of this sort, young men could not be got to join, and Lord Cardwell's pledge, that he would find subalterns for the Militia, would have been unfulfilled. Trusting that Mr. Hardy may see the justice of allowing those lieutenants now actually serving in the Militia, under promises of nominations, to receive them as hitherto—I am, &c., R.

Lieut.-Col. C. H. S. Churchill, eldest son of the late Lord Charles Spencer Churchill, and grandson of George, fourth Duke of Marlborough, died at Monaco on the 3rd inst. The deceased was born May 27, 1828, and entering the Service at an early age, served with the Rifle Brigade during the Kaffir war of 1846-7 (medal). He also served with the brigade in the Crimea from the commencement of the campaign until July, 1855, taking part in the battles of Alma and Inkerman and the siege of Sebastopol, where he was severely wounded in the trenches, and at the close of the campaign received the medal and three clasps, the brevet of major, the Turkish medal, and the Fifth Class of the Turkish Order of the Medjidie. During the Indian mutiny campaign Col. Churchill served in Rohilcund with the 60th Rifles, and besides minor engagements was present at many actions. He attained the rank of lieut.-col. Sept. 5, 1865, and shortly after retired from the Service.

Lieut.-Gen. H. Smyth, C.B., who has been gazetted to the vacant colonelcy, that of the 2nd Queen's, commanded the 68th Light Infantry throughout the Eastern campaign of 1854-55, including the battles of Alma and Inkerman (horse killed), siege and fall of Sebastopol (medal with three clasps, C.B., Officer of the Legion of Honour, Sardinian and Turkish medals, and 4th Class of the Medjidie). He joined the Service June 28 1833; became major-gen., May 9, 1868; and lieut.-gen., June 24, 1876.

THE MEDICAL SERVICES, INDIA.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—At present there exists in India a dual medical administration in each circle. Every general of a division has two principal medical officers (deputy surgeon-generals), one to give advice about the black, and the other about the white soldiers. Everyone knows that one would be sufficient, and that by doing away with half of these administrators no detriment would result to the Service, and the Indian Government would save £50,000 annually. The dual system of doctors for the troops is a bad one, and the sooner we have one Service (medical) the better for the country and those concerned. There seems no reason why the Indian Medical Service should not take entire charge of all the troops in India; they know the country, and are used to its ways and habits of life; they have also experience in taking care of health, and in treating tropical diseases. The change might take place gradually, and without disturbing present appointments by adding so many juniors annually to the Indian Medical Department to fill vacancies by the withdrawal of the British medical officers. By this arrangement some £165,000 would be saved, without even considering how much more would follow from a single apothecary establishment.
